

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

France.**LUDWIG STEIN, Ph.D.,**Professor of Philosophy, University of Bern, Switzerland; Editor
of "Archiv für Geschichte der Philosophie," etc.**HERMANN L. STRACK, Ph.D.,**Professor of Old Testament Exegesis and Semitic Languages,
University of Berlin, Germany.**CHARLES TAYLOR, D.D., LL.D.,**Master of St. John's College, Cambridge, England; Editor of
"Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not *Mosheh*; *Isaac*, not *Yizhak*; *Saul*, not *Sha'ul* or *Shaül*; *Solomon*, not *Shelomoh*, etc.
2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.
3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.
4. The following system of transliteration has been used for Hebrew and Aramaic:

Ⲛ Not noted at the beginning or the end of a word; otherwise ' or by dieresis; *e.g.*, *Ze'eb* or *Meir*.

ב <i>b</i>	ז <i>z</i>	ל <i>l</i>	פ <i>p</i> with dagesh, <i>p</i>	ש <i>sh</i>
ג <i>g</i>	ח <i>h</i>	מ <i>m</i>	פ <i>p</i> without dagesh, <i>f</i>	ש <i>s</i>
ד <i>d</i>	ט <i>t</i>	נ <i>n</i>	צ <i>z</i>	ת <i>t</i>
ה <i>h</i>	י <i>y</i>	ס <i>s</i>	ק <i>k</i>	
ו <i>w</i>	כ <i>k</i>	ע <i>'</i>	ר <i>r</i>	

NOTE: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

א <i>a</i>	ו <i>u</i>	א <i>a</i>	ע <i>e</i>	י <i>i</i>
ע <i>e</i>	ע <i>e</i>	ו <i>o</i>	י <i>i</i>	
י <i>i</i>	ע <i>e</i>	א <i>a</i>	ו <i>u</i>	

Kamez haṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah*.]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ <i>a</i>	خ <i>kh</i>	ش <i>sh</i>	غ <i>gh</i>	ن <i>n</i>
ب <i>b</i>	د <i>d</i>	ص <i>s</i>	ف <i>f</i>	ه <i>h</i>
ت <i>t</i>	ذ <i>dh</i>	ض <i>ḍ</i>	ق <i>q</i>	و <i>w</i>
ث <i>th</i>	ر <i>r</i>	ط <i>t</i>	ك <i>k</i>	ي <i>y</i>
ج <i>j</i>	ز <i>z</i>	ظ <i>ẓ</i>	ل <i>l</i>	
ح <i>h</i>	س <i>s</i>	ع <i>'</i>	م <i>m</i>	

2. Only the three vowels—*a*, *i*, *u*—are represented:

أ <i>a</i> or <i>ā</i>	إ <i>i</i> or <i>ī</i>	و <i>u</i> or <i>ū</i>
------------------------	------------------------	------------------------

No account has been taken of the *imālah*; *i* has not been written *e*, nor *u* written *o*.

* In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al*; no account being taken of the assimilation of the *l* to the following letter; e.g., *Abū al-Salt*, not *Abu-l-Salt*; *Nafīs al-Daulah*, not *Nafīs ad-Daulah*. The article is joined by a hyphen to the following word.
4. At the end of words the feminine termination is written *ah*; but, when followed by a genitive, at; e.g., *Risālah dhāt al-Kursiyy*, but *Hī'at al-Aflāk*.
5. No account is taken of the overhanging vowels which distinguish the cases; e.g., 'Amr, not 'Amru or 'Amrun; Ya'aqūb, not Ya'aqūbun; or in a title, *Kitāb al-ʿAmānāt wal-I'tiqādāt*.

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	<i>a</i>	И и	<i>n</i>	Щ щ	<i>sch</i>
Б б	<i>b</i>	О о	<i>o</i>	Ъ ъ	mute
В в	<i>v</i>	П п	<i>p</i>	Ы ы	<i>y</i>
Г г	<i>h, v, or g</i>	Р р	<i>r</i>	Ь ь	halfmute
Д д	<i>d</i>	С с	<i>s</i>	Ѣ ѣ	<i>ye</i>
Е е	<i>e and ye</i> at the beginning.	Т т	<i>t</i>	Э э	<i>e</i>
Ж ж	<i>zh</i>	У у	<i>u</i>	Ю ю	<i>yu</i>
З з	<i>z</i>	Ф ф	<i>f</i>	Я я	<i>ya</i>
И и I i	<i>i</i>	Х х	<i>kh</i>	Ө ө	<i>f</i>
К к	<i>k</i>	Ц ц	<i>tz</i>	Ү ү	<i>œ</i>
Л л	<i>l</i>	Ч ч	<i>ch</i>	Й й	<i>i</i>
М м	<i>m</i>	Ш ш	<i>sh</i>		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; e.g., Moses Nigrin under *Nigrin*; Moses Zacuto under *Zacuto*; Moses Rieti under *Rieti*; all the Kimhis (or Kamhis) under *Kimhi*; Israel ben Joseph Drohobiczer under *Drohobiczer*. Cross-references are freely made from any other form to the most specific one; e.g., to Moses *Vidal* from Moses *Narboni*; to Solomon Nathan *Vidal* from Menahem *Meiri*; to Samuel *Kansi* from Samuel Astruc *Dascola*; to Jedaiah *Penini*, from both *Bedersi* and *En Bonet*; to *John* of Avignon from Moses de *Roguemaure*.
2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; e.g., *Johanan ha-Sandlar*; *Samuel ha-Nagid*; *Judah ha-Hasid*; *Gershon of Metz*, *Isaac of Corbeil*.
3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; e.g., de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas*.
4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn**, *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg	Abraham de Balmes	Abraham ben Benjamin Aaron
Abraham of Avila	Abraham ben Baruch	Abraham ben Benjamin Ze'eb
Abraham ben Azriel	Abraham of Beja	Abraham Benveniste

* When *ibn* has come to be a specific part of a name, as *ibn Ezra*, such name is treated in its alphabetical place under "I."

THE JEWISH ENCYCLOPEDIA

[NOTE: For topics beginning with **Ch**, not found in alphabetical order, see under **H**.]

CHAZARS: A people of Turkish origin whose life and history are interwoven with the very beginnings of the history of the Jews of Russia. The kingdom of the Chazars was firmly established in most of South Russia long before the foundation of the Russian monarchy by the Varangians (855). Jews have lived on the shores of the Black and Caspian seas since the first centuries of the common era. Historical evidence points to the region of the Ural as the home of the Chazars. Among the classical writers of the Middle Ages they were known as the "Chozars," "Khazirs," "Akatzirs," and "Akatzirs," and in the Russian chronicles as "Khwalisses" and "Ugry Byelyye."

The Armenian writers of the fifth and following centuries furnish ample information concerning this people. Moses of Chorene refers to the invasion by the "Khazirs" of Armenia and Iberia at the beginning of the third century: "The chaghan was the king of the North, the ruler of the Khazirs, and the queen was the chatoun" ("History of Armenia," ii. 357). The Chazars first came to Armenia with the Basileans in 198. Though at first repulsed, they subsequently became important factors in Armenian history for a period of 800 years. Driven onward by the nomadic tribes of the steppes and by their own desire for plunder and revenge, they made frequent invasions into Armenia. The latter country was made the battle-ground in the long struggle between the Romans and the Persians. This struggle, which finally resulted in the loss by Armenia of her independence, paved the way for the political importance of the Chazars. The conquest of eastern Armenia by the Persians in the fourth century rendered the latter dangerous to the Chazars, who, for their own protection, formed an alliance with the Byzantines. This alliance was renewed from time to time until the final conquest of the Chazars by the Russians. Their first aid was rendered to the Byzantine emperor Julian, in 363. About 434 they were for a time tributary to Attila—Sidonius Apollinaris relates that the Chazars followed the banners of Attila—and in 452 fought on the Catalanian fields in company with the Black Huns and Alans. The Persian king Kobad (488-531) undertook the construction of a line of forts through the pass between

Derbent and the Caucasus, in order to guard against the invasion of the Chazars, Turks, and other warlike tribes. His son Chosroes Anoshirvan (531-579) built the

Early History. wall of Derbent, repeatedly mentioned by the Oriental geographers and historians as Bab al-Abwab (Justi, "Gesch. des Alten Persiens," p. 208).

In the second half of the sixth century the Chazars moved westward. They established themselves in the territory bounded by the Sea of Azov, the Don and the lower Volga, the Caspian Sea, and the northern Caucasus. The Caucasian Goths (Tetraxites) were subjugated by the Chazars, probably about the seventh century (Löwe, "Die Reste der Germanen am Schwarzen Meere," p. 72, Halle, 1896). Early in that century the kingdom of the Chazars had become powerful enough to enable the chaghan to send to the Byzantine emperor Heraclius an army of 40,000 men, by whose aid he conquered the Persians (626-627). The Chazars had already occupied the northeastern part of the Black Sea region. According to the historian Moses Kalonkatsi, the Chazars, under their leader Jebu Chaghan (called "Zibel Chaghan" by the Greek writers), penetrated into Persian territory as early as the second campaign of Heraclius, on which occasion they devastated Albania ("Die Persischen Feldzüge des Kaisers Herakleios," in "Byzantinische Zeitschrift," iii. 364). Nicephorus testifies that Heraclius repeatedly showed marks of esteem to his ally, the chaghan of the Chazars, to whom he even promised his daughter in marriage. In the great battle between the Chazars and the Arabs near Kizliar 4,000 Mohammedan soldiers and their leader were slain.

In the year 669 the Ugrians or Zabirs freed themselves from the rule of the Obrians, settled between the Don and the Caucasus, and came under the dominion of the Chazars. For this reason the Ugrians, who had hitherto been called the "White" or "Independent" Ugrians, are described in the chronicles ascribed to Nestor as the "Black," or "Dependent," Ugrians. They were no longer governed by their own princes, but were ruled by the kings of the Chazars. In 735, when the Arab leader Mervan moved from Georgia against the Chazars, he attacked the Ugrians also. In 679 the Chazars subjugated the Bulgars and extended their sway farther west between the Don and the Dnieper, as far

as the head-waters of the Donetz in the province of Lebedia (K. Grot, "Moravia i Madyary," St. Petersburg, 1881; J. Danilevski and K. Grot, "O Puti Madyars Urala v Lebediyu," in "Izvestiya Imperatorskavo Russkavo Geograficheskavo Obshchestva," xix.). It was probably about that time that the

chaghan of the Chazars and his grantees, together with a large number of his heathen people, embraced the Jewish religion. According to A.

Harkavy ("Meassef Niddahim," i.), the conversion took place in 620; according to others, in 740. King Joseph, in his letter to Hasdai ibn Shaprut (about 960), gives the following account of the conversion:

"Some centuries ago King Bulan reigned over the Chazars. To him God appeared in a dream and promised him might and glory. Encouraged by this dream, Bulan went by the road of Darian to the country of Ardebil, where he gained great victories [over the Arabs]. The Byzantine emperor and the calif of the Ishmaelites sent to him envoys with presents, and sages to convert him to their respective religions. Bulan invited also wise men of Israel, and proceeded to examine them all. As each of the champions believed his religion to be the best, Bulan separately questioned the Mohammedans and the Christians as to which of the other two religions they considered the better. When both gave preference to that of the Jews, that king perceived that it must be the true religion. He therefore adopted it" (see Harkavy, "Sootshcheniya o Chazarakh," in "Yevreiskaya Biblioteka," vii. 153).

This account of the conversion was con-

sidered to be of a legendary nature. Harkavy, however (in "Bilbasov" and "Yevreiskaya Biblioteka"), proved from Arabic and Slavonian sources that the religious disputation at the Chazarian court is a historical fact. Even the name of Sangari has been found in a liturgy of Constantine the Philosopher (Cyrill). It was one of the successors of Bulan, named Obadiah, who regenerated the kingdom and strengthened the Jewish religion. He invited Jewish scholars to settle in his dominions, and founded synagogues and schools. The people were instructed in the Bible, Mishnah, and Talmud, and in the "divine service of the hazzanim." In their writings the Chazars used the Hebrew

letters (Harkavy, "Skazaniya," etc., of Kings, p. 241). Obadiah was succeeded by his son Hezekiah; the latter by his son Manasseh; Manasseh by Hanukkah, a brother of Obadiah; Hanukkah by his son Isaac; Isaac by

his son Moses (or Manasseh II.); the latter by his son Nisi; and Nisi by his son Aaron II. King Joseph himself was a son of Aaron, and ascended the throne in accordance with the law of the Chazars relating to succession. On the whole, King Joseph's account agrees generally with the evidence given by the Arabic writers of the tenth century, but in detail it contains a few discrepancies. According to Ibn Faqlan, Ibn Dastah, and others, only the king and the grantees were followers of Judaism. The rest of the Chazars were Christians, Mohammedans, and heathens; and the Jews were in a great minority (Frähn, "De Chazaris," pp. 13-18, 584-590). According to Mas'udi ("Les Prairies d'Or," ii. 8), the king and the Chazars proper were Jews; but the army consisted of Mohammedans, while the other inhabitants, especially the Slavonians and Russians, were heathens. From the work "Kitab al-Buldan," written about the ninth century (p. 121;

cited by Chwolson in "Izvestiya o Chazarakh," etc., p. 57), it appears as if all the Chazars were Jews and that they had been converted to Judaism only a short time before that book was written. But this work was probably inspired by Jaihani; and it may be assumed that in the ninth century many Chazar heathens became Jews, owing to the religious zeal of King Obadiah. "Such a conversion in great masses," says

Chwolson (*ib.* p. 58), "may have been the reason for the embassy of Christians from the land of the Chazars to the Byzantine emperor Michael. The report of the embassy reads as follows: 'Quomodo nunc Judæi, nunc Saraceni ad suam fidem eos molirentur convertere' " (Schlözer, "Nestor," iii. 154).

The history of the kingdom of the Chazars undoubtedly presents one of the most remarkable features of the Middle Ages. Surrounded by wild, nomadic peoples, and themselves leading partly a nomadic life, the Chazars enjoyed all the privileges of civilized nations, a well-constituted and tolerant government, a flourishing trade, and a well-disciplined standing army. In a time when fanaticism, ignorance, and anarchy reigned in western Europe, the kingdom of the Chazars could boast of its just and broad-minded administration; and all

Commercial a well-disciplined standing army. In
Relations. a time when fanaticism, ignorance,

who were persecuted on the score of their religion found refuge there. There was a supreme court of justice, composed of seven judges, of whom two were Jews, two Mohammedans, and two Christians, in charge of the interests of their respective faiths, while one heathen was appointed for the Slavonians, Russians, and other pagans (Mas'udi, *l.c.* ii. 8-11).

The Jewish population in the entire domain of the Chazars, in the period between the seventh and tenth centuries, must have been considerable. There is no doubt that the Caucasian and other Oriental Jews had lived and carried on business with the Chazars long before the arrival of the Jewish fugitives from Greece, who escaped (723) from the mania for conversion which possessed the Byzantine emperor Leo the Isaurian. From the correspondence between King Joseph and Hasdai it is apparent that two Spanish Jews, Judah ben Me'ir ben Nathan and Joseph Gagrais, had succeeded in settling in the land of the Chazars, and that it was a German Jew, Isaac ben Eliezer "from the land of Nyemetz" (Germany), who carried Hasdai's letter to the king. Saadia, who had a fair knowledge of the kingdom of the Chazars, mentions a certain Isaac ben Abraham who had removed from Sura to Chazaria (Harkavy, in Kohut Memorial Volume, p. 244). Among the various routes enumerated by the Arabic geographer Ibn Khurdadhbah (860-880) as being used by the Rahanite Jewish merchants, there is one leading from Spain or France, via Allemania, through the land of the Slavonians, close by Atel, the capital of the Chazars, whence they crossed the Sea of the Chazars (Caspian Sea) and continued their voyage, via Balkh, Transoxania, and the land of the Tagasga, to India and China. These merchants, who spoke Arabic, Persian, Greek, Spanish, French, and Slavonic, "traveled continuously from west to east from east to west by sea and by land." They carried eunuchs, serving-maids, boys, silks, furs, swords, imported musk, aloes, camphor, cinnamon, and other products of the Far East (Harkavy, "Skazaniya Musulmanskikh Pisatelei o Slavyanakh i Russkikh," pp. 48, 53; "Journal Asiatique," 1865).

Hasdai ibn Shaprut, who was foreign minister to 'Abd al-Rahman, Sultan of Cordova, in his letter to King Joseph of the Chazars (about 960), relates that the first information about that kingdom was communicated to him by envoys from Khorassan, and that their statements were corroborated by the ambassadors from Byzantium. The latter told him that the powerful Chazars were maintaining amicable relations with the Byzantine empire, with which they carried on by sea a trade in fish, skins, and other wares, the voyage from Constantinople occupying fifteen days. Hasdai determined to avail himself of the services of the Byzantine embassy to transmit his letter to the king of the Chazars, and with that view he despatched Isaac ben Nathan with valuable gifts to the emperor, requesting him to aid Isaac in his journey to Chazaria. But the Greeks interposed delays, and finally sent Isaac back to Cordova. Hasdai then decided to send his message by way of Jerusalem, Nisibis, Armenia, and Bardaa, but the envoys of the king of the Gebalim (Boleslav I. of Bohemia), who had then just arrived in Cordova, and among whom were two Jews, Saul and Joseph, suggested

a different plan. They offered to send the letter to Jews living in "Hungarin" (Hungary), who, in their turn, would transmit it to "Russ" (Russia), and thence through "Bulgar" (probably the country of the Bulgarians on the Kuban) to its destination (Atel, the capital of Chazaria). As the envoys guaranteed the safe delivery of the message, Hasdai accepted the proposal. He further expressed his thankfulness that God in His mercy had not deprived the Jews of a deliverer, but had preserved the remnant of the Jewish race.

Taking a keen interest in everything relating to the kingdom of the Chazars, Hasdai begs the king to communicate to him a detailed account of the geography of his country, of its internal constitution, of the customs and occupations of its inhabitants, and especially of the history of his ancestry and of the state. In this letter Hasdai speaks of the tradition according to which the Chazars once dwelt near the Scir (Serir) Mountains; he refers to the narrative of Eldad ha-Dani, who thought he had discovered the Lost Ten Tribes; and inquires whether the Chazars know anything concerning "the end of the miracles" (the coming of the Messiah). As to Eldad ha-Dani's unauthenticated account of the Lost Ten Tribes on the River Sambation, it may be interesting to note that, according to Idrisi, the city of Sarmel (Sarkel-on-the-Don) was situated on the River Al-Sabt (Sambat), which is the River Don. The name for Kiev, as given by Constantine Porphyrogenitus, is also Sambatas (*Σαμβάτας*). These appellations of the River Don and of the city of Kiev point evidently to Jewish-Chazar influences (Westberg, "Ibrahim ibn Ya'qub's Reisebericht über die Slavenlande aus dem Jahre 965," p. 134, St. Petersburg, 1898).

A complete account of the correspondence between Hasdai and King Joseph has been written by A. Harkavy ("Yevre-**The Chazarian Letters.**" *iskaya Biblioteka*, viii. 135), one of the leading authorities on the history of the Chazars, from which the following is, in substance, an extract:

The Chazarian correspondence was first published in the work "Kol-Mebasser" of Isaac Akrish (Constantinople, 1577), into whose hands these documents came while on a voyage from Egypt to Constantinople. He published them with the view of proving that even after the destruction of Jerusalem the Jews still had their own country, in accordance with the well-known passage in Genesis (xlix. 10), "the scepter shall not depart from Judah."

Among European scholars Johann Buxtorf, the son, was the first to become interested in the Chazarian letters, which he printed together with the text of Akrish in his Latin translation of "Cuzari" (Basel, 1600).

Buxtorf believed that the letters themselves and the entire history of the Chazarian kingdom were but fable, for the reason that no seafarers, merchants, or other travelers had brought any information concerning such a flourishing kingdom as that of the Chazars was reputed to be. The learned Orientalist D'Herbelot ("Bibliothèque Orientale," ii. 455, Paris, 1697), misled by a wrong conception of the "Cuzari" and its relation to the conversion of the Chazars to Judaism, leaves the authenticity of the correspondence an open question.

One of the greatest scholars of the 17th century, Samuel Bochart, in his derivation of the name of the Chazars, introduces the account of Joseph ben Gorion (Yosippon), and in his notes to the "Yuhasin" of Zacuto gives information about the Chazarian kingdom and the Sea of the Chazars obtained from the "Geographia Nubiensis" of the Arabian writer Idrisi (12th century; see "Geographia Sacra," 1646, p. 226). Bochart's views, however, are not important because he had no knowledge of the "Cuzari" or of the Chazarian letters. All the skeptics of that

time and those mentioned below had no knowledge of the facts concerning the Chazars and Chazarian Judaism as contained in Slavonic Russian sources, or of the "Acta Sanctorum," which discusses those sources. It is therefore not surprising that the first author of a comprehensive history of the Jews, Basnage, who in his "Histoire des Juifs," v. 446, Rotterdam, 1707, prints the Chazarian letters, has the boldness to declare as idle fancy, not only the kingdom of the Chazars, but even the existence of the Chazarian people, which was invented, he considers, by Jewish boastfulness.

About the same time Dom Augustine Calmet issued his Biblical researches, part of which treats of "the country whither the Ten Tribes were led away and where the said tribes now live." Calmet considers Media near the Caspian Sea to be "the country," and that it is also identical with "the country of the Chazars," which was glorified so much in the rabbinical writings. According to them the czar of the Chazars adopted the Jewish religion in the eighth century. Calmet, however, considers the whole story a fiction (Calmet, "Biblische Untersuchungen, Uebersetzt von Mosheim," iv. 406-407, Bremen, 1743).

BARATIER, "the remarkable child," also considered the story of the Chazars to be only a pleasing novel; but it may serve as an excuse for his opinion that when he wrote his work he was only eleven years of age (Baratier, "Voyage de R. Benjamin Fils de Jona de Tudela," ii. 235, Amsterdam, 1734). The Danish historiographer Frederick Suhm, who in 1779 wrote a remarkable work, for that time, on the Chazars, and who could not free himself from the view of the Hebraists of the time with regard to the letter of King Joseph, was the first to give a decided opinion in favor of the genuineness of the letter of Hasdai (Suhm, "Samlede Skrifter"). The ignorance of these writers is accounted for by the fact that only at the end of the eighteenth century were translations of the old Arabic writers, Mas'udi, Istakhri, Ibn Haukal, etc., on the Chazars, issued. The first to make use of the testimony of the Arabic writers to corroborate the accounts of the Jewish writers on the Chazars, was the Lithuanian historian Tadeusz CZACKI, who had the advantage of using copies of the Arabic manuscripts relating to the subject in the Library of Paris ("Rosprawa o Zydach," pp. 68-69, Wilna, 1807). The Russian historian Karamsin also made use of Mas'udi's information, given in the "Chrestomathy" of Silvestre de Sacy, and of Abulfeda's researches published in the fifth volume of Busching's "Historical Magazine."

The Russian academician Ch. Frähn and the Swedish scholar D'Ohsson collected and published, in the first quarter of the nineteenth century, all the Arabic testimony on the subject of the Chazars known at that time. The authenticity of the letter of King Joseph has, however, since been fully established by the very material which those scholars had at their disposal. Frähn acknowledges the genuineness of Hasdai's letter, but not that of King Joseph. In the same way D'Ohsson, although he found the information of the Arabic and Byzantine writers in conformity with the contents of the Chazar letters, could not help doubting its genuineness ("Peuples du Caucase," p. 205). This may be explained by the fact that as they did not understand Hebrew they did not care to commit themselves on a question which lay outside of their field of investigation.

But the Jewish scholars had no doubts whatever as to the genuineness of the Chazarian documents, especially since the beginning of the critical school of Rapoport and Zunz. They were made use of by many writers in Spain in the twelfth century; as, for instance, by Judah ha-Levi (1140), who displayed a close acquaintance with the contents of King Joseph's epistle (Cassel, "Das Buch Kusari," pp. 13-14, Leipzig, 1869), and by the historian Abraham ibn Daud of Toledo (1160), who distinctly refers to the same letter ("Sefer ha-Ḳabbalah," p. 46b, Amsterdam, 1711).

Later on, with the persecutions which ended with the expulsion of the Jews from Spain, the Chazarian documents, together with many other treasures of medieval Jewish literature, were lost to the learned, and were not recovered until the end of the sixteenth century, when they were found in Egypt by Isaac Ḳrish. The Jews of that time took little interest, however, in the history of the past, being absorbed by the cheerless events of their own epoch. The first reference, therefore, to the Chazar letters is by Rabbi Bacharach of Worms, in 1679, who discovered proofs of the genuineness of Hasdai's letter in an acrostic in the poem which served as a preface, and which reads as follows: "I, Hasdai, son of Isaac, son of Ezra ben Shaprut" (see "Hut ha-Shani," p. 110b, Frankfurt-on-the-Main, 1769).

This acrostic, however, again remained unnoticed until it was rediscovered by Frensdorf, independently of Bacharach, in 1836 ("Zeitschrift für Jüdische Theologie," ii. 513). Four years later (1840) the genuineness of Hasdai's letter was absolutely

proved by Joseph Zedner. He also acknowledged the authenticity of the chaghan's letter, but did not submit proofs ("Auswahl Historischer Stücke aus der Jüdischen Literatur," pp. 26-36, Berlin, 1840). At the same time Solomon Muuk gave his opinion in favor of the genuineness of both letters ("Orient, Lit." i. 136; "Archives Israélites," 1848, p. 343; "Mélanges de Philosophie Juive et Arabe," p. 483, Paris, 1850). Since then most of the Jewish scholars have adopted his view, including Lebrecht, 1841; Michael Sachs, 1845; S. D. Luzzatto, 1846-50; Z. Frankel, 1852; D. Cassel and H. Jolovicz, 1853, 1859, 1872; Leop. Löw, 1855-74; Hartog, 1857; Jost, 1858; Steinschneider, 1860; Grätz, 1860 and 1871; Harkavy, beginning with 1864; Geiger, 1865; Kraushar, 1866; D. Kaufmann, 1877; and many others. A comparison of Jewish with other sources, especially with Arabic, as far as they were then known, must be credited to E. Carmoly. He began his work with the comparison of the various sources in his "Revue Orientale" (1840-44). He completed it in 1847 ("Itinéraires de la Terre Sainte," pp. 1-110, Brussels, 1847). Some useful supplements to Carmoly's works were presented by Paulus Cassel in 1848 and 1877 ("Magyarische Alterthümer," pp. 183-219, Berlin, 1848; "Der Chazarische Königsbrief aus dem 10. Jahrhundert," Berlin, 1877).

The results of these investigations were accepted by the following Christian scholars: Grigoryev, 1834; Schafarik, 1848; Lelevel, 1851-60; Vivien de San Martin, 1851; S. Solovoy, 1851-1874; Byelevski, 1864; Brun, 1866-77; Bilbasov, 1868-71; Kunik, 1874 and 1878; and many others. Still there were some writers who were misled by the earlier opinions, and on the strength of them spoke skeptically of the documents; as Jacob Goldenthal (1848); Dobryakov (1865); and even the historian Ilovalski (1876).*

In 960 Atel (or Itil), at that time the capital of the kingdom of the Chazars, was situated about eight miles from the modern Astrakhan, on the right bank of the lower Volga, which river was also called "Atel"

or "Itil." The meaning of "Atel" in the Gothic language is "father" or "little father," that of "Itil" in the Chazaria. Turanian language is "river"; it is difficult to decide which of these two

words gave the river its name. The western part of the city was surrounded by a wall pierced by four gates, of which one led to the river, and the others to the steppes. Here was situated the king's palace, which was the only brick building in the city. According to Mas'udi, the city was divided into three parts, the palace of the chaghan standing on an island. The king had twenty-five wives, all of royal blood, and sixty concubines, all famous beauties. Each one dwelt in a separate tent and was watched by a eunuch. The authority of the chaghan was so absolute that during his absence from the capital, even his viceroy, or coregent (called "isha," or "bek," or "pech"), was powerless. The viceroy had to enter the chaghan's apartments barefooted and with the greatest reverence. He held in his right hand a chip of wood, which he lit when he saluted the chaghan, whereupon he took his seat to the right of the latter, on the throne, which was of gold. The walls of the palace were also gilded, and a golden gate ornamented the palace.

All the other dwellings of the then populous city were insignificant mud huts or felt tents. The position of the chaghan of the Chazars was evidently similar to that of the former mikados of Japan, while the bek, his military coregent, corresponded

*The translation of the letters given by Harkavy is from a manuscript in the St. Petersburg Public Library. The genuineness of the St. Petersburg manuscript has been demonstrated by him (against P. Cassel, Vambéry, etc.), in the "Russische Revue" and in "Meassef Niddahim," i., No. 10, pp. 149 et seq.

to the shoguns of the latter. Emperor Heraclius in 626 concluded a treaty with the chaghan of the Chazars, and Constantine Copronymus, in his description of the embassy of the Chazars (834), states that it was sent by the "chaghan and the pech." Ibn Fadlan relates that the king of the Chazars was called the "great chaghan," and his deputy "chaghan-bloa" ("bey," "bcg," or "bek"). The bek led the army, administered the affairs of the country, and appeared among the people; and to him the neighboring kings paid allegiance. It will thus be seen that the extent of the powers of the bek varied with the times. When the chaghan wanted to punish any one, he said, "Go and commit suicide"—a method resembling the Japanese custom of *hara-kiri*.

The mother of the chaghan resided in the western part of the city, whose eastern part, called "Chazaran," was inhabited by merchants of various nationalities. The city and its environs were heavily shaded by trees. The Turkish and the Chazar languages predominated. The entourage of the chaghan, numbering 4,000 men, consisted of representatives of different nationalities. The White Chazars were renowned for their beauty; and according to Demidov, the mountaineers of the Crimea contrasted very favorably with the Nogay Tatars, because they were considerably intermixed with the Chazars and with the equally fine race of the Kumans. Besides the White Chazars, there were also Black Chazars (who were almost as dark as the Hindus), Turkish immigrants, Slavonians, Hunno-Bulgars, Jews, who lived mostly in the cities, and various Caucasian tribes, such as the Abghases, Kabardines, Ossetes, Avars, Lesghians, etc.

The Chazars cultivated rice, millet, fruit, grains, and the vine. They had important fisheries on the Caspian Sea, and the sturgeon constituted the main article of food. The Arabic writer Al-Makdisi remarks: "In Chazaria there are many sheep, and Jews, and much honey"

Trade and Commerce. ("Bibl. Geograph. Arabic." iii., Leyden, 1877). From the upper Volga they brought down from the Mordvines and Russians honey and valuable furs, which they exported to Africa, Spain, and France. They supplied the market of Constantinople with hides, furs, fish, Indian goods, and articles of luxury. The chaghan and his suite resided in the capital only during the winter months. From the month of Nisan (April) they led a nomadic life in the steppes, returning to the city about the Feast of Hanukkah (December). The estates and vineyards of the chaghan were on the island on which his palace was situated. Another city of the Chazars, Semender, between Atel and Bab al-Abwab, was surrounded by 40,000 vines. It was identical with the modern Tarku, near Petrovsk, which is now inhabited by Jews and Kумыks. The latter are supposed to be descended from the Chazars (Klaproth, "Mémoire sur les Khazars," in "Journal Asiatique," 1823, iii.).

At the Byzantine court the chaghan was held in high esteem. In diplomatic correspondence with him the seal of three solidi was used, which marked him as a potentate of the first rank, above even the pope and the Carolingian monarchs. Emperor

Justinian II., after his flight from Kherson to Doros, took refuge during his exile with the chaghan, and married the chaghan's daughter Irene,

Relations with Byzantium. who was famous for her beauty (702) (Nicephorus, "Breviarium," ed. Bonn, 1837, p. 46). Emperor Leo IV., "the Chazar" (775-780), the son of Constantine, was thus a grandson of the king of the Chazars. From his mother he inherited his mild, amiable disposition. Justinian's rival, Bardanes, likewise sought an asylum in Chazaria. Chazarian troops were among the body-guard of the Byzantine imperial court; and they fought for Leo VI. against Simeon of Bulgaria in 888.

King Joseph in his letter to Hasdai gives the following account of his kingdom:

"The country up the river is within a four months' journey to the Orient, settled by the following nations who pay tribute to the

Chazarian Territories. Chazars: Burtas, Bulgar, Suvar, Arissu, Tzarmis, Ventit, Syever, and Slaviyun. Thence the boundary-line runs to Buarasm as far as the Jordjan. All the inhabitants of the seacoast that live within a month's distance pay tribute to the Chazars. To the south Semender, Bak-Tadlu, and the gates of the Bab al-Abwab are situated on the seashore. Thence the boundary-line extends to the mountains of Azur, Bak-Bagda, Sridi, Kiton, Arku, Shaula, Sagsar, Albusser, Ukusser, Kladusser, Tzidiag, Zunikh, which are very high peaks, and to the Alans as far as the boundary of the Kassa, Kalkial, Takat, Gebul, and the Constantinian Sea. To the west, Sarkel, Samkrtz, Kertz, Sugdai, Aluss, Lambat, Bartnit, Alubika, Kut, Mankup, Budik, Alma, and Grusin—all these western localities are situated on the banks of the Constantinian (Black) Sea. Thence the boundary-line extends to the north, traversing the land of Basa, which is on the River Vaghez. Here on the plains live nomadic tribes, which extend to the frontier of the Gagries, as innumerable as the sands of the sea; and they all pay tribute to the Chazars. The king of the Chazars himself has established his residence at the mouth of the river, in order to guard its entrance and to prevent the Russians from reaching the Caspian Sea, and thus penetrating to the land of the Ishmaelites. In the same way the Chazars bar enemies from the gates of Bab al-Abwab."

Even the Russian Slavonians of Kiev had, in the ninth century, to pay as yearly tax to the Chazars a sword and the skin of a squirrel for each house.

At the end of the eighth century, when the Crimean Goths rebelled against the sovereignty of the Chazars, the latter occupied the Gothic capital, Doros. The Chazars were at first repulsed by the

War with Goths. Gothic bishop Joannes; but when he had surrendered, the Goths submitted to the rule of the Chazars (Braun,

"Die Letzten Schicksale der Krimgothen," p. 14, St. Petersburg, 1890; Tomaschek, "Die Gothen in Taurien," Vienna, 1881).

In the second quarter of the ninth century, when the Chazars were often annoyed by the irruptions of the Petchenegs, Emperor Theophilus, fearing for the safety of the Byzantine trade with the neighboring nations, despatched his brother-in-law, Petron Kamateros, with materials and workmen to build for the Chazars the fortress Sarkel on the Don (834). Sarkel ("Sar-kel," the white abode; Russian, "Byelaya Vyezha") served as a military post and as a commercial depot for the north.

In the second half of the ninth century the apostle of the Slavonians, Constantine (CYRIL), went to the Crimea to spread Christianity among the Chazars (Tomaschek, *l. c.* p. 25). At this time the kingdom of the Chazars stood at the height of its power, and was constantly at war with the Arabian califs and

their leaders in Persia and the Caucasus. The Persian Jews hoped that the Chazars might succeed in destroying the califs' country (Harkavy, in *Kohut Memorial Volume*, p. 244). The high esteem in which the Chazars were held among the Jews of the Orient may be seen in the application to them—in an Arabic commentary on Isaiah ascribed by some to Saadia, and by others to Benjamin Nahawandi—of Isa. xlviii. 14: "The Lord hath loved him." "This," says the commentary, "refers to the Chazars, who will go and destroy Babel"—i.e., Babylonia—a name used to designate the country of the Arabs (Harkavy, in "Ha-Maggid," 1877, p. 357).

The chaghans of the Chazars, in their turn, took great interest in and protected their coreligionists, the Jews. When one of the chaghans received information (c. 921) that the Mohammedans had destroyed a synagogue in the land of Babung (according to Harkavy the market of Camomile in Atel is meant), he gave orders that the minaret of the mosque in his capital should be broken off, and the muezzin executed. He declared that

**Jewish
Sym-
pathies.**

he would have destroyed all the mosques in the country had he not been afraid that the Mohammedans would in turn destroy all the synagogues in their lands (Ibn Faqlan, in Frähn, "De Chazaris," p. 18). In the conquest of Hungary by the Magyars (889) the Chazars rendered considerable assistance. They had, however, settled in Pannonia before the arrival of the Magyars. This is evident from the names of such places as Kozar and Kis-Kozard in the Nógrad, and Great-Kozar and Ráczkozar in the Baranya district (Karl Szabó, "Magyar Akadémiai Ertesítő," i. 132, cited by Vambéry in his "Ursprung der Magyaren," p. 132; compare Kohn, "A Zsidók Története Magyarországon"—The History of the Jews in Hungary—i. 12 *et seq.*).

Mas'udi relates the following particulars concerning the Chazars in connection with Russian invasions of Tabaristan and neighboring countries:

"After the year 300 of the Hegira (913-914), five hundred Russian [Northmen's] ships, every one of which had a hundred men on board, came to the estuary of the Don,

**War with
Russians.**

which opens into the Pontus, and is in communication with the river of the Chazars, the Volga. The king of the Chazars keeps a garrison on this side of the estuary with efficient, warlike equipment to exclude any other power from its passage. The king of the Chazars himself frequently takes the field against them if this garrison is too weak.

"When the Russian vessels reached the fort they sent to the king of the Chazars to ask his permission to pass through his dominions, promising him half the plunder which they might take from the nations who lived on the coast of this sea. He gave them leave. They entered the country, and continuing their voyage up the River Don as far as the river of the Chazars, they went down this river past the town of Atel and entered through its mouth into the sea of the Chazars. They spread over el-Jil, ed-Dailem, Tabaristan, Aboskum, which is the name for the coast of Jordjan, the Naphtha country, and toward Aderbijan, the town of Ardobil, which is in Aderbijan, and about three days' journey from the sea. The nations on the coast had no means of repelling the Russians, although they put themselves in a state of defense; for the inhabitants of the coast of this sea are well civilized. When the Russians had secured their booty and captives, they sailed to the mouth of the river of the Chazars and sent messengers with money and spoils to the king, in conformity with the stipulations they had made. The Larissians and other Moslems in the country of the Chazars heard of the attack of the Russians, and they said to their king: 'The Russians have invaded the country of our Moslem brothers; they have shed their blood and made their wives and children

captives, as they are unable to resist; permit us to oppose them.' The Moslem army, which numbered about 15,000, took the field and fought for three days. The Russians were put to the sword, many being drowned, and only 5,000 escaping. These were slain by the Burtas and by the Moslems of Targhiz. The Russians did not make a similar attempt after that year" (Mas'udi [tr. by Sprenger], in "Historical Encyc.," pp. 416-420).

Notwithstanding the assertions of Mas'udi, the Russians invaded the trans-Caucasian country in 944, but were careful in this expedition to take a different route.

This seems to have been the beginning of the downfall of the Chazar kingdom. The Russian Varangians had firmly established themselves at Kiev, while the powerful dominions of the Chazars had become dangerous to the Byzantine empire, and Constantine Porphyrogenitus, in his instructions on government written for his son, carefully enumerates the Alans, the Petchenegs, the Uzes, and the Bulgarians as the forces on which he must rely to check the influence of the Chazars.

Five years after the correspondence between the king of the Chazars and Hasdai ibn Shaprut (965), the Russian prince Swyatoslaw made war upon the Chazars, apparently for the possession of Taurida and Taman. The Russians had already freed from the rule of the Chazars a part of the

**Decline and
Fall of the
Chazars.** Black Bulgars, and had established a separate Russian duchy under the name of "Tmutrakan"; but in the Crimean peninsula the Chazars still

had possessions, and from the Caucasian side the Russian Tmutrakan suffered from the irruption of the Kossogian and Karbardine princes, who were tributary to the chaghan of the Chazars. The fortress of Sarkel and the city of Atel were the chief obstacles to Russian predatory expeditions on the Caspian Sea. After a hard fight the Russians conquered the Chazars. Swyatoslaw destroyed Sarkel, subdued also the tribes of the Kossogians and Yass (Alans), and so strengthened the position of the Russian Tmutrakan. They destroyed the city of Bulgar, devastated the country of the Burtas, and took possession of Atel and Semender.

Four years later the Russians conquered all the Chazarian territory east of the Sea of Azov. Only the Crimean territory of the Chazars remained in their possession until 1016, when they were dispossessed by a joint expedition of Russians and Byzantines. The last of the chaghans, George Tzula, was taken prisoner; some of the Chazars took refuge in an island of the Caspian, Siahcouye; others retired to the Caucasus; while many were sent as prisoners of war to Kiev, where a Chazar community had long existed. Many intermingled in the Crimea with the local Jews; the Krimtschaki are probably their descendants—perhaps some of the Subbotniki also ("Voskhod," 1891, iv.-vi.). Some went to Hungary, but the great mass of the people remained in their native country. Many members of the Chazarian royal family emigrated to Spain. Until the thirteenth century the Crimea was known to European travelers as "Gazaria," the Italian form of "Chazaria."

H. R.

CHEBAR: Name of a Babylonian river or canal, by the side of which Ezekiel "saw visions" (Ezek. i. 1, 3; iii. 15, 23; x. 15 *et seq.*). The Hebrew "nahar" (נהר), usually rendered "river," was evidently used also for "canal" (= Babylonian "naru"; compare Ps. cxxxvii. 1, "naharoth Babel"; that is, "canals of Babylon"). In Babylonian, "Naru Kabaru" means, literally, "great canal." The river has usually been identified with the Chabor, a tributary discharging its waters into the Euphrates at Circesium; a mistake not to be justified in view of the definite statement that it was in the land of Chaldea. The stream intended is undoubtedly the Kabaru, a large navigable canal near Nippur, twice mentioned in an inscription recovered by the Babylonian Expedition of the University of Pennsylvania (see Hilprecht and Clay, "Babylonian Expedition of the University of Pennsylvania," ix. 50).

R. W. R.

CHECHELNIK: Town in the government of Podolia, Russia, having (1898) a population of about 7,000, including 1,967 Jews. Their principal occupation is commerce; but 352 are engaged in various handicrafts, and 96 are journeymen. About 200 Jews earn a livelihood as farm-laborers; and 41 are employed in the local factories. There are no charitable organizations, and poverty among the Jewish inhabitants is general. A private school for boys with 100 pupils, and 23 *hadarim* with 367 pupils, constitute the Jewish educational institutions of Chechnik.

H. R.

S. J.

CHECHERSK: Town in the government of Mohilev, Russia, with a population (in 1898) of 2,819, including 1,692 Jews. The latter are principally engaged in commerce, but 323 follow various handicrafts. Of these 158 own shops, 60 are wage-workers, and 105 are apprentices. Shoemaking is the predominant industry, 120 persons being engaged in it. There are, besides, 31 day-laborers. The charitable organizations consist of a *Gemilut Hasadim*, a *Lehem Ebyonim* and a *Bikkur Holim*. Over 40 families apply yearly for aid for the Passover holidays. The educational institutions include an elementary government school with 80 pupils, 15 being Jews, and 15 *hadarim*, with 140 scholars. When the uprising under Bogdan Chmielnicki broke out in 1648, Chechersk was taken by the Cossacks, who massacred all the Jews there.

CHEDORLAOMER.—Biblical Data: Name of a king of Elam (Gen. xiv. 1), who made conquests as far west as Canaan and exercised supremacy over its southeastern part. After paying tribute to him for twelve years, the five local kings, or princes, rebelled in the thirteenth year, and in the fourteenth were assailed and reduced by Chedorlaomer, assisted by AMRAPHEL, King of Shinar; ARIOCH, King of Ellasar, and Tidal, King of Goyim.

—Critical View: The name "Chedorlaomer" has long been the subject of controversy, that has increased, rather than diminished, since the discovery of native Elamite and Babylonian documents. The first clue to an identification of the name is found in the fact, everywhere now regarded as established, that the name is a correct Elamite compound. Its first half, "Chedor" (= "Kudur," "servant of," or "worshiper of"), is found frequently in Elamite proper names, such as "Kudur-nanḫundi" ("nahḫunte" in Susian or Elamite) and "Kudur-mabuk." The latter half of the name, "la'omer," (= "lagamaru"), is the name of an Elamite deity, mentioned by Assurbanipal.

Apart from these certain facts, all else is matter of controversy. Scheil believed that he had found the name on a tablet of Hammurabi in the form "Ku-du-la-uh-ga-mar" ("Revue Biblique," 1896, p. 600), but the name is now proved to be "Inuḫshamar." Pinches has found the name "Kudur-ku-kumal" in a tablet dating probably from the period of the Arsacidae. In spite of the difficulty of the reading and the late date of the text, it is possible that the person intended is really the same as the Chedorlaomer of Genesis, though most scholars are opposed to this view. The tablet in question is couched in a florid, poetical style, and little material of historical value can be gleaned from it. For the present the records give only the rather negative result that from Babylonian and Elamite documents nothing definite has been learned of Chedorlaomer. It is, however, a matter of some consequence in estimating the character of the narrative in Gen. xiv. to have learned that the name of Chedorlaomer is not a fiction.

BIBLIOGRAPHY: Schrader, *Keilinschriften des Alten Testaments*, 2d ed., pp. 135 *et seq.*; (compare paper read by Pinches before the Victoria Institute) Jan. 20, 1896; L. W. King, *Letters and Inscriptions of Hammurabi*, 1898, vol. i.

R. W. R.

CHEESE: The curd of milk run into molds and allowed to coagulate. This article of food was known to the ancient Hebrews. Three expressions seem at least to indicate that various kinds and forms of cheese were in use: 1. "Gebinah" (Job x. 10) denotes the ordinary article, prepared in Biblical times as it is to this day in Syria. Milk is passed through a cloth, and the curd, after being salted, is molded into disks about the size of the hand and dried in the sun. From such cheese a cool, acid drink is made by stirring it in water. 2. "Harize he-ḥalab" (I Sam. xvii. 18) appears to have been made of sweet milk, and to have been something like cottage-cheese. It is not certain what "she-fot baḳar" (II Sam. xvii. 29) signifies. Perhaps the Masoretic reading is corrupt. If not, "cream"

or "cheese" may be its meaning. 3. "Hem'ah," ordinarily "cream," signifies "cheese" in Prov. xxx. 33.

In post-Biblical days the manufacture of cheese was in the hands of a distinct guild. Josephus ("B. J." v. 4, § 1), at all events, mentions "the valley of the cheese-makers," and many are the references in the Talmudic writings to the preparation of hard cheese (Shab. 96a; Tosef., Shab. x.; Yer. Shab. vii. 10a, end; Yer. Ma'as. ii. 3a; Yer. B. M. vii. 11b). Yer. Shek. vii. 3c mentions a disk ("iggul") of cheese. Cheese and water are mentioned as constituting a very poor meal (Yer. M. K. iii. 83b; Yer. Ned. v. 40d, beginning).

Cheese was one of the articles included in the list of eighteen prohibitions enacted at the famous meeting in the upper chamber of Hananiah ben Hezekiah ben Garon (Shab. i. 7), which could never be revoked because they who had adopted them gave their lives for them (Yer. Shab. i. 7; 3c. The Mishnah does not enumerate them specifically; in the Gemara there are long debates concerning them; but a Baraita in the name of R. Simeon ben Yoḥai (*ib.*) furnishes the particulars. According to this war measure, Jews were forbidden to buy bread, oil, cheese, wine, vinegar, etc., from an idolater. In the Mishnah ('Ab. Zarah, ii. 5, 29a) cheese from Bet Oneiki (= Bithynia; Yer. reading *וְהַיִּיקִי*; Tosefta has here *וְהַיִּיקִי*; according to Rapoport, "Erek Milin," Venecia in Media is referred to) is declared to be "issur" (interdicted), Rashi explaining that cheese from any other locality may be eaten. According to R. Meir this issur carries with it the prohibition against using cheese for other purposes than eating, an opinion not accepted by the Rabbis. R. Joshua is reported as accounting for the prohibition by the fact that the makers of cheese, who were all either pagans (*נוֹכְרִים*) or Bithynians (see Pliny, "Historia Naturalis," xi. 97; Wiesner, in "Ben Chananja," 1866, col. 75), placed the cheese (to ripen it) in the rennet-bag of an animal that had died of disease. Another of the reasons advanced is that most of the Bithynian calves whose stomachs were used in the manufacture of cheese, were slaughtered for idolatrous rites ('Ab. Zarah 34b). Besides this, the fact of the contact of the rennet with the cheese would class the mixture, if made, under the general prohibition that forbade the mixing of milk with meat.

The later religious practise has been to interdict all cheese made by non-Jews suspected of idolatry. Cheese made by Jews from the milk of animals originally destined for idolatry seems also to have been forbidden, and so was cheese of heathen manufacture, even if kept in leaves or herbs (see Shulhan 'Aruk, Yoreh De'ah, 115, 2; "Yad," Ma'akalot Asurot, iii.).

So strictly was this prohibition observed that for a long time the Jews of England used to get their cheese from Holland so as to be certain that it had been prepared according to Jewish custom.

E. G. H.

CHELLUS (*Χελους*; Codex Sinaiticus, *Χεσλους*; Syriac version, *כלן*): Place mentioned in Judith i. 9 as lying before Kadesh and the River of Egypt.

Reland ("Palæstina ex Monumentis Veteribus Illustrata," p. 717) is probably correct in identifying it with the city of Elusa (according to the Targum, *הלוצה*), which was situated on the south of Beersheba, and was noted for its particular cult. Less probable is the supposition of Movers, according to which Chellus is the Biblical "Halhul," mentioned in Joshua xv. 58. The name does not occur in the O. T., but is found in the form "Alusa" in Josephus ("Ant." xiv. 1, § 4); not identical with "Allus," mentioned by Eusebius and Jerome ("Onomasticon," pp. 85, 6; 211, 3). The modern name is "Chalasa," and the place contains only ruins.

F. Bu.

CHELM or **CHOLM**: Town in the government of Kovno, Russia. It has a population of about 4,200, all of whom, with the exception of about 300, are Jews. Most of them are engaged in mercantile pursuits, only 549 being artisans. The town has a considerable trade in leather, wool, flax, hemp, bristles, and lumber, shipping these products to commercial centers, such as Königsberg, Riga, and Libau. About 30 Jews find employment in the local factories, corn mills, and sawmills; 80 are journeymen, draymen, and porters; 30 are engaged in gardening, cultivating a tract of 30 deciatines, which they partly own and partly hold on lease; and 8 live by dairying. In the vicinity of the town are several settlements inhabited by Jewish agriculturists.

The charitable institutions include societies for the visitation of the sick, for the relief of the poor, and for affording temporary shelter to the destitute. The only educational institutions are the *ḥadarim*.

S. J.

CHELM, EPHRAIM B. JOSEPH. See EPHRAIM B. JOSEPH CHELM.

CHELM, SOLOMON B. MOSES. See SOLOMON B. MOSES CHELM.

CHELOD: A name occurring in Judith i. 6b, and designating apparently the Chaldeans. In place of the rendering of the A. V., "many nations of the sons of Chelod assembled themselves to battle in the plain of Arioch in the days of Nebuchadnezzar and Arphaxad," it is perhaps better to translate—following the Greek version—"there came together many nations unto the array of the sons of Cheleul." The Syriac renders "to fight against the Chaldeans." And while it is true that Nebuchadnezzar is called "king of the Assyrians" in Judith, and not "of the Chaldeans," it is to be remembered that the term "Chaldeans" is used in the late Book of Daniel as a race-name for the Babylonians of the time of Nebuchadnezzar (see Prince, "Daniel," pp. 59-61). The text of Judith seems to imply that the "sons of Chelod" were Nebuchadnezzar's army. Although it is not impossible that "Chelod" or "Cheleul" comes from a corrupt Aramaic form denoting "Chaldeans," the whole matter is very uncertain.

The idea that Calneh is meant is quite as improbable as the theory that the word is from the Hebrew "holed" (mole), and that "children of the mole" is an opprobrious term for the Syrians (Ewald, "Gesch. des Volkes Israel," iii. 543).

J. JR.

J. D. P.

CHELUB: A Hebrew word meaning a cage, as in Jer. v. 27. It is also the name of two men: (1) The brother of Shuah and father of Mehir of the tribe of Judah (I Chron. iv. 11). In the Septuagint *Χαλῶβ*. (2) The father of David's chief gardener, Ezri (I Chron. xxvii. 26), 1014 B.C. In the Septuagint *Χελῶβ*.
E. G. H.

J. D. B.

CHELUBAI: This is probably another form of the name CALEB. It occurs in I Chron. ii. 9.
E. G. H.

G. B. L.

CHEMARIM: Plural of *כמר*; occurs as transliteration of the Hebrew in the English translation of Zeph. i. 4, and also as the marginal reading both in A. V. and R. V. to II Kings xxiii. 5 and Hosea x. 5, where the text renders the Hebrew by "idoltrous priests" and "priests." In Zeph. i. 4 the Septuagint omits it, and this in connection with the parallelism goes far to indicate that there it is an interpolation. But Wellhausen and others have, by emending the passage in Hosea iv. 4, *ועמך כמרי*, to read *ועמי כמרי* (my people like its idoltrous priests), claimed for the word another passage in old Hebrew writings.

The meaning of the word is well assured to be "priests." It occurs with certainty in this acception in Semitic inscriptions (Halévy, in "Rev. Sémi." 1896, pp. 280, 282; "C. I. S." ii. 170), and possibly as "kamiru" on the El-Amarna tablets (Bezold, "Oriental Diplomacy," p. 92). In the Aramaic and in the Peshitta "kumra" stands for "priest" without tinge of evil sense. In Neo-Hebrew *כומר* designates a Catholic priest and monk. In the passages quoted above, the term without doubt carries a by-flavor of disrepute. It is the "idol-worshipping priest" that is so denominated. And in this sense the appellation is very frequent in the Talmud (*נעשה כומר לעבודה זרה*, 'Ar. 30b; *זרה היה כומר לעבודה זרה*, Pesik. R. 65c).

The etymology, however, is not so clear. Usually it is associated with the verb "kamar," to be black. Kimhi, among others, is of this opinion, and derives the meaning "priest" from the circumstance that the "priests wore black garments." Others connect the root with the idea to be sad, "kumra" being a sad person; i.e., an ascete, monk, priest. Delitzsch, in "Assyrisches Handwörterbuch," holds it to have sprung from "kamaru," to overthrow, to prostrate, the "priest" being he who prostrates himself before the idol. Perhaps the meaning of *כמר* in the Nif'al ("to grow hot") best explains the transition to "priest" with a by-sense of "reprobate." The old Semitic idols were without exception worshiped by intemperate (sexual) excesses. The "hot" "exciting man" was the priest *κατ' ἐξοχήν*.

E. G. H.

CHEMEROVITZ: Small town in the government of Podolia, Russia, with (in 1898) an almost exclusively Jewish population of 1,282. About 160 Jews follow various trades, but the bulk of the population is engaged in mercantile pursuits. Hair sacks form the principal article of commerce, being exported to the value of 100,000 rubles annually.

Poverty is increasing to such a degree that the scanty funds of the two existing charitable organizations can barely meet the needs of the poorer part of the community. The educational institutions

include a Talmud Torah, with 10 pupils, and 10 *hadarim* (which are subdivided into 3 primary, 3 middle, and 4 higher departments), with 178 pupils.
H. R. S. J.

CHEMNITZ: Town in Saxony, with a Jewish population of 1,150. Jews first settled there in the latter half of the nineteenth century. In 1874 they organized a congregation, although on feast-days religious services had been held since 1871. The *hebra kaddisha* and the Jewish Women's Association were founded in 1876. On March 29, 1878, the prayer-house was consecrated; and in 1879 a cemetery was secured. The first rabbi of the congregation was Abraham Chatiner (d. 1882); he was succeeded by Jacob Mühlfelder, who is still officiating (1902). The congregation was granted corporate rights Oct. 12, 1885. In 1899 the building of a new synagogue, with a seating capacity of 685, was completed. The dedication took place March 7, 1899. In the same year the Max and Selma Bergmann's Widows and Orphans' Charitable Institution was founded. The congregation maintains a school with three teachers and two hundred pupils.

Chemnitz is the seat of the Saxonia Lodge XLIV., 497 I. O. B. B., established May 27, 1899.

E. C.

S. So.

CHEMOSH: The national god of the Moabites. He became angry with his people and permitted them to become the vassals of Israel; his anger passed, he commanded Mesha to fight against Israel, and Moabite independence was reestablished (Moabite Stone, lines 5, 9, 14 *et seq.*). A king in the days of Sennacherib was called "Chemoshnadab" ("K. B." ii. 90 *et seq.*; see JEHONADAB). Chemosh was a god developed out of the primitive Semitic mother-goddess Athtar, whose name he bears (Moabite Stone, line 17; compare Barton, "Semitic Origins," iv.). Peake wrongly holds that Ashtar-Chemosh was a deity distinct from Chemosh, while Moore and Bähr ("Beiträge zur Semitischen Religionsgeschichte," p. 14) regard "Ashtar" in this name as equivalent to "Astarte," who they believe was worshiped in the temple of Chemosh. "Ashtar" is more probably masculine here, as in South Arabia, and another name for Chemosh, the compound "Ashtar-Chemosh" being formed like "YHWH-Elohim" or "YHWH-Sebaoth." There seems to be no good reason for denying that Chemosh was a "baal," and that the names "Baal-maon" (Moabite Stone, line 30) and "Baal-peor" (Num. xxv. 3; Hosea ix. 10) apply to what was practically the same god as Chemosh. The way Mesha brings Baal-maon into his inscription identifies the latter with Chemosh; for when Baal-maon is pleased Chemosh speaks to Mesha (Moabite Stone, lines 30, 31). Whatever differences of conception may have attached to the god at different shrines, there is no adequate reason for doubting the substantial identity of the gods to whom these various names were applied. Hosea ix. 10 is proof that at some period (according to Wellhausen, at the time of the prophet himself) the impure cult of the Semitic goddess was practised at Baal-peor (compare Wellhausen, "Kleine Propheten"; Nowack's Commentary; and G. A. Smith, "Twelve Prophets," *ad loc.*). Chemosh, therefore,

was in general a deity of the same nature as Baal. On critical occasions a human sacrifice was considered necessary to secure his favor (compare II Kings iii. 27), and when deliverance came, a sanctuary might be built to him (Moabite Stone, line 8). An ancient poem, twice quoted in the Old Testament (Num. xxi. 27-30; Jer. xlviii. 45, 46), regards the Moabites as the children of Chemosh, and also calls them "the people of Chemosh."

The etymology of "Chemosh" is unknown. The name of the father of Mesha, Chemosh-melek ("Chemosh is Malik," or "Chemosh is king"; compare Moabite Stone, line 1), indicates the possibility that Chemosh and Malik (or Moloch) were one and the same deity. Judges xi. 24 has been thought by some to be a proof of this, since it speaks of Chemosh as the god of the Ammonites, while Moloch is elsewhere their god (compare I Kings xi. 7, 33). Several critics rightly regard the statement in Judges as a mistake; but such an error was not unnatural, since both Chemosh and Moloch were developed, in different environments, from the same primitive divinity, and possessed many of the same epithets.

Solomon is said to have built a sanctuary to Chemosh on the Mount of Olives (I Kings xi. 7, 33), which was maintained till the reform of Josiah (II Kings xxiii. 13). This movement by Solomon was no doubt to some extent a political one, but it made the worship of Chemosh a part of the religious life of Israel for nearly 400 years.

J. JR.

G. A. B.

CHENAANAH: Feminine form of "Canaan"; the name of two men: (1) The fourth-named of the seven sons of Bilham, son of Jediah, of the tribe of Benjamin, a leading warrior in the time of David (I Chron. vii. 10). (2) The father of the false prophet Zedekiah, who encouraged Ahab against Micaiah (I Kings xxii. 11, 24; II Chron. xviii. 10, 23).

Fürst ("Bibl. Jud.") attributes the existence of such names as this and "Tarshish" and "Cush" among the Benjamites to their intermarriages with the earlier races. The hostilities which the Benjamites had to endure during the civil war (see Judges xxi.) might have compelled them to establish alliances with their Phenician neighbors.

E. G. H.

J. D. B.

CHENANIAH (literally, "established by God," I Chron. xv. 27; also found in the longer form "Chenanyahu," I Chron. xv. 22): A Levite of the family of Izharites (I Chron. xxvi. 29) and chief of the Temple singers who conducted the musical service when the Ark was removed from the house of Obed-edom to Jerusalem (I Chron. xv. 27).

E. G. H.

J. D. B.

CHENSTOCHOV (Polish, **Czenstochowa**): City in the government of Petrokow, Russian Poland, the Jewish inhabitants of which in 1897 numbered 12,500 in a total population of 45,130. Most of the Jews are merchants, only 2,155 being artisans. Of the latter, 801 are tailors and 228 are shoemakers. Seven estates in the environs of Chenstochov are owned by Jews. In 1898 Jews owned 57 factories with 397 operatives.

Originally the Jewish factories of Chenstochov mostly manufactured medallions with pictures of the Virgin, and other articles of Christian worship, for the numerous pilgrims visiting the city; but when this industry was forbidden to the Jews, they turned to the manufacturing of toys, in which fifteen factories are now occupied, 80 per cent of the factory laborers being Jews.

After the establishment of the liquor monopoly by the Russian government eighty families remained without occupation. In 1898 about 460 Jewish families received fuel from charitable institutions. Poverty is increasing among the Jewish population, as may be seen from the following figures of families applying for help at Passover: 553 in 1894; 581 in 1895; 607 in 1896; 639 in 1897; 708 in 1898. Taking the average of five for a family, it appears that 3,500 persons, or 29 per cent of the Jewish population, have applied for charity, and in relieving distress the efforts of about ten charitable institutions are taxed to the utmost.

The Jewish children receive their education in the general schools as well as in special Jewish schools. Among the latter are a Talmud Torah with an industrial department, and 29 *hadarim* with 531 male and 90 female pupils.

In September, 1902, Chenstochov was the scene of an uprising on the part of the Jews, which, however, was soon suppressed by the authorities.

H. R.

S. J.

CHEPHIRAH: City belonging originally to the Gibeonites (Josh. ix. 17), but which, in the apportionment of the land, fell to the lot of Benjamin (Josh. xviii. 26). Men of this city returned with Zerubbabel from the captivity in Babylon (Ezra ii. 25; Neh. vii. 29: in both instances the town is mentioned in connection with Kirjath-jearim [= arim] and Beeroth). In I Esd. v. 19 the place is called "Caphira." It is, perhaps, to be identified with the ruins now called "Kefire." The word "Kephirim" of Neh. vi. 2 may refer to Chephirah (F. Buhl, "Geographie des Alten Palästina," p. 169).

E. G. H.

G. B. L.

CHERAN: A name occurring in the genealogy of Seir the Horite (Gen. xxxvi. 26), and in the corresponding list in I Chron. i. 41. Dillmann (commentary on Gen. xxxvi. 26) suggests that it comes from "kar" (a lamb). The names in the lists are clan-names; and a number of the clans have animal designations, such as Dishon, Ayyah, Shobal.

E. C.

G. B. L.

CHEREI: A small town in the government of Mohilev, Russia, with (1898) about 3,000 inhabitants, of whom 1,300 are Jews. The principal occupations of the latter are commerce and handicrafts. The total number of artisans is 298, 189 being shop-owners, 35 wage-workers, and 74 apprentices. The predominating trades are shoemaking and tailoring, in which altogether 146 persons are engaged. About 61 Jews earn a livelihood as journeymen. There are, besides, 4 Jewish families occupied in agricultural pursuits, 8 families engaged in gardening, and 24 families who keep dairies. There are 20 *hadarim*, with 120 scholars; to the

elementary school of the town, Jewish children are admitted only upon payment of a fee, while others are granted free tuition.

H. R.

S. J.

CHERETHITES or **CHERETHIM**.—**Biblical Data:** Probably the name of a part of the Philistines; usually, however, designating the whole nation, as in Zeph. ii. 5, where "the nation of the Cherethites" evidently means the Philistines in general. Similarly, Ezek. xxv. 16 and xxx. 5 belong here. A. V. translates "the children of the land [that is in] league." But the true reading after the Ethiopic and partly after the LXX. (which omits the word "land") is: "the children of the Kerethi" (compare Cornill's "Ezekiel"). In Ezek. xxx. 5, where "the children of the land that is in league" are mentioned among the allies of Egypt, the whole of the Philistines must be meant. For the original special meaning compare the earliest passage, I Sam. xxx. 14, which mentions the Cherethites as living in a strip in the southwest of Palestine (the Negeb), near the territory of Judah and of Ziklag. This strip is called the "South" (Negeb) of the Cherethites. From verse 16, where the same district is designated as "the land of the Philistines," it may be inferred that the Cherethites belonged to the Philistines, or that the two terms were used promiscuously.

The name is also found in the frequent phrase "Cherethites and Pelethites." By this phrase was designated the *corps d'élite* and body-guard (thus correctly, Josephus, "Ant." vii. 5, § 4) of David; compare II Sam. viii. 18 (= I Chron. xviii. 17), xv. 18 (with "the Gittites"; i.e., men from Gath), xx. 7 (among "all the mighty men"), *ib.* verse 23 (Ket., הכרתים); I Kings i. 38, 44 (escorting Solomon to his coronation). If the Carites and Cherethites (II Kings xi. 4) are identical, the same troop was still in existence in the time of Athaliah (see CARITES). It is evident, especially from II Sam. xv. 18, that this troop consisted of mercenaries recruited from the warlike Philistines. They are different from the special guards (Hebrew, "runners"; mentioned in Saul's time, I Sam. xxii. 17) of the kings (I Kings xiv. 27 = II Chron. xii. 10); compare "Carites" in II Kings xi. 4, R. V. The threat against "those that leap over the threshold" at the king's court (Zeph. i. 9) is usually explained as referring to soldiers and officials of Philistine blood (compare on their superstitious custom I Sam. v. 5), but see the commentaries for different explanations of that passage. "Pelethi" = "Pelethite" is now generally considered as a shortened form of "Pelishti" = "Philistine," adapted to the Hebrew (according to Ewald). This seems to establish a difference between the Cherethites and the majority of the Philistines. The Septuagint, in the Prophets, translates "Cherethite" by "Cretans," and the tradition is found that the "Palestinians" (Stephen of Byzanz; Tacitus, "Historiæ," v. 2, erroneously of the Jews) had come from Crete. This tradition seems to have sprung from the Septuagint; however, see CAPHTOR on the question of the origin of the Philistines from the "island [of Caphtor?]" and the frequent identification of "Caphtor" with "Crete." Less probable is the explanation of

the two names of nations, "Cherethites" and "Pelethites" as appellative nouns; for instance, by Gesenius, "executioners and runners"; or by Targum (Pesh., some Greek MSS.), "bowmen and slingers"; by the Hexapla in Zephaniah, "corrupted people," for "Cherethites"; by Halévy, "the exiles excluded from their nation," etc.

W. M. M.

—**In Rabbinical Literature:** The Haggadah, which always endeavors to idealize the ancient history of Israel, takes the כרתי ופלתי to be not David's heathen body-guard, but a designation for the Great Sanhedrin, to which a very early date is thus ascribed. Hence "kereti" (כרתי) is interpreted as derived from כרת ("to cut off") in the sense of נקר ("to cut off," "to decree"), the men of the Sanhedrin rendering legal decisions. Similarly, פלתי, from פלח, meaning "the elect," or those eminent through their doctrines (Ber. 4a, above; Sanh. 16b, above; on the correct reading compare Rabbinowicz, "Dikduke Soferim," to the passage and Midr. Teh. iii.). Pseudo-Jerome, on II Sam. xx. 23, follows the Jewish tradition, according to which "kereti and peleti" means literally "accidentes et vivificantes," and is used to designate the "congregatio Dei." The Targum's rendering of the passage, "archers and slingers," is adopted by Kimhi also, who adds that there were two families so called, who excelled in the use of those weapons of war (commentary on II Sam. xv. 18). L. G.

CHERIKOV: Town in the government of Mohilev, Russia. According to the last census (1897) it has 5,250 inhabitants, including 2,700 Jews. Most of the latter are small tradesmen; 12 are engaged in horticulture, and 10 in gardening. In the whole district of Cherkov 60 Jewish families follow agricultural pursuits. Out of 255 artisans (consisting of 155 shop-owners, 10 wage-workers, and 90 apprentices) 115 are tailors. There are, besides, 25 journeymen, and 8 Jews who find employment in the local Dutch tile-factory. Two associations lend money to the poor without interest. The educational institutions consist of a government elementary Jewish school with 73 pupils, one Talmud Torah with 70 pupils, and 20 *hadarim*.

In 1648 Ladislaus, King of Poland, granted the Jews of Cherkov a charter by which they were allowed to deal in liquors, grain, and other articles of trade, to acquire immovable property, and to have their own synagogue and cemetery, which should be exempted from taxation. By this charter the Jews of Cherkov were placed on an equal footing with the other Jewish communities of the grand duchy of Lithuania. In the same year (1648) the Jews of Cherkov were massacred by the Cossacks.

CHERITH: The name of a brook or wadi near the Jordan, where Elijah, in the time of drought and famine, was told to hide himself, and there find

water and food (I Kings xvii. 3, 5). When the brook dried up he was sent to Zarephath. In the verses cited from Kings the expression "before Jordan" (literally, "by the face of the Jordan") certainly points to the eastern side; hence Robinson's proposed identification with the Wadi al-Kalt, apart from philological difficulties, is impossible. Cheyne proposes Rehoboth, which he explains as worn down into "Cherith," and further suggests that "Egypt" be substituted for "Jordan." Buhl ("Geog. des Alten Palästina," p. 121) argues for the identification of Cherith with Wadi al-Himar, on the supposition that Tishbi is Khirbat Istib. None of the modern attempts at identification is satisfactory.

G. B. L.

CHERKASSY (Polish, *Czerkasy*): District town in the government of Kiev, Russia, situated on the right bank of the Dnieper, about 126 miles from Kiev.

The date of the establishment of the Jewish community of Cherkassy is not known. Being the chief town of the Cossacks since the beginning of the sixteenth century, including the time of Chmielnicki (1648-52), it may be surmised that only a few Jews, leaseholders, lived there. The census of 1765 gives only one Jew in Cherkassy, this one being "the farmer of taxes, who paid 10,000 florins for the general taxes and 400 florins for the saltpeter-factory." In 1789, of 561 houses, 14 belonged to Jews; and in 1797, after the annexation of Cherkassy by Russia (1795), the town had 783 Jewish inhabitants.

In 1870 there were 20,492 Jews in the district and town; which figures, by 1897, had increased to 29,982, or 9.75 per cent of the total population; and in 1898, out of a total population of 26,165 in the town alone, 5,884 were Jews. The majority of the latter are small traders, artisans, and day-laborers, while some are employed in the sugar- and tobacco-factories, and in the flour-mills. A great part of the Jews belong to the Hasidim, and are followers of the local "zaddik," called by them the "gute Rov" (good rabbi) of Cherkassy.

M. R.

CHERNEVTZY: Town in the government of Podolia, Russia; it has (1898) a population of about 15,000, including about 2,000 Jews. Of the latter, 267 are artisans, but most of them earn a livelihood as small tradesmen. In the local sugar-refinery, which employs 400 men, only 14 Jews find work. There are, besides, 17 journeymen and 20 agricultural laborers. The number of Jewish poor in Chernevtzy is very considerable. In 1898 there were 60 families who received fuel from charitable organizations.

H. R.

S. J.

CHERNIGOV: A city in Russia; capital of the government of the same name. The Jewish settlement at Chernigov is one of the oldest of the Ukraine. In the thirteenth century a rabbi, Isaac (Itze) of Chernigov, is mentioned, who spoke the Russian language. (Harkavy, "Yevrei i Slavyanskie Yazyky," p. 11). In 1623 King Ladislaus banished the Jews from the "voyevodstvos" (military dis-

tricts) of Chernigov and Syeversk. The cause was probably jealousy on the part of the Christian merchants and tradesmen; the edict declaring that the Jews caused great damage to their business. However, soon after 1623 the Jews again came to Chernigov. In 1648, at the time of Chmielnicki's revolt, the whole Jewish population of Chernigov was exterminated by the Cossacks.

In the later histories of Chernigov indications are found of the hostility of the people toward the Jews. Thus, in 1665 the noblemen of Chernigov sent an embassy to the Council of Warsaw, mentioning in their instructions that justice called for the expulsion of the dishonest Jews from the country, or at least for the imposition of a Jewish poll-tax.

According to the census of 1897 there were in the town of Chernigov about 11,000 Jews in a total population of 27,006. The chief occupations of the Jews are industrial and commercial. In the neighborhood many tobacco-plantations and fruit-gardens are owned by Jews. There are in Chernigov 1,321 Jewish artisans, including 404 tailors and seamstresses, but the demand for artisan labor is limited to the town. There are 69 Jewish day-laborers, almost exclusively teamsters. But few are engaged in the factories.

The small charitable institutions of Chernigov were combined, in 1899, in the Committee of Relief for the Jewish Poor; but the different trade groups of the Jewish population have their own charitable institutions also. Thus the bakers, storekeepers, teamsters, tailors, and "melammedim" (teachers of Hebrew) have separate funds from which loans without interest, and, in cases of necessity, gratuitous help, are obtained.

The Jewish educational establishments include a Talmud Torah (115 pupils); a primary school for boys (40 pupils); a private school for girls (57 pupils); and there are 45 *hadarim*, where about 450 boys and 70 girls are taught Hebrew.

CHERNIGOV: A government of Little Russia (Ukraine), with a Jewish population (1897) of 114,630 in a total population of 2,298,834, or nearly 5 per cent. In 1881 the Jewish inhabitants formed only 2.5 per cent of the total. By districts, the Jews in the government of Chernigov are distributed as follows: Chernigov 12,006 in a total population of 162,036 = 7.41 per cent (in 1881 only 4.2 per cent); Borzna 3,542 in 146,730 = 2.41 per cent (in 1881 1.6 per cent); Glukhov 5,493 in 142,814 = 3.85 per cent (in 1881 about 5.1 per cent); Gorodnya 8,913 in 153,020 = 5.82 per cent (in 1881 only 1.6 per cent); Kozeletz 4,741 in 135,101 = 3.51 per cent (in 1881 1.5 per cent); Konotop 7,091 in 156,502 = 4.53 per cent (in 1881 1.7 per cent); Krolevets 3,896 in 131,009 = 2.97 per cent (in 1881 1.5 per cent); Mglin 10,014 in 139,357 = 7.18 per cent (in 1881 3.2 per cent); Novgorod Syeversk 6,328 in 146,394 = 4.32 per cent (in 1881 2.5 per cent); Novozybkov 8,852 in 164,789 = 5.37 per cent (in 1881 1.0 per cent); Nyezhdin 9,987 in 168,883 = 5.91 per cent (in 1881 3.3 per cent); Oster 6,188 in 150,556 = 4.11 per cent (in 1881 2.3 per cent); Sosnitsa 7,525 in

170,268 = 4.41 per cent (in 1881 2.3 per cent); Starodub 9,975 in 144,704 = 6.89 per cent (in 1881 2.8 per cent); Surazh 10,078 in 188,596 = 5.4 per cent (in 1881 2.9 per cent).

The history of the Jews in the government will be treated under **LITTLE RUSSIA**, and under the respective cities. M. R.

Comparative statistics of population in the cities, towns, and villages in the government of Chernigov are given below:

H. R.

S. J.

CHERNOBYL: Town in the government of Kiev, Russia; it has (1898) a population of 10,759, including 7,189 Jews. Of the latter, 651 are artisans, of whom 419 own shops 192 are wage-workers, and 40 are apprentices. The predominating trade is tailoring, in which 165 persons are engaged; 167 Jews are journeymen, and 120 are employed in a paper-mill. Several *hadarim*, and a Talmud Torah with 45 pupils, are the only educational institutions.

Bobrik and Bobry, situated at a distance of 60 versts (40 English miles) from Chernobyl, are Jewish colonies, in which 47 families cultivate 618 *deciatines* of land. S. J.

CHERUB (כְּרֻב; plural, **Cherubim**).—**Biblical Data**: The name of a winged being mentioned frequently in the Bible. The prophet Ezekiel describes the cherubim as a tetrad of living creatures, each having four faces—of a lion, an ox, an eagle, and a man—the stature and hands of a man, the feet of a calf, and four wings. Two of the wings extended upward, meeting above and sustaining the throne of God; while the other two stretched downward and covered the creatures themselves. They never turned, but went “straight forward” as the wheels of the cherubic chariot, and they were full of eyes “like burning coals of fire” (Ezek. i. 5–28, ix. 3, x., xi. 22). Ezek. xxviii. 13–16 is manifestly a true account of a popular tradition, distinct from that in Gen. ii., iii.

Ezek. xli. 18–25 and other passages show that

the number and form of the cherubim vary in different representations. The books of Kings and Chronicles contain, in the main, a description of the cherubim of Solomon's Temple. The Ark

In the Temple. was placed between the two colossal figures of cherubim, carved in olive-wood and plated with gold, ten cubits high, standing in the *adytum* (דְּבִיר) and facing the door. The distance between the points of their outstretched wings was ten cubits; the right wing of the one touching the point of the left wing of the other, while the outer wings extended to the walls (I Kings vi. 23–28; viii. 6, 7; II Chron. iii. 10–13, v. 7–8). II Chron. iii. 14 states that they were woven in the veil of the *adytum*; and in Ex. xxvi. 1, 31 and xxxvi. 8, 35 they are also referred to as wrought into the curtains and veil of the Temple. In Ex. xxv. 18–22, xxxvii. 7–9; Num. vii. 89 mention is made by the priestly writer of two cherubim of solid gold, upon the golden slab of the כַּפֹּרֶת, facing each other. Their outstretched wings came together above, constituting a throne on which the glory of **YHWH** appeared, and from whence He spoke.

In the early days of Israel's history the cherubim became the divine chariot, the bearer of the throne of **YHWH** in its progress through the worlds (I Sam. iv. 4; II Sam. vi. 2; I Chron. xiii. 6). The cherubim of the Ark of the Covenant seem to be meant here, and this is probably also the case in II Kings xix. 15; Isa. xxxvii. 16; Ps. lxxx. 1, xcix. 1 (see Rahlfs, “*עֲנִי* und *עָנִי* in den Psalmen,” 1892, pp. 36 *et seq.*). At an earlier period the cherubim were the living chariot of the theophanic God, possibly identical with the storm-winds (Ps. xviii. 11; II Sam. xxii. 11: “And he rode upon a cherub and did fly: and he was seen upon the wings of the wind”). Here is a conception similar to that of the Babylonians, where the cherubim originally symbolized the winds.

E. G. H.

W. M.-A.—J. F. Mc C.

—**In Rabbinical and Apocryphal Literature**: The cherubim placed by God at the entrance of paradise (Gen. iii. 24) were angels created on the third day, and therefore they had no definite shape; appearing either as men or women, or as spirits or angelic beings (Gen. R. xxi., end). According to another authority, the cherubim were the first objects created in the universe (Tanna debe Eliyahu R., i. beginning); while in the Slavonic Book of Enoch they are said to dwell in both the sixth and seventh heavens. The passage referring to the sixth heaven is as follows (xix. 6): “In the midst of them [the archangels] are seven phenixes, and seven cherubim, and seven six-winged creatures [seraphim], being as one voice and singing with one voice. It is not possible to describe their singing; and they rejoice before the Lord at His footstool.” Enoch then (xx. 1) describes how he saw in the seventh heaven “cherubim and seraphim and the watchfulness of many eyes” (= *ofannim*). The Ethiopian Book of Enoch also mentions these three classes of angels as those that never sleep, but always watch the throne of God (lxx. 7; compare also lxi. 10). In another passage of this book Gabriel is designated

as the archangel who is set over the serpents, the garden (= paradise), and the cherubim (xx. 7).

In the passages of the Talmud that describe the heavens and their inhabitants, the seraphim, ofanim, and hayyot are mentioned, but not the cherubim (Hag. 12b); and the ancient liturgy also mentions only these three classes.

The following sentence of the Midrash is characteristic: "When a man sleeps, the body tells to the neshamah ["the soul"] what it has done during the day; the neshamah then reports it to the nefesh ["the spirit"], the nefesh to the angel, the angel to the cherub, and the cherub to the seraph, who then brings it before God [Lev. R. xxii.; Eccl. R. x. 20]. When Pharaoh pursued Israel at the Red Sea, God took a cherub from the wheels of His throne and flew to the spot—for He inspects the heavenly worlds while sitting on a cherub. The cherub, however, is *דבר שאין בו ממש* ["something not material"], and is carried by God, not vice versa (Midr. Teh. xviii. 15; Cant. R. i. 9). Maimonides ("Yad," Yesode ha-Torah, ii. 7) enumerates ten classes of angels, the cherubim being the ninth; while the cabalistic "Masseket Azilut" designates the cherubim as the third class of angels, with a leader named Kerubiel (כְּרוּבִיאל; Jellinek, "Auswahl Kabbalistischer Mystik," p. 3). In the Zohar, where also ten classes of angels are enumerated, the cherubim are not mentioned as a special class (compare Zohar, Ex. Bo, 43a).

As regards the representations of the cherubim in the Temple, Josephus holds that no one knows or can even guess what form they had ("Ant." viii. 3, § 3); Philo thinks they represented the two supreme attributes of God, goodness and authority ("De Cherubim," x.; "De Vita Moysis," iii. 8; ed. Mangey, ii. 150); he says, however, that some

The authorities took the cherubim to represent the two hemispheres ("De Cherubim," vii.). The rabbinical sources evince an archeological rather than a theological interest in the cherubim.

Onkelos, the proselyte (beginning of the second century C.E.), says that "the cherubim had their heads bent backward, like a pupil who is going away from his master" (B. B. 99a); this is intended to explain the somewhat ambiguous verse referring to the cherubim in the Tabernacle (Ex. xxv. 20), meaning that the faces of the cherubim were bent downward toward the cover (פֶּרֶכֶת) of the Ark, but still with their eyes turned toward each other. Onkelos' view is also given in the Targ. O. on the passage, while the Targ. Yer. thinks that the faces of both the opposite cherubim were turned downward toward the cover (compare Friedmann, "Onkelos und Akylas," pp. 98-99).

Concerning the form of these cherubim, an authority of the end of the third century says that they had the form of youths (כְּרוּב, derived from כ = "like," and רוּב = "youth"; Suk. 5b; Hag. 13b). The last-named passage says that the cherubim which Ezekiel saw in his vision (Ezek. x. 1) also had this form, adding that the four creatures at the throne of God were originally man, lion, bull, and eagle, but that Ezekiel implored God to take a cherub instead of a bull; Ezekiel desiring that God

should not always look upon a bull, which would continually remind Him of Israel's worship of that animal. It seems that the Talmud had noticed that Ezekiel's conception of the heavenly creatures differed from the traditional one.

It is recorded as a miracle that when Israel was worshipping the Lord, the cherubim lovingly turned their faces toward each other (B. B. l.c.), and even embraced like a loving couple. On these occasions the curtain was raised so that the Jews who had come on pilgrimage might convince themselves how much God loved them (Yoma 54a). At the destruction of the Temple the heathen found the cherubim in this posture; and they mocked

Com-union of Israel with God. the Jews because of their obscene worship, thinking the cherubim to be the objects of it (Yoma 54b). This conception of the cherubim, as representing the union of Israel with God, has

been further developed by the Cabala, the cherubim being taken to represent the mysterious union of the earthly with the heavenly (see Bahya b. Asher to Ex. xxv. 20; Zohar, Terumah, ii. 176a). The symbolical interpretation of the Alexandrians, mentioned above, is also found in rabbinical sources. Midr. Tadshe (ed. Epstein, p. 15), like Philo, takes the cherubim to symbolize the two names of God, YHWH and Elohim, by which rabbinical theology (see, for example, Sifre, Deut. 26) designates the two attributes רַחֲמִים ("goodness") and דִּין ("justice"). Another Midrash (Num. R. iv.) compares the cherubim with heaven and earth, as do the Alexandrians mentioned by Philo ("De Cherubim," vii.). Maimonides says ("Moreh Nebukim," iii. 45) that the figures of the cherubim were placed in the sanctuary only to preserve among the people the belief in angels, there being two in order that the people might not be led to believe that they were the image of God. There were no cherubim in the Temple of Herod; but according to some authorities, its walls were painted with figures of cherubim (Yoma 54a). L. G.

—Critical View: Primitive Hebrew tradition must have conceived of the cherubim as guardians of the Garden of Eden (Gen. iii. 24; see also Ezek. xxviii. 14). Back of this lies the primitive Semitic belief in beings of superhuman power and devoid of human feelings, whose duty it was to represent the gods, and as guardians of their sanctuaries to repel intruders. Compare the account in the Nimrod-Epos, Tablet IX.; and see Kisters, in "Theolog. Tijdschrift," 1874, pp. 445 *et seq.*

From the brief and meager Biblical descriptions of the statues representing the cherubim, it is impossible to judge of their real form. They were hardly sphinx-shaped; for all the representations of the winged sphinx have the wings bent backward rather than extended toward the sides. Whether the cherub was a union of man and some animal form, such as the hawk-headed man so frequently found on Egyptian monuments and also at Nineveh, or only a winged man, as the representation of the palace guardian at Khorsabad, is not certain. Such figures, however, are very common in Babylonian decorations; and winged men and animals are found in ancient sculptures throughout Syria. Cheyne con-

South Arabian form.

Egyptian form (after Maspero, "Struggles of the Nations").

Assyrian forms (in the British Museum).

Forms of Cherubim.

siders the cherubim of Hittite origin, the originality of the Hittites in the use of animal forms being well known.

The Hittite griffin appears almost always not as a fierce beast of prey, but seated in calm dignity, like an irresistible guardian of holy things.

Probable The Phenicians, and probably the

Source. Canaanites, and through them the Israelites, attached greater importance to the cherub. The origin of the cherub myth antedates history, and points to the time when primitive man began to shape his ideas of supernatural powers by mystic forms, especially by the combination of parts of the two strongest animals of land and air—the lion and the eagle. Many are the grotesque figures found thus far, survivals of ancient Oriental sculpture.

Thus, in Babylonia there is the winged sphinx having a king's head, a lion's body, and an eagle's wings (see B. Teloni, "Zeitschrift für Assyriologie," vi. 124-140; text published by Bezold, *ib.* ix. 114-119; and Puchstein's comment, *ib.* 410-421). This was adopted largely in Phenicia. The wings, because of their artistic beauty, soon became the most prominent part, and animals of various kinds were adorned with wings; consequently, wings were bestowed also upon man. The next step, from cherubim to the angels of the Old Testament as well as of the New, was inevitable.

Following Lenormant's suggestions, Friedrich Delitzsch connected the Hebrew כְּרוּב with the Assyrian "kirubu" = "shedu" (the name

Ety-
mology. of the winged bull). Against this combination see Feuchtwang, in "Zeitschrift für Assyriologie," etc., i. 68 *et seq.*; Teloni, *ib.* vi. 124 *et seq.*; Budge, in "The Expositor," April and May, 1885. Later on, Delitzsch ("Assyrisches Handwörterbuch," p. 352) connected it with the Assyrian "karubu" (great, mighty); so, also, Karppe, in "Journal Asiatique," July-Aug., 1897, pp. 91-93. Haupt, in Toy, "Ezekiel" ("S. B. O. T."), Hebrew text, p. 56, line 11, says: "The name כְּרוּב may be Babylonian; it does not mean 'powerful,' however, but 'propitious' (synonym 'damku')." For the original conception of the Babylonian cherubim see Haupt's notes on the English translation of Ezekiel, pp. 181-184 ("S. B. O. T."), and the abstract of Haupt's paper on "Cherubim and Seraphim," in the "Bulletins of the Twelfth International Congress of Orientalists," No. 18, p. 9, Rome, 1899. See also Haupt, in Paterson, "Numbers" ("S. B. O. T."), p. 46: "The stem of כְּרוּב is the Assyrian 'karābu' (= be propitious, bless), which is nothing but a transposition of the Hebrew בָּרַךְ." Dillmann, Duff, and others still favor the connection with γρύψ ("gryphus" = the Hindu "Garuda.")

CHESALON: A border town of Judah (Josh. xv. 10), also known as "Mount Jearim." It lies in a directly west of Jerusalem, at a distance of twelve miles, and is the modern Kesla (Buhl, "Geographie des Alten Palästina," pp. 91, 166).

E. G. H.

G. B. L.

CHESED: A son of Nahor and Milcah (Gen. xxii. 22). From the name the term "Casdim" (Chaldeans) is clearly derived.

E. G. H.

G. B. L.

CHESS: A game of skill, usually played by two persons, with sixteen pieces each, on a board divided into sixty-four squares alternately light and dark. Authoritative opinions agree that chess, under the Sanskrit name of "chaturanga" (= the four "angas" or members of an army), was known earliest to the Hindus—possibly as early as the sixth century of the present era. From India the game was carried into Persia, its name being changed into "shatranj." Mas'udi (947) speaks of chess as an Indian invention sent by an Indian king to Chosroes, King of Persia (531-579), the sixteen pieces of one side being of emerald, and those of the other being of ruby. From Persia the game passed into Arabia, and thence to central and western Europe; but how or when has not been determined.

When the Jews first became acquainted with chess is not known. It has been supposed that the game was referred to in the Talmud; but the consensus of opinion now seems to be that certain games mentioned therein, which some have identified with chess, were not chess at all, but were played with dice, under the designations פסיפס or נרדשיר, which Rashi ('Er. 61a) interprets as "chess." Nathan ben Jehiel of Rome (1103), however, in his "Aruk," distinctly translates the word נרדשיר, supposed by some to indicate chess, by the Arabic "al-nard," which he renders by the Italian "dadi" (= dice). פסיפס is clearly derived from the Greek ψήφος, and refers to some game with pebbles or dice (Yer. R. H. i. 57c). The matter has been fully discussed by Franz Delitzsch ("Ueber das Schach und die Damit Verwandten Spiele in den Talmuden," in "Orient, Lit." Jan., 1840, pp. 42-53), who concludes that, as the Talmud was completed in the fifth century, chess could not have been referred to therein, inasmuch as the Persians, from whom the Jews would have learned the game, did not know it themselves until the close of that century (see also L. Löw, "Lebensalter," p. 324).

Steinschneider ("Schach bei den Juden," p. 33) conjectures that the first Jew to recommend chess was the convert Ali, son of "Rabbi" Saul of Taberistan, teacher of the physician Razi (ninth century), who considered the game a remedy for low spirits and dejected mental condition. By the eleventh century it was commonly played in Spain.

After Rashi, the first European to mention chess was Moses Sephardi, Ninth to Thirteenth born in Spain in 1062 and baptized at the age of forty-four as Petrus Al-

ronsi, who in his "Disciplina Clericalis" includes chess in the seven accomplishments ("probitates") of a knight. In Italy it was known at the same period, having been probably derived

from the East through Byzantium. In the twelfth century chess had spread to France, Germany, and England, and by 1200 had become a favorite gambling game throughout Europe; to such an extent, indeed, that it was prohibited by the Council of Paris, 1212, and afterward by Louis IX. At the same epoch the "Sefer Hasidim" (Book of the Pious), § 400, strongly recommended the game.

Notwithstanding the clerical prohibition, there is a legend to the effect that the pope himself played chess with a Jew: it occurs in "Das Leben Elchanans oder Elchonons," pp. 27, 46, Frankfort-on-the-Main, 1753: "This pope is the best one they ever had, since he can not get along without Jews, with whom he plays chess. . . . Rabbi Simeon is a great master of chess; but the pope mates him." The pope is even recognized by R. Simeon as his son through a particular move which he had taught him. This Simeon seems to have been Simeon ha-Gadol, who lived at Mayence about the beginning of the eleventh century. See ANDREAS.

The earliest writer to treat of chess among the Jews is Hyde, who, in the second volume of his "De Ludis Orientalibus" (1694), prints three Hebrew works on chess, with excellent translations in Latin.

These are: (1) a poem attributed to **Early Hebrew Works on Chess.** Abraham ibn Ezra, חרזים, the Latin title being "Carmina Rhythmica de Ludo Schah-mat, R. Abraham Abben-Ezra, Beatæ Memoriz" (Steinschneider, "Cat. Bodl." col. 684); (2) "Melizat ha-

Sehok ha-Ishkaki," a poem by Bonsenior ibn Yahya (in Berechiah ha-Nakdan's "Mishle Shua'im," Mantua, 1557-58; "Cat. Bodl." col. 796); and (3) "Ma'adanne Melek" ("Cat. Bodl." col. 604), attributed by Steinschneider to Judah or Leo di Modena (1571-1648). If the poem first mentioned is correctly ascribed to Ibn Ezra (d. 1167), it certainly gives the oldest set of chess rules extant; and it has been reprinted six times under that impression. The Hebrew text is given in Steinschneider ("Schach bei den Juden," pp. 43-45), as well as a German rendering (*ib.* pp. 12-15); and the following English translation is by Nina Davis (now Mrs. Salomon), in "Songs of Exile" (pp. 129-131), issued by the Jewish Publication Society of America, Philadelphia, 1901:

THE SONG OF CHESS.

I will sing a song of battle
Planned in days long passed and over.
Men of skill and science set it
On a plain of eight divisions,
And designed in squares all chequered.
Two camps face each one the other,
And the kings stand by for battle,
And 'twixt these two is the fighting.
Bent on war the face of each is,
Ever moving or encamping,
Yet no swords are drawn in warfare,
For a war of thoughts their war is.
They are known by signs and tokens
Sealed and written on their bodies;
And a man who sees them, thinketh
Edomites and Ethiopians
Are these two that fight together.
And the Ethiopian forces
Overspread the field of battle,
And the Edomites pursue them.

First in battle the foot-soldier
Comes to fight upon the highway.

Ever marching straight before him,
But to capture moving sideways,
Straying not from off his pathway,
Neither do his steps go backward;
He may leap at the beginning
Anywhere within three chequers.
Should he take his steps in battle
Far away unto the eighth row,
Then a Queen to all appearance
He becomes and fights as she does.
And the Queen directs her moving
As she will to any quarter.
Backs the Elephant or advances,
Stands aside as 'twere an ambush;
As the Queen's way, so is his way,
But o'er him she hath advantage;
He stands only in the third rank.
Swift the Horse is in the battle,
Moving on a crooked pathway;
Ways of his are ever crooked;
'Mid the Squares, three form his limit.

Straight the Wind moves o'er the war-path
In the field across or lengthwise;
Ways of crookedness he seeks not,
But straight paths without perverseness.
Turning every way the King goes,
Giving aid unto his subjects;
In his actions he is cautious,
Whether fighting or encamping.
If his foe come to dismay him,
From his place he flees in terror,
Or the Wind can give him refuge.
Sometimes he must flee before him;
Multitudes at times support him;
And all slaughter each the other,
Wasting with great wrath each other.
Mighty men of both the sovereigns
Slaughtered fall, with yet no bloodshed.
Ethiopia sometimes triumphs,
Edom flees away before her;
Now victorious is Edom:
Ethiopia and her sovereign
Are defeated in the battle.

Should a King in the destruction
Fall within the foeman's power,
He is never granted mercy,
Neither refuge nor deliverance,
Nor a flight to refuge-city.
Judged by foes, and lacking rescue,
Though not slain he is checkmated.
Hosts about him all are slaughtered,
Giving life for his deliverance.
Quenched and vanished is their glory,
For they see their lord is smitten;
Yet they fight again this battle,
For in death is resurrection.

It is characteristic of this poem that the pawn moves two spaces at the first move, as at present, but not as in the Arabic game. The queening of a pawn is also mentioned. The queen may move in all directions, but only one space, like the king at present. The bishop "fil" or (elephant) moves diagonally, but only three spaces. Castling is unknown. The "wind" is the rook. Steinschneider declares on subjective grounds, against the attribution to Ibn Ezra, and is supported by the like opinion of Dr. Egers, the editor of Ibn Ezra's poetry.

Bonsenior (lived not later than the fifteenth century), in his poem, also pictures the game as a battle, and describes the pieces in the following order:

King, מלך, moves one in any direction.
Queen, שול, to the right of the king, moves two or three spaces in any direction.
Knights, פרשים or סוסים (= "horsemen" or "horses"), move one space obliquely and one space straight forward.

Bishops, **פילים** (= elephants; editio princeps **פילים** = "camps"), move obliquely to the third space.
Rooks, **רוקים**, move straight, forward, backward, or from side to side.

Pawns, **גבורים** ("heroes"), move straight forward. The chief characteristic of Bonsenior's work is the large number of Biblical texts which he employs.

Leo di Modena's work ("Ma'adanne Melek") was written for the purpose of teaching the author's two sons the game, and in the hope of inducing them to give up card-playing. The book is particularly interesting for its reference (1) to the queening of a pawn, (2) to castling, and (3) to the queen's position at the commencement of the game. The following is the author's description of the pieces:

King, **שה** (Persian "shah"), may castle.

Queen, **פרזאן** ("ferzân" or "parzan"), occupies at the beginning of game a space of its own color.

Both king and queen have the following three noblemen by their sides:

Bishop, **פיל** ("fil"), elephant.

Knight, **פרש** ("parash"), horseman.

Rook, **רום** or **רוק** (Persian "rokh").

Pawn, **רגל**, foot-soldier, moves two boxes at the first move, and may become a queen.

A number of other early works on chess will be found in Steinschneider's "Schach bei den Juden" (pp. 22-33). Among these may be specially mentioned a Catalan poem by Moses Azan, translated into Castilian in 1350; a poem of 1532, which describes castling as an interchange of places between king and rook; and "Ha-Kerab" (The War), a poem in Hebrew, composed by Jacob Eichenbaum in Odessa, and printed in London (n.d.; dedication dated Sept. 3, 1839). It has been translated into Russian by Joseph Ossip Rabbinoicz.

Hebrew riddles on chess occur in medieval manuscripts, and are given by Steinschneider. One of them describes the game as:

"A country without earth: kings and princes walking without soul.

If the King be wasted, all is without soul."

Chess is referred to by Maimonides (1155-1204), who mentions a forced mate and declares professional chess-players as unworthy of credence in the law courts (commentary on Mishnah Sanh. ii. 3), and by the Game. Kalonymus ben Kalonymus (c. 1300).

The former condemns the game only when played for money; the latter, whether played for stakes or not. During the thirteenth and the four following centuries chess was quite commonly played; and Jewish literature contains numerous rabbinical opinions for and against it. Strangely enough, Joseph Caro does not refer to it in his great code, the Shulḥan 'Aruk. Moses Isserles (d. 1573) terms it "the game with bones called chess," and approves of its being played not only on weekdays, but on the Sabbath, though not for money. An old responsum (Dukes, in "Ben Chananja," 1864, pp. 601, 650) states that in Spain the game of chess (**אישקש** [**אישקקש**?]) was sanctioned by the Rabbis. After a visitation of the plague in 1575 the three rabbis of Cremona declared that *with the exception of chess* ("ishkaki") all games were "primary evils and the cause of all troubles" (Lampronti, "Paḥad

Yizḥak," iii. 54). Schudt ("Jüdische Merckwürdigkeiten," pt. VI., ch. xxxv., p. 317) records that in Frankfort-on-the-Main, after the great fire of 1711, the Jewish community passed a resolution forbidding for a period of fourteen years any Jew or Jewess (except sick persons and lying-in women) to play chess. When played on the Sabbath, it became customary in Germany, in honor of the day, to use chessmen made of silver ("Shilṭe ha-Gibborim," on 'Er. 127b), though wooden pieces were not disallowed.

Chess was popular among Jewesses, as is seen from Schudt's remark (*l.c.* IV. ii. 381) that "it is not at all strange that Jews should play chess well, since Jewish women have for many years played and practised the game." In 1617 a Jewess of Venice became well known for her skill in chess. Indeed, Abrahams ("Jewish Life in the Middle Ages," p. 388) goes so far as to suggest that it first made its way among Jewish circles as a woman's game.

R. Aaron Sason of Constantinople recommends the avoidance of chess on Sabbath (Responsa, No. 180). Elijah de Vidas appears to have been the sole halakist who absolutely forbade the game ("Shebet Musar," 1712, ch. xlii.). Children under fourteen were allowed to learn the game, on the ground that it rendered the intellect more acute.

Elijah Cohen of Smyrna ("Shebet Musar," *l.c.*) objects to chess on the ground that it wastes time and takes the mind away from study. Azulai (1774) agrees with Ali ben Saul, mentioned above, in favoring chess only as a remedy for illness or melancholy. He also cites opinions for and against playing chess on Saturdays (Berliner, "Aus dem Inneren Leben der Deutschen Juden im Mittelalter," pp. 12, 53, Berlin, 1871). Mendelssohn was a passionate lover of the game, and is said to have cemented his friendship with Lessing over the chessboard. Yet he is credited with the dictum: "Chess is too earnest for a game; too much of a game to be in earnest about it" ("Für Spiel ist es zu viel Ernst, für Ernst zu viel Spiel"; compare Dukes, in "Ben Chananja," 1864, vii. 636; something similar is attributed to Montaigne).

From the eighteenth century (to which belongs Albert [Aaron] Alexandre) onward, Jews came more and more to the front as chess-players; and it is not too much to say that in recent years they have proved themselves paramount as exponents of the game both in Europe and in America. As a race they seem to possess those intellectual qualities which are necessary to excel in chess. It must suffice here merely to mention a few names, such as S. Alapin, O. Blumenthal, W. Cohn, E. Delmar, L. R. Eisenberg, B. Englisch, E. Epstein, I. Gunsberg, D. Harrwitz, Leopold Hoffer, B. Horwitz, Herbert Jacobs, D. Janowski, Baron Ignaz von Kolisch, J. J. Löwenthal, S. Lipschütz, S. Rosenthal, E. Schiffers, Carl Schlechter, S. Tarrasch, Max Weiss, and S. Winawer. Besides these, three Jewish chess masters stand out with especial prominence as having held the primacy of the chess world since 1866; viz., J. H. Zukertort, William Steinitz, and Emanuel Lasker.

Johannes H. Zukertort (1842-88) was a pupil of

the celebrated player A. Anderssen, whom he at length defeated in 1871 with a score of 5 to 2. In 1878 he gained the first prize at the international tournament at Paris, and in 1883 took the same position at the great London tournament, in which all the greatest chess masters of the day (except Paulsen) competed. Zukertort excelled as a blindfold player. In 1876 he played thus against 16 strong amateurs, the result being: won 12, lost 1, drew 3.

William Steinitz (1836-1900) held the chess championship of the world for a period of twenty-eight years (1866-1894), and during that time may be said to have formed a new school of chess. In

In Modern place of the fierce attack, he sought to **Times.** win by a combination of minor advantages; and his method was gradually adopted by the leading experts. The Steinitz gambit (see below), though now generally discarded, had for a time a considerable number of adherents.

Emanuel Lasker (b. 1868) is the present champion of the world (1902), having succeeded in wresting that title from Steinitz in 1894. In 1896 he was first in the Nuremberg tourney; in 1899, first in the London tournament; and again first in that at the Paris Exposition of 1900.

The following list of tournaments since 1851 shows the positions gained by Jewish players and by their principal competitors. It will be seen that during the past fifty years the leading places have been in most cases secured by Jews. Non-Jewish players are indicated by italics:

TOURNAMENTS.

1851, London: *Anderssen* 1; Horwitz 7.
1857, Manchester: Löwenthal 1; *Anderssen* 2.
1858, Birmingham: Löwenthal 1; Falkbeer 2.
1860, Cambridge: Kolisch 1; *Stanley* 2.
1862, London: *Anderssen* 1; Steinitz 6.
1865, Dublin: Steinitz 1; *MacDonnell* 2.
1866, British Chess Association: Steinitz 1; *Green* 2.
1867, Paris: Kolisch 1; Winawer 2; Steinitz 3.
1867, Dundee: *Neumann* 1; Steinitz 2; *De Vere* 3.
1868, British Chess Association Handicap: Steinitz 1; *Wisker* 2; *Blackburne* 3.
1870, Baden-Baden: *Anderssen* 1; Steinitz 2; *Blackburne* 3.
1872, London: Steinitz 1; *Blackburne* 2; Zukertort 3.
1873, Vienna: Steinitz 1; *Blackburne* 2; *Anderssen* 3; *Rosenthal* 4.
1876, London: *Blackburne* 1; Zukertort 2.
1878, Paris: Zukertort 1; Winawer 2.
1881, Berlin: *Blackburne* 1; Zukertort 2; *Tchigorin* 3.
1882, Vienna: Steinitz and Winawer 1 and 2; Zukertort 5.
1883, London: Zukertort 1; Steinitz 2.
1883, Nuremberg: Winawer 1; *Blackburne* 2.
1885, Hamburg: Gunsberg 1; *Englisch*, *Tarrasch*, *Weiss* (tied) 2.
1886, London: Gunsberg and Taubenhaus 3 and 4.
1886, Nottingham: Gunsberg and Zukertort 3 and 4.
1887, Frankfurt: *Blackburne* and *Weiss* 2 and 3; *Bardleben* 4; *Tarrasch* 5.
1888, Bradford: Gunsberg 1; *Mackenzie* 2.
1889, New York: *Tchigorin* and *Weiss* 1 and 2; Gunsberg 3.
1889, Breslau: *Tarrasch* 1; *Burn* 2; *Weiss* 3; Gunsberg 4.
1890, Amsterdam: *Burn* 1; Lasker 2; *Mason* 3.
1890, Manchester: *Tarrasch* 1; *Blackburne* 2.
1892, Dresden: *Tarrasch* 1; *Markovetz* 2; *Porges* 3.
1894, Leipzig: *Tarrasch* 1; *Lipke* and *Teichman* 2 and 3.
1895, Hastings: *Pillsbury* 1; *Tchigorin* 2; Lasker 3; *Tarrasch* 4; Steinitz 5.
1896, Nuremberg: Lasker 1; *Maroczy* 2; *Tarrasch* 3.
1896, Budapest: *Tchigorin* 1; *Charousek* 2; *Pillsbury* 3.
1898, Vienna: *Tarrasch* 1; *Pillsbury* 2.
1898, Cologne: *Burn* 1; *Charousek* 2; *Cohn* 3.

1899, London: Lasker 1; Janowski, *Maroczy*, and *Pillsbury* tied for 2, 3, and 4.
1900, Munich: *Maroczy*, *Pillsbury*, and Schlechter tied for 1, 2, and 3.
1900, Paris: Lasker 1; *Pillsbury* 2.
1901, Monte Carlo: Janowski 1; Schlechter 2.
1902, Hanover: Janowski 1; *Pillsbury* 2.

Of 33 important matches since 1834, enumerated in the "Encyc. Brit." Supplement, 1902, *s.v.* "Chess," only 5 (all before 1863) have been without a Jewish competitor. Of 42 living contemporary first-class players of Europe and America mentioned in that article, 19 are Jews.

What is known in chess as the "gambit" consists in sacrificing a piece for the sake of certain advantages of position. It is first met with in Italy about the middle of the sixteenth century. Two Jewish chess-players have given their names to gambits; viz., Steinitz and Isaac L. Rice of New York. The Steinitz gambit may be played as follows:

WHITE.	BLACK.
1 P-K 4	1 P-K 4
2 Kt-QB 3	2 Kt-QB 3
3 P-B 4	3 P x P
4 P-Q 4	4 Q-R 5 ch
5 K-K 2	5 P-Q 3
6 Kt-B 3	6 B-K Kt 5
7 B x P	7 Castles

The Rice gambit is as follows, and is only possible after Black plays 7 B-Q 3. White, after giving up the knight, is able to withstand a violent attack.

WHITE.	BLACK.
1 P-K 4	1 P-K 4
2 P-K B 4	2 P x P
3 Kt-K B 3	3 P-K Kt 4
4 P-K R 4	4 P-Kt 5
5 Kt-K 5	5 Kt-K B 3
6 B-B 4	6 P-Q 4
7 P x P	7 B-Q 3
8 Castles	8 B x Kt
9 R-K sq	

Though so successful in matches, Jews have not shown themselves particularly brilliant in the composition of problems. Schlechter, Teichman, and Mieses, however, have displayed some talent in this direction, and E. N. Frankenstein was part author of "The Chess Problem Text-Book," London, 1887.

In 1782 Moses Hirschel of Breslau wrote the first work in German on the chess writings of Greco and Stamma. Of other Jewish writers on chess may be mentioned the following, with dates of publication: W. Schlesinger ("Beiträge zum Unterricht im Schachspiel," Presburg, 1804); E. M. Oettinger ("Bibliotheca Shahiludii," Leipsic, 1844); P. Bendix (1824-1833). ("Recueil de Parties d'Echec; Tant Entières que Finales, avec des Observations Instructives," St. Petersburg, 1824); H. Silberschmidt ("Die Neuentdeckten Geheimnisse im Gebiete des Schachspiels," Braunschweig, 1826; "Lehrbuch des Schachspiels," Wolfenbüttel); Albert (Aaron) Alexandre ("Encyclopédie des Echecs," Paris, 1837, and "Collection des Plus Beaux Problèmes d'Echecs," giving 2,120 examples, *ib.* 1846); D. M. Fränkel (1838); A. Schmid ("Literatur des Schachspiels," 1847); J. Horwitz ("Das Schachspiel," Berlin, 1879); D. Nathan (1851-1852); S. Tarrasch ("Dreihundert Schachpartien," Leipsic, 1894); Leon Hollaenderski (a French trans-

lation of the three Hebrew manuscripts given in Hyde, 1864); J. J. Löwenthal (1857-69) ("Transactions of the British Chess Association," 1867-69); D. Harrwitz ("Lehrbuch des Schachspiels," Berlin, 1862; J. H. Zukertort ("Leitfaden des Schachspiels," 1870); L. Hoffer ("Chess," London, 1892); W. Steinitz ("The Modern Chess Instructor," New York, 1895); and E. Lasker ("Common Sense in Chess," London, 1896).

Several important chess journals have been edited by Jews, as "The Chess-Players' Magazine," by J. J. Löwenthal, 1865-67; the "Neue Berliner Schachzeitung," by Zukertort, 1867; "The Chess Monthly" (which had an existence of seventeen years, 1879-96), by Zukertort and Hoffer, and by the latter alone after Zukertort's death; and "The International Chess Magazine," by Steinitz, 1885-1900. Books commemorative of the important tournaments, giving the games with annotations, have also been published by Jewish authors.

CHEST. See **ARK**.

CHESTNUT-TREE: The rendering of ערמון given in the A. V. (Gen. xxx. 37; Ezek. xxxi. 8); the R. V., however, preferring "plane-tree." There are two considerations lending weight to the rejection of the translation given in the A. V.: (1) the plane (*Platanus orientalis*) is indigenous to western Asia, where, under favorable conditions, it attains a commanding size, and is remarkable for the luxuriance of its growth; and (2) the etymology of the word ערמון, which is connected with the Arabic "aram" (= to strip off bark); the plane-tree being noted for annually casting its bark. This latter consideration is, apparently, the determining one.

The chestnut, which found its way from Asia into Europe through Greece and Italy, takes its botanical name (*Castanea vulgaris*) from an ancient Thesalian town, Castanum. Like the plane, it is distinguished by the magnificence of its growth, preferring, however, high and dry situations; while the plane develops more freely in low and moist ground.

According to Tristram, the plane-tree "is common on the banks of the upper Jordan and of the Leontes, where it overhangs the water" ("Natural History of the Bible," p. 345).

CHEVRA. See **HEBRA**.

CHEYNE, THOMAS KELLEY: English Christian Biblical critic, and Oriel professor of Biblical exegesis at the University of Oxford, England; born at London Sept. 18, 1841; educated at Merchant Taylors' School, London, Worcester College, Oxford, and under Ewald at Göttingen. Before graduating he showed his interest in Hebrew studies by taking the Pusey, Ellerton, and Kennicott

scholarships, and his post-graduate life has been devoted almost exclusively to Old Testament exegesis and theology. For a long time he was almost the sole representative of the higher criticism in England. Together with Professor Driver, he provided the Queen's Printers' Bible, 1881, with a series of variorum readings and renderings which were of great use to Bible students. He has devoted particular attention to the Book of Isaiah, of which he published notes on the Hebrew text in 1869, a translation in 1870, an edition in 1880-81, an introduction in 1896, and a new translation, based on a critical text, in the Polychrome Bible in 1898. Besides this, he has given two versions of Psalms to the world, in 1884 and 1889, while in 1891 he treated of the "Origin of the Psalter" in his Bampton Lectures, probably his most important contribution to Old Testament exegesis. A volume on "Job and Solomon" in 1886 treated of the Wisdom literature, while his "Founders of Old Testament Criticism" in 1893 gave the only adequate history of that subject in existence.

In the winter of 1897-98 Cheyne visited the United States and delivered lectures on "Jewish Religious Life in the Post-Exilic Period"; these were subsequently published (London and New York, 1898), and show a certain sympathy with specifically Jewish religious thought, which was also shown in his Bampton Lectures. Cheyne has frequently contributed to the "Jewish Quarterly Review."

Cheyne has shown great daring in textual emendation, which has grown upon him of recent years. His most recent contributions to Biblical study consist of numerous articles contained in the "Encyclopedia Biblica," which was edited by himself and A. S. Black, and which bears the stamp of Cheyne's influence on every page.

T.

J.

CHIARINI, LUIGI: Italian abbé; born near Montepulciano, Italy. April 26, 1789; died at Warsaw Feb. 28, 1832. He was appointed professor of history and Oriental languages at the University of Warsaw, Poland (1826).

Chiarini was a prominent member of the so-called "Jewish Committee," consisting exclusively of Christian members, organized by imperial decree May 22, 1825. This committee established schools for Jewish boys and girls as well as classes of Hebrew for Christian young men to study Jewish history, rabbinical literature, and even Judæo-German, which would enable them to do organization (missionary) work among the Jews of Poland. Chiarini was entrusted by this body to translate the Babylonian Talmud, for which the Russian government granted him a subsidy of 12,000 thalers. He published his work, "Théorie du Judaïsme Appliquée à la Réforme des Israélites de Tous les Pays de l'Europe, et Servant en Même Temps d'Ouvrage Préparatoire à la Version du Talmud de Babylone," 2 vols., Paris, 1830, as a precursor to the prescribed version of the Talmud which was to appear in six large folio volumes. Chiarini's book planned the reform of the Polish Jews, and also the general improvement of the condition of all Jews. This work

is divided into three parts; in the first Chiarini states the difficulties of knowing the true character of Judaism; in the second he elucidates the theory of Judaism; and in the third the author treats of the reform of Judaism and discusses the means of removing its "pernicious" elements. In brief, Chiarini endeavors to prove that the so-called evils of Judaism originate chiefly from the alleged harmful anti-social teachings of the Talmud. He argues that the state should assist the Jews in freeing themselves from the influence of the Talmud, and that they should return to the simple Mosaic faith. This goal can be attained in two ways: first, by the establishment of schools where Bible instruction is given and the Hebrew grammar studied; and, secondly, by a French translation of the Babylonian Talmud, with explanatory notes and refutations.

Chiarini recognized that the popular knowledge of the Jews and Judaism was inadequate and defective, and that their enemies furnish nothing but distorted instead of correct information. Nevertheless, his work is pervaded with some of the traditional prejudices against which he protests; but, at the same time, he expresses a sincere concern for the spiritual and material welfare of the Jews, and a desire to improve their condition.

Of Chiarini's translation of the Talmud only two volumes appeared, under the title "Le Talmud de Babylone, Traduit en Langue Française et Complété par Celui de Jérusalem et par d'Autres Monuments de l'Antiquité Judaïque," Leipsic, 1831. It contains a copious preface. The translation of Berakot, which is partly based on previous translations, has many faults. Chiarini's "Théorie du Judaïsme" was widely criticized and caused considerable discussion in the "Revue Encyclopédique" and in separate pamphlets by Zunz, Jost, and others. Besides many other works on Italian poetry (Pisa, 1816 and 1818) and on the history of astronomy in the Orient, Chiarini wrote a Hebrew grammar and a Hebrew dictionary, both in Latin, translated into Polish by Piotr Chlebowski, Warsaw, 1826 and 1829; he wrote also "Dei Funerari degli Ebrei Polacchi," Bologna, 1826.

Bischoff, *Kritische Geschichte der Talmud-Übersetzungen*, etc., p. 68, Frankfurt-on-the-Main, 1899.

H. R.

CHICAGO: Capital of Cook county, Illinois; the second largest city of the United States. It was incorporated as a city in 1837, and a year later the first Jewish settler, J. Gottlieb, arrived. Whence he came, and what his business was, are not known. In 1840 Gottlieb was followed by Isaac Ziegler, the brothers Benedict and Jacob Schubert, and Philip Newberg. Ziegler was for a number of years a pedler in the city and vicinity. Benedict Schubert was the first Jew to establish a merchant-tailoring business in Chicago. He prospered, and became one of the leading men in his trade. The first brick house in the city was built for him on Lake street, and he carried on business there for a number of years. Philip Newberg was the first Jewish tobacco-dealer.

The first Jewish child born in Chicago was a son of Jacob Rosenberg, whose wife was Hannah Reese.

About twenty German Jews arrived between 1840 and 1844, and the community was slowly augmented by incoming settlers up to 1849, in which year a strong tide of Jewish immigration set in, following the completion of the Galena and Chicago Railway to Elgin. Most of the early settlers were German Jews, principally from Bavaria and the Rhenish Palatinate.

Religious services were held for the first time in the Jewish settlement on the Day of Atonement, 1845. The congregation met in a private room on a street now known as Fifth avenue. Only ten men were present; Mayer Klein and Philip Newberg officiated as readers. The following year services were again held on the Day of Atonement, the attendance being, however, no larger than on the previous occasion.

The first Jewish organization, the Jewish Burial-Ground Society, was established in 1846. It purchased from the city for \$46 one acre of ground, to be used as a cemetery; and this was the first public act by which the Jews of Chicago demonstrated their existence as an integral portion of the body corporate. This first Jewish burial-ground was located east of the city limits, toward the north along the shore of Lake Michigan.

Kehillat Anshe Ma'arab, the first Jewish congregation, was established Nov. 3, 1847, when a constitution was adopted and signed by fourteen members. Morris L. Leopold, a young man of twenty-six, born in Laubheim, Württemberg, was elected president. The Jewish Burial-Ground Society turned over to the congregation all its property, including the cemetery, and dissolved. Kehillat Anshe Ma'arab held its first regular service in a private room on the second floor of a building on the southwest corner of Lake and Wells streets, and in 1849 leased a lot on Clark street, between Adams and Quincy streets (where the post-office now stands), on which it erected a frame synagogue.

In 1853 this congregation established a day-school, where Hebrew was taught in addition to the regular common-school curriculum. This school was in operation for twenty years. In 1856 a new cemetery on Green Bay road (now North Clark street) and Belmont avenue was purchased. In 1857 the old burial-ground, having been included in the city extensions, had to be abandoned. In 1882 the ground was sold to the park commissioners, and it is now merged in Lincoln Park. On the date of the closing of the old burial-ground (June 11, 1857) the first interment in the new cemetery took place.

In 1868 the congregation purchased the northwest corner of Wabash avenue and Peck court, with the church standing upon it. The latter was converted into a synagogue. In the great fire of 1871 the synagogue escaped destruction, but all the records, which had been placed by Joseph Pollak, the secretary of the congregation, and at that time clerk of Cook county, in a vault of the court-house, were lost. In 1873 Dr. Merzbacher's prayer-book was adopted. An organ, choir, and family pews had been introduced several years before. In the fire of

1874, Kehillat Anshe Ma'arab lost the synagogue on Wabash avenue, and in December of that year it purchased the church and site on the corner of Indiana avenue and Twenty-sixth street. The church was converted into a synagogue, and the property on Wabash avenue and Peck court was sold. In 1888 Jacob Rosenberg, then vice-president, presented to the congregation twenty acres of land in the town of Jefferson, to be used as a burial-ground. This is now called "Mount Ma'arab Cemetery."

and the influence of these two leaders was most beneficial to the Jewish community, especially to the younger generation. Adler was succeeded by Dr. M. Machol. Dr. Samuel Sale was his successor, and was followed successively by Dr. Isaac S. Moses, the Rev. M. P. Jacobson, and Dr. Tobias Schanfarber, the present incumbent (1902).

B'nai Sholom, the second oldest congregation, was organized May 25, 1852, by fourteen members. Its first temple was built in 1864, on the corner of

MICHAEL REESE HOSPITAL, CHICAGO, ILL.

(From a photograph.)

The bodies in the North Clark street cemetery were transferred to Mount Ma'arab, and the vacated property was sold. The latter is now completely built over, and all traces of the former cemetery have vanished.

In 1889 Kehillat Anshe Ma'arab found that most of its members had moved farther south. The location of the synagogue being, therefore, no longer convenient for the majority, a plot on the southeast corner of Indiana avenue and Thirty-third street was purchased, and the temple now in use was erected. The latter has a seating capacity of 1,500 persons. The membership is 175. In 1902 the Einhorn ritual, in the English version, was adopted.

The first rabbi was the Rev. Ignatz Kunreuther, who was called from New York in 1847. He was born in 1811, in Gelnhausen, near

Early Rabbis. Frankfort-on-the-Main. He remained with the congregation six years, and then retired to private life. He died in Chicago June 27, 1884. Dr. S. Friedlander, who was called from New York in 1855, was but a short time in Chicago, when he died suddenly. In 1861 the Rev. Liebmann ADLER was called from Detroit. During his long and eventful ministration, M. M. Gerstley was president of Kehillat Anshe Ma'arab;

Harrison street and Fourth avenue. It was at that time the handsomest Jewish house of worship in Chicago. This temple was destroyed by the fire of 1871. A new one was erected on Michigan avenue near Fourteenth street; but this property was sold in 1889, and B'nai Sholom purchased the synagogue of Kehillat Anshe Ma'arab, on the corner of Indiana avenue and Twenty-sixth street. The Rev. A. J. Messing is the present rabbi.

Sinai Congregation, the third oldest, was the result of the Reform movement started in Chicago in 1858. In that year the ritual question agitated the minds of the members of Kehillat Anshe Ma'arab. The younger element was dissatisfied with the conservatism of the older members, and demanded sweeping reforms. Dr. Bernhard Felsenthal, a young Jewish teacher who had just arrived in Chicago, became the leader of the Progressives. He published a pamphlet entitled "Kol Kore ba-Midbar" (A Voice Crying in the Wilderness), in which he strongly advocated Reform. This publication encouraged the Progressives, and they organized a Reform-Verein, of which Dr. Felsenthal was elected secretary. This Reform-Verein was the

foundation upon which four years later the Sinai congregation was built by twenty-six members who had seceded from the parent organization.

Sinai congregation was established April 7, 1861. B. Schoeneman was the first president, and Dr. B. Felsenthal the first rabbi. Its first house of worship

Jewish Training-School, Chicago, Ill.
(From a photograph.)

was a frame building, formerly a church, on Monroe street, between Clark and La Salle streets. At the dedication of this temple, June 21, 1861, the Einhorn ritual was used for the first time in a Western congregation. In 1863 Dr. Felsenthal declined reelection, and Dr. Chronic was elected rabbi, upon the recommendation of Dr. Abraham Geiger. Dr. Chronic founded in Chicago "Zeichen der Zeit" (Signs of the Times), a German monthly in the interest of Jewish Reform. At the rabbinical conference held in Philadelphia in 1869, Dr. Chronic, the delegate of Sinai, moved to transfer the celebration of the Sabbath to Sunday; but no action was taken upon the motion. In 1867 Sinai made a contract with the Rosehill Cemetery Company for a burial plot. This was the first instance in Chicago of a Jewish congregation securing a burial-plot in a non-Jewish cemetery.

The great fire of 1871 destroyed Sinai temple. Dr. Chronic had gone back to Europe, and Dr. K. Kohler, then minister of Beth-El congregation in Detroit, Mich., was elected rabbi. Sunday services were held for the first time by the Sinai congregation in Martin's Hall, corner Twenty-second street and Indiana avenue, on Jan. 15, 1874. The site of their temple, on the corner of Indiana avenue and Twenty-first street, had been purchased in 1872, and the structure was finished in 1876. In 1879 Dr. Kohler was called to New York; and in 1880 Dr. Emil G. Hirsch, then at Louisville, Ky., was elected rabbi. In 1885 Dr. Hirsch was relieved from preaching on Saturdays. In 1892 the temple was remodeled and enlarged. Sinai is by far the largest Jewish

congregation in Chicago, having a membership of nearly 600. It maintains a Jewish mission-school—the Sinai West Side Sabbath-School—where over 300 children, boys and girls, are instructed in Jewish history and religion.

Zion Congregation, the fourth oldest in Chicago, was organized on the West Side in 1864; Henry Greenebaum being the first president, and Dr. B. Felsenthal the first rabbi. The first house of worship was on Desplaines street, between Madison street and Washington boulevard. The present temple is located on Ogden avenue, opposite Union Park. In 1886 Dr. Felsenthal retired on account of old age, and Dr. Joseph Stolz was elected his successor. For many years Zion was a prominent factor in the spiritual and educational development of the Jewish community; but during the last decade it has suffered considerably through the migration of its members to the South Side. The present rabbi is Dr. Jacob S. Jacobson.

The North Side Hebrew Congregation was established in 1867. Its first house of worship was dedicated Sept. 27 in that year by the Rev. A. Ollendorf, who had been called to the rabbinate. In 1870 the Rev. A. Norden was elected rabbi. The fire of 1871 destroyed the synagogue, and the existence of the congregation was temporarily suspended. It was reorganized, however, in 1875, and the Rev. A. Norden was reelected; but the synagogue was not rebuilt until 1884. In 1898 Rabbi Norden retired, and the Rev. Abraham Hirschberg became his successor.

B'nai Abraham was organized on the West Side in 1870. The first rabbi was the Rev. Isaac Fall. In 1888 Dr. A. R. Levy, the present incumbent, was elected.

Of these six congregations, that of Sinai is the most radical, and B'nai Sholom and B'nai Abraham are the most conservative. The others belong to the class comprising the majority of American Jewish Reform congregations. A number of ultra-Orthodox congregations were also established before the great fire. In several instances a number of small "hebrahs" among the Jews of Slavonic parentage amalgamated and formed congregations. The most prominent among these congregations are **Bet ha-Midrash Hagadol u-Benai Jacob**, a charter for which was obtained in March, 1867, and **Ohabai Shalom Mariampole**, established in 1870. The latter has an extensive library of Hebrew books in its large synagogue. The congregation has instituted a loan association, and is in many other ways a beneficently active factor in the community.

After the fire the number of congregations increased rapidly. The most prominent among the younger congregations are Isaiah, Emanuel, and Beth-El. **Beth-El Congregation**, on the northwest side of the city, was organized Oct. 7, 1871, immediately after the fire. The first serv-

Congregations After the Great Fire. Peoria and Ohio streets, where regular

services were held every Friday night and Saturday morning. D. Gottlieb and Ignatz Kunreuther officiated. Six months later the congre-

gation bought some ground at the corner of May and Huron streets, to which they moved a frame church building which they had purchased from a Norwegian congregation. Herman Eliassof was elected in 1873 as the regular minister and teacher of Beth-El. On Sunday, June 22, 1873, a cyclone destroyed the synagogue.

But the same evening a meeting of the congregation was called, and a fund was raised sufficient to start the building of a new synagogue, a modest frame structure, still standing on the site of the old building. It now serves as a Lutheran church, having been sold by Beth-El in 1901. The ministers succeeding Rabbi Eliassof were Bonheim Lippman-sohn, Bien, and Jacob Dansk, the last of whom officiated from 1881 to 1891, dying in the prime of life. The present incumbent, Rabbi Julius Rappaport, took charge of the congregation in July, 1891. To-day (1902) there are 100 members, partly Germans and partly Bohemians.

A new synagogue was erected on Crystal and Hoyne avenues, and was dedicated Sept. 28, 1902. The tendency of the congregation is toward Reform, and the "Minhag America" ritual is used. Family pews, an organ, and a choir have been introduced, mostly during the ministry of the present rabbi; Friday services are likewise a recent innovation, prayers and lectures being delivered in

the English language. The Saturday morning services are held in German. There are a ladies' society—Sisters of Beth-El—numbering 120 members, and a Young People's Auxiliary Society, connected with the congregation.

Anshe Emeth Congregation, on Sedgwick street, was founded in 1872. Solomon Bauer officiates as rabbi.

Congregation Emanuel was founded in 1880, in a hall at the corner of Sedgwick and Blackhawk streets; the church of the Swedish congregation at No. 280 Franklin street being purchased three years afterward. In 1889 moderate Reform and the prayer-book "Minhag America" were adopted, and later the cause of advanced Reform was further strengthened by the introduction of the German (Einhorn) prayer-book and the practise of worshiping with uncovered head. In 1897 the congregation rented the Baptist church at Belden avenue and Halsted street, where services are held, but in 1900 it bought a new site on Belden avenue.

The congregation owns a cemetery at Waldheim. Connected with the congregation are the Emanuel Gemeinde Frauenverein, established in 1897, and the Emanuel Auxiliary Society, founded in 1900 by the younger members of the congregation.

The names of the successive rabbis of Congregation Emanuel are: Austrian E. Brown, Julius Newman, and Dr. Emanuel Schreiber, the incumbency of the last-named dating from 1899.

The Reform Congregation of Isaiah Temple was organized Oct. 24, 1895, by members from Zion congregation who had moved to the South Side. At the first meeting Dr. Joseph Stolz was chosen rabbi and still (1902) holds that position. The first services were held Jan. 4, 1896, at the Oakland Club Hall, Ellis avenue and 39th street, which continued to be used in this capacity for three years.

In May, 1898, some ground was purchased on the corner of Vincennes avenue and 45th street, and on

Sept. 11 following Dr. Isaac M. Wise laid the corner-stone of a synagogue designed by Dankmar Adler. The schoolhouse attached to the synagogue was dedicated on Jan. 14, 1899, and two months later (March 17) Dr. Wise dedicated the synagogue. Its membership numbers 228, and the Sabbath-school has 383 children enrolled. The Sabbath-school holds Saturday and Sunday sessions, teaches Hebrew, and has

a class for the deaf, at present composed of three pupils. Affiliated with the congregation are the Isaiah Woman's Club and the Isaac M. Wise Auxiliary Lodge I. O. B. B.

The principal Jewish charitable institutions of Chicago are the following: (1) The United Hebrew Charities of Chicago, organized in 1859 as the United Hebrew Relief Association, for the purpose of providing an asylum for widows and orphans, and a hospital. The present name of the association was adopted in 1888. The first hospital was erected on La Salle avenue, and opened to patients Aug. 9, 1868. It was destroyed by the fire of 1871. In 1879 Henry L. Frank and his brother Joseph, as the trustees of a fund bequeathed by Michael Reese of San Francisco, Cal., offered the sum of \$30,000 for the building of a hospital, on condition that it should be known as (2) "The Michael Reese Hospital." Jacob Rosenberg and Mrs. Henrietta Rosenfeld, also trustees of a fund bequeathed by the same Michael Reese, of-

Standard Club, Chicago, Ill.
(From a photograph.)

ferred on the same condition \$50,000 as an endowment for the maintenance of the new hospital. The United Hebrew Relief Association accepted both offers. The new hospital was built, and opened to patients in 1881. The Michael Reese Hospital is one of the best equipped in Chicago.

(3) The Jewish Training-School, opened on Judd street near Clinton street, in 1890, in the heart of the district inhabited by the poorest of the Jewish population. It is a manual-training school, not a trade-school, where

Charitable In- pupils receive an excellent general
stitutions. education also. Prof. G. Bamberger is the superintendent. (4) The Home

for Aged Jews, established in 1891. Abraham Slimmer of Waverly, Iowa, donated \$50,000 for such a home in Chicago, on condition that the Jews of Chicago raise an equal amount. The money was obtained without difficulty. (5) The Chicago Home for Jewish Orphans, opened Oct. 7, 1894, in a rented house on Vernon avenue. Two years later a piece of property was donated by Henry Siegel and others. Mr. Slimmer again came forward with a donation of \$25,000 toward the erection of a suitable building, on condition that a like sum was collected in Chicago. The amount was raised, and the home was dedicated April 23, 1899. (6) The Beth Moshav Z'keinim (Orthodox Home for Aged Jews), organized Sept. 7, 1899. In 1901 Mr. Slimmer promised the society which undertook to establish the home the sum of \$20,000, on conditions similar to those accompanying his previous donations. The conditions were of course accepted; and the building is now in course of construction on the corner of Ogden and Albany avenues. (7) The Jewish Agriculturists' Aid Society of America, established in 1888 by three Chicago rabbis, Dr. Hirsch, Dr. Moses, and Dr. Levi. The society has its headquarters in Chicago, but it is national in aim and scope. The object of the society is to assist able-bodied poor Jews who are willing to establish themselves as farmers, in obtaining land on favorable terms. (8) The Home for Jewish Friendless and Working Girls, the youngest Jewish charitable institution in Chicago, established by a number of ladies' societies Oct. 15, 1901.

Besides these there are a great number of Jewish societies for various benevolent, educational, and social purposes. The United Hebrew Charities of Chicago maintains a number of branch institutions, such as an employment bureau, a free dispensary, and a training-school for nurses. All charities are now federated in the Associated Jewish Charities, founded in 1900, through which all collections are made.

The total number of Jewish congregations is fifty-five. Thirty cemeteries are owned and managed by Jewish congregations and societies, and five Jewish clubs minister to the social needs of the community. The Jewish population of Chicago is fully eighty thousand.

As in other large cities of the United States, there exist several social clubs, which, though nominally not restricted in their membership, are practically recruited exclusively from Jewish circles. The first club so organized was named "Concordia," and may be considered the parent of the

present Standard Club, which, founded in 1872, is now located in a club-house at Twenty-fourth street and Michigan avenue. The Lake-Side, at Forty-second street and Grand boulevard; the Ideal, on Lasalle avenue; the Unity, and the West-Side are clubs similar in character to the Standard. The latest of these social clubs is the Ravisloe, recently established (1901). It is a country club, devoted to athletics.

From the earliest days of the municipality the Jews of Chicago have taken an honorable part in public life. On the two municipal boards, the board of education and the directory of the Public Library, Jews have distinguished themselves, the president's chair having been often occupied by one of their number. Adolf Kraus was president of the board of education for several terms, while Berthold Loewenthal has served as president of the Public Library board—an honor also conferred on Dr. Emil G. Hirsch, who was a director for nine years and president for six. Under Dr. Hirsch's administration the present splendid home of the Public Library was erected, while another Jew, Bernard Moos, acted as chairman of the building committee, rendering in this capacity the most signal services. Among the other Jewish members on the board of the library at various times may be mentioned Julius Rosenthal (founder and librarian of the Law Institute), Adolf Moses, and Jacob Franks. The following Jews have served on the school board: Herman Felsenthal, David Kohn, B. J. Rosenthal, James Rosenthal, Edward Rose, Charles Kozminski, and Dr. Joseph Stolz. Schools have been named after Herman Felsenthal and Charles Kozminski, in recognition of their services; while another public school, not in a Jewish district, has been named after Sir Moses Montefiore.

Among the charter members of the civic federation was Dr. Emil G. Hirsch; while Adolf Nathan, a member of the Columbian Fair executive committee, was president. Dr. Hirsch is also president of the Rabida Fresh Air Sanitarium. The following Jews have held other offices: corporation counsel, Adolf Kraus, Siegmund Zeisler; county clerk, Joseph Pollak, General Solomon; presidential elector, Henry Greenebaum, Emil G. Hirsch; county commissioner, Isa Monheimer, Jacob L. Cahn, Morris Rosenfeld; city alderman, Henry Greenebaum, Jacob Rosenberg, Abe Ballenberg, David Horner, Milton J. Foreman; South Park commissioner, Henry G. Foreman, Henry Greenebaum; judge of the circuit court, Philip Stein; justice of the peace, E. C. Hamburgner, Adolph J. Sabbath, Max L. Wolf; city clerk, William Loeffler; controller of the city, Charles M. Schwab.

In the militia, may be mentioned Major Milton J. Foreman (cavalry); Lieut. Robert Hart (1st Ill. Infantry); and Emil G. Hirsch, the chaplain of the Illinois Naval Militia, with rank of lieutenant-commander.

The Jews have been contributors to the endowment fund of the Chicago University. Their original contribution of \$35,000 saved the first donation by J. D. Rockefeller of \$600,000, being made at a time when it seemed impossible to fulfil the conditions attaching to that gift. Sinai congregation

later donated \$5,000 for a Semitic library. Eli B. Felsenthal is a member of the board of trustees of the university, while the following Jews belong to the faculty: Professor Michaelson, head of the department of physics; Julius Stieglitz and Felix Lengfeld (the latter resigned), professors of chemistry; Ernst Freund, professor of jurisprudence; Julian W. Mack, professor of law; Emil G. Hirsch, professor of rabbinical literature and philosophy; S. H. Clark, professor of elocution. Dr. Joseph Zeisler holds the chair of dermatology in the Northwestern Medical School.

Soc.* No. 2, 1894; *idem*, *The Beginnings of the Chicago Sinai Congregation*, Chicago, 1898; Felsenthal and Eliassof, *History of Kehillat Anshe Ma'arab*, Chicago, 1897; Eliassof, *The Jews of Illinois*, in *Reform Advocate*, Chicago, May 4, 1901.

A.

CHICAGO ISRAELITE, THE: An American weekly newspaper devoted to Jewish interests; founded January, 1885, and first issued under the editorship of Leo Wise, who for several years conducted a department of "Notes and Comments" of a personal character. Occasionally the work of this department was done by Dr. Emil G. Hirsch, Levi A. Eliel, and Dr. Julius Wise, the last of whom wrote under the pen-name "Nickerdown."

"The Chicago Israelite" makes a feature of the local news of the congregations, lodges, and philanthropic and other societies.

G.

CHIDON: The owner of the threshing-floor at which Uzza or Uzzah, attempting to steady the Ark of the Covenant, was killed (I Chron. xiii. 9). In II Sam. vi. 6 the place is called "Nachon."

E. G. H.

CHIEF: Term used by the English Bible versions as an approximate rendering of a number of Hebrew words. The leaders of the Levites are called "chiefs" (נָשִׂיאַ, Num. iii. 24, 30), although elsewhere the same word is rendered "prince" (Num. vii. 18). From the fact that on the day of the dedication of the Tabernacle every chief gave exactly the same donation to the service, it can be inferred that the chiefs were here representing the tribes, and were not giving of themselves only. The tribes, furthermore, were divided into several sections, and the leader of each section (as, for example, the leader of the Gershon branch of the tribe of Levi) was called "nasi" also; and the leader of the whole tribe was called "the chief of the chiefs" (Num. iii. 24, 32). The authority of the "nasi" was very great, and marked respect was to be shown him (Ex. xxii. 27, A. V. 28).

In the days of royalty the rights and privileges, as well as the name, were absorbed by the king (I Kings xi. 34), and later by Zerubbabel (Ezra i. 8). A fuller phrase, "nesi ha-arez," occurs in Gen. xxxiv. 2. In the early stages the chiefs helped the central authority. They assisted in counting the Levites (Num. iv. 34).

Other terms for "chief" are: (1) "Pinnat kol ha-am" (corner-stone of the people; Judges xx. 2; I Sam. xiv. 38); and the reference here, too, is to the tribe and family representatives. (2) "Ba'al,"

applied to the priest, not in the sense of an officer, but as one standing out preeminent. (3) "Attud" (Isa. xiv. 9); but such a rendering only loosely corresponds to the original. (4) "Rosh" is rendered "chief" seventy-eight times, and is used almost interchangeably with "nasi." It stands for the head of a family (Ex. vi. 14, 25), and for larger tribal sections (I Kings viii. 1; Num. xxxii. 38), and is applied to the high priest (II Chron. xix. 11, xxiv. 6). In the New Testament "chief" is the rendering for ἀρχὼν (Luke xi. 15), and for πρῶτος (Matt. xx. 27; Luke xix. 47). An officer termed the "Asiarch" (chief of Asia) is mentioned in Acts xix. 31.

CHIERA, ESTHER. See KIERA, ESTHER.

CHIGIRIN: Town in the government of Kiev, Russia, with a population (in 1897) of 9,870, including about 3,000 Jews. The latter are engaged principally in commerce and the handicrafts, the total number of artisans being 551. Tailoring is the predominating trade, 204 being engaged in it. There are, besides, 37 journeymen; and 16 Jews find employment in the local tannery and factories. About 200 families apply yearly for aid at Passover. The educational institutions comprise a government school with 300 pupils, of whom 120 are Jews; about 30 hadarim aggregating 230 scholars; and a Talmud Torah with 45 pupils.

CHILD, THE: Since the days of Abraham (Gen. xv. 2), to possess a child was always considered as the greatest blessing God could bestow; and to be without children was regarded as the greatest curse. The Rabbis regarded the childless man as dead; while the cabalist in the Middle Ages thought of him who died without posterity as of one who had failed in his mission in this world, so that he would have to appear again on the planet to fulfil this duty.

As human imagination always occupies itself with the unknown, the embryonic or preliminary stage of child-life became the subject of fanciful legend and myth. The soul before birth is warned that it will be held responsible for its actions through life, and takes an oath to lead a holy life (Jellinek, "B. H." i.). Two guardian angels teach the soul the Torah every morning and display the glories of the just in paradise. In the evening hell is shown. As the memory of this would interfere with free-will, the child forgets all it has seen and heard in this stage. The depression in the middle of the upper lip represents the stroke by which this knowledge and wisdom are made to disappear. For this reason, too, children cry when they are born.

One of the oldest ceremonies connected with the birth of a child was that of tree-planting. In the case of a boy a cedar was planted; in that of a girl, a pine (Git. 57a). Among the ceremonies observed for the protection of the new-born son was the reading of the Shema, and at times of Psalm xc. in the presence of the children of the community. This was usually continued every evening of the week, but in some places took place only on the eve of the Berit Milah (see CIRCUMCISION). The custom of paying a visit to an infant boy on the first

Sabbath of his existence (שלום זכר = "peace-boy") was also of Jewish origin.

Male children received their "sacred" names on the occasion of the Berit Milah. The so-called "profane" name ("kinnui") was given on the Sabbath after the mother paid her first visit to the synagogue; this was accompanied by a feast termed *Holle Kreish* (see Perles, in Grätz Memorial Volume, pp. 24-26). Girls were given their names about a month after their birth, when the father was called up to read the Law, and the *Holle Kreish* was also celebrated on the return home.

In the case of the first-born the ceremony of "redeeming the child" (פדיון הבן, Ex. xiii. 2-15) occurred on the thirtieth day. According to the author of "*Hukkot ha-Torah*" (Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden," i. 93), it was customary in the thirteenth century for a father to vow his first-born son to the study of the Torah.

"*Halakah*," the custom of cutting a boy's hair for the first time, took place after his fourth birthday, when care was taken to avoid touching the "corners" (Lev. xix. 27). In Palestine this occurred on the second day of Passover; and it was considered a religious privilege for each of the friends and relatives to cut a few hairs. In Talmudic times it was also customary to weigh the child and to present the weight in coin to the poor.

For the lullabies with which mothers soothe their children to sleep see *CRADLE SONGS*.

The various diseases to which the child was subject, especially in Palestine (*ראשית חכמה*, Gen. R. xx. [ed. Cracow, p. 374]), were included under "the difficulties of bringing up children." If the child died, it was said to be because of the sins of the parents. God Himself supervised the education of the prematurely deceased children ('Ab. Zarah 3b). If a boy remained healthy, he studied the Torah in order to be rendered fit for the priestly

office, for which learning was a necessary condition. The Rabbis tell of many infant prodigies. Leo de Modena is said to have read the *Haf-tarah* at the age of two and one-half years. But generally they preferred promise rather than performance at so early an age. The regular curriculum was for boys to learn Scripture at five, Mishnah at ten, and to fulfil the whole Law at thirteen. In the times of the Temple youths took part in religious ceremonies at a very early age. In the Sabbatical year they were brought to the Temple when the king read Deuteronomy (Deut. xxxi. 10-12). A boy's religious life began in his fourth year, as soon as he was able to speak distinctly; for although the child was held to be free from religious duties, it was required of the father to accustom him early to fulfil them (*להנכו במצות*). This was considered all the more desirable because of the belief that the prayer of a child was more readily heard by God. Girls, too, went to the synagogue at a tender age. The presence of children in the synagogue was often troublesome. The boys frequently played during worship; hence the Sephardim confined them to one place.

Certain rites were observed when the boy first

went to school (see *EDUCATION*). "Children of the house [school] of the master" is a regular phrase in Jewish literature. Words of Scripture uttered innocently by them were viewed as oracles by the Rabbis. In the school, the boys had hours of recreation as well as of study. In play, the angel Sandalphon (סנדרלפן) was their patron; but there were few specifically Jewish GAMES, most of them being taken from the peoples among whom the Jews lived. Parents did not pamper their children, but treated them severely, slight corporal punishments by the father being allowed, though not recommended. Temperance, abstemiousness, and poverty were inculcated as virtues; and, even though any boy might enter the priesthood, all had to learn a handicraft and swimming.

The duty of providing for such education, as well as for circumcision, for redemption from the Kohen, for teaching of the Law, and, when the child was of the proper age, for marriage, was imposed by the Talmud upon the father. The synod of Asa imposed upon him, furthermore, the obligation to provide for the necessities of the child until his seventh year. It, however, strongly recommended the continuation of such provision until the child should have attained his majority (Ket. 49b).

Although enjoying all the protection of the law, the child was declared irresponsible by the Talmud, and had not to account for any mischief he might do. Nor was the father answerable for damages for injury due to such mischief; he was only morally responsible. This moral responsibility, however, ended when the child had attained his religious majority ceased to be a child, and became a "son of the Law" (see *BAR MIZWAH*)—namely at the age of thirteen. On this occasion the father pronounces the following benediction: "Blessed be He for having freed me from this punishment." Actual legal responsibility on the part of the young man, however, began only with the age of twenty.

In later times little children were taken to the synagogue to sip the wine of the "sanctification cup" ("kiddush") or to take part in the *Simhat Torah* ceremony. They participated in the Passover and Sabbath festivals, too, singing the "Praise" (הלל, Ps. cxiii.-cxviii.). When a little older, the boy had to attend the synagogue and school regularly. He recited certain prayers (*ברוך שאמר* and *קריש*). Indeed, he enjoyed almost all the rights of majority long before the day of his becoming "the son of the Law."

CHILD MARRIAGE. See *MARRIAGE*.

CHILDBIRTH: The following are some of the Biblical and Talmudical details touching the birth of children:

The child might be brought into the world with or without a midwife (Gen. xxxviii. 28; Ex. i. 15 *et seq.*; compare Mishnah R. H. ii. 5; Oh. vii. 6). The expression in Gen. xxx. 3, "she shall bear upon my knees," and similar phrases are to be taken literally (see Ploss, "Das Weib," and compare the say

ing in Gen. R. lx., "Twixt wife and midwife the child of the poor woman perishes"; see also Dukes, "Blumenlese," p. 128). Immediately

In the Bible. rubbed with salt, and wrapped in swaddling-clothes (Ezek. xvi. 4 *et seq.*). Josephus ("Contra Ap." ii. 26) says: "The law does permit us [the Jews] to make festivals at the birth

(From Kirchner, "Jüdisches Ceremoniel," 1726.)

of our children, and thereby to occasion drinking to excess." The child was usually suckled by its mother, but sometimes by a wet-nurse (Gen. xxxv. 8; II Kings xi. 2, 3; III Macc. i. 20). Thirty-three days after the birth of a male child, and sixty-six after that of a female child, the mother offered up a sacrifice of purification (Lev. xii. 2 *et seq.*; see CIRCUMCISION and REDEMPTION OF THE FIRST-BORN). The weaning, often long deferred, was accompanied by sacrifices and festivities.

The cradle is said to have been first used in Isaac's time; it occurs in similes, as with Homer (Gen. R. liii. 10; lxix. 3; Bacher, Ag. Pal. Amor., pp. 126, 344). On it were hung bells, which generally were employed together with amulets in order to guard children against demons ("Monatsschrift," 1900, p. 382; compare Blau, "Zauberwesen," pp. 90, 160; "Mitteilungen der Gesellschaft für Jüdische Volkskunde," v. 75, note 5, Hamburg, 1900).

A woman during confinement is recommended to particular attention; and her death is ascribed to negligence of the duties specially prescribed for Jewish women (Shab. ii. 6; concerning the origin of leprosy among children, compare Lev. R. xv. 5). New-born children, according to the Talmud as well as the Bible, were sprinkled with salt (Shab. 129b; compare Jerome and Galen in Wiesner, "Scholien," ii. 248); those that made no sound were rubbed with the afterbirth (Wunderbar, in "Orient. Lit." 1850, p. 104; Hamburger, "R. B. T." ii. 256). Air was breathed into those born apparently inanimate; and a beaker filled with hot coals was held near the mouth of one that refused the breast, to stimulate the action of the facial muscles (Shab. 134a). Operations to assist birth were known (compare Rabinowicz, "La Médecine du Talmud," i. 29). It was considered a heathen custom to fasten a piece of iron

on the bed for the protection of the woman (Tosef., Shab. vi. [vii.] 4), as well as, on the night before circumcision, to place on the table viands which should not be touched (Shulhan 'Aruk, Yoreh De'ah, 178, 3, gloss; 179, 17; compare M. Schuhl, "Superstitions et Coutumes Populaires du Judaïsme Contemporain," p. 6). The use of a Torah scroll as a charm for easing birth (Pitḥe Teshubah on Yoreh De'ah, 179, 9) and for the protection of the child (Yoreh De'ah, *l.c.*; Maimonides, "Yad" Hil. 'Akkum, xi. 12) seems to be of early date; and the origin of the ceremony of lighting candles on the "watch-night"—*i.e.*, the night before circumcision—is to be ascribed to the Talmud (Yer. Ket. i. 25c; Sanh. 32b).

In Rumania, as soon as the labor-pains of the woman begin, all the female inmates of the house loosen their hair. In Poland, for the purpose of easing birth, all knots in the woman's clothing are untied; and she wraps herself in a "mappah" or "wimpel"; that is, the band which is wound around the Torah. In the Caucasus the woman is held in the strictest seclusion. For seven

Customs and Superstitions. weeks prior to her expected accouchement no one, except the midwife and the female relatives, is allowed to see her. On the night of birth the door

of the lying-in room is locked; one light burns near to the mezuzah, and another next to the hearth (Chorny, "Sefer ha-Massa'ot be-Erez Kaukaz," pp. 196, 296). Despite the repeated prohibition of their rabbis, the Caucasian Jews practise the superstitious custom of mixing in a glass of water some earth from the grave of one deceased within the last forty days, and giving it to the parturient woman to drink. If it is not effective the dose is repeated with earth obtained at a greater depth.

In Poland and Galicia the custom still obtains that once prevailed in Germany, of making a chalk-mark

(From Kirchner, "Jüdisches Ceremoniel," 1726.)

around the lying-in chamber or of describing black circles on the wall. It is also the practise in many places to hang Psalm-verses over the woman's bed (the same custom obtains among Christians in Germany; see L. Löw, "Lebensalter," pp. 75 *et seq.*). Sometimes Ps. xx. 2 is inscribed on the door, and the following invocation is recited: "May He who harkened to thy mother, harken to thee also!" In

Hesse a circle is drawn with chalk on the floor, and the verse, "My help cometh from the Lord," etc. (Ps. cxxi. 2), is written within it. In Kurdistan and elsewhere in the Orient, sweet-smelling herbs are burned in a censer, with which first the synagogue and then the lying-in room are perfumed. In Poland the Book of Raziel is laid under the head of the woman, and white cloths are hung at the windows and around the bed.

In older Jewish recipe-books ("Mitteilungen," v. 58 *et seq.*) the following directions are given:

Whisper into the ear of the woman in travail: "And Moses spake unto the people, Get thee out, and all the people that follow thee; and after that I will go out. And he went out" (Ex. xi. 8; compare Raziel, 43a). Or write on a "Ränfiel" (head) of cheese to be given her to eat, "Satur arepo tenet opera ruras" (made up of "Sator [are] poten [ter] et opera[re] r[at]io t[u]la s[il]t"); compare Steinschneider, "Hebr. Bibl." xvii. 60; *idem*, "Cat. Bodl." No. 100). Or whisper in her right ear: "He went up on Mount Sinai and heard a calling and a crying. And he spoke unto the Lord: 'What meaneth this calling and this crying that I hear?' The Lord answered him: 'It is the voice of a woman in labor. Now go and say unto her: 'Get thee out! The earth demands thee!' And all these thy servants shall come down unto Me and bow down themselves unto Me, saying, 'Get thee out, and all the people that follow, '' etc. Or mix the fat (or milk) of a bitch with water and give it to the woman to drink. Or stand at the door

next to the mezuzah and read the "Haf-tarah Shofetim" (Isa. li.); then say Gen. xxi. 1, and pronounce the Lord's name thus, צא אתה (= "Get thee out!"). Or strew ground black pepper under the woman in labor; . . . or place a ram's horn in her hand, or the skin of a snake on her heart; . . . or the eyes and bladder of a salt herring; or let another woman put her hand on her and say with her Ps. xix. 6; or lay upon her a clay vessel on which is inscribed: חַיִּים חַיִּים חַיִּים; or write on a kosher parchment the magic square (compare Abraham ibn Ezra, "Yesod Mora," ed. Creizenach, p. 125), and lay it on the spot where the tefillin are laid; or place between her teeth a silver ring on which has been inscribed with a new graving-tool: וְיָקִים לְךָ יְיָ, וְיָקִים לְךָ יְיָ (compare "Mitteilungen," iii. 67, No. 123). If the child dies in the womb, the gall of an ox should be mixed with water and given to the woman.

magic square.

where the tefillin are laid; or place between her teeth a silver ring on which has been inscribed with a new graving-tool: וְיָקִים לְךָ יְיָ, וְיָקִים לְךָ יְיָ (compare "Mitteilungen," iii. 67, No. 123). If the child dies in the womb, the gall of an ox should be mixed with water and given to the woman.

It is further stated in the same recipe-books that "Sannui, Sansannui, and Samangaluf (סננוי וסנסנוי) are known as the great and noble angels whom men call upon to protect women in labor against Lilith, and whose names written in any locality, even if on the wall, serve to exorcise Lilith's brood therefrom. Therefore, it is effective to write these names in the four cardinal points near the woman, especially at an opening, as at a door or window." This prescription against the beautiful Lilith, Adam's first wife (compare second part of Goethe's "Faust"), was zealously observed (see the satire of Isaac Erter in "Kerem Hemed," iii. 106, and Flögel-Ebeling, "Gesch. des Grotesk-Komischen," p. 14).

Older amulets for the lying-in chamber contained the following (see illustration to AMULET; compare "Mitteilungen," ii. 79 *et seq.*; v. 61, 47; on "Zakar," *ib.* v. 35): "Adam and

Lilith and Amulets. Eve," within (compare *ib.* i. 91; "Am Urquell," ii. 144, 196; iv. 95); "Lilith and the first Eve," without, "Sannui, Sansannui, Samangaluf, Shumriel, Hasdiel." The text continues: "In the name of the Lord God of Israel, who

reigns over the cherubim, whose name is mighty and fearful, Elijah the prophet—may he be mentioned for good!—once went upon his way and met Lilith, with all her kith and kin. And he said unto Lilith, the fiend: 'Thou unrivaled in impurity, and ye, ye goodly crew, whither are ye going?' She answered: 'My master Elijah, I am going where I may find a woman in travail. I will cause a deep sleep to come upon her, and I will rob her of her new-born child. I will drink its blood, and suck its marrow, and devour its flesh.' And Elijah—may he be mentioned for good!—spoke angrily: 'May God, blessed be He! banish you hence! May you become stiff and stark as stone!' Lilith replied: 'For God's sake, spare me, and I will get me hence. I swear to you by the name of the Lord God of Israel, I will desist from my intent upon the woman and her child; and whenever I hear my name called I will go away. Now I will tell unto you my names; and whenever they are spoken, neither I nor those that are mine will have the power to do harm or to go to the house of a woman in labor, or to do her any evil. These are my names: Lilith, Abithu [compare "Mitteilungen," v. 80, אֲבִיתוּן אֲבִיתוּן of the Mandæans]; I. Wollstein, "Dämonenbeschwörungen aus Nachtmudischer Zeit," pp. 52, 57, Berlin, 1894; "Zeitschrift für Assyriologie und Verwandte Gebiete," ix. 136], Abihu, Amsarfu, Hagash, Ores, Ikpodu, Iylu, Tatrota, Abhanuktah, Satruna [probably to be compared with שַׁטְרֵינָאֵל; "Mitteilungen," v. 57], Kakh-katasa, Thilathuy, Piratsha. . . ."

Amulets such as are described in "Mitteilungen," i. 91 *et seq.*, and others having inscribed on them "Magen David," the signs of the zodiac, and Ps. lxvii., are still in use and may be obtained at any Jewish book-shop. When travail is difficult a Torah-roll is brought into the room.

Old representations show the employment of delivery-chairs (compare Müller-Schlossar, "Haggadah von Sarajevo"). In Rumania the child stays in the bed with its mother as long as she remains there, and a sefer (any holy book) is placed under its pillow. Into its first bath are put pieces of bread and sugar. In Poland the rocking of an empty cradle is avoided. If any one comes with a basket into a house in which there is a new-born child, a piece is cut from the basket and laid in the cradle, in order that the infant may not be robbed of sleep and rest. For the same reason care is taken not to remove from such a house utensils of any kind, especially such as hold burning coals.

If the child is born with a caul, the latter is taken as a sign of good luck (the same is the case in Iceland; compare Grimm, "Märchen,"

Customs. ii. 59), and is preserved for a talisman. **After Birth.** A boy is welcomed into the world with the words: נִרְבָּה לְעוֹלָם בְּרַכָּה ("A boy is born to the world; a blessing

has come into the world"), but at a girl's birth the walls weep. It is a belief in Rumania that until the completion of the first year of its life the child speaks with God and the angels. The latter show it golden fruit in its sleep: if it can grasp the fruit, it laughs; if it can not, it weeps. Elsewhere a child's laughing in its sleep is said to betoken that

it is playing with the angel of death; therefore it is recommended that the child be lightly tapped on the mouth.

A child should not be kissed on the feet, since this is the custom at the "mehillah prayer"; that is, on asking the dead for forgiveness. A child must not be held before a mirror, else a second child will be born within the year. If the hair be cut, the child will get an elf-lock. Scurf ("pareh"; compare Lev. xiii. 12) gives promise of beautiful hair (compare "Mitteilungen," i. 81 on "ḥalakah"). The woman who has been delivered must not be left alone. Under her pillow or under the mattress is laid a knife, without which she may never leave her bed. Or a dagger is stuck in the ground near her head; and daily for thirty days it is carried three times around her couch. In northern Germany this serves to guard against the werwolf (Wuttke, "Der Deutsche Volksaberglaube der Gegenwart," p. 260), or, according to Grimm ("Mythologie," xc.), against the wicked fairies (for the customs among the Romans see Pliny, "Historia Naturalis," xxxiv. 44). While making the circuit with the dagger about the bed the following verses are sung:

"Ich mache einen Kreis
Den Gott wohl weiss. . . .
Also mancher Ziegel ist auf diesem Dach,
Also mancher Engel bei uns wach!"

(Translation.)

I make a circle
(Which God well knows):
As many tiles as are on this roof,
So many angels keep watch o'er us!

At a hard labor three or four women pray:

"Auf meinem rechten Fuss tret' ich,
Gott, den Herrn, bitt' ich,
Dass er entbind."

(Translation.)

I press upon my right foot,
God, the Lord, entreating,
That He may deliver!

During the same thirty days in which the dagger is carried about the bed the school-children recite the evening prayers in the lying-in chamber, in order to keep off the "Benemmerin" (pixies); that is, elves. In Hamburg, for the protection of mother and child a skein of red silk is bound about the child's wrists (see "Am Urquell," iv. 96). Of efficacy against "Frau Holle" is the "Holle Kreisch" (compare Löw, *l.c.* p. 105; Bodenschatz, "Kirchliche Verfassung," iv. 73; "Mitteilungen," iv. 146, v. 7). Here may be mentioned the custom existing in Breslau of scattering almonds and raisins on the first Simḥat Torah after birth. The night before circumcision (watch-night or wheat-night), and in Palestine every night between birth and circumcision, for the protection of the child the people in the house "study" (compare Grünbaum, in Winter and Wünsche, "Die Jüdische Litteratur," iii. 587). At Salonica a ballad is sung on the watch-night (compare "Rev. Etudes Juives," 1896, ii. 138 *et seq.*). In Palestine, on the night before the circumcision an oil-lamp with many wicks is brought into the house, and there is general rejoicing. In Upper Silesia the knife for circumcision must be in the house the night before the ceremony. The Friday evening

before circumcision ("Zakar") a feast is spread, to which every one is welcomed. In Hamburg, peas with pepper, whisky, and cake are provided; among the Portuguese, nasturtium seeds; in Poland, "fristlelech" ("faworiski"; that is, a thin pastry mixed with oil), round peas, and mead ("Mitteilungen," i. 100).

Most of these customs and superstitions are not of Jewish origin; but, as a review of Grimm's "Mythologie" and Wuttke's work (see bibliography below) shows, they have been borrowed from neighboring peoples.

For parturient women the regulations are the same as for the NIDDAH. At the birth of a male the bath (mikweh) may not be taken before the expiration of eight days; at the birth of a female, not before fifteen days, provided clean white linen has been put on and the seven days of purification have taken place within that time. Where it is the custom for the women to visit the mikweh at the end of forty days after bearing a male, and fifty after bearing a female, regulations are made accordingly (Yoreh De'ah, 19, 4).

CHILDREN, SONG OF THE THREE. See DANIEL, BOOK OF.

CHILDREN OF GOD. See GOD, CHILDREN OF; SON OF GOD.

CHILE: A republic of South America, bounded by Peru on the north, Bolivia and the Argentine Republic on the east, and the Pacific Ocean on the south and west. Soon after the discovery of the American continent many Jews, professed and secret, settled in the different sections of South America, and changed their places of residence according to the pressure of the Inquisition. At the beginning of the sixteenth century many New Christians ("Christianos Nuevos") who had recently arrived at Callao, Peru, drifted to Santiago, Chile. It was not long before the spies ("familiares") of the Holy Office ferreted them out, accumulating evidence as to their antecedents from Buenos Ayres, Mexico, and the cities of the Old World, until sufficient data had been secured to warrant their apprehension. Thus, an accused Jew would be imprisoned in Chile, tortured until he confessed, and, sometimes after languishing for years in the secret dungeons of the tribunal in Santiago, finally be surrendered to the secular arm for execution in Cartagena or Lima. The martyrdom of the scholar and theologian Francisco Maldonado de Silva, whose trial was a cause célèbre, is a case in point. He suffered imprisonment in Chile, and was burned at an auto da fé in Lima Jan. 23, 1639. Nor was his case an exception to the rule. In the following paragraphs will be found the first summary in English of these trials for Judaizing.

The case of Luis Noble or Luis Duarte (see DUARTE) is probably the first on record. A Portuguese by birth, he served as a soldier in Chile, and was arraigned before the tribunal at Callao for stealing a crucifix. He confessed to being a Jew (Aug., 1614). Duarte does not seem to have been severely dealt with, escaping with a whipping and a light sentence. From 1636 to 1641 the following persons were accused and punished for Judaizing: Antonio de Acunha, from Arronchez, Portugal,

Earliest aged 24 years; Antonio Corderes; **Victims of** Diego Lopez de Fonseca, from Badajoz, aged 40 years; Manuel Baptista **In-** Perez, merchant, aged 46 years; Manuel de la Rosa. All these Jews were

incarcerated in Chile, and their possessions were confiscated, which seems to have been the leading motive for these prosecutions for heresy. The above-named, it appears from another record, all suffered martyrdom in Lima at an auto da fé held in that city Jan. 23, 1639.

Don Manuel Bautista PEREZ was rated as a millionaire, and is described as the owner of a regal residence in Lima, which yet bears the name of "the house of Pilate." Don Diego Lopez de Fonseca, who was burned at the same auto da fé, was charged with selling goods cheaper to people who would enter his shop through the door, beneath the threshold of which he had buried a cross in mockery of Jesus, than to others (see TREVINO). Juan de la Parra, a Chilean by birth, was imprisoned and sentenced by the Holy Office "for observing the religion of Moses," in 1661. There were several others who suffered imprisonment in Chile and martyrdom in Peru. J. T. Medina devotes two long chapters to leading Jewish cases in his history of the tribunal in Chile (see subjoined bibliography), and gives the whole trial of de Silva at length.

In 1680 proceedings were begun against Leon Gomez de Silva, or Oliva (as his name is spelled in another place). He was born in Portugal and resided at Santiago, and was denounced as a Judaizer. The accused was still alive in Santiago twenty years after proceedings were instituted against him; and his property, at one time confiscated by the authorities, had been restored.

The celebrated Hungarian-Jewish violinist, Michael Hauser, who had been the guest of Don Elias, President of Peru, in 1852, and who was everywhere received with extraordinary honors, was compelled to fly for his life in Santiago, charged with "conspiring diabolically to ruin Christian folk and, by reason of hellish art [his violin], in league with the devil." Thanks to the friendly offices of a humane Creole who had been charmed by his music, he hid until the arrival of a ship bound for Australia (see his "Aus dem Wanderbuche eines Oesterreichischen Virtuosen," Leipsic, 1859; also Ignaz Reich's "Beth-El," ii. 97). On a proposal made to Oliver Cromwell in 1655 to seize Chile, see Simon de CACERES.

Of the modern history of the Jews in Chile nothing definite can be ascertained. There are a large number of prosperous Jewish merchants in Santiago, mostly Europeans; but it is not known whether they

form a religious community. For other data see SOUTH AMERICA.

CHILEAB: A son of David, born to him at Hebron. His mother was Abigail, whom David married after the death of her husband Nabal, the Carmelite (II Sam. iii. 3). The parallel account in I Chron. iii. 1 gives his name as "Daniel." In II Sam. iii. 1 the Septuagint reads *Δαλωία*, and in I Chron. iii. 1 *Δαμωίλ*. (The Alexandrine, however, reads here, too, *Δαλωία*.) It is impossible to restore the original name, although "Daniel" is much nearer than "Chileab." Berakot 4a (Bab.) gives a fanciful interpretation to the name. He was called "Chileab" because he shamed (מכלים) Mephibosheth in the Law.

CHILIASM, CHILIAST, CHILIASTIC.
See MILLENNIUM.

CHILION: A son of Elimelech and Naomi, the Bethlehemites who emigrated to Moab because of the severe famine in Judea (Ruth i. 2). This might have been the reason for the name "Chilion" (wasting), as also for his brother's name "Mahlon" (disease). In Moab, Chilion married Orpah (*על*), and, after living in that land for ten years, died there.

E. G. H.

G. B. L.

CHILMAD: A name occurring in the long list of those nations supplying merchandise for Tyre (Ezek. xxvii. 23). The Septuagint reads *καὶ Χαρμάς*, which seems to point to Carmania. The Targum renders it "the Medes," which Rashi follows. David Kimhi quotes his father's opinion that the word contains the root למד. The word would then mean "as taught." George A. Smith identifies the name with "Chalwadh." Of all these identifications that of the Targum is the simplest and, perhaps, the most acceptable; for other corruptions of the text have been noted in this verse, and it is probable, as Cheyne suggests, that the first syllable in *חלמד* came from the following *רכל*, the *ר* of which fell out owing to the preceding *ר*.

E. G. H.

G. B. L.

CHIMHAM: A son of Barzillai, who supported David while the latter was in exile at Mahanaim. After the death of Absalom, Barzillai was invited to spend the rest of his days with the king; but he declined, and sent his son Chimham instead. In Jer. xli. 17 mention is made of the camp of Chimham near Bethlehem, from which it would seem that David bestowed upon him some land which passed on to his descendants in his name. This rendering is indicated by the Targum, and is accepted by Rashi and Kimhi (II Sam. xix. 38, 39, 41; R. V. 37, 38, 40).

CHIN, RACHEL MIRONOWNA. See KHIN, RACHEL MIRONOWNA.

CHINA: The southeastern and main division of the Chinese empire. The subject of the Jews in China is here treated in two sections: I. Their history; II. Their religious customs, etc.

I. History: Whether China was known to Biblical writers is a matter of dispute among scholars. The majority of Bible commentators identify it with אֶרֶץ סִינִים ("the land of the Sinim"), whence the deported sons of Israel shall return to

their land (Isa. xlix. 12); others, however, deny the identification. At any rate, the Jews in Persia from early times were connected with the silk trade, and, as a consequence, entered into direct relations with the "silk-men" ("Seres," from "ser" = שֵׂרָאִים = "sericum" = "silk"), as the Chinese were called by the Romans.

(For the identification see commentaries of Gesenius, Delitzsch, Hitzig, Cheyne, and Orelli; also Kautzsch, in Riehm's "Handwörterbuch der Biblischen Alterthümer," s.v. "Sinim"; Von Strauss-Torney, in Delitzsch's "Isaiah," p. 712; Lassen, "Indische Alterthumskunde," 1867, i. 1028; further, Dillmann, Duhm, and Marti, in their commentaries; König, in Hauck's "Real-Encyc." s.v. "Sinim"; and Von Richtshofen, "China," i. 436; for the "Seres," see SILK; Kohler, "The Jews and Commerce," in "The Menorah," 1887, p. 211; Heyd, "Gesch. des Levantehandels," i. 12, notes 1, 24; compare Mommsen, "Römische Gesch." v. 346, 465-470; Herzfeld, "Handelsgesch. der Juden," pp. 110, 308).

At what time, however, the first Jewish settlement in China took place it is difficult to say. In all likelihood Jewish merchants immigrated, or changed a temporary sojourn into a

First Jewish Settlement. an "Account Written by Two Mohammedan Travelers Through India and China" in 851 (Renaudot, transl., London, 1733, p. 42), it is stated that "the Jews have been settled in that empire [China] from time immemorial." Notwithstanding this, it is as hazardous to connect the first Jewish settlement in China with the Lost Ten Tribes ("Jew. Quart. Rev." xiii. 23) as it is an unwarranted skepticism to doubt the correctness of the tradition of the Chinese Jews themselves, which traces the first immigration back to the Han dynasty between 206 B.C. and 221 C.E. (Möllerndorf, in "Monatsschrift," 1895, p. 329), and more exactly to the time of the emperor Ming-ti. This opinion is based upon the oral tradition of the Jews, reported by Father Brotier: "These Jews say that they entered China under the Han dynasty during the reign of Han Ming-ti [58-76 C.E.]." And further: "Several of these Jews have assured me that they arrived during the reign of Ming-ti" (Tobar, "Inscrip. Juives de Kai-Fung-Fu," p. 90). A certain Sulaiman (Jewish traveler of the ninth century) similarly claims that they entered in 65 C.E. Grätz (iv. 376) places the first immigration in the

刀
筋
教

Jews.

year 231 C.E., connecting it with the persecution of Jews in Persia, which caused also their first settlement in India; furthermore, the Jews of K'ai-Fung-Foo themselves claim that they received their religion from India (compare Finn, "The Orphan Colony of Jews in China," p. 40; but see passages cited below); but there is nothing to support this hypothetical date, or the statement of Glover in the "Babylonian and Oriental Record," vi. 247, 288; vii. 149, that the Jews were not in China before the fifth century. On the other hand there are many

reasons for the assumption of an earlier date. The Chinese everywhere **Jews Known as** call the Jews "Tiao Kiu Kiaou" (the "Tiao Kiu" sect which extracts the sinews, after **Kiaou.** Gen. xxxii. 33); and this name itself, as a characterization of the Jews, indicates great antiquity. Rabbinical Judaism would have suggested more distinctive peculiarities of the Jews to the Chinese.

As will be shown later, there are also many intrinsic evidences of early Jewish settlements in China to be found in peculiar rites, preserved in connection with their synagogue; the records which will be cited below are obviously copies of older documents; and there is also the fact that the Arabic writers of the ninth and fourteenth centuries confirm the existence of old Jewish commercial colonies in China. Indeed, all facts tend to show a long and peculiar development of religious as well as social life of the Jews in China, the beginnings of which can hardly have been later than the first Christian century. K.

Concerning the history of the Chinese Jews in the Middle Ages a very few isolated facts are known. The two Mohammedan travelers of 851 who are quoted above state that at that period "many of them, for the sake of riches and preferment, have abjured their own religion." This is corroborated by Abu Zaid Hasan al-Sirafi (Reinaud, "Géographie d'Abulfeda," i. lxxxiii., Paris, 1848), according to whom "120,000 Mohammedans, Jews, Christians, and Parsees, who had come there for commerce, were in the revolt of Baichu in the year 884 massacred in Canfu, the chief port for all the Arabian merchants." It seems very probable that in the tenth century a new colony of Jews came into China, as Professor Chavannes declares: "Between 960 and 1126 (Sung dynasty) Jews coming from India brought, for the first time, as tribute to the court of China, stuffs from western maritime countries ('si yang poo'). The Jews came to China by sea, and not by crossing central Asia; they were members of the Jewish colonies settled in India. Lastly, their arrival does not appear to have been prior to the end of the tenth century C.E."

Marco Polo refers to the powerful commercial and political influence of the Jews in China in 1286 (see Murray's translation of "Polo's Travels," p. 99). Ibn Batuta (see "Monatsschrift," 1895, p. 329) in the fourteenth century speaks of Al-Khansa—which Möllerndorf identifies with Hangchau; Neubauer ("Jew. Quart. Rev." x. 125) with Canfu—as having many resident Mohammedans, Jews, and Christians.

The Jews, who were never active participants

them. It was through Catholic missionaries in the seventeenth century that the first information reached Europe of a Jewish community, consisting of about five hundred or six hundred members, in K'ai-Fung-Foo, the ancient capital of Honan; of one at Hangchau-Foo; and of others in other Chinese towns. But owing to the existence of an ancient synagogue at K'ai-Fung-Foo, which, though rebuilt several times, had preserved the oldest records of Jewish settlements, the interest of the historians was centered upon the Jews there; and the inscriptions in the Chinese language found on its marble tablets, dating from the years 1489, 1512, and 1663, which have been often translated and published, have cast unexpected light upon a hitherto entirely unknown chapter of Jewish history. The following abstracts of these inscriptions, taken from "Inscriptions Juives de Kai-Fung-Fu," Shanghai, 1900 (see "Jew. Quart. Rev." xiii. 20), give an insight into both the history and the character of the Chinese Jews.

The inscription of 1489 referring to the immigration states: "Seventy families came from the Western lands offering tribute of cotton cloth to the emperor, who allowed them to settle at Peen-lang" (K'ai-Fung-Foo). **The Synagogue Records.** In 1163 the synagogue was erected by a certain Yen-too-la; and in 1279 it was rebuilt on a larger scale. In 1390 the Jews were granted land and additional privileges by Tai-tsou, the founder of the Ming dynasty. In 1421 permission was given by the emperor to Yen-Tcheng, a physician greatly honored by him, to repair the

Bird's-Eye View of the Temple Buildings at K'ai-Fung-Foo, China.
(From "Jewish Quarterly Review.")

tered China. In 1164 a synagogue was built at Peen [K'ai-Fung-Foo]. In 1296 it was rebuilt. [The dates in Toher's and Glover's translations differ slightly.] Those who practise this religion are found in other places than Peen [K'ai-Fung-Foo]; but, wherever they are met with, they all without exception, honor the sacred writings and venerate Eternal Reason in the same manner as the Chinese, shunning superstitious practises and image-worship. These sacred books concern not Jews only, but all men, kings and subjects, parents and children, old and young. Differing little from or [the Chinese!] laws, they are summed up in the worship of heaven [God], the honor of parents, and the veneration of ancestors." Speaking of the Jews themselves, the Chinese monumental testimony continues: "They excel in agriculture, in merchandise, in magistracies and in warfare, and are highly esteemed for integrity, fidelity, and a strict observance of their religion."

At the end of the inscription of 1512 occurs: "This tablet was erected by the families Yen, Lè, Kao, Chaou, Kin, E, and Cheng, at the rebuilding of the synagogue in the first month of autumn, in the seventh year of Ching-shi of the Ming dynasty, A.D. 1511 [read 1512]."

Another inscription dated 1663, by a Chinese mandarin, afterward minister of state, begins in the same manner as the first two, dwelling first on the virtues of Adam, Noah, Abraham, and Moses, and then on the conformity of the Jewish law and literature with those of the Chinese. After relating the history of the Jewish settlement, it gives a graphic account of the rebellion which caused the fall of the Ming dynasty in 1642 and the destruction of the city, the synagogue, and many Jewish lives and of the rescue of the sacred writings by a Jewish mandarin who, with the help of the troops, restored the city, and together with his brother rebuilt the synagogue in 1653 (see CHAO TSE-CHENG). Only one complete scroll of the Law having been recovered from the waters, this was placed in the middle of the Ark; and twelve other scrolls were copied and placed around

gration, this inscription says: "During the Ming dynasty this religion ex-

it. Other holy writings and prayer-books were repaired by members of the community, whose names are perpetuated in the tablet, together with the names of all the dignitaries who took part in the restoration.

So long as the Jewish inhabitants of China continued to enjoy the imperial protection as mighty men of commerce, their Persian brethren furnished them with all the necessary means of religious education. Their commercial and social decline broke off their connection with the West; and a state of ignorance followed. Thus were they found by

Commercial and Social Decline. the Catholic missionaries in the seventeenth century, and in a worse condition by the Protestant missionaries—both endeavoring to convert them, until the Chinese government interfered with their attempts.

At the beginning of the seventeenth century the founder of the Jesuit mission at Peking, Father Matteo Ricci, received a young Jew who came to see him, declaring that he worshiped one God. At the mission, seeing a picture representing the Virgin with the child Jesus, he believed she was Rebekah with Esau or Jacob, and said that he came from K'ai-Fung-Foo, in the province of Honan, where ten or twelve families belonging to his religion dwelt, having a synagogue, in which there were books written in the language (Hebrew) of a Bible shown to him by Ricci. Too old to travel, Ricci sent to K'ai-Fung-Foo a Chinese Jesuit. Later, the Jesuits Aleni (1618), Gozani (1704), Gaubel, and Domenge (Father Tobar, "Inscriptions Juives de Kai-Fung-Fu," Shanghai, 1900), brought with them much information from K'ai-Fung-Foo, which they had visited.

When the existence of Jews in China became known to their European brethren, steps were taken to communicate with them by Isaac Nieto, haham of London (1760), who addressed a Hebrew letter to them imploring them to give information of their origin, their condition, and their needs. Their answer, written in Hebrew and Chinese, has disappeared. In 1843 James Finn, British consul at Jerusalem, interested himself in these Chinese Jews; and a letter which he received from them (1870) in reply to his own, printed in his work "The Orphan Colony of Jews in China," 1872, disclosed the sad fact of their utter destitution and religious decay. But this state of affairs had been made known as early

as 1850 by Dr. Smith, Bishop of Victoria, after inquiries made on behalf of the London Missionary Society.

In order to secure information of the Chinese Jews at K'ai-Fung-Foo, a number of missionaries and Jewish merchants were sent thither. They reported that a few families, Jewish in name only, but sharply differentiated from the surrounding heathens and Mohammedans, lived there in abject poverty. They could read no Hebrew, had not had a rabbi for fifty years, intermarried outside the faith, and preserved only a few ceremonies and names of holy days.

"The expectation of a Messiah seems to have been entirely lost. The rite of circumcision, which appears to have been observed at the period of their discovery by the Jesuits two centuries ago, had been totally discontinued. . . . They had petitioned the Chinese emperor to have pity on their poverty, and to rebuild their temple. No reply had been received from Peking; but to this feeble hope they still clung. Out of seventy family names or clans [see above] not more than seven now remained, numbering about 200 individuals in all, dispersed over the neighborhood. A few of them were shopkeepers in the city; others were agriculturists at some little distance from the suburbs; while a few families also lived in the temple precincts, almost destitute of raiment and shelter. According to present appearances, in the judgment of native messengers, after a few years all traces of Judaism will probably have disappeared, and this Jewish remnant will have been amalgamated with and absorbed into surrounding Mohammedanism" (Smith, "The Jews at Kai-Fung-Fu," London, 1851, *passim*; "Jews in China," in "North-China Herald," No. 25, Jan. 18, 1851).

Two of the Chinese travelers were sent a second time to K'ai-Fung-Foo, and returned to Shanghai in July, 1851, bringing with them new information which corrected in part the previous reports:

"During their former visit our travelers, by mistaking family names for individuals, greatly underrated the number of the Jewish community. Circumcision also appears to be practised, though the tradition respecting its origin and object appears to be lost among them."

Attempts to send Jews to offer a helping hand to the forlorn brethren and to revive the colony were made in England

and in the United States in 1852 and 1864, but without success, owing to the occurrence of the T'ai-P'ing rebellion, the federal war, and the death of Benjamin II., the Jewish traveler, who had interested himself in them (see Benjamin II., "Acht Jahre in Asien und Afrika," 1858, p. 157, and the appeal made in the "Jewish Chronicle" for April 29, 1864).

After the T'ai-P'ing rebels had left the Yang-tse

1851, although they Chinese and wore a to K'ai-Fung-Foo.

The information given (see Benjamin II., *l.c.*) can missionary, in his work "A Cycle of Cathay" (see also "Monatsschrift," 1895, p. 328); by Lieberman, in his report to the Anglo-Jewish Association (see "Jew Chron." July 11, 1879); and, finally, by Lehmann, an officer of the German army at Kiau-Chau ("American Hebrew," Jan 12, 1900), has given the impulse to an agitation which promises to bring relief and possibly re-institution to the orphan colony (see "Jew. Quart. Rev." xiii. 40; "Jew. Chron." June 22, 1900, and Aug. 28, 1902). According to Aaron Arnauld, cousin of Aaron Arnauld, the grand rabbi of Strasburg (see Benjamin II., *l.c.*), many Jews have emigrated, during the Chinese wars with the Tatars,

to Kiang-su, to Arnoy, and to Peking; but they have no synagogue in those places. A number of Jews have under English protection removed to Shanghai and Hongkong, where they have engaged in the opium and cotton trades.

In 1900 the community of K'ai-Fung-Foo numbered 140 souls, without a leader, synagogue, or any well-defined system of education. Since 1900 renewed efforts have been made by the Society for the Rescue of the Chinese Jews, looking toward the restoration of the Jewish religion at K'ai-Fung-Foo. Several Jews of Shanghai have interested themselves in this work.

G.

H. CR.

II. Religious Customs: The synagogue of K'ai-Fung-Foo, since 1870 a heap of ruins, is described by the Jesuit fathers of the eighteenth century as having covered a space from 300 to 400 feet

JEWS OF K'AI-FUNG-FOO, CHINA.
(From a photograph.)

mals slain for food-an institution all the more remarkable since nowhere else is the synagogue chosen for that practise. The Chinese were so impressed by it that they gave the Jews the name of "sinew-pluckers." The **Peculiar** the name of "sinew-pluckers." The **Religious** second division of the court led **Rites.** through an empty space in its center into the "Hall of Ancestors" to the right and the left. Here at the vernal and autumnal equinoxes veneration was paid in Chinese manner to the Jewish patriarchs. The mode of veneration, however, differed from the Chinese in that only the names of the Biblical ancestors were written on a tablet, and no picture was presented. Further, instead of the animal sacrifices mentioned in the inscription (see below), incense was used, a censer being assigned to each patriarch; the largest one to Abraham as the most venerated, the rest for the other patriarchs (the twelve sons of Jacob), Moses, Aaron, Joshua, Ezra, and other Biblical persons.

ages, both men and women. In the open space between these chapels tabernacles ornamented with flowers were erected every year at the Feast of Tabernacles.

The synagogue proper—an edifice about 60 x 40 feet, to which a portico with a double row of four columns formed the entrance—had in the center a magnificent elevated chair with embroidered cushions, upon which the scroll of the Law rested while being read. This was called the "chair of Moses" (compare Matt. xxiii. 2; "Rev. Et. Juives," xxxiv. 299, xxxv. 110; see ALMEMAR). In front of this a table was placed, upon which the name of the emperor was written in golden letters, accompanied by the prayer "May he live ten thousand myriads of years!" Over the chair of Moses was a dome with the "Shema' Yisrael," "Baruk shem kebod malkuto," and other Hebrew sentences inscribed in golden Hebrew letters.

On a large table by the door stood six candelabra having three different kinds of light, a vase for incense, and a tablet recording the generous donations of incense by the emperors of the Ming dynasty. A laver for the washing of hands (probably for the priests before reciting the benediction) stood near.

At the extreme end of the synagogue was the Holy of Holies (which was totally dark) containing the Ark. In the latter were placed the thirteen scrolls of the Law, each in a separate case and enclosed in silk curtains; that in the middle, which was the one most venerated, representing Moses, and the others representing the twelve tribes. The whole of this part of the synagogue was elevated, stairs leading up to it on both sides,

Holy of Holies. and was inaccessible to any one but the rabbi and the priests, probably because the scrolls were too sacred to be handled by any but the rabbi, and because the priests used the place for the "dukan," or blessing, both priests and rabbi undergoing ablution before the services. The place, however, regarded with especial reverence as the Holy of Holies, bore the name "House of Heaven [of God], Bet-El." The name given to the synagogue in general was "Li-pai-se" (Place of Ceremony, or, according to others, Weekly Meeting-House), which seems to indicate that it was used only on Sabbath for service.

As in most Eastern countries, the worshipers put off their shoes on entering the synagogue. During service they wore a blue head-dress in contradistinction to the Mohammedans, who wear a white one. A remarkable custom prescribed that he who read the Law should cover his face with a transparent veil of gauze, in imitation of Moses (Ex. xxxiv. 33); a practise unknown otherwise, but to which Paul seems to allude as being well established in his time, when he says, "For until this day remaineth the same veil untaken away in the reading of the Old Testament" (II Cor. iii. 14).

At the side of the reader stood a monitor, to correct his reading if necessary (this is probably a survival of the meturgeman). The practise of calling up laymen to read from the Law does not seem to have been known. In the inscription of 1489 these rules are given regarding divine service:

"Thrice a day we pray: morning (at the fourth hour), noon, and evening (at the sixth hour)." This corresponds with Ps. lv. 18, not with the Mishnah Ber. iv. 1. "The worshiper first bends his body (דשהויה); then he offers the silent prayer, swaying the body to and fro; and at the close he retreats three paces and then advances five, afterward turning toward the left and the right, and finally looks upward and downward in order thus to profess the belief that God is everywhere" (compare R. Akiba in Ber. 31a).

Very singular, and indicative of powerful Chinese influence, is the following: "It is incumbent upon the Jew to venerate his ancestors. Twice in the year—in spring and in autumn—he offers them oxen and sheep together with the fruits of the season" (compare Tobit iv. 17; Tosef., Shek. i. 12). Noteworthy also are the following passages: "Four days every month are devoted to purification, fasting, and charitable acts" [whether these are Fridays, the preparatory days for the Sabbath, or the four lunar phases of each month, is not clear]. "Each seventh day is devoted to rest, and a fresh period of good deeds commences anew." Here reference is made to the ancient Chinese work, the "Book of Diagrams." "In the fourth season of the year the Jew places himself under severe restraint for seven days [seven in place of the Ten Penitential Days]. One entire day [Day of Atonement] he abstains altogether from food, devoting the time to prayer and repentance."

The Sabbath and festivals were, indeed, strictly observed by them, including even the Feast of Simhat Torah, when Pater Domenge saw them carry the thirteen scrolls of the Law in procession round the Bet-El Ark; the Song of Moses, however, was read the day before, on Shemini 'Azeret. Services for the Fast of Ab and for Purim are also included in their liturgies. Their celebration of the New Moon as a festival is proof of a pre-Talmudic tradition (compare Soferim xix. 9). Their calendar was regulated

Sabbaths and Festivals. by the moon like that of the rest of the Jews, and like that of the Chinese. In this connection the fact should be noted that their division of the Torah is into fifty-three weekly portions for the Sabbaths of the year, as is stated also in the account of the handing down of the Law given in the inscription of 1489:

Abraham is "the nineteenth in descent from Adam, who in the year 146 of the Chow dynasty (2108 B.C.) became the founder of the religion of the One God, denouncing the worship of images. His sublime doctrine was submitted to Moses, who in the six hundred and thirteenth year of the Chow dynasty (1641 B.C.), after forty days' stay on Mount Sinai spent in fasting and in communion with God, brought down the Law. From him were the fifty-three portions of the Torah, together with the tradition handed down to Ezra, the great reformer and contemporary of the founder of the Chinese religion [Confucius]."

This division differs from the Masoretic tradition, which, as a rule, has fifty-four portions (see Zunz, "G. V." p. 4, note cc., where only two exceptional authorities are quoted); it seems to have been based upon the regular fifty-two Sabbaths of the year, with an additional parashah (Deut. xxxiii.-xxxiv.) for Shemini 'Azeret or Simhat Torah. As will be seen further on, they had also Haftarat for the Minhah service, which, again, differed from Talmudical custom, and had only its parallel in some Babylonian (or ancient Persian?) congregations (see Shab. 116b; Rapoport, "Erek Millin," pp. 170 *et seq.*). Their pronunciation of Hebrew was found by the Jesuit fathers to correspond with the one generally accepted by the Jews; also their views of the Merkabah and of the future. Bibliomancy was practised by them. If the statement in Finn's "The Jews in China" (p. 7) be correct, they were not particular in regard to eating forbidden animals.

Their literature also bears the stamp of various

epochs, a fact not fully kept in mind by Jewish writers on the subject. According to a description given by the missionaries (Finn, *l.c.*

Their Literature. pp. 28-48), the following classes of books were deposited in the Bet-El Ark besides the scrolls of the Law: (1)

The Ta-King, or Temple Scripture, containing the fifty-three parashiyyot for the Sabbaths of the year, written in large letters with the vowel-points, accents, and other scribal signs. (2) The Haftarah, or "supplementary books," containing selected portions from Joshua, Judges, Samuel, Kings, and the Later Prophets. (3) The historical books—probably more correctly, as Finn thinks, the Hagiographa, comprising Esther, Ezra, Nehemiah, the first chapters of Chronicles, and the two books of the Maccabees. These last, together with Judith and Ben Sira, in their possession, are another indication of a greater antiquity than has been assigned them by many writers. (4) Expositors. What these books contained was not ascertained by the Catholic fathers; possibly they were of a Midrashic character, and, if so, they would be of great value to students if they could be obtained. (5) Ritual books, about fifty in number, one of which bore the title "Minhah Tamid" (Perpetual Afternoon Service), and contained besides the prayers the readings for each Sabbath afternoon of the year and a special Minhah Maffir (Haftarah). A special Minhah for the New Moon festival was also pointed out.

Their liturgy, as preserved in the books taken to Europe, bears quite a different character. These books, after careful examination by Neubauer and Elkan Adler ("Jew. Quart. Rev." viii. 123, x. 584), have been shown to belong to the geonic time—some of the piyyuṭim are compositions of Saadia—and they were introduced into China from Persia.

Their Liturgy. The ritual is decidedly Persian; and the directions for the prayers, the translations of parts of the piyyuṭim,

as well as the colophons at the end of the Pentateuch sections, are in Persian. Parts of the Mishnah are quoted in their prayer-book, but nothing from the Gemara.

The Pentateuch shows observance of the same soteric rules regarding the letter "waw" and the ביה שמו as are found in the Yemenite scrolls (see G. Margoliouth, in "Cat. Hebrew and Samaritan MSS. Brit. Mus." 1899, p. 3, No. 6). The Aramean language is used in special supplications and songs; also in the announcement of the New Moon, which is strongly tinged with Messianic hopes. So also in the Elijah song for the close of the Sabbath. In the "Hazkarat Neshamot" seven Biblical men—Abraham, Isaac, Jacob, Moses, Aaron, Elijah, and Elisha (perhaps Joshua and Elijah originally)—and seven Biblical women—Sarah, Rebekah, Rachel, Leah, Jochebed, Miriam, and Zipporah—are mentioned as representatives of the seven classes of saints who dwell under the tree of life in Eden. The Pesah Haggadah is almost the same as that of the Yemen Jews. As Elkan Adler ("Jew. Quart. Rev." x. 601) suggests, the שליח ("messenger") who signed his name as copyist upon the Pentateuch was the typical transmitter of Persian rites, rituals, and writings to these Chinese Jews. Another character-

istic name for a copyist is "ha-melammed" (the teacher). Some of the writings mentioned above were first made accessible to European scholars when brought to Shanghai from K'ai-Fung-Foo by the two Chinese travelers in 1851, as is narrated in the following extract:

Six of the twelve rolls of the Law, which they saw during their previous visit, each containing a complete copy of the whole Pentateuch, were purchased for four hundred taels of silver (about £130) from the Jews duly assembled to the number of 300 persons; and the manuscripts were conveyed in one day from the synagogue to the lodgings of our travelers. They are each written in a fine legible hand on thick sheepskin sewed together, and are without points, or any of the modern divisions into sections or even books. They are in excellent preservation, except one, which was injured by a flood during the Ming dynasty, but is considered critically of the greatest value. . . . Forty smaller Hebrew manuscripts were also brought away, which, on further examination, may possibly throw light on their early history and migration.

Facsimiles of the following Hebrew manuscripts which were brought back by the two Chinese envoys from the synagogue, were published in 1851 at Shanghai (printed at the London Missionary Society's Press):

(a) Thirteenth section of the Law, ואלה שמות (Ex. i. 1-vi. 1). The last page contains the following note: "Holiness to Jehovah! The Rabbi Akiba, the son of Aaron, the son of Ezra, heard it. Shadai, the son of Bethuel, the son of Moses, read it. Mordecai, the son of Moses, witnessed it. And he believed in Jehovah: and He counted it to him for righteousness." (b) Twenty-third section of the Law, ואלה פקודי (Ex. xxxviii. 2-xi. 38). The following note is appended to the last page: "Holiness to Jehovah! The learned Rabbi Phinehas, the son of Israel, the son of Joshua, the son of Benjamin, heard the reading. I have waited for Thy salvation, O Jehovah, Amen."

CHINNERETH, also **CHINNEROTH**: 1.

The sea marking the eastern boundary of the Israelite possessions, whence the boundary proceeded by the River Jordan to the Dead Sea (Num. xxxiv. 11). It also marked the western boundary of the trans-Jordanic tribes (Deut. iii. 17). In later times the sea was called Gennesaret or lake of Galilee; the modern name is Bahr Ṭabariyyah (Lake of Tiberias). It is about 13 miles in length and 8 miles wide, its great

est width being a little north of the center. It is 680 feet below sea-level. The Jordan flows into and passes out of it. The lake itself is filled with various kinds of fish, and even in ancient times provided a livelihood for many fishermen. At present the land round the lake is sterile, but, according to the description of Josephus, was at one time very fertile.

2. In Josh. xix. 35, Chinnereth is the name of a town which by Talmudic authority is identified with Gennesor (Neubauer, "G. T." p. 214). It is of considerable antiquity, as it occurs in a hieroglyphic inscription of Thothmes III. (W. Max Müller, "Asien und Europa," p. 84).

CHINON, SAMSON OF. See SAMSON OF CHINON.

CHIOS: Island in the Ægean Sea; Turkish possession, 344 miles west of Smyrna. It is not known with any certainty when the Jews first established themselves at Chios. According to the local legends reported by the traveler Joseph Benjamin II., the Jewish cemetery of the island contains the tomb of JACOB BEN ASHER, author of the "Turim," who is said to have put in at the island in order to avoid shipwreck, and lived there for a number of years, until his death in 1340. The supposed tombstone of this learned rabbi is situated at the foot of a terebinth, but the inscription has become illegible. The tomb is regarded by the Jews as holy ground. Formerly troops of pilgrims from Smyrna met there, especially on the thirty-third day of 'Omer. The synagogue of the island of Chios is named after Jacob ben Asher.

Chios was an object of dispute in the Middle Ages among the Byzantine emperors, the Genoese and the Venetians; and it fell into the hands of the Ottoman Turks in 1595. Probably under the Turkish dominion the Jewish community of the island gradually grew. Toward 1700 Isaac al-Ghazzi, a rabbi belonging to a Smyrnes family of Talmudists, was chief rabbi of the island; he is the author of a Hebrew work, "Doresh Tob," a collection of discourses. Nothing further is heard of this community, although it continued to exist, for the magnificent marble tomb of Fernandez Diaz, a Jew of Salonica, dating somewhat prior to 1800, still attracts the attention of visitors to the cemetery.

The spiritual leaders of the community during the nineteenth century were R. Mordecai Aboab, R. Matathia Alluf, and R. Abraham Franco, who officiated for twelve years (1846-58). The chief event in the history of the Jews of Chios during that century was the earthquake of April 4, 1881. Twenty-one of them were killed, eight disappeared, and twenty-four were crippled. The Alliance Israélite Universelle sent aid to the island through its representatives at Smyrna. The catastrophe had some good results, however, for the ghetto, situated within the walls of the castle, was completely destroyed, and the Jews, determining to live outside the city, settled in the Frankish quarter, among the Greek Orthodox, Catholic, and Protestant inhabitants.

The Jews of Chios number only 200 in a total of 62,000 inhabitants, including Greek Orthodox, Roman Catholics, and Mohammedans. In 1885 they

built, through public subscription, a fine synagogue in the Frankish quarter. As the community is too small to be elaborately organized, it has a lay president who guards the interests of his coreligionists before the government, and raises a tax (the "gabelle") on meat, which is the only revenue for paying the expenses of the synagogue and for contributing to the support of the two Jewish schools. The schools, which are both in the same building, are subsidized by the Alliance Israélite Universelle; together they count seventy pupils, fifteen of whom are Gentiles. Since 1890 Moses Issachar has been president of the community, succeeding his brother Judah, who died in that year.

CHIKUITILLA. See GIKATILLA.

CHISDAI. See HASDAI; HISDAI.

CHITTIM (KITTIM). See CYPRUS.

CHIUN: A word occurring in connection with "Siccuth" in Amos v. 26. Scholars have long been puzzled to know whether in this passage they are common nouns or proper names. "Siccuth" is probably the Assyrian "Sakkut" (Schrader, "K. A. T." pp. 442 *et seq.*), an epithet of Ninib and Anu. Ninib was identified with Saturn (Jensen, "Kosmologie," p. 136), the Assyrian name of which was "Kaiman" ("Kaiwan"). The Septuagint and Syriac readings give ground for holding that כִּיּוֹן originally stood in the Hebrew text in place of כִּיָּן (compare Barton, "Studies of Oriental Club of Philadelphia," p. 113; and Nowack, "Kleine Propheten," p. 143), the pointing of the latter being a Masoretic distortion on the pattern of שִׁקּוץ ("abomination"). "Sakkut" and "Kaiwan" occur together in Rawlinson, "Inscriptions of Western Asia," iv. pl. 52, col. 4, line 9, in a list of epithets (compare Zimmern, "Beitr. zur Kenntniss der Babylonischen Religion," i. 10). Probably they were introduced together here through Babylonian influence in a verse regarded by Wellhausen ("Kleine Propheten," *ad loc.*) and Nowack, on the basis of II Kings xvii. 30, as a gloss. Budde ("Region of Israel to the Exile," pp. 67 *et seq.*) regards the verse as genuine, and the Babylonian influence as potent in the wilderness. Reuss and W. R. Smith ("Old Testament and the Jewish Church," 2d ed., p. 294) translate the two words as common nouns and find no trace of foreign worship in the verse, which they regard as genuine. This view is not so probable as the other.

G. A. B.

CHMIELNICKI, BOGDAN ZINOVI: Hetman of the Zaporogian Cossacks, born about 1595; died at Chigirin Aug. 16, 1675. Unlike many other Little-Russian pupils of the Jesuits, Chmielnicki did not embrace Roman Catholicism, but early in life became a champion of the Greek Orthodox faith, to which most of the Cossacks and the Little-Russian peasants belonged. While still in the subordinate position of a "sotski" (an officer over a hundred) of the Cossacks, subject to the Polish magnate Koniecpolski, he was deprived by Chaplinski, the bailiff of Chigirin, of his estate of Subotovo. Chaplinski availed himself of Chmielnicki's absence to make a

raid on the place, during which the young son of the owner received injuries from which he ultimately died, and Chmielnicki's (second) wife was carried off. In this raid Chaplinski was aided by the leaseholder of Chigirin, the Jew Zachariah Zabilenki. At another time, it is related, a Jew reported to the Polish government a secret treaty concluded by Chmielnicki with the Tatars. These personal indignities and injuries embittered him against the Poles and the Jews. Still, he was not without friends among the Jews themselves; for, according to Nathan Hannover, the Jew Jacob Zabilenki—possibly a relative of Zachariah—aided him to escape from prison when arrested by Koniecpolski.

It appears, therefore, that though his personal resentment influenced his decision to rid the Ukraine of the Jews, yet there is little doubt that it was his great ambition to become the ruler of the liberated Ukraine, which was the main motive that led him to instigate the uprising of the Little-Russian people against the Poles and the Jews. For years the people of Little Russia had been oppressed by the Polish landlord. Unwilling to attend to the details of administration himself, Chmielnicki made the Jew a go-between in his transactions with the peasants of Little Russia. He sold and leased certain privileges to Jews for a lump sum, and, while enjoying himself at the court, left it to the Jewish leaseholder and collector to become the embodiment of hatred to the oppressed and long-suffering peasant. The accumulated store of animosity was utilized by Chmielnicki in directing his cruel measures against the Jews. He told the people that the Poles had sold them as slaves "into the hands of the accursed Jews." With this as their battle-cry, the Cossacks let loose their wildest passions and most ruthlessly massacred about three hundred thousand Jews with such cruelties as the world had seldom witnessed (1648–1649).

For this great catastrophe the Jews might have prepared themselves had they taken warning from the uprising of the Cossacks in 1637, when about 2,000 Jewish leaseholders and tax-collectors were killed in Pereyaslav and its vicinity. This inexcusable short-sightedness may be accounted for in part by the influence of the cabalistic teachings which dominated the minds of the South-Russian Jews, and which, according to the interpretation of the Zohar by the cabalists, brought them to believe firmly in the coming of the Messiah in 1648.

It may be added that, in spite of his numerous massacres of Poles and Jews, Chmielnicki failed to secure the liberation of the Ukraine. See also COSSACKS and LITTLE RUSSIA. H. R.

CHObA or **CHObAI**: A town included among those which the Jews fortified against the attacks of Holofernes. It is mentioned in two places (Judith iv. 4; xv. 4, 5). Its connection with Jericho in Judith iv. 4 has induced Reland to look for it in the neighborhood of that city. He identifies it with Coabis. Conder ("Pal. Explor. Fund Memoirs," ii. 231) seeks to identify it with Al-Makhubbi.

G. B. L.

CHOIR: A collection of singers with trained voices who take part in divine service and who

are separated from the congregation. The first choir mentioned in the Bible is the one organized by the Levites for the Temple service, to be accompanied by musicians. The choir also sang at the offering of public sacrifices ("when the burnt offering began, the song of the Lord began," II Chron. xxix. 27) and at the wine-libation (Maimonides, "Yad," Kele ha-Mikdash, iii.). Two priests with silver trumpets gave the signal for the choir to begin (Tamid vii. 3).

The prophet Samuel and King David are said to have subdivided the Levites into twenty-four orders, each to serve a certain day (Ta'an. 27b; compare I Chron. xxv.). Some acted as doorkeepers, and others were engaged as either singers or musicians. Each one was assigned his post in the choir or orchestra, and was not permitted, under penalty, to assume the position of another.

Levitical Choir in the Temple. Hence the choristers could not be instrumentalists, nor vice versa. Five years' preparation, from the age of

twenty-five to thirty, was required of every Levite; this preparation included instruction in singing. This limitation, in vogue at the Tabernacle, was, according to the Talmud, eliminated in the Temple service, where ability to sing, and not age, was the qualification of the Levite chorister (Iul. 24a). At the dedication of Solomon's Temple the sons of the Levites accompanied the choir in singing the praise of God (II Chron. v. 13). These young Levites "sweetened" the music with their soprano voices, but were not permitted to use instruments, and were restricted from entering the priests' hall in the Temple before the adult Levites had begun to sing. They were not allowed to stand on the same platform with the latter, but had to take up a position on the ground below ('Ar. 13b). The Temple choir was composed of no less than twelve adult singers besides the young assistants.

The question whether vocal or instrumental music formed the principal service is decided in favor of the choir (Suk. 50b; Maimonides, *ib.*). Graetz infers that the twelve Levites mentioned in the Mishnah served in the dual capacity of singers and players ("Kritischer Commentar zu den Psalmen," p. 65, Breslau, 1882), which is contrary to Maimonides, who states: "The instrumentalists were not included in the number of twelve. . . . Others who stood there were playing the musical instruments" ("Yad," *ib.* iii. 3).

Women took an active part in choir-singing. At the exodus from Egypt, Miriam formed a chorus composed of women, and sounded the praise of God to the accompaniment of drums and dance-music. It is said: "God gave to Heman fourteen sons and three daughters. All these were under the hands of

their father for song in the house of the Lord" (I Chron. xxv. 5), from **Female Choristers**, which passage some writers erroneously infer that women were included

in the Temple choir. But the words "all these" refer only to the sons, and not to the daughters, as is proved by the number of choir members mentioned in the list (*ib.* 7–31; Weisel, *ad loc.*). Ezra mentions 200 singing men and singing women among those that returned from Babylon to Jeru-

salem (Ezra ii. 65); but for the Temple service only the *sons* of Asaph are counted (*ib.* iii. 10; compare Neh. vii. 67-xi. 22). The women choristers, however, were heard in dirges in honor of the dead. "All the singing men and the singing women spake of Josiah in their lamentations" (II Chron. xxxv. 25). R. Meir says those were the wives of the Levites (Pirke R. El. xvii.).

The Rabbis, after the destruction of the Second Temple, issued a decree prohibiting all instrumental or vocal music, as a sign of national mourning: "The ear that listens to music should be [barren] deaf; any house where there is song should eventually be destroyed" (Git. 7a). Later on, however, R. Hai Gaon contended that this referred only to Arabian love-songs. Maimonides

After Temple Times.

permitted the choir to sing in God's praise at the synagogue and at all religious feasts ("Yad," Ta'aniyot, v. 14; Shulhan 'Aruk, Oraḥ Hayyim, 560, 3).

R. Isiah Hurwitz (died in 1573 at Safed, Palestine) regrets the choir's custom of prolonging their singing at the end of the benedictions, thus interfering with the prompt response of "Amen" by the congregation; also their arbitrary connection and division of the words and syllables, which produce a wrong and meaningless reading. "Surely the choir of our holy Temple was sweet and pleasing both to God and to men, with due respect to precision and correct pronunciation of every letter of the words. This example we must follow" ("Shene Luhot ha-Berit," p. 253b, Amsterdam, 1698). See also "Sefer Hasidim," § 158, on the necessity for singing prayers and the praises of God.

The modern musical scale was introduced into the synagogue at Venice about 1600. Six to eight members, who became masters of music, formed a choir and sang on every holiday the "Hallel," "En Keloheinu," "Alenu," "Yigdal," and "Adon 'Olam." Some members objected to this innovation; and the question, submitted in 1605, was

decided favorably by R. Judah Aryeh Modena, who was supported by the opinion of the following rabbis: Benzion Zarfato, Leib Saraval, Baruch b. Samuel, Ezra Panu of Mantua, and Judah b. Moses of Venice ("Te'udat Shelomoh," xxiv.).

Solomon Hazzan of Metz, in his manual for cantors, admits that a cantor can not get along without choristers, "just as it is impossible for the earth to exist without wind"; but he deprecates the low character of some of the singers, and their misbehavior in frequenting drinking-places, in neglecting to pray in the synagogue daily, and in chatting during the prayers when they attend on Saturdays and holidays (*ib.* xxiii.). He admonishes the choir to be careful in singing the Sabbath "Zemirot" at home, lest it appear that they praise God for remuneration only (*ib.* xvi.).

The beginning of the nineteenth century gave birth to two extreme parties: the Neo-Hasidim in Poland and the Reformers in Germany. While diametrically opposite in their views, both agreed that singing in the house of prayer is an essential part of the service. The Hasidim, however, opposed the

church music and the special, organized choir, as they all joined in singing at prayers and sang the "Zemirot" at home. On the other hand,

the Reformers not only chose a trained choir, but, through the influence of Israel Jacobsohn at Berlin in 1817, introduced the organ to accompany them (see ORGAN); and afterward permitted even a mixed choir of men and women. This action, according to Graetz, "History of the Jews," v. 563-572, called out strong protests from the Orthodox rabbis headed by R. Moses Sofer, as being prohibited according to the Talmud: "to listen to the voice of woman is leading to lusting after her" (Ber. 24a; Shulhan 'Aruk, Oraḥ Hayyim, 75, 3). The male choir is still maintained in Orthodox synagogues. [A far more important question than that raised by the employment of female choristers, is whether non-Jewish choristers of either sex should be engaged in a Jewish synagogue; whether the most sacred parts of the service should thus be sung by persons unable to enter into the spirit of the religious community which they represent. It is greatly to be deplored that this question has never received the serious consideration on the part of modern congregations which it really deserves.—K.]

J. D. E.

CHOLERA ASIATICA (In Hebrew sometimes *חולי קר*, "the bad disease"): A specific and communicable disease, characterized by violent vomiting and purging. It prevails endemically in some parts of India, and from time to time is diffused epidemically throughout the world. The mortality is about 50 per cent of all the persons attacked. The first appearance of the disease in Europe occurred in 1817, when it broke out in Lower Bengal and thence spread over Europe, until it disappeared in 1823. Since then the disease has appeared in Europe on six different occasions; viz., in 1826, 1837, 1846, 1863, 1882, and 1892-96.

According to all the etiological factors, excepting ALCOHOLISM, of course, the Jews should suffer from cholera more frequently than, or at least as often as, other races. But careful investigation has shown that during most of the epidemics Jews

were affected to a lesser degree than non-Jews; indeed, during some epidemics they are said to have shown perfect immunity.

According to Boudin, the Jews in Algiers, notwithstanding the fact that they are overcrowded in small and dark dwellings, and often in underground cellars, enjoy better health than the inhabitants of other races. Thus during the cholera epidemic of 1844-45, the mortality per 1,000 of the population was as follows:

During the epidemic of cholera in Budapest, Hungary, in 1851, while the mortality among Christians was 1.85 per cent, that among the Jews was only 0.257 per cent, or one-seventh as great. During the epidemic of 1866 there were in every 100 deaths in the general hospital 51.76 deaths from cholera, and in the Jewish hospital 34.0 only (Tormay).

From a pamphlet published in 1868 by Dr. Scalzi, professor of medicine in the University of Rome, it appears that in every 100 attacks of cholera in 1866, the Catholics had 69.13 deaths; the inhabitants belonging to other non-Jewish cults, 42.13; the Jews, 22.0 only. In proportion to the population the mortality from cholera would have been 0.45 per cent for the Jews, and 1 per cent for others.

Dr. Mopother of Dublin ("Revue Scientifique," 1881, p. 625), in one of his lectures on public hygiene, states that there was noted a surprising immunity of the Jews in Whitechapel,

London London, during recent and former **Epidemics.** epidemics of cholera; and Mr. Wolff, surgeon to the poor of the Spanish and Portuguese synagogues in London, thus refers to the immunity of the London Jews in 1849:

"They [the Jews] do not suffer from the depression caused by habitual intoxication. These circumstances in their favor enabled them during the epidemic of 1849 to enjoy an almost complete immunity from the disease, which raged with frightful violence in the immediate neighborhood of the district where they most congregate, and the sanitary conditions of which, as regards cleanliness, ventilation, etc., were decidedly unfavorable" ("Medical Times and Gazette," London, vol. vii., 1853, p. 356).

During some epidemics, however, the Jews are stated to have suffered severely. Thus, according to Hirsch, in Algiers and in Smyrna, in 1831, the Jewish population suffered more from cholera than the rest of the population. The same was the case in 1831 with the Jews in Poland, Jassy (Rumania), and many other places (Hirsch, "Handbuch der Historisch Geograph. Pathologie," Erlangen, 1851, i. 129). From evidence collected by Boudin the mortality of the Jews during the cholera epidemic in 1831 seems to have been perceptibly higher than that of the non-Jews; but thirteen years later (as shown above) the exact opposite was the case.

During the last epidemic of cholera in Europe (1891-96), there is also evidence that in some places at least the Jews enjoyed a relative immunity from the disease. Thus in 1892 in Hamburg, Germany, according to Dr. J. J. Reincke ("Deutsche Medicinische Wochenschrift," 1893, p. 193), during the months of August and September there were buried in the general cemetery 6.4 times the average number of dead for the three previous years; in the Jewish cemetery, only 3.5 times as many. According to Dr. Georg Buschan ("Globus," lxvii. 47), there is evidence tending to show that in Berlin, Breslau, etc., the Jews suffered during the recent epidemics of cholera in Germany in a lesser degree and had a lower mortality than non-Jews.

Similar evidence is given concerning Russia. During the cholera epidemic in Nicolayev the Jews had a lower rate of morbidity and mortality than the non-Jews. In that city there were at that time about 75,000 inhabitants, of whom about 15,000 were Jews; that is, one Jew to four non-Jews. Among the latter the scourge attacked 756, of whom 382 died; among the former only 36 were attacked, and but 13 of these succumbed ("Vrach," 1893, xiv. 115).

Dr. Barazhnikov reported to the St. Petersburg Medical Society that during the epidemic of cholera in 1894 in the government of Mohilev the morbidity among the Jews was greater, and the disease, as a rule, ran a severer course, than among the non-Jews; but the percentage of mortality was smaller among the Jews. He adds that the fact must not be forgotten that the Jews in that locality, although generally poorer, are more intelligent than their neighbors, and take better care of their health ("Proceedings of the St. Petersburg Medical Society," 1895, p. 206).

As to the causes of this comparative immunity of the Jews from cholera, authorities differ. Some think that it is due to the Jews' regular habits of life, and to the fact that they are engaged mostly in occupations and professions which do not expose them to infection (Lombroso, Bordier, Lagneau, Boudin, Hirsch, etc.). But, as Buschan aptly points out, while this may hold good in epidemics of other infectious diseases, in the case of cholera the Jew should, according to present knowledge as to the propagation of the disease, be attacked more frequently. The Jewish population is engaged mostly in occupations which favor the infection of cholera. Second-hand clothing is usually bought by the Jews, and, according to Buschan, during epidemics of cholera they do an exceptionally large business of this kind.

Buschan points out that the immunity of the Jews is due to a racial characteristic of a somatic nature, which enables them to resist infection better than the Aryan races. On the other hand, those who argue that the immunity is not due to any racial characteristic, point out that the disease attacks preferably people addicted

Varying to the abuse of alcohol, who suffer (as **Opinions** a result of this) from the various forms **Respecting** of dyspepsia common among habitual **Immunity.** drinkers, and that people of temperate habits are seldom attacked. The Jews are known all over the world as an abstemious people, and their immunity is commensurate with their sobriety. The latter view seems to be borne out by facts observed by physicians practicing among the Jews.

CHOR-ASHAN (R. V. Cor-Ashan): This is, perhaps, better given, with the earlier manuscripts (Baer), as "Bor-ashan." The Septuagint also confirms the latter spelling, although one reading gives "Beersheba." Chor-ashan (I Sam. xxx. 30) or Bor-ashan is probably the place known as ASHAN.

G. B. L.

CHORIN (CHORINER), AARON: Hungarian rabbi; born at Weisskirchen, Moravia, Aug. 3, 1766; died at Arad, Hungary, Aug. 24, 1844. At the age of fourteen he studied in the yeshibah of Rabbi Jeremias in Mattersdorf, Hungary, and two years later at Prague in the higher Talmudical school of Ezekiel Landau. Here he also learned German. Chorin married Dec. 26, 1783, and entered commerce; but his business career being unsuccessful, he accepted the post of rabbi at Arad in the spring of 1789, which position he occupied till his death.

In 1798 Chorin published his first pamphlet, "Imre No'am" (Words of Pleasantness), in which he argued that as the sturgeon had scales it was permitted as food according to Scripture.

His First Work. His opinion, although following that of Ezekiel Landau and other authorities, was strongly opposed by Mordecai Benet and his partizans. Rabbi Isaac Krieshaber of Páks wrote a refutation, "Makkel No'am" (Staff of Pleasantness), which called forth a second pamphlet by Chorin, "Shiryon Kaskassim" (Coat of Mail), Prague, 1799.

By his determined opposition to the traditional usages in Hungary, Chorin incurred the hostility of most of his colleagues. In the spring of 1802 he journeyed to the Somogy district. The favorable impression which his sermons made upon his Jewish hearers there induced him to consider himself as the future rabbi of this district, and on the title-page of a pamphlet he published he assumed this title. The rich and prominent Moses Lakenbacher, president of the congregation of Gross-Kanizsa, promised Chorin his influence with his brethren of the district; but when Lakenbacher became aware of the strong opposition of the conservative party against the reformer, he soon turned against him.

At Prague in 1803 Chorin published "Emek ha-Shaweh" (Vale of the Plain), a work divided into three parts. The first and most important part, "Rosh Amanah" (Head of the Perennial Stream), in which he granted to the spiritual guides of the people authority to modify the traditional laws and adapt them to the requirements of the time, led to much opposition to him. Chorin treats of Maimonides' thirteen articles of faith, and gives evidence of knowledge rare among his Hungarian contemporaries. Next to the Halakah, Chorin also interpreted the Haggadah in a philosophical way. This method he applied in like manner to the Zohar, which he, far from all mysticism, considered as a rich source of speculative knowledge. This view referred only to the theoretic or intuitive, and not the practical, Cabala, the belief in which he considered as contradictory to sound reason. At the beginning of this book are printed the approbation of Rabbi Moses Münz and a eulogistic Hebrew poem of Rabbi

Moses Kunitz. This work gave great offense to the Orthodox party, which thwarted the publication of a second edition, for which Chorin

Opposition by the Orthodox. had prepared many corrections and additions. Mord. Benet wrote to the Arad congregation that the book contained heresies and must be burned.

The congregation, however, stood by their rabbi; but some of its members sided with Benet, and their leader, a rich man, publicly insulted Chorin while he was preaching. The Arad board now applied to Moses Münz to certify that the book contained no heresies. Having given his approbation to the author, Münz was in a great dilemma, since he was urged by the Orthodox party to condemn Chorin and to inflict upon him an exemplary punishment. He concluded to yield to the insinuations, and Sept. 1, 1805, he invited two rabbis to come to Alt-Ofen to form with him a tribunal before which Chorin was summoned. The session of the court was prolonged to the next day, but then Münz failed to appear. Samuel Butschowitz, rabbi of Assod, now pronounced sentence that "Chorin must retract the contents of his book. Should he re-

Sentence Pro-nounced. fuse to do so, his beard will be cut off as a penalty for his heretical transgressions." Thereupon Chorin, whom the populace had stoned in the courtyard

of the synagogue, declared that he subordinated his views to those of the theologians of his time, and desired that his book be suppressed. The court also decreed a reduction of Chorin's salary, but the board of his congregation indignantly rejected this decree. Chorin appealed to the imperial government, which, June 24, 1806, annulled the judgment and condemned the leader of his adversaries at Arad to pay the expenses of the lawsuit; the same was also to be punished for his scandalous conduct on Sabbath Teshubah, 1804. Chorin declared that he forgave his adversary, and declined his claims for compensation of the expenses. To avoid further trouble, he determined to give up writing.

The Reform movement among the Jews of Hamburg met his hearty approval. In "Kin'at ha-Emet" (Zeal for Truth), a paper writ-

Attitude Toward Reform. ten April 7, 1818, and published in the collection "Nogah ha-Zedek" (Light of Righteousness), he declared himself in favor of reforms, such as German

prayers, the use of the organ, and other liturgical modifications. The principal prayers, the Shema', and the eighteen benedictions, however, should be said in Hebrew, he declared, as this language keeps alive the belief in the restoration of Israel. He also pleaded for opening the temple for daily service. Influenced by Moses Münz, Chorin recalled this writing Feb. 19, 1819; but a year later he published "Dabar be-Itto" (A Word in Its Time), in which he reaffirmed the views expressed in "Kin'at ha-Emet," and pleaded strongly for the right of Reform. A German translation by Löb Herzfeld appeared at Vienna. This directed upon him the attention of the progressive party in Austria and in Germany. Michael Lazar Biedermann, a prominent man, proposed the appointment of Chorin at the new temple to be erected at Vienna; but the

government being opposed to it, Mannheimer was elected instead.

The government of the grand duchy of Baden asked Chorin (Feb. 3, 1821), through the banker S. Haber, for his opinion about the duties

Consulted of a rabbi, and about the reforms in **by Baden.** the Austrian states. Chorin answered by writing "Iggeret Elasaf," or "Let-

ter of an African Rabbi to His Colleagues in Europe," which was published by M. I. Landau, Prague, 1826. In it he stated that the Torah comprised religious truths and religious laws, the latter partly applicable only in Palestine, partly obligatory everywhere. These may be temporarily suspended, but not entirely abolished, by a competent authority, such as a synod. Only ordinances and precautionary laws which are of human origin may be abrogated in conformity with the circumstances of the time. As for mere customs and usages (*minhagim*), the government, after having consulted Jewish men of knowledge, may modify or abolish them; but in no other way may it interfere with religious affairs. Chorin also pleaded for the establishment of consistories, schools, a theological seminary, and for the promotion of agriculture and professions among the Jews. Some of these ideas he carried out in his own congregation, which included a great number of mechanics. He succeeded in founding a school, and introducing liturgical reforms into the synagogue; even an organ was installed at his instance. He permitted the eating of rice and pulse during the days of Passover.

To his theory of a synod regulating and modifying Jewish laws and customs, Chorin always adhered. In his "Treue Bote" (Prague, 1831) he declared himself against the transfer of the Sabbath to Sunday, but expressed the opinion that, considering the requirements of our time, synods might mitigate the severity of the Sabbatical laws, especially in regard to traveling and writing.

In another treatise, "Hillel," which appeared at Ofen, 1835, he interpreted the prophetic promises about the reuniting of Israel to signify the establishing of a supreme religious authority at Jerusalem. "Hillel," in the form of a dialogue, and other contributions of his pen were published in the fourth volume of "Bikkure ha-'Itim." In 1819 he wrote "Abak Sofer" (The Dust of a Writer), published by M. I. Landau, Prague, 1828, containing glosses about Yoreh De'ah, Eben ha-'Ezer, the phylacteries, an exposition of Prov. i. 10 *et seq.*, and two riddles.

In his "Yeled Zekunim" (Child of Old Age), Vienna, 1839, partly in Hebrew, partly in German, he again strongly advocated practical reforms in regard to railroad traveling on the Sabbath and on holidays, the abridgment of the seven days of mourning, the use of the organ, etc., and gave a short sketch of his life. His biographer, Leopold Löw, wrote an introduction to this work.

In consequence of the Damascus affair in 1840, Chorin republished the apology written 1753 by Sonnenfels, in which the author proves the falsity of the blood accusation. Chorin added an introduction and Löw a biographical notice.

On July 26, 1844, during the last weeks of his life,

he wrote from his sick-bed a declaration expressing his full accord with the rabbinical conference at Brunswick, and Aug. 11 he sent an address to the conference of Hungarian rabbis at Páks.

He took an active part in the efforts for Jewish emancipation, and was very influential with the state authorities. His grandson, Franz Chorin, was Hungarian deputy.

L. G. S. MAN.

CHORIN, FRANZ: Hungarian deputy; grandson of Aaron Chorin; born at Arad May 11, 1842. He studied law at Arad, Budapest, and Vienna, and began practise in his native city, where he soon became vice-president of the bar association. He was elected in 1870 as representative of the city of Arad to the Hungarian Parliament, of which he was a member continuously for twenty-one years. He is recognized as one of the leading orators and jurists of the country. The Exchange Law of 1876 is entirely his work. For many years he agitated for the modification of Hungarian criminal procedure in accordance with the more liberal English laws. His efforts culminated in success when, in 1896, he was appointed to draft and report upon this bill, which was subsequently passed by the House. In Parliament he had often the opportunity of defending his coreligionists, and contributed largely to the eradication of anti-Jewish prejudice. In 1881 he became director of the coal-mining company of Salgótarján; since then he has devoted himself to labor questions. The city of Szatmár, which he represented in the Hungarian Parliament from 1895 to 1901, elected him an honorary citizen in 1902, in recognition of his public services.

L. V.

CHORNY, JOSEPH JUDAH: Russian traveler; born at Minsk April 20, 1835; died at Odessa April 28, 1880. His parents destined him for the wine-growing industry; but after having been graduated as a viticulturalist, he, owing to an indomitable passion for travel and exploration, abandoned this career. For eight years Chorny, with practically no means, explored a great part of the Caucasus, Transcaucasia, and many Asiatic countries; studying everywhere the life, customs, and history of the inhabitants, and chiefly those of the Jews. In 1875, on returning from his travels, he endeavored to publish his studies on the Jews of the countries he had visited, but failed to find the necessary means. He resumed the life of an explorer; and after five years of hardships and privations returned, in ill health and poverty, to Odessa, where he died shortly after his arrival.

Chorny was highly appreciated by the officials of the Russian government, and his studies on the Caucasus and Transcaucasia, published in various Russian papers, attracted the attention of the minister of the interior, Loris Melikov, who recommended Chorny to the protection of the governor-general of Odessa. The most noteworthy of Chorny's

studies were: "Kratkiya Istoricheskiya Svyedeniya o Gorskikh Yevreyakh Terskoi Oblasti," Terskiya Vedomosti, 1869; "Gorskie Yevrei," in "Kavkaz," 1870, vol. iii.; "On the Caucasian Jews," in "Den," 1870, No. 38.

Chorny bequeathed his manuscripts to the Society for Promoting Culture Among the Russian Jews; and the latter commissioned A. Harkavy to edit them. They were published with Harkavy's notes under the title "Sefer ha-Massa'ot" (Book of Travels), St. Petersburg, 1884.

BIBLIOGRAPHY: *Ha-Zefrah*, 1880, p. 148; *Ha-Meliz*, 1880, p. 117; Zeitlin, *Bibl. Post-Mendels.* p. 399.

CHOSAMEUS: One of "the sons of Annas" that had "strange wives" (I Esd. ix. 32). The name can not be identified with any in the corresponding list of Ezra x. 32. It is, most probably, a combination of the last part of "Maluch" with the first part of "Shemariah," names found in the Ezra list, the remaining syllables of these names having been elided.

CHOSEN PEOPLE.—Biblical Data: Name for the Jewish people expressive of the idea of their having been chosen by God to fulfil the mission of proclaiming His truth among all the nations. This choice does not imply a superior claim, but a superior duty and responsibility on the part of the Jewish people, inasmuch as they have been pledged by the covenant which God concluded with Abraham, their ancestor, and again with the entire nation on Sinai, to testify, by precept and example, to the truth revealed to them, to lead a holy life as God's priest-people, and, if needs be, sacrifice their very lives for the sake of this truth. In this peculiar sense they are called God's own people; their religious genius, as manifested in their patriarchs, prophets, inspired poets, sages, and heroes, having rendered them the chosen people of religion to a far greater extent than the artistic and philosophical genius of the Greeks made that nation the chosen people of art and philosophy, or the juridical and political genius of the Romans made them the chosen people of law and politics.

Unlike any other nation, the Jewish people began their career conscious of their life-purpose and world-duty as the priests and teachers of a universal religious truth; and their whole history, with all its tragic sternness, was and to the end of time will be devoted to the carrying out of this purpose and the discharge of this duty. This view is expressed in all the Biblical and rabbinical passages referring to Israel as the chosen people, or to Abraham as their ancestor. "For I have singled him out [A. V., "have known him"] to the end that he may command his children and his house after him, that they may keep the way of the Lord to do justice and judgment" (Gen. xviii. 1, Hebr.; compare Neh. ix. 7, "Thou art the Lord, the God who didst choose Abram").

That Israel's character as the chosen people is conditioned by obedience to God's commandments is stated in the very words of the Sinai covenant: "Now therefore, if ye will obey my voice

indeed, and keep my covenant, then ye shall be a peculiar treasure unto me above all people: for all the earth is mine: and ye shall be unto

Conditions me a kingdom of priests, and an holy of Choice. nation" (Ex. xix. 5, 6). "The Lord did not set his love upon you, nor choose you, because ye were more in number than any people; for ye were the fewest of all people: but because the Lord loved you, and because he would keep the oath which he had sworn unto your fathers" (Deut. vii. 7, 8). The great obligation imposed upon Israel as the chosen people is especially emphasized by the prophet Amos (iii. 2): "You only have I singled out [R. V., "known"] of all the families of the earth: therefore will I visit upon you all your iniquities." Compare Deut. xiv. 2: "Thou art an holy people unto the Lord thy God, and the Lord hath chosen thee to be a peculiar people unto himself, above all peoples that are upon the face of the earth," and *ib.* xxiv. 18, 19, R. V.

Particularly is the world-mission of the chosen people dwelt upon by Deutero-Isaiah, the seer of the Exile (Isa. xli.; xlii. 1-7; xliii. 10,

God's "Ye are my witnesses, saith the **Witnesses** Lord, and my servant whom I have and Their chosen"; *ib.* verse 21, R. V., "The **Inherit-** people which I formed for myself that **ance.** they might set forth my praise"; compare xli. 1, 2; xlix. 6, 7).

As God's chosen people, Israel is also called His "inheritance" (Deut. iv. 20; ix. 26, 29; xxxii. 9; Ps. xxxiii. 12: "The people whom he hath chosen for his own inheritance"; I Kings viii. 53, Jer. x. 16; and elsewhere). As the children of the Patriarchs they are His chosen ones (Ps. cv. 6).

—**In Rabbinical Literature:** According to the Rabbis, Israel has not been chosen as the people of the Law on account of its racial superiority. "Israel is of all nations the most wilful or headstrong one [עַזְּבוּנוּת], and the Torah was to give it the right scope and power of resistance, or else the world could not have withstood its fierceness" (Bezah, 25b). "The Lord offered the Law to all nations; but all refused to accept it except Israel" (Mek. Yitro, Pes. R. K. 103b, 186a, 200a). "A Gentile who consecrates his life to the study and observance of the Law ranks as high as the high priest," says R. Meir, by deduction from Lev. xviii. 5; II Sam. vii. 19; Isa. xxvi. 2; Ps. xxxiii. 1, cxviii. 20, cxxv. 4, where all stress is laid not on Israel, but on man or the righteous one (Sifra, Aḥare Mot, 86b; Bacher, "Ag. Tan." ii. 31). Israel is likened to the olive. Just as this fruit yields its precious oil only after being much pressed and squeezed, so Israel's destiny is one of great oppression and hardship, in order that it may thereby give forth its illuminating wisdom (Ex. R. xxvi.). Poverty is the quality most befitting Israel as the chosen people (Hag. 9b). Only on account of its good works is Israel among the nations "as the lily among thorns" (Cant. R. ii. 2), or "as wheat among the chaff" (Midr. Teh. i. 4; Weber's "System der Altsynagogalen Theologie," etc., pp. 59-69, is full of glaring errors and misstatements on the subject of Israel as the chosen people).

In the Jewish liturgy, praise is frequently offered to God for having chosen Israel from among all the

nations of the earth: in AHABAH RABBAH, in the benediction before the reading from the Law, and in the seven benedictions of the holy days and New Moon; concerning

In the Liturgy. which see Geiger's "Jüd. Zeit." vii. 55; and Einhorn, in "Protocolle der

Zweiten Rabbinerversammlung," p. 75, Frankfurt-on-the-Main, 1845.

"The character of Israel as the chosen people," writes Güdemann ("Das Judentum," 1902, p. 44) "does not involve the inferiority of other nations. The universality of Israel's idea of God is sufficient proof against such an assumption. Every nation requires a certain self-consciousness for the carrying out of its mission. Israel's self-consciousness was tempered by the memory of its servitude in Egypt and the recognition of its being 'the servant of the Lord.' It was the noblesse oblige of the God-appointed worker for the entire human race."

CHOSROES (KHOSRU) II. PARWIZ

("The Conqueror"): King of Persia from 591 to 628. Chosroes, on the plea of avenging the death of his father-in-law, the Byzantine emperor Maurice (Mauritius), who had been murdered by the usurper Phocas (602), invaded Asia Minor and Syria at the head of a large army. The Jews joined the Persians in great numbers under the leadership of Benjamin of Tiberias, a man of immense wealth, by whom they were enlisted and armed. The Tiberian Jews, with those of Nazareth and the mountain cities of Galilee, marched on Jerusalem with the Persian division commanded by Shahrbaraz. Later they were joined by the Jews of southern Palestine; and supported by a band of Arabs, the united forces took Jerusalem by storm (July, 614). Ninety thousand Christians are said to have perished. The story that the Jews purchased the Christian prisoners from their Persian captors and put them to death in cold blood is a pure invention. In conjunction with the Persians, the Jews swept through Palestine, destroyed the monasteries which abounded in the country, and expelled or killed the monks. Bands of Jews from Jerusalem, Tiberias, Galilee, Damascus, and even from Cyprus, united and undertook an incursion against Tyre, having been invited by the 4,000 Jewish inhabitants of that city to surprise and massacre the Christians on Easter night. The Jewish army is said to have consisted of 20,000 men. The expedition, however, miscarried, as the Christians of Tyre learned of the impending danger, and seized the 4,000 Tyrian Jews as hostages. The Jewish invaders destroyed the churches around Tyre, an act which the Christians avenged by killing two thousand of their Jewish prisoners. The besiegers, to save the remaining prisoners, withdrew.

The immediate results of these wars filled the Jews with joy. Many Christians became Jews through fear. A Sinaitic monk embraced Judaism of his own free will, and became a vehement assailant of his former belief.

The Palestinian Jews were free from the Christian yoke for about fourteen years; and they seem to have deluded themselves with the hope that Chosroes would resign Jerusalem and a province to them, in order that they might establish a Jewish

commonwealth. Not only did Chosroes, however, do nothing to promote the establishment of a Jewish commonwealth, but, on the contrary, it is probable that he taxed the Jews oppressively.

Thus there arose great discord between the allies, which ended in the deportation of many Palestinian Jews to Persia. This treatment

Results of the Invasion. caused the Jews to go over to the Roman emperor Heraclius, who had succeeded Phocas, and who concluded a treaty (627), promising them amnesty and other advantages. Chosroes, defeated by Heraclius in a series of battles, fled from his capital, but was seized and, after a confinement of four days, executed (Feb. 28, 628).

CHOTZNER, JOSEPH: English rabbi and author; born at Cracow, Austria, May 11, 1844; educated at the Breslau rabbinical seminary and the University of Breslau. After his ordination Chotzner became the first rabbi of the congregation at Belfast, Ireland, officiating from 1870 to 1880; and he again held the rabbinate there from 1892 to 1897. In the mean time (1880-92) he had become house master and teacher of Hebrew at Harrow School, where several Jewish boys had recently entered. The experiment was made of placing all of them in a separate house under the supervision of Dr. Chotzner. After some twelve years' experience it was found more expedient to spread the Jewish boys among their comrades, and Dr. Chotzner left Harrow for Belfast. Since 1897 he has been lecturer at Montefiore College, Ramsgate.

Chotzner is the author of: (1) "Lel Shimmurim" (The Night of Observances), a collection of satirical poems on certain Hebrew superstitions, Breslau, 1864; (2) "The Songs of Mirza Schaffy," translated into Hebrew, *ib.* 1868; (3) "Modern Judaism" (1876); (4) "Humor and Irony of the Hebrew Bible," 1883; (5) "Zikronot" (Records), 1885.

His son, **Alfred James Chotzner**, was gold medalist at Cambridge University, and subsequently entered the Indian civil service.

CHOVEVEI ZION (Lovers of Zion): Associations, in Europe and the United States, of persons interested in agricultural settlement of Jews in Palestine and in the connection of Jews with the future of the Holy Land.

This movement, which was the predecessor of political Zionism (see BASEL CONGRESS), had as its sponsors a number of men living in different countries, but whose common interest in and observations of the phenomena of Jewish life, stimulated by the persecution of the Jews in Rumania prior to 1880, and more recently in Russia, led to the foundation of organizations like the Chovevei Zion Association of England, whose objects are:

1. To foster the "national idea" in Israel.
2. To promote the colonization of Palestine and

neighboring territories by Jews by establishing new colonies, or by assisting those already established.

3. To diffuse the knowledge of Hebrew as a living language.

4. To better the moral, intellectual, and material status of Israel.

5. The members of the association pledge themselves to render cheerful obedience to the laws of the lands in which they live, and as good citizens to promote their welfare as far as lies in their power.

The appeal from Palestine to Jews to settle there as agriculturists, made in 1867, went unheeded. But from 1879 on, there were active in the advocacy of colonization Dr. Lippe and Pineles in Rumania, Lili-enblum and Leon Pinsker in Russia, a non-Jewish Syrian and Palestinian Association in London, and Laurence Oliphant. The idea of agricultural settlement in Palestine, tested first by the founding of the colony of Samarin by the Rumanian Chovevei Zion, was voiced in 1881 by N. L. Lilienzblum in an article in the "Razsvyet" entitled "The Jewish Question and the Holy Land." The most serious objection to the new idea came from those who feared that resettlement in Palestine would mean the observance of the 613 commandments and the rebuilding of the Temple. Charles Netter, who subsequently became the leading exponent of the agricultural settlement idea, opposed the new movement—which had excited the enthusiastic interest of the Jews of Russia—on the ground that Palestine was unsuitable for colonization.

Baron Edmund de Rothschild having agreed to pay the expenses of six colonists to Palestine, the movement, initiated by Pinsker and supported by Rabbi Mohilewer of Byelostock, took practical shape. The Odessa Central Committee, which had been called into existence in 1881, and which was now recognized by the Russian government, went no further in the direction of active propaganda than to send Pinsker and Mohilewer upon a tour of private and public agitation throughout Europe.

However, the movement spread with the emigration from Russia. Various societies with a similar purpose were founded at Berlin (Ezra), Vienna (Kadimah), London (B'nei Zion, 1887), and America (Shove Zion in New York, Chovevei Zion in Philadelphia, 1891).

In 1890 it was recognized that some endeavor should be made to give form and coherence to these various movements, and Dr. Haffkine, with M. Meyerson, encouraged by the prospect of financial support from Baron Edmund de Rothschild, organized the Paris Central Committee. The actual leadership of the movement, however, remained with the Odessa committee, which was well supported, and which kept in close touch with those who had already settled in Palestine. The movement, however, reached its zenith in 1893, when organizations existed in every country, except France, that had an appreciable Jewish population.

In December, 1892, the movement of Jews toward Palestine was checked by the Turkish authorities, who prohibited further immigration. Additional discouragement was caused by the difficulty of finding markets for the produce of the colonies, and also by the coloring given to the idea by such men as Colo-

nel Goldsmid, who, at the head of the Chovevei Zion Association of England, with its military organizations, sought to give the movement a strong national tendency. In addition, the colonists were in constant need of support. The Hirsch Argentine Settlement followed, and affected the agitation in Western Europe. Though the colonies continued to find support, and though some new ones were founded the movement seemed, by 1894, to have spent its force.

Typical of the enthusiasm which the idea had once aroused was the mass-meeting held in London in 1892, on the advice of Sir Samuel Montagu, to petition the sultan, through Lord Rothschild and the British Foreign Office, for the right of settlement. A detailed plan was then worked out for colonization on a large and regulated scale.

The decline of the Chovevei Zion was consequent upon the suddenly created leadership, in 1896, of Dr. Theodor Herzl. Indirectly every Chovevei Zion championed, without formally adopting, his doctrine, and, indirectly, all were represented at the first Zionist congress. A more or less direct adherence to the Zionist movement, which had no sympathy for individual, sporadic colonization, was forced upon the old organizations by their members. But while they would not disavow the nationalist standpoint, they declined to become a medium of the new propaganda. A conference, the first of its kind in London, was held (March, 1898) in the Finsbury (Clerkenwell) town-hall, and lasting twelve hours; it decided upon reorganization, and accepted the leadership of the Vienna Executive Committee created by the previous congress. This was typical of the process of transition from a philanthropic to an avowed political movement, which continued until the Minsker Conference (September, 1902), when the Russian Chovevei Zion associations without exception accepted the platform of the Zionist congresses.

The literature of the movement is extensive, but scattered. A vast number of polemical pamphlets have been published, as well as brochures on colonization and propagandist literature and on the fostering of Hebrew as a living tongue, which must be included in the literary efforts of the Chovevei Zion (see ZIONISM).

J. DE H.

CHOYNSKI, JOSEPH: American heavyweight pugilist; born at San Francisco, Cal., Nov. 8, 1868. His first appearance in the prize-ring was in 1884, when he met and was defeated by J. J. Corbett in one round. He has encountered most of the prominent pugilists; and among those whom he has defeated, or with whom he has fought drawn battles, have been Dan Creedon, "Kid" McCoy, James Jeffries, T. Sharkey, and Steve O'Donnell. Choynski has fought more than fifty battles, of which he has lost but seven.

A.

F. H. V.

CHRIST (Greek, *Χριστός*): Septuagint translation of Hebrew "Mashiah" ("Messiah" = The Anointed).

applied by Christians exclusively to Jesus as the Messiah (see JESUS OF NAZARETH and MESSIAH).

J. K.

CHRISTIAN: A word denoting a follower of Jesus as the Messiah or Christ. It originated, according to Acts xi. 26, in Antioch, the Syrian capital, where, shortly after the failure of the Hellenistic movement in Jerusalem (*ib.* viii. 1, xi. 19), the doctrine of the risen Christ was propagated among the non-Jewish population, and where the first important church of the Christians was established by Barnabas and Paul about the year 44. This early origin of the name has been questioned by F. C. Baar ("Paulus, der Apostel Jesu Christi," i. 103), Lipsius ("Ueber den Ursprung des Christennamens," 1873), Hausrath ("Neutestamentliche Zeitgeschichte," ii. 392), and Weizsäcker ("Apostolisches Zeitalter," p. 90), but is upheld by Keim ("Aus dem Urchristenthum," pp. 171-181). Josephus, in the well-known passage concerning Jesus ("Ant." xviii. 3, § 3; not all of which is spurious), speaks of the "tribe of Christians" as still existing.

It is certain that except in Acts xi. 26, xxvi. 28, and I Peter iv. 16—passages referring to the persecution of Christians in Rome—the name occurs nowhere in the New Testament or in the early Christian literature. In all probability it owes its origin to a Roman or Latin-speaking population. The fact that the early Christians met for worship in the name of Christ and called themselves those "of Christ" (I Cor. i. 12) induced the pagans to regard them as the partizan followers of a leader of that name. Hence they coined the name "Christiani" for them, as a nickname after the example of "Cæsarians" or "Pompeians." Unfamiliar with the name "Christus," the pagans pronounced the name also "Chrestos" (Χρηστός), and spoke of the Christians as "Chrestiani" (Tertullian, "Apologia," p. 3; Justin, "Apologia," i. 4; compare Suetonius, "Claudius," p. 25: "Judæos impulsore Chresto assidue tumultuantes Roma expulit"; Grätz, "Gesch." iii. 3, 449, is wrong in taking Chrestos for a special agitator in Rome).

The name came into general use among the Christians themselves during the second century, when it became endeared to them all the more because it entailed persecution and martyrdom (I Peter iv. 16; Luke iv. 22; Tacitus, "Hist." xv. 44; Suetonius, "Nero," p. 16; Pliny, "Epistles," x. 96; Ignatius, "Epistles to the Magnesians," p. 4; and elsewhere). They continued, however, to call one another also "the brethren" (Acts ix. 30, xi. 1; Rom. xvi. 14; Gal. i. 2), "the saints" (Acts ix. 13, 32; xxvi. 10; Rom. xii. 13, xvi. 15; Heb. vi. 10), "believers" or "faithful ones" (Acts x. 45; I Tim. iv. 3), "the elect" (Matt. xxiv. 22, 24; Mark xiii. 20-22; I Peter i. 1, 2), and in the earlier time also "the disciples" (Acts ix. 26, xiii. 52, xx. 30).

To the Jews, to whom the reported appearance of the Messiah was a matter of frequent occurrence in those times, when the good tidings of redemption from the domination of Rome were constantly expected (Josephus, "Ant." xvii. 10, §§ 6, 7; xviii. 4, § 1; xx. 5, § 1), the word "Christian" had no specific meaning; and when the followers of Jesus of Nazareth began to teach a "way" different from that of

the mother-synagogue (Acts ix. 2; xviii. 25; xix. 9, 23; xxii. 4; xxiv. 14, 22), they received the name of "the sect of the Nazarenes" (Acts xxiv. 5, xxviii. 22; in Hebrew, "Nozerim").

K.

CHRISTIAN, GUSTAV CHRISTOPHER:

German author and Christian missionary; born of Jewish parents; baptized in 1719; died at Nuremberg about 1735. He was the author of two Judaic German works: "Yesod Emunat Yeshu'a" (The Basis of the Faith of Jesus), Berlin, 1712; and "Die Bekehrung Israels," Schwabach, 1722.

CHRISTIANI, FRIEDRICH ALBRECHT:

Jewish convert to Christianity; born in the middle of the seventeenth century; died at Prossnitz at the beginning of the eighteenth. He was baptized in 1674 at Strasburg, having formerly borne the name of Baruch as hazzan at Bruchsal. After having occupied for twenty years the chair of Semitic studies at the University of Leipsic, he retired to Prossnitz, where he returned to Judaism.

Christiani's works comprise the following, all published at Leipsic: (1) "Zebah Pesah" (The Sacrifice of Easter), 1677, an account of the Jewish celebration of Easter in the time of Jesus and at the present; (2) "Se'udat Purim" (The Meal of Purim), 1677, a description of Jewish fasting and feasting; (3) "Zahakan Melummad u-Mitharet" (The Scholarly Gambler Repenting), 1683, a German translation of the work of Leon of Modena on gambling; (4) Abrahavanel's commentary on the first Prophets, with a Latin index, 1686; (5) the text of Jonah with Targum, Masorah, and the commentaries of Rashi, Ibn Ezra, Kimhi, and Abrahavanel, and a Hebrew-Latin vocabulary, 1683; (6) "Iggeret" (Letter), 1676, the epistle of St. Paul to the Jews, translated from the Greek into Hebrew; (7) "Traktat von dem Glauben und Unglauben der Juden," 1713.

CHRISTIANI, MORITZ WILHELM:

Author and Jewish convert to Christianity; born at Altorf at the end of the seventeenth century; died at Prague about 1740; probably a member of the Keyser family of Schleusingen (Bavaria). He claimed to have been a rabbi at Schleusingen before his baptism in 1715.

Christiani wrote: (1) "Kurze Beschreibung einer Jüdischen Synagoge und eine Beschreibung der Synagogalen Gebräuche" (Regensburg, 1723); (2) "Die Schlacht- und Visitir-Kunst" (*ib.* 1724); (3) "Ausgang von dem Verstockten Judenthum und Eingang zum Wahren Christenthum," an account of his conversion, his profession of faith, and several orations (Erfurt, 1720); (4) "Rede zur Einladung für Rabbinische Studien," written in Hebrew and German, inserted in Johann David Köhler's "Program" (Altorf, 1715); (5) a German translation of the

"Sefer ha-Minhagim" of Jacob Levi (MaHaRIL), published at Bremen in 1738.

CHRISTIANI, PABLO: Jewish convert of Montpellier, France; contemporary of NAHMANIDES. After having been baptized, Christiani joined the Order of the Dominicans and attempted to convert his former coreligionists. Failing to make proselytes among the Jews of Provence, to whom he had been sent by his zealous general, Raymond de Penyaforte, Christiani planned the conversion by force of the Aragonian Jews. To this purpose he persuaded Raymond de Penyaforte to bring about a religious controversy between him and Nahmanides, in which he felt assured of victory. Raymond de Penyaforte secured the consent of King James; and Nahmanides was summoned to Barcelona, in 1263, to answer Christiani's questions.

The disputation took place in the king's palace, in the presence of the whole court and many ecclesiastical dignitaries, and lasted four days (July 20-24). As suggested by Nahmanides, the subjects of discussion were three: (1) whether the Messiah had appeared; (2) whether the Messiah announced by the Prophets was to be considered as a god, or as a man born of human parents; and (3) whether the Jews or the Christians were in possession of the true faith. Christiani undertook to demonstrate from the Talmud itself the truth of the Christian faith, and feigned indignation at Nahmanides when he declared that he did not believe in those and other Haggadic stories. Christiani hoped to profit by the reserve he felt Nahmanides would be forced to maintain through fear of wounding the feelings of the Christian dignitaries who were present.

He was, however, deceived. Nahmanides moderately but firmly refuted all the arguments of Christiani. As the disputation turned

Nah- in favor of Nahmanides the Jews of
manides Barcelona, fearing the resentment of
Victorious. the Dominicans, entreated him to discontinue; but the king, whom Nahmanides acquainted with the apprehensions of the Jews, desired him to proceed. The controversy was therefore resumed, and concluded in a complete victory for Nahmanides, who was dismissed by the king with a gift of three hundred maravedis as a mark of his respect.

The Dominicans, nevertheless, claimed the victory, and Nahmanides felt obliged to publish the proceedings of the controversy. Obtaining a copy of this publication, Christiani selected from it certain passages which he construed as blasphemies against the Christian religion, and denounced them as such to Raymond de Penyaforte. A capital charge was then instituted, and a formal complaint against the work and its author was lodged with the king. Finally, Nahmanides was sentenced to exile for two years, and his pamphlet was ordered to be burned.

The failure of the controversy did not, however, discourage Christiani. Provided through the agency of Raymond de Penyaforte with letters of protec-

IV.—4

tion from King James, he went on missionary journeys, compelling the Jews everywhere to listen to his speeches and to answer his ques-

Christiani's tions, either in their synagogues or
Prosely- wherever else he pleased. They were
tizing even required to defray the expenses
Tour. of his mission. In spite of the protec-

tion granted him by the king, Christiani did not meet with the success he had expected; he therefore went to Pope Clement IV. and denounced the Talmud, asserting that it contained passages derogatory to Jesus and Mary. The pope issued a bull (1264) to the Bishop of Tarragona, commanding him to submit all the copies of the Talmud to the examination of the Dominicans and Franciscans. A commission was then appointed by the king, Christiani being one of its members, to act as censors of the Talmud; and they obliterated all passages which seemed to them to be hostile to Christianity. In 1269 Christiani interceded with King Louis IX. of France and obtained from him the enforcement of the canonical edict requiring Jews to wear badges.

CHRISTIANITY IN ITS RELATION TO JUDAISM:

Christianity is the system of religious truth based upon the belief that Jesus of Nazareth was the expected Messiah, or Christ, and that in him all the hopes and prophecies of Israel concerning the future have been fulfilled. While comprising creeds which differ widely from one another in doctrine and in practise, Christianity as a whole rests upon the belief in the God of Israel and in the Hebrew Scriptures as the word of God; but it claims that these Scriptures, which it calls the Old Testament, receive their true meaning and interpretation from the New Testament, taken to be the written testimonies of the Apostles that Jesus appeared as the end and fulfilment of all Hebrew prophecy. It furthermore claims that Jesus, its Christ, was and is a son of God in a higher and an essentially different sense than any other human being, sharing in His divine nature, a cosmic principle destined to counteract the principle of evil embodied in Satan; that, therefore, the death of the crucified Christ was designed by God to be the means of atonement for the sin inherited by the human race through the fall of Adam, the first man; and, consequently, that without belief in Jesus, in whom the Old Testament sacrifice is typified, there is no salvation. Finally, Christianity, as a world-power, claims that it represents the highest form of civilization, inasmuch as, having made its appearance when the nations of antiquity had run their course and mankind longed for a higher and deeper religious life, it regenerated the human race while uniting Hebrew and Greek to become the heir to both; and because it has since become the ruling power of history, influencing the life of all nations and races to such an extent that all other creeds and systems of thought must recede and pale before it.

These three claims of Christianity, which have frequently been asserted in such a manner as di-

rectly or implicitly to deny to Judaism, its mother religion, the purpose, if not the very right of its continued existence, will be examined from a historical point of view under three heads: (1) the New Testament claim as to the Christship of Jesus; (2) the Church's claim as to the dogmatic truths of Christianity, whether Trinitarian or Unitarian; and (3) the claim of Christianity to be the great power of civilization. The attitude taken by Jews toward Christianity in public debates and in literary controversies will be treated under **POLEMICS AND POLEMICAL LITERATURE**; while the New Testament as literature and the personality of Jesus of Nazareth will also be discussed in separate articles.

I. It is a matter of extreme significance that the Talmudic literature, which is based on tradition at least a century older than Christianity, has not even a specific name for the Christian belief or doctrine,

but mentions it only occasionally under the general category of "Minim." **The Messianic Movement.** (literally, "distinctive species of belief"), heresies, or Gnostic sects. As one of these it could only be regarded in the second century, when Christianity was in danger of being entirely absorbed by Gnosticism. At first it was viewed by the Jews simply as one of the numerous Messianic movements which, aimed against Roman rule, ended tragically for their instigators, and from which it differed only in one singular fact; viz., that the death of the leader, far from crushing the movement, gave, on the contrary, rise to a new faith which gradually, both in principle and in attitude, antagonized as none other the parent faith, and came to manifest the greatest hostility to it. There is no indication in Jewish literature that the appearance of Jesus, either as a teacher or as a social or political leader, made at the time a deep or lasting impression on the Jewish people in general. Outside of Galilee he was scarcely known. This at least seems to be the only explanation of the fact that the Talmudic passages, some of which are old, confound Jesus, on the one hand, with Ben Stada, who was tried in Lydda—probably identical with Theudas "the magician," the pseudo-Messiah who appeared in 44 (Josephus, "Ant." xx. 5, § 1; Acts v. 36)—and, on the other, with the Egyptian "false prophet" who created a Messianic revolt a few years later ("Ant." xx. 8, § 6; *idem*, "B. J." ii. 13, § 5; Acts xxi. 38; see Tosef., Sanh. x. 11; Sanh. 67a, 107b; Shab. 104b; Soṭah 47a; compare Matt. xxiv. 11 and 24). As to Jesus ben Pandera, or Jesus the pupil of R. Joshua ben Peraḥyah, see **JESUS IN JEWISH LEGEND**.

The only reference to Jesus in contemporary Jewish literature is found in Josephus, "Antiquities" xviii. 3, § 3, a passage which has been interpolated by Christian copyists, but appears to have originally contained the following words (see Theodore Reinach, in "Rev. Etudes Juives," xxxv. 1-18; A. v. Gutschmid, "Kleine Schriften," 1893, iv. 352): "There was about that time [a certain] Jesus, a wise man; for he was a worker of miracles, a teacher of men eager to receive [new (revolutionary) tidings], and he drew over to him many Jews and also many of the Hellenic world. He was [proclaimed] Christ; and when, on denunciation by the

principal men amongst us, Pilate condemned him to be crucified, those that were first [captivated] by him did not cease to adhere to him; and the tribe of Christians, so named after him, is not extinct at this day."

The Gospel records agree upon one essential point confirmed by Josephus (*l.c.* 5, § 2; compare Matt. iii. 1-13; Mark i. 2-9; Luke iii. 1-21; John iii. 23 *et seq.*; Acts xiii. 24); viz., that the main impulse to the Christian movement was given by JOHN the BAPTIST, an Essene saint, who—among the many

that, by penitence, fasting, and baptisms, prepared themselves for the coming of the Messiah (Luke ii. 26, 27 *et seq.*; Mark xv. 43; compare *ib.* ii. 18; Matt. ix. 14, xi. 18; compare Pesik R. xxxiii., xxxiv., Josephus, "Vita," § 2)—stood forth as the preacher of repentance and "good tidings," causing the people to flock to the Jordan to wash themselves clean of their sins in expectation of the Messianic kingdom. Some of his followers were known afterward as a class of Baptists under the name "Disciples of John" (Acts viii. 25; xix. 3, 4), and seem partly to have joined the Mandæans (Brandt, "Die Mandäische Religion," pp. 137 *et seq.*, 218 *et seq.*, 228; see also **HEMEROBAPTISTS**). Jesus, however, being one of John's disciples, the moment the latter had been put in prison stepped to the front as a preacher of the "Kingdom of Heaven" in the very language of his master (Matt. iv. 12 *et seq.*, xiv. 3-5; Mark i. 14). Still, to the very last he had to admit in his argument with the elders (Matt. xx. 26; Mark xi. 32; compare *ib.* viii. 28) that John was universally acknowledged prophet, while he was not. Indeed, Herod Antipas, upon learning of Jesus' miraculous performances, expressed the belief that John the Baptist had risen from the dead (Matt. xiv. 2, xvi. 14; Mark vi. 14). Nor did Jesus himself, according to the older records, lay claim to any title other than that of a prophet or worker by the Holy Spirit, like any other Essene saint (Matt. xiii. 57; xxi. 11, 46; Luke vii. 16, 39; xiii. 33; xxiv. 19; John iv. 19, 44; compare Josephus, "B. J." i. 3, § 5; ii. 8, § 12; *idem*, "Ant." xiii. 10, § 7; Luke ii. 25, 36). Gradually, however, the fame of Jesus as "healer" and "helper" of those stricken with disease so eclipsed that of John, at least in Galilean circles, that the latter was declared to have been only the forerunner of the one destined to subdue the whole kingdom of Satan—that is, the Elijah of the Messianic kingdom—and a declaration to this effect was finally put into the mouth of John as though made by him at the very start (Mark i. 2, ix. 13, xi. 2-19; Luke i. 17).

Jesus, as a man of the people, deviated from the practise of the Essenes and Pharisees in not shunning contact with the sinners, the PUBLICANS and the despised 'AM HA-AREZ, as contaminating, and in endeavoring to elevate them; following the maxim, "They that are whole

Man of the need not a physician, but they that are sick" (Matt. ix. 12, and parallels).

People. compare Antisthenes, in Diogenes Laertius, vi. 6). He felt the calling to preach the gospel to the poor (Luke iv. 16 *et seq.*, after Is. lxi. 1 *et seq.*), and truly became the redeemer of the lower classes, who were not slow to lift him to the

station of the Messiah. Still, he apparently made no such claim before his entrance into Jerusalem, as is evidenced by the warning given to the disciples and to the spirits of the possessed not to disclose the secret of his being the Son of David (Matt. xii. 16, xvi. 20; Mark i. 24, iii. 12, viii. 30; Luke iv. 41). His reference to himself as the "Son of man," after the manner of Dan. vii. 13, and Enoch, xlv. 2 *et seq.*, the manner of Mark x. 33, has no historical value; whereas in Mark ii. 28 and Matt. viii. 20 "Son of man" stands for "man" or "myself." While the eschatological predictions in Matt. xxiv., xxv.; Luke xvii. 22 *et seq.*, and elsewhere have been taken over literally from Jewish apocalypses and put into the mouth of Jesus, the teachings and doings of Jesus betray, on closer analysis, rather an intense longing after the Messianic time than joy and satisfaction over its arrival. And as the so-called "Lord's Prayer"—an exquisite compilation of Hasidic prayer formulas (Luke xi. 1-13; Matt. vi. 9-13; see Charles Taylor, "Sayings of the Jewish Fathers," 1901, p. 176)—is, like the Kaddish, a petition rather than a thanksgiving for the Messianic kingdom, so is the entire code of ethics laid down by Jesus for his disciples in the Sermon on the Mount (Matt. v.-vii., x.; Luke vi. 20, xi.-xii., and elsewhere) not a law of conduct for a world rejoicing in a redeemer that has come, but a guide for a few of the elect and saintly ones who wait for the immediate downfall of this world and the rise of another (Matt. x. 23, xix. 28, xxiv. 34-37). Only later events caused the allusion to the "Son of man" in these sayings to be referred to Jesus. As a matter of fact, a spirit of great anxiety and unrest permeates the sayings of Jesus and the entire New Testament epoch, as is indicated by such utterances as "Watch, therefore; for ye know not what hour your Lord doth come" (Matt. xxiv. 42, xxv. 13); "The kingdom of God cometh not with observation [that is, calculation], but suddenly, imperceptibly it is among you" (Luke xvii. 20, 21); compare the rabbinical saying: "The Messiah cometh *בהיכח הרעת* [when least expected], like a thief in the night" (Sanh. 97a, b). See, further, Matt. xxiv. 43; I Thess. v. 2; II Peter iii. 10; Rev. iii. 3. A number of sayings allude to the sword, to contention, and to violence, which do not altogether harmonize with the gentle and submissive character assigned generally to Jesus. Such are the following: "Think not that I came to send peace on the earth: I came not to send peace, but a sword" (Matt. x. 34, R. V.); "Suppose ye that I am come to give peace on earth? I tell you, Nay; but rather division. . . . The father shall be divided against the son, and the son against the father," etc. (Luke xii. 51-53); "From the days of John the Baptist until now the kingdom of heaven suffereth violence, and the violent take it by force" (Matt. xi. 12)—words hardly reconcilable with the concluding sentences of the chapter: "Come unto me, all ye that labor and are heavy laden. . . . Take my yoke upon you . . . and ye shall find rest" (Lc. xi. 28-30). The advice given by Jesus to his disciples to provide themselves each with a sword (Luke xxii. 36; compare *ib.* verse 49; John xix. 10, though disavowed in Matt. xxvi. 52, 53); the allusion by Simeon the saint to the sword and to the strife as re-

sulting from Jesus' birth (Luke ii. 34, 35); and the disappointment voiced by Cleopas, "We trusted that it had been he which should have redeemed Israel" (Luke xxiv. 21; compare Matt. i. 21, where Jesus is explained as *יהושע*, Joshua, who shall "save his people from sin")—all these point to some action which gave cause for his being handed over to Pontius Pilate as one who was "perverting the nation, and forbidding to give tribute to Cæsar" (Luke xxiii. 2); though the charge was refuted by the saying, "Render unto Cæsar the things that are Cæsar's" (Matt. xxii. 21; Mark xii. 17; Luke xx. 25, R. V.). He was tried and crucified as "King of the Jews" or "Messiah"; and all the alleged charges of blasphemy, in that he called himself "Son of God" in the Messianic sense, or announced the destruction of the Temple, prove, in the light of the ancient Jewish law, to be later inventions (Matt. xxvi. 63-65; Mark xiv. 58; Luke xxii. 70). See CRUCIFIXION OF JESUS.

That the movement did not end with the crucifixion, but gave birth to that belief in the risen Christ which brought the scattered adherents together and founded Christianity, is due to two psychic forces that never before had come so strongly into play:

(1) the great personality of Jesus, which had so impressed itself upon the simple people of Galilee as to become a living power to them even after his death; and (2) the transcendentalism, or other-worldliness, in which those penance doing, saintly men and women of the common classes, in their longing for godliness, lived. In entranced visions they beheld their crucified Messiah expounding the Scriptures for them, or breaking the bread for them at their love-feasts, or even assisting them when they were out on the lake fishing (Luke xxiv. 15, 30, 31, 36; John xx. 19, xxi.). In an atmosphere of such perfect naïveté the miracle of the Resurrection seemed as natural as had been the miracle of the healing of the sick. Memory and vision combined to weave the stories of Jesus walking on the water (compare Matt. xiv. 25, Mark vi. 49, and John vi. 19 with John xxi. 1-14), of the transfiguration on the Mount (compare Matt. xvii. 1-13, Mark ix. 2-13, and Luke ix. 29-36 with Matt. xxviii. 16 *et seq.*), and of his moving through the air to be near the divine throne, served by the angels and the holy (not "wild") beasts ("hayyot"), and holding Scriptural combats with Satan (Mark i. 12, 13; Matt. iv. 1-11; compare with Acts vii. 15, vii. 55). The Messiahship of Jesus having once become an axiomatic truth to the "believers," as they called themselves, his whole life was reconstructed and woven together out of Messianic passages of the Scriptures. In him all the Testament prophecies had "to be fulfilled" (Matt. i. 22; ii. 5, 15, 17; iii. 3; iv. 14; viii. 17; xii. 17; xiii. 14, 35; xx. 14; xxvi. 56; xxvii. 19; John xii. 38; xiii. 18; xv. 25; xvii. 12; xviii. 9; xix. 24, 36). Thus, according to the Jewish view, shared by many Christian theologians, there grew up, through a sort of Messianic Midrash, the myths of Jesus' birth from a virgin (after Isa. vii. 14), in Bethlehem, the city of David (after Micah v. 1 *et seq.*; there was a town of Bethlehem also in Galilee, which Grätz identifies with Nazareth; see "Monatsschrift," xxix. 481); the genealogies in Luke iii. 23-38 and

in Matt. i. 1-17, with the singular stress laid upon Tamar, Rahab, and Ruth, the converted sinners and heathens, as mothers of the elect one (compare Gen. R. ii.; Hor. 10b; Nazir 23b; Meg. 14b); likewise the story of Jesus' triumphal entry into Jerusalem riding upon a young ass (after Zech. ix. 9), and of his being hailed by the people's "Hosanna" (after Ps. cxviii. 26; compare Midr. Teh. to the passage; also Matt. xxi. 1-11, and parallels).

Similarly, his healing powers were made proofs of his Messiahship (after Isa. xxxv. 5, 6; compare Gen. R. xcv. and Midr. Teh. cxlviii.), also his death on the cross was taken, with reference to Isa. liii. and old Essene tradition of the suffering Messiah (Pesik. R. xxxiv.-xxxvii.), to be the atoning sacrifice of the Lamb of God slain for man's sin (John i. 29; Acts viii. 32; Rev. xiii. 8; compare Enoch xc. 8), and his resurrection the beginning of a new life (after Zech. xiv. 5; I Chron. iii. 24; Sibyllines, ii. 242; Matt. xxiv. 30; I Thess. iv. 16). Men held their love-feasts in his memory—turned into paschal feasts of the new covenant (Matt. xxvi. 28, and parallels; John xix. 33 *et seq.*)—and led lives of voluntary poverty and of partial celibacy (Acts ii. 44; Matt. xix. 12).

Out of these elements arose the life-picture of Jesus, shaped after later events and to a great extent reflecting the hostile sentiments entertained against the Jewish people by the new sect when, in the final struggle with Rome, the latter no longer shared the views and destinies of the former. Many antinomistic views put into the mouth of Jesus have their origin in Pauline—i.e., anti-Judean—circles. Thus the saying, "Not that which goeth into the mouth defileth a man; but that which cometh out of the mouth, this defileth a man" (Matt. xv. 11, and parallels), is irreconcilable with Peter's action and vision in Acts xi. 1-10. What Jesus actually said and did is difficult to determine. Many of his teachings can be traced to rabbinical sayings

Jesus' current in the Pharisaic schools; and Teachings. many sentences, if not entire chapters, have been taken over from Essene writings (see DIDASCALIA; ESSENES; GOLDEN RULE; JESUS OF NAZARETH; MATTHEW).

On the other hand, there are utterances of striking originality and wondrous power which denote great genius. He certainly had a message to bring to the forlorn, to "the lost sheep of the house of Israel" (Matt. x. 6, xv. 24), to the outcast, to the lower classes, to the "am ha-arez," to the sinners, and to the publicans. And whether the whole life-picture is reality or poetic imagination, in him the Essene ideal reached its culmination. But it is not correct to speak, as Christian theologians do, of a possible recognition or an actual rejection of Jesus' Christship by the Jews. Whatever his greatness as teacher or as friend of the people, this could not establish his claim to the Messianic title; and whether his Galilean followers were justified in according it to him, or the authorities at Jerusalem in denying it and in denouncing him to the Roman prefect—probably more from fear than from spite (John xix. 15)—is not a matter that can be decided from the scanty records (compare Matt. xxvi. 5; Luke xiii. 31; xix. 47, 48; xx. 19; xxiii. 43 with Matt. xxvii. 25-28; Mark xv.

14; Luke xxiii. 23 (see CRUCIFIXION). The vehement language of Jesus, in denouncing Sadducean misanthropy and the hypocrisy and narrowness of the Pharisaic leaders, was not altogether new and unheard of; it was the privilege of the Essene preachers, the popular Haggadists (see PHARISEES and SADDUCEES). Most of his teachings, a great number of which echo rabbinical sayings, and have been misunderstood or misapplied altogether by the late Gospel compilers (see GOSPELS, THE FOUR), were addressed to a circle of men who lived in a world of their own, far away from the centers of commerce and industry. His attitude toward Judaism is defined by the words "Think not that I am come to destroy the law or the prophets: I am not come to destroy, but to fulfill" (Matt. v. 17). The rejection of the Law by Christianity, therefore, was a departure from Jesus Christ, all the New Testament statements to the contrary notwithstanding. He himself declined even the title of "good master," because he wanted to reserve this epithet for God alone (Matt. xix. 17). Christianity, contrary to all his teaching, turned him into a God.

II. This radical change was brought about by SAUL OF TARSUS or Paul, the real founder of the Christian Church, though Peter formed the first community of the risen Christ (Matt. xvi. 16; Acts i. 15; I Cor. xv. 5). Having, under the influence of a vision, turned from an earnest persecutor of the new sect into its vigorous champion (Acts ix. 1-14, xxii. 3-16, xxvi. 9-18; I Cor. ix. 1, xv. 8 *et seq.*; Gal. i. 16), he construed the belief in the atoning death of Christ held by the rest into a system

altogether antagonistic to Judaism and its Law, claiming to have received the apostleship to the heathen world from the Christ he beheld in his visions. Operating with certain Gnostic ideas which rendered the Messiah as Son of God a cosmic power, like Philo's "logos," aiding in the world's creation and mediating between God and man, he saw both in the Crucifixion and in the Incarnation acts of divine self-humiliation suffered for the sake of redeeming a world polluted and doomed by sin since the fall of Adam. Faith alone in Christ should save man, baptism being the seal of the belief in God's redeeming love. It meant dying with Christ to that which is inherited from Adam, and rising again with Christ to put on the new Adam (Rom. vi. 1-4; I Cor. xv.; Gal. iii.-iv.). See BAPTISM.

On the other hand, Paul taught, the law of Moses the seal of which was CIRCUMCISION, failed to redeem man, because it made sin unavoidable. By a course of reasoning he discarded the Law as being under the curse (Gal. iii. 10 *et seq.*), declaring only those who believed in Christ as the Son of God to be free from all bondage (Gal. iv.). In opposition to those who distinguished between full Proselytes and "proselytes of the gate," who only accepted the Noachidian laws (Acts xv. 20), he abrogated the whole Law; claiming God to be the god of the heathen as well as of the Jews (Rom. iii. 31). Yet in enunciating this seemingly liberal doctrine he deprived faith, as typified by Abraham (Gen. xv. 6; Rom. iv. 3), of its naturalness, and forged the

shackles of the Christian dogma, with its terrors of damnation and hell for the unbeliever. God, as Father and the just Ruler, was pushed into the background; and the Christ—who in the Gospels as well as in the Jewish apocalyptic literature figured as judge of the souls under God's sovereignty (Matt. xvi. 27, xxv. 31-33; compare Enoch, iv. xiv. *et seq.*; II Esd. vii. 33 with Rom. xiv. 10; II Cor. v. 10)—was rendered the central figure, because he, as head and glory of the divine kingdom, has, like Bel of Babylonian mythology fighting with the dragon, to combat Satan and his kingdom of evil, sin, and death. While thus opening wide the door to admit the pagan world, Paul caused the influx of the entire pagan mythology in the guise of Gnostic and anti-Gnostic names and formulas. No wonder if he was frequently assailed and beaten by the officials of the synagogue: he used this very synagogue, which during many centuries had been made the center of Jewish propaganda also among the heathen for the pure monotheistic faith of Abraham and the law of Moses, as the starting-point of his antinomistic and anti-Judean agitations (Acts xiii. 14, xiv. 1, xvii. 1 *et seq.*, xxi. 27).

For a long time Christianity regarded itself as part of Judaism. It had its center in Jerusalem (Irenæus, "Adversus Hæreses, i. 26"); its first

Early Christi- anity a Jewish Sect.

fifteen bishops were circumcised Jews, they observed the Law and were rather unfriendly to heathenism (Sulpicius Severus, "Historia Sacra," ii. 31; Eusebius, "Hist. Eccl." iv. 5; compare Matt. xv. 26), while they held friendly intercourse with the leaders of the synagogue (see Grätz, "Gesch. der Juden," iv. 373 *et seq.*; and EBIONITES, MINIM, and NAZARENES). Many a halakic and haggadic discussion is recorded in the Talmud as having taken place between the Christians and the Rabbis (see JACOB THE Gnostic). Probably the Christian Congregation, or Church of the Saints, did not distinguish itself in outward form from the "Kehala Kaddisha" at Jerusalem, under which name the Essene community survived the downfall of the Temple (Ber. 9b; compare Eccl. R. ix. 9: 'Edah Kadoshah). Of course, the destruction of the Temple and of the Judean state and the cessation of sacrifice could not but promote the cause of Christianity (see Justin, "Dial. cum Tryph." xi.); and under the impression of these important events the Gospels were written and accordingly colored. Still, Jew and Christian looked in common for the erection of the kingdom of heaven by the Messiah either soon to appear or to reappear (see Joël, "Blicke in die Religionsgesch." i. 32 *et seq.*). It was during the last struggle with Rome in the days of Bar Kokba and Akiba that, amidst denunciations on the part of the Christians and execrations on the part of the Jewish leaders, those hostilities began which separated Church and Synagogue forever, and made the former an ally of the arch-enemy. Pauline Christianity greatly aided in the Romanizing of the Church. It gravitated toward Rome as toward the great world-empire, and soon the Church became in the eyes of the Jew heir to Edom (Gen. xxvii. 40). The emperor Constantine completed what Paul had begun—a world hostile to the faith in which

Jesus had lived and died. The Council of Nice in 325 determined that Church and Synagogue should have nothing in common, and that whatever smacked of the unity of God and of the freedom of man, or offered a Jewish aspect of worship, must be eliminated from Catholic Christendom.

Three causes seem to have been at work in making the Pauline system dominant in the Church. First, the pagan world, particularly its lower classes, having lost faith in its old gods, yearned for a redeemer, a man-like god, and, on the other hand, was captivated by that work of redeeming love which the Christian communities practised, in the name of Jesus, in pursuance of the ancient Essene ideals (see CHARITY). Secondly, the blending of Jewish, Oriental, and Hellenic thought created those strange mystic or Gnostic systems which fascinated and bewildered the minds of the more educated classes, and seemed to lend a deeper meaning to the old beliefs and superstitions. Thirdly, woman appeared on the scene as a new factor of Church life. While the women of Syria and of Rome were on the whole attracted by the brightness and purity of Jewish home life, women in the New Testament, and most of all in Paul's life and letters, are prominent in other directions. Aside from those visions of Mary Magdalene which lent support to the belief in the Resurrection (Matt. xxviii. 1, and parallels), there was an undisguised tendency on the part of some women of these

circles, such as Salome; Thecla, the friend of Paul; and others (see "Gospel of the Egyptians," in Clement, "Stromata," iii. 964; Conybeare, "Apology and Acts of Apollonius and Other Monuments of Early Christianity," pp. 24, 183, 284), to free themselves from the

trammels of those principles upon which the sanctity of home rested (see Eccl. R. vii. 26). A morbid emotionalism, prizing love as "the greatest of all things" in place of truth and justice, and a pagan view of holiness which tended to make life oscillate between austere asceticism (demanding virginity and eunuchism) on the one side, and licentiousness on the other (see Matt. xix. 12; Sulpicius Severus, "Dialogi Duo," i. 9, 13, 15; Eusebius, "Hist. Eccl." vi. 8; Clement, *l.c.* iii. 4; Cyprian, Ep. iv.; Rev. ii. 14), went hand in hand with Gnosticism. Against this exaggeration of the divine attribute of love and the neglect of that of justice, the Rabbis in the ancient Mishnah seem to utter their warning (Meg. iv. 9; Yer. Ber. i. 3). When, finally, the reaction set in, and Gnosticism both as an intellectual and as a sexual degeneracy (compare Sifre on Num. xv. 39) was checked by a strong counter-movement in favor of positive Christianity, two principles of extraordinary character were laid down by the framers of the Church: (1) the Trinitarian dogma with all its corollaries; and (2) a double code of morality, one for the world-fleeing monks and nuns and the clergy—called the really religious ones—and another for the laity, the men of the world.

The Trinitarian formula first occurs in Matthew (xxviii. 19, R. V.) in the words spoken by the risen Christ to the disciples in Galilee: "Go ye therefore,

rank of a god and placed alongside of God the Father (I Cor. viii. 6, xii. 3; Titus ii. 13; compare I John v. 20); and in II Cor. xiii. 14 the Trinity is almost complete. In vain did the early Christians protest against the deification of Jesus ("Clementine Homilies," xvi. 15). He is in Paul's system the image of God the Father (II Cor. iv. 4; compare I Cor. viii. 6); and, being opposed "to Satan, the god of this world," his title "God of the world to come" is assured. However repugnant expressions such as "the blood," "the suffering," and "the death of God" (Ignatius, "Ad Romanos," iii., v. 13; *idem*, "Ad Ephesios," i. 1; Tertullian, "Ad Praxeum") must have been to the still monotheistic sentiment of many, the opponents of Jesus' deification were defeated as Jewish heretics (Tertullian, *l.c.* 30; see ARIANISM and MONARCHIANS).

The idea of a Trinity, which, since the Council of Nice, and especially through Basil the Great (370), had become the Catholic dogma, is of course regarded by Jews as antagonistic to their monotheistic faith and as due to the paganistic tendency of the Church; God the Father and God the Son, together with "the Holy Ghost ["Ruah ha-Kodesh"] conceived of as a female being," having their parallels in all the heathen mythologies, as has been shown by many Christian scholars, such as Zimmern, in his "Vater, Sohn, und Fürsprecher," 1896, and in Schrader's "K. A. T." 1902, p. 377; Ebers, in his "Sinnbildliches: die Koptische Kunst," 1892, p. 10; and others.

There was a time when the Demiurgos, as a second god, threatened to becloud Jewish monotheism (see Gnosticism and ELISHA BEN ABUYAH); but this was at once checked, and the absolute unity of God became the impregnable bulwark of Judaism. "If a man says: 'I am God,' he lies, and if 'Son of man,' he will repent," was the bold interpretation of Num. xxiii. 18, given by R. Abbahu with reference to Christianity (Yer. Ta'an. ii. 1, 65b). "When Nebuchadnezzar spoke of the 'Son of God' (Dan. iii. 25), an angel came and smote him on the face," saying: "Hath God a son?" (Yer. Shab. vi. 8d). In the Church, Unitarianism was suppressed and persecuted whenever it endeavored to assert its birthright to reason; and it is owing chiefly to Justinian's fanatic persecution of the Syrian Unitarians that Islam, with its insistence on pure mono-

of Isis and her son Horus, Istar and Tammuz, Frey and Balder. Yet this was but part of the humanization of the Deity and deification of man instituted in the Church in the shape of image-worship, despite synods and imperial decrees, prohibitions and iconoclasm. The cross, the lamb, and the fish as symbols of the new faith, failed to satisfy the heathen minds; in the terms of John of Damascus they demanded "to see the image of God, while God the Father was hidden from sight"; and consequently the second commandment had to give way (see "Image-Worship," in Schaff-Herzog, "Encyc."). It is no wonder, then, that the Jews beheld idolatry in all this, and felt constrained to apply the law, "Make no mention of the name of other gods" (Ex. xxiii. 13; Mek. to the passage and Sanh. 63b) also to Jesus; so that the name of one of the best and truest of Jewish teachers was shunned by the medieval Jew. Still, the Jewish code of law offered some toleration to the Christian Trinity, in that it permitted semi-proselytes ("ger toshab") to worship other divine powers together with the One God (Tosef., Sanh. 63b; Shulhan 'Aruk, Orach Hayyim 156, Moses Isserles' note).

It was, indeed, no easy matter for the Jew to distinguish between pagan idolatry and Christian image-worship (Shulhan 'Aruk, Yoreh De'ah, 141). Moreover, image-worship went hand in hand with religious worship and saint-worship; and as the door was opened wide to admit in the guise of saints the various deities of paganism, the policy of the medieval Church being to create a large pantheon of saints, apostles, and angels alongside of the Trinity in order to facilitate the conquest of heathen nations. In contrast to the uncompromising attitude of Judaism, the Church was ever ready for compromise to win the great multitudes. It was this spirit of polytheism which led to all those abuses the opposition to which was the chief factor of the Reformation—whose aim and purpose were a return to Pauline Christianity and the New Testament with the help of a deeper study of the Old Testament at the hand of Jewish scholarship (see LUTHER; REFORMATION; REUCHLIN).

But the Trinitarian dogma rested mainly upon Paul's conception of the mediatorship of Christ. For no sooner was the idea of the atoning power

of the death of the righteous (Isa. liii. 4-10; see ATONEMENT) applied to Jesus (Matt. xx. 28; Luke xxii. 37; Acts viii. 32) than Christ

Mediator-ship of Christ. became the necessary mediator, "delivering man from the power of Satan and the last enemy—death" (I Tim. ii. 5; Col. i. 13; I Cor. xv. 26).

While Judaism has no room for dualism, since God spoke through the seer, "I formed the light and created the darkness: I make peace and create evil" (Isa. xlv. 7); and while the divine attributes of justice and love, punitive wrath and forgiving mercy, are only contrasted (**מדת הרין ומדת הרחמים**, Ber. 7a; Philo, "Quis Rerum Divinarum Heres Sit," xxxiv.; Siegfried, "Philo," pp. 213 *et seq.*), but never divided into separate powers, the world of Satan and the world of Christ are arrayed against each other, and an at-one-ment by the blood of the cross is necessitated in the Pauline system (Col. i. 20; Rom. iii. 25).

God had to reconcile the world to Himself through the death of Jesus (II Cor. v. 18) and render "the children of wrath" children of His grace (Ephes. ii. 3; Rom. iii. 25, v. 10). "The love of God required the sacrifice of his own begotten Son" (John iii. 16). This view is regarded as repugnant by the pure monotheistic sentiment of the Jew, itself grounded upon the spirituality and holiness of God, and was opposed by R. Akiba when he, with direct reference to the Christian doctrine, said: "Happy are ye, Israelites! Before whom do ye purify yourselves, and who is the one who purifieth you but your Father in heaven, for it is said: 'Israel's hope ["mikweh," also interpreted as "source of purification"] is God' " (Jer. xvii. 13; Mishnah Yoma, end). But the whole dogma of Jesus' incarnation and crucifixion has for its background a world of sin and death ruled by Satan and his hosts of demons (II Cor. iv. 4; Ephes. ii. 1, vi. 12 *et seq.*; II Tim. ii. 26). In fact, the whole coming of Christ is viewed in the New Testament as a battle with Satan (see Matt. iv. 1 *et seq.*, xii. 29; Luke x. 18; John xii. 31; John iii. 8). The story of Adam's fall, which caused the Book of Wisdom to say (ii. 24) that "through the envy of the devil death came into the world" (compare Ecclus. [Sirach] xxv. 24), was made by Paul (compare II Esdras iii. 7, 21, and Apoc. Baruch, xvii. 3) the keynote of the entire human history (Rom. v. 12). For those of the Rabbis who accepted this view the Law was an antidote against "the venom of the Serpent"—that is, the germ or the inclination to sin ('Ab. Zarah, 22b; Shab. 146a); to Paul, who antagonized the Law, the "breath of the serpent" became a power of sin and everlasting doom of such a nature that none but God Himself, through Christ His son, could overcome it.

In adopting this view as the doctrine of ORIGINAL SIN the Church deprived man of both his moral and his intellectual birthright as the child of God

The Doctrine of Original Sin. (Tertullian, "De Anima," xvi., xl.; Augustine, "De Nuptiis et Concupiscentiis," i. 24, ii. 34; Strauss, "Glaubenslehre," ii. 43 *et seq.*), and declared all the generations of man to have been born in sin—a belief accepted

also by the Lutherans in the Augsburg Confession and by Calvin ("Institutes," II. i. 6-8; Strauss, *l.c.*

ii. 49). In vain did Pelagius, Socinus, and the Arminians protest against a view which deprived man of his prerogative as a free, responsible person (Strauss, *l.c.* p. 53). No longer could the Christian recite the ancient prayer of the Synagogue: "My God, the soul which Thou gavest unto me is pure" (Ber. 60b). And while, in all Hellenistic or pre-Christian writings, Enoch, Methuselah, Job, and other Gentiles of old were viewed as prototypes of humanity, the prevailing opinion of the Rabbis being that "the righteous among the heathen have a share in the world to come" (Tosef., Sanh. xiii. 2; Sanh. 105a; see all the passages and the views of a dissenting minority in Zunz, "Z. G." pp. 373-385), the Church, Catholic and Protestant alike, consigns without exception all those who do not believe in Jesus to the eternal doom of hell (Strauss, *l.c.* ii. 686, 687). Christ's descent into hell to liberate his own soul from the pangs of eternal doom became, therefore, one of the fundamentals of the Apostolic creed, after I Peter iii. 18, iv. 6 (see Schaff-Herzog, "Encyc." art. "Hell, Christ's Descent into"). It is obvious that this view of God could not well inculcate kindly feelings toward Jews and heretics; and the tragic fate of the medieval Jew, the persecutions he suffered, and the hatred he experienced, must be chiefly attributed to this doctrine.

Paul's depreciation of the Law and his laudation of faith (in Christ) as the only saving power for Jew and Gentile (Rom. iii. 28, x. 4; Gal.

Faith and Reason. iii. 7 *et seq.*) had, in the Middle Ages, an injurious effect upon the mental progress of man. Faith, as exhibited by Abraham and as demanded

of the people in the Old Testament and rabbinical writings, is **אמונה**, a simple, childlike trust in God; and accordingly "littleness of faith"—that is, want of perfect confidence in the divine goodness—is declared by Jesus as well as by the Rabbis in the Talmud as unworthy of the true servant and son of God (Gen. xv. 6; Ex. xiv. 31; Num. xiv. 11, xx. 12; Hab. ii. 4; II Chron. xx. 20; Mek. to Ex. xiv. 31; Matt. vi. 30; Soṭah 48b). Paul's theology made faith a meritorious act of saving quality (Rom. i. 16); and the more meritorious it is the less is it in harmony with the wisdom of the wise, appearing rather as "foolishness" (I Cor. i. 18-31). From this it was but one step to Tertullian's perfect surrender of reason, as expressed in "Credo quia absurdum," or, more correctly, "Credibile quia ineptum; certum est quia impossibile est" (To be believed because it is foolish; certain because impossible"; "De Carne Christi," v.). Blind faith, which renders the impossible possible (Mark ix. 23, 24), produced a credulity throughout Christendom which became indifferent to the laws of nature and which deprecated learning, as was shown by Draper ("History of the Conflict between Science and Religion") and by White ("History of the Warfare of Science with Theology"). A craving for the miraculous and supernatural created ever new superstitions, or sanctioned, under the form of relic-worship, old pagan forms of belief. In the name of the Christian faith reason and research were condemned, Greek philosophy and literature were exterminated, and free thinking was suppressed. Whereas Juda-

ism made the study of the Law, or rather of the Torah—which is learning, and included science and philosophy as well as religion—the foremost duty of each member of the household (Deut. vi. 7, xi. 19; Josephus, "Contra Ap." ii. §§ 18, 26, 41), medieval Christianity tended to find bliss in ignorance, because knowledge and belief seemed incompatible (Lecky, "History of European Morals from Augustus to Charlemagne," ii. 203-210; *idem*, "History of the Rise and Influence of the Spirit of Rationalism in Europe," i. 1-201).

It was the resuscitated pagan thinkers, it was the Mohammedan and the Jew, who kept the lamps of knowledge and science burning; and to them in large measure the revival of learning, through scholastic philosophy in the Catholic cloisters and afterward in western Europe in general, is due. Not merely the burning of witches and heretics, but the charges, raised by priests and mobs against the Jews, of having poisoned the wells, pierced the consecrated host, and slain innocent children in order to use their blood, can mainly be traced to that stupor of the mind which beholds in every intellectual feat the working of Satanic powers, alliance with which was believed to be bought with blood. On the other hand, the Church was ever busy infusing into the popular mind the belief that those rites which served as symbolic expressions of the faith were endowed with supernatural powers, "sacrament" being the Latin word used for "mysterion," the name given to forms which had a certain magic spell for the believer. Both baptism and the eucharist were regarded as miracle-working powers of the Christian faith, on participation in which the salvation of the soul depended, and exclusion from which meant eternal damnation (see the literature in Schaff-Herzog, "Encyc." s.v. "Sacrament").

The expectation by early Christianity of a speedy regeneration of the world by the reappearance of Jesus exerted a strange influence also on the whole moral and social state of humanity. The entire Christian life being a preparation for the world to come (and this change being expected to take place soon; Matt. x. 23; I Cor. i. 7; I Peter i. 13), only those that renounced the joys of the flesh were certain of entering the latter. This view gave rise to asceticism in the monasteries, for which genuine religiosity was claimed; while marriage, home, and state, and all earthly comforts, were only concessions to the flesh. Henceforth the ideal life for the priest and recluse was to differ from that for the people at large, who were to rank as inferiors (Strauss, *l.c.* i. 41 *et seq.*). Whereas in Judaism the high priest was not allowed to officiate on the Day of Atonement unless he had a wife that made home sacred to him (Yoma i. 1, after Lev. xvi. 11, 17), celibacy and virginity were prized as the higher virtues of the Christian elect, contempt of the world with all its material, social, and intellectual pursuits being rendered the ideal of life (see Ziegler, "Gesch. der Ethik," 1886, pp. 192-242). Thus, to the Jew Christendom, from the days of the emperor Constantine, presented a strange aspect. The Church, formerly the declared enemy of Rome-Babel (Rev. xvii.), had become her ally, accepting

Edom's blessing, "By thy sword shalt thou live" (Gen. xxvii. 40), as her own; and, on the other hand, there appeared her priests ("gallah" = hair-clipped) and monks ("kummarim"), in the guise of the old Hebrew Nazarites and saints, claiming to be the true heirs to Israel's prophecy and priesthood. Indeed, medieval Judaism and Christianity formed the greatest contrast. Children of the same household, invoking the same God and using the same Scriptures as His revealed word, they interpreted differently life and its meaning, God and religion. Their Bible, Sabbath, and festivals, their whole bent of mind and soul, had become widely divergent. They no longer understood each other.

Yet, while neither Augustine nor Thomas Aquinas, the chief framers of the Church dogma, nor even Luther and Calvin, the Reformers, had any tolerance for Jew or Moslem, the authorities of the Synagogue accorded to Christianity and Islam a high providential mission in human history. SAADIA (died 942), the first to examine the Christian dogma, says (in

his "Emunot we-De'ot," ii. 5) that, unconcerned by the sensual Trinitarian belief of the common crowd, he would discuss only the speculative value given by Christian thinkers to the Trinity; and so, with penetrating acumen and profound earnestness and love of truth, he endeavors to lay bare either the metaphysical errors of those who, as he says, make of such attributes as life, power, and knowledge separate parts of the Deity, or the defects of the various philosophical constructions of the divinity of Jesus (see Kaufmann, "Gesch. der Attributenlehre," pp. 38-52; Guttmann, "Die Religionsphilosophie des Saadia," pp. 103-113).

Grander still is the view of Christianity taken by Judah ha-Levi in the "Cuzari." After having rejected as incompatible with reason all the claims of the Trinity and of Christ's origin (i. 5), and remarked that both Christianity and Islam accepted the roots, but not the logical conclusions, of Israel's faith, (iv. 11)—rather amalgamating the same with pagan rites and notions—he declares (iv. 23) that both form the preparatory steps to the Messianic time which will ripen the fruit in which adherents of those faiths, too, will have a share, all the branches thus proving to be "the one tree" of Israel (Ezek. xxxvii. 17; see D. Cassel, "Das Buch Kuzari," 337). This view is shared by Maimonides, who writes in "Yad," Melakim, xi. 4: "The teachings of the Nazarene and the Ishmaelite [Mohammed] serve the divine purpose of preparing the way for the Messiah, who is sent to make the whole world perfect by worshipping God with one spirit: for they have spread the words of the Scriptures and the law of truth over the wide globe; and, whatever of errors they adhere to, they will turn toward the full truth at the arrival of the Messianic time." And in his Responsa (No. 58) he declares: "The Christians believe and profess in common with us that the Bible is of divine origin and given through Moses, our teacher; they have it completely written down, though they frequently interpret it differently."

The great rabbinical authorities, R. Gershom of Mayence (d. 1040; see "Ha-Hoker," i. 2, 45); RASHI

and his school; the French Tosafists of the twelfth century ('Ab. Zarah, 2a); Solomon ben Adret of Barcelona, of the thirteenth century; Isaac b. She-shet of the fourteenth century (Responsa No. 119); Joseph Caro (Shulhan 'Aruk, Orah Hayyim, 156, end; Yoreh De'ah, 148; and Hoshen Mishpat, 266), and Moses Isserles of the sixteenth century declare that Christians are to be regarded as Proselytes of the Gate and not as idolaters, in spite of their image-worship. Still more emphatic in the recognition of Christianity, as teaching a belief in the Creator, revelation, retribution, and resurrection, is Joseph Yaabez, a victim of Spanish persecution (1492), who, in his "Ma'amar ha-Ahdut," iii., goes so far as to assert that "but for these Christian nations we might ourselves have become infirm in our faith during our long dispersion."

The same generous view is taken by his contemporary Isaac Arama ("Akedat Yizhak," lxxxviii.). Eliezer Ashkenazi (sixteenth century) warns his coreligionists, in his "Ma'ase ha-Shem," written in Turkey, "not to curse a whole Christian nation because a portion wrongs us, as little as one would curse one's own brother or son for some wrong inflicted." Jacob Emden at the middle of the eighteenth century wrote: "Christianity has been given as part of the Jewish religion by the Apostles to the Gentile world; and its founder has even made the moral laws stricter than are those contained in Mosaism. There are, accordingly, many Christians of high qualities and excellent morals who keep from hatred and do no harm, even to their enemies. Would that Christians would all live in conformity with their precepts! They are not enjoined, like the Israelites, to observe the laws of Moses; nor do they sin if they associate other beings with God in worshiping a triune God.

They will receive reward from God for having propagated a belief in Him among nations that never heard His name; for 'He looks into the heart.' Yea, many have come forth to the rescue of Jews and their literature" ("Resen Mat'eh," p. 15b, Amsterdam, 1758, and "Lehem ha-Shamayim" to Ab. v. 17). Leone del Bene (Judah Asahel Mehatob) also may be mentioned, who, in his "Kis'ot le-Bet David," 1646, xxiv., xxvi., xlv., xlviii., compares Mohammedanism with Christianity, and declares the latter as superior, notwithstanding its Trinitarian dogma. A highly favorable opinion of Jesus is expressed also in a Karaite fragment noted in Steinschneider, "Ozerot Hayyim," Catalogue of the Michael Library, pp. 377 *et seq.*, Hamburg, 1848. Compare JEW. ENCYC. i. 223, s.v. AFENDOPOL.

The persistent attacks of Christian controversialists against the Jewish belief gave rise, of course, to a number of polemical works, written in self-defense, in which both the Christian dogmas and the New Testament writings are submitted to unsparing criticism. Foremost among these—not to mention Nahmanides' published disputation with Pablo Christiani—is that of Hasdai Crescas, who, in a Spanish "tratado" on the Christian creeds (1396), showed the irrationality of the doctrines of Original Sin, the Trinity, the Incarnation, the Virginity

of Jesus' Mother, and Transubstantiation, and who investigated the value of baptism and of the New Testament compared with the Old; beginning with the following three axioms: "(1) Reason can not be forced into belief; (2) God Himself can not alter the laws of a priori truth and understanding; (3) God's justice must comprise all His children." Another vigorous defender of Judaism against Christianity was Simon ben ZEMAH DURAN (1361–1440), who, in his great work, "Magen Abot," reiterates the assertion that Jesus, according to his own words, did not come to abrogate the Law; and then exposes the many self-contradictory statements in the New Testament concerning Jesus. The "Ikkarim" of Joseph ALBO is (not merely in ch. xxv. of sect. iii., but in its totality) a defense of liberal Jewish thought against Christian dogmatism; and it therefore dwells with especial emphasis on the fact—which all Jewish thinkers from Saadia and Maimonides down to Mendelssohn accentuated—that miracles can never testify to the verity of a belief, because every belief claims them for itself. As to the two Hebrew standard works of New Testament criticism in the Middle Ages, written for apologetic purposes, the "Sefer Nizzahon" and the "Hizzuk Emunah," see MÜHLHAUSEN; LIPPMANN, and Isaac ben Abraham TROKI.

III. To offer to the great Gentile world the Jewish truth adapted to its psychic and intellectual capacities—this was the providential mission of Christianity. Yet, in order to become a unifying power for all the nations on the globe, shaping and reshaping empires, and concentrating the social, political, and spiritual

forces of humanity in a manner never before attempted or dreamed of, it required an inspiring ideal of sublime grandeur and beauty, which should at once fascinate and stir souls to their very depths and satisfy their longings. Nothing less than the conquests of Cyrus the Lord's "anointed," called "to subdue nations and to break their prison doors" (Isa. xlv. 1, 2), than Alexander's great empire over the earth, still more than a kingdom that would encompass all that for which Rome and Alexandria and Jerusalem stood—"a kingdom of the people of the saints of the Most High" (Dan. vii. 17–27)—nothing less than this was the goal which they that were told to "go forth and make disciples of all nations" (Matt. xxviii. 19) had in view. The Jewish propaganda, begun in the Babylonian Exile (Isa. xlv. 6; xlix. 6; lvi. 6, 7; lxvi. 21), and systematically pursued in Alexandria and Rome (Matt. xxiii. 15; Schürer, "Gesch." iii. 302 *et seq.*, 420 *et seq.*), was to be left far behind, and, by battering down the barriers of the Law and the Abrahamic faith, was to be rendered elastic enough to suit the needs of a polytheistic world. Such was the view of the missionary of Tarsus.

But it was, after all, the glad tidings of the Jew Jesus which won humanity for Abraham's God. Jewish righteousness, "Zedakah," which is the power of helpful love readjusting social inadequacies, was destined to go forth from the Synagogue in order to lift the burden of woe from suffering humanity and to organize everywhere works of

charity. By this the Church, "the congregation of the Lord," conquered the masses of the vast Roman empire, and, as she learned the better to apply the Jewish system (see *ESSENES*) to the larger field opened, achieved ever-increasing wonders with the mighty resources at her disposal. The poorhouse, or hospital, "transplanted as a branch of the terebinth of Abraham to Rome" (see *CHARITY*), became a mighty factor of human beneficence, and moved the deepest forces of the Church to glorious activity. Christianity, following the matchless ideal of its Christ, redeemed the despised and outcast, and ennobled suffering. It checked infanticide and founded asylums for the young; it removed the curse of slavery by making the humblest bondsman proud of being a child of God; it fought against the cruelties of the arena; it invested the home with purity and proclaimed, in the spirit of Ezek. xviii. and Yer. Sanh. iv. 22a, the value of each human soul as a treasure in the eyes of God; and it so leavened the great masses of the empire as to render the cross of Christ the sign of victory for its legions in place of the Roman eagle. The "Galilean" entered the world as conqueror. The Church became the educator of the pagan nations; and one race after another was brought under her tutorship. The Latin races were followed by the Celt, the Teuton, and the Slav. The same burning enthusiasm which sent forth the first apostle also set the missionaries aglow, and brought all Europe and Africa, and finally the American continent, under the scepter of an omnipotent Church. The sword and the cross paved the way through vast deserts and across the seas, and spread the blessings of a civilization claimed to be Christian because its end was the rule of Christ.

Judaism, however, denies the validity of this claim. As Isaac Troki (in his "*Hizzuk Emunah*,"

i. 2, 4a, 6) says, "none of the Messianic promises of a time of perfect peace and unity among men, of love and truth of universal knowledge and undisturbed happiness, of the cessation of all wrong-doing, superstition,

idolatry, falsehood, and hatred [Isa. ii. 1 *et seq.*, 18; xi. 1-9, lxxv. 19, 23; Jer. iii. 17; Ezek. xxxiv. 25, xxxvi. 25 *et seq.*, xxxvii. 26; Zech. xiii. 2, xiv. 9; Zeph. iii. 13] have been fulfilled by the Church." On the contrary, the medieval Church divided men into believers and unbelievers, who are to inherit heaven and hell respectively. With the love which she poured forth as the fountain of divine grace, she also sent forth streams of hatred. She did not foster that spirit of true holiness which sanctifies the whole of life—marriage and home, industry and commerce—but in Jewish eyes seemed to cultivate only the feminine virtues, love and humility, not liberty and justice, manhood and independence of thought. She has done much in refining the emotions, unfolding those faculties of the soul which produce the heavenly strains of music and the beauties of art and poetry; but she also did all in her power to check intellectual progress, scientific research, and the application of knowledge. Her tutorship sufficed as long as the nations under her care were in the infant stage; but as soon as they awoke to self-consciousness and longed for freedom, they burst

the shackles of dogma and of ecclesiastical authority. Thus the Church was broken up into churches. Under the influence of Judaism and of Arabic philosophy, Scholasticism arose, and then came the REFORMATION; and the process of disintegration continues throughout Protestantism. The tendency of historical inquiry and Biblical criticism is to leave nothing but the picture of the man Jesus, the Jew, as a noble type of humanity, and to return to simple monotheism (see Renan, "*Le Judaïsme et le Christianisme*," 1883; *idem*, "*L'Eglise Chrétienne*," 1879, p. 248; Alexander von Humboldt, in Samter, "*Moderne Judentaufen*," and in A. Kohut, "*Alexander von Humboldt und das Judenthum*," 1871, p. 176; Berner, "*Judenthum und Christenthum*," 1891, p. 31; Alphonse de Candolle, in Jellinek, "*Franzosen über Juden*," 1880, p. 27; Singer, "*Briefe Berühmter Christ. Zeugenossen*," p. 114. No human individual, however great in his own environment, can, according to the Jewish view, present a perfect ideal of humanity for all ages and phases of life. "No one is holy but God": to this Jewish conception of man Jesus also gave expression (Matt. xix. 17). Man as the image of God requires all the ages and historical conditions of progress to unfold the infinite possibilities of the divine life planted in him. "Each age has its own types of righteousness" (Tan., *Mikez*, Vienna ed., p. 48), and only by the blending of all human efforts toward the realization of the true, the good, and the beautiful can the highest perfection be attained at the end of history, "each mount of vision forming a stepping-stone to Zion as the sublime goal" (Midr. Teh. to Ps. xxxvi. 6).

Christianity is not an end, but the means to an end; namely, the establishment of the brotherhood of man and the fatherhood of God. Here Christianity presents itself as an orb of light, but not so central as to exclude Islam, nor so bright and unique as to eclipse Judaism, the parent of both. Moreover, room is left for other spiritual forces, for whatever of permanent value is contained in Brahmanism, especially its modern theistic sects, and in Buddhism (see Eucken, "*Der Wahrheitsgehalt der Religion*," Leipsic, 1901; Happel, "*Die Religiösen und Philosophischen Grundanschauungen der Inder*," 1902), and in the theosophic principles derived from it, and for all religious and philosophical systems that may yet be evolved in the process of the ages. In fact, whatever constitutes humanity and bears the image of God, whatever man does in order to unfold the divine life (Gen. i. 27; Lev. xviii. 5; Ps. viii. 6; Job xxviii. 28; Eccl. xii. 13)—that helps to make up the sum of religion.

For the modern tendency toward pure theistic and humanitarian views among the various systems of religious thought, see *ETHICAL CULTURE*; *UNITARIANISM*.

K.

CHRISTINA AUGUSTA: Queen of Sweden; born at Stockholm Dec. 7, 1626; died at Rome April 19, 1689. She was a daughter of Gustavus Adolphus and Mary Eleanora of Brandenburg, and reigned from 1632 to 1654. Her attitude toward the Jews was most benevolent. Acquainted with Hebrew literature, which she eagerly studied in her youth, she welcomed eminent Hebrew scholars at her court. Thus Menasseh ben Israel, recommended to her by Vossius, was kindly received; and his pleadings for the Jews and their literature met with great sympathy.

Christina was, furthermore, interested, together with England, in permitting Jews to settle in the West Indies, and especially favored a Portuguese Marano, Isaac Manoel Texeira, whom she appointed financial agent and resident minister at Hamburg, and on account of whom she more than once remonstrated with the Senate of Hamburg, demanding for her Jewish minister the honors enjoyed by other ministers resident. During her sojourn at Hamburg she resided at the home of Manoel Texeira, regardless of the severe censures pronounced upon her from the Protestant pulpits. She appointed as her physician Benedito de Castro (Baruch Nehemiah).

Christina contrived by every possible means to prevent the banishment of the Jews of Vienna, decreed by Emperor Leopold in 1670; but unfortunate circumstances rendered her efforts futile.

CHRONEGK, LUDWIG: German actor; born at Brandenburg-on-the-Havel Nov. 3, 1837; died at Meiningen July 8, 1890. He was the stage-manager and "Intendantzrath" of the famous Meiningen troupe established at Weimar by Duke George of Meiningen. Chronegk had but little schooling, as his bent for the stage asserted itself while he was still a boy. At eighteen he went to Paris to study French methods. A year later, 1856, he returned to Berlin, where he continued in histrionic training under Görner, the manager of Kroll's Theater. On being graduated, Chronegk went to Liegnitz, Görlitz, Hamburg (Thalia Theater), and Leipsic (Stadttheater), playing juvenile rôles.

In 1866 he joined the Meiningers, with whom he acted until 1870, when he became "regisseur." Two years later he was appointed stage-director, and from that time dates the fame of both company and director. Chronegk, whose eye for stage-realism was far in advance of his time, realized that the puppet-like maneuvers of the supernumeraries were neither natural nor graceful, and he took each individual in hand and converted him or her into an independent force. He reanimated the various individuals of the mobs, caused them to act as human beings, and in so doing revolutionized German stage-

methods. This course antagonized the conservative element, and in consequence Chronegk was denounced by members of his profession, and more particularly by a short-sighted press. He persisted, however, and lived to see his methods indorsed and imitated.

But whatever good Chronegk accomplished in this one direction, he almost counteracted by the harm he did in another. In perfecting the ensemble, he sacrificed the individual, and as a consequence the Meiningers gave performances which, though exceptional as a whole, were yet full of flaws when viewed critically and analytically. When the company appeared in London in 1881, this fact was most apparent, especially in "Julius Cæsar," which was produced with a *Brutus* so pitifully weak as to mar the entire performance. It was the same with "Othello," in which Ludwig Barnay alone escaped being classed as respectably mediocre.

During the twenty-six years that Chronegk was with the Meiningers, from May 1, 1874—when they first appeared at the Friedrich-Wilhelm Theater, Berlin—until 1890, he staged 2,591 plays, in eighteen foreign and eighteen German cities.

CHRONICLES. See HISTORIOGRAPHY.

CHRONICLES, BOOKS OF.—Biblical Data:

The two books of Chronicles form a history of the Temple and its priesthood, and of the house of David and the tribe of Judah, as guardians of the Temple, with references to the other tribes, and with some connected material. The contents may be briefly summarized as follows:

(a) I Chron. i.-ix. contains chiefly genealogies, from Adam, through Noah's sons, and then particularly through the line of Shem to Esau and Israel and their descendants. The last twelve verses of ch. i. contain a list of Edomitish kings and chiefs. Brief narratives from various periods are interspersed among the genealogies (*e.g.*, II, 23; IV, 9, 10, 39-43; V, 9, 10, 18-22, 25, 26). The last genealogy in this collection, ix. 35-44, that of Saul's family, forms a kind of transition to the following section.

(b) I Chron. x.-xxix. This section is concerned with David's reign, the introduction being the last battle and the death of Saul (x. 1-12, parallel to I Sam. xxxi. 1-13), and the conclusion, the accession of Solomon (xxiii. 1; xxviii. 5 *et seq.*; xxix. 22 *et seq.*).

(c) II Chron. i.-ix. is devoted to Solomon's reign. The first chapter speaks of his sacrifice at Gibeon (vs. 1-13) and Solomon's splendor (vs. 14-17). The building of the Temple is described in ch. ii.-iv., and its dedication in v. 1-14. The following chapters speak of Solomon's prayer, vision, sacrifices, glory, and in ix. 31 the death of Solomon is mentioned.

(d) II Chron. x.-xxxvi. contains the history of the kingdom of Judah down to the fall of Jerusalem, with the division of the kingdoms as preface, and the restoration-edict of Cyrus as appendix (*viz.*, x. 1-19, accession of Rehoboam and division of the kingdom; xi. xii., Rehoboam; xiii. 1-22, Abijah; xiv.-xvi., Asa; xvii.-xx., Jehoshaphat; xxi., Jeho-

ram; xxii. 1-9, Ahaziah; xxii. 10-12, xxiii., Athaliah; xxiv., Joash; xxv., Amaziah; xxvi., Uzziah; xxvii., Jotham; xxviii., Ahaz; xxix.-xxxii., Hezekiah; xxxiii. 1-20, Manasseh; xxxiii. 21-25, Amon; xxxiv., xxxv., Josiah; xxxvi. 1-3, Jehoahaz; xxxvi. 4-8, Jehoiakim; xxxvi. 9, 10, Jehoiachin; xxxvi. 11-13, Zedekiah; xxxvi. 17-21, fall of Jerusalem; xxxvi. 22, 23, restoration-edict of Cyrus.

—**In Rabbinical Literature:** Rabbinical literature does not recognize the division of Chronicles into two books. In B. B. 15a it is named as one **דברי הימים** (**ספר**), and the Masorah counts the verse I Chron. xxvii. 25 as the middle of the book. Tradition regards this one book as consisting of two unequal parts; viz., (1) lists largely of a genealogical nature with brief historical details; and (2) an extensive history of the kings in Jerusalem. The authorship of the first part, which is designated "Yahas" (**יחס**) = "genealogy" of the "Dibre ha-Yamim" is ascribed to Ezra (B. B. 15a). In Pes. 62b this part is connected with a Midrash and quoted as **ספר יוחסין** ("Book of the Descents"); while Rashi names the Midrash (**מיתניחין דדברי הימים**), "Mishnah of Dibre ha-Yamim," etc., which, according to him, contained expositions of certain passages of the Torah. This part was not to be explained to the men of Lud nor to those of Nehardea, for reasons not stated; perhaps it was feared that these interpretations might meet with irreverence.

On the whole, Chronicles was regarded with suspicion; its historical accuracy was doubted by the Talmudic authorities, it being held to be a book for homiletic interpretation, **לא נתנו דברי הימים אלא לדרוש** (Lev. R. i. 3; Ruth R. ii., beginning; compare Meg. 13a). The names were treated with great freedom; and many which clearly belonged to different persons were declared to indicate one and the same man or woman (Soṭah 12a; Ex. R. i. 17, *et passim*). Numerous as these fanciful interpretations of verses in Chronicles are in Talmudic-Midrashic literature, the loss of many similar expositions was deplored (Pes. 62b). E. G. II.

—**Critical View.**—**I. Position in Old Testament Literature:** Chronicles, which in the Hebrew canon consists of a single book, is called in the Hebrew Bible **דברי הימים** ("Annals"); in the LXX.—Codex B, *παρὰλειπομένων* ("of things left out"); Codex A adds (*τῶν*) *βασιλέων* *Ἰουδᾶ* ("concerning the kings of Judah"); *i. e.*, a supplement to the Book of Kings; in the Vulgate, *Liber Primus (and Secundus) Paralipomenon*. The modern title "Chronicles" was suggested by Jerome's speaking of the book in his "Prologus Galeatus" as "*Chronicon totius divinæ historiae*." The book belongs to the Hagiographa, or "Ketubim," the third and latest-formed section of the Hebrew canon. The view that its canonicity was matter of discussion among the Jews seems to rest on insufficient

evidence (Buhl, "Kanon und Text des A. T." Eng. ed., p. 31). In Hebrew lists, manuscripts, and printed Bibles, Chronicles is placed either first (Western or Palestinian practise, as in the St. Petersburg Codex), or last (Eastern or Babylonian, as in the Babylonian Talmud); see Ginsburg, "Introduction," pp. 1-8. In Greek and Latin lists, and in manuscripts and editions of the LXX. and Vulgate,

Chronicles usually follows Kings; the exceptions are more numerous in the Latin lists (Swete, "The Old Testament in Greek According to the Septuagint," Introduction, pp. 201-230).

Chronicles, originally a single work, is first found divided into two books in Codices A and B of the LXX., which were followed by subsequent versions, and ultimately by printed editions of the Hebrew text. It is part of a larger work, Chronicles-Ezra-Nehemiah, composed (see Section II.) in the Greek period between the death of Alexander (B.C. 323) and the revolt of the Maccabees (B.C. 167). It expresses the piety of the Temple community, and their interest in its services and history. They felt that the services had reached an ideal perfection, and were led to think of the "good kings" as having shaped their religious policy according to this ideal. Probably the author of Chronicles did not intend to supersede Samuel and Kings. There are slight traces of Chronicles in Ecclesiasticus (Sirach), (*e.g.*, xlvii. 8 *et seq.*; compare I Chron. xxv.); perhaps also in Philo (see Ryle, "Philo and Holy Scriptures," pp. 286 *et seq.*), and in the N. T. (for example, compare II Chron. xxiv. 21 with Matt. xxiii. 35). The references to Samuel-Kings are more numerous. The omission (see Swete, *l.c.* p. 227) of Chronicles from some Christian lists of canonical books is probably accidental.

II. Composition: (a) *Relation to Ezra-Nehemiah.* Chronicles, Ezra, and Nehemiah were originally a single work. This is shown by the identity of style, theological standpoint, and ecclesiastical interests, as well as by the fact that Chronicles concludes with a portion of a paragraph (II Chron. xxxvi. 22, 23) which is repeated and completed in Ezra i. 1-4. Comparison shows that Chronicles ends in the middle of a sentence. The division of the original work

arose from the diverse nature of its contents: Chronicles was merely a less interesting edition of Samuel-Kings; but Ezra-Nehemiah contained history not otherwise accessible. Hence readers desired Ezra-Nehemiah alone; and Chronicles (from its position in many manuscripts, etc., after Nehemiah) only obtained its place in the canon by an afterthought.

(b) *Author.* The author's name is unknown; the ascription by some Peshitta manuscripts to "Johanan the priest," perhaps the Johanan of Neh. xii. 23 (Barnes, "Chronicles," p. xii., in "Cambridge Bible for Schools and Colleges"; *idem*, "An Apparatus Criticus to Chronicles in the Peshitta Version," p. 1), can have no weight. From the keen interest shown in the inferior officials of the Temple, especially the singers, the author seems to have been a Levite, possibly one of the Temple choir.

(c) *Date.* Chronicles-Ezra-Nehemiah must be later than the times of Ezra and Nehemiah (458-432). In style and language the book belongs to the latest period of Biblical Hebrew. The descendants of Zerubbabel (I Chron. iii. 24) are given, in the Masoretic text, to the sixth generation (about B.C. 350); in the LXX., Syriac, and Vulgate, to the eleventh generation after Zerubbabel (about B.C. 200). The list of high priests in Neh. xii. 10, 11, extends to Jaddua (*c.* 330). These lists might, indeed, have been

made up to date after the book was completed; but other considerations point conclusively to the Greek period; *e.g.*, in Ezra vi. 22, Darius is called "the king of Assyria." On the other hand, the use of the book in Ecclesiasticus (Sirach) referred to above, the absence of any trace of the Maccabean struggle, and the use of the LXX. Chronicles by Eupolemus (*c.* B.C. 150; see Swete, *l.c.* p. 24), point to a date not later than B.C. 200. Hence Chronicles is usually assigned to the period B.C. 300-250.

(d) *Sources.* Chronicles contains (see Section I.) much material found, often word for word, in other

books of the Bible, and has also frequent references to other authorities. In regard to these sources, the contents may be classified thus: (A) passages taken from other O. T. books, with textual or editorial changes, the latter sometimes important; (B) passages based upon sections of other O. T. books, largely recast; (C) passages supposed on internal evidence to have been taken from or based on ancient sources, no longer extant and not much later than the close of the Exile, and in some cases perhaps earlier (see classification, p. 62); (D) passages supposed on internal evidence to be the work of late

I CHRONICLES.

II CHRONICLES.

post-exilic writers (compare *ib.*). In the preceding table space prevents the presentation of details. In *C* and *D*, Kittel's analysis in "S. B. O. T." is mostly followed, but not in all details, nor in his separation of the *D* material into various strata. Small portions from extant books embedded in *B*, *C*, and *D* are not indicated.

The non-Biblical sources may be classified thus:

(1) An earlier historical work cited as: "The Book of the Kings of Judah and Israel" (II Chron. xvi. 11, xxv. 26, xxviii. 26); "The Book of the Kings of Israel and Judah" (*ib.* xxvii. 7, xxxv. 26); "The Acts of the Kings of Israel" (*ib.* xxxiii. 18); and perhaps also as "The Midrash of the Book of Kings" (*ib.* xxiv. 27).

(2) Sections of a similar history of David and Solomon (unless these references are to that portion of the former work which dealt with these kings), cited as: "The Words of Samuel the Seer" (I Chron. xxix. 29); "The Words of Nathan the Prophet" (*ib.*; II Chron. ix. 29); and "The Words of Gad the Seer" (I Chron. xxix. 29).

(3) Sections of "The Book of the Kings of Israel and Judah," and possibly of other similar works, cited as: "The Words of Shemaiah the Prophet and of Iddo the Seer" (II Chron. xii. 15); "The Words of Jehu the Son of Hanani" (*ib.* xx. 34); "The Words of the Seers" (LXX., R. V., margin); "of his Seers" ("S. B. O. T."); "of Hozai" (II Chron. xxxiii. 19-20, R. V.); "The Vision of Iddo the Seer" (*ib.* ix. 29); "The Vision of Isaiah the Prophet" (*ib.* xxxii. 32); "The Midrash of the Prophet Iddo" (*ib.* xiii. 22); "The Acts of Uzziah, Written by Isaiah the Prophet" (*ib.* xxvi. 22); and "The Prophecy of Ahijah the Shilonite" (*ib.* ix. 29).

In the absence of numbered divisions like the present chapters and verses, portions of the work are indicated by the name of the prophet who figures in it—probably because the Prophets were supposed to have been the annalists (*ib.* xxvi. 22). Thus, "the Vision of Isaiah" is said to be in "The Book of the Kings of Judah and Israel"; and "the Words of Jehu the son of Hanani," inserted in "The Book of the Kings of Israel."

Thus the main source of Chronicles seems to have been a late post-exilic Midrashic history of the kings of Judah and Israel. Possibly, this had been divided into histories of David and Solomon, and of the later kings. The author may also have used a collection of genealogies; and perhaps additions were made to the book after it was substantially complete. In dealing with matter not found in other books it is difficult to distinguish between matter which the chronicler found in his source, matter which he added himself, and later additions, as all the authors concerned wrote in the same spirit and style; but it may perhaps be concluded that details about Levites, porters, and singers are the work of the chronicler (compare Section III. of this article).

III. Relationship to Samuel-Kings: (a) *Comparison of Contents.* Chronicles omits most of the material relating to Saul and the northern kingdom, including the accounts of Samuel, Elijah, and Elisha, and most of what is to the discredit of the "good kings"; e.g., the story of Bathsheba. Chronicles adds

(see table, *B* and *D*) long accounts of the Temple, its priests and its services, and of the observance of the Pentateuchal laws; also records of sins which account for the misfortunes of "good kings"—e.g., the apostasy of Joash (II Chron. xxiv.); of the misfortunes which punished the sins of "bad kings"—e.g., the invasions in the reign of Ahaz (*ib.* xxviii.); and of the repentance which resulted in the long reign of Manasseh (*ib.* xxxiii.); besides numerous genealogies and statistics. Chronicles has numerous other alterations tending, like the additions and omissions, to show that the "good kings" observed the law of Moses, and were righteous and prosperous (compare *ib.* viii. 2 and I Kings ix. 10, 11; see also below).

(b) *Literary Connection.* It might seem natural to identify the main source of Chronicles with Samuel-Kings, or with "The Book of the Chronicles of the Kings of Israel" and "The Book of the Chronicles of the Kings of Judah," frequently referred to in Kings. But the principal source can not have been Kings, because "The Book of the Kings" is sometimes said to contain material not in Kings—e.g., the wars of Jotham (II Chron. xxvii. 7); neither can it have been the "Chronicles" cited in Kings, because it is styled "Midrash" (A. V., "story"; R. V., "commentary"), which was a late form of Jewish literature (II Chron. xiii. 22, xxiv. 27). This main source, "The Book of the Kings," is therefore commonly supposed (see II. d) to have been a post-exilic work similar in style and spirit to Chronicles. The relation of this source to Kings is difficult to determine. It is clear that Chronicles contains matter taken either directly or indirectly from Kings, because it includes verses inserted by the editor of Kings (compare II Chron. xiv. 1, 2 and I Kings xv. 8, 11). Either Chronicles used Kings and "The Book of the Kings," both of which works used the older "Chronicles" (so Driver, "Introduction to the Literature of the O. T." 6th ed., p. 532), or Chronicles used "The Book of the Kings," which had used both Kings and the older "Chronicles," or works based on them.

(c) *Text.* It is not always possible to distinguish minor editorial changes from textual errors; but, when the former have been eliminated, Chronicles presents an alternative text for the passages common to it and Samuel-Kings. As in the case of two manuscripts, sometimes the one text, sometimes the other, is correct. For example, I Chron. xviii. 3 has, wrongly, "Hadarezer," where II Sam. viii. 3 has "Hadadezer"; but conversely I Chron. xvii. 6 has, rightly, "judges," where II Sam. vii. 7 has "tribes."

IV. Historical Value: (a) *Omissions.* Almost all these are explained by the chronicler's anxiety to edify his readers (compare Section III. a); and they in no way discredit the narratives omitted.

(b) *Contradictions.* Where Chronicles contradicts Samuel-Kings preference must be given to the older work, except where the text of the latter is clearly corrupt. With the same exception, it may be assumed that sections of the primitive "Chronicles" are much more accurately preserved in Samuel-Kings than in Chronicles.

(c) *Additions.* The passages which describe the

Temple ritual and priesthood and the observance of the Pentateuchal law before the Exile are a translation of ancient history into the terms of the chronicler's own experience. The prophetic admonitions and other speeches are the chronicler's exposition of the religious significance of past history according to a familiar convention of ancient literature. Such material is most valuable: it gives unique information as to the Temple and the religious ideas of the early Greek period. Most of the material included under *C* in Section II. d, above has apparently been borrowed from an older source, and may constitute an addition to present knowledge of pre-exilic Israelitish history. The religious and other interests of the chronicler and his main source do not seem to account for the origin of the genealogies, statistics, accounts of buildings, etc., in *C*.

The character of another set of additions is not so clear; viz., Abijah's victory (II Chron. xiii.), Zerah's invasion (*ib.* xiv., xv.), and Manasseh's captivity (*ib.* xxxiii.). However little the chronicler may have cared about writing scientific history, the fact that he narrates an incident not mentioned elsewhere does not prove it to be imaginary. Kings is fragmentary; and its editors had views as to edification different from those of the chronicler (see JUDGES), which might lead them to omit what their successor would restore. Driver and others hold that Chronicles is connected with early sources by another line than that through Kings (note also *C*, Section II. d). Hence the silence of Kings is not conclusive against these additions. Nevertheless, such narratives, in the present state of knowledge, rest on the unsupported testimony of a very late and uncritical authority. Much turns on internal evidence, which has been very variously interpreted. Some recognize a historical basis for these narratives (W. E. Barnes, in "Cambridge Bible," pp. xxx. *et seq.*; A. H. Sayce, "The Higher Criticism and the Verdict of the Monuments," p. 465); others regard them as wholly unhistorical (see "Chronicles, Books of," in "Encyc. Bibl."). As to Chronicles in general, Professor Sayce writes (*l.c.* p. 464): "The consistent exaggeration of numbers on the part of the chronicler shows us that from a historical point of view his unsupported statements must be received with caution. But they do not justify the accusations of deliberate fraud and 'fiction' which have been brought against him. What they prove is that he did not possess that sense of historical exactitude which we now demand from the historian."

W. H. B.

CHRONOGRAM (from the Greek χρόνος = "time," and γράμμα = "writing"): A sentence or verse certain letters of which express a date, while the sentence itself alludes to or is descriptive of the event to which the date belongs. The words "chronograph," "chronicon," "chronostichon," "eteostichon," and "eteamenchemerodistichon" are all synonyms for "chronogram"; but the latter is

now almost exclusively used. In general, the Latin literature of the Middle Ages is the richest in chronograms; but they are also found in German, Dutch, Belgian, and Hungarian. In English and French but few are found, and in Italian hardly any. Chronograms are especially popular in the East, there being several books in Persian on the art of constructing a "ta'rikh," the Persian equivalent for "chronogram" (see Rodgers, "Tarikhs," in "Jour. Royal Asiatic Soc." 1898, pp. 715-739). It is not improbable that the chronogram originated in the East, where such poetic juggling is common. The great popularity of chronograms among the Jews, and the extent to which they have been cultivated, may be explained by the fact that they are a variety of GEMATRIA, which latter was highly regarded by the Jews and much practised by them.

The earliest chronogram in Jewish literature is one found in a Hebrew poem of the year 1205 by Al-Harizi (ed. Kaminka, p. 412; compare Rapoport, in "Kerem Hemed," vii. 252), while the earliest Latin chronogram is dated five years later (compare Hilton, "Chronograms," iii. 4). According to Firchow, Hebrew chronograms date back to 582 (compare the epitaphs in his work "Abne Zikkaron," p. 10); but the inscriptions cited by him are probably forgeries. In the thirteenth century chronograms are found in the epitaphs of German Jews (Lewysohn, "Nafshot Zaddikim," No. 14, of the year 1261; No. 16, of the year 1275).

It is evident, therefore, that for a period of five hundred years chronograms occurred in the epitaphs of European Jews. Thus the dates

In Epitaphs. of the epitaphs of the family of Asher b. Jehiel in the first half of the fourteenth century are indicated by chronograms (Almanzi, "Abne Zikkaron," pp. 4, 6, 9); and among sixty-eight Frankfort epitaphs of that century four chronograms have been preserved (Horowitz, "Inschriften . . . zu Frankfurt-am-Main," Nos. 8, 29, 36, 68). The German Jews seem to have possessed little skill in the composition of chronograms, there being only about twenty-five (and these very simple) in a total of some 6,000 inscriptions. In Bohemia and Poland, chronograms in epitaphs occur more frequently, and are often very clever; for example, the epitaph of the physician Menahem b. Asher Mazzerato, who died at Prague in 1680, reads as follows: אִישׁ צָדִיק יִשְׂרָאֵל חָכֵם וְעוֹנֵן הָאֱלֹהִים מֵהָרַר מִנְחָם רוֹפֵא מוֹמְחָה (Lieben, "Gal 'Ed," p. 36); and the numerical value of the marked initial letters therein amounts to 440; *i.e.*, 5440, the Jewish year in which Menahem died. The year of death of the associate rabbi of Prague, Zalman, who perished in the great fire of 1689 (=5449 Jewish era), is indicated by the words בָּאֵשׁ יָצָא מֵאֵת ר' (ib. No. 59).

While the epitaphs, in addition to the chronograms, in many cases directly mention the dates, many manuscripts, and an even greater number of printed books, are dated simply by means of chronograms; authors, copyists, and ty-

In Books. pographers rivaling one another in hiding the dates in intricate chronograms, most difficult to decipher. Hence, many data of Jewish bibliography still remain to be determined.

or at least rectified. Down to recent times the custom of indicating dates by means of chronograms was so prevalent in Jewish literature that but few books are dated by numerals only. In the earliest printed books the chronograms consist of one or two words only: the Soncino edition of the Talmud, for instance, has for its date the earliest printed chronogram, נמרא ("Gemara") = 244 (1484 C.E.). Words like רננו ("rejoice ye!"), שמחה ("joy"), ברנה ("with rejoicing") were especially used for this purpose, as they express happiness. Later on, entire verses of the Bible, or sentences from other books, having some reference to the contents or title of the book, or to the name of the author, publisher, printer, etc., were used. In longer sentences, in which some of the letters were not utilized in the chronogram, those that counted were marked by dots, lines, or different type, or were distinguished in other ways. Innumerable errors have been made by bibliographers because the distinguishing marks were missing or blotted, or had been omitted. To this source of confusion must be added the varying methods of indicating the "thousand" of the Jewish era. The Italian, Oriental, and earlier Amsterdam editions frequently designate the thousand as לפ"ט (= לפרט, "the major era"). The German and Polish editions omit the thousand, considering only לפ"ט (= לפרט קטן, "the minor era"); but as neither the former nor the latter is employed throughout the respective editions, many errors arise. The following chronogram, which Samuel Schotten adds to his work "Kos ha-Yeshu'ot" (Frankfort-on-the-Main, 1711), shows how artificial and verbose chronograms may be: "Let him who wishes to know the year of the Creation pour the contents out of the cup [*i.e.*, count the word "kos." כוס, with defective spelling כס = 80] and seek aid [ישועה = 391; together 471] in the sixth millennium." The days of the month and week are indicated in the same way.

The chronograms on the works and documents of persons who were followers of Shabbethaism, and who in this manner indicated their belief, are most interesting. Thus, Samuel b. David ha-Levi's well-known work, "Nahalat Shib'ah" (Amsterdam, 1667), has the date משיח בן דוד בא ("Messiah, son of David, is come!") on the title-page; and the community of Holleschau, in Moravia, similarly engraved in the epitaph of its beloved rabbi, Shabbethai b. Meir ha-Kohen, the words היום בא משיח לנאולה ("Messiah is come to-day for a redemption"; compare Weisse, in "Kokebe Yizhak," i. 77). Many important years in Jewish history are indicated by their respective chronograms; *e.g.*, the year 1492 by מורה ("scatterer" = 252, after Jer. xxi. 10, which says that God scattered Israel). This was the year when the Jews were expelled from Spain (Abravanel's Introduction to his Commentary on Kings).

Neo-Hebraic poetry, which laid especial stress on the formal side of verse, also cultivated chronograms. A number of Hebrew poems

In Poetry. were produced in the first half of the nineteenth century, in which the letters of each verse have the same numerical value, being generally the year in which it was written.

A New-Year's poem in this style, written in the year 579 (= 1819), is found in Shalom Cohen's "Ketab Yosher" (ed. Warsaw, p. 146). Two years later Jacob Eichenbaum wrote a poem in honor of a friend, each line of which had the numerical value of 581 ("Kol Zimrah," ed. Leipsic, pp. 50-53). While this poem is really a work of art, in spite of the artifice employed, Eichenbaum's imitators have in their translations merely produced rimes with certain numerical values. Gottlob (in "Ha-Kokabim," i. 31) wrote an excellent satire on these rimesters, each line of his poem having the numerical value of 618 (= 1858). The first two verses of the poem are as follows:

עם הלפפים כה אריבה
ולאלה כנמול ידם להם אשיבה

But even poets like I. L. Gordon and A. B. Lewensohn have a great weakness for the לפפים ("minor eras"), though employing them only in the superscriptions to their poems. The modern school of Hebrew poets has given up these artifices, the "minor eras" being now chiefly employed for New-Year congratulations, especially by the poor of Palestine, who frequently distribute printed New-Year cards, the wish consisting of a verse whose numerical value is equal to the year.

CHRONOLOGY* (I.): The science that treats of the computation and adjustment of time or periods of time, and of the record and arrangement of events in the order of time. The chronology of Jewish literature may be divided into two periods: (1) that of the Biblical books; and (2) that of post-Biblical times.

Division of Time in the Biblical Books:

From the earliest periods the day was divided into night and morning. Genesis records the division into two parts of what is now termed the "tropical or solar day." It is probable that the Israelites divided the day into twelve "dihora," or twenty-four hours; but in the Hebrew texts no trace thereof is found. The earliest mention of the hour ("sha'ah") is in the Aramaic texts of Daniel (iii. 6, 15). In documents of the Greek epoch, as also in the Assyrian texts, references occur to "night-watches" ("ashmura"), by which the night was divided into three parts (Ps. xc. 4; Lam. ii. 19). As regards instruments for measuring time, II Kings (xx. 11) and Isaiah (xxxviii. 8) give some vague information concerning the gnomon of King Ahaz, and the degrees marked on his sun-dial (see **DIAL**).

The week, with the attribution of each day to one of the seven planets, is one of the most ancient institutions of the Babylonians. This nation commenced the hebdomadal period with the sun, followed by the moon, Mars, Mercury, Jupiter, Venus, and Saturn. Every planet in succession presided over twenty-four hours, but not in the order assumed for their spheres, which was as follows: the sun, Venus, Mercury, the moon, Saturn, Jupiter, Mars. The

*The foundations of Biblical chronology being still a matter of discussion, it is deemed desirable to present the divergent views in separate articles.

initial hour of the first day was consecrated to the sun; the twenty-fifth, or the initial hour of the second day, to the moon; the forty-ninth to Mars; the seventy-third to Mercury; the ninety-seventh to Jupiter; the one hundred and twenty-first to Venus; and the one hundred and forty-fifth to Saturn.

It has been claimed that this arrangement is of more modern invention; but indications of its existence are found in the earliest texts. The Mosaic accounts of Creation, of course, ignore the assignment of the week-days to divers stars; but, independently of all astral influence, the seventh day was instituted as a sacred day, quite distinct in character from the seventh day of the lunar synodical month, which was regarded as a holy day by the Chaldeans.

From the Mosaic times down the synodical month in the Jewish calendar was calculated, as in the Babylonian, from one new moon to the next. This is proved by the well-known passage in Ex. xii. 2. Here no Egyptian influence may be assumed. But the system of thirty-day months, also, seems to have been recognized by the Jewish calendar.

The Jewish year was solar-lunar. In the early Biblical statements no indication whatever is found of an intercalary month. Still it is safely assumed that the difference of ten or eleven hours between the twelve synodical months and the tropical year was equalized by the insertion of an embolismic month; and in the cuneiform Sumerian texts express mention is made of this intercalation as far back as the fifth millennium B.C. It is very probable that the equivalence of 19 tropical years and 235 synodical months was known in the most remote times; but a regular intercalary system was not introduced before Greek influence asserted itself—that is, not before 367 B.C. In Chaldea the embolismic months were inserted merely for astrological reasons: the methods employed later by the Jewish authorities (see CALENDAR) to adjust astronomical irregularities can not be held to have been in vogue among the Chaldeans.

Post-Biblical Times: The modern Jewish calendar is adapted to the Greek computation exclusively. The Talmudic tractate Rosh ha-Shanah (ch. i.) indicates that four ways for commencing the year were known and observed. The day was divided into twenty-four hours, and each hour into 1,080 "halakim." The passage in Rosh ha-Shanah gives, almost exactly, the length of the average synodical month as 29 days, 6 hours, and 793 halakim (44 minutes, $3\frac{1}{2}$ seconds), which is only $\frac{1}{2}$ second too long; the real duration being 29 days, 6 hours, 44 minutes, 2.89 seconds. This estimate is of Greek origin, like the Metonic embolismic cycle of the years 3, 6, 8, 11, 14, 17, 19 of the nineteen-year Metonic period. The new Jewish calendar seems to have been inaugurated in 363 (Tishri), and Rabbi Hillel apparently modified it by introducing some innovations; but it is not known exactly what they were. Some hints in Talmudic texts, which can not be dwelt upon here, seem to indicate that the "forbidden days"—that is, days of the week on which Rosh ha-Shanah (New-Year) could not fall—were introduced at that time. The Talmud speaks of Shabu'ot falling on a Saturday, which can not happen now. The first of Tishri can not fall on Sunday, Wednesday, or Friday

IV.—5

(אד); nor can the first of Nisan be on Monday, Wednesday, or Friday (בד). These forbidden days cause a great complication of the calendar. As a starting-point for calculation, the first of Tishri in the year 1 is indicated by the symbol בִּהְרֵר, signifying Monday (ב or second day of week), 5 (ה) hours, 204 (קד) halakim, corresponding to Oct. 7 in the Julian, or Sept. 7 in the Gregorian, calendar of the year 3761–3760 B.C. (6240 of the modern computation, which adds 10,000 years to the common era). This is the astronomical day 347,999. The cycles ("mahzor") count from that epoch. In order to ascertain the year of the cycle, the number is divided by 19, the remainder giving the year of the cycle; for example: 5661 (1900–1901) ÷ 19 = 297 + 18; i.e., the year 5661 is the eighteenth year of the 298th cycle.

The idea of an era beginning with and counted from an historical event is an ingenious invention of the Greeks, who represented by an impersonal fact computations referring to a person. The first public application of it was the Seleucid era, dating from Oct., 312 (or, at Babylon, from April 2, 311) B.C.; and this era was accepted by the

Eras. Jews, who maintained it generally down to the eleventh century; in Egypt, however, it survived into the sixteenth century, when Rabbi David ibn Abi Zimra brought about its disuse, while in South Arabia it was used, along with the "aera mundi," even as late as the nineteenth century. For the Temple and the dating of private records there existed the era from the Exodus. Not only is the existence of this era a mathematical conclusion based on the 200 dates in Kings, but it is also definitely indicated in I Kings vi. 1, where the beginning of the construction of Solomon's Temple is assigned to the year 480 of the Exodus era. The Hebrew context is of such characteristic precision that no one can seriously pretend this to be an intentional combination of 12 times 40 years. Why this number and not another? It would be no less absurd to claim that the 480 years of the Roman republic (510–30 B.C.) or the equal duration of the Parthian realm (256 B.C.–225 C.E.) had been assumed only in order to have the product of 12×40 , or 60×8 . The question to be decided is whether the date then obtained for the Exodus—viz., 1492 B.C.—is the real one; for whether or not the chroniclers of this period were mistaken as to the epoch or the era is quite a different matter for examination. Most of the eras in use assume a conventional starting date which is not accurately that of the event from which the name is derived. The Dionysian era of the birth of Jesus, perhaps the Mohammedan one of the Hegira, or flight of the prophet from Mecca to Medina, the Jewish one of the Creation, besides some 150 other modes of starting a chronological series, are illustrations of this common practise.

The months in the era employed by the Biblical chronographers were counted from Nisan, the first month, to Adar, the twelfth, or We-Adar, the thirteenth. On the other hand, it is found that Biblical texts in giving the years of the kings commence with the dates of their accession to the throne, just as the kings of England and the popes determine

their regnal years. Thus in II Chron. xxix. 3 the reference to the first day of the first month in year 1 of Hezekiah is not to the day of his accession, but to the first of Nisan of the first year of his reign; that is, according to the modern computation, March or April, 726 B.C. If the date of 1492 for the Exodus is correct, the starting date for the annals is 767 B.C. By this system it is possible to assign with certainty the destruction of the First Temple to Sunday, Aug. 27 (Julian), 587 B.C. (9413; astronomical day 1,507,261); that is, the 9th of Ab of the year 906 of the era of the Exodus.

The Biblical figures are given in the n th year; that is, from the accession to the throne down to the event there had elapsed $n - 1$ year plus a fraction of a year, which fraction is expressed by a Greek letter. For instance, Uzziah reigned fifty-two years; in his fifty-second year Pekah of Israel was king; and Uzziah died in the second year of Pekah. This example, among many similar ones, shows mathematically that the beginning of the royal years can not be the same. The problem may be stated as follows:

Uzziah reigned before Pekah..... $51 + \alpha$
 Uzziah reigned simultaneously with
 Pekah..... $1 + \beta$

Total length of Uzziah's reign..... $52 + (\alpha + \beta)$ years

where the sum of the fractions α and β does not amount to one-half.

All the Biblical calculations start from a different date, the date of accession; and the agreement of all these figures proves that the original date must have been changed to conform with the fixed harmonizing scheme of the annalist, the synchronous tables of the kings' reigns.

Jewish chronology includes: (1) the non-chronological, mythical numbers of Genesis; and (2) the real chronology, from the Exodus to the end of the Jewish dominion (1492 B.C. to 70 of the common era).

The Non-Chronological, Mythical Numbers of Genesis: The figures of Genesis, handed down in their original form by the Hebrew texts followed by the Vulgate, are the results of a fictitious reduction of the enormous numbers put forth by the Chaldeans, the Egyptians, and the Hindus. The Jews and Greeks were not willing to admit that the world had been created long before their appearance in history. The original figures of one of the systems named were reduced to a certain scale. Only one of the Chaldean systems, preserved by the fragments of Berossus, is known. It is probable that his figures are those of the Babylonian school; while those of Sippara and Orchoë had possibly other units of time to express the same original arithmetical numbers.

The Creation: One of the Chaldean schools assumed seven periods, each of 240,000 years; that is, 1,680,000 years. Each period of 10,000 years is measured by an hour of the seven days which comprise Creation in Genesis ($168 = 7 \times 24$).

From the Creation to the Deluge: The Chaldeans admitted the eternity of the world without any beginning; but the existing astronomical bodies had a commencement. For the time from the creation

of these to the great cataclysm, or the Deluge, they assumed a sexagesimal unit, the number of the seconds of the day: $60 \times 60 \times 24$, or 86,400 units. The unit of the Babylonian school was 60 months, or 5 years; that is, 432,000 years. The Hindus fix the unit at 5,000 years, or 432,000,000. The Jews reduced this to 86,400 weeks, or 1,656 years; that is, 72 periods of 23 years each. The 23 years give just 8,400 days, or 1,200 weeks; the unit of 72 periods being divided into three unequal parts, containing respectively 20, 18 (which is one-fourth of 72), and 34 periods of 1,200 weeks or 23 years each. The number 23 is found in the number resulting from adding the years elapsing between the births of father and son in the three groups given in Gen. v., namely:

- (1) Adam, Seth, Enos, Cainan, and Jared: $130 + 105 + 90 + 70 + 65 = 460 = 20 \times 23$, or $20 \times 1,200 = 24,000$ weeks.
- (2) Mahalaleel, Enoch, Methuselah: $162 + 65 + 187 = 414 = 23 \times 18$ (the fourth of the period, as in the Chaldean) = $1,200 \times 18 = 21,600$ weeks.
- (3) Lamech: $182 + 600 = 782 = 23 \times 34 = 40,800$ weeks.

The corresponding Babylonian figures relating to the ten antediluvian kings are:

The first three together.....	93,600 years = 18,720 lustra
The following two together, 108,000 "	= 21,600 "
The remaining five (?).....	230,400 " = 46,080 "
	<hr/> 432,000 " = 86,400 "
The Bible has.....	86,400 weeks
The Chaldean texts have.....	86,400 lustra

The three periods correspond to legends now altogether lost, as the chronological tables in Genesis show.

The postdiluvian times down to the end of Genesis include:

From the Deluge to the birth of Abraham....	292 years
From the birth of Abraham to the end of Genesis.....	361 "
	<hr/> 653 "

These 292 and 361 years are the reduction to one-sixtieth of the Berossian figures, which give:

For the first two kings.....	5,100 years
For the 86 following.....	34,080 "
	<hr/> 39,180 "

These 39,180 years are composed of 12 Sothic periods of 1,460 years, and of twelve lunar periods (Assyrian, "tupkot nannar") of 1,805 years. After 1,805 years the eclipses recur in the same order; and this cycle was known to the Chaldeans, not by calculation, but by actual observations and registrations of eclipses during centuries and millennia.

The Babylonian figures are controlled by the sexagesimal notation of sosses ("shushi" = $\sigma\upsilon\sigma\sigma\sigma$) of 60, ners ("neru" = $\nu\eta\rho\sigma$) of 600, and sars ("shar" = $\sigma\acute{\alpha}\rho\sigma$) of 3,600 years. There are thus:

12 Sothic periods of 1,460 years = 17,520 years, or 292 sosses
12 lunar " " 1,805 " = 21,660 " " 361 "

The Biblical number of 292 years, quoted by Josephus ("Ant." i. 6, § 5) comprises the nine generations from Arphaxad to Terah, the father of Abraham; namely:

$2 + 35 + 30 + 34 + 30 + 32 + 29 + 30 + 70 = 292$ years.

In order to obtain the necessary 292, Terah must have reached his seventieth year before begetting Abraham.

From the birth of Abraham to that of Isaac....	100 years
From the birth of Isaac to that of Jacob.....	60 "
From the birth of Jacob to that of Joseph.....	91 "
Lifetime of Joseph, end of Genesis.....	110 "
	<hr/>
	361 "

In order to secure the total of 361 years which the system required, Joseph must be given neither more nor less than 110 years.

Besides this computation of generations, there existed another, originally quite independent thereof, enumerating only the years of life of each ancestor. These numbers referring to the length of life might have been derived from Babylonian statements; but the almost complete destruction of cuneiform historical documents has removed all tradition of this kind. It must be remarked that the prime number 23 is also found in the sums of this series, a phenomenon which is probably to be explained by assuming that some analogous fact existed in the Chaldean mythology.

The Biblical sums are as follows:

From Adam to Cainan	3,657 = 23 × 159 years
From Mahalaleel to Shem.....	5,520 = 23 × 240 "
From Arphaxad to Jacob.....	2,896 = 23 × 126 "
	<hr/>
	12,075 = 23 × 525 "

It is, of course, very strange that these 12,075 years should be equal to $525 \times 1,200$ weeks, or 630,000 weeks; that is, the result of 70, 90, and 100. It would correspond to a Babylonian epoch of 3,150,000 years.

These two different traditions have been combined by the redactors of the Biblical text, in order to explain the now lost legends of the antediluvian and postdiluvian times of the Jewish people. An exact scrutiny of the figures as they are found in the present form of the text provides the basis for very singular and awkward results, of which Biblical tradition compels acceptance, and which have during many centuries caused numerous falsifications and discussions.

CHRONOLOGY OF GENESIS.

ANTEDILUVIAN PERIOD, 86,400 WEEKS.

First part. 24,000 weeks.

POSTDILUVIAN PERIOD, 653 SOSSES, REDUCED TO 653 YEARS.

First part, from the Deluge to the birth of Abraham.
No one dies.

Second part, from the birth of Abraham to the end of Genesis,
361 sosses reduced to 361 years. All die.

These figures had been known for centuries. Shem survived Abraham; therefore legends pretend that Melchizedek was really Shem and had handed down the antediluvian traditions. The antediluvian times produced a great many traditions that have been altogether lost. In the first fortunate period nobody died; in the second, death may have been threatened; in the third, all men perished, and the aged Methuselah died in the actual year of the Deluge.

The combination of the two systems has produced considerable bewilderment among subsequent translators and exegetes. The LXX., to avoid awkward chronological results, hit upon the expedient of falsifying the real figures, by adding to each of the post-Semitic personages 100 years. Instead of 2 they have 102; for 35 they substituted 135; and so on.

When this chronology of cycles was invented, it is idle to discuss. It is highly possible that it arose during the time of the First Temple; and there is no reason for bringing its origin down to the post-exilic epoch. Israel and Judah had at this period a systematized chronology; and there had existed, beginning with the seventeenth century B.C., a close connection between Palestine and Chaldea.

Real Chronology: 1. *From the Exodus to the Destruction of the First Temple (1492 to 587 B. C.).*

The first part, the four centuries between the Exodus and David (1492-1047), can not be fixed with certainty. The duration of the several judges' reigns is involved in doubt, and arguments can not be advanced with the slightest hope of success; for the needed documents are wanting. With David commences a sound and really historical chronology. The two hundred chronological dates handed down by the books of Samuel, Kings, and Chronicles are, with one or two exceptions (*e.g.*, the twelfth year of Ahaz, instead of the thirteenth year; see II Kings xvii. 1), of remarkable consistency. In a few cases, again, the figures are rightly given, but are by the present text attributed to some other event, owing to the transposition of the fragments of records saved from destruction at the fall of the First Temple. For example: the fourteenth year of Hezekiah is not the year of the expedition of Sennacherib, but that of the sickness of Hezekiah and of the embassy of Merodach-baladan, King of Babylon. The twenty-seventh year of Jeroboam II., King of Israel (II Kings xv. 1), is mentioned as the first year of Uzziah, in flagrant contradiction to all the statements of the previous chapter, which makes it correspond with the fifteenth or sixteenth year.

Intentional mutilation of the text and suppression of all notice of the temporary suspension of the independence of the kingdom of Israel by the Syrians are the real cause of the larger number (15 or 16) given in ch. xiv.: the end of that chapter, and Isa. vii. 3, which can not be understood otherwise, indicate clearly that for eleven years Jeroboam II. had been expelled from Samaria by the Syrians. The subsequent passages have been ruthlessly altered, in order to obviate the slightest mention of this cessation of Israel's realm. A similar mutilation has been practised at the end of ch. xv., where the interruption of Pekah's reign for nine years, and his supersession by Menahem II. mentioned in the Tiglath-pileser texts, are passed over in perfect silence.

The statements are always to be analyzed in the only possible mathematical manner: *i.e.*, by the formula that the *n*th year signifies *n*-1 years and a fraction of a year after the event.

For the absolute fixation we have the solar eclipse of the eponym "Isid-seti-igbi," June 13, 809 B. C., 91 years before which occurred the battle of Karkor, during Ahab's lifetime, and 78 years before which Jehu sent his tribute to Shalmaneser III. of Nineveh.

The eponymic tablets and the Babylonian chronicle fix the date of the downfall of Samaria as Jan., 721 B. C.

The two eclipses of the year 7 of Cambyses (523-522 B. C.) fix the date of Nebuchadnezzar's accession as May-June, 605 B. C., and the date of the delivery of Jehoiachin by Evil-merodach, son of Nebuchadnezzar, as the 27th (II Kings xxv. 27) or 25th (Jer. lli. 31) of Adar, either Sunday, Feb. 29, or Tuesday, March 2, 561 B. C.

These starting-points admit of the establishment of the chronology with certainty in the following manner—the only one possible—without alterations of the text in the historical documents:

KINGS OF JUDAH.

David.....	1047-1017	Amaziah.....	840-811
Solomon.....	1017-978	Uzziah or Azariah....	811-758
Rehoboam.....	978-960	Jotham.....	758-742
Abijam (Abijah)....	960-958	Ahaz.....	742-727
Asa.....	958-917	Hezekiah.....	727-698
Jehoshaphat, alone...	917-895	Manasseh.....	698-642
Jehoshaphat and Jo-		Amon.....	642-640
ram.....	895-892	Josiah.....	640-609
Joram alone.....	892-888	Joahaz.....	609-608
Ahaziah.....	888-887	Jehoiakim.....	608-598
Athaliah (Queen)....	887-881	Jehoiachin.....	598-587
Joash.....	881-840	Zedekiah.....	587-586

Destruction of the Temple, Sunday, Aug. 27, 587 B. C.

KINGS OF ISRAEL.

Jeroboam I.....	977-956	Domination of Syria..	799-788
Nadab.....	956-955	Jeroboam II., second	
Baasha.....	955-932	reign.....	788-773
Elah.....	932-931	Zachariah (six months)	773-772
Zimri (seven days)...	931	Shallum (one month)...	772-771
Omri with Tibni.....	931-927	Menahem I.....	772-761
Omri, alone.....	927-920	Pekabiah.....	761-759
Ahab.....	920-900	Pekah, first reign....	759-744
Ahaziah.....	900-899	Menahem II., under	
Joram.....	899-887	the Assyrian Tig-	
Jehu.....	887-859	lath-pileser.....	744-735
Jehoahaz.....	859-842	Pekah, second reign..	735-732
Joash.....	842-825	Hoshea.....	732-721
Jeroboam II., first			
reign.....	825-799		

Destruction of Samaria, Jan., 721 B. C.

The great chronologists of the seventeenth century have long pointed out the apparent discrepancy between the statements of the duration of the reigns of Jeroboam II. and Pekah and the time resulting from the synchronisms. But there is no error. Indeed, between the commencement and the end of the reign of Jeroboam II. fifty-two years elapsed; but during eleven of these he was superseded, and his de facto occupation of the throne counts only forty-one years, as the Biblical text affirms. Similarly Pekah reigned only twenty years in Samaria, although twenty-nine intervened between his accession and his death.

2. *From the Destruction of the First Temple to that of the Second under Titus (587 B. C. to 70 of the Common Era).*

The important events and dates are as follows:

B. C.	
587-168	Loss of Jewish independence.
538	Decree of Cyrus, King of Babylon, signed Oct., 538, allowing the Jews to return to Palestine.
473	Institution of the Feast of Purim under Xerxes (Ahasuerus); troubles in Palestine caused by the enemies of the Jews.
398	Ezra, under Artaxerxes Mnemon.
385	Nehemiah's second organization. Government of the high priest.
332	Alexander subdues Palestine.
312	Establishment of the Syrian power.
170	Antiochus IV. (Epiphanes) plunders Jerusalem. The Jews lose their independence, 168 B. C. to 6 C. E.
168	Mattathias the Hasmoncan or Maccabean.
58	Herod supersedes the Hasmoncans.
4	Early in April, death of Herod, and division of Palestine into four independent provinces.
C. E.	
6	Judea a province of Rome.
69	Revolt of the Jews.
70	Sunday, Aug. 5, destruction of the Second Temple.

(II.) **Biblical:** In this article there will be briefly given (1) the methods used for dating events and periods in the Old Testament; (2) the scientific data upon which the most reliable chronological system has been founded; and (3) the most valuable results in the fixing of important dates.

1. **Methods of Dating:** Two main stages may be distinguished in the attempts made by Bible writers of the various periods to indicate the times of occurrence of events. The first is that in which the narrator chooses any one out of a number of well-known events as a time-mark; and the second is that in which an authoritative system is assumed as already prevailing.

Unsystematic Usages: Reference is made to: (a) a memorable phenomenon of nature; thus Amos (i. 1) dates from an earthquake (compare Zech. xiv. 5); (b) a great national movement; thus, the establishment of the Hyksos dynasty in Egypt is marked by the building of the city of Zoan (Num. xiii. 22); (c) a decisive military movement, as the expedition of Sargon of Assyria against Ashdod (Isa. xx. 1); (d) the death of a king of the writer's country, as of Uzziah or of Ahab (Isa. vi. 1, xiv. 28).

A Conventional System: Such devices as the above-named could have only local vogue and value. Familiarity with the businesslike methods of outside communities, especially in the days of the later kings and during the Exile, led to the adoption of a methodical scheme for the dating of events. The decisive epoch was the period between Isaiah and

Jeremiah, when the Judahites were completely under Assyrian domination. Dates are attached to several individual prophecies of Jeremiah; and the statements are, for the most part, of contemporary origin (Jer. xxvii. *et seq.*). The point of departure in the reckoning is the beginning of the reign of the then King of Judah, sometimes with the addition of the regnal year of the great King of Babylon, Nebuchadnezzar (*e.g.*, xxxii. 1). A little later Ezekiel's prophecies were regularly dated, as was natural to a writer living in Babylonia. In accordance with the same custom several of the prophetic books were furnished with headings indicating the limits of the professional careers of the authors. But these were added by later editors.

More systematic and extensive are the chronological data of the books of Kings and Chronicles, where, throughout the history of the divided kingdoms, are found not only the lengths of the reigns of the several rulers, but the dates of their accessions, in two separate series of synchronisms. Thus it is said: "In the twentieth year of Jeroboam king of Israel began Asa to reign over Judah. . . . Forty and one years reigned he in Jerusalem" (I Kings xv. 9, 10). Many of the numbers given, especially the synchronisms, are erroneous, as is proved by the fact that no attempt to harmonize the two series has been successful [see, however, CHRONOLOGY (I.)]. The sum of the years of the kings of Israel from the schism to the Exile is 242; while that of the years of the kings of Judah for the same period is 260. Startling inconsistencies are also found where

the several synchronisms for the same king are worked out. Thus, for the accession of Ahaz of Judah one has to choose between 727,

The Dates Assigned to Ahaz. 720, and 715 B.C., according as one set of data or another is followed. Inferential evidence points conclusively to the fact that all of these numbers were inserted, as a separate part of the narrative, in the editorial period that followed the loss of Jerusalem. It is equally certain that the synchronisms were a matter of independent calculation. But there is good reason to believe that if the regnal years were not found in surviving royal annals, they were at least preserved by a fairly reliable tradition supported in part by documentary testimony. By the help of Assyrian data they may be used with a fair degree of accuracy.

One step backward beyond the division of the kingdom, Solomon, David, and Saul are each credited with a reign of forty years. This suggests a conjectural systematization. The hypothesis is strengthened by the frequent occurrence of the number forty in numerations made for still earlier personages and events. Indeed, the summation of the years between the Exodus and the beginning of Solomon's Temple, found in I Kings vi. 1, has been plausibly conjectured to be made up of twelve generations, each of forty years. The number 480 thus given is, however, too large by one-half; since the Exodus can not have occurred much before 1200 B.C., and the Temple was built about 960 B.C.

For the chronology of the long period before Moses there are no sure data, since the numbers of the Masoretic text differ widely from those variously given by the Septuagint, the Samaritan Pentateuch, and the Book of Jubilees (first century C.E.). In the Masoretic data there are, moreover, several artificial schemes of systematization.

For the details of these any good modern commentary on Genesis or special treatise on Bible chronology may be consulted.

2. **Scientific Data:** All chronological accuracy depends upon the fulfilment of two conditions. To ascertain or verify the date of any event there must be a fixed point of departure, from which or to which the event in question is to be reckoned. Again, the data from which the time of the event is inferred must be adjusted to a connected system of time-reckoning reliable throughout. In other words, some ancient authority, referring to an established scheme or system, must have made a notation of the event itself or of something synchronous with it.

The Babylonians, and their kindred and disciples, the Assyrians, were the only people of Oriental antiquity who duly kept such a required Babylonian system of time-notation. It is to them that the current divisions of time generally, as well as the beginnings of mathematics and astronomy, are due.

They had already in their earliest recorded history the sense of number and computation. The Hebrew writers were still working with

round numbers and employing primitive and uncertain eras thousands of years after the Babylonians had begun to keep their sacred and public records by separate and successive years and to preserve the results for later reference or tabulation.

Naturally, most is gained for Biblical chronology from the synchronisms with contemporary Assyrian or Babylonian history. Of special importance are those available for the period of the kings of Israel and Judah, when the relations with Assyria were close and continuous, and at the same time the Biblical data are most abundant. There

are three main sources of information **Helpful** in the inscriptions. One is the royal **Cuneiform** annals, in which events are often described as occurring in a given year of the king's reign, or in the year of office of a given eponym. The second is the lists of such eponyms as were chosen successively from among Assyrian rulers of different grades to mark their respective years, which were accordingly called by their names. These lists are preserved in more than one form; and by combining them it is possible to make up a complete series for the period 893-666 B.C., as well as for shorter intervals both before and after. Their accuracy has been confirmed by every possible check. Not only historical events, but business documents also, were dated by the years of the proper eponyms. The third aid of this kind consists of lists of kings in the order of their succession, with the lengths of their several reigns, as well as brief summaries of important events, usually referred to by modern scholars as "chronicles."

An instance of the application of Assyrian data to Old Testament chronological problems may be given here. Shalmaneser II., who reigned 860-825 B.C., describes frequent expeditions to Syria and Palestine, and mentions by name Ahab and Jehu of Israel. He relates that in the year of his reign which is found to correspond

to 842 B.C., he received tribute from Jehu. Presumably this was at the accession of Jehu, who would be anxious to secure support for his new pretensions; but this is only a conjecture. He mentions, also, that in 854 he fought a great battle against a league of western rulers, among whom were Ahab of Israel and Ben-hadad of Damascus. The history of Ahab, as given in the Bible, indicates that there was only one occasion on which Ahab and Ben-hadad could have made such a league with each other; namely, in the brief period between the peace of Aphek (I Kings xx. 34) and the death of Ahab in the third year thereafter (*ib.* xxii. 2 *et seq.*). The middle year of this interval suggests itself as the date of the league, 854 B.C. Ahab, therefore, must have died in 853 B.C. According to the narrative in Kings, Jehu came to the throne in the twelfth year thereafter; that is to say, in 842. Using with necessary caution the Biblical numbers, one may now reckon backward and forward from these dates and obtain a fairly correct chronology of the whole period from the schism to the close of the Exile.

3. Results: The following are some of the most important dates which have been ascertained from combinations and inferences made upon the

principles set forth above. Others had already been learned by the aid of Greek writers, especially Ptolemy.

B.C.	B.C.
934 Division of the kingdom.	733 Damascus and Samaria taken by Tiglath-pileser. Part of Israel deported.
886 Omri made King of Israel. Samaria founded.	722-21 Fall of Samaria. Deportation of people by Sargon of Assyria, who acceded in Jan. 721.
855 Peace with Damascus.	
853 Death of Ahab.	
842 Jehu made king and pays tribute to Assyria.	
797 Damascus taken by the Assyrians.	
763 Amos prophesies.	567 Nebuchadnezzar invades Egypt.
738 Isaiah prophesies. Death of King Uzziah. Northern Israel tributary to Tiglath-pileser III.	539 In July, Babylon taken by Gobryas the Mede, general of Cyrus. In October, Cyrus himself enters the city.
734 Judah under Ahaz pays homage to Assyria.

J. F. McC.

—**Post-Biblical:** The chronological system of the Jews was derived, like most of their science, from the Greeks. They used the "minyan shefarot" (era of contracts, really the Seleucid era, dating from 312 B.C.) till the Middle Ages, when the method of reckoning from the creation of the world was introduced—probably by the later geonim, as it was employed by R. Sherira (987 C.E.). This era begins with the year corresponding to 3760 B.C. Maimonides on occasions used no less than three eras, as in the Mishneh Torah (Shemittah, x. 4): "In the year 1107 of the destruction of the Temple, 1487 of the Seleucid era, 4936 of the Creation." For a short time the era of the Hasmoneans, dating from the autumn of 143 B.C. (see I Macc. xiii. 41-42), was in use. See ERA.

The dates recorded according to these various eras are based in Jewish chronology on certain estimated intervals between important events in post-Biblical Jewish history. These intervals are given in 'Ab. Zarah 9a, 10a (probably derived from Seder 'Olam Rabbah, xxix.), which counts 34 years from the Second Temple to Alexander; 180 for the Greek empire; 103 from the beginning of the Hasmonean dynasty under John Hyrcanus (135 B.C.) to Herod; 103 from Herod to the destruction of the Temple; making in all 420 years. According to this reckoning, the era of contracts is placed six years after that of Alexander, the interval between whose appearance in Palestine and the destruction of the Second Temple is much less than in reality. The date of the accession of Herod is placed two years too late; and that of the destruction of the Temple is fixed at 68, which is, of course, two years too early. Loeb ("Revue Etudes Juives," xix. 202-205) has ingeniously explained these discrepancies as due to a desire on the part of R. Jose, the author of the Seder 'Olam Rabbah, to make them agree with the prediction of Dan. ix. 24 *et seq.*, that seventy weeks (of years), or 490 years, would elapse between the Return from

the Exile and the destruction of the Second Temple. As the Exile was assumed to last seventy years, in accordance with Jeremiah, this left 420 years from the Return (537 B.C.) to the destruction of the Temple (70 C.E.), a discrepancy of 187 years. This is got rid of in part by making the Persian domination last 34 instead of 204 years (537-333 B.C.). This was done in order to make the interval between the Exodus and the era of contracts exactly 1,000 years.

Owing to these discrepancies, great confusion exists in the annals of the Jewish chroniclers, who have generally tried to combine the dates recorded by their predecessors with those of more recent events, using the era of creation almost exclusively (see I. Loeb, "Josef Haccohen et les Chroniqueurs Juifs," Paris, 1888, reprinted from "Revue Etudes Juives," xv., xvi.); and it is dangerous to trust to their lists unless checked by contemporary annals. In the subjoined chronological table the dates of the most prominent events of Jewish history have been derived from Henrietta Szold's "Tables of Jewish History" in the index volume (pp. 104 *et seq.*) of the American edition of Graetz's "History of the Jews." For events of lesser importance the sources are in almost every case the local annalists as utilized by the historians of the Jews in the respective countries. Particular attention has been given to the successive stages of legislation, while only selections have been made from the many cases of autos da fé, blood accusations, expulsions, host-tragedies, and acts of emancipation, for all of which complete lists are given in separate articles under the respective headings.

In contradistinction to the usual custom, but few literary events have been included in the table, only those works which have affected the public opinion of the non-Jewish world having been regarded as of more direct historic importance. The ruling principle has been to confine the list to strictly historic events; *i.e.*, to incidents affecting either directly or indirectly the relations of the Jews to the states in whose territories they have dwelt. Incidents affecting merely the internal concerns of the Jewish communities have not, as a rule, been included.

A JEWISH CHRONOLOGY FROM THE DESTRUCTION OF JERUSALEM TO THE YEAR 1902.

- C.E.
- 70. Jerusalem besieged and conquered by Titus; the Temple destroyed.
 - 72. Judea completely conquered; the "Fiscus Judaicus" instituted by Vespasian.
 - 115. The Jews of Babylonia, Palestine, Egypt, Cyprus, Cyrene, and Libya rise against Trajan.
 - 118. The Jews of Palestine rise against Trajan and Hadrian; "War of Lucius Quietus."
 - 133. Rebellion of Bar Kokba against Hadrian; restoration of the Jewish state.
 - 135. Fall of Bethar; end of Bar Kokba's rebellion.
 - 161. Revolution in Palestine against Antoninus Pius.
 - 280. Judah III., son of Judah II., patriarch, collects a tax from foreign communities.
 - 306. Council of Elvira forbids Christians to eat with Jews or to intermarry with them.
 - 325. First Nicene Council separates the celebration of Easter from that of the Jewish Passover.
 - 339. Constantius forbids, under penalty of death, marriage of a Jew with a Christian woman, and circumcision of slaves.

- 361. Restoration of the Temple at Jerusalem undertaken under Julian the Apostate.
- 362. Julian the Apostate abolishes the Jew tax.
- 400. Moses, the false Messiah of Crete.
- 415. Cyril, Bishop of Alexandria, drives the Jews from Alexandria.
- 418. (March 10) Jews excluded from all public offices and dignities in the Roman empire.
- 425. Extinction of the patriarchate.
- 455. Persecution of the Babylonian Jews under Yezdegerd III.
- 465. The Council of Vannes (Gaul) prohibits the clergy from taking part in Jewish banquets.
- 471. Persecution of the Babylonian Jews under Firuz (Perozes); the exilarch Huna Mari and others suffer martyrdom.
- 500 (*circa*). Abu-Kariba, Himyarite king, adopts Judaism, and converts his army and his people.
- 511. Mar-Zutra II., prince of the Captivity (exilarch), establishes an independent Jewish state in Babylonia under the Persian king Kobad.
- 516. (May 14, 15) Uprising against Jews of Clermont; synagogue destroyed.
- 517. The Council of Epaon forbids Christians to take part in Jewish banquets.
- 518. Persecution of the Jews by Kobad, King of Persia.
- 532. Justinian I. decrees that the testimony of Jews shall be valid only in Jewish cases.
- 537. Justinian declares Jews incapable of holding any official dignity.
- 538. The Council of Orleans forbids Jews to appear on the street at Eastertide.
- 589. Reccared, Visigothic King of Spain, completely isolates Jews from Christians.
- 612. Sisebut, Visigothic king, forces the Jews to accept baptism or to emigrate.
- 624. The Banu Kainuqa'a, a Jewish-Arabic tribe, driven from Arabia by Mohammed.
- 627. Emperor Heraclius forbids Jews to enter Jerusalem, and in other ways harasses the Palestinian Jews.
- 629. Dagobert orders the Jews of the Frankish empire to accept baptism or to emigrate.
- 633. The Council of Toledo under Sisenand, Visigothic king, and Isidore of Seville, forces converts to Judaism back to Christianity.
- 638. Chintila enacts that only professing Catholics shall remain in Visigothic Spain; Jews emigrate.
- 640. Omar, the second calif, banishes all Jews from Arabia; the "Pact of Omar" imposes restrictions upon Jews in the whole Mohammedan world.
- 641. Bulan, khan of the Chazars, becomes a Jew.
- 658. Beginning of the Gaonate; Mar-Isaac, head of the Sura Academy, takes the title "Gaon."
- 694. (Nov.) All Jews in Spain and Gallic Provence declared slaves; children under seven forcibly baptized.
- 720. Omar II., Ommiad Calif of Damascus, reenacts the "Pact of Omar."
- 721. Appearance of the false Messiah Serenus in Syria causes many Spanish Jews to emigrate to Palestine.
- 761. The Karaite schism led by Anan ben David.
- 797. Isaac sent by Charlemagne on an embassy to Harun al-Rashid.
- 814. "Capitula de Judeis" of Charlemagne and Ludwig decide that Jews should not have Church utensils in pledge.
- 827 (*circa*). Eberard, "Magister Judæorum" under Louis I. the Pious, king of the Franks, protects the Jews against Agobard, Bishop of Lyons.
- 845. The Council of Meaux, under Amolo, Bishop of Lyons, enacts anti-Jewish decrees, renewing those of Constantine and Theodosius II.
- 850. Al-Mutawakkil orders the "Peoples of the Book" to wear yellow kerchiefs.
- 878. Ibrahim ibn Ahmad orders Jews of Sicily to wear a badge.
- 982. (July 13) Kalonymus saves life of Otto II. after battle of Cotrone.
- 1007. Persecution at Rouen by Robert the Devil.
- 1012. (Nov.) Jews driven from Mayence by Emperor Henry II.
- 1013. (Apr. 19) Massacre at Cordova by soldiers of Sulaiman ibn al-Hakim.
- 1021. Al-Hakim renews the "Pact of Omar" in Egypt.
- 1066. Banishment of the Jews from Granada.
- 1078. Pope Gregory VII. (Hildebrand) promulgates canonical law against Jews holding office in Christendom.
- 1079. Jews repulsed from Ireland.
- 1085. Pope Gregory VII. protests against Jews being placed by the King of Castile in authority over Christians.
- 1090. "Fuero" (decree) of Alfonso VI. appoints duel as means

- of settling litigation between Christian and Jew. (Feb. 19) Henry IV. grants to Judah ben Kalonymus and other Jews of Speyer protection to life and property.
1096. First Crusade; Jews massacred along the Rhine and elsewhere.
1099. The Jews of Jerusalem burned in a synagogue by the Crusaders under Godfrey of Bouillon.
1103. (Jan. 8) The "Constitutio Pacis" of the imperial court at Mayence assures the Jews of the "emperor's peace."
1108. Massacre at Toledo.
1117. Persecution at Rome; appearance of a false Messiah at Cordova.
1120. Calixtus II. issues bull "Sicut Judæis," the charter of the Roman Jews.
1124. Ladislaus I. of Bohemia decrees that no Christian shall serve Jews.
1144. Alleged martyrdom of St. William of Norwich (first case of blood accusation).
1146. Second Crusade; Jews massacred throughout France and Germany. Beginning of the Almohad persecution in northern Africa and southern Spain; Jews flee, or pretend to accept Islam.
1150. Statutes of Arles appoint a special Jewish oath.
1156. Jews of Persia persecuted on account of pseudo-Messiah, David Alroy.
1168. Latins and Greeks, Jews and Saracens, granted right of being judged by their own laws in Sicily.
1171. Thirty-one Jews and Jewesses of Blois burned on the charge of having used human blood in the Passover.
1172. Persecution of the Jews of Yemen. Messianic excitement.
1174. Sultan Nureddin Mahmud removes all Jews of Syria and Egypt from public offices.
1178. Riot at Toledo, at which Fermosa, the Jewish mistress of Alfonso VIII., is killed.
1179. The third Lateran Council passes decrees protecting the religious liberty of the Jews. (Aug.) Jews of Boppard and neighborhood slain because body of Christian woman is found on banks of Rhine. Jews expelled from Bohemia.
1182. (April) Philip Augustus of France banishes the Jews from his hereditary provinces and takes one-third of their debts.
1189. Attack on the Jews of London at coronation of Richard I.
1190. (May 17) Self-immolation of 150 Jews at York to avoid baptism.
1194. "Ordinances of the Jewry" passed in England for registering Jewish debts, thus preparing the way for the exchequer of Jews.
1198. Jews permitted to return to France by Philip Augustus on payment of 15,000 livres in silver.
1200. Bishop Conrad of Mayence issues a formula for an oath in German for Jews of Erfurt.
1205. (July 15) Innocent III. writes to Archbishop of Sens and Bishop of Paris laying down the principle that Jews are bound to perpetual subjection because of the Crucifixion.
1209. Council of Avignon issues restrictive measures against the Jews. (July 22) French Jews attacked and plundered; 200 murdered.
1210. (Nov. 1) The Jews of England imprisoned by King John.
1211. Many French and English rabbis emigrate to Palestine.
1212. The Jews of Toledo killed by Crusaders under the Cistercian monk Arnold; first persecution of Jews in Castile.
1215. Magna Charta of England limits rights of the crown in Jewish debts to the principal. Fourth Lateran Council under Pope Innocent III., among many anti-Jewish measures, decrees the Jew badge.
1221. Jews killed at Erfurt.
1222. Golden Bull of Hungary refuses Jews the right to hold public office. Council of Oxford imposes restrictions on the English Jews.
1223. (Nov. 8) Rabbinical Synod of Mayence regulates the payment of the Jewish taxes.
1227. Council of Narbonne reenacts the anti-Jewish decrees of the fourth Lateran Council.
1230. (Dec.) "Statutum de Judeis" in France by Louis IX. prohibits Jews from making contracts or leaving their lords' lands.
1234. (Dec. 10) Jews of Fulda find a murdered Christian; 261 Jews killed in consequence.
1236. Frederick II. takes Jews of Sicily under his protection as being his "servi camerae" (first use of this term).
1240. (June 25) Disputation before Louis IX. of France between Nicholas Donin and the Jews represented by Jehiel of Paris, Moses of Coucy, Talmudist and itinerant preacher, and two others.
1241. (May 24) Riot at Frankfort on account of a Jewish convert. Jewish Parliament summoned to Worcester, England.
1244. Archduke Frederick II. the Valiant, of Austria, grants privileges to the Jews ("Privilegium Fredericianum"). Twenty-four wagon-loads of Talmuds and other manuscripts (1200) burned at Paris.
1246. James I. of Aragon, in the Ordenamiento of Huesca, declares Jews to be "in commanda regis." Council of Béziers forbids Jews to practise medicine.
1254. (Dec.) Louis IX. expels Jews from France.
1255. (July 31) St. Hugh of Lincoln disappears, and the Jews are accused of murdering him for ritual purposes.
1259. Jahudan de Cavalleria becomes "bayle-general" and treasurer of Aragon. Provincial council of Fritzlar for province of Mayence repeats several of the canonical restrictions, including the badge (first time in Germany).
1261. Expulsion from Brabant, under will of Henry III., of all Jews except those living by trade.
1263. Disputation at Barcelona between Pablo Christiani and Nahmanides.
1264. Massacres at London, Canterbury, Winchester, and Cambridge by the barons in revolt against Henry III.
1265. (May 2) Persecution at Sunzig; 72 persons burned in synagogue.
1267. (May 12) Synod of Vienna, under Cardinal Guida, orders Jews to wear pointed hats.
1270. (June 23) Persecution at Weissenburg.
1273. (Nov. 4) Jews of Lerida obtain permission to substitute oath by the Ten Commandments for the oath "more Judaico."
1274. (July 7) Gregory X. issues bull against blood accusation.
1275. Jews expelled from Marlborough, Gloucester, Worcester, and Cambridge, at request of the queen-mother.
1280. Alfonso X. orders all Jews of Leon and Castile to be imprisoned till they pay 12,000 maravedis, and 12,000 for every day of delay in payment. English Jews forced to attend sermons of Dominicans.
1285. Blood accusation at Munich.
1286. (June 28) Meir ben Baruch of Rothenburg (1220-86), chief rabbi of Germany, imprisoned when about to emigrate. Sancho of Castile in Cortes of Palencia orders Jews to submit their cases to the ordinary alcaldes (abolition of legislative autonomy). (Nov. 30) Bull of Honorius IV. to archbishops of York and Canterbury against Talmud.
1287. (May 2) All Jews in England thrown into prison.
1290. (Nov. 1) Jews banished from England.
1292. Ritual murder accusation and riot at Colmar.
1294. (Aug. 7) Boiko I. of Silesia grants Jews "Privilegium Fredericianum."
1295. (June 23) Boniface VIII. enters Rome and spurns the Torah presented to him by Jewish deputation.
1297. "Judenordnung" for Brandenburg.
1298. Persecution of the Jews in Germany instigated by Rindfleisch; Mordecai ben Hillel a martyr.
1301. Jews plundered and slain at Magdeburg.
1303. Ordinance of Philip the Fair enacts that all trials between Christians and Jews be decided by regular courts.
1306. First expulsion of the Jews from France under Philip the Fair.
1315. (July 28) Jews recalled to France by Louis X. for twelve years.
1320. The Pastoureaux persecutions in France ("gezerot ha-Ro'im").
1321. The Leper persecution in France ("gezerot mezora'im"). (June 24) Second expulsion of the Jews from France. Five thousand slain in Dauphiné on charge of well-poisoning.
1322. (Pentecost) Talmuds burned in Rome.
1330. Alleged desecration of host at Güstrow.
1334. (Oct. 9) Casimir III. the Great, of Poland, grants Jews "Privilegium Fredericianum."
1334. Host-tragedy at Constance.
1337. (May) Arnulder massacres at Ensisheim, Mühlhausen, Ruffach, etc.
1346. Blood accusation at Munich.
1348. (Feb. 28) The Ordenamiento of Alcaza orders all usury to cease. (July 16) Karl IV. forbids Jews being summoned before the Vehmgericht.
- 1348-49. Persecution of the Jews in central Europe on account of the Black Death. Pope Clement VI. issues two bulls protecting them.

1350. Alfonso IV. of Portugal enforces the badge (first in the Peninsula).
1351. Cortes of Valladolid demands the abolition of the judicial autonomy of Spanish-Jewish communities. Jews burned at Königsberg in Neumark.
1353. Jews invited back to Worms on account of their usefulness.
1360. (Nov.) Samuel Abulafia dies under torture on the charge of peculation. Manessier de Vesoul obtains from King John a decree permitting Jews to dwell in France.
1365. Jews expelled by Louis the Great from Hungary; many go to Wallachia.
1370. All Jews imprisoned and robbed in Austria.
1380. (Nov. 16) Riot at Paris; many Jews plundered, several killed, most fled.
1381. A synod at Mayence regulates the rabbinical marriage laws.
1387. Jews expelled from Basel.
1389. (Apr. 18) The charge of insult to a priest carrying the sacrament leads to the massacre of the Jews in Prague.
1391. (June 6) Spanish horrors begin; Ferdinand Martinez incites the mob against the Jews of Seville; anti-Jewish riots spread throughout Castile and Aragon.
1394. (Nov. 3) Third and last expulsion of the Jews from France, under Charles VI.
1400. Persecution of the Jews of Prague at the instigation of the convert Pessach; Lipmann of Mühlhausen among the sufferers.
1403. (Oct. 25) Juan II. of Castile withdraws civil jurisdiction from Jews.
1405. Jews expelled from Speyer.
1407. (Oct. 28) Jews attacked at Cracow.
1410. (Sept.) Meir Alguaides slain on charge of host-desecration.
1411. Vincent Ferrer raises the populace against the Jews. Second general massacre of Jews in all the Spanish provinces.
1413. (Jan. 7) Religious disputation at Tortosa arranged by Pope Benedict XIII. between Geronimo de Santa Fé and Vidal ben Benveniste ibn Labi and Joseph Albo.
1415. (May 11) Bull of Benedict XIII. against the Talmud and any Jewish book attacking Christianity.
1420. Charges of host-desecration lead to the putting to death of a number of Jews and to the expulsion of the remainder from Lower and Upper Austria.
1423. Jews expelled from Cologne.
1424. Jews expelled from Zurich.
1432. Rabbinical synod at Valladolid. Host-tragedy at Segovia. A synod at Avila, under Abraham Benveniste Senior, provides for an educational system for Jewish Spain.
1434. The Council of Basel renews old and devises new canonical restrictions against Jews. Annihilation of the Jews of Majorca.
1435. Jews expelled from Speyer.
1438. Jews expelled from Mayence.
1440. Jews expelled from Augsburg.
1447. Casimir IV. of Poland grants special privileges to Jews.
1450. Ludwig X. of Bavaria throws all the Jews in forty towns into prison and confiscates their property.
1451. Nicholas de Cusa enforces the wearing of the Jew badge in Germany.
1454. (May 2) Forty-one Jews burned at Breslau, and Jews expelled from Brünn and Olmütz, through Capistrano.
1458. Jews expelled from Erfurt.
1460. (March 5) The states of Austria demand that no Jew be permitted to dwell there. Jews expelled from Savoy.
1464. (Apr. 12) Jews plundered and murdered by soldiers in Cracow.
1467. Eighteen Jews burned at Nuremberg.
1468. Jews expelled from Neisse by the gilds. Blood accusation brought against Jews of Sepulveda.
1469. Jews plundered and slain at Posen.
1470. Jews expelled from bishopric of Mayence.
1475. Bernardinus of Feltre preaches against the Jews in Italy. The Jews charged with the murder of Simon of Trent for ritual purposes. Riots in Padua and elsewhere in Italy and Sicily.
1476. Blood accusation in Regensburg through the convert Wolfram.
1477. Jews plundered at Colmar and burned at Passau; the rest expelled through bishop.
1478. Jews expelled from diocese of Bamberg on account of Simon of Trent affair.
1481. The Inquisition against the Maranos established in Seville and at other places in Castile.
1482. Inquisition established in Aragon; Thomas de Torquemada, chief inquisitor.
1484. Jews expelled from Arles.
1486. (Feb. 12) Auto da fé at Toledo at which 740 were absolved. (Dec. 10) Another auto at same place; 900 Jews "reconciled."
1488. (Jan. 25) First auto at Barcelona. (May 24 and July 30) Autos da fé at Toledo; at former, 21 Jews burned, 400 punished; at latter, 76 burned.
1490. (Dec.) Jews expelled from Geneva.
1492. (Aug. 2) Expulsion of the Jews from Spain.
1494. Jews plundered in Naples. Blood accusation at Tyrrau.
1495. Jews expelled from Florence, but readmitted after a few months on account of their utility; Jews expelled from Lithuania.
1496. Expulsion of Jews from Styria. Manoel of Portugal orders the Jews to accept baptism or leave the country.
1498. The exiles settled in Navarre banished. Jews expelled from Nuremberg and Ulm.
1501. (July) Fifty-four Jews burned at Seville.
1502. Appearance of the pseudo-Messiah Asher Lämmlein.
1503. Pfefferkorn denounces Reuchlin. (March 22) Jews permitted to return to Lithuania. (Dec. 27) Judaizing followers of Zechariah of Kiev burned at Moscow.
1505. Jews expelled from Orange. All slain at Budweis on a child-murder accusation.
1506. Jews settle in Pinsk and secure synagogues and cemetery. Massacre of 4,000 Maranos in Lisbon.
1508. (July 15) Royal decree issued expelling Jews from Portugal.
1510. Burning of Jewish books at Frankfort. Thirty-eight Jews burned in Berlin for host-desecration and child-murder (Grätz, ix. 94).
1516. (March) Venice sets apart a special quarter for a ghetto (first use of the term).
1524. The Jews of Cairo threatened with destruction by Ahmad Shaitan, viceroy of Egypt. Jews return to Genoa.
1529. (May 21) Thirty Jews burned at Pöding on blood accusation. Solomon Molko (Diogo Pires, 1501-32) begins his Messianic agitation.
1530. (Aug. 12) Josel of Rosheim obtains extension of Alsatian privileges from Charles V.
1531. Clement VII. issues a bull establishing the Portuguese Inquisition for Maranos.
1541. Jews expelled from Naples.
1542. Jews expelled from Bohemia because of fires in Prague and other towns.
1543. Luther publishes his attack on the Jews.
1548. (July 10) Eighteen hundred Maranos released from the prisons of the Inquisition in Portugal.
1550. (April 2) Jews banished from Genoa.
1551. Jews expelled from Bavaria and Württemberg.
1554. (June 21) Rabbinical synod at Ferrara.
1555. Paul IV. issues the bull "Cum Nimis Absurdum." Jews expelled from the Palatinate.
1556. Twenty-four Jews of Ancona hanged and burned by order of Paul IV.
1567. Don Joseph Nassi appointed ruler of Naxos and eleven other islands of the Grecian archipelago. (June 15) Jews expelled from Genoa territory.
1568. Isaac Luria Levi (1534-72), cabalist, pretends to be the Messiah, son of Joseph.
1569. (Feb. 26) Bull of Pius V., "Hebræorum Gens," expels Jews from Papal States except Rome, Bologna, and Ancona.
1570. Solomon Ashkenazi sent as an envoy to Venice by Sultan Selim II.
1573. (Jan. 28) The Jew Lippold executed at Berlin; all Jews expelled from Brandenburg.
1576. Stephen Bathori allows the Jews of Poland to carry on trade without restrictions.
1582. Expulsion from Silesia.
- 1586 (circa). The Jews of Poland establish the Council of Four Lands; Mordecai Jafe probably its first president.
1592. (Aug. 17) Papal edict forbids Jews to admit Christians into synagogues, etc.
1593. Clement VIII. expels the Jews from all the Papal States except Rome and Ancona. The first Marano settlement in Holland made at Amsterdam under Jacob Tirado.
1596. Persecution of the Persian Jews by Shah Abbas the Great.
1598. Bet Jacob synagogue consecrated at Amsterdam.
1612. Portuguese Jews granted right of residence in Hamburg.
1614. (Sept. 2) Vincent Fettmilch's attack upon the Jews of Frankfort.
1615. Jews of Worms banished.

1616. Jews return to Frankfort and Worms.
1617. (Jan. 3) "Neue Stättigkeit" for Frankfort makes right of domicile for Jews perpetual.
1629. (June 26) Lippman Heller forced to leave his post as rabbi in Prague.
1632. (April 20) Proselyte Nicolas Antoine burned at Geneva.
(July 4) Auto da fé at Madrid.
1639. Dutch West India Company grants Jews of Guiana full religious liberty.
1642. Six hundred Jews of Amsterdam with Isaac Aboab as hakam settle at Pernambuco.
1646. The Jews in Brazil side with the Dutch in their war with the Portuguese.
1648. The beginning of the Cossack persecutions of the Jews in Poland under Chmielnicki.
1652. Two leagues along the coast of Curaçao granted to David Nassi for a Jewish colony.
1654. (July 8) Twenty-four Jews land at New Amsterdam from Brazil.
1655. (Oct.) Menasseh ben Israel goes to London to obtain from Cromwell the readmission of Jews into England.
1657. (Feb. 4) Resettlement Day; Oliver Cromwell grants Carvajal right of residence for Jews in England.
1659. (Feb. 26) Jews expelled from all the Papal States except Rome and Ancona.
1660. Jews expelled from Kiev by Alexis.
1665. Shabbethai Zebi (1626-1676) publicly accepted as the Messiah at Smyrna.
1667. (Feb. 14) Jews run races at the Roman carnival for the last time.
1670. Jews banished from Vienna and Lower Austria by Emperor Leopold I. Synod of Lithuanian rabbis and deputies settle spheres of jurisdiction in relation to central kahals.
1671. Frederick William, the Great Elector, grants a privilege for twenty years to fifty families driven from Austria.
1678. Appearance of the pseudo-Messiah Mordecai Mashiah of Eisenstadt.
1680. (June 30) Auto da fé at Madrid.
1682. (May 10) Auto da fé at Lisbon.
1686. Jews the victims of the Imperialist soldiery at the recapture of Buda from Turks.
1690. Ninety Jews from Curaçao settle at Newport, R. I.
1695. Jews forbidden to enter Sweden by Charles IX.
1700. The house of Oppenheimer in Vienna attacked by a mob. Eisenmenger attempts to publish his "Entdecktes Judenthum."
1703. Jonas Aaron settles in Philadelphia.
1710. The "Judenordnung" of Hamburg determines the social condition of the Jews of that city.
1716. (July 24-25) Serious uprising against the Jews at storming of Posen.
1727. (April 26) Jews expelled from Russia and the Ukraine by Catharine. (Nov. 15) Act passed by General Assembly of New York permitting Jews to omit "on the faith of a Christian" from oath of abjuration.
1732. (Sept. 2) "Editto sopra gli Ebrei" of Clement XIII. renews all restrictions against Jews of Rome.
1733. (July) Forty Jews from Lisbon arrive at Savannah, Ga.
1738. (Feb. 4) Joseph Süß Oppenheimer executed at Vienna.
1740. (Feb. 3) Charles the Bourbon, King of Naples and of the two Sicilies, invites the Jews back for fifty years. (July 11) Jews expelled from Little Russia by Czarina Anne. Act passed by English Parliament naturalizing Jews settled in the American colonies.
1742. (Dec. 2) Jews expelled from Great Russia by Czarina Elizabeth.
1744. (Dec. 18) Expulsion of Jews from Bohemia and Moravia.
1747. Bull of Benedict XIV. decides that a Jewish child baptized, even against canonical law, must be brought up under Christian influences.
1748. Jews permitted to remain in Bohemia on payment of a "Judensteuer" of 216,000 florins.
1750. (April 17) Frederick the Great issues a "Generalprivilegium" for the Prussian Jews.
1753. Act passed by English Parliament permitting Jews to be naturalized. "No Jews, no wooden shoes" riots in England.
1754. Act granting naturalization to English Jews repealed.
1756. Blood accusation in Jampol, Poland.
1757. Jacob Frank becomes leader of the Shabbethaians. Bishop of Kamenitz-Podolsk orders Talmuds to be burned.
1761. Persecution of Jews in Yemen.
1767. (June 20) Cossacks slay thousands of Jews at Homel.
1772. Jews settle in Stockholm, Karlskrona, and Gothenburg, by favor of Gustavus III.
1776. (Oct. 17) Senatorial decree of Russia grants freedom of settlement and other rights to baptized Jews.
1781. Joseph II. of Austria abolishes the Jewish poll-tax, and grants civil liberties to the Jews.
1782. Joseph II. issues his Toleration Edict.
1787. Frederick William II. removes the "Leibzoll" in Prussia.
1790. The French National Assembly grants citizenship to the Sephardic Jews of Bordeaux. New constitution for Jews of Silesia; a few receive general privileges, etc.
1791. The French National Assembly grants full civil rights to the Jews.
1796. Jews of Holland declared by the National Assembly to be full citizens of the Batavian Republic.
1797. (Aug. 1) Two Jews, Bromet and De Lemon, elected members of the second National Assembly of Holland.
1801. "Leibzoll" removed in Nassau.
1803. Israel Jacobson and Wolff Breidenbach agitate the abolition of the poll-tax for Jews in Germany.
1804. (Dec. 9) "Enactment concerning the Jews" passed by Alexander I. of Russia.
1807. The Great Sanhedrin convened by Napoleon; Joseph David Sinzheim president.
1808. (Jan. 27) Jerome Napoleon issues decree giving full civic rights to Jews of Westphalia. (Dec. 11) Napoleon at Madrid issues decree dividing the French empire into Jewish consistories.
1809. Law of Baden forms Jews into special religious community with all privileges.
1811. The Jews of Hamburg emancipated.
1812. The Jews of Prussia emancipated.
1813. (Feb. 18) The Jews of Mecklenburg emancipated.
1815. (June 8) "Bundesakte" passed at the Congress of Vienna decrees maintenance of status quo in the political condition of the Jews.
1818. First Reform Temple in Hamburg opened.
1819. (Aug.) The beginning of the "Hep, hep!" persecutions. Formation of the Society for the Culture and Science of the Jews, by Zunz, Gans, and Moser.
1820. Jews admitted again at Lisbon.
1825. Jews expelled from St. Petersburg through influence of guilds.
1826. Jews obtain full civic rights in the state of Maryland, U. S. A. Decree issued in Russia enrolling Jews for military service.
1831. Louis Philippe orders salaries of rabbis to be paid by the state.
1833. (Oct. 29) Jews of Kur-Hessen granted full emancipation.
1835. (April 13) General Jewish regulations issued in Russia. Edict of Nicholas I. founding agricultural colonies in Russia.
1836. Law refusing Jews the right to bear Christian names renewed in Prussia.
1839. Sultan 'Abd al-Majid grants citizenship to Turkish Jews.
1840. (Feb. 5) Damascus blood accusation. (Nov. 6) Firman issued by sultan against blood accusation.
1844. (May 25) Louis Philippe issues regulations for the internal organization of French Jews. (June) Rabbinical conference at Brunswick.
1845. (April) Ukase issued ordering Russian and Polish Jews to adopt ordinary costume.
1848. Emancipation Year: most of the countries of central Europe grant full civic and political rights to Jews—in the majority of cases, repealed the next year. (May 19-20) Riots in Presburg.
1849. (July 3) Baron Lionel de Rothschild, previously returned as M.P. for city of London, not allowed to take seat.
1852. (Sept. 3) Violent anti-Jewish riots at Stockholm.
1856. (Feb. 18) "Hattı-Humayun" issued, granting full civic rights to Turkish Jews.
1858. (June 24) Edgar Mortara in Ancona forcibly taken from his family by Bishop of Bologna on plea that he had been baptized when an infant by a Roman Catholic servant. The oath "on the true faith of a Christian" abolished in England; Jewish disabilities removed.
1860. Alliance Israélite Universelle founded.
1863. (July) Emancipation of Swiss Jews.
1866. Rumanian constitution makes Rumanian Jews "aliens."
1867. (Dec.) Emancipation of Hungarian Jews.
1868. Jews permitted to return to Spain. The law of the North German Federation of July 3 decrees that no state shall retain restrictions on the ground of religious belief.
1870. (March) Thirteen hundred and sixty Jews expelled from districts of Falcu and Vaslui, Rumania.
1871. Anglo-Jewish Association founded.
1873. Union of American Hebrew Congregations established.

1876. (July 28) E. Lasker procures the passing of the "Austrittsgesetz," permitting Jews to change their congregation.
1877. Rabbinical Seminary, Budapest, inaugurated.
1878. (July 13) The Berlin Congress inserts clause 44, that distinction of religion shall not be a bar to civil and political rights in Rumania.
1880. (Nov. 20-22) Debate in Prussian Diet on Kantorowicz incident.
1881. Atrocities against Jews in South Russia. (April 25) Anti-Semitic league in Germany presents petition with 255,000 signatures to Bismarck. (April 27) Riot at Argenau.
1882. (April 7) Disappearance of Esther Solymosi causes a trial on blood accusation at Tisza-Eszlar. (May 3) "May Laws" issued by General Ignatief confining the Jews in the Pale of Settlement to the towns.
1884. (March 7) Rumanian law prohibiting hawking puts 5,000 Jewish families out of employment. (July 9) Lord Rothschild takes his seat as first Jewish peer in the British House of Lords.
1885. Pittsburg Conference of American Rabbis establishes a platform for Reform Judaism.
1886. Drumont publishes "La France Juive."
1887. (Feb. 28) Rumanian law excluding Jews from public service and from tobacco trade and from employment in retail trade.
1889. (May 12) Rumanian law limiting number of Jewish factory hands to one-third.
1890. (Dec. 10) Guildhall meeting against persecution of Russian Jews by May Laws.
1891. (June 29) Blood accusation at Xanten.
1892. Jewish Colonization Association founded by Baron de Hirsch.
1893. (Jan. 14) Rumanian law prohibiting Jews from being employed in public medical department.
1895. Capt. Alfred Dreyfus condemned and degraded as a spy and deported to Devil's Isle, Cayenne.
1897. (Aug. 29-31) First Zionist Congress at Basel.
1898. (Oct.) Eleven thousand two hundred Jewish children refused admission to public schools in Rumania.
1899. (March 31) Rumanian law excluding Jews from agricultural and professional schools. (Sept. 2) Dreyfus condemned a second time, but "pardoned" on Sept. 19.
1900. (Aug. 13-16) Fourth Zionist Congress at London. (Sept. 8) Israelsky, accused of ritual murder at Konitz, acquitted.
1901. (Dec.) Rumanian law prohibiting Jews from holding saloons or stores in rural districts.
1902. (March) Rumanian law prohibiting employment of Jewish working men.

G. J.
CHRYSOSTOMUS, JOANNES (generally known as **St. Chrysostom**): Patriarch of Constantinople, one of the most celebrated of the Church Fathers, and the most eminent orator of the early Christian period; born in 347 at Antioch; died Sept. 14, 407, near Comana, in Pontus. Chrysostom originally devoted himself to the law, but soon felt dissatisfied with this vocation, and at the age of twenty-three was made a deacon. About fifteen years later (386) he advanced to the rank of presbyter, and in 398 was appointed by the emperor Bishop of Constantinople. Having attacked the empress Eudoxia in his sermons, he was banished (403), but was recalled soon after, upon the unanimous demand of his congregation. He repeated his attacks upon the empress, and was again banished in 404, first to Nicæa, then to Cucusus in the desert of the Taurus, and finally to Pityos on the Black Sea; but he died while on the way to the last-named place.

The name "Chrysostomus" ("golden-mouthed"):

χρυσός = "gold," and *στόμα* = "mouth") is a title of honor conferred on this Church father only. It was first used by Isidore of Seville (636), and is significant of the importance of the man, whose sermons, of which one thousand have been preserved, are among the very best products of Christian rhetoric. As a teacher of dogmatics and exegesis Chrysostom is not of so much importance, although much space in his works is devoted to these two branches. Among his sermons, the "Orationes VIII. Adversus Judæos" (ed. Migne, i. 843-944) deserve special notice, inasmuch as they mark a turning-point in anti-Jewish polemics. While up to that time the Church aspired merely to attack the dogmas of Judaism, and did that in a manner intended only for the learned, with Chrysostom there began the endeavor, which eventually brought so much suffering upon the Jews, to prejudice the whole of Christendom against the latter, and to erect hitherto unknown barriers between Jews and Christians.

It was the existing friendly intercourse between Jews and Christians which impelled Chrysostom to his furious attacks upon the former.

Attack on Jews. Religious motives were not lacking, for many Christians were in the habit of celebrating the Feast of the Blowing of the Shofar, or New-Year, the Day of Atonement, and the Feast of Tabernacles ("Adversus Judæos," i.; ed. Migne, i. 848). "What forgiveness can we expect," he exclaimed, "when we run to their synagogues, merely following an impulse or a habit, and call their physicians and conjurers to our houses?" (*ib.* viii.). In another place Chrysostom says: "I invoke heaven and earth as witnesses against you if any one of you should go to attend the Feast of the Blowing of the Trumpets, or participate in the fasts, or the observance of the Sabbath, or observe an important or unimportant rite of the Jews, and I will be innocent of your blood" (*ib.* i. 8; ed. Migne, i. 855). Not only had Chrysostom to combat the pro-Jewish inclinations of the Antiochians in religious matters, but the Jews were held in so much respect at that time, that Christians preferred to bring their lawsuits before Jewish judges, because the form of the Jewish oath seemed to them more impressive and binding than their own (*ib.* i. 3; ed. Migne, i. 847).

Chrysostom further argues at length in his writings that Judaism has been overcome and displaced by Christianity. He attempts to prove this by showing that the Jewish religion can not exist without a temple and sacrifice and a religious center in Jerusalem, and that none of the later religious institutions can fill the place of the ancient ones. Chrysostom derides the Patriarchs, who, he declares, were no priests, but gave themselves the appearance of such, and merely played their parts like actors. He adds: "The holy Ark, which the Jews now have in their synagogues, appears to be no better than any wooden box offered for sale in the market" (*ib.* vi. 7; ed. Migne, i. 614).

But he is not satisfied with the derision of all things sacred to the Jews. He tries to convince his hearers that it is the duty of all Christians to hate the Jews (*ib.* vi. 7; ed. Migne, i. 854), and declares

it a sin for Christians to treat them with respect. In spite of his hatred of the Jews and Judaism, Chrysostom—as, indeed, the whole Antiochian school in their Bible exegesis—shows a dependence upon the Haggadah, which at the time predominated among the Palestinian Jews. A few parallels with the Haggadists have been given by Weiss, but they could be easily increased; and even in instances not directly taken from the Haggadah, its influence can be noticed in the writings of Chrysostom.

CHUDNOV: Town in the government of Volhynia, Russia. A Jewish community existed here before the uprising of the Cossacks in 1648. In 1898 the town had nearly 8,000 inhabitants. Among them there were about 3,500 Jews, who were principally engaged in handicrafts and commercial pursuits. The former employed 1,252 Jews, of whom 475 owned their shops, 498 were wage-workers, and 279 were apprentices. The principal trades followed by the Jews are tailoring and shoemaking, the former, in 1898, employing 475 men, and the latter 350. The journeymen numbered 55.

The educational institutions include a Talmud Torah with 30 pupils, a private school for male pupils, one for female pupils, and 30 *hadarim* with an attendance of about 300.

CHUETAS ("Pork-Eaters") or **INDIVIDUOS DELA CALLE** ("Ghetto People"): Names given to the descendants of the secret Jews in Majorca, who at heart were still faithful to Judaism, but who, in order to induce the belief that they were good Christians, publicly ate pork ("chuya," diminutive "chueta"); the second term, "Ghetto People," is self-explanatory. Their fate was similar to that of the Cagots of the Pyrenees, who are still held in abhorrence by the natives of that region. People were afraid to approach them; at church they sat apart; and even in the cemetery their bodies were isolated. When the tribunal of the Inquisition was established in Majorca in 1488, it granted a general amnesty to all Jews that solicited pardon for their apostasy, and it received back the repentant ones, to the number of 680, on payment of a considerable fine. Beginning with 1509, however, several secret Jews were publicly burned before the Gate of Jesus at Palma; and in 1679, when a synagogue was discovered in an outlying house, several hundred of them were condemned by the tribunal to imprisonment for life, and their property was confiscated.

To escape these continuous persecutions and extortions, a number of Chuetas, reputed to be the wealthiest inhabitants of Palma, decided to leave the "Golden Island" in an English vessel which they had hired for the purpose; and they had set sail, when unfavorable winds compelled them to return to

the harbor of Palma. After having been imprisoned for five years, these unfortunates were, in 1691, condemned by the Inquisition to the confiscation of their property, and more than fifty of them were garroted and then burned at the stake. Among the latter were Raphael Valls, "an excellent rabbi"; Raphael Benito Terongi, his most faithful pupil; and Catalina Terongi, a sister of the latter. These hero-martyrs were commemorated by Majorcan troubadours, whose verses are still sung by the women of the island while at their work. The Inquisition did its utmost to fan the prejudice of the people against the outlawed. Their portraits were placed in the Dominican monastery; and in 1753 a list was published in which were mentioned the names and rank of all those condemned to death or to confiscation of property from 1645 to 1691.

Not until the publication of the royal decree, Dec. 16, 1782, was an amelioration effected in the condition of these people, who were thenceforward permitted to reside in any street in the city of Palma and in any part of the island, and were no longer to be called Jews, Hebrews, or Chuetas, under penalty of the galleys or imprisonment in the fortress. Three years later they were declared eligible to the army and the navy as well as to public offices. Notwithstanding, as late as 1857 there appeared a special book directed against them. It bore the title "La Sinagoga Balear. Historia de los Judios de Mallorca," and the purpose of the author, Juan de la Puerta Vizcains, was, by means of it, to levy blackmail upon them. They, however, bought up all but three copies of the work. The descendants of the Chuetas, who bear to-day the same names that their ancestors bore in the fourteenth century, now occupy a respected position in industry and agriculture, as well as in the departments of science and politics.

CHUFUT-KALE: Suburb of Bakhchiseraï, a town in the government of Taurida, Russia. It is called by the Tatars "Kirk-er" (Place of Forty), and by the Karaites, to which sect the greater part of its inhabitants belong, "Sela' ha-Yehudim" (The Rock of the Jews). There are many legends concerning the place. According to one, it was called "Kirk-er" because the khans Mengli-Girei and Takhtamish, the founders of the city, brought with them forty Karaite families, and in their honor called it the "Place of Forty."

Another legend, fostered by the Karaites to show the antiquity of their sect, says that Karaites were brought there from Persia at the time of the first Exile. The early settlers of the city exercised great influence upon their neighbors, the Chazars. The *hakam* Abraham Firkowitsch, who was very skillful in falsifying epitaphs and manuscripts, pretended to have unearthed at the cemetery of Chufut-Kale tombstones dating from the year 6 of the common era, and to have discovered the tomb of Sangar, which is still shown by the Karaites. According to Harkavy, however, no epitaph earlier than 1203

can be seen at the cemetery of Chufut-Kale, called "Vale of Jehoshaphat"; and the tombs do not belong to Karaites, but to the old Rabbinite settlers called "Krimchaki." Chufut-Kale, however, existed as early as the seventh century. Abu al-Fida mentions it under the name "Kirk-er."

The Karaite community possesses two synagogues; it has a bet din consisting of three members, the hakam, the hazzan, and the beadle (shammash). A printing-office for Karaite works was established there in 1734. The first work published was the Karaite ritual, according to Aaron ben Joseph, the author of "Sefer ha-Mibhar." For history of suburb see CRIMEA; KARAITES.

CHUMACEIRO, ARON MENDES: Hakam of Curaçao, Dutch West Indies; born at Amsterdam Jan. 28, 1810; died there Sept. 18, 1882. He received the various rabbinical degrees (that of "morenu" in 1846) at the celebrated bet ha-midrash Ets Haim. In 1848 he was awarded the royal gold

medal for the best sermon in the Dutch language. When the Sephardic synagogue of Amsterdam proposed to elect him preacher in the vernacular, it met with strenuous opposition, Ladino being the only language, except Hebrew, used in the synagogue. When in 1852 Chumaceiro was elected first ab bet din, he succeeded in overcoming the opposition to Dutch, and soon established a reputation as one of the foremost

pulpit orators in Holland. In 1852 he edited the first Dutch Jewish weekly, "Het Israelietisch Weekblad." In the same year he was elected head of the bet ha-midrash Ets Haim.

Delegated by the parnasim of his congregation in 1854 to receive the future King Pedro V. of Portugal, he conducted the royal visitor and his suite to the bet ha-midrash, where the king, noticing the names of the donors to that institution inscribed on the walls, made the significant remark: "Me faz parecer que estoy em mea propria terra do Portugal" (It seems as though I were in my own land of Portugal). When Pedro V. ascended the throne in 1856, he removed the civil disabilities of the Jews.

On account of his liberal-conservative views Chumaceiro was strongly opposed by the ultra-Orthodox party, and he therefore accepted in 1855 from King William III. the appointment of chief rabbi of the colony of Curaçao. At the solicitation of the special ambassador, O. van Rees, who

was sent by the king to adjust the claims of the persecuted Dutch Jews of Coro, Venezuela, he succeeded in settling the complicated disputes to the entire satisfaction of the contending parties.

Chumaceiro visited his birthplace in 1861, when the office of hakam was tendered to him, which he declined, receiving on that occasion a costly testimonial from the Sephardic synagogue. He obtained his discharge as hakam of Curaçao in 1869, and received a liberal pension from the king for "the numerous and faithful services rendered to his country."

Chumaceiro had four sons:

1. **Abraham Mendes Chumaceiro:** Attorney at law; born at Amsterdam Nov. 16, 1841; died at Curaçao, Dutch West Indies, Aug. 19, 1902. He moved to Curaçao, in 1856, studied law, and was admitted to the bar in 1872. He soon acquired great prominence in his profession. Among his literary works are "Is Curaçao te Koop?" and "Het Kiesrecht in de Kolonie Curaçao."

2. **Benjamin Mendes Chumaceiro:** Hazzan; born in Amsterdam in 1871. He received a ministerial training at the bet ha-midrash Ets Haim of Amsterdam. In 1892 he was elected assistant hazzan of the Portuguese synagogue at The Hague; and in 1895 hazzan of that of Hamburg.

3. **Jacob Mendes Chumaceiro:** Dayyan and editor; born at Amsterdam March 11, 1833; died Feb. 8, 1900. Besides being dayyan of the Sephardic synagogue, and acting hakam for the Portuguese Jews of North and South Holland, he was inspector of the Jewish schools of Amsterdam, head and librarian of the bet ha-midrash Ets Haim, and editor of "Het Israelietisch Weekblad."

4. **Joseph Hayyim Mendes Chumaceiro:** Rabbi and editor; born in Amsterdam July 3, 1844; studied for the ministry under his father at Curaçao. From 1867 to 1874 he was rabbi of Beth-El congregation, Charleston, S. C.; from 1874 to 1880, of Nefashot Yehudah, New Orleans, La.; from 1884 to 1887, of Beth-El Emeth, Philadelphia, Pa.; from 1889 to 1891, of Mikwe Yisrael, Curaçao; from 1892 to 1898, of Children of Israel, Augusta, Ga.; and was recalled as rabbi to Curaçao in 1898. During part (1879-83) of his residence at New Orleans he was also editor of "The Jewish South," a weekly journal.

Besides many sermons and discourses, he published "The Evidences of Free-Masonry from Ancient Hebrew Records," 1900, which reached a third edition; "La Revelacion," the first Jewish catechism in Spanish; and "Verdediging is geen Aanval," a correspondence between a Christian divine and a Jewish rabbi on Jesus as the Messiah.

CHURCH COUNCILS: Synods of the Roman Catholic Church, possessing legislative power in matters pertaining to doctrine and discipline. The Apostles' synod at Jerusalem (Acts xv.) is regarded as the oldest example of such an assembly. Besides the general (ecumenical) councils, of which the Catholic Church recognizes twenty, there are na-

tional and provincial councils and diocesan synods. The decisions of these lesser synods were naturally authoritative only within their own particular districts; but as they were sometimes recognized by other provincial synods, or even by a general council, they acquired a more or less general validity. Many of the Church councils have concerned themselves with the Jews, with the object of removing Judaizing institutions and teachings from among Christians, destroying any influence which Jews might exercise upon Christians, preventing, on the one hand, the return to Judaism of baptized Jews, and devising, on the other, means to convert Jews to Christianity. It is characteristic of the decisions of these councils in respect to the Jews that up to the end of the Middle Ages they became ever harsher and more hostile, a few isolated instances only of benevolent resolutions standing on record. Many of the Church decrees, however, were enforced only after they had been several times confirmed; while some of them were never enforced at all.

The Jews are mentioned for the first time in the resolutions of the synod at ELVIRA, at the beginning of the fourth century, immediately

Spanish Synods. after the persecutions under Diocletian. The synod opposed the custom existing among Christians of having

the fruits of their fields blessed by Jews, and forbade all familiar intercourse, especially eating, with Jews (canons 49, 50). The spirit of intolerance, arising almost before the persecution of the Christians themselves had ended, remained characteristic of the Spanish Church. When the Arian creed was exchanged for the Catholic by the third Toledo Synod held under Reccared in 582, resolutions hostile to the Jews were passed. The synod forbade intermarriage with Jews, and claimed the children of mixed marriages for Christianity. It disqualified Jews from holding any public office in which they would have power to punish Christians, and forbade them to keep slaves for their own use (canon 14). Still more severe are the decrees of the fourth Synod of Toledo, in 633 (canons 57-66), directed more especially against the pretended Christianity of those converted by force under Sisebut. Though it was decreed that in the future no Jew should be baptized by force, those who were once baptized were obliged to remain Christians. Whoever protected the Jews was threatened with excommunication. The sixth Synod of Toledo, in 638, confirmed King Chintila's decree providing for the expulsion of the Jews, and demanded that every future king on his accession should take an oath to observe faithfully the laws concerning the Jews. The twelfth Synod of Toledo, in 681, went furthest, and adopted in its resolutions (canon 90) King Erwig's laws in reference to Jews ("Leges Visigothorum," xii. 3): celebration of the Sabbath and of feast-days, observance of dietary laws, work on Sunday, defense of their religion, and even emigration were forbidden. One generation later Spain was under Moorish dominion.

More comprehensive were the measures adopted by the councils outside of Spain. Before 450 they confined themselves to the prohibition of familiar intercourse with Jews; of the celebration of their feast-days, especially the Passover; of resting from

labor on their Sabbath; of entrance into their synagogues, etc. The General Council of Chalcedon (451) went a step further, though only as a result of previous resolutions, in forbidding intermarriage—

at first only in the case of the children of lectors or precentors (canon 14).

Other Synods. The synods of Orléans (in 533 and 538) and the above-mentioned Spanish syn-

ods forbade marriages between Jews and Christians altogether, and this legislation was repeated by the Synod of Rome in 743. As the Jews themselves were opposed to such marriage, there was no difficulty in the enforcement of these decrees. Only in countries where Christianity had not yet gained entire mastery was there a repetition of these marriage prohibitions, as in Hungary (1092) and in Spain (1239). The Quinisext Synod of Constantinople, in 692, and a number of later synods forbade Christians to receive treatment from Jewish physicians. In spite of this interdiction (repeated several times, at Avignon as late as 1594), even popes often employed Jews as court physicians.

After the Synod of Orléans, in 538, the councils turned their attention to the Christian slaves in the service of Jews, at first merely prescribing the protection of the slaves' persons and religious belief, but later prohibiting absolutely the possession of Christian slaves. Together with this decree, which only repeated a law in the Theodosian Code, came laws forbidding Jews to have free Christians in their employ. By a general decree of the third Lateran Council of 1179 (canon 26), Christians were strictly forbidden to act as servants to Jews, with so little effect, however, that nearly all later Church councils had to renew the interdict; for instance, the Synod of Milan in 1565 (canon 14). Jews of all lands were in great fear of the third Lateran Council ("Shebet Yehudah," ed. Wiener, p. 112). Their fears, however, proved groundless; for, aside from the decree in re-

spect to the employment of Christian servants, especially of nurses and midwives—a decree due to the fear of the common people's apostasy to Judaism

Third Lateran Council, 1179.—the following are the important decisions of the council: (1) Christians must not live together with Jews (a repetition of an old decree); (2) new synagogues must not be built; old ones may be repaired only when dilapidated, but on no account may they be beautified; (3) the testimony of Christians against Jews must be admitted, since Jews are accepted as witnesses against Christians; (4) neophytes must be protected against the fanaticism of the Jews, and Jews are forbidden to disinherit baptized persons (compare "Codex Theodosianus," xvi. 8, 28). A characteristic clause states that Jews may be protected only for reasons of common humanity.

The fourth Lateran Council, in 1215, was of crucial importance. Its resolutions inaugurated a new era of ecclesiastical legislation in regard to the Jews, and reduced them virtually to the grade of pariahs. In the south of France an assembly of Jewish notables, which was held at the demand of Isaac Benveniste, sent a delegation to Rome to try to avert the impending evil. The last four resolutions or canons which the council adopted were concerned with the Jews

Canon 67 adopts measures against usury by the Jews. A synod at Avignon had anticipated the Lateran Council in this respect, and it was imitated by other councils of the thirteenth century. At the same time very strict regulations were made against Lombard usurers, who, according to Matthew of Paris, were much worse than the Jews. For houses and landed

**Fourth
Lateran
Council,
1215.**

property Jews were obliged to give a tithe to the Church, and besides each Jewish family had to pay at Easter a tax of six denarii. Canon 68 ordains a special dress for Jews and Saracens, ostensibly "to prevent sexual inter-

course, which has occasionally occurred by mistake," but in reality to make a sharp distinction between Jews and Christians. The Jewish badge and hat exposed the Jews to scorn and ridicule, and their complete abasement dates from this time. Later councils, even up to comparatively modern times, have renewed these regulations, fixing the form and color of the Jewish badge in various countries, or forbidding the Jews to wear certain costumes (see **BADGE; HEAD, COVERING OF**).

Because many Jews were said to parade in their best clothes during Holy Week (in which the Feast of the Passover usually falls) on purpose to mock the Christians, the Jews were not thenceforth allowed to leave their houses at all during those days. This Draconian decree, however, supported by similar decrees of French and Spanish synods of the sixth century, was not without its advantages for the Jews, as many subsequent synods (for instance, at Narbonne, 1227; Béziers, 1246) were obliged expressly to protect the Jews against ill treatment during Holy Week. Other synods of the thirteenth century forbade Jews to eat meat on Christian fast-days (Avignon, 1209), or to carry it across the street (Vienna, 1267). The synods of Narbonne (1227), Béziers (1246), Albi (1255), and Anse (1300) forbade altogether the sale of meat by Jews. Canon 69, which declares Jews disqualified from holding public offices, only incorporated in ecclesiastical law a decree of the Holy Christian Empire. As has been mentioned, the synods of Toledo, and the French councils also, had debarred Jews from the office of judge, and from any office in which they would possess the right to punish Christians. The fourth Lateran Council simply extended this statute over the whole Roman Catholic world, referring to the synods of Toledo in support of its decision. Canon 70 takes measures to prevent converted Jews from returning to their former belief.

The concluding act of the fourth Lateran Council—the Crusades decree—compelled Jewish creditors to renounce all claim to interest on debts, and facilitated in other ways the movements of the Crusaders. Similar ordinances were adopted by the first Council of Lyons (1245). The decisions of the Synod of Vienna, in 1267, were practically the same

**Vienna
Synod of
1267.**

as those of the fourth Lateran Council, but were more severe in some points. For example, Jews were forbidden to frequent Christian inns or baths; they were ordered to stay at

home with closed doors and windows when the host was carried past, etc. Nevertheless, these decrees

did not succeed in making entirely unbearable the position of the Jews in Austria (see Bärwald, in "Jahrbuch für Israeliten," 1859). The same may be said of the decrees of the Hungarian Council at Ofen, in 1279 (Grätz, "Geschichte," vii. 139 *et seq.*).

The later councils went a step further in restricting and humiliating the Jews by limiting their freedom in the choice of dwelling-places. The Synod of Bourges, 1276, ordained that Jews should live only in cities or large towns, in order that the simple country folk might not be led astray. Similarly the Synod of Ravenna, 1311, ordained that Jews should be allowed to live only in cities that had synagogues. The Synod of Bologna, 1317, forbade renting or selling houses to Jews, and the Synod of Salamanca, 1335, forbade Jews to live near a churchyard or in houses belonging to the Church. Finally, the Spanish Council of Palencia, 1388, under the presidency of Pedro de Luna, demanded separate quarters for Jews and Saracens, a demand afterward renewed by many Church councils.

The compulsory conversion of Jews was often forbidden by the councils (for instance, Toledo, 633; Prague, 1349). Toward the end of the Middle Ages the General Council of Basel, in its nineteenth sitting (1434), adopted a **Council of Basel.** new method of moral suasion by compelling the Jews to listen periodically to sermons for their conversion, a decision renewed, for instance, by the Synod of Milan in 1565.

A last attack on the scanty freedom of the Jews was brought about directly by the art of printing. The committee on index of the General Council of Trent (1563) decided to refer to the pope the question of placing the Talmud on the list of forbidden books; and although the Italian Jews succeeded with bribes in preventing the absolute prohibition of the work, it was permitted to be printed only on condition that the title "Talmud" and all passages supposed to be hostile to Christianity be omitted (Mortara, in "Hebr. Bibl." 1862, pp. 74, 96; see **CENSORSHIP OF HEBREW BOOKS**).

The General Vatican Council of 1869–70 did not concern itself at all about the Jews beyond inviting them, on the suggestion of the convert Léman, to attend **Vatican Council, 1869-70.** the council (Friedberg, "Sammlung der Aktenstücke zum Ersten Vatikanischen Concil." pp. 65 *et seq.*).

Regarding a supposed synod in Rome in 314–324, directed against the Jews (Jaffe, "Regesta Pontif. Roman."), nothing is known. Untrustworthy also is the report that a synod, summoned at Toulouse in 883 by the Frankish king Carloman, on the complaint brought by Jews of their ill treatment, ordained the corporal chastisement of a Jew before the church door on Christmas Day, Good Friday, and Ascension Day, and that the degradation was increased by compelling the Jew to acknowledge his punishment as just (Mansi, "Concilia," xvii. 565).

H. V.

CHURCH FATHERS: The early teachers and defenders of Christianity. The most important of the fathers lived and worked in a period when Christianity still had many points of contact with Judaism, and they found that the latter was a splendid support in the contest against paganism, although it had to be combated in the development of Christian doctrine. So the Fathers of the Church are seen at one time holding to a Jewish conception of the universe and making use of Jewish arguments, at another rejecting a part of such teaching and formulating a new one. In the contest of Christianity against paganism the Church Fathers employ the language of the Hellenistic literature as found in Philo, Josephus, the Apocrypha, and the Sibylline Books, all of which draw upon the Prophets of the Old Testament. Thus, practically, only the polemic features in the activity of the Church Fathers directed against Judaism can be considered as new and original. But in order

Their to wage successful war against paganism, they, as well as Christians in general, had to acquaint themselves with the religious documents of Judaism; **Importance to** and this was possible only if they entered into personal relations with the Jews; **Judaism.**

through these personal relations the Church Fathers become of signal importance to Judaism. The contemporaries and, in part, the coworkers of those men who are known from the Talmud and the Midrash as the depositaries of the Jewish doctrine, were the instructors who transmitted this doctrine to the Church Fathers also. Hence such a mass of haggadic material is found in the work of the fathers as to constitute an important part of Jewish theological lore. This article is primarily concerned with their interpretation of the texts of the Bible and of the Apocrypha, which differs in essential points from those of the Jews.

Personal Relations with Jews: After the Bar Kokba war against the Romans, Ariston of Pella, a converted Jew, wrote, as is generally accepted, a dialogue in which the Christian Jason and the Jew Papisus are made the speakers, and in which the nature of Jesus is discussed (*Ἰάσωνος καὶ Παπίσκου ἀντιλογία περὶ Χριστοῦ*). This dialogue, already mentioned by Celsus, may be wholly imaginary and without historical basis. But the famous dialogue of Justin Martyr with the Jew Tryphon, which took place at Ephesus (Eusebius, "Historia Ecclesiastica," iv. 18) at the time of the Bar Kokba war, is strictly historical, as certain details show; for instance, the statement that on the first day no strangers were present, while on the second day some Jews of Ephesus accompanied Tryphon and took part in the discussion (Justin, "Dialogus cum Tryphone," cxviii.), a certain Mnaseas being expressly mentioned (*ib.* lxxxv.). The Jewish auditors are

not only able to follow the intricate discussion intelligently, but their demeanor also is seemly; Tryphon especially proves himself a true disciple of Greek philosophy, and his scholarship is freely acknowledged by Justin (*ib.* lxxx.). At the close of the debate, Jew and Christian confess that they have learned much from each other, and part with

expressions of mutual good-will (*ib.* at the end). Justin was born and reared in proximity to Jews; for he calls himself a Samaritan (*ib.* cxx.), meaning thereby probably not that he professed the religion of the Samaritans, but that he came from Samaria.

Of the relations of Clement of Alexandria to Judaism nothing positive is known. During the persecutions of the Christians of Alexandria, in 202 or 203, Clement sought refuge for a short time in Syria (Eusebius, *l.c.* vi. 11). Here he may have learned much at first hand from the Jews. He knew a little Hebrew, also some Jewish traditions; both of which facts point to personal relations with Jews.

Clement's contemporary, Origen, probably also born in Alexandria about 185, may possibly have been on his mother's side of Jewish descent, if one may judge from the fact that while his father is mentioned as Leonides, the name of his mother is passed over in silence. A Jewish mother could readily have taught her son the Hebrew language, so that they might sing the Psalms together (Jerome, "Epistola xxxix. ad Paulam"). [Both his father and his mother were, however, Christian in faith.—*r.*]

In his capacity of presbyter at Cæsarea in Palestine, Origen must have come into frequent contact with learned Jews, as indeed appears from his writings. He mentions again and again his "magister Hebraeus" (*ὁ Ἑβραῖος* in the Greek fragment), on whose authority he gives several haggadot ("De Principiis," i. 3, 4; iv. 26).

Clement and Origen.

His dependence on the Jews is sufficiently emphasized by Jerome ("Adversus Rufinum," I. xiii.) in the passage wherein Clement and Eusebius are named among those who did not disdain to learn from Jews. Origen often mentions the views of Jews, meaning thereby not the teaching of certain individuals, but the method of exegesis prevalent among the Jews of his time. The Jews with whom he maintained personal intercourse were men of distinguished scientific attainments. The one Jew whom he mentions by name was no less a personage than Hillel, the patriarch's son, or "Jullos," as Origen calls him (Grätz, "Monatsschrift," 1881, xxx. 433 *et seq.*). His other Jewish acquaintances either were closely related to the patriarch's family, or occupied high positions on account of their erudition. Grätz ("Gesch. der Juden," 3d ed., iv. 231) thinks indeed that some passages in Origen's writings are directed against the contemporary amoræ of Palestine, Simlaï. Origen seems, moreover, to have had intercourse with Hoshaya of Cæsarea (Bacher, "Agada der Palästinenischen Amoräer," i. 92).

Eusebius, the celebrated Church historian, also learned from the Jews, as has already been mentioned, and was under the influence of Jewish tradition. In Cæsarea, where he lived, he met many Jews, with whom he had discussions. Nevertheless he uses the word "Jew" as a term of reproach, calling his opponent, Marcellus, "a Jew" ("De Ecclesiastica Theologia," ii. 2, 3). He likewise thinks it a disgrace to be one of the "circumcised" (*τῶν ἐκ περιτομῆς*, "Demonstratio Evangelica," i. 6). This last expression is also used regularly by Ephraem Syrus to designate Jews (*כְּעִיבָא נִירָא*, "Opera Syriaca," ii. 469). Ephraem distances all his ecclesiastics

tical predecessors in his hatred of the Jews, displaying a bitterness that is explicable only on the ground that he at one time had personal relations with them, and had formed an adverse opinion of them. Eusebius, Ephraem Syrus, Epiphanius, too, shows his dependence on the Jews, especially in the book, perhaps wrongly ascribed to him, "De Prophetarum Vitis"; which contains, besides many extraneous inventions, numerous Jewish traditions of the lives of the Prophets. In this it was followed by a Syrian work ("The Book of the Bee," published in "Anecdota Oxoniensia," Semitic series, i., part 2).

Jerome surpasses all other Church Fathers in his erudition as well as in his importance for Judaism. It must be emphasized, in spite of Christian assertions to the contrary (e.g., B. Baue, "Vorlesungen," ii. 36), that he learned much not only from baptized but also from loyal Jews. He sought his information in many quarters, especially among the educated Jews (Preface to Hosea; compare "Epistola lxxiii. ad Evangelum"). Hence he always cites the opinions of several Jews ("quidam Hebræorum"), not that of one Jew; and these Jewish

Jerome. friends of his accompany him on his journeys (Preface to I Chronicles), though he has one particular guide ("circumducens," Preface to Nahum). Of only three of his Jewish teachers is anything known. A Jew from Lydda, whom Jerome calls "Lyddæus," explained to him the Book of Job, translating it into Greek, and expounding it in Latin. Although he has much to say in praise of this man, Jerome will not admit that he learned much from him (Preface to Job), designating him often as one who merely read the Scriptures to him ("Onomastica Sacra," xc. 12; commentary on Eccles. iv. 14, v. 3). But from this Lyddan Jerome acquired not only the material for his philological notes, but also the Hebrew pronunciation that gives him a unique importance for Old Testament criticism (Siegfried, in Stade's "Zeitschrift," 1884, p. 34; Krauss, in "Magyar Zsidó Szémlé," 1900, vii. 513).

Jerome was more attached to his second teacher, Bar Hanina, who, however, can not be identical with R. Hama b. Hanina, as Rahmer insists (compare Weiss, in "Bet-Talmud," i. 131, note 3); nor can he possibly be identified until his Midrashim, quoted by Jerome, have been compared with the known sayings of the authors of the Talmud and the Midrash. This Bar Hanina must have been an eminent teacher of the Law, for Jerome spent much time and money before he could secure him as teacher. Since Jerome would not visit his teacher by day, for fear of the Jews, he went to Bar Hanina by night ("Epistola lxxiv. ad Pammachium et Oceanum"). Bar Hanina came from Tiberias, as is shown by the Hebrew traditions communicated by him to Jerome; for one particular prophecy was held to apply to Tiberias (Jerome, "Quæstiones Hebraicæ in Genesin," xlix. 21).

Jerome's third teacher, whom he required especially for the Aramaic portions of the Bible, knew both Hebrew and Aramaic, and was considered by the Jewish scribes as a "Chaldæus" (Preface to Tobit; compare "Epistola xviii. ad Damasum").

IV.—6

Jerome lived about forty years in Palestine, apparently studying all the time under Jews (commentary on Nahum ii. 1: "a quibus non modico tempore eruditus"). His enemies severely censured him for his intercourse with the Jews, but he was proud of it. He asks how it could be held to impugn his faith in the Church, that he informs his readers in how many ways the Jews construe a single error. ("Adversus Rufinum," book i.). "Why should I not be permitted to inform the Latins of what I have learned from the Hebrews. . . . It is most useful to cross the threshold of the masters, and to learn the art directly from the artists" (*ib.*).

Jerome's contemporary, the great teacher Augustine, did not fare so well in Africa. When he questioned the Jews on Biblical matters, they often either did not answer at all, or, at least from the standpoint of the Church Fathers, "lied" (Jerome, "Epistola cxii. ad Augustinum"), meaning probably that they gave an answer different from what the Christians desired ("Epistola civ. Augustini ad Hieronymum"). An alleged letter from Jerome, probably forged by Rufinus, was sent to the Christian communities in Africa, in which Jerome professed to admit that, misled by the Jews, he had translated erroneously ("Adversus Rufinum," book iii., ii. 554, ed. Vallarsi). It mortified Jerome that his translation of the Bible, the Vulgate, so famous later on, should be passed over in silence by all the Jews, and that there was no one who knew enough Hebrew to appreciate the merits

of the new translation ("Epistola Augustine. cxii. ad Augustinum"). He even believed that all the Jews of Africa had conspired to oppose him, as actually happened in one place. In a certain African town—so Augustine wrote to Jerome (Jerome's works, "Epistola civ. Augustini ad Hieronymum")—the new translation was read in the church, by order of the bishop. When they came to the passage in Jonah containing the word "kikayon" (iv. 6), which differed from the interpretation hitherto accepted, such a tumult arose that the bishop had to ask the Jews for a verification, and they declared, to the great annoyance of both Jerome and Augustine, that Jerome's rendering did not agree with the Hebrew, or Greek, or (old) Latin codices. The bishop had to strike it out as "a lie," being in danger of losing his congregation. Before this, Tertullian of Carthage (165-245) had spoken of the impertinence and derision shown by a Jew ("Apologetica," xvi.; "Ad Nationes," i. 11; compare ASS-WORSHIP).

Among the Greek Church Fathers, Basil the Great hardly knew Hebrew (H. Weiss, "Die Grossen Kapadocier Exegeten," p. 32, Braunsberg, 1872); yet his ability to distinguish between Amos, the prophet, and Amoz, the father of Isaiah (whose names are written alike in the Septuagint), as well as other similar facts, points to his having received oral instruction from Jews [or from some one who knew Hebrew.—T.]. Gregory of Nyssa (c. 331-396), who did not recognize the rending of the garments on the occasion of a death as being a Jewish custom (*περὶ τοῦ βίου τῆς Μακαρίας Μακρίνης*, in Oehler, "Bibliothek der Kirchenväter," i. 188), does not seem to have known much about Judaism. The same may

be said of the other Church Fathers who lived in Europe; that is, in sections sparsely settled by Jews. Irenæus, for instance, who suffered as a martyr in 202 in Lyons, knew nothing of Judaism outside of the Scriptures, although he was reared in Asia Minor. In the paschal controversy he

Chrysostom. But the Greek fathers John Chrysostom and Cyril of Alexandria (see BYZANTINE EMPIRE) potently affected the fate of the Jewish people, as did Bishop Ambrose of Milan (c. 340-397).

The Syrian Church, on the whole, was even in the fourth century dependent upon Jewish traditions (Wellhausen, in Bleek's "Einleitung in das Alte Testament," 4th ed., p. 601). This appears especially in the "Homilies" of Aphraates (c. 337-345). He complains (Hom. xix.) that the monks are led astray and ensnared by the Jewish arguments; he himself had a disputation with one "who is called a wise man among the Jews." Aphraates, who, under the name "Mar-Jacob," was abbot of the monastery of Mar Mattai, and a bishop, gives such a number of Jewish traditions as to place him, in this regard, beside Ephraem Syrus (see APHRAATES).

The Haggadah: The Church Fathers adopted from the Jews a mass of interpolations, interpretations, and illustrative anecdotes, which may best be designated by the well-known term "Haggadah," but which they themselves called variously. Goldfahn has counted in Justin Martyr ("Dialogus cum Tryphone") twenty-six Hebrew traditions and six polemico-apologetic Haggadot. Among these may be mentioned: the eating by the three angels who appeared to Abraham; the Messiah's concealment and anointment by Elijah; the violent death of Isaiah (a Haggadah found already in the oldest apocrypha, and in nearly all the earlier fathers); Melchizedek's identity with Shem (compare especially Epiphanius, "Adversus Hæreses," xxxv., and the Syriac "Cave of Treasures," translated by Bezold, p. 36).

Clement calls the Jewish haggadists "mystæ" (*μυσταί*, "persons initiated"), a term that was probably current in Alexandria; for the writings of all the Church Fathers agree in regarding Jewish tradition as a kind of esoteric doctrine understood only by the initiated. Clement is acquainted with the old Haggadah to Ex. ii. 14, according to which

Moses killed the Egyptian by merely pronouncing the name of God. Moses is called also "Joiakim" and "Melch" by **Origen.** the mystæ ("Stromata," ed. Migne, viii. 897), and "Melchiel" in Pseudo-Philo, "Antiq. Bibl." ("Jewish Quarterly Review," x. 228; compare x. 726). A relation between Clement and the Seder 'Olam Rabba is shown by the fact that both give the same figure, sixty years, as the period of the prophet Elisha's activity (*ib.* v. 138).

Origen derives still more from the Haggadot. For instance: the Garden of Eden is the center of the world ("Selecta in Genesin," ii. 8; compare 'Erub. 19a; Zion is so called in Enoch, xxvi. 1, 2; and Jubilees, viii.); division of the Red Sea into twelve parts (homily to Ex. v. 5; see also Eusebius, commentary on Ps. lxxvii. 13, and Epiphanius, in the notes

to "Adversus Hæreses," pp. 262 *et seq.*; compare Mekilta on Ex. xiv. 16, and other Jewish sources ["Jewish Quarterly Review," v. 151].

Origen's Debt to the Haggadah. and Kimhi on Ps. cxxxvi.); repentance of the sons of Korah (commentary on the Epistle to the Romans x. 7; compare Midrash on Ps. xiv. 4);

Israel's strength lies in prayer (homily on Num. xiii. 5; compare Sifre, Num. 157); Phineas and Elijah are identical (com. on John vi. 7; Jerome adopts the same opinion from the Apocrypha [v. 813, ed. Vallarsi; compare Yalk., Num. 772, but the earliest sources are lacking]); Daniel, Hananiah, Michael, and Azariah are eunuchs (commentary on Matt. xv. 5; compare homily on Ezek. iv. 8; catena on Ezek. xiv. 5; Jerome, "Adversus Jovin," book i., xxv.; com. on Dan. i. 3; Epiphanius, "De Vitis Prophetarum," ed. Migne, xlv. 424; further Sanh. 93b; Gen. R. xcix.); Moses is the author of eleven Psalms ("Selecta" to Ps. xii., ed. Migne, p. 1055; so also Jerome ["Adversus Rufinum," xiii.; compare Pesik., ed. Buber, p. 198a]); wild beasts are the instruments of divine punishment, as in II Kings xvii. 2 (homily on Ezek. iv. 7, xiv. 4; compare Mishnah Ta'anit iii. 6; Shab. 33a).

Eusebius recognizes Jewish tradition as an authority almost equal to the Scriptures, and calls it *ἀγραφὸς παράδοσις*; i. e., "unwritten tradition" ("Historia Ecclesiastica," iv. 22). Its depositaries he terms "deuterotæ" (*δευτερωταί*, "Præparatio Evangelica," xi. 5), and he characterizes them aptly as men of an uncommon strength of intellect, whose faculties have been trained to penetrate to the very

Eusebius. heart of Scripture. The Hebrews, he says, call them *δευτερωταί* (i. e., "tan-naim"), because they expound Holy Writ (*ib.* xii. 1). "Deuterosis" (*δευτέρωσις*, "mishnah") is commonly used by the ecclesiastical writers for the Jewish tradition, and is also found in Justinian's novellæ.

Eusebius makes a distinction between esoteric and exoteric exegesis; the Haggadot he often classes with the exoteric interpretation, contrary to Clement and others, who see therein a secret doctrine. Among his Haggadot may be mentioned the following: Abraham observed the precepts of the Torah before it had been revealed ("Demonstratio Evangelica," i. 6; compare Yoma 28b); King Hezekiah's sin in omitting a hymn of praise to God after Sennacherib's defeat (commentary on Isa. xxxix. 1; Jerome, *ad loc.*, quotes the same tradition; compare Sanh. 94a; Cant. R. iv. 8; Lam. R. iv. 15); Mero-dach-baladan's relations to Hezekiah (com. on Isa. xxxix. 1; the same Haggadah is given in Ephraem Syrus' commentary on II Kings xx. 10 ["Opera Syriaca," i. 562], as in one of Jacob of Edessa's scholia; compare Sanh. 96a). The traitor Shebna was a high priest (compare Lev. R. v.), treacherous (compare Sanh. 26a) and sensual (*ib.*), as Eusebius asserts in the name of *ὁ Ἐβραῖος* (com. on Isa. xii. 10, 11; Jerome makes the same statement *ad loc.*). The passage Zech. xi. 8 received very early the following Christological interpretation: After the advent of Jesus, the three powerful estates, kings, priests, and prophets, disappeared from Israel ("Demonstratio Evangelica," x. 1). Jerome, on Zech. xi. 8, quotes it only to reject it, preferring the Jewish

exegesis, which applies the text to Moses, Aaron, and Miriam; but he does not credit it to the Jews; compare also Pseudo-Philo ("Jewish Quarterly Review," x. 321), and Mekilta xvi. 35; Seder 'Olam Rabba x. 9a; Ta'anit 9a. Something similar is found in Aphraates on Num. xx. 1.

Aphraates gives the above as a self-evident exegesis without mentioning its Jewish origin. He does the same with his numerous other Haggadot, which were doubtless derived from the

Acceptance by Church Fathers of Haggadot. Ephraem Syrus likewise gives his Haggadot in the name of scholars (אנשין מן ספרא), expounders (אנשא מן מפרשקו), etc., but never in the name of Jews. The Haggadot,

however, were so generally accepted, that their Jewish origin gradually came to be forgotten. Ephraem Syrus, for instance, says, on Gen. xi. 29, that Sarah was called "Iscah" on account of her beauty; but this Haggadah is already found in Seder 'Olam R. ii. His explanation of Gen. xxxvi. 24 is similar to that found in Onkelos and the Samaritan Version. On II Kings iv. he has the same Haggadah about Obadiah's wife that is found in the Targum Yerushalmi and in part in Ex. R. xxxi. These and similar passages prove Ephraem's knowledge of Hebrew—a knowledge which many investigators have unjustly disputed.

But the one most conversant with Jewish traditions, and their greatest admirer, is Jerome. His "Quæstiones Hebraicæ in Genesin" form an almost uninterrupted series of such traditions; and he quotes them frequently in his other writings also. They are mostly historical episodes as additions to Bible history, which he calls either "traditiones" or frequently "fabulæ." These Haggadot were not only imparted to him orally by his Jewish teachers, but, remarkably enough, he also read Midrashic works himself. He says, for example, on Jer. xxix. 21: "Nec legitur in synagogis eorum"; on Zech. iv. 2: "Hæc ab Hebræis dicta reperimus." Yet he speaks of these traditions as if they were a secret doctrine, "arcane eruditionis Hebraicæ et magistrorum synagogæ recondita disciplina" (Zech. vi.

Jerome's Wide Knowledge of Hebrew Tradition. He is also the only Church Father who is acquainted with the technical terms of the Hebrew tradition; for instance: "hoc Scriptura nunc dicit" (זה שאמר הכתוב); "hoc est quod dicitur" (הרוא הוא דכתיב); "non debemus

legere," or "non legi potest" (אל תקרי). He knows and applies the method of "notarikon" or "gematria" (on Nahum iii. 8, on Haggai i. 1). This technical knowledge has so far been noted only in Barnabas' writings.

The haggadic elements in Jerome are so numerous that they would fill volumes; some of the more noteworthy ones may be mentioned here. On Eccles. iv. 13 he quotes a lost Midrash of R. Akiba, which has come down only anonymously (compare Eccl. R. iv. 13; Abot de-R. Nathan, version ii., ch. 4; Midr. Ps. ix. 5) and in secondary sources. He is entirely unsupported, however, in his view that Elihu (in Job) and Balaam are identical ("Quæst. Hebr. in Gen." xxii. 21).

On Ezek. xlv. 13, 14 Jerome quotes a halakic Midrash which treats of the heave-offering (compare Yer. Terumot vi. 1, 42d). Epiphanius also knew this; the Pharisees are said to have offered *τριακοντάδες τε καὶ πεντηκοντάδες* (Hilgenfeld, "Judenthum und Juden-Christenthum," p. 73, Leipsic, 1886). On Zech. xi. 13 he has a curious Haggadah on the number of the affirmative and negative precepts; a closer investigation shows that he has preserved this Haggadah more correctly than it is found in Jewish sources ("Jewish Quarterly Review," vi. 258; Jacob Bernays, "Abhandlungen," i. 252).

The Church Fathers who lived after Jerome knew less and less about Judaism, so that the history of the later periods is no longer of any interest in this connection.

Polemics: The dialogue between Justin and the Jew Tryphon is remarkable for the politeness with which Jews and Christians speak of one another; later on, however, examples are not wanting of passionate and bitter language used by Christians and Jews in their disputations. Origen complains of the stubbornness of the Jews (Homily x., on Jer. viii.), and accuses them of no longer possessing sound knowledge (*l.c.* iii.). Ephraem Syrus assumes a very insulting tone toward the Jews; he calls them by opprobrious names, and sees in them the worthless vineyard that bears no good fruit. Like Eusebius, who used the misfortunes of the Jews for polemic purposes (com. on Ps. lvi. 7-12), Ephraem sees in their wretched condition the visitation of God (on Gen. xlix. 8); because the Jews "betrayed Christ," they were driven from their country and condemned to perpetual wandering (on II Kings ii., toward the end). After Jerome has enumerated all the countries whither the Jews had been dispersed, he exclaims: "Hæc est, Judæe, tuarum longitudo et latitudo terrarum" ("Epistola cxxix. ad Dardanum").

What especially angered the Christians was the fact that the Jews persisted in their Messianic hopes. In his sermon against the Jews Ephraem says: "Behold! this people fancies that it will return; after having provoked God by all its ways, it awaits and expects a time when it shall be comforted." Ephraem, as well as Justin and Origen, mentions that at this period Judaism was receiving numerous accessions from the ranks of paganism, a phenomenon ascribed by the Church Fathers to the machinations of Satan.

Jerome, on the other hand, speaks with great eloquence of the Messianic hopes of the Jews. Many Messianic passages of the Bible were applied by the latter to the emperor Julian, others to the distant future, differences which resulted in interminable polemics. The Church Fathers looked upon the Jews as demons, upon their synagogues as houses of Satan; Rufinus mockingly styles Bar Hanina, Jerome's Jewish teacher, "Barabbas," and Jerome himself a rabbi. The one word "circumcisio" was used to condemn the whole of Judaism; the Jews, they said, took everything carnally (*σωματικῶς*), the Christians took all things spiritually (*πνευματικῶς*).

The writings of Jerome vividly portray the character of the polemics of that period. The Christian who should undertake to dispute with the Jews had

to be learned in doctrine (Preface to Psalms). But these disputations must be held lest the Jews should consider the Christians ignorant (on Isa. vii. 14). The proceedings were very lively. Reference is made, even if only figuratively, to the planting of the feet against each other, to the

Dis- pulling of the rope, etc. (*l.c.*). It is
putations incredible that the Jews were so fran-
Between tic as to "scream with unbridled
Jews and tongues, foaming at the mouth, and
Christians. hoarse of voice" (on the Epistle to Titus, iii. 9). Nor is it probable that

the Jews "regretted when they had no opportunity to slander and vilify the Christians" (Preface to Joshua), although the Jews of that age show no diffidence in sustaining their part in these discussions. They were accused of avoiding questions that arose on the more difficult passages of the Bible (on Isa. xlv. 6), which proved simply that they wanted to avoid disputations altogether. But the Jews had allies in their opinions; for pagans and Christian sectaries agreed with them on many points, drawing upon themselves the polemics of the Church Fathers.

Of the numerous polemical works directed against the Jews, only a few can be mentioned here. Of Clement's work, "Canon of the Church, or Against the Judaizers" (*Κανὼν Ἐκκλησιαστικὸς ἢ Πρὸς τοὺς Ἰουδαϊζόντας*; Eusebius, "Historia Ecclesiastica," vi. 13), only a few fragments have been preserved. Origen's famous work, "Contra Celsum," is directed no less against the Jews than against the pagans, since Celsus had brought forward many Jewish doctrines. Eusebius' "Demonstratio Evangelica" was avowedly a direct attack on the Jews (see

Avowed i. 1, 11). Aphraates' Homily xix. is
Attacks on largely directed against the Jews, and
Jews. Homilies xi., xiii., xv. denounce circumcision, the Sabbath, and the discrimination between clean and unclean food, "of which they are proud."

A little work of Novatian, formerly ascribed to Tertullian ("Epistola de Cibis Judaicis," Leipsic, 1898, ed. G. Landgraf and C. Weyman, reprinted from "Archiv für Lateinische Lexicographie und Grammatik," xi.), is also directed against the Jewish dietary laws. Isidore of Seville has copied this work almost verbatim in his "Quæstiones in Leviticum," ix. Presumably also by Novatian, and thus of the fourth century, is the treatise "Adversus Judæos," often ascribed to Cyprian; this is, however, somewhat conciliatory in tone (Landgraf, in "Archiv," xi. 1897). In Tertullian's works there is also found a treatise, "Adversus Judæos," similar in many ways to Cyprian's "Testimonia," both having drawn upon the older work, "Altercatio Simonis Judæi et Theophili Christiani" (P. Corssen, Berlin, 1890); in the "Altercatio" the Jew is converted.

After Julian's death Ephraem composed four hymns: against Emperor Julian the Apostate, against heresies, and against the Jews (in "S. Ephraemi Syri Carmina Nisibena," ed. Bickell, Latin transl., Leipsic, 1866; and Overbeck, "S. Ephraemi Syri Aliorumque Opera Selecta," Syriac text, Oxford, 1865). Connected with these in time as well as in subject are the six sermons of John Chrysos-

tom against the Jews ("Homilies," i.). In these he bitterly complains of the Christians for still clinging to Jewish customs, a circumstance mentioned by other Church Fathers as well. Jerome gives striking examples in his commentaries on Matt. xxiii. 5 and on Ezek. xxxiii., and more characteristic still are the following words of his: "The Jewish laws appear to the ignorant and the common people as the very ideals of wisdom and human reason" ("Epistola cxxi. ad Algasiam"). This attitude of the multitude was of course earnestly combated by the Church Fathers; thus an anonymous work mentioned by Photius ("Myriobiblion," ed. Migne, p. 390) is directed against the Jews and against those who, like the Jews, celebrated Easter on the 14th of Nisan. Epiphanius' celebrated work "Adversus Hæreses," as also his "Ancoratus," treats of the Jewish faith; regarding it only as a third religious system, to be reckoned alongside of Scythism and Hellenism, while the only divine revelation is Christianity. The founder of Christian dogmatics, Augustine, in defiance of all dogmatic principles of classification, groups Jews, heathens, and Arians in one class ("Concio ad Catechumenos").

The points animadverted upon by the Church Fathers are manifold; they include such fundamental laws as those of the Sabbath, concerning the transfer of which to Sunday Justin already treats ("Dialogue," ch. 24)—a change which was opposed by Origen (compare Diestel, "Geschichte des Alten Testaments," p. 37), and which Origen (commentary on Rom. vi. 2) and Jerome ("Epistola cxxi. ad Algasiam") seek to prove to be impossible of observance ("Grätz Jubelschrift," p. 191). Circumcision, which is also violently assailed by Origen (see Diestel, "Gesch. des Alten Testaments," p. 37), the dietary laws, and many minor matters, such, for instance, as the washing of the hands, are made in turn to serve as subjects of polemical writing (Origen, commentary on Matt. xi. 8). Indeed, the Church Fathers even in the fourth century afford more information concerning the observance of the Levitical laws of purity than the rabbinical sources, Neubürger (in "Monatsschrift," 1873, p. 433) to the contrary notwithstanding.

Jerome says ("Epistola cix. ad Riparium") that the Samaritans and the Jews considered not only the bodies of the dead as unclean, but also the utensils in the house containing a corpse. Probably in consequence of the Levitical laws of purification the Jews, as well as the Samaritans and heretics, avoided contact with the Christians, a fact of which Jerome bitterly but most unjustly complains (on Isa. lxxv. 4). Equally preposterous is it when

Baseless Justin accuses the Jews, even their
Charges rabbis and sages, of immorality ("Dia-
Against logus cum Tryphone," cxxxiv., cxli.).
the Jews. A characteristic polemical sentence of

Tertullian may well be added in this connection: "We have everything in common, except our women; you have community only in that respect" (see Hefele, "Beiträge zur Kirchengesch." i. 16, Tübingen, 1864).

Perhaps more plausible, though often discussed and denied in more recent times, is the charge of the Church Fathers Justin, Origen, Epiphanius, and

Jerome that the Jews revile and curse Jesus—that is, Christianity—three times a day in their prayers ("Jewish Quarterly Review," v. 130, ix. 515; compare Wulfer, "Adnot. Theriaca Judaica," p. 305; Krauss, "Das Leben Jesu," p. 254, Berlin, 1902).

Dogmatic questions, of course, were the subject of controversy—never-ending questions on the abrogation of the Mosaic law, the person of the Messiah, etc. Yet there was some agreement between Christians and Jews in such matters as Antichrist (see Irenæus, *passim*; Hippolytus, "De Antichristo"; compare "Revue Etudes Juives," xxxviii. 28, and Bousset, "Der Antichrist," Göttingen, 1895), chiliasm (Ephraem Syrus on II Kings iv. 35; compare Sanh. 97a; 'Ab. Zarah 9a; and other Church Fathers), angelology, the Resurrection, etc.

The ability of the Jews to cope successfully with the Christians in these controversies is due to the fact that they were well versed in all the questions under discussion. Jerome assumes that in Scriptural questions every Jew is able to give satisfactory replies (Preface to Samuel). The Jews, moreover, were acquainted not

Skill of Jews in Controversy. only with the original text, but also with the Septuagint, the Apocrypha, Aquila's version, and in general with all works relating to Holy Writ. No sooner had Apollinaris Laodiceus' writings appeared than the Jews read and discussed them (Jerome on Eccl. v. 17).

Especially noteworthy is the fact that the Jews were as well versed in the New Testament as in the Old, being able to explain difficulties therein that puzzled even the officially appointed Christian teachers (*idem* on Isa. xi. 1). Ephraem Syrus asserts, curiously enough (Sermon xxv., in Zingerle, "Bibliothek der Kirchenväter," ii. 271), that the Jews admitted that John the Baptist really had appeared. Origen relates a Jewish tradition concerning Judas Iscariot (on Matt., Com. ser., § 78). Jerome is therefore to be believed when he says that the Jews were often in a position to applaud their own champions (on Ezek. xxxiii. 33), which they did in a sensational way (*ib.* xxxiv. 3). Chrysostom also taxes the Jews with their theatrical manner ("Opera," ed. Montfaucon, i. 656), and before him the just and cautious Justin says the same thing ("Dialogus cum Tryphone," cxxii.).

The Old Testament and the Apocrypha: The main object of the Christian endeavor was to wrest the Old Testament from the Jews and to make of it a Christian weapon. Therefore, as Jerome says (on Micah vii. 9), the Jews were hoping that in the Messianic times the Law and the Prophets would be taken away from the Christians and given to the Jews exclusively (compare the polemic passage in Ex. R. xlvii.). To accomplish their purpose the Christians made use of the allegorical exegesis as developed by Philo and other Jewish Hellenists. The literal meaning, says Origen, is good enough only for the Jews, in order that nothing may be applied to Jesus. Only Isidor of Pelusium had sense enough to warn against applying the whole of the Old Testament to Jesus, lest the Jews and pagans find cause for ridicule (Epistles, i., ep. cvi.; ii., ep. cxv.). Nevertheless the whole Christian

Church fell into this exaggeration; and into what absurdities they were led is shown by the following examples: Sarah and Hagar, already explained allegorically by Paul (Gal. iv. 24), are, according to Clement ("Stromata," i. 5), wisdom

Christians and the world. The two women who appeared before Solomon symbolize the Synagogue and the Church; to the former belongs the dead child; to the latter, the living one, that is, the

Jewish faith is dead; the Christian faith is living (Ephraem Syrus on I Kings iii. 6). These might pass; but it becomes mere childishness when David is made to signify old and worn-out Israel, but Abishag Jesus (on I Kings i. 1). Equally unnatural is the assertion of Fulgentius in his "Epistola Synodica" (in Hefele, "Conciliengesch." 2d ed., ii. 699), that Esau represents the "figura populi Judæorum," and Jacob the people destined to be saved. The Jews made things much more easy by looking upon themselves as Jacob, and upon the Christians as Esau or Edom. At disputations the Christians knew in advance how the Jews would interpret certain passages. "If we ask the Jews who that daughter is [Ps. xlv.], I do not doubt that they will answer: the synagogue" (Jerome, "Epistola xlii. ad Principiam"). The Jews therefore not only opposed the Christian exegesis with the literal sense, but also had ready allegorical interpretations of their own.

Only Tertullian and Irenæus were rational enough to follow the simple literal meaning. The so-called school of Antioch, whose most eminent representatives were Theodore of Mopsuestia and Theodoret, also taught a wholly rational exegesis; although the disciples of this school, such as Cosmas Indicopleustes, used the allegorical and typical methods extensively (Barjean, "L'Ecole Exégétique d'Antioche," Paris, 1898). Still, it can not be denied that other Church Fathers, and above all Jerome, did excellent work in simple exegesis.

Good exegesis depends upon a good text, and this the Christians did not possess; for the copies of the Bible circulating among them were

Corrupted corrupt in a number of passages. At **Texts of the Bible.** a certain disputation between Jews and Christians, the former, naturally

enough, referred to these mistakes, and mocked their opponents for allowing such obvious blunders. Jewish arguments of that kind are often quoted by Justin, Origen, Jerome, and other fathers. In order to free the Church from the just reproaches of the Jews on this score, Origen undertook his gigantic work, the Hexapla (Epiphanius, "De Ponderibus et Mensuris," ii.), in which he frequently restores the Jewish reading (*e.g.*, homily on Num. xvi. 4; Com. on Rom., books ii., xiii.; compare Rufinus, "Apologia s. Invectiv. in Hieronymum," book v., chap. iv.). Justin is honest enough to reject a manifest Christological gloss, the notorious *ἀπὸ τοῦ ξύλου*, which was said to be the reading in Ps. xcvi. (xcv. 10), interpolated in the Greek version ("the Lord reigned from the wood"). Aside from Justin ("Dial. cum Tryphone," lxxiii.), this interpolation is found only in the Latin fathers—Tertullian, Ambrose, Augustine, Leo, and Gregory the Great—who indulge in much nonsense concerning

the words "a ligno." Augustine ("De Civitate Dei," xvi. 3) had a text in Gen. x. 2 in which not seven but eight sons of Japheth were mentioned, a reading that is found in none of the known texts. Hence the Jews rejected all translations, recognizing at most Aquila's "secunda editio," because this was correct (*κατὰ ἀκριβείαν*; Jerome on Ezek. iv. 15). Jerome is the only Church Father who, as against the Septuagint, constantly refers to the "Hebraica veritas." At great cost he had a Bible copied for himself by his Jewish friend ("Adversus Rufinum," book ii.), who borrowed for him, although with "pia fraus," the copies belonging to the synagogue ("Epistola xxxvi. ad Damasum"). Nevertheless, even Jerome accuses the Jews of tampering with the text of the Bible (Mal. ii. 2); and thereafter the accusation constantly recurs.

The Christians fared no better with the Apocrypha, which they rated altogether too high, although these at times offended good taste. Origen fared badly at the hands of the Jews with his apocryphon Susanna ("Epistola ad Africanum de Historia Susannæ," v.) nor was Jerome's obscene legend to Jer. xxix. 21—a legend which is evidently connected with this apocryphon (see N. Brüll's "Jahrbücher," iii. 2), favorably received by the Jews. Jerome (on Matt. xxvii. 9) claims to have received an apocryphon on Jeremiah from a Jewish Nazarite, and to have found in a Hebrew book ("Epistola xxxvi. ad Damasum," "in quodam Hebræo volumine") a history of Lamech; but his Jewish teacher speaks contemptuously of the additions to Daniel, as having been written by some Greek (Preface to Daniel). See BIBLE CANONS.

The importance of the Church Fathers for Jewish learning, already recognized by David Kimhi and Azariah dei Rossi, becomes evident, if one considers that many sentences of Talmud and Midrash can be brought into the right perspective only by the light of the exegesis and the polemics of these Christian writers. Therefore modern Jewish learning turns, although not yet with sufficient eagerness, to the investigation of the works of the Church Fathers.

CHURRIKER, ABRAHAM DAVID: Beni-Israel soldier and police officer; born 1822; died at Puna Nov. 2, 1867. He enlisted in the Third Regiment of the Bombay Native Light Infantry, in

which he served in the Punjab army in the years 1848-49, being present at the siege of Multan and the battle of Gujarat (1849), after which he obtained the Punjab medal with two bars, and was promoted to the rank of subahdar in 1853. In 1855 he was made native commandant of the Ahmednuggur police. During the Mutiny he served against the rebel Bhils at the battles of Tursia, Donger, and Punchalla, and received the Order of Merit of the third class for his gallantry. He was subsequently appointed assistant superintendent of police at Puna (March 16, 1863), and died while serving in that capacity. He was held in such esteem that he was appointed chairman of the Puna municipality. BIBLIOGRAPHY: H. Samuel, *Sketch of the Beni-Israel*, pp. 25-27.

CHUSHAN-RISHATHAIM (R. V., *Cushan-rishathaim*).—**Biblical Data:** A king of Mesopotamia, or, more specifically, of Aram-naharaim ("Aram of the two rivers"), probably a kingdom in northern Mesopotamia (see ARAM). He was the first of the oppressors of Israel in the time of the judges. The tyrant, who held Israel in subjection for eight years after Joshua's death, was finally conquered by the Judahite judge OTHNIEL, who freed Israel from his rule (Judges iii. 8 *et seq.*).

—**Critical View:** Critics (see Moore's commentary to Judges iii.) consider that the two statements: (1) that the land of Israel was conquered by an early Aramaic king, and (2) that the Israelites were freed by a Judahite hero, are contradictory. In all probability the ancient Judean clans had practically no connection with Israel, and, in fact, would not aid the Israelites in Deborah's insurrection (see Judges v.). Budde ("Richter und Samuel," p. 95) also denies the possibility of Israel having been helped by Othniel. He thinks that the later editor of Judges was a Judean who arranged the story so as to give his own tribe a representative among the judges. On the other hand, there is no reason to doubt the truth of the tradition that Arameans may at one time have held Israel in subjugation.

The name "Chushan-rishathaim" appears nowhere outside of the Biblical record. It has not yet been found on the cuneiform monuments; and no satisfactory explanation of its derivation has been given.

J. D. P.

CHWOLSON, DANIEL ABRAMOVICH: Russian Orientalist; born at Wilna Dec. 15, 1819. As he showed marked ability in the study of Hebrew and Talmud, his parents, who were very religious, destined him for the rabbinate, and placed him at the yeshibah of Rabbi Israel Günzburg; but fate had decided that he should serve his race in a quite different sphere. Up to his eighteenth year he did not know any other language than Hebrew; but in three years, without the aid of a teacher, he acquired a fair knowledge of German, French, and Russian. Chwolson in 1841 went to Breslau, and, after three years' preparation in the classical languages, entered, in 1844, the Breslau University, where he devoted himself to the Oriental languages, especially Arabic. There he studied until 1848, and in 1850 he received the degree of doctor of philosophy at the Leipsic University. On

his return to his native country he settled at St. Petersburg, and in 1855, being highly appreciated in learned circles, and having embraced Christianity, he was appointed extraordinary professor of Oriental languages in the university. Three years later he received a similar appointment in the *Dukhovnaya Akademiya*. In 1856 the Imperial Academy issued, at its own expense, Chwolson's first work, which at once established the authority of its author in the field of Oriental research. It was a contribution to the history of religion, entitled "*Die Ssabier und der Ssabismus*," in two volumes. Three years later Chwolson published another important work entitled "*Ueber die Ueberreste der Altbabylonischen Literatur in Arabischen Uebersetzungen*" (St. Petersburg, 1859; also in Russian under the title "*Novootkrytie Pamyatniki*," in "*Russki Vvestnik*," 1859). This work made a great sensation among scholars by the importance of its discoveries and by Chwolson's brilliant combinations concerning the old Babylonian monuments. It was followed in 1860 by "*Ueber Tammuz und die Menschenverehrung bei den Alten Babyloniern*" (ib. 1860).

His reputation being now firmly established, Chwolson devoted himself to his life-task; namely, the defense of his former coreligionists. For blood accusation had been brought against the Jews of Saratov in 1857, and the government now summoned a commission of scholars to see whether any passages could be found in Jewish literature recommending the use of Christian blood for ritual purposes. Chwolson, who was appointed a member of the commission, wrote a report in which he fully demonstrated the groundlessness of the accusations in general, and pointed out that in this particular case of Saratov the evidence given by the two principal witnesses was full of contradictions and absurdities. As the investigation extended over a period of nine years, Chwolson, fearing that meanwhile the Jews of Russia would suffer under this accusation, secured permission to publish his memoir. It accordingly appeared in 1861, in the "*Biblioteka dlya Chteniya*," under the title "*O Nyeotorykh Srednovyevykh Obvinyeniyakh Protiv Yevreyev*."

In 1877 Chwolson had the mortification of seeing a new blood accusation brought against Jews at Kutais, Transcaucasia. At the same time several Russian anti-Semitic writers undertook a campaign against the Talmud, repeating the old charge that it contained blasphemies against Jesus.

His Defense Chwolson again took up the defense of the Jews, and republished his memoir with many additions (St. Petersburg, 1880). A German edition of this work appeared in the year 1901 under the title "*Die Blutanklage und Sonstige Mittelalterliche Beschuldigungen der Juden*," Frankfurt-on-the-Main. In this edition Chwolson, before entering into a discussion of the blood question, expounds the history of the Talmud, and shows that the "Pharisees" condemned by Jesus in the Gospels were not the Rabbinites in general, since the latter were the advocates of progress at the period of Jesus in history; that he meant by the term rather a certain class of false Pharisees, who

were condemned in rabbinical literature also; and that it was not the Pharisees, but the Sadducees, who were the enemies and persecutors of Jesus. He further demonstrates that, according to Talmudical law, Jews were bound to look upon the Christians as their brethren, and that intolerance toward other religions was not a characteristic of the Talmudists. The assertions to the contrary are due partly to misconception, partly to hatred.

The deep-rooted belief that Jesus was crucified by the Jews being the principal cause of the prejudice against them on the part of the Christians, Chwolson, in a dissertation entitled "*Poslyedniyaya Paskhálnaya Vecherya Isusa Christa i Den yevo Smerti*," in "*Christianskoe Chtenie*," St. Petersburg, 1875 (German translation, "*Das Letzte Passamal Christi*," ib. 1892), shows the groundlessness of this belief. He points out that the proceedings of the trial and condemnation of Jesus, as related in the Gospels, were in violation of the rabbinical laws, and consequently could not have been conducted by a Jewish tribunal.

The Jewish race, as well as the Jewish religion, was defended by Chwolson. In a work entitled "*Kharakteristika Semitskikh Narodov*," in "*Russki Vvestnik*," 1872 (German ed., Berlin, 1872), he draws a parallel between the distinguishing characteristics of the Jew, the representative of the Semitic race, and those of the Greek, the representative of the Aryan peoples, not always to the advantage of the latter. The pamphlet was translated into English under the title "*The Semitic Nations*," Cincinnati, 1874.

Chwolson is also the author of the following works: "*Statistische Nachrichten über die Orientalische Facultät der Universität zu St. Petersburg*," Leipzig, 1861; "*Achtzehn Hebräische Grabschriften aus der Krim*," in the "*Mémoires*" of the St. Petersburg Academy of Science, 1865 (Russian translation, "*Vossemnadtzat Nadgrobnikh Nadpisei iz Kryma*," St. Petersburg, 1866); "*Izvyestiya o Khazarakh*," St. Petersburg, 1869 (notes on the Chazars, Burtars, Madjars, Slavs, and Russians from the Arabic of Ibn Dasta); "*Novotkryty Pamyatnik Moavitskavo Tzarya Meshi*," ib. 1870; "*O Vliyanii Geograficheskavo Polozheniya Palestiny na Sudbu Yevreiskavo Naroda*," ib. 1875 (reprinted in "*Sbornik Budushchnosti*," ii. 1-4); "*Vozmozhnyli v Turtzii Reformy?*" ib. 1877 (on the Turkish reform); "*Die Quiescentes He, Waw, und Iod in der Althebräischen Orthographie*," Leyden, 1878 (Russian trans. in "*Christianskoe Chtenie*," St. Petersburg, 1881; English transl.

Chwolson

by T. K. Abbott, Dublin, 1890); "Upotreblayut li Yevrei Christianskuyu Krov?" 2d ed., St. Petersburg, 1879; "O Mnimoi Zamknutosti Yevreyev," *ib.* 1880; "Corpus Inscriptionum Hebraicarum," *ib.* 1882 Russian translation, *ib.* 1884); "Predvaritelnaya Zamyetka o Naidennykh v Semiryechenskoi Oblasti Siriskikh Nadgrobnikh Nadpisyakh," *ib.* 1886; "Syrische Grabschriften aus Semirjetschie," *ib.* 1890, in "Mémoires" of the St. Petersburg Academy; "Hat es Jemals Irgend Einen Grund Gegeben, den Rüsttag des Jüdischen Passahfestes als *Πρότη τῶν Ἀζύμων* zu Bezeichnen?" in "Zeitschrift für Wissenschaftliche Theologie," v. 38, Leipsic, 1896; "Staropechatnyya Yevreiskiya Knigi," on the Hebrew incunabula, St. Petersburg, 1897 (Hebrew transl., "Reshit Ma'ase ha-Defus," Warsaw, 1897). Mention may be made here of Chwolson's early contributions of Jewish biographies from Arabic sources, especially that of Maimonides by Al-Hifta, to the "Orient," 1846.

Chwolson is an indefatigable collector of Hebrew books, and his collection of Hebrew incunabula is one of the most valuable in existence. A catalogue of his Hebrew books was published by him under the title "Reshimat Sifre Yisrael," Wilna, 1897. The Russian government conferred upon Chwolson the title of "Councilor of State" ("Wirklicher Staatsrath").

The learned world in 1899 celebrated Chwolson's literary jubilee by presenting him with a collection of articles written in his honor by prominent European scholars. This was published by Baron David Günzburg under the title "Recueil des Travaux Rédigés en Mémoire du Jubilé Scientifique de M. Daniel Chwolson," Berlin, 1899.

CICERO, MARCUS TULLIUS: Roman statesman and orator; born 106; died 43 B.C. In 59 he delivered in the Aurelian Forum at Rome a speech in behalf of Flaccus, in which he spoke disparagingly of the Jews; this was perhaps not from conviction so much as in the interest of his client ("Pro Flacco," xxviii.), though in Rhodes he had been the disciple in rhetoric of the anti-Jewish writer APOLLONIUS MOLON. Flaccus being accused, among other things, of having appropriated while proconsul of Asia the moneys contributed for the Jewish Temple by Jews under his jurisdiction, Cicero contended that there was an edict forbidding the exporting of gold from the Roman provinces—a plea that was evidently sophistical, since Judea at that time was a part of the Roman empire. He further said, referring to the Jews: "Justice demands that that barbaric superstition should be opposed; and it is to the interest of the state not to regard that Jewish mob which at times breaks out in open riots. . . . At one time the Jewish people took up arms against the Romans; but the gods showed how little they cared for this people, suffering it to be conquered and made tributary." In the Latin the phrase "and to be preserved" occurs after "made tributary," but these words stultify the rest of the sentence, and seem to have been added later by a

Jewish or Christian copyist (Bernays, in "Rheinisches Museum," xii. 464).

It would appear, unless Cicero's words are merely a rhetorical flourish, that the Jews, who insisted on being present on an occasion that concerned them, surrounded the platform, and, supporting each other, became formidable through their numbers. "You know," he said, addressing the plaintiff, "how large the mob is, how it holds together, and what it accomplished in its assemblies." It is not likely, however, that the Jewish mob accomplished anything in this case, for Flaccus was probably discharged (compare Pliny, "Historia Naturalis," xiii. 4).

In the trial of Verres (70 B.C.) Plutarch reports that Cicero, in speaking of one of the accusers, Cecilius, who was suspected of a leaning toward Judaism, made the pun, "Quid Judæo cum Verre?" (What has a Jew to do with a pig?). Finally, in a speech delivered in the Senate, May, 56 B.C., and entitled "De Provinciis Consularibus," Cicero refers to the Jews and Syrians as "races born to be slaves," an expression not uncommon in the mouths of the Romans of his day.

CICIRUACCHIO. See BRUNETTI, ANGELO.

CID, CAMPEADOR RUY DIAZ DE V. VAR (known as **El Cid**): The conqueror of Valencia (1094) and popular hero of the Spanish nation. Lacking money to pay his knights, he negotiated through his nephew, Martin Antolinez, a loan of 600 marks from two wealthy Jews of Burgos, Don Rachel and Don Vidas, and succeeded, despite all their precautions, in defrauding them. According to the "Cronica General de Castilla," the Cid had a Jewish page by the name of Gil, who later assumed his master's name, Diaz, and who is described as a rare example of fidelity. The "Cronica del Cid"—which is reputed to have had its source in an Arabic chronicle written by the Moorish Jew Ibn Alfango, one of the Cid's officials—is in reality a careless compilation of older Arabic, Latin, and Spanish chronicles, and is a much later work than the "Poema del Cid," which appeared about the middle of the twelfth century and bears no traces of Arabic origin or Oriental coloring. The first complete translation of this poem was prepared by O. L. B. Wolff, a Jewish convert to Christianity (Jena, 1850).

CILICIA: Ancient province of southeastern Asia Minor, separated from Syria by the Taurus-Amanus range. In native Phœnician inscriptions the name is given as חִלְךְ or כִּלְךְ (Lidzbarski, "Handbuch der Nordsemitischen Epigraphik," i. 274). Originally inhabited by Phœnicians and Syrians (Herodotus, vii. 91), Cilicia was only gradually Hellenized from

the time of Alexander the Great; and because of its proximity to Syria it was often included in that country, to which it belonged politically. After the death of Alexander it became a Seleucid-Syrian province (I Macc. xi. 14; II Macc. iv. 36); it was afterward a part of Armenia; and from

Name and Situation. 63 B.C. it belonged to Rome. As a Roman province Cilicia was known to the author of the Book of Judith; although the Babylonian monarchy is referred to therein (Judith i. 7; ii. 21, 25).

Josephus ("Ant." i. 6, § 1) asserts that the *Θάρσος* of the Bible (Gen. x. 4, "Tarshish") is the old name for Cilicia. He expressly identifies *Θάρσος* with *Ταρσός* ("Tarsus"), the renowned capital of Cilicia; but this is philologically impossible. He also makes the prophet Jonah travel to Tarsus in Cilicia ("Ant." ix. 10, § 2), and mentions the country in several other connections. According to Josephus, it was by way of Cilicia that Pompey (63 B.C.) returned from Judea to Rome with Aristobulus as his prisoner ("B. J." i. 7, § 7). Herod with his sons embarked for Cilicia, landing at Eleusa, where he met Archelaus, King of Cappadocia ("Ant." xvi. 4, § 6; "B. J." i. 23, § 4). At times Celenderis in Cilicia, a city otherwise unknown, is referred to ("Ant." xvii. 5, § 1; "B. J." i. 31, § 3). Alexander, a great-great-grandson of Herod, became king of an island of Cilicia by the favor of Vespasian ("Ant." xviii. 5, § 4). The infamous Berenice, after her husband's death, married Polemon, King of Cilicia ("Ant." xx. 7, § 3). Antiochus, King of Commagene, who at first joined the Romans against the Jews, fled to Tarsus in Cilicia, where he was taken prisoner by Pætus ("B. J." vii. 7, §§ 2, 3). Mopsuestia, too, a Cilician city which afterward became celebrated through its Biblical exegesis, is referred to by Josephus ("Ant." xiii. 13, § 4). Cilicians were among the mercenaries of Alexander Jannæus (*ib.* § 5; "B. J." i. 4, § 3) and those of Herod.

In the Talmud the country is referred to as "Kilikah" after the Greek name. The cities of Tarsus, Taurus Amanus, and Zephyrion are mentioned; but it is not certain that the Cilician Zephyrion is intended. The Syrians (Payne Smith, "Thesaurus Syriacus," p. 3602) also mentioned Tarsus and Zephyrus among the important cities of Cilicia; but "Aulon Kilikios" (Targ. Yer. Num. xxxiv. 8) is the name of a place in Moab (compare Josephus, "Ant." xiii. 5, § 4).

That Jews were dwelling in Cilicia is known from Philo ("Legatio ad Caium," p. 36). At the time of the Apostles many Cilician Jews lived in Jerusalem (Acts vi. 9); among them Paul (*ib.* ix. 11, xxi. 39, xxii. 3), whose birthplace was Tarsus, the capital of Cilicia. Nahum, the son of Rabbi Simai, preached in Tarsus (Pesik. R. 15; ed. Friedmann, p. 78b); so that there must have been a congregation and a synagogue there. Some explain the "synagogue of the Tarsiyim" as meaning "people of Tarsus." In Jaffa a Greek epitaph of a Jew, "son of Jose of Tarsus," has been found. Epiphanius ("Hæres." xxx. 11) states that the patriarch Judah, of the fourth century, sent messengers to Cilicia to collect tithes and offerings in every city. In Corycos in Cilicia the sarcophagus of a Jew named Alexander and his

wife has been found. In Rome the epitaph of a Jew, "Asaphat of Tarsus" ("Jahrb. Gesch. der Jud." ii. 287), has been deciphered; but the reading is doubtful. Christianity spread rapidly in Cilicia; and this indicates that there were numerous Jews in the province.

Cilicia produced much wine (Pliny, "Historia Naturalis," xiv. 11), to which reference is often made in the Talmud (Tosef., Sheb. v. 2; Yer. Hal. 60b). The Cilician bean is also frequently mentioned (Ma'as. v. 8), as is the so-called

Products. "cilicium," a coarse cloth made of Cilician goat-hair (Kelim xix. 1). The word "cilicium" is used by the Vulgate to render the Biblical word *שַׂק* ("sack"); and in the ecclesiastical life of the Christians it has a certain religious significance. Curly hair on the body is designated as "cilicinus" by the Rabbis (Sifra, ed. Weiss, 76c).

Though Cilicia came under various rulers, it was not until its conquest by the Turks that the Jews of the country attained to any prominence.

CINCINNATI: Capital of Hamilton county, Ohio, U. S. A. Its Jewish community is the oldest west of the Alleghany Mountains. In March, 1817, Joseph Jonas, a young English Jew, a native

Hebrew Union College, Cincinnati, O.
(From a photograph.)

of Exeter, arrived at the metropolis of the Ohio valley. He had left his English home with the avowed intention of settling in Cincinnati. Friends in Philadelphia endeavored to induce him to relinquish his purpose of going to a spot so far removed from all association with his coreligionists, and said

to him: "In the wilds of America, and entirely among Gentiles, you will forget your religion and your God." However, the young man remained deaf to the persuasions of his friends, and per-

English severed in his original purpose. For
Jews two years he was the only Jew in the
Settle. Western town. In 1819 he was joined by three others, Lewis Cohen of Lon-

don, Barnet Levi of Liverpool, and Jonas Levy of Exeter. These four with David Israel Johnson of Brookville, Ind., a frontier trading-station, conducted on the holidays in the autumn of 1819 the first Jewish service in the western portion of the United States. Similar services were held in the three succeeding falls. Newcomers continued to arrive, the early settlers being mostly Englishmen.

The first Jewish child born in Cincinnati (June 2, 1821) was Frederick A., son of the above-mentioned David Israel Johnson and his wife Eliza. This couple, also English, had removed to Cincinnati from Brookville, where they had first settled. The first couple to be joined in wedlock were Morris Symonds and Rebekah Hyams, who were married Sept. 15, 1824. The first death in the commu-

nity was that of Benjamin Leib or Lape, in 1821. This man, who had not been known as a Jew, when he felt death to be approaching, asked that three of the Jewish residents of the town be called. He disclosed to them that he was a Jew. He had married a Christian wife, and had reared his children as Christians, but he begged to be buried as a Jew. There was no Jewish burial-ground in the town. The few Jews living in the city at once proceeded to acquire a small plot of ground to be used as a cemetery. Here they buried their repentant coreligionist. This plot, which was afterward

enlarged, was used as the cemetery of the Jewish community till the year 1850. At present it is situated in the heart of the city, on the corner of Central avenue and Chestnut street.

There were not enough settlers to form a congregation till the year 1824, when the number of Jewish inhabitants of the town had reached about twenty. On Jan. 4 of that year a preliminary meeting was held to consider the advisability of organizing a congregation; and two weeks later, on Jan. 18, the Congregation B'ne Israel was formally organized;

those in attendance were Solomon Buckingham, David I. Johnson, Joseph Jonas, Samuel Jonas, Jonas Levy, Morris Moses, Phineas Moses, Simeon Moses, Solomon Moses, and Morris Symonds. On Jan. 8, 1830, the General Assembly of Ohio granted the congregation a charter whereby it was incorporated under the laws of the state.

For twelve years the congregation worshiped in a room rented for the purpose; but during all this time the small congregation was exerting itself to secure a permanent home. Appeals were made to the Jewish congregations in various parts of the country. Philadelphia, Charleston, S. C., and New

Orleans lent a helping hand. Contributions were even received from Portsmouth, England, whence a number of Cincinnatians had emigrated, and from Barbados in the West Indies. On June 11, 1835, the corner-stone of the first synagogue was laid; and on Sept. 9, 1836, the synagogue was dedicated with appropriate ceremonies. The members of the congregation had conducted the services up to this time. The first official reader was Joseph Samuels. He served a very short time, and was succeeded by Henry Harris, who was followed in 1838 by Hart Judah.

B'ne Yeshurun Temple, Cincinnati, O.
(From a photograph.)

The first benevolent association was organized in 1838 with Phineas Moses as president: its object was to assist needy coreligionists. The first religious school was established in 1842, Mrs. Louisa Symonds becoming its first superintendent. This school was short-lived.

Early Religious Institutions. In 1845 a Talmud Torah school was established, which gave way the following year to the Hebrew Institute, established by James K. Gutheim.

This also flourished but a short time; for with the departure of Gutheim for New Orleans the career of the institute closed.

During the fourth decade of the century quite a number of Germans arrived in the city. These were not in sympathy with their English coreligionists, and determined to form another congregation. On Sept. 19, 1841, the B'ne Yeshurun congregation was organized by these Germans, and was incorporated under the laws of the state Feb. 28, 1842. The first reader was Simon Bamberger. In 1847 James K. Gutheim was elected lecturer and reader of the congregation. He served till 1848, and was succeeded by H. A. Henry and A. Rosenfeld. The assumption of the office of rabbi in the B'ne Yeshurun congregation by Isaac M. Wise in April, 1854, and in the B'ne Israel congregation by Max Lilienthal in June, 1855, gave the Jewish community of Cincinnati a commanding position. Owing to their efforts in the cause of Judaism, Cincinnati became a Jewish center indeed and the seat of a number of movements that were national in scope. The Union of American Hebrew Congregations, the Hebrew Union College, the Hebrew Sabbath-School Union, and the Central Conference of American Rabbis have their seat in Cincinnati.

Becomes a Jewish Center. Dr. Lilienthal died in office April 5, 1882. He was succeeded as rabbi of the Congregation B'ne Israel by Raphael Benjamin, who served till Nov., 1888, when the present incumbent, Dr. David Philipson, took charge of the congregation. Dr. Wise served as rabbi of the B'ne Yeshurun congregation till the day of his death, March 26, 1900; being succeeded by his associate, Dr. Louis Grossman. Dr. Grossman had been preceded as associate rabbi by Rabbi Charles S. Levi, who served from Sept., 1889, to Sept., 1898.

The other congregations of the city are the Adath Israel, organized in 1847; the Ahabath Achim, organized in 1848; and the Sherith Israel, organized in 1855. There are also a number of small congregations. Each of these congregations conducts its own religious school, and there are also two free religious schools; one holding its sessions in the schoolrooms of the Mound street temple (B'ne Israel), and the other, conducted under the auspices of the local branch of the Council of Jewish Women, meeting at the Jewish Settlement.

Educational Work. A large Talmud Torah school is conducted by the Talmud Torah Association on Barr street. The Hebrew Union College is located in Cincinnati. Night classes for various English and industrial branches of study are a feature of the work of the Jewish Settlement. The Jewish Kitchen Garden

Association conducts a large school for girls in the building of the United Jewish Charities every Sunday morning, where instruction is given in dress-making, millinery, housekeeping, cooking, stenography, typewriting, and allied subjects. An industrial school for girls is conducted during the summer months in the vestry-rooms of the Plum street temple (B'ne Yeshurun), and one for boys during the school year in the Ohio Mechanics' Institute building. There is a training-school for nurses in connection with the Jewish Hospital.

The Jewish charities of Cincinnati are exceptionally well organized. All the relief and educational agencies joined their forces in April, 1896, and formed the United Jewish Charities. This body comprises the following federated societies: Hebrew General Relief Association, Jewish Ladies' Sewing Society, Jewish Foster Home, Jewish Kitchen Garden Association, Boys' Industrial School, Girls' Industrial School, and Society for the Relief of Jewish Sick Poor. The United Charities also grants an annual subvention to the Denver Hospital for Consumptives and to the local Jewish Settlement Association. The seat of the National Jewish Charities is also in Cincinnati, where the national organization was called into being in May, 1899. Besides the United Jewish Charities, Cincinnati supports the Jewish Hospital and the Home for the Jewish Aged and Infirm, and is one of the largest contributors to the Jewish Orphan Asylum at Cleveland.

The Jews of Cincinnati have always shown great public spirit and have filled many local positions of trust, as well as state, judicial, and governmental offices. Henry Mack, Charles Fleischmann, James Brown, and Alfred M. Cohen have been members of the Ohio senate, and Joseph Jonas, Jacob Wolf, Daniel Wolf, and Harry M. Hoffheimer have been members of the legislature. Jacob Shroder was judge of the court of common pleas for a number of years, and Frederick S. Spiegel now holds (1902) the same position. Julius Fleischmann is the present mayor of the city. Nathaniel Newburgh was appointed appraiser of merchandise by President Cleveland during his first administration, and Bernhard Bettmann has been collector of internal revenue since 1897.

The Jewish newspapers published in Cincinnati are "The American Israelite," established 1854, and "Die Deborah," established 1855; "The Sabbath Visitor," established 1874, was discontinued in 1892.

The Jews of the city were estimated in 1900 at 15,000, in a total population of 325,902.

CINNAMON: The bark of the *Cinnamomum Zeylanicum*, a plant so called botanically because growing best in Ceylon. A variety often substituted for it, cassia, comes from China. Cinnamon was known in early times to the Hebrews. It was used in making the anointing-oil (Ex. xxx. 23), and,

further, as a mere perfume (Prov. vii. 17). In the Song of Solomon (iv. 14) it is mentioned along with other fragrant woods. Gesenius and Lagarde consider the Hebrew ("kinnamon") to be a loan-word from the Greek (*κιννάμωμον*), although Herodotus (iii. 111) states that the Greeks themselves borrowed it from the Phenicians. It seems that both Hebrew and Greek took it from the Phenician.

CIPHER. See GEMATRIA.

CIRCUMCISION (מילה; in Biblical Hebrew, מילה = "the cutting away" of the ערלה = "foreskin").—**Biblical Data:** A religious rite performed on male children of Jews on the eighth day after birth; also on their slaves, whether born in the house or not. It was enjoined upon Abraham and his descendants as "a token of the covenant" concluded with him by God for all generations, the penalty of non-observance being "karet," excision from the people (Gen. xvii. 10-14, xxi. 4; Lev. xii. 3). Aliens had to undergo circumcision before they could be allowed to partake of the covenant-feast of Passover (Ex. xii. 48), or marry into a Jewish family (Gen. xxxiv. 14-16). It was "a reproach" for the Israelite to be uncircumcised (Josh. v. 9; on "the reproach of Egypt" see below). Hence the name "arelim" (uncircumcised) became an opprobrious term, denoting the Philistines and other non-Israelites (I Sam. xiv. 6, xxxi. 4; II Sam. i. 20; compare Judges xiv. 3; I Sam. xvii. 26), and used synonymously with "fame" (unclean) for heathen (Isa. lii. 1). The word "arel" (uncircumcised) is also employed for "unclean" (Lev. xxvi. 41, "their uncircumcised hearts"; compare Jer. ix. 25; Ezek. xliv. 7, 9); it is even applied to the first three years' fruit of a tree, which is forbidden (Lev. xix. 23).

This shows how deeply rooted in the minds of the ancient Hebrews was the idea that circumcision was an indispensable act of national consecration and purification. Nevertheless, there are several facts in the Bible which do not seem to be

Original in full harmony with this view. According to Ex. iv. 24-26, the circumcision of the first-born son was omitted by Moses, and the Lord therefore "sought to kill him"; whereupon "Zipporah took a flint and cut off the foreskin of her son, and made it touch [A. V., "cast it at"] his [Moses'] feet," saying, "A bridegroom of blood art thou to me." Thus Moses was ransomed by the blood of his son's circumcision.

Strange as was this omission on the part of Moses, the omission of the rite on the part of the Israelites in the wilderness was no less singular. As recorded in Josh. v. 2-9, "all the people that came out" of Egypt were circumcised, but those "born in the wilderness" were not; and therefore Joshua, before the celebration of the Passover, had them circumcised with knives of flint (compare Ex. iv. 25) at Gilgal, which name is explained as "the rolling away" of "the reproach of Egypt" (see GILGAL).

Attention has also been called to the peculiar attitude of Deuteronomy and the Prophets toward circumcision. Deut. x. 16 (compare *ib.* xxx. 6 and Jer. iv. 4) says, "Circumcise the foreskin of your

heart," thus giving the rite a spiritual meaning; circumcision as a physical act being enjoined nowhere in the whole book (see Geiger, "Urschrift," ii. 79, and Montefiore, "Hibbert Lectures," 1892, pp. 229, 337). Jer. ix. 25, 26 goes so far as to say that circumcised and uncircumcised will be punished alike by the Lord; for "all the nations are uncircumcised, and all the house of Israel are uncircumcised in heart." Obviously, the prophetic view of the sacredness of the rite differed from that of the people.

—**Historical View:** Circumcision was known to be not an exclusively Jewish rite. Ishmael was circumcised when thirteen years old; that is, at the age of puberty (Gen. xvii. 25). The rite was, in fact, practised not only in ancient Arabia (Josephus, "Ant." i. 12, § 2; Origen, "Ad Genesisin," i. 14; Eusebius, "Preparatio Evangelica," vi. 11; Shahras-tani, transl. Haarbrücker, ii. 35, § 4; Sozomen, "Hist. Eccl." vi. 38), but also in Ethiopia (Philostorgius, "Hist. Eccl." iii. 4; Strabo, xvii. 776, 824), as well as by almost all the primitive tribes of Africa and by many of Australia (see R. Andree, "Die Beschneidung," in "Archiv für Anthropologie," 1880, xiii. 53-78; Ploss, "Geschichtliches und Ethnologisches über Knaben-Beschneidung," in "Archiv für Gesch. der Medicin," 1885, viii.; R. Hartmann, "Die Völker Afrikas," 1879, i. 178).

This accumulation of evidence points to the fact that circumcision in its primitive form was connected with marriage, whether performed with a view to the facilitation of cohabitation, as Ploss thinks, or, as is far more in accordance with the psychology of all primitive as well as of all ancient nations, to the consecration of the generative powers. At all events, the age of puberty is most frequently selected for the rite; and, after weeks of purification, accompanied by tests of courage, the boy is formally graduated into manhood and, bearing a new name, is ushered into the bridal chamber (Niebuhr, "Beschreibung von Arabien," p. 269; Andree, *l.c.*). For Egypt the practise is attested not alone by Herodotus (ii. 37, 104), Philo ("De Circumcisione," § 2; ed. Mangey, p. 210), and Ambrosius ("De Abrahamo," ii. 348), but also by the monuments (see Ebers, "Ägypten und die Bücher Mose's," i. 278) and the very valuable Greek text published and discussed by R. Reizenstein ("Zwei Religionsgeschichtliche Fragen," Strasburg, 1901). The rite of circumcision signified admission of the boy at the age of puberty into the rank of priesthood, as "web" (the Egyptian for "pure" or "holy"), the mother's presence being considered especially necessary. In Biblical literature the rite is incidental to the recognition of heirship, and to the adoption of a new name (Gen. xvii. 4-14). Moses' neglect to circumcise Gershom was possibly associated in some way with his (Moses') marriage to a Midianite woman. Zipporah, however, ultimately showed her allegiance to the God of the Hebrews by performing the rite herself. The fact that in Arabic "ḥatana" signifies both "to marry" (compare the Hebrew חתן = "bridegroom," and חותן = "father-in-law") and "to circumcise" shows an original connection between the rite and the nuptial ceremony; whereas the terms "ṭuhur" and "taḥhir" (purification), applied to circumcision

in Arabia (see Wellhausen, "Skizzen und Vorarbeiten," 1887, iii. 154 *et seq.*), indicate the later religious view (see also Kohler, in "Z. D. M. G." xxiii. 680, and Nöldeke, *ib.* xl. 737).

The critical view of the Pentateuch, which ascribes Gen. xvii. to the late Priestly Code, and Josh. v. 4-7 to the interpolation of the redactor (see Dillmann, commentary on the passage), sufficiently accounts for the non-circumcision of young Israelites prior to their entrance into Canaan by the following theory: The ancient Hebrews followed the more primitive custom of undergoing circumcision at the age of puberty, the circumcision of young warriors at that age signifying the consecration of their manhood to their task as men of the covenant battling against the uncircumcised inhabitants (see Reizenstein, *l.c.*). After the settlement of the Israelites in Palestine, the rite was transferred to the eighth day after birth. In fixing the time of the initiatory rite at an age when its severity would be least felt, the Mosaic law shows its superiority over the older custom. Explanations which find the origin of circumcision in hygienic motives, suggested first by Philo (*l.c.*) and Josephus ("Contra Ap." ii. 13), then by Saadia ("Emunot we-De'ot," iii. 10) and Maimonides ("Moreh Nebukim," iii. 49), and often repeated in modern times, from Michaelis ("Mosaisches Recht," iv. 184-186) down to Rosenzweig ("Zur Beschneidungsfrage," 1878), who recommends its introduction into the Prussian army, have no other than a historical value.

—In Apocryphal and Rabbinical Literature:

During the Babylonian exile the Sabbath and circumcision became the characteristic symbols of Judaism. This seems to be the underlying idea of Isa. lvi. 4: "The eunuchs that keep my Sabbath" still "hold fast by my covenant," though not having "the sign of the covenant" (Gen. xvii. 11, Hebr.) upon their flesh. Contact with Grecian life, especially at the games of the arena, made this distinction obnoxious to the Hellenists, or anti-nationalists; and the consequence was their attempt to appear like the Greeks by epispasm ("making themselves foreskins"; I Macc. i. 15; Josephus, "Ant." xii. 5, § 1; Assumptio Mosis, viii.; I Cor. vii. 18; *מישן ערלה*, Tosef., Shab. xv. 9; Yeb. 72a, b; Yer. Peah i. 16b; Yeb. viii. 9a). All the more did the law-observing Jews defy the edict of Antiochus Epiphanes prohibiting circumcision (I Macc. i. 48, 60; ii. 46); and the Jewish women showed their loyalty to the Law, even at the risk of their lives, by themselves circumcising their sons.

In order to prevent the obliteration of the "seal of the covenant" (*קרום ברית*) on the flesh, as circumcision was henceforth called, the Rabbis, probably after the war of Bar Kokba (see Yeb. *l.c.*; Gen. R. xlv.), instituted the "peri'ah" (the laying bare of the glans), without which circumcision was declared to be of no value (Shab. xxx. 6).

Thenceforward circumcision was the mark of Jewish loyalty. The Book of Jubilees (xv. 26-27), written in the time of John Hyrcanus, has the following: "Whosoever is uncircumcised belongs to 'the sons of Belial,' to 'the children of doom and eternal perdition'; for all the angels of the Presence and of the Glorification have been so from the

day of their creation, and God's anger will be kindled against the children of the covenant if they make the members of their body appear like those of the Gentiles, and they will be expelled and exterminated from the earth" (see Charles, "The Book of Jubilees," lv.-lx. iii. 190-192). To be born circumcised was regarded as the privilege of the saints, from Adam, "who was made in the image of God," and Moses to Zerubbabel (see Ab. R. N., ed. Schechter, p. 153; Soṭah 12a). And great importance was laid upon the shedding of a drop of blood as a sign of the covenant when a child or a proselyte born circumcised was to be initiated into Judaism (Shab. 135-137b).

Uncircumcision being a blemish, circumcision was to remove it, and to render Abraham and his descendants "perfect" (Ned. 31b; Gen. R. xlv., after Gen. xvii. 1). "Isaac should be the offspring of the consecrated patriarch" (Gen. R. *l.c.*). He who destroys the covenant sign of Abraham (by epispasm), has no portion in the world to come (Ab. iii. 17; Sifre, Num. xv. 31; Sanh. 99). According to Pirḳe R. El. xxix., it was Shem who circumcised Abraham and Ishmael on the Day of Atonement; and the blood of the covenant then shed is ever before God on that day to serve as an atoning power. According to the same Midrash, Pharaoh prevented the Hebrew slaves from performing the rite, but when the Passover time came and brought

Abrahamic Covenant. them deliverance, they underwent circumcision, and mingled the blood of the paschal lamb with that of the Abrahamic covenant, wherefore (Ezek. xvi. 6) God repeats the words: "In thy blood live!"

In the wilderness, however, the Israelites omitted only the peri'ah, according to R. Ishmael; according to the other rabbis, they did not circumcise their children on account of the fatigue of the journey. According to Sifre, Beha'aloteka, 67, and Ex. R. xix., the tribe of Levi was the only one that "kept the [Abrahamic] covenant" (Deut. xxxiii. 9). They had, says R. Ishmael, piled up the foreskins of the circumcision in the wilderness, and covered them with earth. To this Balaam referred when he asked: "Who can count the dust of Jacob?" (Num. xxiii. 10); and for this reason it became customary after circumcision to cover the foreskin with earth.

Loyalty to the Abrahamic covenant was shown by the Gentiles who voluntarily espoused the Jewish faith, but not by the slaves of Abraham upon whom circumcision was enforced, the patriarch having done so only because he wished to conform to the Levitical laws of purity. Nor did Esau practise circumcision in his own household: "he despised his birthright" (Gen. xxv. 34; Tanna debe Eliyahu R. xxiv. [xxii.]). The Ephraimite kingdom also failed to observe the Abrahamic rite; wherefore Elijah swore "there shall not be dew nor rain these years, but according to my word" (I Kings xvii. 1). Elijah's lot was ever to be persecuted by Jezebel; therefore the Lord also swore an oath that no "berit milah" (rite of circumcision) should be celebrated in Israel without the presence of Elijah: hence a chair is always reserved on that occasion for Elijah, "the angel [A. V., "messenger"] of the

covenant" (Mal. iii. 1; Pirke R. El. xix.; see ELIJAH'S CHAIR).

Talismanic powers were ascribed to the sign of the covenant, as also to the phylacteries. According to the rabbis, David, when he saw himself at the bath stripped of the tefillin and other religious insignia, thanked God for the Abrahamic rite protecting him, and sang the Twelfth Psalm, which bears the superscription "Al-ha Sheminit" (lit., "on the eighth," explained by the Rabbis as referring to the rite of circumcision; Yeb. 43b; compare *ib.* 53b.) Circumcision causes an angel to save the Israelites from the pangs of Gehenna, to which, according to Ezek. xxxii. 24, the uncircumcised ('arelim) are consigned (Tan., Lek Leka, ed. Buber, 27; Ex. R. xix.). According to Gen. R. xlviii., it is Abraham who sits at the gate of Gehenna to save the circumcised (see ABRAHAM). "Circumcision is of such importance that heaven and earth are held only by the fulfilment of that covenant [after Jer. xxxi. 35]; and all the merits of Moses could not shield him against the danger to which he was exposed in consequence of the neglect of this command. It is a thirteenfold covenant" (Ned. 34b).

Saving Power of Circumcision. But "it is also an occasion of highest joy" (Meg. 16b, with reference to Esth. viii. 16, and Ps. cxix. 162), especially "for the mother" (Git. 57a, with reference to Ps. cxiii. 9), the berit milah having been made the occasion of great festivity from the days of Abraham (Shab. 130a; Pirke R. El. l.c.; see BANQUETS).

"Circumcision is one of the commandments which, having been accepted with joy, are ever obeyed with joy, and, because the people gave their lives for them, are observed with steadfast loyalty" (R. Simeon b. Eleazar, in Shab. 130a). This refers to the martyrdom which the Jewish people underwent during the Hadrianic persecution, which was especially directed against circumcision. "We ought to abstain from marrying," said R. Ishmael b. Elisha, "since the Roman [Yawan] government forbids us to celebrate the festival of the birth of a son ['yeshua' ha-ben, or 'shabua' ha-ben']; but then the world would come to a standstill" (B. B. 60b). "Why art thou, O Israel, led forth to be slain? . . . Because I have circumcised my son! . . . It is the love I show for my Father in heaven" (Mek., Yitro, Ba-Hodesh, vi.). "Why did God not make man as he wanted him to be?" asked Tinnius (Tyranus) Rufus, with biting sarcasm; and Akiba replied, "In order that man should perfect himself by the fulfilment of a divine command" (Tan., Tazria', ed. Buber, 7).

In Gen. R. xlvi. the arguments for and against circumcision are put forth in the form of a dialogue between God and Abraham. Replying to the question why the command had

Arguments for and Against. not been given to Adam if it was so dear to Him, God reminds Abraham that it should be sufficient for him that he and God are in the world—a play on "Shaddai"—and that the maintenance of the world depends upon the acceptance of the commandment. But Abraham objects that circumcision is an obstacle to the conversion of the

Gentiles. This trouble, also, is overcome by the declaration of God's sufficiency to protect both Abraham and the world. In fact, circumcision had been deferred from the time of Abraham's conversion—in the forty-eighth year of his life—until his ninety-ninth year, for the express purpose of facilitating the making of proselytes.

The problem of proselytism, indeed, had stirred Judaism to its very depths, and had almost separated Hellenistic from Palestinian Judaism. The former would admit Gentiles after having undergone the rite of baptism; that is, regeneration by living water (see Sibyllines. iv. 164 *et seq.*: "Wash your whole stature clean from impurity in running streams, and, with hands uplifted to heaven, ask for forgiveness for your doing; then the worship of God will heal gross impiety"). With this view, Josephus relates ("Ant." xx. 2, §§ 3, 4), a Jew named Ananias sought to make converts to Judaism. He succeeded with Queen Helena and the women of the court, and her son Izates was eager to follow her example. But Izates' mother, on hearing of his determination to submit to circumcision also, implored him not to do so, as the people might take umbrage at his act of compliance with strange and abhorrent rites, and overthrow the dynasty. His instructor, Ananias, also tried to dissuade him and to allay his scruples with arguments based on the meritoriousness of his intention, which would atone, in the sight of God, for the non-performance of the rite. But, through the influence of another Jew, Eleazar, from Galilee, the home of the Zealot party, Izates was easily induced to submit to the operation; and he informed both his mother and Ananias of what he had done. He was rewarded for his fortitude and piety; for "God . . . preserved both Izates and his sons when they had fallen into many dangers, and procured their deliverance when it seemed impossible, demonstrating thereby that the

fruit of piety is not lost to those who wait for Him and who put their sole trust in Him." Compare the story related in Gen. R. xlvi.: "King Monobaz and Izates, sons of King Ptolemy [an error: read "Monobaz" for "Ptolemy"], read the Book of Genesis together. When they came to the passage xvii. 11 they wept; and each, without the other's knowledge, underwent circumcision. The next time they read the chapter together one said to the other: 'Wo unto me, my brother!' They then disclosed what they had done. Their mother, on hearing of the matter, told their father that they had needed circumcision as a precaution against phimosis, and he signified his approval. As a reward for their action they were saved by an angel from being killed in an ambush during a war in which they had become involved" (compare Grätz, "Gesch." iii. 430 *et seq.*).

The issue between the Zealot and Liberal parties regarding the circumcision of proselytes remained an open one in tannaitic times; R. Joshua asserting that the bath, or baptismal rite, rendered a person a full proselyte without circumcision, as Israel, when receiving the Law, required no initiation other than the purificative bath; while R. Eliezer makes circumcision a condition for the admission of

a proselyte, and declares the baptismal rite to be of no consequence (Yeb. 46a). A similar controversy between the Shammaites and the Hillelites is given (Shab. 137a) regarding a proselyte born circumcised: the former demanding the

Cir- spilling of a drop of blood of the cov-
cumcision enant; the latter declaring it to be
Necessary unnecessary. The rigorous Shamma-
or Not? ite view, voiced in the Book of Jubi-
lees (*l.c.*), prevailed in the time of

King John Hyrcanus, who forced the Abrahamic rite upon the Idumeans, and in that of King Aristobulus, who made the Itureans undergo circumcision (Josephus, "Ant." xiii. 9, § 1; 11, § 8). According to Esth. viii. 17, LXX., the Persians who, from fear of the Jews after Haman's defeat, "became Jews," were circumcised.

The rigorous view is echoed also in the Midrash: "If thy sons accept My Godhead [by undergoing circumcision] I shall be their God and bring them into the land; but if they do not observe My covenant in regard either to circumcision or to the Sabbath, they shall not enter the land of promise" (Gen. R. xlii., with reference to Gen. xvii. 8-9). "The Sabbath-keepers who are not circumcised are intruders, and deserve punishment," (נִי שֶׁשָּׁבַת חַיִּיב מִיתָה) (Deut. R. i. and Ma'ase Torah, ed. Schönblum; see also Hippolytus, "Refutatio Omnium Hæresium," ix. 21).

It appears, however, that while the Palestinian Jews accepted the uncircumcised proselytes only as "Proselytes of the Gate" ("Gere Toshab," Yeb. 47b; see PROSELYTES), non-Palestinian Judaism did not make such a distinction until the Roman wars, when the more rigorous view became prevalent everywhere. Thus Flavius Clemens, a nephew of the emperors Titus and Domitian, when with his wife Domitilla he embraced the Jewish faith, underwent circumcision, for which he suffered the penalty of death (see Grätz, "Gesch." iv. 403 *et seq.*, 702).

It was chiefly this rigorous feature of Jewish proselytism which provoked the hostile measures of the emperor Hadrian. And, furthermore, it was the discussion of this same question among the Jews—whether the seal of circumcision, חֶתֶם בְּרִית (see Shab. 137b; Ex. R. xix.; Targ. Cant. iii. 8; Hermas, "Similitudines," viii. 6, ix. 16; II Clemens to the Corinthians, vii. 6, viii. 6; GRACE AT MEALS; for heathen parallels of the expression "seal" see Anrich, "Das Antike Mysterienwesen," pp. 123-124, and Reizenstein, *l.c.* pp. 7-8), might not find its substitute in "the seal of baptism"—which led Paul to urge the latter in opposition to the former (Rom. ii. 25 *et seq.*, iv. 11, and elsewhere), just as he was led to adopt the antinomistic or antinational view, which had its exponents in Alexandria (see Philo, "De Migratione Abrahami," xvi.; ed. Mangey, i. 450).

While in Biblical times the mother (perhaps generally) performed the operation, it was in later times performed by a surgeon, רופא or אומן, also called by the specific name "mohel" (מֹהֵל; see Josephus, "Ant." xx. 2, § 4; B. B. 21a; Shab. 130b, 133b, 135, 156a) or "gozer" (גֹּזֵר). In the Codex Justinianus (i. 9, 10) physicians were prohibited from performing the operation on Roman citizens who had become converts to Judaism.

Unlike Christian baptism, circumcision, however important it may be, is not a sacrament which gives the Jew his religious character as a Jew. An uncircumcised Jew is a full Jew by birth

Cir- (Hul. 4b; 'Ab. Zarah 27a; Shulhan
cumcision 'Aruk, Yoreh De'ah, 264, 1). A non-
Not a Sac- Jewish physician may, according to
rament. R. Meir, in the absence of a Jewish expert, perform the ceremony, as may women, slaves, and children ('Ab. Zarah 26b; Men. 42a; Maimonides, "Yad," Milah, ii. 1; Yoreh De'ah, *l.c.*), although the more rigorous Shammaite rule was forced by the Amoraim; compare Gen. R. *l.c.*

Circumcision must, whenever possible, take place on the eighth day, even when this falls upon the Sabbath (Shab. xix. 1). The Samaritans and the Karaites, however, dissent from this rule (see KARAITES and SAMARITANS); if by reason of the child's debility or sickness the ceremony is postponed, it can not take place on the Sabbath (Shab. 137a). It is the duty of the father to have his child circumcised; and if he fails in this, the bet din of the city must see that the rite is performed (Kid. 29a).

As early as the geonic time the ceremony had been transferred from the house of the parents to the synagogue, where it took place after the service in the presence of the whole congregation. In order to give it the character of a festival certain prayers of a mournful nature, such as "Widduy" and "Taḥanun," were omitted, and occasionally appropriate hymns were recited instead. In the tenth century there appears, in addition to the mohel and the father of the child, the "ba'al berit," also called "godfather" ("sandek" corresponding to the σπντεκνος, the godfather in the Greek Church, who lifted the neophyte from the baptismal water). The sandek holds the child on his knees during the operation. As a rule, the wife of the godfather carries the child in and hands it to the mohel, while the congregation greets it with: "Blessed be he that cometh in the name of the Lord" (Ps. cxviii. 26). Beside the chair upon which the sandek is seated another chair is placed, called, as has been stated above, "the chair of Elijah" (see ELIJAH'S CHAIR). Upon this the mohel places the child, reciting Gen. xlix. 18; Ps. cxix. 156, 162, 166; and the first half of Ps. lxxv. 5, the congregation responding with the latter half. He then takes the child from

The "Elijah's chair" and places it, upon
Ceremony. a cushion, in the lap of the sandek, reciting the benediction: "Blessed art Thou, O Lord our God, King of the Universe, who hast sanctified us by Thy commandments, and hast enjoined us to perform the commandment of circumcision." When the operation is over, the father of the child recites the benediction: "Blessed art Thou . . . who hast sanctified us by Thy commandments, and hast enjoined us to make him enter into the covenant of Abraham our father"; and the congregation responds with: "As he hath been made to enter the covenant, so may he also be made to enter the study of the Torah, the huppah [nuptial chamber], and the performance of good deeds." The use of the pronoun "him" in this peculiar benediction of the father, and in the congregational response given in the ancient Baraita (Shab. 137b),

seems to indicate that originally the child was named immediately after the circumcision, as was the case in New Testament times (Luke ii. 21; compare Gen. xvii. 5), and that the congregation then blessed the child just named. Hence, also, the prayer recited at the close. Owing to the fact that the original "se'udat berit milah" (see BANQUETS) was later on postponed or changed in character, the two benedictions introducing it are now recited by the mohel, who, taking the cup of wine, says: "Blessed be Thou . . . who hast created the fruit of the vine." "Blessed be Thou . . . who hast sanctified the beloved one [Isaac] from the womb, and hast ordained an ordinance for his kindred, and sealed his descendants with the sign of the holy covenant. Therefore on this account do Thou, O living God, our Inheritance and our Rock, command [Thy angels; see Maimonides, "Pe'er ha-Dor," responsum No. 134] to save Thy beloved kindred [Israel] from the pit [of Gehenna], for the sake of Thy covenant which Thou hast put upon our flesh! Blessed be thou, O Lord, Maker of the Covenant" (Shab. 137b).

Here follows in the liturgy a prayer, preserved from geonic times by Abraham b. Nathan, Tanyah, and Abudrahim, referring especially to the naming of the child: "Our God and God of our fathers! Preserve this child to his father and mother, and let his name be called in Israel N the son of N. Let the father rejoice in him that came forth from his loins, and let the mother be glad in the fruit of her womb; as it is written . . . [Prov. xxiii. 25]; and it is said . . . [Ezek. xvi. 6 (see above); Ps. cv. 8-10; Gen. xxi. 4; Ps. cxviii. 1]. Let the child named N wax great!" Whereupon the congregation again responds, saying: "As he hath entered into the covenant, so may he be permitted to enter the study of the Torah, the huppah, and the performance of good deeds."

After having for centuries been practised as a distinctively Jewish rite, circumcision appeared to many enlightened Jews of modern times to be no longer in keeping with the dictates of a religious truth intended for humanity at large; and its abolition was advocated, and made the shibboleth of the "Friends of Reform" ("Reformfreunde") in Frankfort-on-the-Main in 1843. Under the

Reform Judaism and Circumcision. leadership of Theodor Creizenach, M. Stern of Göttingen, and others, the association published in the "Frankfurter Journal," July 15, 1843, and in "Der Israelit des Neunzehnten Jahrhunderts" of the same year articles in which, besides the abolition of circumcision and the transfer of the Jewish Sabbath to Sunday, the renunciation of historical Judaism in its entirety was declared necessary, and a sort of Jewish Church, based upon the Mosaic monotheism, was recommended. These articles called forth the protests of many rabbis, even in the Reform camp, among whom were Joseph Aub and Samuel Hirsch of Luxemburg (see S. D. Trier, "Rabbinische Gutachten über die Beschneidung," Frankfort-on-the-Main, 1844). A bitter controversy raged in the Jewish congregations and press. Samuel Holdheim took sides with the Radical Reformers; David Einhorn, with a number of other rabbis, opposed the merely

negative standpoint of the Frankfurt Reform-Verein, but emphatically indorsed the view that he who disregards the law of circumcision, whatever the motive may be, is nevertheless a Jew, circumcision having no sacramental character. Zunz and Aub, however, endeavored to attribute to circumcision a semi-sacramental character (see CEREMONIES); but Geiger, who, in his private correspondence with Stern, sympathized with the Radical Reformers, objected, with others, to this arbitrary position (see Geiger, "Gesammelte Schriften," v. 174, 181). On the other hand, Samuel Hirsch, in a series of discourses on the Messianic mission of Israel (1843), preached a sermon on the symbolic value of circumcision.

In 1847 Einhorn, as chief rabbi of Mecklenburg, became involved in a controversy with Franz Delitzsch of Rostock, who denounced him for acting contrary to Jewish law in naming and consecrating an uncircumcised child in the synagogue. Einhorn, in an "opinion," published a second time in his "Sinai," 1857, pp. 736 *et seq.*, declared, with references to ancient and modern rabbinical authorities, that a child of Jewish parents was a Jew even if uncircumcised, and retained all the privileges, as well as all the obligations, of a Jew. This view he also expressed in his catechism, his prayer-book, and his sermons, emphasizing the spiritual character of the Abrahamic covenant—"the seal of Abraham placed upon the spirit of Israel as God's covenant people."

The abolition of circumcision in the case of proselytes, on the ground of its being a measure of extreme cruelty when performed upon adults, was proposed by Isaac M. Wise at the rabbinical conference in Philadelphia in 1869, and was finally agreed to by the Reform rabbis of America at the New York conference in 1892 (see CONFERENCES, RABBINICAL; PROSELYTES; REFORM).

schrift, 1901, pp. 353-361, 433-453; *Year Book of Central Conference American Rabbis*, 1891-92.

—**In Ethnography:** Distribution: The rite of circumcision appears to be both the oldest and the most widely spread surgical operation known. According to Andree ("Die Beschneidung," in "Archiv für Anthropologie," xiii. 76), it is still practised by more than two hundred million people, which is quite a conservative estimate, since the followers of Islam alone are reckoned at two hundred and fifty million. Though not a principle or religious duty, it is spread throughout the Mohammedan world; consequently both the age at which the operation is performed and the mode of treatment vary among Turks, Persians, Algerians, and Arabs. Among the

Arabs circumcision seems to be a test of endurance. Philostorgius found it practised by them as early as 342 B.C. A much earlier instance, however, among Egyptian mummies, is that of Amen-en-heb, (lived between 1614 and 1555 B.C.), which H. Welcke has found to be a true case of circumcision ("Archiv für Anthr." x. 123). The practise extends over part of the Balkans, Asia Minor, Persia, part of India, and the Malay Archipelago, besides practically the whole of North Africa. Nor can this be due to Mohammedan influence, as it occurs

Africa. quite as frequently among the tribes of the east and west coasts of Africa

which have not been in contact with Islam. Even the Christian Abyssinians, the Bogos, and the Copts, the first of whom probably learned it from Jews, still observe the rite. Indeed, so universal is the practise in Africa that it would be simpler to give a list of the tribes that do not circumcise than to enumerate all those that do. Zobirowski attempts to prove that it is found in Africa only among those tribes which have plants of Oriental origin, like millet, rice or sorgho (boursa), and appears to suggest that it has slowly spread through the dark continent from Egypt; but the absence of complete induction and of historic records renders his contention very doubtful.

The possibility of an Egyptian origin for circumcision is, however, completely disproved by the extent of the practise in Australia. The Australian evidence is of particular interest, the operation being performed there with a stone knife, as is recorded of the Israelites (Spencer and Gillen, "Tribes of Central Australia," p. 323; compare Ex. iv. 25).

The practise is almost equally wide-spread among the islanders of the Malay Archipelago.

For America the evidence is somewhat scanty, and relates chiefly to the central part of the continent, though Petitot reports the practise among the Athapascans and McKenzie among the Dog River Indians. An analogous practise is reported by Squier among the inhabitants of Nicaragua, who draw blood from the organ and sow corn dipped in it. In Mexico a similar practise was found by Cortez, according to the report of Garcia de Palacio (1576); but the blood drawn was offered at

America. the altar. Las Casas reports it among the Aztecs; and the Mayas of Yucatan still have an analogous practise. The Caribs of the Orinoco and the Tacunas of the Amazon practise the rite, as well as the Automecos, the Salivas, and the Guemos, who perform it on the eighth day, the earliest time recorded among savage tribes.

Mode of Operation: The possibility of this wide distribution of the practise being due to a dispersion from a single center like Egypt or southern Arabia, is disproved by the great variety of methods by which the removal of the prepuce is effected, some of the practises, as in New Caledonia and the Fiji Islands, throwing light on the "peri'ah" of the Jews.

The subject can not be adequately treated without a reference to the analogous operation of clitoridectomy performed on girls of nubile age, sometimes accompanied by the so-called "infibulation" of the adjacent parts. According to Ploss (in "Zeitschrift für Ethnologie," 1871, pp. 381 *et seq.*, summarized in his "Das Kind," 1st ed., i. 305-324),

IV.—7

this occurs among the S. Arabs, in Egypt, in Abyssinia, among the Gallas, the Susus, the Mandingos, the Masai, and the Wakenosi (all of whom likewise circumcise their boys), as well as in Peru and on the banks of the Ucayale River. The operation is in nearly every case performed simultaneously on males and females, though they are kept separate during the periods of preparation and operation. One sect of Jews, the Falashas, also circumcise both sexes (Andree, "Zur Volkskunde der Juden," p. 84); it is probable that this practise has been adopted from the surrounding Abyssinians.

The instrument with which the operation is performed is in almost every case an ordinary knife of iron or steel; but, as stated above, the Australians use stone knives, as the Jews and the Egyptians (Pliny, "Hist. Nat." xxxv. 46) did formerly, and as the North-American Indians and the Abyssinian Alnajas still do (Ludolf, "Hist. Æthiop." iii. i. 21). A case in which a stone knife was used by Jews is mentioned by Schudt as late as 1726. Mussel-shells are used in Polynesia. The Marolongs of South Africa used a "fire-stone" (meteorite), but now circumcise with an assegai.

Much variety is found in the age at which the rite is performed among different tribes. The earliest occurs among the Jews, on the eighth day after birth (Falashas even on the seventh), and among the southwestern

Arabs, who perform the rite on the seventh, fourteenth, twenty-first, or twenty-eighth day. The Susus near Timbuctoo and the Guemos of South America are also said to perform the rite on the eighth day. In East Africa the Mazequas perform it between the first and the second month. The Persian Mohammedans circumcise in the third or fourth year; the Christian Copts, between the sixth and eighth. The Fijians perform the operation in the seventh year, as do also the Samoans. But, apart from these instances, all the tribes who perform this rite do so at the age of puberty, which is of course a very significant fact. The exceptional position of the Jews in this regard has to be emphasized in any discussion of the light which ethnology can throw upon the Biblical command.

The act of circumcision is generally accompanied by some special ceremonial. In Samoa it takes place when the youth is named; but

Accompanying Ceremony. most often it forms a part of the general set of ceremonies initiating the young of both sexes into mature life.

This is generally accompanied by trials of endurance for the lads or young men; and from a certain point of view circumcision may be regarded as one of these tests, as is definitely the case among the Jau of South Arabia (Halévy). As instances may be mentioned the elaborate ceremonials of African and Australian savages; but there is nothing specifically religious in the initiation ceremonies, the elders of the tribe performing the operation and instructing the neophytes. Among the Falashas three old women perform the rite, possibly because it is practised on girls as well as boys. Occasionally, however, the operation is performed by the priest; and in the New Hebrides a distinctly mystic character is imparted to the ceremony, no woman being

allowed to be present. Similarly, Livingstone found it impossible to obtain access to the "boguera" of the Bechuanas. Among the Bourana the lads are kept apart in a special hut; and on the day of circumcision an ox is sacrificed, and all smear themselves with its blood. Among the Sulus the blood is received in a cup of ashes and buried, while with the Marolongs the removed foreskin is buried. The rite is mostly common to the whole population, but occasionally, as in Rook Island, it is performed on the rich only, while in Celebes it is only resorted to in the case of princes who have no children. In Mexico it seems to have been a prerogative of the upper classes.

There are certain indications which seem to show that primitive peoples adopt or drop the practise without much ado, possibly because it is not regarded as definitely religious. The Zulus and the Gallas have discarded the custom since Europeans have become acquainted with them, and Reinach gives reasons for believing that the Philistines, though specifically mentioned as uncircumcised (Judges xiv. 3; I Sam. xvii. 26, 36; xviii. 25; Ezek. xxxii. 30), had adopted circumcision by the time of Herodotus (ii. 104) and Aristophanes ("Birds," p. 507)—*i.e.*, between 575 (Ezekiel) and 445 B.C. (Herodotus)—while the Idumeans, who appear to have been circumcised in the time of Jeremiah (Jer. ix. 26), had entirely discarded the practise by the time of John Hyrcanus, who forcibly reintroduced it among them ("L'Anthropologie," iv. 28-31).

Object: The exact object for which this widespread custom is practised has been long a subject of dispute. The theories mainly held point to three originating causes: tribal, sacrificial, and utilitarian. For the tribal view there is to be said that circumcision, like other mutilations of the body intended for tribal marks, takes place at the age of puberty, when, for example, the Hereros of Africa knock out the front teeth; but as the organ is almost invariably hidden, it is difficult to see how circumcision could be regarded as a tribal mark (see Gerland in Waitz, "Anthropologie," vi. 40).

The sacrificial theory, which sees in circumcision an offering to the deity of fertility, has to draw for illustration from the practises of Yucatan and Nicaragua, where the custom itself is only in a stage of survival, if it exists at all. Others regard it as a substitute for human sacrifice (Movers and Ghilany), and place it on the same level as eunuchism (Letourneau, Elie Reclus). Hence Herbert Spencer suggests that it was a mark of subjection introduced by conquering warriors to supersede the punishment of death. The appeal made to Samson by his father (Judges xiv. 3), and that made to the Israelites and to Saul by David (I Sam. xvii. 26, 36), give a certain amount of plausibility to this theory; but the fact that the practise is either common to all the tribe or is reserved for the upper classes, as in Mexico, the Celebes, and Rook Island, tells strongly against this last form of the sacrificial theory.

The suggestion of Sir Richard Burton ("Memoirs Anthropol. Soc." i. 318) that it was introduced to promote fertility seems to be contradicted by the practise and arguments of many tribes (see Riedel, in "Verhandlungen der Gesellschaft für Erdkunde zu

Berlin," 1885, No. 3). The claims of cleanliness and health have been strongly urged, especially for hot countries, where phimosis is likely to be induced if the natural secretions of the parts are

Utilitarian retained by the prepuce. Philo ("De Theories. Circumcisione," ed. Mangey. ii. 216) gives this as one of the motives for the

Biblical injunction; and later writers, such as Claparède ("La Circoncision," Paris, 1861) and Rosenzweig ("Zur Beschneidungsfrage," 1878), have for this reason recommended its general adoption. But the practise is found among so many tribes who have not the most elementary notions of cleanliness, not to speak of hygiene, that this is not likely to be the prevailing motive for its adoption.

The fact that circumcision is almost invariably found practised as a rite of initiation, and frequently on both sexes, gives the clue to its general adoption, as H. Ploss contends in an essay ("Geschichtliches und Ethnologisches über Knaben-

An Beschneidung," in "Deutsches Archiv für Gesch. der Medicin," viii. 312-

Initiation Ceremony. 344) mainly based on Andree's materials. According to the wise custom among savages of initiating their youth into all the duties of the mature life, the elders prepare the lads for their marital life at this time; and circumcision, often of both sexes, is resorted to as part of the preparation. The only ancient legend about Zipporah circumcising Moses (as would seem to be implied by her exclamation, Ex. iv. 25, 26) confirms Ploss's view to some extent; but the exceptionally early age at which Jews perform the rite takes it entirely out of the category of initiation ceremonies among them, and proves it to be of a religious or symbolic nature, as indeed is expressly claimed for it.

BIBLIOGRAPHY: *Index Catalogue of Surgeon-Major's Library*, Washington, 1st and 2d series, s.v. *Circumcision (ritual)*, gives a tolerably complete list of works and papers. The above article is founded mainly on the material collected by Andree and Ploss, with the use of M. Zaborowski's *La Circoncision, sa Superstition en Afrique*, in *L'Anthropologie*, vii. 653-675; *idem*, *De la Circoncision des Garçons et de l'Excision des Filles Comme Pratique d'Initiation*, in *Bulletin Soc. Anthropol.* Paris, 4th series, v. 81-104. Special references are only introduced in correction or supplementally; for other statements authorities will be found in Andree.

—**In Medicine:** To perform the operation and to avoid any danger that may be connected with it, an acquaintance with the anatomy of the tissues involved is necessary. The organ terminates in a conical fleshy substance called the glans. The skin covering the organ is prolonged forward in a

Anatomy of loose fold, which covers the glans and **the Parts.** is supplied with an inner lining of the character of a mucous membrane, which, being reflected, also forms a covering of the glans proper. The prolonged portion of skin with its lining is termed the prepuce or foreskin. The prepuce has no large blood-vessels; and therefore circumcision is not attended by any dangerous hemorrhage, except when the glans is injured by unskillful handling of the knife, or in very exceptional cases where there exists an abnormal tendency to bleeding.

Circumcision varies considerably as practised by the Jews and by the Mohammedans. Among the Jews it means not only the excision of the outer

part of the prepuce, but also a slitting of its inner lining to facilitate the total uncovering of the glans.

IMPLEMENTS AND ACCESSORIES OF CIRCUMCISION (18TH CENTURY).

1. Cup of benediction. 2. Shield. 3. Knife. 4. Spice-box.
5. Tape. 6. Cotton and Oil. 7. Sand. 8. Powder.
(From Bodenschatz, "Kirchliche Verfassung," 1748.)

The Mohammedans pursue the simple method of cutting off the integumental portion of the foreskin, so that almost all of the inner layer remains, and the glans continues covered.

The operation up to very recent times was exclusively performed by laymen, to whom the act had been taught by others who, by experience, had acquired the necessary knowledge and skill. The tests of a good operator, or "mohel" (circumciser), were that he should perform his work quickly, safely as to its immediate effect, and successfully as to the condition which the parts would permanently assume. As a rule, the majority of these operators developed great dexterity; and accidents were remarkably rare. In case the glans was not sufficiently exposed after the healing process was completed, much anxiety was occasioned; for in some exceptional instances a second operation was resorted to.

The operation consists of three parts: "milah," "peri'ah," and "mezizah."

Milah: The child having been placed upon a pillow resting upon the lap of the godfather or "sander" (he who is honored by being assigned to hold the child), the mohel exposes the parts by removal of garments, etc., and instructs the sander how to hold the child's legs. The mohel then grasps the prepuce between the thumb and index-finger of his left hand, exerting sufficient traction to draw it from the glans, and places the shield (see Fig. 1, next column) in position just before the glans. He now takes his knife and with one sweep excises the foreskin. This completes the first act. The knife (see Fig. 3) most commonly used is double-edged, although one like those ordinarily used by surgeons is also often employed.

Peri'ah: After the excision has been completed, the mohel seizes the inner lining of the prepuce, which still covers the glans, with the thumb-nail and

index-finger of each hand, and tears it so that he can roll it fully back over the glans and expose the latter completely. The mohel usually has his thumb-nail suitably trimmed for the purpose. In exceptional cases the inner lining of the prepuce is more or less extensively adherent to the glans, which interferes somewhat with the ready removal; but persistent effort will overcome the difficulty.

Mezizah: By this is meant the sucking of the blood from the wound. The mohel takes some wine in his mouth and applies his lips to the part involved in the operation, and exerts suction, after which he expels the mixture of wine and blood into a receptacle (see Fig. 4, below) provided for the purpose. This procedure is repeated several times, and completes the operation, except as to the control of the bleeding and the dressing of the wound. The remedies employed for the former purpose vary greatly among different operators and in different countries. Astringent powders enter largely into these applications. In North Germany the following mixture is extensively used: dilute sulfuric acid, one part; alcohol, three parts; honey, two parts; and vinegar, six parts. A favorite remedy with many oper-

MODERN IMPLEMENTS OF CIRCUMCISION.

1. Shield. 2. Mouthpiece. 3. Knife. 4. Cup for Mezizah.

ators is the tincture of the chlorid of iron, which is a recognized efficient styptic. These solutions are

applied by means of small circular pieces of linen with openings in the center, into which the glans is placed, and the dressing is closely applied to the parts below. This is secured in its place by a few turns of a small bandage. A diaper is now applied, and the operation is finished. The dressings are usually allowed to remain until the third day. The nurse in the mean time is instructed to apply olive-oil, plain or carbolized. When the parts are then uncovered the wound will in most cases have healed.

To guard against any mishap through suppuration or erysipelas, the genitals should be washed with soap and water, and afterward with a solution of bichlorid of mercury, 1 to 2,000. The mohel should deal similarly with his hands, and especially with his nails, using a nail-brush; and all the instruments to be used should be immersed in boiling water for about five minutes. The dressings should consist of sterile or antiseptic gauze or similar material. All the preparations relating to the dressings, the instruments, and the hands of the operator should be made before the child is brought into the room in which the operation is to be performed, in order to avoid unnecessarily prolonging the anxiety of the mother. A basin with the bichlorid of mercury solution should be at hand, into which the operator may dip his hands immediately before he begins his work.

Care must be exercised in grasping and making traction on the foreskin just before the knife is used. The outer layer is much more elastic than the inner; and if the outer and inner layers are not held firmly together at the margin, it may happen in making traction that the outer layer may become folded upon itself, with the result that the cut will remove a circular piece of skin just behind the edge of the foreskin. Of course this will require the subsequent removal of the remaining edge.

Some operators dispense with the shield, but this is not to be commended; for it will expose the child to the risk of having a piece of the glans cut off, and to dangerous bleeding in consequence.

When the operator uses his nails to tear the inner layer (*peri'ah*), he should be careful to have them absolutely clean. Should they not have the requi-

site shape or firmness, or should he prefer avoiding any risk attaching to that method, two pairs of short forceps may with advantage be substituted, and are now often used. The tear should be made carefully, so that it will not deviate greatly from the median line, and should not be carried back too far; for at the margin of the corona it might give rise to unnecessary bleeding. When the inner lining is tough, or bound down by adhesions, a probe-pointed scissors may be used for the *peri'ah*. Drs. Kehlberg and Löwe recommend the use of the scissors in all cases; claiming that the wound made by them is more favorable, and infection less liable. Against this, however, is the well-established principle in surgery that a lacerated wound is less apt to bleed than one made by a sharp instrument.

Considerable opposition has of late years been made against the *mezizah* on the ground that it is entirely in conflict with the aseptic treatment of wounds, which should be adhered to in all instances, but more especially in consequence of a case in Cracow in which it became known that syphilis was communicated to a large number of Jewish children through an infected condition of the mohel's mouth (Glassberg, "Die Beschneidung," p. 27). The result has been that a number of mohels have discarded the *mezizah* altogether. The majority of Jews, however, remain averse to such an innovation, the more so because it is condemned by the Orthodox rabbis.

As a compromise, which has received satisfactory ecclesiastical authority, a method has been adopted which consists in the application of a glass cylinder that has a compressed mouthpiece, by means of which suction is accomplished. Before the cylinder is applied a small quantity of sterilized absorbent cotton is placed in the mouthpiece, which effectually protects both the child and the operator.

The inner layer, when it is folded back after its laceration, meets with the outer retracted layer, and the application of the dressing will satisfactorily keep the edges in fair apposition. Drs. Kehlberg and Löwe, in an article in Glassberg's work, recommend the closing of the wound by stitches after the method practised in surgery and known as the continuous suture. There are two objections to this treatment of the

(In the Musée de Cluny, Paris.)

Danger of which suction is accomplished. De-
Mezizah. fore the cylinder is applied a small

wound. It prolongs the operation unnecessarily, and entails the annoyance of removing the sutures when the union of the wound has taken place.

The sponge, which has almost invariably been made use of for cleansing the parts (which are more or less covered with blood), should be entirely discarded. It has been found difficult to keep sponges surgically clean; and pledgets of sterile gauze—fresh ones for every case—are to be preferred.

The most important consideration after the completion of the operation is to guard against hemorrhage. When the wound is limited to the prepuce itself, hemorrhage need not be dreaded; for the pressure of the simple dressings alone will be sufficient to control it effectually. Many operators apply

a little tincture of iron, to which there can be no serious objection; for it is the most reliable of the remedies usually applied for the arrest of hemorrhage.

Treatment of Wound. The mohel should remain with the child for at least an hour to be perfectly satisfied that no hemorrhage follows, and to stop it should it occur. If the bleeding does not proceed from an artery, the tincture of iron with somewhat firmer pressure of the bandage will usually prove satisfactory. Should the bleeding come in jets, a catch-artery forceps must be applied, which acts as a clamp; and a surgeon should be sent for, as a ligature may be needed.

There is one form of bleeding which has thus far not been mentioned, and which needs consideration. It is well known that there are individuals who bleed very profusely and very persistently upon the slightest provocation. The old rabbis must have known of this condition; for they taught that, when a mother lost two children from circumcision, those that might be born afterward should not be subjected to the operation. This abnormal tendency to bleeding is of hereditary character. It is transmitted through the mother and through the daughters of such a mother. The son, who might be a bleeder himself, will not transmit it to his children. Should such a condition be met with in circumcision, the ordinary methods for the arrest of hemorrhage must not be relied upon. The actual cautery will have to be resorted to, or a short piece of a metal or hard flexible catheter must be inserted in the urethra and firm pressure applied by means of a bandage. The catheter has the advantages of not interfering with urination, and of offering a firm surface for the application of pressure. It goes without saying that mechanical provisions must be made to prevent the catheter from slipping either in or out.

As illustrating the extreme rarity of disasters as a consequence of the hemorrhagic diathesis in circumcision, Dr. A. B. Arnold writes that in an experience of more than 1,000 cases he met with one case only ("New York Medical Journal," Feb. 19, 1886).

It happens not infrequently that the attending physician, on account of some unfavorable condition of the child, advises a postponement of the operation. The Jewish law sanctions such a proceeding until the child has fully recovered its health.

The following reasons for postponing the operation are enumerated by Drs. Kehlberg and Löwe: "pronounced feebleness of the child, febrile conditions, obstinate diarrhea, refusing to take the

breast, diseased conditions of the skin, general or local convulsions or jerkings, inflammation of the eyes or eyelids, fungous excrescences in the mouth, very frequent vomiting, continued sleeplessness" (Glassberg, *l.c.* p. 36).

Circumcision among the Jews has been accepted and adhered to simply as a religious rite; but it is of interest to make manifest the advantages that accrue to the individual from having the prepuce removed in early life.

Sometimes the physiological changes in the prepuce are interfered with and it can not be retracted at all, or only to a partial degree.

Medical Advantages of Circumcision. These conditions are termed respectively complete and partial phimosis. Phimosis is followed by a train of disturbances more or less serious in character; one of the most frequent troubles arising from this cause being interference

with the emptying of the bladder. As a result of phimosis, or even of the ordinary exudations, inflammation of the inner lining of the prepuce and the covering of the glans is extremely liable to arise. This inflammation, termed balanitis, will cause pain, especially during urination, and will have a tendency to increase the impediment to the voiding of urine.

Various authors enumerate a number of other troubles due to phimosis; viz., habitual wetting of the bed by children, masturbation, prolapse of the rectum, hernia, and hydrocele, the latter three conditions being excited by the excessive pressure exerted by the abdominal muscles in overcoming the resistance of the prepuce to the flow of urine.

An even more severe form of inflammatory change is known under the name of paraphimosis, which at times leads to ulceration of the parts or even gangrene.

Paraphimosis. The glans in the circumcised, besides being uncovered, presents another change to which considerable importance has been attached. The covering of the glans, which before had the character of a mucous membrane, on being exposed assumes the properties of true skin, which is less vulnerable, and on theoretical grounds alone leads to the inference that it is less liable to syphilitic infection. In addition to this, however, there has been weighty authority which bases this opinion on a wide experience. That it offers some protection, there can be no doubt; but the present writer has observed too many cases of primary syphilis in the circumcised to warrant the assumption that circumcision offers any very decided immunity.

A communication was made to the convention of the American Medical Association in 1870 by Dr. Lewis A. Sayre, in which he demonstrated that partial paralysis might result from congenital phimosis and adherent prepuce, and could be removed by circumcision. In 1887 Dr. Sayre, at the Ninth International Medical Congress, gave the testimony of a large number of other observers, who corroborated his own.

—**Among the Arabs:** It is difficult to determine whether Mohammed deemed circumcision ("khitān" or "taḥīr") to be a national custom of no religious importance, and therefore did not mention it in the Koran, or whether he judged the prescription of a rite that had been performed by the Arabs from time immemorial to be superfluous. Abulfeda counts circumcision among the rites of pagan Arabia that were sanctioned by Islam ("Historia Ante-Islamica," ed. Fleischer, p. 24). Ibn al-Athīr, in his ante-Islamic history, attributes to Mohammed the following words: "Circumcision is an ordinance for men, and honorable for women." On the other hand, the traditionalist Hurairah reported on the part of the prophet that circumcision is one of the observances of "fiṭrah" (natural impulsion), and has consequently no religious character ("Ṣaḥīḥ al-Bukhārī," p. 931). Be that as it may, circumcision became in Islam a religious obligation, to which every one was required to submit.

The difference of opinion which prevails among the historians and traditionalists as to the character of the rite before Mohammed, prevails also as to the age at which circumcision had to be performed. According to Josephus, the Arabs circumcised after the age of thirteen, "because Ishmael, the founder

of their nation, was circumcised at that age" (Josephus, "Ant." i. 12, § 2).

Ibn al-Athīr and many other Arabic authorities assign different ages. It is probable that there existed no regulation as to age; and each locality followed its own custom. Thus, in Yemen, where Jews exercised great influence, the Arabs circumcised their children on the eighth day after birth (compare Pocock, "Specimen Historiæ Arabum," pp. 319 *et seq.*). The Mohammedan law recommends circumcision between the ages of seven and twelve years, but it is lawful to circumcise a child seven days after its birth. The circumcision of females is also allowed, and is commonly practised in Arabia.

The operation on males is generally performed by a barber, in the following manner: The operator seizes with the forefinger and thumb of the left hand the summit of the prepuce, which he fastens with a string provided with a knot. This string is passed through a hole made in a disk of hardened leather. The operator then makes with a razor or scissors a circular section of the prepuce between the knot and the disk. The hemorrhage which follows is stopped by the application of burned rags and ashes. In India a bit of stick is used as a probe, and carried round and round between the glans and prepuce, to ascertain the exact extent of the frenum, and that no unnatural adhesions exist. No splitting ("peri'ah") is known to the Arabs, as is attested by Simon ben Zemah Duran, who expresses himself as follows: "Mohammed sanctioned also circumcision that the Arabs performed since the time of Abraham, as is said in the Talmud: 'A circumcised Arab'; but he adopted it without peri'ah" ("Keshet u-Magen," 19b).

The ceremonies preceding circumcision give to this act the character of a religious initiation. After hav-

**Cere-
monies.**

ing performed the prescribed ablutions, the candidate makes his confession before the imam, and a new name is added to his former one. As among Jews, circumcision is followed among Mussulmans by feasting and rejoicing. The custom among Orthodox Jews in Russia and Poland, of inviting pious men to spend the night preceding circumcision in prayer and study in the house in which the ceremony is to take place, finds a striking parallel in that current among the Mussulmans of Egypt, where priests are hired to recite prayers in the house of the candidate the night before the ceremony. That night is called "lailah al-kabirah" (the great night), in opposition to the preceding night, "lailah al-saghirah" (the small night), in which an entertainment is given to friends.

I. BR.

CIRCUMSTANTIAL EVIDENCE: Evidence consisting of circumstances which afford reasonable ground for believing in the guilt or innocence of an accused person. Circumstantial evidence is generally stated to be inadmissible according to Jewish law; but this assertion is incorrect. All evidence is more or less circumstantial, the difference between direct and circumstantial evidence being only a difference in degree. The former is more immediate, and has fewer links in the chain of connection between the premises and the conclusion than the latter.

The Mosaic law requires that every fact be proved by the testimony of two witnesses (Num. xxxv. 30; Deut. xvii. 6, xix. 15), and the Talmudic law requires that each witness testify to the whole fact, and that the witnesses shall not be permitted to supplement each other's testimony (B. K. 70b). But, admitting that it requires the positive testimony of two witnesses to every material fact in the case, this does not preclude the court from drawing inferences from the facts proved; and wherever such inferences are drawn—this is necessarily done in every case at law—circumstantial evidence is to that extent recognized as legal.

In criminal law the necessity for at least two witnesses is strictly maintained (Sanh. 37b; Maimonides, "Yad," Sanhedrin, xii. 3, xx. 1).

In civil matters the testimony of one witness is in some cases sufficient to compel the party against whom the witness is produced to take the oath of purgation; and, on the other hand, the production of one witness in favor of the party absolves him from taking this oath, in cases where he would otherwise have been obliged to take it (Shebu. 32a). The law likewise recognizes certain presumptions arising from a given state of facts: although these presumptions may be rebutted by positive testimony, they establish a *prima facie* case without further proof (K'd. 80a).

For further discussion of this subject see EVIDENCE and PRESUMPTION.

D. W. A.

CIRCUS: In antiquity a large enclosure used for horse- and chariot-races, and sometimes for gladiatorial combats, etc. Public games and theatrical representations being such important factors in the life of the Greeks and Romans, the Jews living in the classical age had to take a definite attitude toward them. As in the case of everything else characteristic of paganism, the Jews had little to say in favor of the circus, though only after numerous differences of opinion among them, and even of concessions in favor of the popular amusement. This applied also to all public amusements; and Jewish rabbinical literature discusses especially two types of these—the circus and the theater—so frequently together and from so similar a point of view that they must be treated as a unit in this article.

The pre-Maccabean Hellenistic party had introduced gymnasia into Jerusalem (I Macc. i. 14; II Macc. iv. 12), greatly to the abomination of the orthodox. Herod the Great founded, in honor of the emperor, quinquennial gladiatorial contests, built a theater and an amphitheater in Jerusalem (Josephus, "Ant." xv. 8, § 1; "B. J." i. 21, § 8), and also helped maintain

Hellenists and Herodians. such contests in foreign cities. The pious Jews thought it criminal that men should be thrown as food to wild beasts to amuse the multitude. They were most shocked, however, by the trophies and images set up in the theaters ("Ant." xv. 8, § 1); upon one occasion a riot occasioned thereby was quelled by Herod only after much bloodshed. The other Herodians also had a predilection for the theater, Agrippa I. contracting a mortal malady in that at Caesarea. As a matter of course there were theaters in the Palestinian cities which held a Hellenistic population; hence the Rabbis knew this side of the Greco-Roman life at first hand. A circus at Caesarea is especially mentioned (Tosef., Oh. xviii. 16), as well as the theater ("Ant." xix. 7, § 4); a hippodrome at Jerusalem ("B. J." ii. 3, § 1); and a stadium at Tiberias, in which 1,200 Jews were killed by Vespasian ("B. J." iii. 10, § 10). Hence the Jews looked upon the circus, the theater, and the stadium as distinctive institutions of pagan Rome.

The Midrash interprets the "sinner" denounced by the Psalmist (Ps. xiv. 1) as being Rome, which fills the whole world with iniquity by building temples for idols, theaters, and circuses. "In four ways the Roman empire eats up the wealth of the nations: with taxes, with baths, with theaters, and with imposts" (Ab. R. N. xxviii.). "The feet of man will take him as he wills either into the house of God and the synagogue, or into the theater and the circus" (Gen. R. lxvii. 3). "What confusion there is in the games that the heathens give in their theaters and their circuses! What have the doctors of the Law to do there?" (Pesik. 168b). The Jews are accused of keeping away from the circus, and thus diminishing the revenues of the state (Esther R., Preface).

Nevertheless, Jews probably often went to the circus; and it is even permitted in the Halakah to go

to the theater and the circus on the Sabbath, if public affairs are to be discussed there (Ket. 5a). It is

well known that the theaters were frequently used for assemblies of the people, since they were the largest public buildings (Josephus, "B. J." vii. 8, § 3).

Rabbinical Opinions. R. Judah I. was even inclined to find something good in the public games: "We must thank the heathens that they let mimes appear in the theaters and circuses, and thus find innocent amusement for themselves, otherwise they would be constantly getting into great quarrels as soon as they had anything to do with one another" (Gen. R. lxxx. 1). It was even hoped that the time would come when the theaters and circuses would become the homes of the Torah (Meg. 6a). R. Nathan also found reasons to justify visiting the circus (Ab. Zarah 18b).

In the course of time, however, it was formally forbidden to visit the public games. Sad remembrances connected with the circuses, especially the massacres of thousands of Jews in the theaters under Vespasian and Titus, made those places hateful to the Jews, who came to regard them as scenes of bloodshed, as indeed they were. But even at peaceful representations, when there was no bloodshed, the Jews were jeered and flouted on account of their peculiarities. In reference to this there is an interesting Midrash to the passage, "They that sit in the gate" (Ps. lxix. 13 [A. V. 12]): "The heathens are meant who sit in the theaters and circuses; after they have feasted and become drunk they sit and scoff at Israel. They say to one another: 'Let us beware that we do not resemble the Jews, who are so poor that they have nothing to eat but locust-beans.' Furthermore, they say: 'How long are you going to live?' 'As long as the Sabbath garment of the Jews lasts.' Then they bring a camel swathed in clothes into the theater and ask: 'Why does this camel mourn?' And they answer: 'The Jews are now celebrating their Sabbatical year; and since they have no vegetables, they eat up the camel's thistles; hence it mourns.' Then a mime with shaved head comes into the theater. 'Why is your head shaved?' 'The Jews are celebrating their Sabbath, eating up on that day everything that they earn during the week-days; hence they have no wood for cooking, and they burn up their bedsteads. They must, therefore, sleep on the ground, getting entirely covered with dust; then they must cleanse themselves freely with oil; and the latter, in consequence, is excessively dear'" (Lam. R., Introduction, No. 17).

Every public place of amusement was looked upon as a "seat of the scornful," in reference to Ps. i. 1. "He who frequents the stadia and the circuses, and sees there the magicians, the tumblers,

Ordinances Against the 'buccones,' the 'maccus,' the 'moriones,' the 'scurra,' and the

Attendance. 'ludi sæculares'—this is 'sitting in the seat of the scornful'" (Tosef., Ab. Zarah, ii. 6; Yer. 40a, Bab. 18b; Yalk.,

Ps. 613). "I sat not in the assembly of the mockers nor rejoiced" (Jer. xv. 17) is the cry of the Jewish congregation. "Lord of the world! never do I set foot in the theater and the circus of the 'people of the earth'" (Pesik. 119b). Still a third passage is

interpreted as being an ordinance against the pagan theater (Sifra, Lev. xviii. 3). It is reprovably said—apparently in reference to Ex. i. 7, but really to Roman times—that the theater and circus are filled with Jews (Tan. on the passage). Hence an actual anathema is pronounced against attendance at the circus (Targ. Yer. Deut. xxviii. 19). Devastating earthquakes come in consequence of the theater and the circus (Yer. Ber. 13c). A Talmudic sage writes an especial prayer of thanks that Israel has no part in the heathen circus: "I give thanks to Thee, O Lord my God and God of my fathers, that Thou hast placed my portion among those who sit in the house of learning and the house of prayer, and didst not cast my lot among those who frequent theaters and circuses" (Yer. Ber. 7d; Bab. 28b). This prayer is even now found in many prayer-books as a part of the daily morning prayer. According to this prayer, people should keep away from the theater because it is a waste of time, and study is more profitable. It was, moreover, felt that these diversions had their root in idolatry, especially as images of royalty were placed in the theater and circus (Lev. R. xxxiv.).

Similar reasons also induced early Christianity to look askance at the pagan games, and perhaps it was against them that Paul spoke in I Cor. xv. 32. It is certain that Christians as well as Jews furnished victims for the theaters (Renan, "Histoire

Christian des Origines du Christianisme," 3d ed.,

View. iv. 163); they likewise recognized their idolatrous origin; and Tertullian, in forbidding attendance ("De Spectaculis," ch. iii.), refers to Ps. i. 1, as do the Rabbis. Tertullian's phrase (ch. x.), "Theatrum proprie sacrarium Veneris" (the theater is a place for sexual immorality), is not, however, put so strongly by the Rabbis.

It is curious that, in spite of the iniquity attaching to the circus, the later Midrashim have much to say of a splendid circus and hippodrome which was said to have existed at Solomon's court, the description being based on the Byzantine pattern of Constantinople. Even in the later Middle Ages Jews attended the races, often at their peril (Malalas, "Chronicle," p. 446; Grätz, "Gesch. der Juden," 3d ed., v. 16). See ATHLETES; GAMES.

CISTERNS. See WELL.**CITIES OF REFUGE.** See ASYLUM.**CITRON.** See ETROG.

CITRON, SAMUEL LÖB: Hebrew writer of fiction and literary critic; born at Minsk, Russia, May 24, 1862. He attended the rabbinical school at Wolozhin, and made his first appearance as a Hebrew author at the age of fourteen, in the periodical "Ha-Maggid." He contributed to other Hebrew periodicals, and in 1884 translated Lev PINSKER'S "Autoemancipation" from German into Hebrew, under the title "Im en ani li mi li." His works of

fiction are: (1) "Asefat Sippurim," 1885, a collection of short stories translated from the German and French; (2) "Mi-Shuk ha-Hayyim" (From the Fair of Life), 1885; (3) "Abraham ben Joseph," a translation of Levanda's Russian historical novel, "Abraham Jesophovich"; and (4) "Yonah Fotal" (Foolish Dove), 1888. Of his literary and critical essays the following are the most important: (1) "Mapu and Smolensky," a critical estimate of their works; (2) "The Development of Hebrew Literature in Russia During the Nineteenth Century," in "Ozar ha-Sifrut," vol. ii.; (3) "Ha-Sifrut we ha-Hayyim" (Literature and Life), in "Pardes," vols. i. and ii.; (4) "Asefat Sippurim," 1897; and (5) "Le-Moto" (The Poet), 1900.

ished in size between
ual homesteads (צִיָּוָה,
h. xiii. 23; Isa. xlii.
39) developed either
6, or כָּפַר, I Sam. vi.
vii. 25, Neh. vi. 2) or
17, xix. 25, 29). The
where the banks of
plain, as at Tiberias
f several rivers, as at
L... convenient fording-
place, or where an isolated mountainside afforded a
natural protection against attacks, as was the case at
Jerusalem. Villages and cities are not always dis-
tinguished as unfortified and walled places respect-
ively, as Benzinger ("Arch." § 18, 2) maintains: for
עֲרֵי הַפְּתוּחוֹת ("cities of the flat or open country") are
also mentioned (Esth. ix. 19); and these are equiva-
lent to עֲרֵי הַמִּישׁוֹר, as Kimhi correctly interpreted in
his work on Hebrew roots under פָּרַח. The same
may be inferred from עִיר הוֹמָה (Lev. xxv. 29; com-
pare Prov. xxv. 28), according to which there might
also be עִיר; i.e., without walls. Naturally, however,
most of the cities were surrounded by walls in those
ancient times, when attacks from hostile, roving
bands were imminent, and this danger probably
gave the first stimulus to the building of cities. In
any case it is significant that Cain undertook to build
a city only after the birth of his first son, and that
he named it for this son. It was meant to be a
place of refuge for his family.

In the enumeration of the chief features of a city
mention must first be made of the water-sources;
for an abundant supply of good water for drinking
purposes is the first prerequisite for
the welfare of a city. This view is
Water- supported by passages in the Old
Works. Testament. At the siege of Jebus,
David offered a prize to the hero who should ad-
vance as far as the water-works ("zinnor," II Sam.
v. 8), and in Isa. vii. 3 King Ahaz's care in having
the water-works protected against the attack of the
enemy is recorded.

The streets ("huz," "shuk") formed the second im-
portant feature. They were as narrow in the cities
of the ancient Orient as they are in those of the mod-
ern East (Josephus, "B. J." vi. 8, § 5; Benzinger,

i.e. § 18, 4). It was also an exception if a street could be called straight, as, for example, the street in Damascus referred to in Acts ix. 11; for the majority were very crooked, with many corners. The Law commands that the roads leading to the cities of refuge shall be kept in repair (Deut. xix. 3); but in early times the paving of streets was probably unknown. Josephus ("Ant." viii. 7, § 4), indeed, relates that Solomon had the streets leading to Jerusalem paved with black stones; but the statement is ambiguous, since the mud of the streets is often mentioned as something proverbial (Isa. v. 25, x. 6; Micah vii. 10; Zech. ix. 3, x. 5; Ps. xviii. 43). Since Herod, however, had the principal street of Antiochia paved (Josephus, "Ant." xvi. 5, § 3), it may be assumed that he showed like favor to the inhabitants of Jerusalem. It is certain that under Herod Agrippa the streets of Jerusalem were paved with white stones (Josephus, "Ant." xx. 9, § 7). In antiquity the cleaning of streets was almost as little known as lighting them; the latter being a very recent innovation in Oriental cities. It is recounted, however, that Herod constructed in the recently built port of Caesarea a subterranean channel, to carry off the rain and the refuse of the streets (*ib.* xv. 9, § 6).

The streets were named after the place to which they led ("the highway of the fuller's field," Isa. vii. 3), or after the occupation of the majority of its inhabitants ("the street of the bakers," Jer. xxxvii. 21; "the valley of craftsmen," Neh. xi. 35; and the quarter of the "goldsmiths and merchants," Neh. iii. 32). Here and there the streets broadened out into open places, which were formed at the parting of ways (שַׁרְיָה; Ezek. xxi. 24 [A. V., 21]), or at the corners of streets (פִּנְיָה; Prov. vii. 8), or where two streets crossed. These points are

Streets and Gates. called "mother of the way," or "head of the two ways" (Ezek. xxi. 26 [A. V., 21]), or "the house of ways" (Prov.

viii. 2). Open squares were mainly found near the gates. Here travelers tarried overnight (Judges xix. 15); and here the children played (Zech. viii. 5).

In a walled town the gates were most important parts; for near them citizens were wont to gather in the dusk to watch or greet the caravans of travelers (Gen. xix. 7; Job xxix. 7); and here also court was held (Deut. xiii. 17; Isa. lix. 14; Ps. lv. 12), compacts were made (Gen. xxiii. 10; Ruth iv. 11), and the market-place was situated (II Kings vii. 1).

The designation "mother city" (metropolis) indicated that the city so styled was one of importance. This epithet is expressly applied to the old city of Abel Beth-maachah (II Sam. xx. 19); while the same idea is indirectly expressed when the "daughters" of a city are spoken of (Num. xxi. 25). Occasionally a city is explicitly designated as a large one, as in Gen. x. 12, where the clause "the same is a great city" can not refer to Calah, but is evidently meant as a designation for Nineveh together with the three neighboring cities. Nineveh is also called "great" in Jonah iii. 3, where it is hyperbolically described as "a city of three days' journey"; this must refer to its diameter and not the circumference, for it is more natural to assume that a person would go through a city than around it. The actual size of the cities of Palestine can not be definitely ascer-

tained, as explicit statistics regarding the number of inhabitants are seldom found. Not even the statement that the total population of Ai was 12,000 (Josh. viii. 25) can be regarded as a fact. Benzinger (*i.e.* § 10, 5) estimates the number of the inhabitants of Jerusalem to have been about 110,-

Extent and Cultural Im-portance. 000, a number that coincides with the statement that 80,000 of the inhabitants of Jerusalem perished and yet many remained (II Macc. v. 14). The statement of Josephus ("B. J." vi. 9,

§ 3) that at the time of the Passover Jerusalem had 3,000,000 inhabitants is manifestly an exaggeration.

Life in the villages was more simple and natural than that in the cities. But the large cities had of course many attractions; for there magnificent temples and palaces, and whole streets taken up by bazaars displaying the treasures of the most distant countries, were to be found. These sights are described very picturesquely in reference to Tyre in Ezek. xxvii. 5 *et seq.* The large cities were also the seats of learning, and contained the colleges and the libraries (Isa. xlvii. 10; Dan. ii. 2). But luxuriousness to the utmost degree also prevailed in the large cities, as may be gathered from Isaiah's description of the feasts (Isa. v. 11, xxviii. 8). Extravagance in dress was also carried beyond due limits (Isa. iii. 16 *et seq.*), and, worst of all, boldness and shamelessness kept pace with the vices mentioned (Amos iv. 1 *et seq.*; Isa. xxxii. 9 *et seq.*; Nahum iii. 4).

The frequent changing of the names of the cities is an interesting fact to note; and the Old Testament has been especially careful in recording these changes. The long and detailed series of these records begins with the words "Bela which is [the later] Zoar" (Gen. xiv. 2, 8), other examples being Luz, *i.e.*, Beth-el (*ib.* xxviii. 19; xxxv. 6, 27; Josh. xviii. 13; Judges i. 23, 26; xviii. 29); Kirjath-arba, *i.e.*, Hebron (Gen. xxiii. 2; Josh. xiv. 15; xv. 13, 54; xx. 7; xxi. 11; Judges i. 10); Kirjath-sepher, *i.e.*, Debir (Josh. xv. 15, 49; Judges i. 11); Jebus, *i.e.*, Jerusalem (Judges xix. 20 = I Chron. xi. 4). This process of changing the names of cities was continued in later times. The ancient Shechem, for example, was called "Neapolis" (New

Changes in Names. City); and the name of Jerusalem was changed by the Romans (Hadrian) to Ælia and by the Arabs to al-Kuds (the Sanctuary). Thus, many of the cities of Biblical antiquity have continued their existence down to modern times under new names, and not infrequently under their old ones. For the city in post-biblical times see COMMUNITY, ORGANIZATION OF.

CIUDAD REAL (formerly **Villa Real**): Capital of the former province of La Mancha (now the province of Ciudad Real) in New Castile, founded in 1255 by Don Alfonso X. of Castile. Among its first inhabitants were Jews as well as Moors, the former of whom, chiefly from the neighboring Alarcos, settled in such numbers that as early as 1290 the Jewry paid 26,486 maravedis in taxes, a sum larger than that paid by all the other inhabitants together. Like the Moors, the Jews had their own quarter, apart

from the Christians. This Jewry extended from the eastern part of the city, between the gates De la Mata and De Calatrava, along the wall to the west as far as the Calle de la Paloma or De Leganitos, as it is called in all documents; on the north and the south it was bounded by the streets De Calatrava and Lanza, as well as the street De la Mata. It formed a large square which was divided from west to east into two unequal parts by the Jews' street proper, or the Calle de la Juderia. The Jews' street (which was called "Calle de Barrio Nuevo" after 1391, "Calle de la Inquisición" after the introduction of the Inquisition, and is now known as the "Calle de la Libertad") had on its right Calle de la Culebra, Calle de Sangre, and Calle de Lobo; on its left, Calle de Tercia, Calle de Combros, and Calle de Refugio. Calle de la Barrera, now called "Compas de S. Domingo," and Calle de la Peña, ran in the direction of the first three streets, the Great Synagogue being situated between them. No traces remain of the other synagogues of Villa Real. The Jewish cemetery (Fonsario de los Judios), having an area of about 3,000 square feet, was situated on the outskirts of the city, between the roads De la Mata and De Calatrava, on the street leading along the Guadiana.

The Jews of Villa Real traded extensively in the products of the country and in other goods, which they exposed for sale in the large markets called "Alcana" or "Alcaiceria." They also lent money

Trade of Jews. to the agricultural population of the city and vicinity; but their monetary transactions occasioned frequent complaints. In a decree of Sept. 5, 1292, the king, Sancho IV., permitted the Jews to charge three or, at the utmost, four per cent interest. One of the richest Jews of Villa Real was Don Zulema aben Albagal, who, like his son-in-law, Abraham aben Xuxen (Susan), was a mill-owner and a farmer of the royal taxes, and had business relations with the grand masters of the Order de Calatrava, which was very powerful in the city. Donna Maria de Molina, the wife of Sancho IV., and, after his death, regent of Castile, protected the Jews and guarded their privileges during the continuous internal dissensions of the country, because she was dependent on the taxes they paid. Like all the Jews of Castile, those of Villa Real enjoyed peace during the reign of Pedro I. Nor were they subjected to the punishments which Henry II., after Pedro's death, inflicted upon the aljama of Toledo. For faithful services to Henry II., the grand master of Calatrava received a grant of from 500 to 1,000 maravedis, "payable from the taxes of the Jews residing between Guadalerza and Puerto de Muradal, together with Villa Real and its vicinity." This grant was confirmed by Juan I. (Aug., 1379).

The great persecution of the Jews in 1391 visited Villa Real in all its horrors. "The storm swept over Muradal and fell with equal severity upon Villa Real," writes a contemporary chronicler. On a day not precisely indicated, but probably between the tenth and twentieth of June, the mob rushed into the Jewry and plundered the dwellings, the warehouses, and the synagogues. Every Jew that re-

sisted was mercilessly cut down, and the whole Jewry was destroyed in a few hours. All the Jews who did not seek safety in flight were baptized. According to a document dated Aug. 6, 1393, the Great Synagogue, with its outbuildings and the Jewish cemetery, was presented by the king, Don Henry III., to his steward, Gonzalo de Soto, who sold it in 1398 for a consideration of 10,000 maravedis to Juan Rodriguez de Villa Real, the last named intending it for a monastery dedicated to San Domingo.

Notwithstanding their conversion to Christianity, the secret Jews, or Maranos, were bitterly hated by the Christians. In June, 1449, a bloody battle occurred between the Christian inhabitants of Villa Real and the Maranos, who were mostly tax-farmers and tax-gatherers. The first victim was Alfonso de Cota, a man of immense wealth, whose house was stormed and plundered. The mob, led by knights and nobles, rushed into the quarter De la Magdalena, where the richest Maranos were living, and into the former Jewry, robbing, plundering, and killing. The corpses of the noblest Maranos were dragged through the streets and hung up by the legs in the public places. The ringleader, Pedro Sarmiento, led away 200 mules laden with gold, silver, tapestries, and everything portable of sufficient value to tempt cupidity; he, as well as all the other miscreants, went unpunished. Thenceforth no Marano was allowed to hold public office at Villa Real. The chroniclers say that it is doubtful whether any Jews ever returned to the city after this occurrence. In April, 1483, the activities of the Inquisition were extended to Villa Real; the first victims being the rich tax-collector Juan Gonzales Pampan and his wife, known as "La Pampana."

M. K.

CIVIDALI: Italian city, in the province of Udine. It is a part of the ancient duchy of Friuli, now divided between Austria and Italy. Aside from certain inscriptions preserved in the Cividali Museum, which would date the first Jewish settlement at about 604 B.C., the first mention of Jews is by Paulus Diaconus, who refers to it, and by the council at Friuli in 796, which complained that the Christians as well as the Jews celebrated the Sabbath. The chroniclers state that Cividali was the rallying-point of the Jews from Görz, Trieste, and Vienna. There is also a report that Jewish corpses were brought to Cividali for burial from distant countries, even from Moravia. The cemetery near the city wall gave to that quarter the name "Zudaica," which name it still bears.

The graves found there date from the fourteenth century, the earliest decipherable inscriptions being of the year 1428, 1464, and 1606. In 1646 that part of the city wall, as well as part of the cemetery, was destroyed.

The presence of Jews in Cividali at an early date is shown by the fact of Jewish families bearing the name of that town. At the present day (1902) there are no Jews residing there.

CLAAR, EMIL: Austrian poet, playwright, and actor; born Oct. 7, 1842, in Lemberg. Early in life he went to Vienna with the intention of studying medicine; but, in compliance with the desire of his relatives, he adopted a commercial career. After long struggles he determined to give this up also and to become an actor. He made his début in 1860 at the Vienna Burgtheater, and afterward played in Graz, Linz, and the Berlin Hoftheater. Subsequently Claar was engaged to play at the city theater of Leipsic, and remained there for five years, and during the later part of this period also acted as a dramatic collaborator of Laube. From Leipsic Claar went to Weimar, becoming there stage-manager of the Court Theater till 1872, when he gave up this position and became chief stage-manager of the Landestheater at Prague. In 1876 he was appointed director-manager of the Berlin Residenztheater, and has since July 1, 1879, been superintendent of the United City Theaters of Frankfurt-on-the-Main.

Besides two volumes of poems ("Gedichte," Leipsic, 1868; Berlin, 1885) Claar published a number of dramatic productions, such as "Simson und Delila," a comedy (1869); "Der Friede" (1871); "Auf den Knieen," a comedy (1871); "In Hamburg," a comedy (1871); "Die Heimkehr," a drama (1872); "Gute Geister" (1872); "Shelley," a tragedy (1874), and others.

B. B.

CLASSICAL WRITERS AND THE JEWS:

The name *Ioudaïos* is apparently first mentioned by **Theophrastus**, a philosopher of the fourth century B.C. He regards the Jews as a nation of philosophers who "spend their days in discussions about God, and their nights in observing the stars." **Aristotle** met a Jew in Asia who knew Greek perfectly and was, according to Clearchus, a Greek at heart and a philosopher. **Megasthenes**, a historian of the first half of the third century B.C., says that "all the ideas expressed by the ancients in regard to the laws of physics were also known to non-Greek philosophers, partly to the Brahmans of India, and partly to those in Syria called Jews." The learned Greeks were naturally in sympathy with the monotheistic doctrines of the Jews, and at first assumed a friendly attitude toward them. **Hecataeus** of Abdera, **Strabo**, **Varro**, and even **Tacitus** himself have words of praise for the religious beliefs and for many of the institutions of Judaism. It was not long, however, before the religious isolation of the Jews, and their contempt of the heathen beliefs, created much antagonism.

As early as the third century B.C. the unfriendly feelings toward the Jews found expression. This is particularly true of Egypt, where the fable originated of the Jews being the descendants of lepers and unclean persons. **Hecataeus**, of Abdera (third century B.C.) tells of the expulsion of the Jews from Egypt in his history of that country. According to him there was a plague in Egypt, which the people

ascribed to the anger of the gods. This they thought was caused by the increase in the land of foreigners not believing in their divinity. It was decided to expel them. The bravest and strongest of the foreigners united and moved to Greece and other places; the lower classes settled in Judaea, which had been uninhabited theretofore. Describing the laws and customs of the Jews as established by Moses, **Hecataeus** says that Moses persuaded his followers that God has no form, and that He is the "sky surrounding the earth." Moses, he adds, established laws prohibiting humanity and hospitality.

Manetho, a learned Egyptian priest, is quoted by **Josephus** as describing the origin of the Jews, in substance, as follows: Amenophis, the king, compelled all the unclean persons and lepers, numbering 80,000, to work with criminals in the stone-quarries along the Nile. Among the lepers were some learned priests. After some time the king allowed them to leave the quarries, and gave them the city of Avario for their habitation. Settling there, they appointed a priest named Osarsiph—who afterward changed his name to Moses—as their leader, repaired the walls of the city, and called to their aid the inhabitants of Jerusalem, which city had been settled by shepherds expelled from Egypt. They made war on Egypt, and reigned there for thirteen years, after which the fugitive king returned with a great force and drove the shepherds and lepers into Syria ("Contra Ap." i. 26-27).

The same story with variations is repeated by **Diodorus Siculus** (first century B.C.). **Cleomedes** refers to the "beggars ever present near the synagogues"; and **Agatharchides** (second century B.C.) says that the Jews spend every seventh day in idleness, discarding their weapons, and playing in their temple. According to **Josephus**, **Apollonius Molo** (a contemporary of Cicero) wrote a treatise against the Jews, "in which he scattered his aspersions in all directions throughout the work." He calls Moses "a conjurer and deceiver," and the Jews he describes as "godless and hostile to other men." **Strabo**, the geographer (c. 60 B.C.-25 C.E.), does not repeat the story of the Jews being descendants of lepers, though he evidently follows **Diodorus** in his representation of Jewish theology. While **Manetho** ascribes the expulsion of the Jews to the king's desire to regain the favor of the gods, **Chæremón**, a Stoic of the first half of the first century B.C., traces it to a dream which Amenophis had and in which the goddess Isis appeared to him. Isis rebuked the king for allowing her temples to be demolished in the war. "Phritiphantes, the sacred scribe, informed him that if he would purge Egypt of the men who were diseased he should no longer be troubled with such apparitions. Amenophis thereupon collected 250,000 unclean persons and drove them out of Egypt. The leaders of these people, called Moses and Joseph, made their way to Pelusium, united with 380,000 men whom Amenophis would not allow to enter the country, made war on Egypt, and overran the land for thirteen years. The son of Amenophis, when he attained to manhood, drove these persons into Syria."

Lysimachus of Alexandria is also mentioned and criticized by **Josephus**. The version by **Lysimachus**

—thanks to Apion and Tacitus—was well known in the ancient world. According to him, in the reign of Bochoris, King of Egypt, the Jewish people, being infected with leprosy, scurvy, and other diseases, took refuge in the temples, and begged there for food. In consequence of the vast number of the persons infected, there was a failure of crops in Egypt. The oracle of Ammon being consulted, the king was told to drive into desert places all impure and impious men, and to drown all those affected with scurvy and leprosy. The king ordered the first to be driven out, and caused the others to be wrapped in sheets of lead and thrown into the sea. The former took counsel together, selected a priest named Moses as their leader, traveled amid great privation until they reached Judea, conquered it, and founded a city which they named Hierosyla (from their disposition to rob temples), but later changed it to Hierosolyma.

Apion, a grammarian and lawyer of Alexandria, expressed his evident enmity to the Jews by collecting, from whatever source, all current stories unfavorable to them. He repeats the story of their descent from unclean persons, represents their laws as antagonistic to those of their neighbors, and describes also their Temple and its interior. He even goes a step further and adds another fable—an invention of his own most probably. He relates that it was the custom of the Jews to capture every year some Greek stranger, to fatten him with good food, to kill him in sacrifice, and to eat his entrails. Stories similar to the above found credulous hearers, made curious by the mysteries of the Jewish religion. The customs of the Jews, so different from those of other peoples, formed a fruitful subject for discussion; as, for instance, their abstinence from pork, their rite of circumcision, their Sabbath, etc.

The claim of the Jews that theirs was the only true religion created not only interest, but also enmity. **Celsus** (second century C.E.), who wrote against Christians, also mentions the Jews. He accuses them of never having given anything useful to the world and of never having earned the respect of other peoples. They worship the imaginary, and neglect what is real; they look down upon the beliefs of non-Jews, and try to induce others to adopt the same views. **Philostratus** (180–250 C.E.) can not understand why Rome takes so much interest in the kingdom of the Jews. "From olden times," he says, "they have been opposed not only to Rome, but to the rest of humanity. People who do not share with others their table, their libations, their prayers, their sacrifices, are further removed from us than Susa, or Bactria, or even farthest India."

At the beginning of the third century of the present era the character of the Jews seems to change in the eyes of pagans: they cease to be a nation, and come to be regarded as a religious body. Proselytism becomes a feature of their activity, and is beginning to cause concern. **Dion Cassius** (150–236 C.E.) writes: "I do not know the origin of the term 'Jew.' The name is used, however, to designate all who observe the customs of this people, even though they be of different race. Therefore we find them also among native Romans. The Jews differ from all other peoples in their whole manner

of life, but especially in that they do not honor any of the other gods, but worship with much fervor only one. Even at Jerusalem they never had an image of their divinity; they believe Him to be ineffable and invisible. . . . The day of Saturn is devoted to him. On this day they carry out many peculiar rites, and consider it a sin to work. All that relates to this God, His nature, the origin of His worship, and of the great awe with which He inspires the Jews, has been told long ago by many writers." In the same century **Porphyry**, a Neoplatonic philosopher, gives some oracles of Apollo. Among other things, he says: "The way of the happy is steep and rough, . . . and the Phenicians, Assyrians, Lydians, and the race of Hebrew men taught many ways of the happy. . . . The Chaldeans and Hebrews alone received wisdom as their destiny, worshiping in a pure manner, the self-produced Ruler as God."

The Roman writers devote considerably more attention to the Jews than do the Greek. The reason for this is the greater familiarity of the Romans with the Jews, whose numbers in Rome had largely increased. **Cicero**, the great orator, philosopher, and statesman (103–43 B.C.), often refers to the Jews in his orations, and in a tone of evident enmity. He calls them "nations born to slavery"; and in his defense of Flaccus he says, among other things: "While Jerusalem maintained its ground and the Jews were in a peaceful state, their religious rites were repugnant to the splendor of this empire, the weight of our name, and the institutions of our ancestors; but they are more so now, because that race has shown by arms what were its feelings with regard to our supremacy; and how far it was dear to the immortal gods, we have learned from the fact that it has been conquered, let out to hire, and enslaved."

Horace (65–8 B.C.) refers in his satires to the persistence with which the Jews try to convert people to their religion, and ridicules their Sabbath. **Ovid** also refers to "the seventh day kept holy by the Syrian Jew." **Seneca** (d. 65 C.E.) strongly attacks the Jewish Sabbath. He denies the utility of such an institution, and considers it even injurious; for the Jews, "by taking out every seventh day, lose almost a seventh part of their own life in inactivity, and many matters which are urgent at the same time suffer from not being attended to." Seneca admits the great moral power of "this most outrageous nation," and considers their successful proselytizing as an instance where "the conquered have given laws to their conquerors."

Martial (d. 104 C.E.) repeatedly pokes fun at the Jews, their Sabbath, the offensive odor of the keepers of the Sabbath, their custom of circumcision, and their beggars. **Juvenal** (d. 140 C.E.) also mentions the great swarms of Jewish beggars and their extreme poverty, the abstinence of the Jews from the flesh of swine, etc. **Tacitus** in his history, written between 104 and 109 C.E., devotes considerable space to the Jews. He derives his information from the Greek writers, and repeats the fable of the Jews being descendants of unclean persons, of lepers, etc.; tells of their wanderings and their suffering in the desert; discourses about Moses and the laws that he

established contrary to those of other nations; and attempts to account for the origin of their various customs. He says:

"These rites and ceremonies, however introduced, have the support of antiquity; but other institutions have prevailed among them, which are tainted with low cunning. For the refuse of other nations, having renounced the religion of their own country, were in the habit of bringing gifts and offerings to Jerusalem; hence the wealth and growth of Jewish power. And, whilst among themselves they keep inviolate faith and are always prompt in showing compassion to their fellows, they cherish bitter enmity against all others, eating and lodging with one another only, and, though a people most prone to sensuality, having no intercourse with women of other nations. Among themselves no restraints are known; and in order that they may be known by a distinctive mark, they have established the practise of circumcision. . . . They show concern, however, for the increase of their population. For it is forbidden to put any of their brethren to death, and the souls of such as die in battle, or by the hand of the executioner, are thought to be immortal; hence their desire to have children, and their contempt of death. . . . The Jews acknowledge one god only, and conceive of him by the mind alone."

These, in brief, are the views held by the classical writers concerning the Jews. In most cases they are far from complimentary. These unfriendly, unjust, and at times very naive opinions are expressed by writers, many of whom in other cases show much kindly yet critical judgment. In fact, to them can be attributed the lack of familiarity of the ancient world with the life and customs of the Jews, as is amply proved by Josephus in his work "Contra Apionem"; and there is no doubt that it was the social and religious isolation of the Jews, and their contempt for the pagan beliefs, that gave birth to an enmity that has descended to more recent times.

CLAUDIUS (Tiberius Claudius Drusus Nero Germanicus): Roman emperor, 41-54 C.E. Claudius was the second son of Drusus, the brother of the emperor Tiberius. Being of a feeble constitution, and unprepossessing in appearance, he was slighted by everybody, even by his own mother. During his reign both his freedmen and his wife Agrippina exerted a great influence over him. Finally, Agrippina, in order to secure the succession of Nero, her son by her first marriage, had Claudius poisoned.

After the murder of Caligula, Claudius had been brought forth from his hiding-place by a pretorian and proclaimed emperor. Thanks to the advice and diplomatic skill of his friend, the Jewish king Agrippa I., the accession of Claudius was, on the following day, recognized by the senate. In return he confirmed Agrippa in his possession of the dominions granted him by Caligula, and added thereto Judea and Samaria, so that Agrippa had now under his rule the whole former kingdom of Herod. He also interposed between the Jewish and the pagan citizens of Alexandria, who had been in open hostility

to one another since 38 C.E. The leaders of the anti-Jewish Alexandrians, Isidorus and Lampon, were called to account in Rome, and executed (Wilcken, in "Hermes," xxx. 481 *et seq.*; "Berliner Philol. Wochenschrift," 1896, pp. 1617 *et seq.*; *ib.* 1897, pp. 410 *et seq.*; Th. Reinach, in "Rev. Et. Juives," xxxi. 161 *et seq.*; *ib.* xxxii. 160; *ib.* xxxiv. 296; Weil, in "Revue des Etudes Grecques," xi. 243 *et seq.*; Mommsen, in "Sitzungsberichte der Berliner Akademie," 1898, p. 498; *idem* "Römisches Strafrecht," p. 265; Mitteis, in "Hermes," xxxiv. 88 *et seq.*). The governor of Egypt was ordered to suppress the disorder; the Alexandrian Jews had their privileges reconfirmed; and, at the instigation of Agrippa and Herod, an edict of tolerance was issued for the Jews of the whole Roman empire. On the death of Agrippa his kingdom was again taken under Roman administration. Repeated charges brought against the governor by Jewish envoys received favorable attention from the emperor, owing chiefly to the intervention of Agrippa the Younger. Thus, on one occasion the garments of the high priest were handed back to the Jews; and Agrippa's brother Herod was put in charge of the Temple, with the right of appointing the high priests. On the decision of Claudius in a dispute between Samaritans and Judeans, see CUMANUS.

The Jews in Rome itself, however, in the year 49, were forbidden to hold religious gatherings, owing to continued disturbances resulting from the frequency of Christian Messianic sermons. No expulsion took place; but many Jews no doubt left Rome voluntarily. However, this measure of Claudius was certainly not directed against the Jewish religion.

CLAUDIUS, RUTILIUS NAMATIUS:

Roman poet. He held high public offices in Rome, but returned (416) to Gaul, the land of his birth, after the devastation of the latter by the Goths. He depicts his return in his poem "De Reditu Suo." As a polytheist he was antagonistic to Judaism; and his aversion was the more emphatic because he wished thereby to strike covertly at Christianity. He scorned the Jews mainly on account of their dietary laws, their rite of circumcision, and their strict observance of the Sabbath. He ends his diatribes by expressing the wish that Pompey and Titus had never subdued the Jews, for the insidious plague was spreading farther than before, and the vanquished had subdued the victors.

His poems were edited by Lucian Müller, 1870; a German translation was published in 1872 by Itasius Lemniacus (A. von Reumont).

CLAY ("homer," "ṭiṭ"): A word used in the Old Testament to denote several kinds of soil, including the clays of the East as well as the loam of the Nile valley. Clay, in its technical sense, is "a mixture of decomposed minerals of various kinds. Alumina, silica, and potash are the principal constituents; but along with these may be variable quantities of lime, magnesia, and iron, which give variety both to the quality and color" (Hull, in Hastings' "Dict. of the Bible," s.v.). Clay was used among ancient peoples and in Biblical times for at least three specific purposes: (1) for making bricks; (2) for making pottery; (3) as writing-material.

(1) *For Making Bricks*: The great mounds of earth marking the remains of ancient cities testify to the prevalent use of clay bricks as building-material. Throughout Babylonia, and mainly in Assyria, sun-dried and kiln-burnt bricks were the chief materials of which the people built their magnificent palaces and huge and massive city walls. Lower Egypt, according to the representations in the pictures of ancient life, and to the remains discovered by Naville at Tell el-Maskhuta, has always been a place where brickmaking was an important industry. Most of its villages, ancient and modern, have been constructed of sun-dried brick.

(2) *For Making Pottery*: Among the ruins of the most ancient cities of Egypt, Babylonia, Palestine, and Assyria remains are found of the potter's art. In the Old Testament the potter at his wheel is used as a symbol of divine power over the fate of men (compare Jer. xviii. 1-3; Isa. lxiv. 8; Rom. ix. 2).

(3) *As Writing-Material*: This was the most remarkable use made of clay in ancient times. The tens of thousands of tablets found in the ruins of ancient cities testify to the prevalence of this curious custom. On the soft material, carefully selected for its freedom from hard bodies, cuneiform characters were impressed; and to preserve the tablet from ruin it was carefully baked. Some tablets were not only impressed with cuneiform signs, but sealed by rolling over the soft clay the private seals of the principals or witnesses: such tablets are called "contract tablets." Others when written were enclosed within an envelope of clay, upon which the matter of the inner document was more or less faithfully reproduced. It is not improbable that "the evidence" mentioned in connection with Jeremiah's transfer of land bought before the fall of Jerusalem refers to a clay document (compare xxxii. 10-14; also Job xxxviii. 14). Up to the present (1902) only one cuneiform tablet has been found in Palestine, that at

Tell al-Hasi. It dates from the fourteenth century B.C.—the so-called Amarna period (see Bliss, "A Mound of Many Cities," pp. 52-60).

CLEAN AND UNCLEAN ANIMALS.

Animals ceremonially pure and fit for food, and such as are not. **Biblical Data**: The distinction between clean and unclean animals appears first in Gen. vii. 2-3, 8, where it is said that Noah took into the ark seven and seven, male and female, of all kinds of clean beasts and fowls, and two and two, male and female, of all kinds of beasts and fowls that are not clean. Again, Gen. viii. 20 says that after the flood Noah "took of every clean beast and of every clean fowl, and offered burnt offerings on the altar that he had built to the Lord." It seems that in the mind of this writer the distinction between clean and unclean animals was intended for sacrifices only; for in the following chapter he makes God say: "Everything that moveth shall be food for you" (Gen. ix. 3). In Leviticus (xi. 1-47) and Deuteronomy (xiv. 1-20), however, the distinction between "clean" and "unclean" is made the foundation of a food-law: "This is the law . . . to make a difference between the clean and the unclean, and between the living thing that may be eaten and the living thing that may not be eaten" (Lev. xi. 46-47). The permitted food is called

Between "clean," "pure" (טהור, *ṭahor*): the "Clean" and forbidden food is not simply not clean, "Unclean," but is positively unclean, polluted, impure (טמא, *ṭame*), "an abomination" (שֶׁקֶץ, *shekez*). The terminology "clean and unclean" in the food-law has to a certain extent a different implication from that borne by the same terms as used in the sacrificial law (see SACRIFICE).

The clean animals were: (1) All quadrupeds that chew the cud and also divide the hoof (Lev. xi. 3; Deut. xiv. 6); for instance, the ox, the sheep, the goat (i.e., the sacrificial animals), the hart and the gazel, the roebuck, the wild goat, the pygarg, the antelope, and the chamois (Deut. xiv. 4-5). Among other forbidden animals, the camel, the rock-badger (see CONEX), the hare, and the swine were excluded by name (Lev. xi. 4-7; Deut. xiv. 7-8), probably because used as food or for sacrifice by the neighboring tribes.

(2) Fish proper; i.e., "whatsoever hath fins and scales . . . in the seas and in the rivers" (Lev. xi. 9; compare Deut. xiv. 9).

(3) Birds. Here the Law proceeds by way of elimination. From the rather lengthy list of forbidden birds (Lev. xi. 13-19; Deut. xiv. 11-18) it may be concluded that all the birds of prey and most of the water-fowl were considered unclean. The list closes the list.

(4) The winged creeping things "that go upon all four" which "have legs above their feet to leap withal," of which four kinds of locusts are named (Lev. xi. 21-22). All the other creeping things (see ANIMALS) are most emphatically and repeatedly forbidden and held up as the greatest abomination (Lev. xi. 20, 31-38, 42-43). A list of creeping things to be avoided includes the weasel, the mouse, four kinds of lizards, and the chameleon (Lev. xi. 29-30).

Restrictions were also placed on the use of the flesh of clean animals: it was forbidden to eat it when the animal had been torn in the field by a carnivorous beast (Ex. xxii. 30), or when it had died a natural death, or had been carried off by disease (Deut. xiv. 21). Although, however, the use of such meats rendered people unclean, strictly speaking, their prohibition belongs to the law concerning BLOOD.

—Ethnological View: For the distinction between clean and unclean animals various origins have been suggested; though few of them seem to have fully satisfied any one but their own originators. Omitting the most ancient ones (Origen, "Contra Celsum," iv. 93; ed. Migne, xi., col. 1171; Theodoret, on Lev. ix. 1, ed. Migne, lxxx., col. 299, and others, analyzed in Vigouroux, "Dict. de la Bible,"

i. 615 *et seq.*), only the most popular ones in our own day need be mentioned. According to Grotius, on Lev. xi. 3; Spencer, "De Leg. Hebr. Rit." i. 7, 2; S. D. Michaelis, "Mosaïches

Recht," iv., § 220, etc., the distinction between clean and unclean animals is based on hygiene: it is a sanitary law. According to others, the law was a national one, intended to separate Israel from the neighboring nations, Arabians, Canaanites, and Egyptians (Ewald, "Antiq. of Israel," pp. 144 *et seq.*), and partly a sanitary one (Rosenmüller, "Scholia in Vetus Testamentum"—Leviticus). According to Keil, "Handbuch der Biblischen Archäologie," pp. 492 *et seq.*, the law is a religious one, intended to deter men from the vices and sins of which certain animals are the symbols, which view is a mere variation of the allegorical interpretation proposed by Philo ("De Concupiscentia," 5-10).

Of these explanations the first two have been refuted by Sommer in his "Biblische Abhandlungen," i. 187-193; Keil's opinion has been opposed by Nowack, "Lehrbuch der Biblischen Archäologie," i. 117, and others. The most popular theory at the present day is perhaps that offered by the late W. Robertson Smith, in his article "Animal Worship and Animal Tribes Among the Ancient Arabs" ("Journal of Philology," 1880), according to which the unclean animals were forbidden because they were totems of the primitive clans of Israel. This theory has been accepted by Cheyne ("Isaiah," i. 99; ii. 123-124, 303) and Stade ("Gesch. Israels," i. 408), but by Dillmann is either entirely and without discussion rejected ("Genesis," p. 382), or restricted to the prehistoric times of Israel, as being a survival of the old totem-worship and totem-clan organization, resembling in historic times the case of the horse in England, which anthropologists say is not eaten because it was once sacred to Odin, and thus tabooed (Joseph Jacobs in his "Studies in Biblical Archeol." p. 89, and similarly Salomon Reinach, "Les Interdictions Alimentaires et la Loi Mosaïque," in "Rev. Etudes Juives," xli. 144). See BLOOD; FOOD; and TOTEMISM.

E. G. H.

H. H.

—In Rabbinical and Hellenistic Literature:

The distinctions between clean and unclean animals, as described in the Scriptures, are more fully drawn in the Halakah. To chew the cud and to have split hoofs (Lev. xi. 3) are the marks of the clean tame quadruped ("behemah"), and the Talmudic traditions add that an animal without upper teeth always chews the cud and has split hoofs (see Aristotle, "Natural History," ix. 50), the only exceptions being the hare and the rabbit, which, in spite of having upper teeth, chew the cud and have split hoofs, and the camel, which has, in place of upper teeth, an incisor on each side (ניב). Even the meat of the clean and the unclean animals can be distinguished. The meat of the former below the hip-bones can be torn lengthwise as well as across, which, among unclean animals, is only possible with the flesh of the wild ass. These differences apply also to clean wild animals (חיה טהורה) as against unclean wild animals (חיה טמאה). In order, however, to distinguish clean wild from clean tame animals attention must particularly be paid

Quadrupeds. to the horns. The horns of the former must be forked, or, if not forked, they must be clear of splinters, notched with scales, and be *הדרות* ("round"), or, as others read, *חרדות* ("pointed"). It is important to distinguish the clean wild animals from the clean tame animals, because the tallow of the former may be used, while that of the latter is forbidden, and the blood of the clean wild animal must be covered up (Lev. xvii. 13), which is not the case with that of other animals (Hul. 59a, b).

It was hard for the rabbinical authorities to distinguish clean from unclean birds, as the Scripture (Lev. xi. 13-19) enumerates only the birds which shall not be eaten, without giving any

Birds. of the marks which distinguish them from the clean birds. This is all the more important as the names of some of the birds mentioned in the Scriptures are followed by the word "lemino" or "leminehu"—*i.e.*, "after its kind"—and it is therefore necessary to recognize certain fixed distinguishing characteristics. The following rules are fixed by the Talmud, by which a clean bird may be distinguished. It must not be a bird of prey; it must have a front toe, if that be the meaning of *אֶצְבַּע יְחִירָה*; but according to most explanations the hind toe is meant. Although most birds of prey have the hind toe, the toes of the clean bird are so divided that the three front toes are on one side and the hind toes on the other, while the unclean bird spreads his toes so that two toes are on each side; or if it has five toes, three will be on one side and two on the other (compare Rashi to Hul. 59a, and Nissim b. Reuben on the Mishnah to this passage).

The clean birds, furthermore, have craws, and their stomachs have a double skin which can easily be separated. They catch food thrown into the air, but will lay it upon the ground and tear it with their bills before eating it. If a morsel be thrown to an unclean bird it will catch it in the air and swallow it, or it will hold it on the ground with one foot, while tearing off pieces with its bill (Hul. 59a, 61a, 63a). As this distinction is not found in Scripture, opinions dif-

ferred greatly during and since Talmudic times. According to the Talmud (Hul. 62a, 63b), only the twenty-four kinds of birds mentioned in Scripture are actually forbidden. If certain birds are positively known as not belonging to these, no further investigation as to characteristic signs is necessary, and they may be eaten. The marks of distinction are laid down only for cases in which there is doubt whether the species is clean or unclean. Authorities, especially in Germany, would only permit the eating of such kinds as have always been eaten (מסורת). Accordingly some birds are permitted to be eaten in certain countries, but not in others. There are many controversies in the casuistic literature concerning this matter. Menahem Mendel Krochmal ("Zemah Zedek," No. 29), for instance, declares the wild goose forbidden, while Eybeschütz ("Kereti u-Peleti," §82) permits it. When the turkey was brought to Europe Isaiah Horwitz forbade it to be eaten; and although his opinion did not prevail, his descendants refrain from eating it even to-day.

In regard to clean and unclean fishes the authorities of the Talmud have also made some additions to the regulations in the Scriptures. While it is stated

in Lev. xi. 9 that only those fishes are to be considered clean which have scales and fins, the Mishnah (Niddah vi. 9) declares that all fishes with scales have, doubtless, fins also. According to this all fishes having scales but no fins may be eaten, as under that opinion it may be taken for granted that all scaly fishes have fins; apparent exceptions are accounted for by the supposition that sometimes fins are so small or rudimentary that they can not be distinguished. On the other hand, a fish with fins may be without scales and thus be unclean. The formation of the spinal cord and head also affords means of distinction. The clean fishes (דגים טהורים) have a perfect spinal column, and a head of a more or less flat projection; the unclean fishes have no spinal bone, and their heads end in a point ('Ab. Zarah 39b, 40a). There is a difference in the form of the bladder and roe in clean and unclean fishes. In clean fishes the bladder is blunt at one end and pointed at the other; while the unclean have the ends either both blunt or both pointed. Whether these marks can be depended on when the scales and fins are absent, or when the actual condition can no longer be positively ascertained, has been much discussed by old authorities (compare Jacob b. Asher, Tur Yoreh De'ah, 83). As a "cause célèbre" of modern times may be mentioned the controversy of Aaron Chorin with many Orthodox rabbis concerning the eating of sturgeon, which Chorin declared permissible, contrary to all former usage.

Concerning the use of the four kinds of locust permitted in the Scriptures (Lev. xi. 21-22) the Mishnah (Hul. iii. 8) says that a clean locust must have four feet, two of which are for jumping, and four wings, which must be long and broad

enough to cover the whole body. But it is still subject to the restriction that, to be eaten, it must belong to the species חגב, and there must be a reliable tradition recognizing it as eatable. Later authorities (compare Samuel b.

David ha-Levi on Yoreh De'ah, 85) forbid its use entirely. Very rigorous are the rules set down by the Rabbis concerning the eating of "creeping things which crawl upon the ground" (Lev. xi. 41). According to the Rabbis only such "worms" are permitted for food as do not live in an isolated condition, but are found only in other substances; for instance, the maggots in meat, fruit, fish, drinking-water, etc. But even in such cases the eating is forbidden if the worms have been removed from the place in which they originated, or if they have left that place and returned to it, thereby practically excluding all worm-eaten food (Hul. 67a, b). The conditions concerning the enforcement of these rules are very complicated (compare Yoreh De'ah, 84), but it may suffice to point out the following: Fruit and vegetables must be thoroughly examined before use to see whether they contain worms, and Orthodox families pay strict attention to the fact that should the food, after cooking, be shown to have been worm-eaten, it is not fit for consumption (compare Danzig, "Hokmat Adam," pp. 35, 22).

There was much speculation as to the reasons why certain species of animals should be allowed as food and others forbidden. In the Letter

Reasons for of ARISTEAS (lines 144-154) it is explained at length that "these laws Distinction. have been given for justice' sake to awake pious thoughts and to form the character." It is especially emphasized that birds of prey have been forbidden, to teach that man shall practise justice; and not, depending upon his own strength, do injury to others. The marks which distinguish the clean animal are allegorically explained, as shown in the following instance: To have two feet and split hoofs signifies that all actions shall be taken with consideration of the right and wrong (compare ALLEGORICAL INTERPRETATION). The martyr Eleazar, in IV Macc. v. 25, answers the king, who ridicules the laws forbidding unclean animals, "Whatever is congenial to our soul He permits us to eat; the use of obnoxious meats He forbade us." In this is apparently expressed the same idea which is stated later on by Zarza in the words: "All these things are forbidden, because they deprave the blood and make it susceptible to many diseases; they pollute the body and the soul" (Meqor Hayyim, "Tazria," beginning).

The prolix allegories of Philo concerning the clean and unclean animals (compare "De Agricultura Noe," xxv.-xxx.) have been far surpassed by the Church Fathers (Irenæus, "Adversus Hæreses," v. 8; Clemens Alexandrinus, "Pædagogus," iii.; Origen, Hom. 7 in Lev.; and many others), and for this reason in many Jewish circles no exposition of the law whatever would be heard. One should not say "The meat of the hog is obnoxious to me," but "I would and could eat it had not my Heavenly Father forbidden it" (Sifra, Kedoshim, end). In Talmudic-Midrashic literature no attempt is made to bring these laws nearer to human understanding. It was feared that much defining would endanger the observance of them, and all were satisfied "that they are things the use of which the Torah forbids" (Tanhuma, Lev. ed. Buber, Shemini, iii. 29), although they were not capable of explanation.

Beginning with Saadia, the Jewish commentators started to explain the Biblical laws either rationalistically or mystically. It is remarkable that Saadia's theory bears great resemblance to the modern theory of totemism. He asserts, namely, that some animals which were worshiped as divine were declared eatable as a protest against that worship, and for the same reason others were declared unclean ("Kitab al-Amanat Wal-I'tikadat," 117, bottom; Hebrew translation, iii. 2; ed. Slucki, p. 61). Ibn Ezra is of the opinion that the flesh of unclean animals has been forbidden because it is impure and obnoxious, and the substance swallowed and digested goes into the flesh and blood of those who have eaten it (commentary to Lev. xi. 93; concerning other passages of Ibn Ezra compare Zarza, *l.c.*).

Maimonides ("Moreh Nebukim," iii. 48) finds in these ordinances mainly sanitary, and partly esthetic, principles. Similar is the opinion of the great French exegete Samuel b. Meir, in his commentary on Leviticus. Nahmanides agrees only partly with these theories, and mentions only one sanitary reason concerning fishes. The clean, he argues, get nearer the surface of the water, and therefore possess a degree of heat which drives away too much humidity; while the fishes without fins and scales, which stay in the deep water, and especially those in swampy water, possess a degree of cold and humidity which acts mortally. It is different with the birds, which, with exception of the "peres" and "oz-niyah," two species of eagles, are all birds of prey, the black and thick blood of which causes a marked inclination to cruelty. Concerning the quadrupeds, Nahmanides wavers between ethical and sanitary reasons, and refers to non-Jewish physicians to maintain the objections to the flesh of the hog (commentary on Lev. ix. 13; compare his "Derasha," ed. Jellinek, p. 29). The explanations which Bahya b. Asher (on Lev. xi.) gives concerning the forbidden animals are mainly taken from Nahmanides. He adds the new explanation that this law is merely an expansion of the rules of the cult of sacrifice, so that many animals which can not be used for sacrifice shall not be eaten (*idem*, 163d, ed. Riva di Trento). Isaac Arama is especially opposed to sanitary reasons ("Akedat Yizhak," part 60, ed. Pollak, iii. 33b), and acknowledges psychological and ethical motives only. "The unclean animals," says Arama, "cause coarseness and dulness of the soul." Arama, evidently referring to Abravanel, but without mentioning his name, gives other theories of Jewish scholars. In his remarkable polemic against the rationalistic explanation by Maimonides of the laws regulating food, Viterbo tries to show the untenableness of the sanitary grounds ("Ta'am Ze'kenim," ed. El. Ashkenazi, pp. 42-43).

Like the Jewish religious philosophers, the mystics have stated their speculations concerning the grounds of these laws. According to the cabalistic theory which makes the negative SEFIROT the cause of the existence of evil in the world, the Zohar (Shemini, iii. 41b) explains that the unclean animals originate from some of these negative Sefirot, and therefore they are forbidden as food; but as with the arrival of the Messiah all will become purer and nobler, these animals will then be permitted as

food (Yalk. Hadash, Liqqutim, 36, 79). In this manner the mystics explained the idea, expressed in Midrash Tehillim to cxlvi., that in the future God will declare the unclean animals clean. This Midrash caused Abravanel and other Jewish scholars much embarrassment (see Buber, *ad loc.*), so that several of them did not hesitate to declare it a Christian interpolation; but without reason, as similar opinions have been held and expressed in the remotest time (compare ANTINOMIANISM), and probably had their origin in pre-Christian times. Regarding the view taken by Reform rabbis and by modern Bible exegetes of clean and unclean animals, see DIETARY LAWS; PURITY; REFORM; TOTEMISM.

CLEANNES AND UNCLEANNES. See PURITY.

CLEIF, DANIEL HAYYIM: Russian rabbi; born in Amsterdam 1729; died there May 14, 1794. He settled in Hasenpoth, in the government of Courland, originally as a jeweler; later he officiated there as rabbi for many years. At this time he wrote "Arugah Ketannah" (The Small Garden-Bed), a booklet in which the 248 mandatory precepts are formulated in rime (Altona, 1787, and reprinted several times). He also left in manuscript a commentary on the Pentateuch.

One of Cleif's sons was a physician in the service of the Russian government, with the title of councilor of state: he died in the government of Orel in 1846.

H. R.

CLEMENT XIV. (LORENZO GANGANELLI): Two hundred and fifty-sixth pope; born at San Arcangelo, near Rimini, Oct. 31, 1705; elected May 19, 1769; died Sept. 22, 1774. His election was hailed with particular joy by the Jews, who trusted that the man who, as councilor of the Holy Office, declared them, in a memorandum issued March 21, 1758, innocent of the slanderous blood accusation, would be no less just and humane toward them on the throne of Catholicism. In this they were not deceived. Two months after his accession Clement XIV. withdrew the Roman Jews from the jurisdiction of the Inquisition and placed them under that of the "Vicariato di Roma" (Aug. 5, 1769). Another token of his benevolence toward the Jews was the confirmation (March 29, 1773) of the bull of Clement VIII. concerning the *Jus GAZAKA*, which was of very great importance to the Roman Jews.

The memorandum of Clement XIV. (Ganganelli), referred to above, deserves special mention, as much from the importance of the subject treated therein as from the great authority of its author. It was called forth by a blood accusation against the Jews of Yanopol, Poland. Alarmed by this frequently repeated accusation, the Polish Jews sent one Jacob Seleke to Rome to implore the protection of the pope. Benedict XIV. thereupon ordered a thorough exami-

nation of the matter, and the councilor of the Holy Office, Lorenzo Ganganelli (later Clement XIV.), was charged with the preparation of a report on the subject. This report, bearing on its title-page the motto "Non solis accusatoribus credendum," was presented to the congregation of the Inquisition March 21, 1758. The author shows therein not only the groundlessness of the Yanopol accusation, but, passing in review all the principal cases of blood accusation since the thirteenth century, demonstrates that they were all groundless. Only in two cases did Ganganelli hesitate to declare the falsity of the accusation; namely, in that of Simon of Trent, in 1475, and in that of Andreas of Rinn, in 1462. The future pope could not very well acknowledge that the canonization of these two pretended martyrs was undeserved. But he pointed out that the popes themselves hesitated a long time before admitting the worship of Saint Simon and Saint Andrew; the former having waited more than 110 years, and the latter almost 300 years—a proof that the veracity of the accusation was doubted. No account is to be taken of the testimony of some baptized Jews, such as Julio Morosini and Paul Sebastian Medici, who, in their hatred of their former coreligionists, claim in their writings that the Jews use Christian blood. Moreover, these writings were triumphantly refuted by high authorities. Ganganelli concludes his memorandum by reminding the Christians that they themselves were once accused by the heathen of the same crime, as attested by Tertullian, Minucius Felix, Theodoret, and Rufinus.

The effort of Ganganelli was crowned with success. Benedict XIV., impressed by the arguments in the memoir, declared the Jews of Yanopol innocent, and dismissed Jacob Selek with honors, recommending him, through Cardinal Corsini, to Visconti, Bishop of Warsaw, who received orders to protect the Polish Jews in the future from such accusations.

Ganganelli's memorandum was translated into German by A. Berliner, under the title "Gutachten Ganganelli's (Clemens XIV.) in Angelegenheit der Blutbeschuldigung der Juden," Berlin, 1888. The original Italian text was published by Isidore Loeb in "Rev. Etudes Juives," xviii. 179 *et seq.*

I. BR.

CLEMENTINA or PSEUDO-CLEMENTINE LITERATURE: A series of kindred works of a Judæo-Christian sect of the second century, of which only the Homilies, the Recognitions, and the Epitomes have been preserved. The Homilies, published first in 1853, present in the form of dialogues between Peter, Clement of Rome, and others, a gnostic system based on revelation. By revelation alone can knowledge be obtained, not by philosophy (Hom. i. 19, ii. 5). This is illustrated by the history of Clement, who vainly tried to arrive at the truth by means of philosophy. The Homilies assume a twofold revelation—the primal revelation, and the continuous revelation through the true prophets. The first was given in the act of

creation, especially in that of man. The Homilies say, like the Mishnah (Sanh. 37a): "God revealed Himself by making man in His image; were there another god he also would have to reveal himself, and create other men in his image" (Hom. xvi. 10). Man as the image of God is God's revelation, and as he also has in him God's spirit (*πνεῦμα*), the whole truth lies in him like a seed, needing only to be developed. Had men recognized the will of God and been ready to obey it, there would have been no need of a further revelation; but as they have sinned, the primal revelation is obscured and a new revelation is always necessary (ib. i. 18, viii. 5). This is afforded by the true prophet, who knows the past, the present, and the future. His knowledge is not derived from the external world, but is innate, as is the spirit in him; and his revelation is not ecstatic, but clear and unambiguous (ib. ii. 6-12, iii. 11-20). The true prophet has appeared not in one, but in various forms; changing name and shape, he will traverse this world until he finds rest in the coming world, *αἰῶν μέλλων* (ib. iii. 20).

Eight persons are exalted above the rest of humanity and brought into special connection with revelation—Jesus and the "seven pillars of the world," Adam, Enoch, Noah, Abraham, Isaac, Jacob, and Moses; and among these eight Adam, Moses, and Jesus are preeminent as possessing all the qualities of the true prophet (compare Uhlhorn, "Die Homilien," pp. 164-166). The Haggadah (Hag. 12b) also says that the world rests on seven pillars, but according to other authorities one pillar, צדיק by name, supports the world (compare Prov. x. 25). 'Αναμάρτητος (צדיק) is, according to the Homilies (ii. 6), the true prophet (compare also Suk. 52c on the haggadic interpretation of the "seven shepherds and eight princes"; Micah v. 4).

As the person of the true prophet is always the same, so the religion revealed by him is always the same: the primal revelations through Adam, through pure Mosaism, and through Theological Christianity are identical (Hom. xviii. Teaching of 3). The fundamental doctrine of this, the Homilies, the only true, religion is that of the one God, the Creator of the world.

"Before all things, consider that no one shares His rule, no one has a name in common with Him; that is, is called 'God.' For He alone both is, and is called, 'God.' Nor is it lawful to think that there is any other, or to call any other by that name. And if any one should dare do so, eternal punishment of soul is his" (ib. iii. 37). The attacks on those who deny the unity of God, and the positive proofs of that unity, constitute the greater part of the Homilies. The conception of monotheism is entirely Jewish, and all attempts to modify abstract monotheism in the Christian way are emphatically rejected. So much stress is laid on monotheism that it almost becomes pantheism, God being designated as τὸ Πᾶν, τὸ Ὄν, and everything else as nothing. He alone is; He is the tangible and the intangible, near and far, here and there; He alone exists. He penetrates everything. As the sun warms and illuminates the surrounding air, so God warms and illuminates the world; He is the heart of the world,

and the center from which all life irradiates (*ib.* xvii. 7, xviii. 8, and *passim*; compare Uhlhorn, *l.c.* p. 174). Although this pantheistic conception is originally Greek, it must be remembered that it was also known to the Jewish scholars of Alexandria and of Palestine. Similar to the statement in the Homilies (xvii. 8): "The space of God is the non-existent, but God is that which exists," is the statement in the Midrash: **שהוא מקום עלמו ואין העולם** (Gen. R. lxviii. 10; Midr. Teh. xc.).

From this pantheistic point of view the Homilies regard the development of the world as a development within God; the *πνεῦμα* ("spirit") and the *σῶμα* ("body"), which were originally united in God, were separated, and this was the beginning of the world. The Creation is explained by assuming that the spirit of God changed into air, the air into water, and the water into fire. The Homilies teach not the emanation of the world from God, but the eternal flux of things, God being the beginning and the end. Herein the Book of Yezirah corresponds with the Homilies, holding likewise that the world was created out of the first four Sefirot; the last six Sefirot treated in this book—namely, the three dimensions of space in the two opposite directions, by means of which, out of the prototypes of the world, the world was produced as a reality—also occur in a passage of the Homilies, which, however, has often been misunderstood (xvii. 9; compare Grätz, "Gnosticismus," p. 113; Epstein, in "Rev. Et. Juives," xxix. 73).

Like the Book of Yezirah and the Cabala in general, the Homilies also hold the doctrine of contrasts, which constitutes their conception of the world. All things separate (*διχῶς καὶ ἐναντίως*) and go in opposite directions, unite, separate, and finally unite again. As the material world is made up of the four elements mentioned above,

Syzygies. which oppose each other in pairs (Homilies, xix. 12), so the spiritual world is governed by contrast. The ruler of this world is Satan, the ruler of the better future world is the Messiah, who was produced by the spirit or pneumatic side of God. While the greater, masculine principle—heaven—earth, day—night, sun—moon, life—death; etc.—has precedence in the original syzygial series, the reverse takes place among men, the smaller, feminine principle preceding. Hence in history, especially in that of Israel, Cain is opposed to Abel, Ishmael to Isaac, Esau to Jacob, etc. The principles that appeared separate in Adam and Eve, but which are mixed in the majority of men, appear from time to time separated again. The final outcome of this evolution is a return to God by a process of purification or annihilation. When the Messiah, the eternal light, appears, all darkness will vanish (*ib.* ii. 17). At the resurrection all men will be transformed into creatures of light so that they may behold God (*ib.* xvii. 16). This rests on the assumption that He can not be seen by man in the flesh. "He who sees God can not live [Ex. xxxiii. 20], for the excess of light dissolves the flesh of him who sees, . . . but . . . at the resurrection of the dead, when they shall have been changed into light and become like the angels, they shall be able to see Him" (*l.c.*)—a theory found

also among the tannaim of the second century, whom Akiba attacked (Sifra, Wayikra, 2; Sifre, Num. 103; compare also Abba Arika's description of the joys of the future world, when the pious "shall enjoy the glory of God"—**נהנין מזיו השכינה**; Ber. 17a; Tan. iv. 145, ed. Buber). This is an instance of that anthropomorphic conception of God which is found in the Homilies side by side with the pantheistic conception, and although in its present form it betrays attempts to reconcile these two diametrically opposed conceptions, yet the contradiction between the two is often very marked. The anthropomorphism is less pronounced in the metaphysical portions of the Homilies; but it forms the basis of their ethics, which is founded on the doctrine that man was made in the image of God (compare the teaching of the Jewish Gnostic Ben Azzai; Gen. R. xxiv. 7); and this doctrine they can establish only by assigning a shape to God (compare especially *ib.* xvii. 11).

As regards the attributes of God, which are, however, only given in human similes, the Homilies hold that the **מדת הרין ומדת הרהמים** ("justice and mercy") of Jewish theology (Sifre, Deut. 27) constitute the nature of God (Homilies, iv.

Judaism and Christianity. 13). It is this conception especially that stamps the Homilies as consisting entirely of Jewish gnosis, admitting of no contrast between the "righteous"

God of the Old Testament and the "merciful" God of the New Testament, but identifying the teachings of Jesus with those of Moses, so that the salvation of those who follow Moses is as assured as that of those who believe in Jesus; the former, however, must not hate Jesus, nor the latter, Moses (*ib.* viii. 6, 7). Hence the Homilies never speak of Christians, their point of view being always designated as the "Jewish" one (see Langen, "Die Klemensromane," p. 90); and it is pointed out that the daughter of the Canaanite woman was healed only after the latter had become a Jewess (Homilies, ii. 19); that is, had accepted the Jewish Law. The Pentateuch did not originate entirely with Moses, for he put nothing into writing; and those who recorded his teachings after his death introduced much that was contrary to those teachings. The sacrifices especially do not belong to the original Law (an Essene heresy), and as these and similar interpolations obscured the meaning of the Torah, it became necessary for the true prophet to appear in the person of Jesus. It is difficult to say how the authors of the Homilies conceived of the incarnation of Jesus; they, however, decidedly opposed the doctrine of the divinity of Jesus, and considered the Christian doctrine of the atonement and salvation through the sufferings of Jesus as without importance. The strict asceticism found in the Homilies may be traced back to Essenism. It is a sin to possess anything whatever; the eating of meat is absolutely forbidden, only bread and water being allowed (compare Abot vi. 4); and the Homilies, like the Essenes, lay great stress on ablutions and bodily cleanliness. Bathing is legally prescribed after cohabitation, as in the Talmud (Ber. 21b, 22a); but marriage itself is highly regarded and recommended, even early marriage being insisted upon—in which points the Clementina follow

entirely rabbinical Judaism (Yeb. vi. 6, based upon Gen. i. 28, ix. 1).

The Recognitions are extant only in the Latin translation of Rufinus. Regarding their relation to the Homilies, and regarding the historical value of the Clementina in general, opinions differ. While Baur and many representatives of the Tübingen school regard them as a chief source for the history of the early Christian Church, Harnack thinks that they contribute nothing toward determining the origin of that Church. It can not be denied, however, that the Clementina are highly important for the history of gnostic Judæo-Christianity, as well as for that of Jewish Gnosticism, being among the few extant literary documents of those sects. Compare ADAM KADMON; ELCESAITES; GNOSTICISM; SIMON MAGUS.

CLEOPATRA: Queen of Egypt 52-30 B.C.; daughter of Ptolemy Auletes. Through her association with the rulers of Rome, Cleopatra was of importance not so much to the Jews of her own country as to those of Judea. When Herod fled in great distress before Antigonus, he turned toward Egypt; but it was only after suffering many indignities at Pelusium that he was enabled to embark for Alexandria, where he saw Cleopatra. However, although she invited him to remain, he hastened on to Rome (40 B.C.) (Josephus, "Ant." xiv. 13, § 2; "B. J." i. 14, § 2).

After Herod became king by the help of the Romans, Cleopatra tried in every way to injure him. Alexandra, Herod's mother-in-law, complained to Cleopatra that the office of high priest was denied to her son Aristobulus, and she sent the pictures of her beautiful children, Mariamne and Aristobulus, to Antony, at that time held captive by Cleopatra's charms. Antony desired the handsome youth as a companion, and to prevent this Herod was forced to appoint Aristobulus as high priest (35 B.C.). Alexandra's ambition went so far as to desire the throne for her son. Hidden in coffins, mother and son intended to have themselves transported to Egypt to Cleopatra, but the plan was discovered, and Herod had Aristobulus secretly murdered ("Ant." xv. 2, §§ 5-7; 3, §§ 1-3). Alexandra notified Cleopatra of the deed (*ib.* 3, § 5); but Herod, protected by Antony, went unpunished.

Cleopatra's ambitious spirit seriously injured Herod. She not only induced Antony to give to her in fief the entire coast-line, except Tyre and Sidon, but appropriated Jericho, a region of Judea rich in palms and the far-famed balsam. She traveled to

Judea by way of Apamea and Damascus; and Herod was forced not only to appease her animosity with presents, but also to rent Jericho from her for a yearly sum of two hundred talents, and to send her at his own expense as far as Pelusium (*ib.* xv. 4, §§ 1-2; "B. J." i. 18, § 5). Through her machinations he was drawn into a war with the Nabataean king Malich; and when he was victorious, Cleopatra sent her general Athenion to help the Nabataeans; whereupon the Jews were defeated and retired across the Jordan (31 B.C.). Herod had great difficulty in surmounting the consequences of this defeat ("Ant." xv. 5, §§ 3-4; "B. J." i. 19, §§ 5-6).

The anti-Jewish APION not incorrectly looked upon Cleopatra as a ruler hostile to the Jews; for she seems indeed to have been inimical to them. Still Josephus says ("Contra Ap." ii., § 5) that Apion should rather have denounced the vices of this devilish woman, and thinks it redounds to the honor of the Jews that they received no wheat from her during a famine in Alexandria. Cleopatra's hatred went so far that when her capital, Alexandria, had been taken by Cæsar Augustus and she had lost everything, she conceived the idea that all could yet be saved if she should murder the Jews of her city with her own hands (*ib.*). Her death immediately afterward saved the Jews from this fate (30 B.C.).

Rabbinical literature also reports one of her cruel deeds. The bodies of some of her female slaves, who had been condemned to death, were torn open and the contents examined (Tosef., Niddah, iv. 17; Talmud, Niddah, 30b). A question that she is said to have addressed to R. Meïr (Sanh. 90b) can scarcely be historical, owing to the anachronism involved in making them contemporaries, and it is probable that the reading קלפטרא מלכתא ("Queen Cleopatra") in this passage is a corruption of פטריא דכותאי ("patriarch of the Samaritans"; see Bacher, in "Rev. Et. Juives," v. 185, vi. 159; *idem*, "Ag. Tan." ii. 68).

G. S. KR.

CLEOPATRA OF JERUSALEM: One of the nine wives of Herod I., whom he married late in life. She bore to him Herod and Philippus (Josephus, "Ant." xvii. 1, § 3; "B. J." i. 28, § 4).

G. S. KR.

CLERGY. See COHEN; PRIEST; RABBI.

CLERICAL ERRORS: Errors made in the writing of documents, especially legal documents, for the prevention of which the Jews have many stringent laws. The Jewish official scribes were notably exact in the preparation of legal documents (Git. 2b); for an error was often fatal to the validity of the instrument. Care is taken not to write an acknowledgment of indebtedness on any substance on which it may be easily altered. Such an instrument would be absolutely invalid even though it were intended to be used immediately for the collection of the debt (Shulhan 'Aruk, Hoshen Mishpat, 42, 1). But if the instrument is a bill of sale, it is valid (*ib.*, gloss), because there would be no reason for the holder of the instrument to make any alteration in its terms. Some authorities adopt the general rule that an instrument which is not prepared in accordance with

the rabbinical ordinances is ipso facto invalid (*ib.*, gloss). The instrument of indebtedness may be written in any language, but the scribe must take care that it does not deviate from the prescribed form of documents (*ib.* 42, 2). If an erasure is made, it must be noted on the instrument before the witnesses sign (*ib.* 44, 5-11). It is the duty of the witnesses and the court to scan the instrument carefully to note whether the rules for writing it have been complied with (*ib.* 45, 2).

These rules are numerous. The scribe must write his letters of equal size and equidistant (*ib.* 42, 3). He must spell the amounts of money in full, and not merely use the letters (corresponding to modern figures) to designate the amount (*ib.* 42, 4). He must not write at the end of a line words that can easily be altered, such as the amounts from three to ten; as these by the addition of a letter or two can be raised to ten times their original amount (*ib.* 42, 4). The failure to close the instrument with the universally accepted formula, "All is fixed and established," is absolutely fatal (*ib.* 44, 9). If the scribe has omitted the date of the instrument, it is nevertheless valid, but is no lien on goods sold to third persons (*ib.* 43, 1). If the date is partially written, it is sufficient; as, for instance, if the scribe has omitted the thousands of the date (*ib.* 43, 2), or has written "on the fourth day," omitting "beshabbath" (of the week) (*ib.* 43, 4), or if he has erred in the day of the week (*ib.* 43, 5). But if the instrument is written by the debtor himself, it is valid even though it has no date at all and is without witnesses, and was delivered in the presence of witnesses without the customary "livery of seisin" (*ib.* 40, 2; 43, 6). If the instrument is wilfully antedated it is void; but if antedated by mistake it is valid, though it can not serve as a lien on property sold to a third person (*ib.* 43, 8). If the document is postdated it is valid (*ib.* 43, 12); but a bill of sale should not be postdated unless this fact is noted thereon (*ib.* 43, 13). If the date appears to be a Sabbath, or the Day of Atonement, the instrument is valid; for, inasmuch as no instrument can be written on those days, it is presumed to have been postdated (*ib.* 43, 14; 239, 2).

If there is a contradiction in the amounts mentioned in the instrument, the amount last stated governs (*ib.* 42, 5). If the coinage in which payment is to be made is not stated, the coinage of the place where the contract was made governs. If the place is not stated, then the coinage of the place where the debt is sought to be collected governs (*ib.* 42, 14).

If there is an erasure of one letter of the name on the last part of the instrument, it may be supplied from the statement of the name in the beginning; but if more than one letter is obliterated, the instrument is void. If by the error of the scribe there is more than one letter entirely omitted from the name in the last part of the instrument, it is valid for the bearer of the last name, it being presumed that the scribe has erred in the first name by writing two letters too many; but it is not to be supposed that he would err in omitting two letters of a name (*ib.* 42, 6).

All interlineations, obliterations, and erasures must be noted before the final formula; and if they occur in the names of the parties or in the amount, and are not so noted, the instrument is void (*ib.* 44, 5). The formula used is "The word . . . is interlined," or "The words . . . are obliterated." In bills of divorce, erasures or interlineations in the formal parts do not affect the validity of the instrument; but if they occur in the essential parts, it is void, unless they are noted at the end as in the case of other instruments (Shulhan 'Aruk, Eben ha-'Ezer, 125, 19). The modern rule, however, is stricter and will not tolerate any such imperfections in the "get." To insure accuracy and freedom from clerical errors the Seder ha-Get (Eben ha-'Ezer, Rules 46-52) prescribes that the writing must be clear and neither crooked nor confused; the letters must be separately written and not joined together; the letters of two lines must not run into each other; nor should the letters extend beyond the marginal line. There must be no erasure of ink-spots or of words, no roughness in the letters, and no writings over erasures. In case any of these rules be violated a new get must be written.

J. SR. D. W. A.

CLERMONT-FERRAND: Chief town of the department of Puy-de-Dôme, France. The origin of the Jewish community of Augusta-Nemetum (Clermont) is usually assigned to the third century of the common era. It is said that the first apostle of Auvergne, St. Austremoine (Stremonius), was killed about 286, by order of Lucius, the Jewish governor of Issoire, by a Jew, the owner of the village Perrier (compare Labbe, "Nova Bibliotheca," ii. 482; Gonod, "Chronologie des Evêques de Clermont"; A. Tardieu, "Histoire de Clermont"). This is evidently a legend, as perhaps is also the story told by the Abbé Marmesse ("Vie de St. Verny et de Ste. Marcelle," Clermont, 1858), that, about the second half of the thirteenth century, a Jewish working man murdered a young Christian child named Verny, who was afterward proclaimed a saint. It is certain, however, that the Jews established themselves in Clermont at a very early period. They then occupied the entire eastern part of the market-town Fontgiève, called "Fontjuifs" or "Fontjuifve" in the fourteenth century; and they owned the hillock Montjuzet; *i.e.*, "Mons Judæus" or "Judaicus" (Cohendy, "Inventaire des Chartes des Archives, Département du Puy-de-Dôme," pp. 11, 51).

Sidonius Apollinarius, Bishop of Clermont (472-488), held the Jews in great esteem. He speaks in the highest terms of the Jew Gozolas, servant of the Bishop of Narbonne ("Epistle," vi. 4), and recommends to the bishop Eleutherus the cause of a Jew. In a third letter, addressed to the bishop Nonnechius, Sidonius Apollinarius recommends to him Promotus, a Jew of Clermont (*l.c.* ii. 13). Bishop Gallus, uncle of Gregory of Tours, also showed good-will to the Jews. When he died (551) the Jews of Clermont took part in the general mourning, weeping for the man who had treated them so kindly, and carrying

the wax tapers at his funeral (Gregory of Tours, "Vitæ Patrum," vi. 7). Bishop Cautinus (551-571) esteemed them no less. "He was dear to the Jews," says Gregory of Tours (*l.c.* iv.), "and was much attached to them." The historians of Auvergne, Savaron in his "Origines de Clairmont," and Audigier in his "Histoire de Clermont," censure this prelate for his familiarity with the Jews, saying that "he lived on friendly terms with them, not with the view of enlightening them, but in order to buy his furniture and jewels cheap from them." On his death the presbyter Euphrasius sent to the king many valuable things which Cautinus had bought from the Jews—a proceeding quite different from those of Bishop Avitus a few years later (see AVITUS OF AUVERGNE).

The councils which met at Clermont in the sixth century occupied themselves repeatedly with the affairs of the Jews. Those of 535 and 549 forbade intermarriages between Jews and Christians, and the appointment of Jews as magistrates of the people (Conc. Arverne, Canons vi. and ix.).

It does not appear that Jews were living at Clermont at the time of the first Crusade (1096). Only toward the end of the thirteenth century are traces of a Jewish community again found in that city. At that time (1298-99) the Jews of Auvergne paid into the royal treasury a tax of 992 livres, 6 sous, 6 deniers (Library of Clermont, Auvergne MS. No. 62; compare "Revue Etudes Juives," xv. 248). In 1293 Jews dwelt in several market-towns or villages of Auvergne, such as Herment, Ennezat, Montaigut, Lignat, etc. (see article by M. A. Tardieu, in "La Dépêche du Puy-de-Dôme," Sept. 14, 1891). At Orbeil lived one of the disciples of R. Hayyim of Blois, R. Isaac, author of "Menahel" (The Guide), a collection of ritual rules known only by the quotations from it found in the ritualistic work "Orhot Hayyim" of Aaron of Lunel (Renan-Neubauer, "Les Rabbins Français," p. 448). The Manuscript de Rossi 313, 3, cited by Gross ("Gallia Judaica," p. 589), contains the haggadic explanations of Nathan ben Joseph. This scholar probably came from Clermont.

There were also Jews in other French places which bore the name of Clermont. Some are found in 1321-23 at Clermont-en-Argonne, in the department of the Meuse ("Revue Etudes Juives," xix. 257), and some at Clermont, Hérault, in 1350-1400 (S. Kahn, "Les Juifs de Tarascon," p. 25). In 1808 thirty-eight Jews were living at Clermont; in 1901 it had twenty-five to thirty families. The community is part of the consistory of Lyons.

CLEVE, ELIJAH. See GOMPERZ FAMILY.

CLEVELAND: Capital of Cuyahoga county, Ohio, U. S. A.; situated at the mouth of the Cuyahoga River, and an important port on Lake Erie. The history of its Jewish community dates back to the year 1837, when a Bavarian, Simson Thorman, settled here. He was soon followed by others of his countrymen—Cleveland being then a thriving

town of about 6,000 inhabitants—and in 1839 the colony had increased sufficiently to warrant the establishment of a permanent religious organization.

This first congregation, called The Israelitish Society, began with twenty members. In 1842 it was divided, the seceding branch forming the Anshe Chesed society; but four years later these two again united, and formed the Anshe Chesed congregation, the oldest existing religious organization in the town. Its first synagogue was built on a lot exchanged for land which had been presented to the Anshe Chesed society, for building purposes, by Leonard Case, a wealthy non-Jewish landowner.

Dissensions in 1848 resulted in the withdrawal of members, who in 1850 formed the Tifereth Israel congregation, the second of the now

First Settlements. \$3,000 bequeathed by Judah Touro of New Orleans in 1854, purchased the site upon which its first synagogue was erected. These two congregations have always been the leading factors in Cleveland Jewry—the Anshe Chesed representing the Conservative branch, its present membership being 210; the Tifereth Israel, the Radical Reform, with a membership of 513, and a Sabbath school enrolment of 775. Both are prosperous, and worship in splendid modern edifices.

The rabbis of Anshe Chesed congregation have been: Fuld, 1850; E. Hertzman, 1860-61; G. M. Cohen, 1861-66; Nathan, 1866-67; Gustave M. Cohen, 1867-75; M. Tintner, 1875-76; M. Machol, the present incumbent, from 1876.

The rabbis of Tifereth Israel congregation have been: Isidor Kalisch, 1850-55; Wolf Fassbinder, 1855-57; Jacob Cohen, 1857-66; G. M. Cohen, 1866-1867; Jacob Mayer, 1867-74; Aaron Hahn, 1874-92; Moses J. Gries, the present incumbent, from 1892.

The congregation next in importance is the B'ne Yeshurun Hungarian, which was founded in 1865, reorganized in 1886, and has (1903) a present membership of about 200. Its rabbi is Dr. Sigmund Drechsler.

The year 1881 saw the arrival of the first Russian refugees, who, in point of numbers, have since become a highly important part of the community. Besides the three leading congregations mentioned, there are no less than eleven minor congregations, mostly Russian, with a combined membership of about 700—the largest of them, Beth Hamidrash Hagodol Beth Israel, having 600 seat-holders. There are also many so-called "hebrahs," formed only for services during the principal holidays. On Oct. 17, 1885, the first American Rabbinical Conference was held in Cleveland. The first annual conference of the existing Conference of American Rabbis was held in Cleveland, July 13, 1890.

The Jewish Orphan Asylum of Cleveland, founded by the Independent Order of B'nai B'rith, District No. 2, was established in 1868; its superintendent since 1878 has been Dr. S. Wolfenstein. This institution, which shelters 500 children, has become famous, being considered a model of its kind (see article thereon in "Ohio State Bulletin of Charities and Corrections," vol. iv. 47), and exerting a wide-spread influence in furnishing (from its trained assistants) superintendents and matrons for other similar insti-

tutions. The heads of the Jewish orphan asylums of San Francisco, Atlanta, Chicago, Philadelphia, and Rochester were formerly assistants at the Cleveland institution. The Educational League, formed for the higher education of orphans, and now a national organization, was founded in Cleveland in 1896.

In 1875 the Hebrew Relief Association, the oldest benevolent society of importance, was organized; in 1890 it joined the National Confer-

Charitable and Other Organizations. ence of Jewish Charities. Its annual income is about \$4,500. There are many lesser charitable organizations in the community, among them the Daughters of Israel, the oldest women's benevolent society, founded in 1860. The

Association, in which charity the larger part of its funds is expended. It supports also a free Sabbath-school of about 500 children, a working girls' club of 160 members, a free kindergarten, and several other departments. Its annual expenditure is nearly \$3,000. In 1899 an educational organization, called the Council Educational Alliance, was formed, and a building for its use was presented by Moritz Joseph. Though not a social settlement, its work is along settlement lines; being educational and social in character, and having a resident director. In its building are a large gymnasium with baths, a free public library with reading-rooms, and club, class, and social rooms. Courses of free lectures and entertainments are given during the winter. A public

THE JEWISH ORPHAN ASYLUM, CLEVELAND, O.

(From a photograph.)

Russian part of the community has recently developed several of its own. In 1881 the Sir Moses Montefiore Home for Aged and Infirm Israelites, founded by the Order Keshet Shel Barzel, was established in the city. It has at present 54 inmates. In 1889 the Young Men's Hebrew Association was formed; but after a more or less active life of eight or nine years it went out of existence in the fall of 1899, for want of interest and support.

In 1894 the Council of Jewish Women was organized by the federation of the older women's societies—the Benevolent Society, the Sewing Society, the Personal Service Society, and others. This organization joined the National Council of Jewish Women in 1896, and has since become an active power in educational and philanthropic work. It assumes the care of the sick poor, and in this works jointly with the older society, the Hebrew Relief

playground is maintained by the Alliance. The monthly expenditure is \$400; the average monthly attendance (1902) was about 25,000.

The Jewish lodges in Cleveland are as follows: Independent Order B'nai B'rith, 3; Independent Order Sons of Benjamin, 9; Order B'rith Abraham, 5; Order Keshet Shel Barzel, 2; Independent Order Free Sons of Israel, 2; Order Knights of Joseph, 7. The B'nai B'rith lodges now form Cleveland Lodge, No. 16. There are also several Zionist societies and two newspapers, "The Jewish Review and Observer," an amalgamation of the "Hebrew Observer," founded in 1888, and the "Jewish Review," founded 1893; and a Yiddish paper which has led a precarious existence under various names, and is now (1903) appearing as the "Jewish Free Press."

In a total population of about 400,000, estimates place the number of Jews between 15,000 and 25,000.

Of these not more than 7,000 to 9,000 are permanently affiliated with any religious organization.

The older part of the community is rapidly increasing in wealth and importance, an extensive cloak and clothing manufacturing interest being almost entirely under its control. Its members are also well represented among the prominent merchants, and in law, medicine, art, and music.

The younger part of the community, the Russian and Polish element, is also rapidly forging to the front. Some of its earlier arrivals

Social have already attained to affluence; and
Status. they also are well represented in the medical profession. The majority,

however, are still small tradesmen and pedlers, with a good percentage of tailors, cloak-makers, cigar-makers, carpenters, shoemakers, plumbers, etc.

Temple of Tifereth Israel Congregation, Cleveland, O.
(From a photograph.)

The early struggles of the Jews of Cleveland were perhaps more severe than those of other communities, and development was slower. It is indeed only within the last decade that university education has become fairly general; and perhaps it is for this reason that Cleveland has not given more Jews of prominence to the world. The best known now living here is Dr. Marcus Rosenwasser, for some years dean of the Wooster Medical College, and for many years professor of abdominal surgery in the Cleveland College of Physicians and Surgeons. In the early days Benjamin F. Peixotto was a resident and active communal worker here. Simon Wolf also lived here for some years. Besides these the community boasts of but two famous sons—the artists George P. M. Peixotto and Louis Loeb.

The religious attitude of the community differs but little from that of others in the West, save perhaps in that the Reform movement has advanced more rapidly in Cleveland than elsewhere. All shades and varieties of Judaism are to be found, from the most rigidly Orthodox to the ultra-radical Reform—on the one hand, an unswerving adherence to tradition; on the other, at Tifereth Israel synagogue, now called "The Temple," almost an entire abolition of it. The Temple congregation worships on Sunday, a large number of its attend-

ance being non-Jews. It has abolished the reading of the Torah and practically all Hebrew from its service and Sabbath-school. Its Sabbath school session is held on Sunday afternoon. In its house of worship are given regular public courses of lectures and entertainments. It has a public library and reading-room; and recently a large, well-equipped gymnasium, with baths, has been added.

CLIMATION or ACCLIMATIZATION: The adaptation of the individual to a new climate. It has been observed that when people emigrate to a strange country, even when the new climate differs but little from that of the mother country, there occurs a transformation which affects the entire organism. It has been shown by Virchow that it is not only the individual who is affected by a prolonged sojourn away from his native country, but his posterity as well. At present one of the most urgent problems confronting modern statesmen and sociologists is whether Europeans can emigrate to other climates, particularly the tropics, live healthful lives, and perpetuate their kind and ethnic type there (see C. H. Pearson, "National Life"; B. Kidd, "Control of the Tropics," p. 79, note).

The Jews furnish perhaps the best statistics for solving the problem of climation. They live, thrive, perpetuate their kind, and preserve their identity in almost every climate. Many students of the problem of acclimatization have shown that the Jews are a cosmopolitan race (see particularly Boudin, "Mémoires de la Société d'Anthropologie," i. 117). Andree aptly says that "the

Jews an Jew is able to acclimatize himself
Example. with equal facility in hot and in cold latitudes, and to exist without the assistance of native races. He lasts from generation to generation, in Surinam (Dutch Guiana) or in Malabar (India), tropical climates where Europeans, in the course of time, die out unless they are constantly reenforced by immigration from the mother country" ("Zur Volkskunde der Juden," pp. 70, 71). In Algiers, where the French find it so difficult to adapt themselves, the Jews are known to prosper and multiply, as the following figures show:

The climation of the Jews in Algiers appears the more striking in view of the following figures for the year 1856, given by Boudin (*l.c.* p. 119), showing the relation of the birth-rate to the death-rate among the Jews in comparison with Europeans and the native Mohammedans:

	Births.	Deaths.
Europeans	1,234	1,553
Mohammedans	331	514
Jews	211	187

A similar vitality and power of acclimatization are shown by the Jews in India (for statistics see M. Legoyt, "De Certaines Immunités Biostatiques de la Race Juive," pp. 21-24), in the tropical countries of South America (Montano, "L'Hygiène et les Tropiques," in "Bulletin de la Société de Géographie," series 6, xv. 418-451), in the southern portion of the United States, and in Cuba. The same holds good in South Africa and Australia.

A. R. Wallace considers the Jews "a good example of acclimatization because they have been established for many centuries in climates very different from that of their native land; they keep themselves almost wholly free from intermixture with the people around them. . . . They have, for instance, attained a population of near two millions [at present nearly six millions] in such severe climates as Poland and Russia; and according

Extremes of Temperature. to Mr. Brace ("Races of the Old World," p. 185), their increase in Sweden is said to be greater than that of the Christian population; in the

towns of Algeria they are the only race able to maintain its numbers; and in Cochin China and Aden they succeed in rearing and forming permanent communities" ("Acclimatization," in "Encyclopædia Britannica," 9th ed., vol. i.).

It is important to note that wherever they live the Jews preserve their peculiar typical Semitic features, and in most cases also their habits of life.

Felkin ("Can Europeans Become Acclimatized in Tropical Africa?" in "Scottish Geographical Magazine," ii. 653) states that it is probably due to a certain amount of Semitic blood that the southern Europeans possess in a higher degree the power of adapting themselves to a subtropical climate. Discussing the overwhelming superiority in adaptability of the Maltese over the Spaniard, Virchow says that it is derived from the mixture of foreign (Semitic) blood ("Ueber Akklimatisation," in "Verhandlungen der Versammlung der Naturforscher und Aerzte in Strassburg," 1885).

Investigation tends to show that even a little Semitic blood in the veins of nations is a great help in acclimatization, and that the power to adapt themselves to a strange climate is a racial trait of the Jews. Another important point is that while other white races find it advantageous to climation to intermarry with the native races, and while many have shown that this is absolutely necessary for successful climation, the Jews do not, as a rule, intermarry with their neighbors, and still adapt themselves easily to new climatic conditions. See INTERMARRIAGE.

Some consider that the superior power of climation of the Jews is a racial trait, acquired by their constant migrations, and even their tem-

Suggested Causes. porary stay in Egypt; and their slow progression ("petit acclimatement") is stated by Bertillon ("Acclimatement," in "Dictionnaire des Sciences Anthropologiques," Paris, 1884) to have had its influence on their power of climation. But Schellong ("Akklimatisation," in Weyl's "Handbuch der Hygiene,"

i. 334) points out that the center of dispersion of the Jews was in the countries near the Mediterranean, whence they have slowly penetrated into the heart of Europe (an opinion not shared by all authorities on the subject); and that in this manner they have reached the northern countries of Europe, their progression being constantly in the direction of the colder regions, for which less aptitude for climation is necessary.

Another point especially worthy of notice is the fact that the Jews in the tropical countries are not engaged in pursuits requiring much exertion and exposure to the hot rays of the sun. This is especially emphasized by Ripley ("Races of Europe," p. 563), who says that Jews confining all their activities to shops in the towns can not be compared with others who take up the cultivation of the soil.

Another view of the question of the causes of the Jew's power of climation is that his sobriety, purity of home life, and freedom from vicious habits contribute largely to his easy adaptation to a new climate. That there is a great deal of truth in this can not be denied, because it is well known that immigrants in tropical countries are prone to do things which they would not even think of amid the restraints of home life. The English (according to Wallace), who can not give up animal food and the use of spirituous liquors, are less able to sustain the heat of the tropics than the more sober Spaniards and Portuguese. The Boers in South Africa are another example of a people who keep sober and prosper in a tropical land. The sobriety of the Jew is admitted by all, and has undoubtedly a great influence on his adaptability to new climates, although this adaptability seems to be a racial characteristic of the Semites, not dependent upon the merely negative virtue of sober and temperate living.

CLISSON: Town in the department of Loire-Inférieure, France, formerly belonging to the province of Brittany. Clisson was a center of Jewish learning, several renowned scholars having resided there; and its name, variously written קליסון, קליצון, קליצין, קליצין, קליצין, occurs in the Hebrew writings of the thirteenth century. Its most prominent scholars were: (1) the Tosafist Joseph, called also "Joseph the Jerusalemite"; (2) Meir Clisson, mentioned as a Biblical commentator in the commentary "Zofnat Pa'neah"; (3) Isaac of Clisson, mentioned in the "Semak"; (4) Jacob, mentioned by Mordecai ben Hillel.

CLOAK. See MANTLE.

CLOUD.—**Biblical Data:** The Hebrew equivalents for "cloud" are: (1) "Anan," (Gen. ix. 13, 14; Ex. xiii., *passim*), which occurs once in the feminine

form "ananah" (Job iii. 5), and once in the Aramaic form *anā* (Dan. vii. 13). (2) "Ab" is generally used in the poetic books instead of the more prosaic "anan" (Job xxxvi. 29; xxxvii. 11, 16; I Kings xviii. 44; Isa. v. 6, etc.). (3) "Shahak," a purely poetic form, occurring frequently in the plural, but only twice in the singular (Ps. lxxxix. 7, 38), is used for "heavens" (Job xxxvii. 15; Ps. lxxxix. 7, 38). In Deut. xxxiii. 26; Isa. xlv. 8; Jer. li. 9; Job xxxv. 5, xxxviii. 37; Ps. xxxvi. 5, lvii. 11, cviii. 5, it is used as a parallel for "heaven." (4) "Arafel," a thick, heavy, dark cloud (Deut. iv. 11, v. 22; II Chron. vi. 1; Job xxii. 13, xxxviii. 9; Isa. lx. 2). (5) "Nesi'im," rendered "vapors" in Jer. x. 13, li. 16. Ps. cxxxv. 7 seems to echo Jer. x. 13 and li. 16, having a very similar phraseology. "Nesi'im" occurs also in Prov. xxv. 14, "clouds and wind and no rain."

In the peculiar climatic conditions of Palestine clouds were an important feature. The year was divided into a rainy season, from October to May, and a dry season, from May to October. During the rainless season not only was there no rain, but not even a cloud appeared in the heavens (I Sam. xii. 17, 18), and when the rain-cloud did appear it arose gradually from the west—that is, from the sea—and then the heavens were darkened and a tremendous downpour followed (I Kings xviii. 45). Many figurative expressions are derived from the qualities of the clouds. They are driven across the sky very quickly; hence it is said that the enemy "shall come up as the clouds" (Isa. xix. 1, ix. 8; Jer. iv. 13). Job complains of his welfare passing away as the cloud (Job xxx. 15). Here, too, is the thought that the cloud leaves no trace behind it. Originating from this thought is the phrase in Isa. xlv. 22, "I have blotted out, as a thick cloud, thy transgressions." The clouds of the rainy season foreshadow the rain, hence symbolize a favor bestowed (Prov. xvi. 15). In the dry season the dew-cloud revives the dried vegetation; God's favor is therefore pictured as the dew (Hosca xiv. 5). The blackness of the clouds betokens misfortune (Ezek. xxx. 18; Lam. ii. 1), and even a curse, as in Job iii. 5.

Clouds are frequently pictured as hiding God from man and as intercepting man's petitions (Lam. iii. 44; Job xxii. 13, 14). In Job xxvi. 8 there is the strong figure of the cloud used to bind up and contain the waters. As direct manifestations of God, the clouds are His chariots (Ps. civ. 3; Isa. xix. 1). When God appeared over Mount Sinai it was in clouds and thunder and lightning. A cloud covered the mercy-seat (Lev. xvi. 2) in the Tabernacle, and later on it rested over the Temple (I Kings viii. 10, 11; II Chron. v. 13, 14). A pillar of cloud accompanied the Ark, showing the way by day through the wilderness (Ex. xiii., *passim*). See RAINBOW.

J.

G. B. L.

—**In Rabbinical Literature:** The observation of clouds for the purpose of divination (*ענין*) was one of the forbidden methods of forecasting the future (Lev. xix. 26). Notwithstanding this, the pillar of cloud of the altar was observed for that purpose in the Temple on New-Year's or Atonement Day (compare Yoma 21b.; B.B. 147a), the direction which the pillar of cloud took being thought to in-

dicate what part of the land would be blessed with plenty during the year (Lev. R. xx.; compare Abraham's forecasting of the year while observing the stars on New-Year's eve [Book of Jubilees, xii. 16]). A cloud stationary over the top of Mount Moriah, betraying the presence of the Shekinah, was the means by which Abraham recognized "the place afar off" (Gen. xxii. 4; Gen. R. lvi.; Tan., Wayera, 46; Pirke R. El. xxxi.; Targ. Yer. to the passage). A cloud over the entrance to the tent of Sarah also indicated the presence of the Shekinah (Gen. R. lx.).

Of Moses it is narrated that when he was about to ascend to heaven, a cloud came to meet him, and, forming about him, carried him up (Pesik. R. 20; ed. Friedmann, p. 96). God wrapped Moses in a cloud to protect him when the angels of heaven, who were jealous of him, wanted to cast him down (Ex. R. xli., xlii.). The cloud of the divine glory also appeared at Aaron's death on Mount Hor, and gradually covered him until he disappeared from before Moses (Yalkut, Mas'e, § 787). Moses was sanctified by the cloud so that he could receive the Law from God on Sinai (Ab. R. N. i.). When Moses' life was drawing to an end, the cloud of glory surrounded his successor, Joshua, at the gate of the tent, and Moses, standing outside, felt that his leadership was transferred to Joshua (Jellinek, "B. H." i. 116). Josephus ("Ant." iv. 8, § 48) relates of Moses' end that after he had dismissed the elders and was still discoursing with Eleazar, the high priest, and Joshua, a cloud suddenly stood over him and he disappeared (compare Samaritan Book of Joshua, vi.).

The clouds carried along from the River Pishon in paradise the precious stones for the ephod and the high priest's breastplate, as well as the sweet odors, the sacred oil, the balsam for the candlestick, and the ointment and incense for the Tabernacle (Targ. Yer. to Ex. xxxv. 27, 28, the word *נשיאים*, used in the passage, denoting both "princes" and "clouds"). The clouds spoken of in Isa. lx. 8 ("Who are these that fly as a cloud?") are miraculous clouds, carrying the righteous every morning and evening from all parts of the world to the Temple at Jerusalem, so that they may participate in the divine service (Pesik. R. i.; compare I Thess. iv. 17: "We which are alive and remain shall be caught up together with them [the angels] in the cloud to meet the Lord in the air").

The cloud of divine glory which carries the Son of man in the Messianic vision (Dan. vii. 13) has given rise to the identification of Anani, the descendant of David (I Chron. iii. 24), with the Messiah as "the one who will come down from the clouds" (see Targ. and Sanh. 92b: *בר נפלי* [*vepheli*], "the son of the cloud"; hence Matt. xxiv. 30, *passim*).

Clouds of a miraculous character appeared to R. Hiyya ben Luliani in the time of a drought, saying to one another: "Come, let us bring rain to Ammon and Moab" (Ta'an. 25a). For the cloud-vision in the Baruch Apocalypse (liii. *et seq.*), see BARUCH, APOCALYPSE OF.

Regarding the origin and nature of the clouds, R. Eliezer holds, pointing to Gen. ii. 6 and Job xxxvi. 28, that the clouds above sweeten the water rising from the ocean as mist, while R. Joshua, referring to Deut. xi. 11 and Job xxxvi. 37, says that the

clouds form a receptacle through which the water coming from above pours down as through a sieve: whence the name "shehakim" (grinders), as they "grind" the water into single rain-drops (Gen. R. xiii.; compare Bacher, "Die Agada der Tannaiten," i. 136). These views seem to have given rise to another controversy between R. Johanan and R. Simon b. Lakish, the former referring to Dan. vii. 13, the latter to Ps. cxxxv. 7 (Gen. R. l.c.). The five Biblical names for "cloud" are explained: "ab" = the cloud thickening the upper atmosphere; "ed" = the cloud bringing, in the form of rain, "calamity" upon corn-speculators; "anan" = the cloud rendering people "pleasant" toward one another through prosperity; "nesi'im" = the cloud rendering people "princes," either by benefiting all or by favoring some; "haziz" = the "shining" cloud causing men to have "visions" (Gen. R. l.c., and Yer. Ta'an. iii. 66c).

K.

CLOUD, PILLAR OF (עמוד הענן, Ex. xiii. 21).

Biblical Data: When Israel was marching through the wilderness, YHWH, wrapped in a pillar of cloud, preceded the people in order to show them the right way. During the night the cloud turned into a pillar of fire (Ex. xiii. 21; xiv. 19, 24; Num. xiv. 15; Deut. i. 33; compare Ps. lxxviii. 14; Neh. ix. 12, 19). On one occasion the pillar of cloud moved behind the Israelites in order to shield them from the pursuing Egyptians (Ex. xiv. 19, 24).

The historic basis of this account is doubtless found in the frequently mentioned custom of carrying fire before an army on the march, so that the route might be indicated by day by the rising smoke and after nightfall by the light. When Alexander was marching through Babylonia and Susiana he gave the signal for his army to set out, not by trumpet, but by means of a long pole fastened above the chief tent, on which a fire burned by night, and from which smoke rose by day (Curtius, v. 2. 7). Thrasybulus, leading home banished men through untrodden regions, was preceded at night by a fire (compare Clement of Alexandria, "Stromata," ed. Colon, i. 348). In Arabia to-day iron vessels filled with burning wood are carried on long poles at the head of caravans (compare Harmer, "Beobachtungen," i. 348; Pococke, in "Morgenland," ii. 51). Since YHWH is Israel's leader, and clouds and fire signify His presence (Ex. iii. 2, xix. 9), smoke and fire are transformed into cloud and firelight.

E. G. H.

W. N.

In Rabbinical Literature: The Haggadah, taking the words "I placed the children of Israel in tents" ("sukkot," Lev. xxiii. 43) in an allegorical sense as signifying that the Israelites were surrounded with clouds for protection, and the name of the city Sukkot (Ex. xii. 37, xiii. 20) as the place where they were covered with clouds (see Mek., Bo, xiv.; Mek., Beshallah, i.), mentions not one, but seven, "clouds of glory" as having accompanied Israel on its march through the desert (ענני כבוד); namely, one on each of the four sides, and one above, one below, and one in front of, these four. According to another passage there were even thirteen clouds, two on

each side, two above, two below, and one in front. Others, again, speak of only four, or of two (Mek., Beshallah, i.; Sifre, Num. 83). The cloud in front prepared the way by leveling the heights and depths (see ARNON), killing the snakes, and making the way pleasant. These "clouds of glory" prevented the garments of the Israelites from becoming soiled or worn during the forty years in the wilderness (Pesik., ed. Buber, x. 32a; compare the parallel passages in Buber, l.c.). They were combined with the standards of the twelve tribes as follows: a strip of the seventh cloud, on which the initials of the names of the three patriarchs flashed in heavenly light, rested on the standard of the tribe of Judah, while a second strip of the same cloud, on which the second letters of the names of the three patriarchs flashed, rested on the standard of the tribe of Reuben; the standards of the tribes of Ephraim and Dan were similarly distinguished by strips of the seventh cloud. Hence the first strip of cloud bore the letters י"ה; the second strip, ב"נע; the third, ר"ה; and the fourth, א"ב, the name of Abraham being spelled without the letter ה, and appearing on these strips of cloud as "Abram." This ה combined with י and forming the name of God (י"ה), appeared on the pillar of cloud that hovered over the Ark of the Covenant. During the seven days of the week the pillar of cloud went the rounds of all the camps of Israel, giving light as the sun by day and as the moon by night. When God wished the Israelites to remove their camps, the cloud on which the letters י"ה were marked moved upward from the Ark of the Covenant. The four other strips of cloud followed after it, and as soon as the priests noticed these clouds following in the wake of the first, they blew their trumpets as the signal to continue the journey ("The Chronicles of Jeremiah," pp. 149-157; a slightly different version is found in the description of the cloud in the "Kānah," ed. Korez, p. 32b-c). These clouds receded from the Israelites when they had committed sins, and thus failed to protect them; this happened in the case of the tribe of Dan, which, having been guilty of idolatry, was assailed by Amalek, and many were slain (Mek., Beshallah, Amalek, 1). Compare FIRE, PILLAR OF; STANDARD.

E. C.

L. G.

Critical View: An account somewhat different from that in the two earlier sources of the Pentateuch, J and E, is found in the latest source, the Priestly Code. The latter never speaks of a pillar, but merely of a cloud, and this appeared only after the erection of the Tabernacle, which it covered by day, while by night it contained fire, which was perceived on the Tabernacle and taken as an omen. When the cloud rose the Israelites broke camp, and when it was lowered they set up their tents (compare Ex. ix. 34 *et seq.*; Num. ix. 15 *et seq.*, x. 11 *et seq.*, xvii. 7). Hence the conception in the Priestly Code seems to be based on the idea of the continually burning altar-fire in the tent (compare Dillmann, on Ex. xiii. 21).

E. G. H.

W. N.

COAL: Expressed in the Bible by two words, פחם (Prov. xxvi. 21; Isa. xlv. 12, liv. 16) and

נחלים (Ps. xviii. 9 [A. V. 8]; Prov. xxv. 22). Since נחל means "to glow" or "to burn," נחלים probably means "the glowing," and פחם, "black coal" (compare Prov. xxvi. 21), although this distinction does not always obtain (Isa. xlv. 12, liv. 16). Of course, charcoal is always meant, which was made of tamarisk and broom, the kind formed of the thick roots of the latter (רתם) giving an especially strong and lasting heat, and being still much sought in the East (Robinson, "Biblical Researches in Palestine," i. 203; Germ. ed., iii. 683). According to Jer. vi. 29, the flame was fanned by a bellows (כפח), probably the ancient variety worked with the feet and hands; but in a picture found in Wilkinson's "Ancient Egyptians," iii. 339, the Egyptians are shown using for that purpose long reeds protected against the flame by long metal points.

Though the coal-fire was used chiefly for cooking food, and for baking bread, meat, and fish (Isa. xlv. 19), it was also used for heating the homes. In the winter, live coals were placed in a brazier standing in the middle of the room (אח, Jer. xxxvi. 22; כוור, Zech. xii. 6); in the houses of the poor they were placed in a hole in the floor. As there were no chimneys, the smoke found vent either through the door or through the grated window (ארכה), which was generally rather high in the wall (Hosea xiii. 3).

The word "coal" is often used in a metaphorical sense: II Sam. xiv. 7 speaks of the "quenching of the coal" of a man, meaning the complete annihilation of his issue; while in Prov. xxv. 22 kindness bestowed upon an enemy is called "heaping coals of fire upon his head," since it tends to waken his deadened conscience and help him to realize his wrong. Ecclus. (Sirach) viii. 10 compares the smoldering and easily roused passion of the godless man to the coal that is easily lighted and breaks forth into flame.

W. N.

COAT: An outer garment with sleeves, for the upper part of the body; in the Bible it is an article of dress for both men and women, worn next to the skin, and is distinct from the "cloak," or outer garment (compare Matt. v. 40); either "shirt" or "tunic" would be a more correct rendering. The Hebrew has "kuttonet," rarely "ketonet," which is sometimes translated "robe" or "garment" (Isa. xxii. 21; Neh. vii. 70, 72; II Sam. xiii. 18, 19; Ezra ii. 69). "Kuttonet" is a word of doubtful etymology (coming, perhaps, from a root meaning "to clothe"), but its cognate forms are found in Arabic ("kattan"), Ethiopic ("ketān"), Assyrian ("kit-innē"), and Greek ("chiton").

Originally (Gen. iii. 21) the garment worn by the Hebrews was a simple loin-cloth of leaves or skins, like that adopted by Elijah (II Kings i. 8, "girdle of leather"; compare the use of the "punti" on the border of the Red Sea: Müller, "Asien und Europa," p. 108). In course of time this developed into a short shirt, with an aperture for the head to pass through, and was gradually lengthened to the knees (especially when used by women), and sometimes to the ankles. Even tunics with trains are mentioned (Isa. vi. 1; Jer. xiii. 22; Nahum iii. 5). The shirt was made at first without sleeves, and also failed to

cover the left shoulder (see Müller, *l.c.* pp. 296 *et seq.*). The working classes continued to wear the "primitive loin-cloth" (Müller, *ib.* p. 297), or the sleeveless coat, as this allowed full freedom of movement for both arms and legs. When the shirt was long, a belt or girdle was worn over it, partly for the purpose of holding it together, but mainly to enable the wearer to tuck in the laps when running, walking, or working.

The expression "mouth of the coat" can not be understood to mean that the shirt had a collar. It denotes simply the opening at the top, fitting closely round the neck (Job xxx. 18). At night (Cant. v. 3) this undergarment was taken off. Later, as outer garments came into use, one clothed only with the kuttonet was considered to be "naked." As a sign of mourning, originally, every article of dress was removed, and cuts were made in the flesh; but as soon as the wearing of the kuttonet alone came to be regarded as equivalent to "nakedness," that garment was rent to express grief (II Sam. xv. 32; compare Morris Jastrow, in "Journal of the American Oriental Society," xxi. 23, 39; and see CUTTINGS). That a loin-girdle was regarded as equally inadequate with the kuttonet is shown in Talmudic allusions (Shab. 62b; Soṭah 9a; Esth. R. 104b).

The more luxurious classes of society—*e.g.*, women of royal blood (II Sam. xiii. 18, 19) and men of leisure—wore tunics with sleeves. This is the meaning of the Hebrew "passim" occurring in the description of the garment presented to Joseph by his father (Gen. xxxvii. 3). It was not "of many colors" (see Septuagint); the color of the shirt worn even by those of high rank was yellow, or red, or black (Müller, *l.c.* pp. 297-299); the upper garment, wound spirally round the body, was of blue and red, and showed various patterns, like those worked into rugs; but its significance lay in the fact that the sleeves (Targ. and Bereshit R. parashah 84) marked the favorite son, who was absolved from work. These sleeves sometimes extended only to the elbow-joint; when they covered the whole length of the arm, the lower part was, as a rule, richly ornamented with fringe. Whether or not the common shirt had seams is not clear. The more costly shirts appear to have been sewed together, the seams, especially those round the neck, being heavily covered with embroidered strips (Müller, *l.c.* pp. 298, 299). The materials from which these tunics were made were wool—woven by the women—flax, and, for the more costly ones, worn by officials, both secular and sacerdotal (Ezek. xxvii. 16; Isa. xxii. 21), imported Egyptian byssus ("shesh," Gen. xli. 42; Ex. xxviii. 39; and "buz," Ezek. xxvii. 16).

In Mishnaic times this coat, or shirt, was still worn. It is found under the name "onkali" ("nokli," Yer. Shab. 15d), which sometimes seems to denote a garment worn by women, and is correctly explained in the "Aruk" as "a thin article of apparel worn next to the skin" (compare also Meg. 24b; Sanh. 82b; M. K. 24a). It was, however, provided with sleeves (Brüll, "Trachten der Juden"; Krauss, "Lehnwörter," *s.v.*). "Sarbalin" in Dan. iii. 21 is not "coat," but "trousers." (See COSTUMES IN BIBLICAL TIMES).

G. B. L.—E. G. H.

COAT OF ARMS: Armorial bearings of families to which the right to bear arms has been granted by the recognized heraldic authorities. This right is in a heraldic sense distinctly feudal in character; and it seems to have originated, toward the end of the twelfth century, in the international relations during the Crusades, which rendered it desirable to introduce some system into the devices on shields. As Jews had no recognized position in the feudal system after this period, they could not use these devices, though for some time they were ranked with nobles, and had the right of deciding their disputes by duel. Consequently, no Jewish coats of arms were recognized by the heralds in the Middle Ages; though rich Jewish families of means used devices, as is shown by the occurrence of heraldic **SEALS**.

The first recorded Jewish coat of arms is that of Bassevi von Treuenfeld, which was granted by the German emperor Ferdinand II. Jan. 18, 1622. Grätz ("Gesch." x. 37) blazons his shield a blue lion, eight red stars in a blue field, thus committing one of the most elementary heraldic blunders in thus putting color upon color. The true blazon will be found below. In the same year two Jewish envoys from Candia arrived at Venice bringing with them designs practically the same as coats of arms. One of these (Samuel Abdala) is figured below; but it is unlikely that they were granted by any heraldic

ARMS OF SAMUEL ABDALA.
(From the "Jewish Chronicle.")

authority, since one of the envoys had a device referring to his given, and not his family, name.

The practise of bearing coats of arms became more general among the Jews at the time of the Maranos. When a Jew became converted in Spain, he was generally adopted by some noble family, and thereby obtained the right to bear the family arms. In this way many Jewish families gained the

right to shields, which they carried with them to Holland, and had carved on their tombstones, even after they had repudiated Christianity, which had given them the right

Sephardic Coats of Arms. to such shields. It would appear that at an even earlier period certain

Spanish Jews had adopted arms; since there is on record the elaborate seal of the Halevis of Toledo, bearing the triple-turreted castle of Castile, a device afterward adopted by the earl of Beaconsfield.

In more recent times a grant of arms has lost its feudal significance; and it now merely implies that the grantee is a person of some wealth who desires to have the same external trappings as other persons in his social position.

Jews have occasionally yielded to this desire, and a certain number

of coats of arms have been granted in England by the heraldic authorities. Besides these, those Jews who have been received into the ranks of the nobility on the continent of Europe have, as a matter of course, been granted armorial bearings, which are recorded in the usual works on heraldry. There is rarely anything distinctively Jewish in the coats of arms thus granted. Occasionally, as with the Montefiores and the Sassoons, a Hebrew word is used; but as a rule the ordinary heraldic signs are utilized.

The subjoined list of coats of arms of Jewish families—the first that has been made—has been compiled from the standard works on heraldry of the respective countries, with occasional reference to Jewish books in which armorial bearings sporadically occur. The full titles of the works cited under names of authors at the end of each blazon are as follows:

COATS OF ARMS OF JEWISH FAMILIES.

Abarbanel (Spain, Portugal, Holland): Argent, a lion gules, rampant, toward a tower gules. [Rietstap, i. 1; Da Costa, p. 511.]
Abarbanel de Sousa (Portugal): Quarterly, 1 and 4, argent, a lion gules, rampant, toward a tower gules (for Abarbanel); 2 and 3, argent, four crescents, appointed, affronté, gules (1. 2. 1) (for Sousa). [Rietstap; Da Costa, *ib.*]
Abarbanel da Veiga (Portugal): Quarterly, gules, an eagle argent; argent, three fleurs-de-lis azure. [*ib.*]
Abdala (Corfu, 1622; grant for Samuel Abdala): Divided, dexter, in an outstretched hand the goblet for the Kiddush in a field azure; sinister, in an outstretched hand a twig of myrtle (which in Corfu supplies the place of the spice-box), in a field or. ["Jewish Chronicle," Sept. 19, 1902, pp. 23-25, 55. See illustration on page 125.]
Abendana (Amsterdam): Two swords, put in saltier, the hilts below. Crest: Upon a helmet two ostrich-plumes. [JEWISH ENCYCLOPEDIA, i. 52.]
Abendana: An eagle upon a bolt of lightning, surrounded by a sun. Crest: A sinister hand. Colors or metals unknown. [Da Costa, p. 513.]
Aboab: Or, five stars, 2. 1. 2, put saltier-like (see Frontispiece, Fig. 4). [Piferrer, i. 21; compare Da Costa, p. 515.]
Aboab (Altona, Hamburg): A house or fortress with cannon and banner. ["Ost und West," Aug., 1902, p. 534, from Grünwald, "Portugiesengräber," 1902.]
Abolais (Portugal, Holland): Divided, 1, a lion rampant toward 2, half of a tree, a rose in the point. Crest: A lion issuant, turned the reverse way (dexter). Colors unknown. Date, 5392 = 1632. [De Castro, plate xiv.]
Abgravanel: Per bend, charged with a star (8 points) between two arrows, the points upward, accompanied by two stars (8). Crest: Upon a helmet two serpents entwined, combatant. Colors unknown. [JEWISH ENCYCLOPEDIA, i. 127.]
Acosta (Spain, Portugal, Holland): Quarterly, 1, or, a mountain, surmounted by a plantation of reeds, proper; 2, gules, a duck natant, proper; 3, gules, a hill, surmounted by a towered castle argent, embattlements azure; at the entrance to the castle a pomegranate, half opened, proper; 4, azure, five stars (8) argent (2. 1. 2), saltier-like. [Piferrer, i. 17; Rietstap, i. 7.]
Aguilar (Spain): Gules, an eagle sable, holding in its beak a shield gules, charged with three bars or. [Rietstap, i. 16; Piferrer's plate gives shield in center of the eagle.]
Aguilar or D'Aguilar (London, Spain, Portugal): Gules, an eagle or, surmounted by a bezant argent; in a chief argent, three hills sinople, surmounted each by a pear or, stem and leaves sinople. Crest: A lion issuant or, charged by a bezant argent. [Rietstap, i. 16.]

Alvarez (Spain, Holland): Per pale, 1, or, a tree sinople, at the base of the trunk a wolf sable; 2, chequy argent and gules. [Piferrer, iv., No. 1573.]

Andrade or D'Andrade (Spain, etc.): Or, five wolves passant sable (2. 2. 1). [Rietstap, ii. 47.]

Arnstein, Arnsteiner (Austria; creation: knight 1793; baron 1793-98): Quarterly, 1 and 4, azure, an eagle argent; 2 and 3, argent, a fess azure, charged by a sun or. Over all, sable, a crown or, surmounted by a bunch of five ostrich-plumes or. Two crests: (1) Wings, alternately azure and argent. Lambrequins: Argent and azure. (2) Five ostrich-plumes or. Lambrequins: Or and sable. [Rietstap, i. 69; Kneschke, i. 114.]

Asser (Amsterdam): Azure, a bend argent, a border or, sometimes charged by four "A's" sable, put in the cantons. Supporters: Two lions regardant, proper. [Rietstap, i. 76.]

Avernas-le-Gras. See SUASSO and LOPEZ-SUASSO-DIAZ.

DA FONSECA, below.

Azevedo (Acebedo = holly-tree) (Castile): Quarterly, 1 and 4, argent, a holly-tree sinople; 2 and 3, or, a wolf passant sable. The shield is surrounded by a border gules, charged with eight small saltiers or. [Rietstap, i. 92; Piferrer, iii., No. 1272.]

Azevedo - Coutinho (Brabant): Quarterly, 1 and 4, or, a holly-tree sinople; 2 and 3, argent, a wolf passant sable. The shield is surrounded by a border gules, charged with a fleur-de-lis argent, and five hatchets argent, handles or. [Rietstap, i. 92.]

Bassevi von Treuenfeld (Austria; creation Jan. 18, 1622): Sable, a bend argent, charged by three stars (5) gules, and accompanied by two lion-leopards or. Crest: A lion issuant or, between couped wings; dexter, argent and sable; sinister, or and gules. Lambrequins: Dexter, or and sable; sinister, argent and gules. [Rietstap, i. 128.]

Bebri (1673): In a shield, a sword, quiver with arrows and bow, with a cuirass. Crest: Upon the helmet of a prince (?) a cubit arm, dexter, holding a simitar. Colors not known. [De Castro, plate vi.]

BASSEVI VON TREUENFELD.

Belmonte: Gules, a lion rampant or; in a chief azure, three roses argent. Crest: A bunch of ostrich-plumes (5). Supporters: Two vultures sable, collared argent, holding a standard. Motto: Virtute et fide. [JEWISH ENCYCLOPEDIA, ii. 665.]

Bernal (Spain, England): Gules, a horse courant argent, saddled and bridled azure. [Rietstap, i. 177.]

Bessels (Amsterdam): Azure, a fess, ondé, argent, accompanied by three stars or (1. 2); in the point of a chief a fleur-de-lis argent. [Rietstap, i. 188.]

leichroder (Prussia; creation March 8, 1872): Checkered of nine fields: five gules, four sable; the seams argent. Crest: Two wings sable and gules, each

wing charged by a fess argent. Lambrequins: Dexter, argent and sable; sinister, argent and gules. [Rietstap, i. 205.]

- Brito** (Castile): Gules, nine lozenges argent (3. 3. 3). each lozenge charged by a lion gules. [Rietstap, i. 304; Piferrer, s.v.]
- Bueno** (1669): In a shield the tree of life, colors not known. [De Castro, plate v.]
- Caceres-Solis** (Seville, Spain, Holland): According to Rietstap: Or, a deer gules; a border comp. vairé and or. [Rietstap, i. 351.] According to Piferrer: Or, a sun gules (for Solis); a border comp. vairé argent and azure. [Piferrer, ii. 106.]
- Cahen d'Anvers** (France): Azure, a lion or, holding in his paws a harp or; a border argent, charged by eight billets azure. ["Annuaire," p. 385.]
- Cahen d'Anvers**, Marquis de Torre-Alfina (Italy; creation 1885): Divided by a seam argent, 1, gules, a tower argent, embattled with five pieces à la Guelph, surmounted by an alfa-plant arraché or; 2, azure, a lion or, holding a harp or; all surrounded by a border argent, brochant, and charged by eight billets azure. [Ib. p. 385.]
- Camondo** (Italy; creation April 28, 1867; arms of Abraham Salvalor Camondo): Divided, 1, gules, six bezants or (3. 2. 1); 2, sinople, two hands joined together, habillé gules, issuing dexter and sinister from a cloud argent. A chief over all the division argent, charged by a fleur-de-lis fleuronné, accompanied by two stars, all azure. [Ib. p. 385.]
- Capadose** (Amsterdam, The Hague): Divided, 1, sinople, two small angels proper, affronté in chief, holding together a mantle gules, lined ermine, in point a beehive or, put upon a terrace proper; the beehive accosted by four bees or, and accompanied by two other bees or, brochant upon the terrace underneath the beehive; 2, or, a lion gules. Crest: A beehive. Supporters: Two lion-leopards proper. [Rietstap, i. 368.]
- Cardozo** (England): Sable, five bezants or (2. 1. 2); a chief deneché argent, charged with three tobacco-plants sinople. Crest: A savage proper, issuant, holding in his dexter hand a tobacco-plant sinople; the sinister is leaned upon a triangle or. [Rietstap, i. 373.]
- Carvajal**: Or, a bend sable, a border argent, charged with an oak-branch sinople, acorns or, wound around the shield. [Rietstap, ii. 1312.]
- Castello** (England): On a bend cottised, three triple-turreted towers, accompanied by a lion rampant in upper, and an antique crown in lower, division. Crest: Out of a mural crown five ostrich-plumes, surmounted by a triple-turreted tower. Motto: Utriusque arbiter. . . . [Gaster, "Hist. of Bevis Marks," plate facing p. 161.]
- Castro, De** (Hamburg, Altona): A tower and a hand. Motto: Castrum et fortitudo mea Deus. ["Ost und West," Aug., 1902, p. 533.]
- Castro, De** (Portugal, Spain, Holland, Hamburg): Argent, six bezants azure (3. 3). Crest: A lion issuant, proper, armé, lampassé gules, crowned or. Lambrequins: Argent and azure. [Vorsterman van Oijen, plate 18.]
- Cesana** (Corfu, 1622; grant for Sanson Cesana): The given name of Cesana being that of the Biblical hero Samson, in the escutcheon is seen a man sitting on the back of a lion, in the act of tearing open the mouth of the animal. ["Jew. Chron." Sept. 19, 1902, pp. 23-25, 55.]
- Cohen** (England; granted to Samuel Cohen, Esq., of Park Place, Brixton): Or, two chevrons azure between two griffins segreant in chief gules, and in base, on a mount vert, an oak-tree proper. Crest: A demi-lion issuant, barry of eight argent and gules; in the dexter paw an acorn, slipped proper. [Burke, "General Armory," p. 211.]
- Cohen** (England): Or, a lion rampant gules. Crest: A bear's head, couped sable, muzzled gules. [Ib. p. 211.]
- Cohen** (England): A chevron cottised, charged with three bezants (roses?), accompanied in chief by two roses, in base by a stag's head. Crest: A stag's head erased, holding in its mouth a rose with stem and leaves. Motto illegible. Colors not known. [Gaster, l.c. plate facing p. 161.]
- Cohn** (Saxe-Coburg-Gotha; creation, 1869, for Moritz Cohn): Gules, a wheel or, winged or, surmounted by a crane argent; in a chief azure, a rising sun or, upon a tertre sinople. Crest: The wheel, winged, surmounted by the crane. Lambrequins: Dexter, or and azure; sinister, or and gules. Supporters: Two figures, one representing Industry, habit argent, with a brownish mantle, accompanied by her attributes, amongst them a beehive; the other Fidelity, habit azure, rifl. yellow, accosted by a dog. Motto: Thätig und treu. [Rietstap, i. 443; Siebmacher, "Anbalt," plate 9.]
- Coronel** (Spain): Azure, five eagles or (2. 1. 2). [Rietstap, i. 465.]
- Costa, Da** (Portugal, Holland; arms of Isaac da Costa, poet): Gules, six ribs argent fesswise, three in a row, one upon another. Crest: Two ribs in saltier argent, bound gules (see Frontispiece, Fig. 8). [Rietstap, i. 469.]
- Costa, Da** (London): Or, three ribs gules in fess, one upon another. Crest: A reindeer passant, proper. [Rietstap, i. 469.]
- Curiel** (Spain, Holland, Hamburg): Gules, a bend or, engoulée by two dragons' heads or, a border azure, charged by eight kettles or. [Rietstap, i. 497.]
- Delmar** (Prussia; creation May 14 1810, for Ferdinand Moritz Lev Delmar): Divided, 1, parted, (a) azure, three annulets, mal ordonné interlaced or; (b) argent, a twig of oak, arraché, sinople in base; 2, or a pyramid natural upon a terrace sinople. A fess argent, brochant charged with three stars (5) argent. The shield surrounded by a border or. [Rietstap, i. 522; Kneschke, ii. 447.]
- Disraeli**, Earl of Beaconsfield (England; creation Aug. 21, 1876): Per saltier gules and argent a castle, triple-turreted, in chief proper, two lions sable in fess sable, and an eagle displayed in base or. Crest: Issuant from a wreath of oak a castle, triple-turreted, all proper. Supporters: Dexter, an eagle; sinister, a lion, both or, and gorged with a collar gules, pendent therefrom an escutcheon of the last, charged with a tower argent. [Foster, "Collectanea Genealogica," i. 10; Rietstap, i. 543.]
- ichthal** (Bavaria; creation 1814, A. E. Seligmann): Azure, two rocks argent from the base of the shield, accompanied in chief by two stars or. Crest: Upon a crown two wings argent, each charged by a fess argent, surcharged by a star or. Lambrequins: Argent and azure. [Rietstap, i. 602; Siebmacher, "Bavaria," plate 29.]
- Elkan von Elkansberg** (Austria; creation inscribed Bavaria, 1825): Azure, a chevron, accosted in chief dexter by a staff (attribute of Mercury); sinister, an anchor, on the left side of same a star, all argent; the chevron accompanied in point by a crane proper, upon a tertre sinople. Crest: Upon a crown the crane upon a tertre, between divided wings, alternately argent and azure. [Rietstap, i. 606; Siebmacher, "Bayrischer Adel," plate 84.]
- Enriquez, Henriques** (Spain, England): Party per chevron, argent, two lions rampant gules; gules, a triple-towered castle or; port, windows, and masonry azure. Crest: A lamb passant upon a wreath of the colors. Motto: Deus Pastor meus! [Piferrer, i. 31.]
- Erlanger** (Austria, Frankfort-on-the-Main, Paris, Portugal; creation Portugal, 1859, and Austria, 1871): 1, argent, a fess azure, accosted by two turtles azure (one in chief and one in point); 2, azure, an anchor argent (sometimes or, an anchor sable). Motto: Rast ich, so rost ich! ["Annuaire de la Noblesse," 1897, p. 386.]
- Eskeles** (Austria; creation 1797; knights 1810; baronets 1822): Quarterly, 1 and 4, or, a demi-eagle sable, beaked and membered or, moving from the

partition; 2 and 3, azure, two winged serpents enlacés, affrontés; over all, argent, a redorte of vine proper, adorned with branches, sinople; clusters of grapes azure. Three crests: 1 and 3, three ostrich-plumes, one argent, between two azure; 2, an eagle ep. sable, beaked and membered or. Supporters: Two cranes proper. Motto: Patrie suisque. [Rietstap, i. 627.]

spinosa (Spain and Flanders): Argent, a tree terrassé sinople, accosted by two wolves affrontés, sable, rampant toward the trunk; a border gules, charged with eight flanches or. [Rietstap, i. 629.]

audel-Phillips: Quarterly, 1 and 4, pale of six ermine and azure, on a chief gules a squirrel sejant, cracking a nut (for Phillips); 2 and 3, quarterly argent and or, in 1 and 4 a chevron azure, and in 2 and 3 a peacock's head crased proper, all within a border sable (for Audel). Crests: (1) Upon a mount vert, a squirrel sejant, cracking a nut or; between on the dexter side a trefoil slipped, and on the sinister a branch of hazel fructed, extending to the dexter, charged on the shoulder with an acorn, leaved and slipped, proper. (2) Upon a mount a peacock regardant, in its pride, proper; between two rose-leaves argent, leaved and slipped vert. Supporters: Dexter, a Hindoo; sinister, a Mohammedan of India, both habited proper. Motto: Ne tentes aut perlice. ["Jewish Year Book," 1902.]

audel-Phillips.

Fonseca: Azure, five stars or (2, 1, 2). (Compare LOPEZ DE FONSECA, LOPEZ-SUASSO, and LOPEZ-SUASSO-DIAZ-DA FONSECA [see Frontispiece, Fig. 4.])

Fould (France): Divided diagonally, 1, azure, a lion argent; 2, sinople, a lion or; a bend ermine over all the division, in a chief sable, three stars or. Motto: Aide toi, Dieu t'aidera! ["Annuaire de la Noblesse de France," 1897, p. 387.]

Salvador-Rodrigues (Spain, Portugal, Holland; creation as Netherland barons, Nov. 23, 1821): Sinople, a lion or, armed and lampassé gules, accompanied by three fleurs-de-lis of the second. Crest: A lion issuant, gules, armé and lampassé azure, holding between his paws a fleur-de-lis or. [Rietstap, ii. 662; *idem*, "Wapenboek," ii. 131.]

Sampayo (Portugal, Holland): Quarterly, 1 and 4, or, an eagle purple, flying out for prey; 2 and 3, checkered of or and sable of sixteen fields; a border gules, with compartments and eight "S's" argent. Crest: Five ostrich-plumes, sable, or, gules, argent, sable. Lambrequins: Dexter, or, gules, sable; sinister, argent, gules, sable. [De Castro, p. 104; Rietstap, ii. 891.]

Samuel (London): Per chevron argent and gules, two wolves' heads erased in chief sable, and in base as many squirrels sejant addorsed, and each cracking a nut of the first. Crest: Upon a rock proper in front of three spears, one in pale and two in saltier, argent, a wolf courant sable, pierced in the breast by an arrow of the second flighted or. Motto: A pledge of better times. ["Jewish Year Book."]

Samuel (Liverpool): Vert, two bars between seven bees volant, four in chief and three in base, or; on a chief nebulé of the last, three roses sable. Crest: On a wreath of the colors upon a mount vert, a rose argent, barbed, seeded, stalked, and leaved proper between two bees volant, also proper. [L. Wolf, "Families of Yates and Samuel," p. 56.]

Samuel De Vahl (Portugal; creation May 13, 1865; London): Quarterly, 1 and 4, azure, a leopard or, accompanied by three crowns or; a canton argent, charged with the cross of the Brazilian Order of the Rose, suspended by a ribbon or, bordered gules (for De Vahl); 2 and 3, gules, a cross argent, charged with a rose gules, and accompanied in 1 and 4 by a lion argent, and in 2 and 3 by an eagle argent (for Samuel). Crests: (1) A lion issuant, argent, crowned or, holding a scepter, or, in pale (for De Vahl); (2) an eagle argent, surmounted by an imperial crown or (for Samuel). Supporters: Dexter, a lion argent, crowned or; sinister, an eagle argent, surmounted by an imperial crown or. Motto: Habent sua sidera reges. [Rietstap, ii. 664.]

Sarmiento (Spain): Argent, a sarment (twig of a vine) sinople, couped above and below, or, put in a bar. [Rietstap, ii. 672.]

Sarmiento (Spain, England): Gules, thirteen bezants or, 3, 3, 3, 1. [Rietstap, ii. 672; Piferer, i., plate 34.]

Sassoon: Or, a palm-tree eradicated, proper, between, on the dexter, a pomegranate, also proper, and on the sinister, a branch of laurel fructed, vert, both proper; on a chief azure a lion passant of the first, in the dexter paw a rod erect or. Crest: On a mount vert, a fern brake surmounted by a dove volant, having in the beak a laurel-branch, all proper, the wings semé with estoiles or. Motto: Candide et constanter, or אמנה ואמת (see Frontispiece, Fig. 1). ["Jewish Year Book."]

Seligmann (Austria; creation 1874, for Dr. Seligmann, born 1815): Azure, a double eagle or, lampassé gules; a bar across the shield, charged with a cross gules (the "red cross"). Crest: Two helmets, two crowns: dexter, closed wings azure and or; sinister, three ostrich-plumes argent, charged with the "red cross." Lambrequins: Dexter, azure and or; sinister, gules and argent. Motto: In a blue ribbon under the shield in Gothic characters, Helfen und Heilen! [Wurzbach, xxxiv. 50.]

Simson (Prussia; creation Sept. 10, 1840): Quarterly, 1, or, in a chief gules three crescents argent; 2 and 3, argent, a bend azure, accompanied in chief by a swan sable, and in base by a hunting-horn sable and argent, a saltier gules, accompanied in chief by a star or; 4, a chief gules, charged in sinister by a star or. [Rietstap, ii. 781.]

Sonnenfels (Austria; creation 1804 [?]): Quarterly, 1 and 4, a tower proper (?); 2 and 3, a sun or, rising behind a jagged rock proper. Crest: From the crown over the helmet, a woman's figure, holding in the dexter hand a book; the head is surrounded by rays of the sun, between two eagle-wings proper (?). Lambrequins: Azure and argent. [Wurzbach, xxxv. 335.]

Sonnenfels (Austria; 1797, baron): Quarterly, with center-shield azure, a sun or, upon a jagged rock; 1 and 4, barry of six, sable and or, surmounted by a three-towered tower gules, ports and windows sable; 2 and 3, gules, a serpent in pale, argent, twice coiled. Crests: (1) Between horns of plenty, or and sable, and or and argent, the figure of a man, dress azure, the hands folded over the breast and holding a closed book, bound gules; the man's figure, instead of a head, has a sun in its splendor. Lambrequins: Azure and argent. (2) Five ostrich-plumes, gules, argent, gules, argent, gules. Lambrequins: Gules and argent. [Rietstap, ii. 799; Siebmacher, "Der Adel in Böhmen," p. 96, plate 54.]

Suasso (Spain; registered in Belgium, 1676): Or, a lion gules, armé, lampassé, couronné, azure (see Frontispiece, Fig. 4). [Rietstap, ii. 864.]

Sylva, Da (Portugal): Argent, a lion-leopardée purple, armed azure; sometimes surrounded by foliage sinople. [Rietstap, ii. 874.]

Tedesco (Milan): Gules, semé with lozenges or; an arm proper, coming from a cloud argent, which moves from the sinister; in the hand a poplar sinople, sustained by a square slab argent, upon its border in sable the words "Mit Zeit." [Rietstap, ii. 890.]

Teixeira (Spain): Azure, a cross potencée or. [De Castro, p. 103.]

Teixeira (Holland; inscribed Sept. 27, 1817): Quarterly, 1 and 4, or, an eagle displayed, purple; 2 and 3, chequy or and sable (sixteen fields). The shield is surrounded by a border

gules, charged by eight "S's" argent. Crest: Five ostrich-plumes, sable, or, gules, argent, sable. Lambrequins: Dexter, or, gules, sable; sinister, argent, gules, sable (see Frontispiece, Fig. 7). [Rietstap, ii. 591; *idem*, "Wapenboek van den Nederlandschen Adel," ii. 87.]

Teixeira (Amsterdam): Quarterly, 1 and 4, gules, a lion . . . (?); 2 and 3, gules, a tree upon a terrace sinople. Crest: The lion, issuant. [Rietstap, Supplement, p. 1303; De Castro, "Keur," p. 103.]

Teixeira de Mattos (Holland): Quarterly, 1 and 4, gules, a lion . . . (?); 2 and 3, gules, a tree upon a terrace sinople. Crest: The tree. [Rietstap, Supplement, p. 1303.]

Treves (England): Argent, three boars' heads, couped azure. Crest: A demi-griffin, brandishing a sword, proper. [Burke's "General Armory," p. 1029.]

Vahl, De (London): Azure, a leopard or, accompanied by three crowns or, a canton argent, charged with the Brazilian Order of the Rose, suspended by a ribbon or, bordered gules. Crest: A lion issuant, argent, crowned or, holding a scepter or, in pale (see also SAMUEL DE VAHL). [Rietstap, ii. 966.]

Vidal (Portugal): Argent, five vines sinople (2, 1, 2). Crest: One vine of the field. [Rietstap, iii. 499.]

Waley (England): A chevron, in chief two eagles displayed, in base a deer passant. Crest: Upon a wreath on a mount a deer's head erased, holding in its mouth a trefoil (?) or fleur-de-lis. Motto: Fortiter et fideliter. [Gaster, "Hist. of Bevis Marks," plate facing p. 161.]

Wandsworth: Or, on a pile sable a lion rampant of the last, a chief gules, thereon two horses' heads erased, argent. Crest: A lion passant, proper, gorged with a collar flory counterflory, gules, resting the dexter forepaw on an escutcheon of the last, charged with a horse's head erased, argent. Supporters: On either side a horse argent, charged on the shoulder with an estoile within an annulet, all gules. Motto: Vincit perseverantia. ["Jewish Year Book."]

Wartenegg von Wertheimstein (Austria; creation Dec. 19, 1791): Quarterly, 1 and 4, gules, a chevron argent, accompanied by three lozenges; 2, azure, two panels of a door,

brownish color, fixtures argent, the panels put in saltier; 3, azure, a stag contourné, or. Crest: A stag issuant, or. Lambrequins: Dexter, argent and gules; sinister, or and azure. [Rietstap, ii. 1051.]

Weil von Weilen (Austria; creation Sept. 20, 1874): Azure, a bar argent, charged with a sphinx, winged gules, accompanied in chief by two stars or, and in base by a lyre or. Crests: (1) Wings azure, the extreme plumes or. Lambrequins: Or and azure. (2) Wings argent, the extreme plumes gules. Lambrequins: Argent and gules. [Rietstap, ii. 1061; Wurzbach, liv. 8.]

Weling, alias Seligmann (Bavaria; creation Dec. 17, 1816): Party, argent upon gules, two roses argent in gules, gules in argent. Crest: A rose argent, between wings; dexter, gules upon argent; sinister, argent upon gules. [Rietstap, ii. 1066.]

Wertheimer (Austria; creation 1860, for Joseph von Wertheimer): A bar or, charged in the center by a bow and arrow proper, pointed upward. In point sinister, gules, a lion or.

longued gules, holding in the right paw a bundle of arrows proper. In base, azure, a sun in its splendor or, rising behind a mountain proper. Crests: (1) Open wings, azure and argent, and argent and azure, each charged with a star or. (2) The lion of the field, contourné. Lambrequins: Dexter, azure and argent; sinister, gules and or. Motto: In a blue ribbon with letters argent, Luce et concordia. [Wurzbach, liv. 129.]

De Worms.

Worms, De: Quarterly, 1 and 4, azure, a key in bend dexter, wards downward, or; 2 and 3, or, an eagle displayed, sable; over all an escutcheon gules, a dexter arm, fesswise, couped at the wrist, proper, the hand grasping three arrows, one in pale and two in saltier, argent. Crest: A ducal coronet or.

Supporters: On either side a lion, collared and chained, or. Motto: Vincit non victus. ["Jewish Year Book."]

Ximenes (England): Or, two bars gules; over all a pale counterchanged within a border azure. Crest, Out of a mural crown or, an arm embowed in armor, proper, garnished or; the hand, also proper, supporting a trumpet erect and issuant of the first. [Burke's "General Armory," p. 1147.]

Ximenes-Cisneros: Checkered or and gules. [Rietstap, ii. 1127.]

COBLENCE, ADOLPHE: French army surgeon; born at Nancy May 11, 1812; died in Paris Sept. 18, 1872. He entered the service of the army as an assistant surgeon in the military hospital at Metz in 1832; became surgeon in 1834; and subsequently was made head of the clinic at the Hôtel des Invalides, Paris, by Baron Larrey. While at the Invalides he received the degree of M.D. from the faculty of Paris, and was appointed surgeon, with the rank of adjutant, to the Fifty-fifth Regiment of the line and to the engineer corps stationed at Metz. In 1846 he was promoted to surgeon-major of the Twelfth Infantry, which took part in the last expedition against 'Abd-al-Kadir.

In 1849, in recognition of his self-sacrificing devotion to his duties during the outbreak of the cholera in Oran, he was presented by the civil authorities with a gold medal, and was made a chevalier of the Legion of Honor. Coblenz was attached in 1856 to the military hospital at Bayonne, but gave up his position and went to the Crimea, afterward devoting himself to the typhoid-stricken soldiers quarantined in the island of Porquerolles. In 1859 he was made an officer of the Legion of Honor for his

splendid services with the Renault division during the Italian campaign, particularly at Magenta and Solferino, and subsequently was appointed physician-in-chief of military hospitals, with quarters at Algiers. His excessive exertions and an unfavorable climate brought on blindness in 1863, whereupon he returned to Paris, and was retired.

COBLENZ: Prussian city on the Rhine. Jews settled there between 1135 and 1159, and are first mentioned in the "Judenschreibsbuch" (Archives) of Cologne. As early as 1100 there is mention of a custom-house in Coblenz at which Jews were obliged to pay four denarii for every salable slave. Perhaps a note in the "Memorbücher," according to which Jizchak and his wife Bela brought about the "abolition of the tax," refers to the above-mentioned duty. Between 1160 and 1173 the traveler Benjamin of Tudela found a large community in Coblenz. Marsilius, the mayor of Treves, and the knights Heinrich and Dithard of Pfaffendorf, testified, in 1265, that the archbishop Heinrich of Treves had freed the Jews in Coblenz of all taxes for a year. In the same year the Jews of this city were subjected to a persecution, as a result of which more than ten were killed. In 1334 the "Judenschläger" (Jew-beaters) attacked the Jews in Coblenz; in 1349 they suffered under the Flagellants, who killed almost all of them.

The records show that from 1352 the houses of the Jews were frequently subject to confiscation and sale for the benefit of the reigning prince. In 1322 and 1326 there is mention of a cemetery, and in 1333 and 1352 of a Jewry. The emperor Charles IV. ordered, in 1354, that a certain Jew named Samuel receive protection. In 1356 he granted Archbishop Boemund II. of Treves the right for Jews to settle in his district; and from 1366 Jews are found in Coblenz as house-owners. This prelate took the Jew Symon for his court physician. In 1418 Archbishop Otto drove them out of his domains, and in 1421 he gave in fief the Jewish cemetery of Coblenz to the daughters of Gottfried Sack of Dieblich, and presented the Jewish houses in the Burggasse to the religious order of St. Florin. In 1512 the elector Richard admitted two Jewish families to Lützel-Coblenz, and in 1518 five more families to Coblenz itself. The Council first extended civil protection to them in 1518. In 1583 they were again ordered to leave, and until 1592 they were excluded from the electorate.

In 1597 John VII. granted a Jewish firm permission to settle in Treves and Coblenz, and carry on a trade with the East. Their religious center was in Frankfort-on-the-Main. Twenty-one years later the elector Lothar von Metternich issued an order regulating the status of the Jews. In 1723 a statute was enacted reestablishing the Jewry, and permitting Jews to have a rabbi. When the elector Wenceslaus made his public entry into Coblenz in 1786, the Jews wished to take part in the ceremonies. On Nov. 23 they held religious services in his honor, and were admitted by him to an audience. On Jan. 24, 1851, a new synagogue was dedicated, and in

1901 there were 600 Jews in the city, out of a total population of 45,146.

Among the rabbis and scholars of Coblenz Moses Kohen ben Eliezer, the author of "Sefer Hasidim" (1473), should be mentioned. Wolf of Coblenz took part in the convention of rabbis at Frankfort in 1603. In 1650 Judah Löb Heilbronn ben Abraham David Eliezer, as rabbi of Coblenz, signed a letter of introduction for David Carcassonne. From 1666 to 1669 Jair Hayyim Bacharach, author of the responsa "Hawwot Ya'ir," was rabbi in Coblenz. He was succeeded by Moses Me'ir Grotwohl, a member of the rabbinate in his native city, Frankfort-on-the-Main, who died in 1691. His successor was Aaron Spira, who died in 1697. From 1697 to 1717 Jacob Kohen Poppers was rabbi in Coblenz; he is the author of the responsa "Sheb Ya'aqob," and died in 1740 in Frankfort-on-the-Main. He was followed by Eliezer Lipman, son of Isaac Benjamin Wolf, rabbi in Berlin and the Mark, and author of "Nahalat Binyamin." Eliezer (d. 1733) was teacher and tutor of Simon von Geldern, Heine's maternal grandfather. Mannele Wallich, who came of an old family of physicians, and was himself a physician, succeeded in the rabbinate, and died on the first day of the Feast of Weeks in 1762. The founder of the Altona printing-house (1715), Samuel Sanvel Poppert, who was also publisher of several short works, likewise came from Coblenz. The author of "Mafteah ha-Yam" (novellæ to the Pentateuch; Offenbach, 1788) calls himself Jacob Me'ir ben Wolf Coblenz. Hayyim Löb Gundersheim of Frankfort-on-the-Main had been rabbi in Coblenz for nearly thirty-five years, when he went back to Frankfort, became a member of the rabbinate there, and died in 1803. Ben Israel, born 1817, in Diersdorf, was preacher (1843), later rabbi, in Coblenz. He died Nov. 6, 1876, and was succeeded by Dr. Adolf Levin (1878-85), who is now rabbi of Freiburg, and by Dr. M. Singer (died in 1901).

Coblenz has the following Jewish charitable associations: Männer-Krankenverein, Wohlthätigkeitsverein, Wittwen- und Waisenverein, Sterbekassenverein, Seligmannsche Stiftung, Alberti-Stiftung, and Bragsche Stiftung.

COBLENZ, GERSON BEN ISAAC MOSES: French rabbi and author; born about 1717; died at Metz in the first half of the eighteenth century. He was a pupil of R. Jacob, author of "Shebut Ya'aqob," and officiated as dayyan at Metz. Of his works the following are known: "Kiryat Hanah," responsa, finished by the author at the age of twenty-five, and published by his son Jacob (Metz, 1785); many responsa found in "Shebut

Ya'aqob" and in the "Keneset Yehezkel" of Ezekiel Katzenellenbogen. Coblenz also wrote novellæ on the "Turim," and corresponded on rabbinical subjects with the rabbis Judah Möller, Samuel Helmann, and Jacob Joshua of Cracow.

COCCEIUS (KOCH), JOHANNES: German theologian and Hebraist; born at Bremen 1603;

fessor of theology at Leyden. He was the founder of the school of theology known by his name.

Cocceius wrote commentaries on most of the books of the Old Testament, in which he maintained that sentences and phrases should be interpreted only according to their context.

He compiled a Hebrew dictionary of the Old Testament, which was published at Leyden in 1669 under the title "Lexicon et Commentarius Sermonis Hebraici et Chaldaici Veteris Testamenti," which to a certain extent marks an epoch in Hebrew lexicography among Christians. Of interest to Judaism are his "Versio Latina Mishnæ cum Excerptis

SASANAN OF THE JEWS OF COCHIN, GRANTING PRIVILEGES TO JOSEPH RABBAN, ABOUT 100 C.E.
(From "Indian Antiquary.")

died at Leyden Nov. 5, 1669. He was appointed professor of Hebrew at Bremen in 1629, and at Franeker in 1636, where, after 1643, he also held the chair of theology. In 1650 he was appointed pro-

ex Gemara Tractatum Synhedrin et Makkot," 1629; "Judaicarum Responsionum et Quæstionum Consideratio," with a "Præfatio de Fide Sacrorum Codd. Hebræorum ac Versionis LXII. Interpretum

et Oratio de Causis Incredulitatis Judæorum" (Amsterdam, 1662); "Tractatus Makkot Versio Latina" (in Surenhusius, "Versio Latina Mischnæ et Commentationum Maimonidis et Obadjæ"), 1698-1703.

The earliest trace of the Cochin Jews is to be found in two bronze tablets known as the "Sâsanam" (Burnell, "Indian Antiquary," iii. 333-334), which are now in the possession of one of the elders

JEWES OF COCHIN.
(From a photograph.)

All three essays were reprinted in his complete works, which were published in Amsterdam, two years after his death, under the title "Opera Omnia."

COCHABI, JOSEPH BEN ABRAHAM.

See KOKABI, JOSEPH BEN ABRAHAM.

COCHIN: State of India, within the Madras Presidency. The Jews in Cochin numbered 1,142 in 1891, and are divided into two classes: the Whites, whose complexion is almost as fair as that of European Jews, and the Blacks, who, though darker than the former, are not so black as negroes, and are of the same complexion as the Jews of Yemen or Kurdistan.

The White Jews number at present about fifty families, and these are divided into six stocks: the Zakkai, who are the oldest, and are said to have come from Cranganore in 1219; the Castillia, exiles from Spain in 1492, who arrived at Cochin in 1511; the Ashkenazi and Rothenburg, who came from Germany in the sixteenth century; and the Rahabi and Hali-gua families, who came from Aleppo about 1680. There are three hundred families of the Blacks.

and contain a charter given by Cheramal Perumal, King of Malabar, to Isuppu Irabbân (Joseph Rabban), probably a Jew of Yemen who led an expedition of Jews to Cranganore about the year 750. By the terms of the charter, engraved in Vatteluttu characters on the plate, Rabban, who is referred to as the prince of Ansuvañnam, was granted seventy-two "free houses" and feudal rights in Ansuvañnam, near Cranganore. The date of the charter can be fixed at about 750; it can not, for paleographical reasons, have been much earlier than this, nor later than 774, since a grant made to the Nestorian Christians at that time was copied from it.

These Jews intermingling with the natives became the progenitors of the Black Jews of Cochin. These are mentioned by Ibn Wahab in the ninth century; and Benjamin of Tudela appears to have visited or heard of them about 1167. He reports that they were one hundred in number and

Traces in Middle Ages. as black as the rest of the inhabitants of Coilum or Quilon, then the most important port on the Malabar coast. There Marco Polo found them a century later ("Travels of Sir Marco Polo," ed. Yule, ii. 263), and when Vasco da Gama reached Calicut in

ing of circumcising slaves, and a similar blessing was recited

at the time of their ablution. Even after undergoing these rites they were not allowed to intermarry with the other Jews, to study the

Slaves. Holy Scriptures, or to wear zizit and tefillin, unless they obtained a certificate of emancipation from their masters or mistresses. To make this emancipation known to the community of the White Jews, the freed slave went about and kissed the hands of all the Jews of the city. The children and children's children of all such freed slaves were also considered emancipated and were at liberty to wear zizit and tefillin, but were not called up to the reading of the Law except on Simhat Torah. On the first two Seder nights the emancipated slaves with their families were allowed to join their masters at the table and to chant the Haggadah. This was the only occasion on which they were treated as free men and women. At the conclusion of the service on the Day of Atonement they kissed the

Group of Cochin Jews.
(From a photograph.)

lar, Malayalam, a dialect of Tamil. Their chief articles of food

are rice and the milk of the coconut. Mazzot are eaten only at the Seder, and though the Whites eat cooked fishes and chicken on the Sabbath, the Blacks eat no meat.

Religious Observances. The two classes are equally strict in religious observances. The Blacks have two synagogues, one of which was built in 1625. The synagogue of the Whites, a magnificent edifice, was erected in 1568, burned by the Portuguese in 1662, rebuilt by Shem-Tob Castillia in 1668, and finally completed by Ezekiel Rahabi in 1730. It is situated next to the raja's palace, and is richly endowed with landed property. The Ark in these synagogues is situated in the western end of the building, not in the eastern, as in European lands, so that the congregation may turn in prayer toward Jerusalem.

Among the Blacks there are no Kohanim or Levites, so that they hire impoverished White Jews of the tribe of Levi and of the family of Aaron on the

occasions when their presence is necessary. In 1615 a false Messiah appeared among the Jews of Cochin (Schudt, "Jüdische Merckwürdigkeiten," i. 42).

Pereyra de Paiva ("Noticias dos Judeos de Cochin") states that during the week of Nov. 21-26, 1686, some Dutch merchants of the Sephardic congregation of Amsterdam visited Cochin, at that time an important commercial port, and at the request of

David Rahabi had rolls of the Pentateuch, prayer-books, and various rabbinical works sent from Amsterdam to Cochin. The books were received on the Fifteenth of Ab, and this day

was appointed a holiday to be observed every year. In 1757 the White Jews had their own prayer-books printed at Amsterdam, and brought out a second edition in 1769. Their houses, situated in the section of the city called the "Jewish Town," are of one story, built of chunam and teak-wood, and are situated on the east and west of the road leading to the synagogues. In the yard is usually found a cistern required for the "tebilah" and a tabernacle for the festival. The whole locality is kept clean, and lighted on Sabbath, new moon, and holiday nights. The commercial and synagogal affairs of the community are looked after by five elders with a **זקן הראשון** ("chief elder") at their head.

During the Portuguese and Dutch periods, that is, until about 1790, the greater part of the business of Cochin was in the hands of the White Jews. But their money was lost by Baruch David Rahabi, and for a time the community was very poor. About 1860 their condition improved, and while few are still able to live on the income of their ancestral landed property, none are dependent on charity. The Whites are engaged chiefly as merchants or farmers, the Blacks as fishermen, fruiterers, wood-choppers, or oil-pressers;

while many of the freed slaves are bookbinders, clerks, or merchants.

Social Conditions. In education the Jews of Cochin are extremely unprogressive. Formerly boys of thirteen or fourteen were taught to pray and to read the Law; now there are no Talmudists among them, few are well versed even in the Torah, and most of them learn only sufficient English to enable them to do clerical work. There are both Black and White teachers in the

schools. The women, if instructed at all, are taught merely to recite their prayers. The only Cochin Jews who have made any contributions to literature are David Rahabi, author of "Ohel David," a calendar, printed at Amsterdam in 1791; and Solomon Riemann, author of "Mas'ot Shelomoh," Vienna, 1884. Riemann taught the Blacks the

Literary Efforts. Torah and shehitah, and was the first to consider them eligible for MINYAN.

The week-day dress of the White Jew is the same as that worn by the natives; but the Blacks are covered only from the waist down, wear a red kerchief on the head, and have "pe'ot." In the synagogue, the Black wears the kaffa; the White, a turban, a shirt, a jacket with twelve buttons, over this a jubba, and trousers. Some of the younger men have adopted European dress. The "tahli," a gold chain with a peculiar coin in the middle, is worn by all married women, including widows; but the latter are not allowed to wear their wedding-rings.

The rites and ceremonies of the Cochin Jews are usually conducted on a very extravagant scale.

The only ceremony which is performed in the case of a female child is its naming, in the synagogue or at home, eight days after birth; while the male child, eight days after birth, is carried under a canopy by his maternal uncle

Birth Rites. from the house to the synagogue, where he is circumcised; the occasion is then observed by the usual feast. If a woman dies in childbirth, and the child dies even one hour after, the dowry, contrary to the usual Jewish custom, remains in the husband's family.

The proposal of marriage is made to the father of the girl by the father of the man, through professional match-makers for both parties. Two days before the wedding, which

usually takes place on Tuesday evening, the girl is taken to the synagogue for "tebilah" (purification); on her return, taking four threads of zizit in her hands, she kisses seven times the portion of the Bible containing the Decalogue. The making of the wedding-ring, and the cutting of the bridegroom's hair, usually done on the day of the wedding, are attended with music and festivities. At the beginning of the ceremony the bridegroom, who wears a white head-covering, takes a glass

BLACK JEW OF COCHIN.
(From "Globus.")

of wine and a ring, and recites a responsive formula. To his salutation, "With the permission of you all," those present respond, "With the permission of Heaven."

He then repeats the usual blessings of betrothal, followed by a betrothal formula in which the exact name of the bride is mentioned. He drinks of the wine, and handing the cup to the bride, whose face

sents the contract to the bride; while those assembled exclaim, "Be-simana ṭaba!" (May it be for a good sign!) The whole company then joins in singing a quaint epithalamium.

On the Sabbath after the wedding, the bridegroom is called up to the reading of the Law, and after the recital of the usual portion of the day, the passage Gen. xxiv. 1-7 is read by him and the ḥazzan alternately, verse by verse, in Hebrew and Aramaic. Verses from Isaiah lxi. 10-lxii. 5 are similarly added to the Haftarah (lesson from the Prophets). After the ceremony the guests are invited to a feast at the home of the bride, at which the poor sit above the rich; and the festivities are continued for seven days, the bride's parents defraying most of the expenses.

In case of adultery (Deut. xxiv.), bills of divorce, written in Hebrew, are given; but divorces are very rare. "Yibbum," the obligation to marry the child-

less widow of a deceased brother (Deut. xxv. 5, 6), is still observed by the Cochin Jews, as is the ceremony of ḤALIZAH (Deut. xxv. 7, 10). Bigamy and polygamy are almost unknown among them.

The funeral and mourning ceremonies are observed in accordance with the prescriptions of the Shulḥan 'Aruk. Soon after a death the shirt of the chief mourner is torn from his body; and on returning from the cemetery, the funeral party, except the mourners, wash themselves and their clothes. During the seven days of mourning, the bereaved wear a piece of white cloth over the head, which the ḥazzan removes on the seventh day. On the seventh and twenty-ninth days, and at the expiration of the eleventh and twelfth months, the family visit the grave, and on the return home, selections from the Psalms, Mishnah, Torah, and "Hashkabah" are read, and the "Kaddish" is recited. The latter is repeated by the mourners for one year, with some intermissions at the beginning of the twelfth month.

All the Jews of Cochin buried their dead in one plot of ground until twenty-five years ago, when the White Jews, through the influence of the British agent of the Cochin raja's court, were allotted a separate place.

A synagogue in Cochin.
(After a photograph.)

is covered with a silk or embroidered network, says, "With this, also, do I betroth thee." Hereupon the officiating minister reads with cantillation the "ketubbah" (marriage contract), which is handsomely engrossed upon parchment. Before the last sentence is read the bridegroom hands the fringe of his zizit to the rabbi, and while both hold it the minister adjures him: "By the command of the Holy and Sanctified, by the Mighty One, who revealed the Law at Sinai, 'her support, her clothing, and her conjugal right he shall not diminish!'" The bridegroom replies: "Her support, her clothing, and her conjugal right I will not diminish." The rabbi says, "Dost thou undertake this?" and the bridegroom replies, "I undertake it." The minister adds, "A promise before Heaven and earth?" and the response is, "A promise before Heaven and earth."

When the reading of the contract is completed, the signatures of the bridegroom and witnesses are appended and read aloud, and the bridegroom pre-

J.

J. E.—J.

COCK: The male of the domestic fowl. The original habitat of the domestic fowl is generally supposed to be India, whence it was introduced at an early time into Babylonia and Greece. It is difficult to say when it was brought to Palestine, as the allusions to it in the Bible are still very doubtful. According to rabbinical tradition נָכָר (Isa. xxii. 17) is a designation for "cock," which was known under this name in various districts of Babylonia as late as the third century c.e. (Lev. R. v.; Midr. Mishle xxx.

19). The Jewish teacher of Eusebius also explained the word thus (see Eusebius' commentary on Isaiah, *loc. cit.*; compare, however, Ket. 28a and Yoma 20b, in both of which passages Abba Arika's opposition to this explanation is declared). Another term which, according to an amora of the fourth century, signifies "cock," is שָׁכִי (Job xxxviii. 36), the statement being added that the cock bore a similar name about this time in Arabia (R. H. 20 a; Lev. R. xxv.).

The assumption of the Midrash (Midr. Mishle xxx. 31) that זָרִיר (Prov. xxx. 31) is a designation for "cock" is more plausible than the foregoing explanations, since the Arabic "zarzar" means "cock." In the Talmud and in Midrashic literature, however, the cock is always called by his Babylonian name חֲרִינָא (compare Oppert in "Zeitschrift für Assyriologie," vii. 339), which fact may be taken, perhaps, to indicate that the cock was introduced into Palestine from Babylonia. In this literature the cock is also frequently mentioned as a common domestic fowl, although it is expressly stated that at Jerusalem the breeding of cocks was forbidden during the existence of the Temple because they scratch the ground and pick up objects which are Levitically unclean, and are thus likely to spread uncleanness (B. K. 82b). The cock and the bat are contrasted as the bird of day and the bird of night. The cock and the bat were both waiting for daylight, when the cock said: "I may wait for the dawn, for light belongs to me; but for what do you need light?" (Sanh. 98b, bottom). The cock is characterized as the most impudent of birds (Beza 25b); his lasciviousness is also proverbial (Ber. 22a), yet his kind treatment of the female is set up as a model, inasmuch as he humors the hen to win her favor ('Er. 100b).

The comb is the cock's chief ornament, of which he is very proud, and when it is cut off he loses his spirit and no longer seeks the hen (Shab. 110b, bottom). The cock is also said to be quarrelsome and vicious (Pes. 113b), those from Bet Bukya having an especially bad reputation in this respect, as they suffered no intruders among them (Yeb. 84a). A cock once killed a child by picking at its scalp with its beak ('Eduy. vi. 1; Yer. 'Er. x. 26a). The crowing of the cock, as well as his flight, sometimes causes dishes to break (B. K. 17a; Kid. 24b).

The cock, which occupies a prominent place in the mythology of many peoples (compare Gubernatis, "Zoological Mythology," ii. 280-291), was an especially sacred bird among the Persians, where he was the ally of Sraosha in the battle with the powers of darkness. In Talmudic-

Cock in Folk-Lore. In Midrashic literature there are reminiscences among the pagans of the divine honors paid to the cock, as well as of the influence on the Jews of these ideas. The Mishnah ('Ab. Zarah i. 5) mentions the pagan custom of sacrificing white cocks, the Jews being forbidden for this reason to sell them to the pagans. The idol Nergal (II Kings xvii. 30) was taken by the Rabbis to be a cock (Sanh. 63b), which assumption was based probably on something more than the mere similarity of sound between "tarnegol" (cock) and "Nergal" (compare the cock-shaped Melek Taous of

the Devil-worshippers; see Herzog's "Real-Encyklopädie," s.v. "Nergal"). The various theories found in Jewish literature on the crowing of the cock at the approach of day are probably traceable to Persian influence (compare Darmesteter's translation of the Zend-Avesta, in "Sacred Books of the East," i. 192, 193; Schorr, "He-Haluz," i. 143, iii. 93, vii. 19). *

The Greek Baruch Apocalypse says that the rustling of the wings of the phenix, a fabulous bird which accompanies the sun, awakens the cocks, "who then converse in the language peculiar to them"; for when the angels get the sun ready for the day the cock crows (ch. iv., end; compare Slavonic Enoch, xv. 1). As in the Zend-Avesta the cock is said to crow out to men early in the morning: "Arise, O men! recite the Ashem Yad va histen" (Vendidad, Fargard, xviii.), so the Zohar says that in the hour of grace (about midnight), when God visits paradise to confer with the souls of the pious, a fire proceeds from this holy place and touches the wings of the cock, who then breaks out into praise to God, at the same time calling out to men to praise the Lord and do His service (Zohar, Wayikra, iii. 22b, 23a). In this connection must be mentioned a precept of the Talmud to the effect that on hearing the cock crow in the morning, the following benediction must be pronounced: "Praised be Thou, O God, Lord of the world, that gavest understanding to the cock to distinguish between day and night" (Ber. 60b). This benediction is traced back to Job xxxviii. 36, where שָׁכִי is derived from שָׁכָה ("to see"), and the cock is designated as the one who foresees the day. In the Zend-Avesta the cock is also called "parôdars" (he who foresees [the coming dawn]). Characteristic also is the statement in a late Midrash ("Seder Yezirat ha-Walad," in Jellinek's "B. H." i. 155) that the sobs of the dying at the sight of the angel who comes to take the soul are heard by no one except the cock. The favor in which the cock is held by the heavenly beings has perhaps also given rise to the statement that by closely watching the cock's comb one can determine the moment when God lays aside His mercy; this happens at some one moment during the first three hours of day, the color of the comb changing at that moment.

Superstitious speculations in regard to the cock were frequent during the Middle Ages. The cock is still killed as a "kapparrah" for a man (see ATONEMENT); and the will of Judah the Pious directs that a cock which upsets a vessel shall be killed immediately, because evil spirits have seized it. The demons ("shadim") are said to have cock's feet (Ber. 6a). Many of these superstitions are still found among ignorant people in various countries. Thus, for instance, the scratching of the cock with his claws is taken to signify that visitors are coming. Compare HEN.

COCKATRICE. See BASILISK.

CODES. See LAWS, CODIFICATION OF.

CODICIL. See WILL.

COELE-SYRIA: The name, occurring in the Greek apocryphal writings, of a Persian province lying between Egypt and the Euphrates. In old editions it is given as "Celosyria." This name stands for the earlier expression "the country beyond the river" (Ezra iv. 10, R. V.; compare I Esd. ii. 17, 24, 27, R. V., "Coele-Syria and Phenicia"; *ib.* vi. 29, "tribute of Coele-Syria and Phenicia"; and *ib.* vii. 1, "the governor of Coele-Syria and Phenicia"). II Macc. iii. 5, 8 speaks also of a single governor for both Coele-Syria and Phenicia under Antiochus Epiphanes, so that the old Persian administrative division must have been retained.

The Greek term "Coele-Syria" originally meant the valley between Lebanon and Anti-Lebanon, the modern Biqa', called in the O. T. (Josh. xi. 17, xii. 7) "the valley of Lebanon." Greek writers extend that name vaguely and inconsistently to "the land from Seleucis [*i.e.*, northern Syria] to Egypt" (Strabo, p. 756), or to central Syria with Palestine except Judea proper (Strabo, p. 750), or with all Palestine (thus Polybius, v. 80, 86; while v. 87, like the apocryphal writings, distinguishes Phenicia from Coele-Syria).

Josephus also varies in his use of the term, applying ("Ant." xiv. 40) "Coele-Syria" to the valley, excluding Damascus, but (*ib.* xiii. 13, § 2 [Niese xii. 136]) including Palestine, east of the Jordan (*ib.* xiv. 154), Galilee, and (*ib.* xiv. 79) extending it to the Euphrates (this passage is, however, corrected by Niese). The Romans later used "Syria Cœla" for northern Syria.

W. M. M.

COEN: Physician-in-ordinary at the court of Prince Vassile Lupu, hospodar of Moldavia from 1634 to 1654. The dates of his birth and death, and his given name, are unknown. E. Schwarzfeld is of the opinion that Coen was a descendant of Eliezer Cohen of Safed, who had settled in Poland, and one of whose sons, Moses, a rabbi and physician, escaped during the Cossack uprising in 1648 (Carmoly, "Hist. des Médecins Juifs," i. 245, Brussels, 1884). He stood high in favor with the Sultan of Turkey, and when Prince Lupu was in danger of being dethroned, through the intrigues of his enemies, Coen protected him. The sultan entrusted to Coen for transmission to Prince Lupu important documents concerning a secret alliance between Sweden and Russia, the object of which was a joint attack upon Turkey. The government of Venice sought his advice in matters of diplomacy, as appears from two letters of Giovanni Battista Ballarius to the Doge of Venice, dated at Constantinople Feb. 28, 1656, and Jan. 3, 1660. It was probably owing to Coen's influence that enactments in favor of the Jews of Moldavia were issued by Lupu.

H. R.

COEN, ACHILLE: 1. Italian soldier; born at Leghorn in 1851. He studied at the military academy of his native town, and was appointed lieutenant in the engineer corps at the age of twenty. Subsequently assigned to the sharpshooters, he was

transferred to the staff and attached to the military section of the Geographical Institute at Florence. On his promotion to a captaincy he was appointed adjutant to General Heusch. In 1895, with the rank of major, he was sent, under General Baldissera, to join the army then operating in Africa. A few days before his arrival, however, the Italian commander, Baratieri, had provoked and lost the battle of Adowa. After the campaign Coen, promoted to the rank of lieutenant-colonel, was appointed director of the military section of the Geographical Institute. He has since been transferred to Cesena as commander of the Second Regiment of the Royal Brigade.

Coen is a knight of the Order of the Crown of Italy, and of the Order of Saint Maurice and Saint Lazarus. He has published numerous essays in technical journals and in the "Nuova Antologia," and also reports of work done at the Geographical Institute, notably "Venticinque Anni di Lavoro all'Istituto Geografico."

2. Italian historian; born at Pisa Jan. 5, 1844. At the age of twenty-three he was appointed professor of history at the Lyceum of Leghorn. In 1879 he was called as professor of ancient history to the Accademia Scientifica e Letteraria at Milan, and in 1887, in the same capacity, to the Istituto di Studi Superiori at Florence, taking charge also of the university library of that city. He is a knight of the Order of the Crown of Italy.

His published works include: "L'Abdicazione di Diocleziano" (Leghorn, 1877); "Di Una Leggenda Relativa alla Nascita e alla Gioventù di Costantino Magno" (Rome, 1882); "Manuale di Storia Orientale" (Milan, 1886); "Manuale di Storia Greca" (Milan, 1887); "Vezzio Agorio Pretestato" (Rome, 1888). He also published Aristophanes' "Clouds," with introduction and critical notes (Prato, 1871).

COEN, BENJAMIN VITALE: Italian rabbi; born at Alessandria della Paglia in the second half of the seventeenth century; died at Reggio nell'Emilia in 1739. Descended from a wealthy and prominent family, Coen was elected rabbi of Casale while still a youth. He soon became known for his ability and erudition, and was chosen rabbi at Reggio nell'Emilia, at that time an important post. Among his disciples were Israel Bassano, his son-in-law, who succeeded him in the rabbinate, and Manasseh Joshua Padova, rabbi of Modena. Abraham Joseph Graziani wrote some verses in his honor.

Coen was the author of the following works: "Et ha-Zamir" (The Time of Singing), hymns for all the feasts of the year, Venice, 1707; "Alon Bakut" (Oak of Weeping), a commentary on Lamentations, Venice, 1712; "Abot 'Olam" (The Fathers of the Universe), a commentary on the "Sayings of the Fathers," *ib.* 1719; "Gebul Binyamin" (The Border of Benjamin), a collection of sermons, Amsterdam, 1727; "Notes on the Toze'ot Hayyim," published together with the text; "Gishme Berakah" and "Pitche She'arim," responsa on the Shulhan 'Aruk, still extant in manuscript; a number of scientific letters inserted in the "Iggeret Harmag";

and ritual decisions scattered throughout the "Pahad Yizhak" and "Shete ha-Lehem."

I. BR.

COEN, GIUSEPPE: Italian painter; born in Ferrara 1811; died in Venice Jan. 26, 1856. He was descended from an old and distinguished family. As a boy he evinced a predilection for music and painting, and studied art without having any particular career in view. Orphaned at an early age, he was forced by circumstances to choose a profession. He followed the style of Canaletto, the Venetian landscape and architectural painter. His picture, "The Façade of the Cathedral in Ferrara," was exhibited in 1840 in Venice, and won for him considerable approbation. In 1841 his native city, Ferrara, awarded him a silver medal in appreciation of his labor for art.

To perfect himself in his art he went to Rome in 1843, and won the friendship of Massimo d'Azeglio, the painter, statesman, and author. Returning to Ferrara, he received many important commissions, one being from the Duke of Brunswick. In 1850 he removed to Venice, and was one of the first to practise artistic photography. His views of Venice were awarded a medal at the Paris Exposition of 1855.

In Ferrara, Coen enjoyed extraordinary popularity, his house being a literary and artistic center. He was one of the first Jews in Ferrara to be elected (1849) to the town council.

I. E.

COEN, GRAZIADIO VITA ANANIA: Italian rabbi and scholar; born at Reggio nell' Emilia about 1750; died March 28, 1834. He studied under Sansone Nahmani and Isaiah Vita Carmi. He established in his native city a school that produced several rabbis, among whom D. J. Maroni deserves special mention. Coen preached not only at Reggio nell' Emilia, but also in the neighboring communities. In 1825 he was called as chief rabbi to Florence, where he founded a Hebrew printing-press.

His works include: "Hinnuk la-Na'ar" (Instruction for the Boy), 2 vols., Reggio, 1804; Venice, 1805; 6th ed., Leghorn, 1880; "Likkuṭe Messekot"; "Sba'are ha-Talmud" (Doors of the Talmud), Reggio, 1811, a collection of treatises; "Reshit Lekal" (Beginning of Doctrine), Reggio, 1809, a handbook of elementary instruction in Hebrew and Italian; a Hebrew-Italian dictionary, entitled "Ma'aneh ha-Lashon" (Answer of the Tongue), 2 vols., 1812; a Hebrew grammar, "Dikduk Leshon ha-Kodesh," Venice, 1808; "Shebile Emunah" (Ways of Faith), another pedagogical work; "Zemiroth Yisrael" (Songs of Israel), Leghorn, 1793; "Ruah Hadashah" (The New Spirit), Reggio, 1822; "Saggio di Eloquenza Sacra del Dott. Anania Coen Rabbino"; "Della Poesia Rabbinnica," 2 vols., Florence, 1828; "Della Poesia Scritturale," Reggio (n.d.), containing some of his own poems.

S. MAN.

COEN, JAN PIETERSZON: Governor-general of Java, and founder of the Dutch colonial system; born at Hoorn, Holland, Jan. 8, 1587; died in 1629. He gained his early commercial experience with the firm of Piscatori in Rome, went to India on a commercial exploration in 1607, and made a second voyage with two ships in 1612. He was appointed director-general of the Indian trade in 1613. As governor-general of Java, he destroyed (1619) the native town of Jacatra, and founded Batavia, the capital of the Dutch East Indies. He died childless in 1629, and his large possessions went for the benefit of orphans in his native town of Hoorn, subject to a bequest in favor of members of his family, which seems to have been some time later successfully claimed.

Coen is said to have been of Jewish descent. The biographies, while printing voluminous details of his career as governor-general, are singularly reticent in regard to his parentage. The name or occupation of his father is not found, though one would have expected these facts to be recorded of so eminent a man. Perhaps as a convert he endeavored to conceal them. His portrait in Valentyn's "History of Java" and in Müller's "Golden Age" might well be that of a Jew. Abbing's "History of Hoorn" gives chiefly negative evidence on the subject of Coen's Jewish connection. The question of his extraction must be left undecided.

A. R.

COEN, JOSEF DI MICHELE: One of the Jewish boys of Rome baptized under Pope Pius IX.; born 1854. In 1864 he was apprenticed to a shoemaker. Sent by his master to deliver a pair of shoes at the house of a priest, the boy was seized and dragged to the Casa dei Neofiti, where he was detained for baptism. The papal authorities refused to surrender him, in spite of the protests of his father and of the Jewish community.

The affair caused a stir throughout Europe, particularly in France, the French ambassador, Count Sartigues, protesting vehemently in the name of his government. To his remonstrances the papal government replied that the child had himself determined to turn Christian, and that it was not the function of the pope to interfere with such a resolution. The pope, in examining into the case, is said to have asked Coen whether he embraced Christianity of his own free will. The boy replied that he preferred a religion which provided him with fine clothes, good food, and plenty of toys, to his poor family and the

shoemaker's shop. This reply convinced the pope of the sincerity of the convert's intentions; and accordingly, on St. Michael's Day, Sept. 29, 1864, the baptism of Coen was celebrated in St. Stanislaus Chapel, Cardinal Caggiano officiating, and Count De Maistre being godfather. The neophyte received the name of Stanislaus Maria Michael Joseph Pius Eugenio.

The sufferings of Coen's family, caused by his capture, were excessive. His eighteen-year-old sister died as a result of the excitement; his mother became insane and was taken to relatives in Leghorn; and his father had to leave Rome in order to escape the persecution of the government. Another Jew was thrown into prison because he said he had seen Coen at the window of the Casa. Moreover, as a result of the affair, a Christian mechanic caused the forcible baptism of an eight-year-old Jewish boy.

It was only on the fall of the papal government in 1870, and after energetic measures had been taken by the Italian government, that Coen was released and restored to his mother in Leghorn, his forcible detention having extended over seven years.

COEN, MOSES VITA: Banker at Ferrara, Italy, in the eighteenth century. He often transacted business with Pope Clement XIII. and with his successor, Clement XIV. On Feb. 22, 1764, Clement XIII. requested Coen to provide the papal government with as much corn as possible and with 4,000 sacks of Indian wheat, to be shipped either at Ancona or at Civita Vecchia, leaving the price to be settled by him.

Especially intimate were Coen's relations with Pope Clement XIV., whose confidential friend and adviser he became. He consequently shared in the lampoons directed against Clement. During the famine of 1772-73 Coen came to the rescue of the government and furnished it with 5,000 sacks of Indian wheat.

During the French invasion of 1798 Coen was one of the commission of six appointed to sell the property confiscated by the provisional government.

A. R.

COEN, RAFFAELLO DEL FU VITALE: Austrian physician; born at Spalato, Dalmatia, Jan. 19, 1839. He was educated at the gymnasium of his native town and at the University of Vienna, whence he was graduated as doctor of medicine in 1872 whereupon he commenced to practise in the Austrian capital as a physician and as a specialist in impediments in speech. In 1882 he opened a private dispensary and hospital for stammerers.

Coen has written essays for the "Medizinisch-Chirurgische Centralblatt in Wien," "Wiener Medizinische Presse," "Medizinisch-Pädagogische Monatsschrift für die Gesamte Sprachheilkunde," and other medical journals. He is the author of several books, among which are "Pathologie und Therapie

der Sprachanomalien," Vienna, 1886; "Die Hörschwäche," *ib.* 1887; "Specielle Therapie des Stammelns," Stuttgart, 1889; "Übungsbuch für Stotternde," Vienna, 1891.

COEN-CANTARINI. See CANTARINI.

COFFEE: A decoction of the berry of the *Coffea Arabica*, supposed to be indigenous to Abyssinia, and introduced into Arabia in the fifteenth century. It soon came into common use throughout Islam, and was thence introduced into European civilization. Among the Jews of Egypt it became so popular as to be known as "the Jewish drink" (A. Isaaci, Resp. i. §§ 2, 3). In London, England, it is generally stated to have been introduced from Constantinople in 1652 by a Greek named Pasqua Rossie, who started the first coffee-house in St. Michael's Alley, Cornhill; but according to Anthony A. Wood ("Diary," p. 19), Jacob, a Jew, sold coffee at Oxford two years before. The coffee-plant was introduced by the Dutch into Java about 1690, Surinam about 1718, and Jamaica in 1728. In the last two places Jews were largely instrumental in the development of the trade, with which they have been connected throughout its history, the largest holders of the berry in 1902 being the firm of Lewisohn Brothers of New York.

Many questions of Jewish law have been raised in regard to the use of coffee. Isaac Luria would not drink coffee prepared by Gentiles, and in this was followed by Hayyim Benveniste, who, however, permitted others to drink it. It has been decided that coffee may not be drunk before morning prayers, though water may; it had previously been drunk so early, especially in Egypt, as an antidote to influenza. Coffee is permitted on Passover, and even at the Seder service in addition to the four cups of wine that may be drunk. Jacob Marx of Hanover permitted the use of acorn coffee on the Passover, though the use of chicory was forbidden. If coffee is taken after the grace after meals, no benediction is necessary before tasting it, though some authorities demand one after it has been consumed. The drinking of coffee in coffee-houses on Sabbath was generally prohibited.

COFFIN: The custom of using coffins is probably borrowed from the Egyptians. It is recorded of Joseph that he was "put in a coffin in Egypt" (Gen. i. 26). Tradition says it was of metal (Sotah 13a). Both the Ark of the Covenant and the coffin are called, in Hebrew, "aron." The Talmud says that the "aron" (coffin) of Joseph was carried side by side with the "aron" (Ark) containing the Tables of the Law, so as to express the idea that "the one in this observed what is written upon the other" (Sotah 13a et seq.).

From the verse "Adam and his wife hid themselves . . . amongst [literally, "within"] the trees of the garden" is derived the custom of burial in a wooden coffin (Gen. R. xix.).

Rabbi Judah ha-Nasi, in his will, ordered that a hole be made in the bottom of his coffin (Yer. Kil. vi.). Rabbi Jose b. Kisma, in his will, requested his disciples to bury his coffin deep in the ground, for fear of desecration, as he said there was not

a coffin in Palestine which was not used as a feeding trough for Persian horses (Sanh. 98*a* *et seq.*). To prevent such abuse the Jewish law prohibited any one from deriving plunder from a coffin or burial clothes. A coffin must not be used for secular purposes. A coffin out of use, if of stone or earthenware, must be broken up; if of wood, it must be burned (Shulhan 'Aruk, Yoreh De'ah, 363, 5).

It appears, however, that the coffin was originally used for the purpose of transporting a corpse to a distant place of burial; and whenever the cortège passed, the mourning regulations were observed by the multitude (M. K. 25*a*). Bar Kappara and R. Lazar (= Eleazar b. Pedath), both Palestinian rabbis, had noticed the approach of funeral parties, from the direction of Babylon, bearing corpses in coffins for burial in the Holy Land. Bar Kappara asked, "What have they gained [by living away from, and being buried in, Palestine]?" and quoted from Jeremiah (ii. 7), "Ye entered, ye defiled my land and made mine heritage an abomination." "But," answered R. Lazar, "as soon as a clod of earth of the Holy Land is put on

the coffin, there is applicable the passage Deut. xxxii. 43 **כפר ארצתי עמי** [= "His land will atone for His people"] (Yer. Kil. end Ket. 35*b*; compare Bacher "Ag. Pal. Amor." ii. 3).

It was considered an honor for the deceased to be carried

from the death-chamber on a litter ("mitṭah") to the place of burial, and a greater honor, usually reserved for scholars, to be borne on the death-bed itself. In the case of R. Hunah it was necessary to enlarge the exit from the house to make room for the passage of his bed, his removal to a smaller bed

not being permitted (M. K. 25*a*). Maimonides says that the body should be buried in a wooden coffin ("Yad," Ebel, vi. 4). On the other hand, Nahmanides, in order that the words of the passage "Thou art dust, and unto dust shalt thou return" may be literally fulfilled, declares that according

to the Talmud the coffin is for the skeleton after the flesh is consumed, and that the bottom of the coffin should be removed, as in the case of Rabbi (quoted by Caro in Bet Joseph to Tur Yoreh De'ah, 362). In some countries it is customary to bury the dead in hammocks, and, after the flesh is consumed, to deposit

the bones in a coffin (Shulhan 'Aruk, *ib.* 363, 4). In other countries the dead are buried on simple boards, or placed directly in the ground (see BURIAL), a distinction being made only in case the dead is an Aaronite or of noble parentage. In modern times the use of coffins at every burial is insisted on.

Isaac Lampronti, in his Paḥad Yizhak (letter "Meir," p. 229), tells of a decision of 1678, in the case of Bizancia, the wife of Judah Hayyim of Corfu, who had requested her granddaughter, Semiralda, to place her (Bizancia's) head-dress in her coffin. Semiralda had, however, forgotten to do so; and a cabalist rabbi permitted the opening of the coffin in order to relieve her distress. The opening of the coffin was accompanied by prayers and ceremonial

apologies to the dead for being disturbed. The almost universal former custom of putting the dead in a plain, unpainted wooden coffin covered with black cloth has been abandoned in modern times; and distinction is made, much against Jewish tradition, between rich per-

sons and poor by more or less decorated coffins. Sometimes the bottom of the coffin is removed in order to bring the body into contact

Customs. with the earth, for reasons stated above. In Jerusalem it is customary to carry the body on a litter to Mount Olivet, building in the grave a coffin of uncemented stone

Stone Coffin found in an Ancient Tomb at Lydda by M. Clermont-Ganneau.

slabs, with sides and a top, but with no bottom, and covering the enclosure with earth (see BURIAL).

J. D. E.

COHEN, the name (כהן): The most usual surnames of European Jews. It indicates a family claiming descent from Aaron, the high priest. "Cohen" is the usual transliteration and orthography in English-speaking countries; but "Cowen" and "Cowan" also occur in England, while America has developed the forms "Cohan," "Cohane," "Cohne," "Cone," "Coon," "Kan," and "Koon." In Germany and Austria the forms "Cohn," "Conn," "Kahn," "Kohn," and others are met with; while it is probable that "Köhne" and "Kohner" also represent the recurring surname, which also occurs as a part of the names "Cohnheim" and "Cohnfeld." The French forms are represented by "Cahn," "Cahen," "Cahun," "Caen," and "Cain," or "Kahn," while Italy uses "Coen," and Holland "Cohen." The curious form "Coffen," in which the "ff" represents the aspirate, occurs in old Spanish records; and "Kahin" is the usual Arabic representation. The most numerous variants occur in Russia, which supplies "Cahan," "Cahana," "Kahan," "Kahana," and "Kahane," "Kagan," "Kogan," "Kogen," "Kohan" (the last two being Aramaic forms), besides the extended forms "Kohnowski" and "Koganowitch." The name also occurs in duplicated forms, only one of which need be mentioned here; namely, "Kohn-Zedek." This form is often abbreviated to Kaz, "Katz," (קץ) which is thus a variant of "Cohen."

Though claiming to be descended from a single person, the Cohens of to-day form rather a clan than a family. In Jewish religious life they have certain privileges and responsibilities: these are dealt with under PRIEST AND PRIESTHOOD. Not all of those who are, in the religious sense, Kohanim bear the name "Cohen." In a way, the name is not strictly a surname, but an indication of hereditary office.

The number of those who bear the name "Cohen" in its various forms is a considerable proportion of all Jews. Among the English Jews they form about 3 per cent; whereas on the continent of Europe, according to Lippe's "Bibliographisches Lexikon," they are only 2.3 per cent. In the 12,000 names contained in the lists of subscribers to the five chief Jewish charities of New York and Brooklyn, the Cohens, with the variant names, make up about 220, or less than 2 per cent. This relation of the number bearing the name "Cohen" to the total number of Jews in a list may be utilized to ascertain roughly the number in a much greater list. Thus, in the Brooklyn directory for 1900 there were 428 Cohens, which would indicate about 20,000 Jewish names in that directory.

How far this large proportion of Jews can claim a direct descent from Aaron is a matter of dispute. According to Jewish law, a Cohen may not marry a proselyte; accordingly, it would seem impossible that any admixture should occur among the Cohens. But they are allowed to marry the daughters of proselytes; and this would affect the purity of the Cohen descent. On the other hand, it is unlikely that any person would have assumed the name "Cohen" without cause, as several disabilities go with the

descent. Thus, Cohens may not approach a dead body; and for this reason persons of that name are not welcomed as ministers in small congregations, and more rarely adopt the medical profession. Isaac ben Sheshet, of the fourteenth century, distinguished between the ancient and modern Cohens, declaring that it was only usage and not law which maintained the rights and responsibilities of the modern Cohens (Responsa, No. 94). Samuel de Medina, of the sixteenth century, agrees with this view, and assumes the impurity of the Cohen descent in discussing the validity of a marriage (Responsa, No. 235). Solomon Luria thinks it impossible for the Cohens to have preserved their purity of descent throughout the wanderings of the Jews. Jacob Emden recommends a Cohen to refund the five shekels given him for the redemption of the first-born, because he can not be sure of his origin and of his claim to the money. It has even been declared that some Cohens must not say the priestly blessing ("Magen Abraham," 201, 4; "Kerethi u-Pelethi," 61, 6).

J.

COHEN: A Baltimore family, originally from Bavaria, which has occupied an important place in the Jewish community and in municipal life since the early years of the nineteenth century. Its first representative in America was Jacob I. Cohen, who came from Oberdorf, near Nördlingen, Bavaria, in 1773, and settled in Lancaster, Pa. Thence he removed to Charleston, S. C., and, after serving in the Revolutionary war, to Richmond, Va. Here he was joined, in 1787, by his brother, Israel I. Cohen, whose wife and seven children—the oldest son being eighteen years of age—went to Baltimore in 1808. The children were Jacob I. Cohen, Jr., Philip I. Cohen, Mendes I. Cohen, Benjamin I. Cohen, David I. Cohen, Joshua I. Cohen, and Miriam I. Cohen.

The older sons soon participated in public life. In 1812 the name of Philip, and in 1822 that of Jacob, Jr., appear in the list of members of the exclusive organization, The Ancient and Honorable Mechanical Company of Baltimore. In the War of 1812-14 Philip and Mendes were members of Captain Nicholson's Company of Fencibles, and served in the defense of Fort Mifflin during its bombardment. At his death, in 1852, Philip was postmaster of Norfolk, Va.

With the exception of Philip, all the brothers remained in Baltimore. The oldest, **Jacob, Jr.** (1789-1869), was the founder of the banking house of J. I. Cohen, Jr., & Brothers, and was identified with the struggle for political rights of the Jews in Maryland (1818-26). This struggle terminating favorably to his coreligionists, Jacob was immediately elected (Oct., 1826) as the representative of the sixth ward in the first branch of the city council. He was repeatedly elected to this body; and for several successive years he acted as its president.

For the first nine years (1830-38) of its existence he served the board of public school commissioners as secretary and secretary-treasurer. Jacob was also one of the projectors of the Philadelphia, Wilmington, and Baltimore Railroad, and for a long time its vice-president, remaining a director until

his death. He was also a director of the Baltimore and Ohio Railroad, and for twenty years president of the Baltimore Fire Insurance Company, besides being prominent in many public-spirited enterprises.

The third brother, Col. **Mendes** (1796-1879), after his retirement from the firm in 1829, traveled extensively in Europe and the East, and brought back with him the objects that form the Cohen collection of Egyptian antiquities in the Johns Hopkins University. He served a term in the Maryland House of Delegates (1847-48), was vice-president of the Hebrew Benevolent Society for over twenty years, and was prominently identified with the establishment of a Jewish hospital in Baltimore.

The sixth brother, **Joshua** (1801-70), was a physician, and one of the earliest aurists—perhaps the first—in the United States. He occupied the position of professor of geology and mineralogy in the academic department of the University of Maryland, was president (1857-58) of the Medical and Surgical Faculty of Maryland, and a member of the American Philosophical Society. Together with a friend, he established an eye and ear institute in Baltimore. He has left one publication, "Post-Mortem Appearances in a Case of Deafness." His library, interesting to Biblical students, is preserved at the family residence.

A son of the fifth brother, David I., is **Mendes Cohen** (b. 1831), a distinguished civil engineer, now (1902) living in Baltimore. His career began in the locomotive works of Ross Winans. From 1851 to 1855 he was one of the engineering corps of the Baltimore and Ohio Railroad. From 1855 to 1875 he served the following companies either as assistant superintendent, superintendent, comptroller, or president: the Hudson River Railroad, the Ohio and Mississippi Railroad, the Philadelphia and Reading Railroad, the Lehigh Coal and Navigation Company, and the Pittsburg and Connellsville Railroad. During 1892-93 Mendes was president of the American Society of Civil Engineers, and in 1894 President Cleveland appointed him a member of the board to report upon a route for the Chesapeake and Delaware Ship Canal. Since 1884 he has been corresponding secretary to the Maryland Historical Society; since 1892, a member of the Municipal Art Commission of Baltimore; since 1893, a member of the Sewerage Commission of Baltimore; and since 1897, one of the vice-presidents of the American Jewish Historical Society.

H. S.

COHEN, ABNER: The pioneer of Krugersdorp, Transvaal Colony; born about 1860; emigrated to South Africa in 1881; worked his way north, and fell in with the Boers, learning their language and trading with them. On his way to Johannesburg in 1887, he pitched his tent on a great heap of stones seventeen miles to the west of the town, which became the site of the town of Krugersdorp. He was thus the first English settler in the town, and has done much toward its develop-

IV.—10

ment. Cohen has also taken a share in the opening up of Bulawayo and Rhodesia.

Though taking no part in the conspiracy against the Boer government in 1895, he was intimate with members of the Reform Committee, and owing to some indiscreet remarks was for some time imprisoned.

As president of the Krugersdorp congregation, Cohen obtained from President Kruger two valuable freehold sites for the Jewish community.

COHEN, ABRAHAM. See ABRAHAM BEN MOSES COHEN.

COHEN, ABRAHAM: Assistant rabbi in Tunis; died 1840 at Safed, whither he had made a pilgrimage in his old age. He was a grandson of one of the earliest rabbis in Tunis. His book, "Abraham Yagel" (Abraham Will Rejoice), a work loosely arranged both as to form and contents, was published at Leghorn in 1843. It consists of commentaries on various treatises of the Talmud, together with notes on parts of the Bible, and on Maimonides and other legal codes.

COHEN, ALFRED J. (better known under the nom de plume of **Alan Dale**): American dramatic critic; born May 14, 1861, at Birmingham, England, where he attended King Edward's School. Then followed three years' study of dramatic art in Paris, after which (1887) Dale went to New York and began his journalistic career on the "Evening World." The independence, brightness, and acerbity of his criticisms soon attracted attention, and made him the most feared dramatic critic in the American metropolis. In 1895 he joined the "Journal," and increased the scope of his work by a broader and more liberal view of things theatrical—a change brought about by experience.

Dale is the author of several novels: "Jonathan's Home," London, 1885; "A Marriage Below Zero," New York, 1889; "An Eerie He and She," *ib.* 1889; "An Old Maid Kindled," *ib.* 1890; "Miss Innocence," *ib.* 1891; "Conscience on Ice," Chicago, 1892; "My Footlight Husband," New York, 1893; "A Moral Busybody," *ib.* 1894; "His Own Image," *ib.* 1899; and "A Girl Who Wrote," *ib.* 1902. He also wrote "Familiar Chats with Queens of the Stage," *ib.* 1890.

COHEN, ANNE-JEAN-PHILIPPE-LOUIS, DE VINKENHOEF: French litterateur; born at Amersfort, in the Netherlands, Oct. 17, 1781; died in Paris April 6, 1848. Beginning as a journalist, he contributed to the "Etoile." He went to

Paris in 1809, and was appointed censor for foreign languages in 1811, and librarian of the Bibliothèque Ste. Geneviève in 1824. He was the compiler of several catalogues, and also contributed to various papers, including "L'Ami du Roi," "Les Annales de la Littérature et des Arts," and translated works by French, Swedish, English, Russian, and Italian authors, as "La Symbolique Populaire," by Buchmann; "Histoire des Institutions d'Education Ecclésiastique," by Theiner; "Scènes Norvégiennes," by Bremer; and "Histoire de la Conquête de Grenade," by Washington Irving, 1829. He also contributed the "Théâtre Hollandais" to the "Collection des Théâtres Etrangers."

In addition Cohen published a number of works, among which were: "La France telle que M. de Kératry l'a Rêvée," Paris, 1821; "Herminie de Civray," 4 vols., 1823; "Histoire de Pierre Terrail, Dit le Chevalier Bayard," 1821 and 1825; "Jacqueline de Bavière, Dauphine de France," 4 vols., 1821; "Précis Historique sur Pie VII.," 1823; "La Noblesse de France, Histoire, Mœurs, et Institutions," 1845; "Réflexions Historiques et Philosophiques sur les Révolutions," 1846.

J. W.

COHEN, ARTHUR: English barrister and king's counsel; born in London Nov. 18, 1830. After three years' study at the gymnasium in Frankfurt-on-the-Main, he entered as a student at University College, London. Thence he proceeded to Cambridge at a time when it was almost impossible for a Jew to gain admission into the colleges. At length he was received into Magdalen College. In 1852 he was elected president of the Cambridge Union Debating Society. At Cambridge Cohen had a successful career, coming out fifth wrangler in the mathematical tripos; but he was prevented from taking his degree till after the repeal of the Test Act in 1871.

Cohen then read law; and five years after he had been called to the bar, he established for himself a reputation in shipping and insurance cases. Among several important appointments was his selection to represent the interests of England in the famous arbitration case connected with the "Alabama" at Geneva in 1872. Returning to England after the completion of the case, Cohen in 1874 unsuccessfully contested Lewes in the Liberal interest. But in 1880 he was elected for the Southwark division, and shortly afterward was offered a judgeship, which, however, he declined, though later

he became a judge of the Cinque Ports. He has been for many years standing counsel for his university. He has often represented foreign governments in disputes before the English law courts, as, for example, the Japanese government in an important case against the Peninsular and Oriental Steam Navigation Company.

Cohen has held various important positions in the London Jewish community. For many years he was president of the Board of Deputies, succeeding his uncle, Sir Moses Montefiore; but he resigned the position in 1894. He has been a vice-president of Jews' College, and for many years president of the borough Jewish schools.

G. L.

COHEN, BENJAMIN LOUIS: English politician and communal worker; member of Parliament for East Islington since 1892; born in London in 1844; son of Louis Cohen, founder of the firm of Louis Cohen & Sons, which he joined on reaching manhood. Cohen was educated privately, and on reaching maturity began a philanthropic career, both Jewish and general, especially interesting himself in technical education. He is a governor of St. Bartholomew's, Bridewell, and Bethlehem hospitals; life member and former vice-president of the Council of the United Synagogue; was president of the Jewish Board of Guardians from 1887 until June, 1900, and during his presidency arranged the transfer of the institution from its old quarters in Devonshire street to Middlesex street. Cohen has also been a member of the Jewish Board of Deputies, one of the presidents of the Hand-in-Hand and Widows' Home, the London Orphan Asylum, and vice-president of the Orphan Working School.

In 1888 Cohen was elected as a "Moderate" to the London County Council for the city, and in 1892 entered Parliament. Besides discharging these multifarious duties, Cohen was one of the original members of the Russo-Jewish committee, and acted as its treasurer till 1887.

COHEN, BENOIT: Philanthropist; born 1798 in Amsterdam; died in Paris July 15, 1856. He went to Paris as a young man, and entered upon a successful business career, devoting a great deal of his time and energy to the affairs of the community. He was president of the Board of Jewish Charities of Paris, honorary president of the Rothschild Hospital in the Rue Picpus, and he addressed himself in behalf of the community, often with success, directly to King Louis Philippe and to the Duke of Orleans. Cohen was also a member of the Jewish consistory, and the founder, as well as the most active worker, of the Société des Amis du Travail, which had for its object the assistance of children toward an honest career as mechanics or artisans.

COHEN, DAVID DE LARA. See LARA, DAVID COHEN DE.

COHEN, EDWARD: Australian statesman; born in London 1822; died March, 1877. He received his early education in Australia, and entered into business as a partner in his father's firm. Shortly after his arrival in Victoria in 1846, he purchased an auctioneer's business at Melbourne, in which he remained till 1868, and which became one of the leading concerns in the city.

Cohen soon became connected with the charitable institutions of the colony. He was for twenty years treasurer of the Melbourne Hospital, and for seven years president of the Melbourne Hebrew congregation. He was an alderman of the city, and in 1872 served as mayor of Melbourne. His activity in the council soon brought about a financial inquiry which led to drastic reforms in the arrangement of the city accounts.

In 1861 Cohen was elected member of Parliament for East Melbourne, which constituency he represented for many years. A free-lance in politics, his arguments in debate carried weight, and his large mercantile experience lent them additional force. He was a director of the Hudson's Bay Railway Company and of the Colonial Bank, and was an active initiator of colonial industries. Cohen was at one time a member of the Victorian ministry, in which he filled the office of commissioner of customs.

G. L.

COHEN, ELIAS (better known as **Elias Pasha**): Turkish physician; born in 1844. He belonged to a family many members of which have been distinguished in medicine. His early studies were completed at the Jewish communal school founded at Constantinople by the Camondo family. He entered the imperial school of medicine in 1861, graduating six years later as doctor of medicine, and proceeding in 1868 to western Europe to continue his professional studies. He resided at Berlin until 1871, acting while there as assistant to Professor Von Graefe, and attending the clinics of Virchow, Traube, and others. On the outbreak of the Franco-Prussian war he continued his studies in Vienna.

Cohen returned to Constantinople in 1873, and was appointed professor at the military school at Haidar-Pasha. Soon after he was sent to Monastir, the headquarters of the third army corps, as oculist and chief surgeon. On being recalled to Constantinople, he was attached to the central naval hospital, and given the rank of major in the imperial service. His vast knowledge and high reputation in the capital gave rise to jealousies in influential circles, and he was obliged to resign.

It was after Cohen had left the service that he was summoned to attend one of the imperial prin-

cesses. The rapid success of his treatment attracted the attention of the sultan, who appointed him court physician with the rank of lieutenant-colonel. Two years later he was promoted to the rank of general, being the first Turkish Jew to occupy this high position. It was then that the sultan appointed the new pasha as his private physician. In 1888 he was appointed to the faculty of medicine at Constantinople as professor of dermatology, and became, in 1894, member of the Superior Sanitary Commission.

Elias Pasha was decorated with the grand ribbons of Medjidie and of the Osmanie, the Intiaz Liakat medals, the Turco-Grecian war medal, etc.

Elias Pasha always showed the liveliest interest in the welfare of his coreligionists, and he gave on several occasions signal proofs of his solicitude. In 1885, owing to an alleged ritual murder, the Greek and Armenian population of Kadikeuy, a thickly populated suburb of Constantinople, threatened the Jews with wholesale massacre. Several Jews, indeed, fell victims to the fury of the fanatics; and the movement was assuming grave proportions, when Elias Pasha, with the authority of the sultan, intervened in behalf of his brethren. Rigorous measures were adopted to repress the émeute, and the guilty persons were sentenced to severe punishment. Elias Pasha died July 8, 1910.

COHEN, ELLEN GERTRUDE: English painter; studied at the Slade and Royal Academy schools, London, and in Paris under Constant and Laurens; first exhibited at the Academy in 1891, her work being a portrait medallion of Dr. B. W. Richardson. In Paris she exhibited at the Salon (Champs Elysées) from 1894. The pictures by her, shown at the Royal Academy, were "Tired Out," in 1892; "Dibbling for Chub," in 1897; and "Qualifying for the Coach Club," in 1899. She is also a constant contributor to the exhibitions held by the Royal Institute of Painters in Water and Oil Colors.

As an artist in black and white Miss Cohen has contributed to many magazines and papers, including the "Pall Mall," "Queen," and "Pictorial World." Her Parisian experiences, written as well as sketched by her, appeared in "The Strand Magazine" and "The Studio."

COHEN, EMIL WILHELM: German mineralogist; born at Aakjaer, near Horsens, Jutland, Oct. 12, 1842. He studied at the universities of Heidelberg and Berlin, and from 1867 to 1869 was assistant at the mineralogical institute of the former seat of learning. In 1871 he was appointed privat-docent, but resigned the position early the next year, when he went to South Africa on a tour of geological and mineralogical research. Cohen visited the Vaal River diamond-diggings and the newly discovered mines in that part of Griqualand West now known as Kimberley. Thence he went north to the Lydenburg district, emerging eventually at Delagoa Bay. This trip consumed a year; and on his return to Germany he published "Bemerkungen zur Routenkarte von Lydenburg nach den Goldfel-

dern und nach Delagoa Bai" (1875). In 1878 Cohen was appointed assistant professor of petrography at Strasburg and a member of the geological commission of Alsace-Lorraine. Seven years later he became professor at Greifswald.

Cohen is the author of "Die zur Dyas Gehörigen Gesteine des Südlichen Odenwaldes," 1871; "Geognostische Beschreibung der Umgegend von Heidelberg," 1874-81; "Mikrophotographien," 1880-1884; "Zusammenstellung Petrographischer Untersuchungsmethoden," 3d ed., 1896; "Struktur und Zusammensetzung der Meteoreisen," 1886-87; "Meteoreisenkunde," I., 1894. Cohen published in addition over one hundred essays in various scientific magazines of Germany and other countries.

COHEN, FRANCIS. See PALGRAVE, FRANCIS.

COHEN, FRANCIS LYON: English rabbi, author, and expert on Hebrew music; born at Aldershot Nov. 14, 1862, and educated at Jews' College and University College, London. Cohen became minister of the congregation in South Hackney (1883-1885), then of that in Dublin (1885-86), and since 1886 of the Borough New Synagogue, South London. In 1886 he was appointed tutor in Jews' College; in 1892 he became acting chaplain to the Jews in the British army; and in 1896 staff chaplain to the Jewish Lads' Brigade, the formation of which he was the first to advocate. He has also acted as editor to the choir committee of the United Synagogue. Cohen has organized military services on Hanukkah at his own and other synagogues, and altogether has done much to promote the patriotic and military ardor of English Israelites. He is the author of "The Handbook of Synagogue Music," 1889, and, with D. M. Davis, of "The Voice of Prayer and Praise," 1899. In addition, he has written numerous articles on Jewish music, among which have been the following: "Synagogue Music; Its History and Character," in "The Jewish Chronicle," 1888; "Synagogue Plain-Song," in "The Organist and Choirmaster," 1897; "La Revue de Chant Grégorien," Marseilles, 1899; and "Song in the Synagogue," in "The Musical Times," London, 1899.

COHEN, HAYYIM: Tunisian rabbi; lived in the second half of the nineteenth century, on the island of Djerba, near Tunis. He is the author of "Na'awah Kodesh" (Becoming Is Holiness), a commentary on the Song of Songs, Leghorn, 1872; "Mille Mehayye" (The Vivifying Words), a commentary on the "Hosha'anot" of the Feast of Sukkot; "Mizwot

ha-Melek" (The Commandments of the King), a commentary on the "Azharot" of Ibn Gabirol; "Allon Bakut" (Oak of Weeping), a commentary on the elegies for the Ninth of Ab; "Moza' Sefateka" (The Outcome of Thy Lips), a commentary on the prayers (selihot) for the month of Elul; "Mikra' Kodesh" (Holy Convocation), a commentary on the Song of Songs; "Zokrenu le Hayyim" (Remember Us for Life), a commentary on the Haggadah of the first nights of the Passover; and "Leb Shome'a" (Understanding Heart), elementary discussions of various subjects.

COHEN, HENRI: French composer and numismatist; born at Amsterdam 1805; died at Bry-sur-Marne May 17, 1880. Cohen's parents went to France in 1811, and provided excellent musical instruction for their son. He studied harmony with Reicha, and singing with Lois and Pellegrini. In 1832 and 1838 he was at Rome, and there produced "L'Impegnatrice" and "Aviso ai Maritati." In 1839 he established himself at Paris, devoting his efforts chiefly to teaching, and singing with success at various concerts.

Cohen was appointed director of the Conservatoire at Lille; but after some difficulties with the administration he returned to Paris, and accepted a position as director of the Cabinet des Médailles at the Bibliothèque Nationale. He subsequently published some works on numismatics and bibliography.

His principal musical compositions are: "Marguerite et Faust," a lyric poem, Paris, 1847; "Le Moine," lyric poem, London, 1851; compositions for the piano, fugues, nocturnes, romances, and melodies; a practical treatise on harmony, and eighteen progressive solfeggios for three and four voices, commended by Fétis.

A. A. G.

COHEN, HENRY: American rabbi; born in London April 7, 1863. He was educated in London, and when only eighteen traveled in Africa as interpreter for a French legation. He was severely wounded during the Zulu war, while assisting in the repulse of an attack by savages. Proceeding to Jamaica, British West Indies, he became rabbi of Kingston (1884-85), and then of Woodville, Miss., in the United States (1885-88). In 1888 he succeeded the Rev. Joseph Silverman as rabbi of Congregation B'nai Israel, Galveston, Texas, which position he still occupies (1902).

He is librarian of the Texas Historical Society and a member of the executive council of the American Jewish Historical Society, to both of which he has made historical contributions. He has made most careful researches into the history of the Jews in Texas. Cohen has published numerous compilations, translations, reviews, poems, lectures, sermons, and pamphlets. In 1894 he issued his "Talmudic Sayings" and "Prayer in Bible and Talmud," the latter from the German of Nahida Remy.

L. N. L.

COHEN, HENRY EMANUEL: Judge of the supreme court of New South Wales; born at Port

Macquarie Dec., 1840. After receiving an ordinary education he served as clerk in 1856; then entered business at Bathurst, but went to London in 1868, where he commenced the study of law, and was admitted to the bar in 1871. Returning to New South Wales, he distinguished himself in the practise of the law, and was on several occasions employed as crown prosecutor. At the general election of 1874 he was returned for West Maitland, and reelected in 1877. Following close upon the general election, he received, on the formation of the Farnell government, the appointment of colonial treasurer. With the coming into power of the Stuart administration, he was called to fill the office of minister of justice; but on the retirement of that government and the dissolution of Parliament in 1885, he retired from politics and devoted himself entirely to the practise of his profession. Cohen was appointed judge of the supreme court in 1896, being the first Jew in New South Wales thus honored (with the exception of Sir Julian Solomon, who resigned the position within a few days of his appointment), and the only Jew holding such office throughout the British dominions. Cohen has for years closely identified himself with Jewish religious and charitable institutions.

G. L.

COHEN, HERMANN: German philosopher; born in Coswig, Anhalt, Germany, July 4, 1842. He early began to study philosophy, and soon became known as a profound student of Kant. He was educated at the gymnasium at Dessau, at the Jewish theological seminary at Breslau, and at the universities of Breslau, Berlin, and Halle. In 1873 he became privat-docent in the philosophical faculty of Marburg University, the thesis with which he obtained the "venia legendi" being "Die Systematischen Begriffe in Kant's Vorkritischen Schriften nach Ihrem Verhältniss zum Kritischen Idealismus." In 1875 he was appointed assistant professor, and in the following year professor. He was one of the founders of the Gesellschaft zur Förderung der Wissenschaft des Judenthums, which held its first meeting in Berlin in Nov., 1902.

Cohen is generally acknowledged to be one of the ablest representatives and exponents of the neo-Kantian school. The more important of his works are: "Die Platonische Ideenlehre Psychologisch Entwickelt," in "Zeitschrift für Völkerpsychologie," 1866, iv.; "Mythologische Vorstellungen von Gott und Seele," *ib.* 1869; "Die Dichterische Phantasie und der Mechanismus des Bewusstseins," *ib.*; "Zur Controverse Zwischen Trendelenburg und Kuno Fischer," *ib.* 1871; "Kant's Theorie der Erfahrung," Berlin, 1871; 2d ed., 1885; "Platon's Ideenlehre und die Mathematik," Marburg, 1878; "Kant's Begründung der Ethik," Berlin, 1877; "Das Prinzip der Infinitesimalmethode und Seine Geschichte: ein Kapitel zur Grundlegung der Erkenntnisskritik," Berlin, 1883; "Von Kant's Einfluss auf die Deutsche Kultur," Berlin, 1883; "Kant's Begründung der Aesthetik," Berlin, 1889; "Zur Orientirung in den Losen Blättern aus Kant's Nachlass," in "Philosophische Monatshefte," 1890, xx.; and "Leopold Schmidt,"

in "Neue Jahrbücher für Philologie und Pädagogik," 1896, cliv.

Cohen edited and published also the last philosophical essays ("Logische Studien," Leipsic, 1894) of F. A. Lange, and his "Geschichte des Materialismus," with a long introduction and critical supplement (2d enlarged edition based on the 7th edition of the original, 1902, I.). His writings relating more especially to Judaism include several pamphlets, among them "Die Kulturgeschichtliche Bedeutung des Sabbat," 1881; "Ein Bekenntniss in der Judenfrage," Berlin, 1880; as well as the following articles: "Das Problem der Jüdischen Sittenlehre," in the "Monatsschrift," xliii. (1899), pp. 385-400, 433-449; "Liebe und Gerechtigkeit in den Begriffen Gott und Mensch," in "Jahrbuch für Jüdische Geschichte und Litteratur," III. (1900), pp. 75-132; "Autonomie und Freiheit," in the "Gedenkbuch für David Kaufmann," 1900. His essay "Die Nächstenliebe im Talmud" was written at the request of the Marburg Königliches Landgericht (3d ed., Marburg, 1888). His latest publication is "Logik der Reinen Erkenntniss," comprising the first part of his "System der Philosophie," ix. 520, Berlin, 1902.

COHEN, ISAAC: English theatrical manager; born about 1835. He was one of the oldest of the London managers, having, first on the Surrey side, and for 34 years in the East End of London, directed theaters for a period altogether of 44 years. His first theatrical engagement was at the Victoria, South London, and he was subsequently engaged at Astley's. He became call-boy and afterward assistant manager, and in 1862 undertook the management of the East London Theater. Thence in 1872 he went to the Pavilion Theater, of which he was manager till 1902. He died Dec. 25, 1907.

G. L.

COHEN, JACOB RAPHAEL: American hazzan; believed to have been born in the Barbary States; died in Philadelphia, Pa., Sept., 1811. Cohen lived in London, England, during the earlier years of his life. He is known to have been in Quebec, and also in New Orleans, in 1777. He was the minister of the Spanish and Portuguese synagogue, Shearith Israel, of Montreal, Canada, from 1778 to 1782. In the latter year Cohen was elected minister of the Sephardic synagogue of New York. He lived there until 1784, when he accepted the appointment of hazzan of the Spanish and Portuguese congregation of Philadelphia, Pa.

Cohen married Rebekah Luria, of a family which had lost more than one of its members through the Spanish Inquisition. He left descendants in Philadelphia. After Cohen's death his son, **Abraham Hyman Cohen**, acted as reader for a time.

C. I. DE S.

COHEN, JACOB DA SILVA SOLIS: American laryngologist; born in New York city Feb. 28, 1838. He was educated at the Central High School of Philadelphia, the Jefferson Medical College, and the University of Pennsylvania, receiving from the last named in 1860 the degree of doctor of medicine. In the same year he was appointed one of the resident physicians of the Philadelphia Hospital. At the outbreak of the Civil war he joined the United States army as a private. He was soon appointed assistant surgeon of the Twenty-Sixth Regiment Pennsylvania Volunteers. After having served with his regiment in Hooker's brigade, he resigned from the army to become acting assistant surgeon in the United States navy, which position he held from 1861 to 1864, serving on the U. S. steamers "Florida" and "Stettin," and the U. S. ship "Vermont."

In 1864 he rejoined the army as visiting surgeon to two military hospitals in Philadelphia. At the end of the war he went to New York, and afterward to Philadelphia, where he established himself as a physician (1866), paying special attention to the diseases of the throat and lungs. He is at present (1902) one of the leading laryngologists.

In 1867 Cohen was appointed lecturer on electrotherapeutics at the Jefferson Medical College, Philadelphia, with which institution he was connected till 1883, when he became honorary professor of laryngology. In the same year he was elected professor in the Philadelphia Polyclinic. He had also been attached, since 1873, to the staffs of the German Hospital, the Home for Consumptives, the Northern Dispensary, and the Jewish Hospital in that city.

Cohen is a prolific writer, and has contributed many monographs to the medical journals. He was for a number of years one of the editors of the "Archives of Laryngology," and is at present in charge of the laryngological department of the "American Journal of the Medical Sciences." He has written "Diseases and Injuries," in the "International Encyclopedia of Surgery," New York, 1884 and 1886; and "The Diseases of the Mouth, Tongue, Pharynx, and Esophagus," in the "American System of the Practice of Medicine," Philadelphia, 1885. He is also the author of "Inhalation in the Treatment of Disease: Its Therapeutics and Practice," Philadelphia, 1867, 2d ed. 1876; "Diseases of the Throat and Nasal Passages," New York, 1872, 5th ed. 1879; "Croup in Its Relation to Tracheotomy," Philadelphia, 1874 (translated into Spanish, Seville, 1887); "The Throat and Voice," Philadelphia, 1874, and continuously reprinted to date.

A. F. T. H.

COHEN, JOSEPH: French journalist; born at Marseilles Nov. 1, 1817; died in Paris 1899. After finishing his studies at Aix, he was admitted to the bar there in 1836. He founded the "Mémorial d'Aix," of which he was the editor until 1843. At this time he, with Jacques Isaac ALTARAS, was interested in the Jews of Algeria, publishing some articles on them in the "Archives Israélites." He thereby gained their friendship, and they elected him president of the newly founded Jewish con-

sistory of Algiers. He assisted them in reorganizing their mode of worship, and later (1868) they sent him to Paris as delegate to the central consistory of the Jews of France.

On returning to France in 1850, he resumed his journalistic work, writing on politics as well as on matters pertaining to Judaism. From 1860 to 1862 he was one of the editors of the first French Jewish weekly, "La Vérité Israélite," in which he published his famous work, "Les Déicides," an investigation into the life of Jesus, in which he attacks the originality of the moral teaching of the Gospels, and defends the Pharisees. The work appeared in book form in 1864 (a second edition in 1866), and was translated into English in 1874. Cohen subsequently published a supplementary work, "Les Pharisiens," 2 vols., 1877.

His reputation suffered somewhat in consequence of unfortunate financial transactions; but after some years of silence he reengaged in political journalism, and was editor of "La Liberté" to the close of his life.

S.

J. W.

COHEN, JOSIAH: American lawyer and judge; born at Plymouth, England, Nov. 29, 1841, of a family long settled in Cornwall. He is a well-known lawyer and public man in the western part of the state of Pennsylvania, having been chairman of the Allegheny county Republican executive committee, and, in 1884, one of the members of the presidential election board for Pennsylvania. In 1901 he was appointed judge of the orphans' court of Allegheny county.

Cohen has been affiliated with most of the local and national Jewish organizations, being a member of the executive committee of the Union of American Hebrew Congregations, and president of District Lodge No. 3, I. O. B. B., and of its court of appeals. He is also a life-member of the board of trustees of the Carnegie Institute of Pittsburg.

BIBLIOGRAPHY: Markens, *The Hebrews in America*, p. 205.

A.

COHEN, JUDAH BEN ISAAC BEN MOSES: Provençal philosopher of the middle of the fourteenth century. He was a disciple of Samuel of Marseilles, and a relative of Shelemiah of Lunel, at whose request he composed a commentary on Averroes' middle commentary on the "Organon." In his treatise Cohen often corrects Averroes, and quotes Levi ben Gerson, whom he defends against the attacks of his (Cohen's) master, Samuel of Marseilles. A portion of this commentary, comprising the "Isagoge" and the "Categories," is still extant in manuscript (Christ Church, Oxford, No. 201).

I. Br.

COHEN, JULES EMILE DAVID: French composer; born at Marseilles Nov. 2, 1830; died in Paris Jan., 1901; studied at the Paris Conservatoire, under Zimmerman, Marmontel, Benoist, and Halévy, from 1847 to 1854, gaining first prizes in pianoforte, organ, harmony, counterpoint, and fugue. In 1870 he was appointed professor in charge of the choral class of that institution, and in 1877 chorus master at the Grand Opera, Paris.

Cohen's compositions are very numerous, and include: thirty songs without words for the piano-forte; six "études expressives" and twelve preludes for the harmonium; ballads, chamber-music, and orchestral suites. The music composed by him for his sister's wedding at the Jewish Temple, Rue de Notre Dame de Nazareth, Paris, and a mass for men's voices, have often been performed.

For the theater Cohen has written the following operas and comic operas: "Vive l'Empereur" and "L'Annexion," 1860; "Maître Claude," 1861; "José Maria," 1866; "Les Bluets," 1867; "Déa," 1870; and on the occasion of the reproduction of "Athalie" and "Esther" at the Comédie Française he composed new music for the choruses.

COHEN, KATHERINE M.: American sculptor and painter; born in Philadelphia, Pa., March 18, 1859. She early evinced a taste for art, especially for modeling, and pursued her studies in the art schools of Philadelphia and New York, among her instructors being J. Liberty Tadd, John J. Boyle, and Augustus St. Gaudens. In 1887 she went abroad, and after four years' travel studied in Paris under Mercié. She has produced many works, those of special Jewish interest being the group "Rabbi Ben Ezra" and the heroic figure "L'Israélite," which latter was exhibited at the Paris Salon in 1896. Among her portrait busts are those of Mayer Sulzberger and of Lucien Moss.

F. T. H.

COHEN, LEVI A.: Journalist and champion of the Jews of Tangier; born at Mogador in 1844; died at Tangier Nov. 9, 1888. He went to England at an early age, but subsequently settled at Tangier, where he remained for the rest of his life.

To the Jews of Morocco Cohen stood in the character of a protector. One of the few independent men among the Moorish Jews, he was unsparing in his denunciation of any infringement of their rights; and in order to make his work more effective he founded a journal edited in French, the "Réveil

du Maroc." In the capacity of editor, as the accredited representative of the board of delegates of the American Hebrew congregations, and as correspondent of the Anglo-Jewish Association, he exercised considerable influence. On several occasions Cohen undertook perilous missions into the interior of the country, and to the court of the sultan, in order to be of more effectual service to his coreligionists. The poor Arabs, too, found in him a sympathetic advocate of their cause.

COHEN, LEVI ALI: Dutch physician and medical author; born Oct. 6, 1817, at Meppel, province of Drenthe, Holland; died Nov. 22, 1889, at Groningen. He received his education at the Latin school of his native town and the university at Groningen, from which he graduated in 1840 as medical doctor. Establishing himself as general practitioner in Groningen in the same year, he became (1858) chief of the bureau of provincial statistics. In 1865 he gave up his practise to become chief of the board of health ("Inspecteur voor het Geneeskundig Staatstoezicht") of the provinces of Overijssel and Drenthe, and later of the provinces of Friesland and Groningen. During this time he was one of the reorganizers of the new medical laws for the Netherlands. King William III. appointed him in 1876 delegate to the hygiene and sanitation congress which met at Brussels. For fifty years he was a member of the congregational committee of Groningen, one year its president, and for twenty years a member of the committee on Jewish affairs in Holland. He also took great interest in the charity societies. From 1844 till 1877 he was editor of the following periodicals: "Mededeelingen uit het Gebied van Natuur, Wetenschap, en Kunst," "Nieuw Praktisch Tijdschrift van de Geneeskunde in Al Haar Omvang," "Het Repertorium," "Nieuw Statistisch Geneeskundig Jaarboekje," and (with other medical men) "Het Nederlandsch Tijdschrift voor Geneeskunde." He was also a contributor to the "Weekblad van het Ned. Tijdschrift voor Geneeskunde."

Cohen has written many essays and books, among which are: "Bewerking van Choulant-Richter's Ziektekunde and Geneeskunde," 1858-60; "Het Wezen en de Rationele Behandling van den Zoogenaamden Diabetes Mellitus," Groningen, 1845; "Bewerking van Isensées Oude- en Middel-Geschiedenis der Geneeskunde," 1847; and "Handboek der Openbare Gezondheidsregeling en der Geneeskundige Politie," Groningen, 1869-72. Mention should also be made of one of his works on Biblical subjects, viz.: "De Dichter van het Boek Job als Dierkundige Beschouwd," 1843. All these works were published in Groningen.

COHEN, LEVY BARENT: English financier and communal worker; born at Amsterdam 1740; died in England 1808; son of Barent Cohen, a wealthy merchant of Amsterdam. He removed to England with his brother, and by 1778 had developed a large business in London. He was natural-

ized in 1798, and became known eventually as one of the leading merchants of the city.

As a communal worker he labored with much public spirit in Jewish affairs; was one of the founders and the first president of the Bread, Meat, and Coal Charity, and of the Jews' Hospital; and filled successively all the synagogal offices of the Duke's Place congregation.

Cohen was twice married; and his chief claim to remembrance lies in having been the founder of the Cohen family in England. Through the distinguished marriages which his children contracted, nearly all the leading Jewish families in England are connected with him. His daughter Hannah became the wife of Nathan Mayer Rothschild, the founder of the firm in New Court; the second daughter, Judith, married Sir Moses Montefiore; the third daughter, Jessie, married Myer Davidson; and by the alliances of his other children further marriages were made with the families of Goldsmid, Samuel, and Lucas.

G. L.

COHEN, LIONEL LOUIS: English financier, politician, and communal worker; born in London 1832; died there June 26, 1887; son of Louis COHEN, founder of the house of Louis Cohen & Sons, foreign bankers and members of the Stock Exchange; of this firm Lionel Louis Cohen became the head in 1882, after having been elected a trustee (1870) and later manager of the Stock Exchange. He retired in 1885 on being elected member of Parliament.

Cohen's financial ability was shown by his services in connection with the Turkish debt, which earned for him a nomination to the order of the Medjidie. A prominent worker in the Conservative cause at a time when the great bulk of Jews were unquestioning adherents of the Liberal party, he caused considerable sensation in 1874 by appealing to Jews to exercise their independent judgment in political affairs. In 1885 he was returned to the House of Commons by the borough of North Paddington, and during his short tenure of his position he served with distinction on the royal commissions on the depression in trade, on gold and silver, and on endowed schools.

Cohen from his early years devoted much time to the service of the community. On entering public life he found the three city synagogues and various societies administering charitable relief in a chaotic and unscientific manner, and took a notable part in the efforts made to remedy the evil. In 1859, when the synagogue vestries agreed, on the motion of Ephraim Alex, overseer of the poor, to delegate their powers to a specially constituted board of guardians, Cohen became its honorary secretary.

His "Scheme for the Better Management of All the Jewish Poor," elaborated in 1860, practically formed the constitution of the board of guardians for the relief of the Jewish poor, the chief charitable institution of the Anglo-Jewish community. In 1878 he was elected president of the board, and filled that office till his death. He gave in all 28 years of unremitting service to the institution, which under

his inspiration earned recognition as a great and model charity within and beyond the community.

Cohen also took the leading share in the movement which, after many years of labor, culminated in the federation by Act of Parliament in 1870 of the Great, the Hambro', and the New synagogues under the title of "The United Synagogue." He presided over the first meeting of its council, of which he was elected a vice-president, and was the ruling spirit and master mind of the organization, which during his lifetime grew into a corporation of eleven metropolitan congregations and the most influential body of its kind in the British empire.

In 1881 he initiated the movement in favor of the persecuted Russian Jews, and raised the first fund in England for their relief.

Cohen wrote a pamphlet on Indian railways, was a frequent contributor to the Jewish journals, and wrote the masterly series of reports of the board of guardians during his tenure of office as honorary secretary of that institution. The series of statistical tables started by him in these reports has ever since formed a model for similar compilations.

M. A. GR.

COHEN, LOUIS LOUIS: English communal worker; born in London Sept., 1799; died there March 15, 1882. For two generations Cohen was a commanding figure in the Anglo-Jewish community, and took a prominent share in the management of its affairs. In 1837 he was elected warden of the Great Synagogue, which position he filled for many years. On his retirement he became a life-member of the vestry, and subsequently of the council of the United Synagogue. He also served for many years as a member of the committee (Seven Elders). He was a colleague and active supporter of Sir Moses Montefiore in most of his undertakings. On the board of deputies, of which he was a member, Cohen exercised great influence, and was the main author of its existing constitution. He supported most of the leading London charities, and was for several years vice-president of the Jews' Free School, president of the board of sheḥitah, treasurer of the Initiation Society, and trustee of the bet ha-midrash. In religious matters Cohen was a rigid Conservative, and felt intensely on questions affecting traditional Judaism.

He became a member of the Stock Exchange in 1819, and served on committees for fifteen years. The firm of Louis Cohen & Co. was founded by him. Cohen had a special liking for the science of botany, and was a fellow of the Royal Botanical Society.

COHEN, LOUIS S.: Lord mayor of Liverpool in 1899; born at Sydney, New South Wales, in 1846; son of Samuel Cohen, who represented Morpeth in the Parliament of New South Wales. He was educated in London, at Edmontou House (H. N. Solomon's school) and University College, and went to Liverpool in 1864, where he became connected with the firm of Lewis, subsequently becoming its head.

It was not till 1895 that Cohen began to take a prominent part in public affairs. In that year

he was elected member of the city council for the Breckfield ward (Everton). He now (1901) holds several public positions, and has made himself thoroughly acquainted with all the details of municipal government. He is chairman of the Estates Committee and member of the Hospital Sunday Committee. In 1897 he was elected chairman of a subcommittee of the Unsanitary Property Committee. In 1899 Cohen was unanimously chosen lord mayor of Liverpool.

COHEN, MICHEL: Dutch soldier; born Nov. 27, 1877, in Goes, province of Zeeland, Holland. After a common-school education at his native place, he enlisted in April, 1894, in the Second Regiment of Hussars. Two years later, May, 1896, he resigned, and then enlisted in the Dutch-Indian army for a term of six years, embarking for the Dutch East Indian colonies on June 27 of the same year.

Upon arrival at Sumatra Cohen was appointed to a cavalry regiment. He distinguished himself at the attack on the Achin (Atjeh) camp at Batoe Menek, Sept. 8, 1897, conveying information and messages under fire of the enemy, for which he received honorable mention in a royal decree. Promoted to corporal, in 1900 he was made a knight of the Military William Order of the fourth class for bravery at the storming of Tjot Kala (Achin), Nov. 14, 1899. Under a very heavy fire and a hail of missiles, Cohen rescued a wounded European sergeant-major who had fallen from his horse. Placing him on his own horse and running alongside, he brought the officer safely back to the division.

COHEN, MOSES: Bulgarian journalist; born at Shumla, Bulgaria, in 1864. He published in French "Petite Histoire des Israélites," Philippopolis, 1897, a text-book containing a résumé, chapter for chapter, of Theodore Reinach's "Histoire des Israélites." In 1899 Cohen founded at Philippopolis the journal "Tcheweschki-Prava," as an organ of the Bulgarian Jews. This was the first Jewish periodical in the Bulgarian language founded in the principality; and it waged an active warfare against anti-Semitism. After an existence of six months it was suppressed by the Bulgarian government.

COHEN, MOSES BEN ELIEZER: Moralist; lived in Germany, probably at Coblenz, in the second half of the fourteenth century. He was the

author of an ethical work entitled "Sefer Hasidim" (Book of the Pious), written in 1473 and published by Schriftsetzer, Warsaw, 1866. This book, known also under the title "Sefer ha-Maskil" (Book of the Wise), gives a brief description of Jewish piety as understood at that time, and contains some valuable contributions to the history of Jewish culture. The author often quotes the "Hayye 'Olam" of Isaac Hasid and the works of Judah ha-Hasid.

COHEN, NAPHTALI: Russo-German rabbi and cabalist; born in 1649 at Ostrowo in the Ukraine; died at Constantinople Dec. 20, 1718. He belonged to a family of rabbis in Ostrowo, whither his father, Isaac Cohen had fled during the Cossack war. In 1666 Cohen fell into the hands of the Tatars who kept him in servitude for several years. Escaping, he returned to Ostrowo and was chosen to succeed his father as rabbi. In 1690 he was called to Posen, where he officiated as chief rabbi till 1704. There he devoted himself to the Cabala, and collected a large library of cabalistic literature.

Naphtali Cohen.

In 1704 he was called to Frankfort-on-the-Main. On the occasion of a fire which, breaking out in his house on Jan. 14, 1711, spread to and consumed the entire Jewish quarter, it was charged that, relying on the efficacy of his cabalistic charms, he had prevented the extinction of the fire by the ordinary means. He was arrested and thrown into prison, and regained his liberty only upon renouncing his office. He then went to Prague, where many members of his family lived. There another misfortune, which embittered his life more than the loss of his wealth and position, befell him. The Shabbethaian cabalist Nehemiah Hayyun appeared in Prague, declaring himself a preacher or an emissary from Palestine, and by his duplicity gained the confidence of the credulous Cohen. Being a believer in practical Cabala, Cohen found no fault with Hayyun, even when the latter began to sell amulets. It is not astonishing, therefore, that when Hayyun asked for an approbation for his mystical work "Mehem-nuta de Kula," Cohen, to whom he had prudently

submitted only the main text, but not the commentaries which accompanied it, and in which the author openly professed the doctrine of the Trinity, readily granted it, and gave him a glowing recommendation. Provided with this and with other recommendations secured in the same way, Hayyun traveled throughout Moravia and Silesia, propagating everywhere his Shabbethaian teachings.

Cohen soon discovered his mistake, and endeavored, but without success, to recover his approbation, although he did not as yet realize the full import of the book. It was in 1718, while Cohen was staying at Breslau (where he acted as a rabbi until 1716), that Hakam Zebi Ashkenazi of Amsterdam informed him of its tenets. Cohen thereupon acted rigorously. He launched a ban against the author and his book, and became one of the most zealous supporters of Hakam Zebi in his campaign against Hayyun.

In 1715 Cohen went to see August II., King of Poland, to secure reinstatement in his former rabbinate of Posen, at that time vacant; but failed because of the opposition of the leaders of the community. He then returned to the Ukraine, and in 1718 started for the Holy Land, but died on the way at Constantinople.

Cohen was the author of the following works: "Birkat Adonai" (Blessing of the Lord), a commentary on Berakot, with an introduction on the correlation of the Mishnaic tractates, having the subtitle "Semikut Hakamim" (Connection of the Wise), Frankfort-on-the-Main, 1702 (Cohen was so proud of this work that he ordered it to be buried with him); "Meshek ha-Zera'" (Sowing of the Seed), commentary on the Mishnaic order Zeraim (not published); "Pi Yesharim" (Mouth of the Righteous), a cabalistic introduction to Genesis, Frankfort-on-the-Main, 1702; "Sefer Bet Rachel" (Book of the House of Rachel), quoted in his will, probably identical with "Tefillat Bet Rachel" (Prayer of the House of Rachel), published at Amsterdam in 1741.

Cohen also edited a number of prayer-books, including "Selihot" (Penitential Prayers), with a commentary, Frankfort-on-the-Main, 1702; prayers for the Society for Burial, *ib.* n.d.; a prayer for the staying of the plague, Prague, 1713; and an ode on a Sefer Torah donated by Baruch Austerlitz. He also wrote an epistle directed against Nehemiah Hayyun. Cohen's ethical will, "Zawwa'ah," is replete with lofty moral instructions (Berlin, 1729).

COHEN, SAUL: African rabbi; born in Djerba, North Africa, in 1772; died there April, 1848. Although blind and very poor, he was the author of the following publications: "Netib Mizvoteka" (The Path of Thy Commandments), a work containing commentaries on the Book of Ruth and on the "Azharot" of Isaac b. Reuben and Solomon

ibn Gabirol, as well as a number of prayers and religious poems for the Feast of Weeks, etc. (Leghorn, 1841); "Sifte Renanot" (Praising Lips), a commentary on the prayers for the Days of Penitence, according to the rite of Tripoli (*ib.* 1837); "Lehem ha-Bikkurim" (Bread of the First-Fruits), a grammatical work, afterward prepared for publication by David Cohen, a grandson of the author (*ib.* 1870). His teacher, Zemaḥ Cohen, was a dayyan and the author of "Ture Zahab" (Plates of Gold), a commentary on the Song of Songs, written in 1786, and published by his grandson, Hayyim Cohen, in the work entitled "Na'awah Kodesh" (see Ps. xciii. 5), Leghorn, 1872.

COHEN, SHALOM BEN JACOB: Polish Hebraist; born at Meseritz (Mezhirychye), Poland, Dec. 23, 1772; died at Hamburg Feb. 20, 1845. Prompted by a love for learning which he could not satisfy in Poland, he went to Berlin when only seventeen. There he became friendly with the poet Wessely, who inspired him with a great passion for Hebrew poetry, which he cultivated until his death. The publication of the Hebrew literary review "Meassef" having been interrupted, Cohen undertook its continuation, and enriched it for two years with his own contributions.

In 1813 Cohen spent a short time in London, in the endeavor to found there a Hebrew school. Having failed, he returned to Germany and settled in Hamburg, where his friend Wessely resided. In 1820 Cohen was called to Vienna by the printer Anton Schmid, who was opening a Hebrew printing-office, and wanted Cohen to furnish Hebrew material. Cohen then commenced the literary review "Bikkure ha-Ittim," which counted among its collaborators the most renowned scholars of that time.

Cohen was also the author of the following works: "Mishle Agur" (Fables of Agur), a collection of fables and moral sentences in verse, with a German translation, Berlin, 1803; "Tiferet Yisrael" (Splendor of Israel), hymns for the centennial of the society Bikkur Holim at Berlin, *ib.* 1803; "Matṭa'e Kedem 'al Admat Zafon" (Oriental Plants in Northern Soil), a collection of New-Hebrew poems, with a German translation, Frankfort-on-the-Main, 1807; "Sefer Yirmeyah," a German translation of Jeremiah, with a commentary, Fürth, 1810; "'Amal we-Tirzah," an allegorical drama in three acts, adapted from "La-Yesharim Tehillah" of Moses Hayyim Luzatto, Rödelheim, 1812; "Masa Baṭawi" (Burden of Batavia), ode in praise of Holland, with a Dutch translation by H. Somerhausen, Amsterdam, 1814; "Shorshe Emunah" (Foundations of Faith), a Hebrew catechism, with an English translation by Joshua van Oven, London, 1815; "Ketaf Yosher" (Correct Writing), an aid to letter-writing in Hebrew and German, Vienna, 1820; "Ner Dawid" (Light of David), an epic poem treating of the history of David, and divided into four parts, Vienna, 1824; "Kore ha-Dorot" (He Who Calls the Generations), a history of the Jews from Maccabean times to the present, with an introduction by S. L. Rapoport, Wilna, 1837; "'Aṭeret Tiferet Sebah"

(The Hoary Head is a Crown of Glory), poems in honor of J. Isler, Hamburg, 1843.

COHEN, SOLOMON DA SILVA SOLIS: American physician; born at Philadelphia, Pa., Sept., 1857. Educated in the public schools, he graduated from the Central High School in 1872. From 1880 he studied medicine under his brother, Dr. J. da Silva Solis COHEN, and at Jefferson Medical College, from which institution he received the degree of M.D. in 1883. Since that time he has been engaged in active hospital and private practise in Philadelphia, where he still resides (1902).

Cohen was demonstrator of pathology and microscopy at the Philadelphia Polyclinic from 1883 to 1885. In 1887 he became lecturer on special therapeutics at his alma mater, and in the same year professor of clinical medicine and therapeutics at the Philadelphia Polyclinic and the College for Graduates in Medicine, a position which he held for fifteen years. In 1889 he became clinical lecturer on medicine at the Jefferson Medical College, and in the same year physician to the Philadelphia Hospital. He is also physician to the Jewish Hospital, and physician to the Rush Hospital for Consumptives. In 1890-92 he gave, by invitation, special courses of lectures on therapeutics in the medical department of Dartmouth College, Hanover, N. H., and was appointed senior assistant professor of clinical medicine in Jefferson Medical College and physician to Jefferson College Hospital in 1902.

Cohen has been president of the Young Men's Hebrew Association of Philadelphia; was one of the founders of the Jewish Publication Society of America, and a member of its publication committee. He was also one of the founders and a member of the first board of editors of "The American Hebrew"; and a founder and trustee of the Jewish Theological Seminary Association; he is a member of the board of trustees of Gratz College, Philadelphia. He has been president of the Philadelphia County Medical Society (1898-99), and is recorder of the Association of American Physicians.

He was editor of the "Philadelphia Polyclinic" from 1894 to 1899; has been on the editorial staff of "The Medical News," "The American Journal of the Medical Sciences," and "The Universal Annual of the Medical Sciences;" and is one of the editors of "American Medicine." He is author of "Therapeutics of Tuberculosis," Philadelphia, 1890, and joint

author (with A. A. Eshner) of "Essentials of Diagnosis," Philadelphia, 1892, 2d ed. 1900. He has also edited "System of Physiologic Therapeutics," 11 vols., *ib.* 1901-1902.

Besides contributing to the medical journals and encyclopedias and to the Jewish journals, Cohen has written poems and belletristic essays for the leading magazines.

COHEN, URI (PHOEBUS, FEIVUS) BEN ELIEZER LIEBERMANN: French Talmudist; died May, 1806, at an advanced age in his native city, Metz. His father was a member of the rabbinical college in that city. Phoebus also became a rabbi, and conducted a Talmudic academy there. At first he was assistant rabbi under Aryeh Löb b. Asher Günzburg. On the death of Günzburg in 1785, Cohen was appointed assistant, and in 1793 chief rabbi. Although an adherent of the old school, he joyfully hailed the success of the French Revolution in 1792, and encouraged the members of his community to participate actively in the movement. He wrote "Halakah Berurah" (Clear Law), casuistic essays on halakic and haggadic passages in the Talmud, as well as homilies, published at Metz, 1793, by his son, David Cohen, rabbi at Verdun.

COHN, ADOLPHE: American philologist; born at Paris May 29, 1851. He was graduated "bachelier ès lettres" from the University of Paris in 1868, and studied law, historical criticism, and philology at various institutions of higher learning in Paris, receiving the degrees of LL.B. in 1873, and "archiviste paléographe" (A.M.) in 1874. At the commencement of the Franco-Prussian war in 1870, he enlisted and served in the French army throughout the struggle.

Cohn went to New York May 13, 1875, and from 1876 to 1884 was the American correspondent of "La République Française," edited by Gambetta, whom he had known in France, and whose political views he had adopted. In March, 1882, Cohn was appointed tutor in French at Columbia College, and soon afterward made an instructor. By a popular vote of the French residents of New York he was chosen to deliver the funeral oration on Gambetta in 1883 at Tammany Hall, and in 1885 was called from Cambridge, Mass., for a similar purpose, upon the death of Victor Hugo.

In 1884 Cohn was made instructor in French at Harvard University. From 1885 to 1891 he was assistant professor of French at the same institution, and during this time wrote much in French and English, especially for the "Atlantic Monthly." He became American correspondent of "Le Temps" in 1884, and continued to act as such until 1895. While at Harvard he was temporary head of the French department in Wellesley College, and in 1888 and 1889 conducted a summer school of languages at Oswego, N. Y.

In 1891 Cohn was appointed professor of the romance languages and literatures at Columbia University, which position he has since occupied. He was president of the New York committee of L'Alliance Française from 1888 to 1902, and is now its honorary president. In 1897 he was made a knight of the Crown of Italy, and in 1900 a knight of the Legion of Honor of France. He has edited many French classics for educational purposes.

A. M. F.

COHN, ALBERT: French philanthropist and scholar; born in Presburg, Hungary, Sept. 14, 1814; died at Paris March 15, 1877. He belonged to an Alsatian family which had settled in Hungary during the eighteenth century. From 1824 to 1836 he

lived in Vienna, studying first in the gymnasium and afterward at the university, and receiving in 1834 the degree of doctor of philosophy. He was then chiefly interested in Oriental languages, and, through the influence of Professor Wenrich, was engaged as teacher of Hebrew in the Protestant seminary. He was introduced at the same time to the Orientalist, Baron von Hammer-Purgstall, who employed him as one of his secretaries.

Baron von Hammer-Purgstall was instrumental in forming Cohn's decision to leave Vienna, where at that time there was no hope of preferment for a Jew.

and to settle in Paris, which he did in 1836. Then began his lifelong connection with the Rothschild family. Three of the children of Baron James de Rothschild received successively from him their instruction in Hebrew and in Jewish history; and in 1839, after a year spent with his pupils in the Holy Land and in Austria, he was placed by the baron and baroness in charge of their extensive charities, a position which he held for the remainder of his life.

Cohn did much for the charity commission of the Paris community, of which he was successively treasurer and president, making it a model for similar institutions throughout Europe.

His next field of activity was among the Jews of Algeria, who suffered much through the prejudice of the French conquerors, including those in command. In 1845, and again in 1847, he visited the country, often traveling through districts where war was raging, and where the life of a European was insecure.

In Algeria. His reports, presented by him personally to King Louis Philippe and to his son, the Duke d'Aumale, led to an organization of the Jewish communities of Algeria which was destined to bring about their gradual assimilation with the Jewish communities of France.

Cohn was again in Algeria in 1860, after visiting Morocco, where matters pertaining to the Jews, which required his attention, arose from the Spanish expedition of that year. Owing to his influence with the celebrated Don Juan Prim and others, these matters were solved in a manner that was favorable to the Jewish population.

His activity in the East was equally important. He visited Jerusalem no less than five times between 1854 and 1869. His first voyage was undertaken at the request of the Consistoire Central des Israélites de France, which had been requested by Jews in every part of Europe to investigate the

condition of their coreligionists of the Ottoman empire, and to secure, through the influence of the great European powers, some alleviation of their condition. His first visit to Jerusalem

In the East. (1854) was the first visible sign to the Jews of the Holy Land that an interest in their condition was being

taken by their brothers of France, Italy, England, and Germany. Sums of money had already been sent by Sir Moses Montefiore; but Cohn was the first to see how matters really stood, and to apply the needed remedies. He was greatly helped in the performance of his task by his exceptional linguistic gifts and his deep knowledge of the idioms of the East. On this preliminary trip to the East, in the course of which he first passed through Vienna, he delivered addresses in German, Italian, Hebrew, and Arabic.

The result of Cohn's observations in Alexandria, Smyrna, Jaffa, and Jerusalem was the establishment in those places of Jewish hospitals and schools, as well as institutions for the assistance of young mothers, these organizations being supported mostly by the Rothschild family, but also by other benefactors. But Cohn's chief service to the Jewish race was performed at Constantinople on his return journey from Jerusalem. He

Interview with the Sultan. was received in private audience by Sultan 'Abd al-Majid, from whom he asked and received a promise that no improvements should be introduced in the legal conditions of the Christian subjects of Turkey which would not also apply to the Jews. Since that time Jews and Christians have enjoyed equal privileges throughout the whole of the Ottoman empire.

Cohn's energies were not, however, exhausted by the labors of charity. For years he delivered lectures on Jewish history before popular audiences; and he taught without remuneration in the Séminaire Israélite from the time of its transfer from Metz to Paris until a few months before his death. His large collection of philological works and rabbinical literature now forms a part of the library of that institution.

His coreligionists rewarded him with a seat in the Consistoire Central des Israélites de France; and the French government bestowed upon him the Cross of the Legion of Honor. He also received the Grande Médaille of the Société Française pour l'Encouragement au Bien.

COHN, FALK: German rabbi; born at Dessau Sept. 18, 1833; died at Bonn March 6, 1901. The son of a rabbi and teacher at the Herzogliche Franzschule at Dessau, he began the study of the Talmud in his early youth. After his matriculation he studied philology and philosophy at Berlin, where he also continued his Talmudic studies. In 1860 he received the degree of Ph.D. from the University of Leipsic, his thesis being "Philosophisch-kritische Abhandlung über den Schlussvers des Zweiten Buchs der Psalmen."

After officiating for five years as preacher and religious teacher at Waren, Mecklenburg, he went in 1867 to Bielitz, Austrian Silesia, as director of the Jewish communal school there. Five years later he became preacher at Oels, where he officiated until 1882. In that year he was appointed rabbi at Bonn, where he remained until his death.

Cohn contributed several essays to periodicals; and many of his sermons have been printed. His chief works are "Jüdische Religionsschulen Neben Höheren Lehranstalten," Breslau, 1878; "Zur Frage über die Arbeitsüberbürdung der Schüler und Schülerinnen Höherer Lehranstalten," 1881; "Die Disciplin in den Jüdischen Religionsschulen," Oels, 1881.

COHN, FERDINAND JULIUS: German botanist and zoologist; born in Breslau Jan. 24, 1828; died there June 25, 1898; eldest son of Isaac Cohn, an oil manufacturer, who for some time held the post of Austro-Hungarian consul, and brother of Oscar Cohn, a popular humorist and playwright whose pen-name was "Oscar Justinus," and of Max Conrad Cohn, a distinguished jurist.

Cohn studied at the gymnasium and University of Breslau, and obtained his Ph.D. degree in 1847 at Berlin. His dissertation was a study of the physiology of seeds. In it he advocated the establishment of botanical gardens for the study of the physiology of plants—a wish that he was destined to see realized largely through his own efforts. He returned to Breslau in 1848, and remained there till his death. On a dissertation, "De Cuticula," he was admitted as privat-docent in Oct., 1850; but, being a Jew, a year elapsed before he was allowed to take the oath and to teach. He received the title of professor in 1857, and two years later (1859) was

appointed assistant professor. In 1872 he became professor, and was called to fill the chair vacant through the death of his old teacher, friend, and collaborator, Goeppert.

In 1888, upon the opening of the Botanical Institute, which was built mainly through his untiring endeavors, he received the title of "Geheimer Regierungsrath." On the occasion of his seventieth birthday he was presented with the honorary freedom of the city of Breslau.

Cohn's work gained universal appreciation during his lifetime. He was elected a member of the following institutions and societies: Leopold-Carolinische Akademie, Royal Academy of Sciences of Berlin, Société de Biologie de France, the Royal Microscopic Society of Great Britain, the Natural History Society of Boston, U. S. A., etc. Cohn was buried in the row of honor in the Jewish cemetery of Breslau. Though not an observing Jew, he and his wife belonged to several Jewish societies.

Cohn was a prolific writer; leaving behind him over 150 papers, essays, and books, of which the following may be mentioned: "Zur Naturgeschichte des Protococcus Pluvialis," Bonn, 1851; "Die Menschheit und die Pflanzenwelt," Breslau, 1851; "Der Haushalt der Pflanzen," Leipsic, 1854; "Untersuchungen über die Entwicklungsgeschichte der Mikroskopischen Algen und Pilze," Bonn, 1854; "Neue Untersuchungen über Bakterien," *ib.* 1872-75; "Die Pflanze," Leipsic, 1882. Cohn was also the founder and (from 1875 to his death) the editor of the "Beiträge zur Biologie der Pflanzen."

COHN, GEORG LUDWIG: German jurist; born Sept. 19, 1845, at Breslau, Germany. He was honorary professor in German civil and commercial law at the Heidelberg University (1888). He collaborated with other scholars in compiling Endemann's "Handbuch des Handels-See- und Wechselrechts" (1881-85), and founded the "Zeitschrift für Vergleichende Rechtswissenschaft," of which he has been editor since 1877. At present Cohn holds a professorship at the University of Zurich; lecturing on German civil and commercial law and the law of exchange and on the history of German and Swiss law.

Cohn has published "Quid Intersit Inter Civitatem Confœderatam et Confœderationem Civitatum ex Constitutionibus Germaniæ, Helvetiæ, Americæ Septentrionalis Exponitur," a prize essay, Greifswald, 1868; "Die Justizverweigerung im Alt-

deutschen Rechte," Carlsruhe, 1876; "Beiträge zum Einheitlichen Wechselrecht," in "Festgabe für Bluntschli," Heidelberg, 1880; "Zur Gesch. der Checks," in "Zeit. für Vergleichende Rechtswissenschaft," 1878, 1879; "Zur Lehre vom Check," *ib.* 1878, 1880; "Ueber International Gleiches Recht," in "Wiener Juristische Blätter" (has been translated into Italian by Vita Levi in vol. ii. of "Rassegna di Diritto Commerciale Italiano e Straniero"); "Der Entwurf eines Deutschen Checkgesetzes," in Hildebrand's "Jahrbuch für Nationalökonomie," 1879; "Der Entwurf einer Wechselordnung für das Russische Reich und die Neueren Wechselgesetze Belgiens, Italiens, Ungarns, Grossbritanniens, Skandinaviens, und der Schweiz," in "Zeitschr. für Vergleichende Rechtswissenschaft," 1883, iv. 1, 226; "Der Internationale Kongress für das Sogenannte Industrielle Eigenthum zu Paris," *ib.* 1880, ii. 105-130; "Das Neue Deutsche Recht in Sprüchen," 1896; 2d ed. 1899; and "Gemeinschaft und Hausgenossenschaft," 1898.

B. B.

COHN, GUSTAV: German economist; born Sept. 12, 1840, at Marienwerder, West Prussia. He studied at the universities of Berlin and Jena. During 1867 and 1868 he was the holder of a fellowship at the Royal Statistical Bureau of Berlin, and in 1869 became privat-docent at the University of Heidelberg, but in the same year accepted an invitation from the Polytechnikum at Riga. Cohn paid a visit to England in 1873, and the fruits of his observation and research were embodied in the masterly production "Untersuchungen über die Englische Eisenbahnpolitik," 2 vols., Leipsic, 1874-75. In 1875 he was invited to fill the chair of economics at the Eidgenössisches Polytechnikum at Zurich, which he held until 1884, when he became professor in the University of Göttingen, where he has since remained.

While at Zurich he prepared for publication his "Volkswirtschaftliche Aufsätze" (Stuttgart, 1882), and contributed to the "Göttingische Gelehrte Anzeigen" (1880, i. 97-135) an exhaustive critical review of the first volume of Wagner's "Allgemeine Volkswirtschaftslehre." The names of Wagner and Cohn have often been coupled, not only because both were classed among the Katheder-Socialisten, but also because they have much in common in their attitude toward the various so-called schools of economic science. In continuation of his study of the English railroad policy, and as the third volume of his earlier work on that subject, appeared his "Die Englische Eisenbahnpolitik der Letzten Zehn Jahre," Leipsic, 1883.

After his establishment at Göttingen a period of ardent literary activity set in. The first volume of the greatest work which he has yet produced, his "System der Nationalökonomie," was published in 1885, the very next year after his arrival. It is significant of the importance and character of this work that two such great leaders of the respective opposing "schools" as Wagner and Schmoller should unite in praising it.

In 1886 he contributed to the "Jahrbuch für Na-

tionalökonomie" (vol. xiii., No. 6), "Zur Fabrikgesetzgebung," a review of government reports on factory legislation in Switzerland and Saxony, and to the "Jahrbuch für Gesetzgebung" (x. 3), "Erörterungen über die Fiskalische Behandlung der Verkehrsanstalten." In that year, too, appeared his "Nationalökonomische Studien," Stuttgart, 1886.

The year 1889 witnessed the publication of the second volume of his "System der Nationalökonomie," and his "Finanzwissenschaft."

Cohn was elected a regular member of the Gesellschaft der Wissenschaften at Göttingen in 1894; and in 1896 the Prussian Order of the Red Eagle of the fourth class was conferred upon him. After an interval of nearly ten years he completed the third volume of the "System der Nationalökonomie," which was also issued under the title "Nationalökonomie des Handels- und Verkehrswesens: Ein Lesebuch für Studierende," Stuttgart, 1898. To the "Jahrbuch für Nationalökonomie" (vi., Jan., 1901) he contributed "Ueber die Vereinigung der Staatswissenschaften mit den Juristenfacultäten."

M. Co.

COHN, HERMANN L.: German ophthalmologist; born at Breslau June 4, 1838. After graduating from the gymnasium of his native town he studied chemistry and physics at the University of Heidelberg under Bunsen, Kirchhoff, and Helmholtz, and at the University of Breslau, receiving the degree of doctor of philosophy in 1860. In the same year he commenced the study of medicine at the University of Breslau, obtaining his M.D. degree from the University of Berlin in 1863.

From 1863 to 1866 Cohn was assistant to Förster, settling in Breslau in the latter year as an ophthalmologist. In 1868 he was admitted to the university as privat-docent with the inaugural essay "Ueber Xerosis Conjunctivæ," and was elected assistant professor in 1874. In 1883 he received the state's gold medal in hygiene.

Cohn noticed that many pupils in the schools of Germany were obliged to wear glasses at an early age. As an oculist he became interested in the matter, and tracing the source of the evil back to the schools, gave special attention to their hygienic conditions in relation to ophthalmology. Most of Cohn's writings treat of this branch of medicine, in which he achieved great results. The following list of works affords an insight into his labors: "Untersuchungen der Augen von 10,060 Schulkindern Nebst Vorschlägen zur Verbesserung der den Augen Nachtheiligen Schuleinrichtungen," Leipsic, 1867; "Schussverletzungen des Auges," Erlangen, 1872; "Die Schulhäuser und Schultische auf der Wiener Weltausstellung," Breslau, 1873; "Die Schul Hygiene auf der Pariser Weltausstellung," *ib.* 1879; "Studien über Angeborene Farbenblindheit," *ib.* 1879; "Die Hygiene des Auges in den Schulen," Vienna, 1883 (translated into English by Turnbull,

London, 1886, and into Russian by Medem, Pultawa, 1887); "Ueber den Einfluss Hygienischer Massregeln der Schulmyopie," Breslau, 1890; "Lehrbuch der Hygiene des Auges," Vienna, 1892 (his greatest work); "Dreissig Jahre Augenärztlicher und Akademischer Lehrthätigkeit," Breslau, 1897; "Schleisungen von 50,000 Breslauer Schulkindern," *ib.* 1899; "Wie Müssen Bücher und Zeitungen Gedruckt Worden?" *ib.* 1902. He died Sept. 12, 1906.

Cohn was a very prolific writer, and contributed nearly 250 essays on ophthalmology and hygiene to medical and other journals.

F. T. H.

COHN, LASSAR (known also as **Lassar-Cohn**): German chemist; born at Hamburg Sept. 6, 1858. After attending the gymnasium at Königsberg, he studied chemistry at different universities, taking his doctor's degree in 1880. He worked for a number of years in various chemical establishments; delivered public lectures in Munich; became privat-docent at Königsberg in 1888; and was appointed professor in 1894.

His works, published under the name "Lassar-Cohn," include: "Arbeitsmethoden für Organisch-chemische Laboratorien," 3d ed., 1902; "Moderne Chemie," twelve lectures to physicians, 1891; "Die Chemie im Täglichen Leben," 5th ed., 1903 (also translated into many European languages, and into Hebrew); "Einführung in die Chemie in Leichtfasslicher Form," 2d ed., 1903; "Praxis der Harnanalyse," 2d ed., 1898; "Die Säuren der Rinder- und Menschengalle," 1898; "Die Chemische Industrie," being vol. vii. of "Das Buch der Erfindungen, Gewerbe, und Industrien"; and a revised edition of Stöckhardt's "Schule der Chemie." He has also contributed to the "Berichte der Deutschen Chemischen Gesellschaft," "Annalen der Chemie," and the "Zeitschrift für Physiologische Chemie." S.

COHN, LÉON: French statesman; born in Paris March 11, 1849; second son of Albert Cohn. His early training was received at the Lycée Bonaparte in Paris. In 1866 he took the degree of "bachelier ès lettres," and three years later that of "licencié en droit." Though admitted to the bar, he soon abandoned the legal profession for a political career. In 1870 he was chosen as private secretary by Jules Simon, then minister of public instruction. On Jules Simon's retirement from public life Cohn became the editor of the "Correspondance Républicaine."

In 1876, when the cabinet of Jules Simon was reconstructed, Cohn returned to office as his "chef de cabinet," a position which he held until the dismissal of the Republican ministry by President MacMahon, May 16, 1877.

On the return of the Republicans to power, in Dec., 1877, Cohn was appointed prefect of the department of Loire-et-Cher, and afterward occupied a similar position in the departments of Somme, Haute-Garonne, and Loire. In 1896 he became paymaster-general of the department of Ardennes, from which he was transferred a few years later to the department of Eure. He died January 13, 1911. S.

COHN, LEOPOLD: German author and philologist; born Jan. 14, 1856, at Zempelburg, province of West Prussia. He received his education at the gymnasium at Culm, West Prussia, and at the University of Breslau, whence he was graduated as doctor of philosophy in 1878. In 1884 he became privat-docent at the Breslau University, in 1889 was appointed librarian, and in 1897 received the title of professor.

On Greek literature Cohn has written: "De Aristophane Byzantio et Suetonio Tranquillo Eustathi Auctoribus," Leipsic, 1881; "Untersuchungen über die Quellen der Plato-Scholien," Leipsic, 1884; "De Heraclide Milesio Grammatico," Berlin, 1884; "Zu den Paroemiographen," Breslau, 1887; and "Zur Handschriftlichen Ueberlieferung, Kritik und Quellenkunde der Paroemiographen," Leipsic, 1892.

To Jewish literature he has contributed the following: "Philonis Alexandrini Libellus de Opificio Mundi," Breslau, 1889; "Philonis Alexandrini Opera quæ Supersunt" (with Paul Wendland), vol. i., Berlin, 1896; vol. ii., *ib.* 1897; vol. iii., *ib.* 1898; vol. iv., *ib.* 1902.

He has contributed to the "Jewish Quarterly Review" (Oct., 1892) "The Latest Researches on Philo of Alexandria," and (*ib.* 1898) "An Apocryphal Work Ascribed to Philo of Alexandria"; to the "Neue Jahrbücher für Classisches Altertum" (1898, pp. 514-540) "Philo von Alexandria"; and to "Philologus" (1899, Supplement vii., pp. 387-436) "Einteilung und Chronologie der Schriften Philos." Cohn is the author of the essay on "Griechische Lexikographie," in "Handbuch der Klassischen Altertumswissenschaft," 3d ed., ii., part i., Munich, 1900. He has also contributed articles on Greek grammarians to Pauly-Wissowa's "Real-Encyclopädie der Classischen Altertumswissenschaft."

s. F. T. H.

COHN, LUDWIG ADOLF: German historian; born in Breslau May 22, 1834; died in Göttingen Jan. 13, 1871. He belonged to a prominent family of merchants. Physically deformed as the result of an illness in childhood, he was taught by his mother till he was over eight years of age, when he went to the Magdalen Gymnasium. He entered Breslau University in 1851, and Berlin University in 1853. About this time he was stricken with a serious illness. During his slow recovery at Breslau he attended lectures by Mommsen and Junckmann, and he took his degree at the university of that city in 1856. Cohn embraced Christianity, and in 1857 became a privat-docent at Göttingen University, where he taught till his death.

His principal works, which are characterized by wide reading, keenness of criticism, and fairness of spirit, are: "Die Pegauer Annalen aus dem 12. und 13. Jahrhundert," Altenburg, 1858; "Der 30jährige Krieg," Halle, 1861; "Ein Deutscher Kaufmann aus dem 16. Jahrhundert," Göttingen, 1862; "Stammtafeln zur Geschichte der Deutschen Staaten und der Niederlande," 1864-65 (his principal work); "Geschichte Kaiser Heinrich II.," Halle, 1867; besides which he contributed many historical articles to periodicals.

COHN, MARTIN. See MELS, A.

COHN (KOHN), MESHULLAM SOLO. MON: German rabbi; born about 1739; died at Fürth Dec. 17, 1819. After having spent a few years in the yeshibot of Posen and Zülz, Cohn went to the yeshibah of Jonathan Eybeschütz in Altona, from whom he received his rabbinical diploma. His first rabbinate was in Rawitsch, where he opened a small Talmudical college. He was then rabbi successively in Krotoschin, Zülz, Kempten, and Fürth, following at the last-named place R. Hirsch Janow on the death of the latter in 1785.

In 1800 Cohn was one of the signers of an act of accusation against the Frankists of Offenbach (see "Monatsschrift," xxvi. 239); and in 1811 he put under the ban the rabbi of Cassel, Löw Berlin, because the latter permitted the eating of "Hülsenfrüchte" (poddled vegetables, etc.) on the Passover (compare "Monatsschrift," xxii. 192).

Of Cohn's works may be mentioned: "Sefer Bigde Kehunnah" (Garments of Priesthood), responsa, Fürth, 1807, the second part of which contains novellæ to Baba Mezi'a and Giṭṭin; "Sefer Mish'an ha-Hayyim" (Prop of the Waters; see Isa. iii.), haggadic treatises, *ib.* 1811; "Nahlat Abot" (Portion of the Fathers), homilies, *ib.* A special edition of the sermon preached by Cohn on his completing the study of the treatise Giṭṭin, was published at Fürth in 1791; and is now one of the rarities of the Frankfurt Stadtbibliothek (Anct. Hebr. No. 2297).

Cohn's son Solomon was rabbi in Schnaittach, Mergentheim (1801-11), and in Zülz, where he died April 1, 1824.

L. L.

COHN, MORITZ (pseudonym, **Conimor**): Austrian writer; born at Kreuzburg, Silesia, Jan. 8, 1844. Educated at the high school of Brieg, he began life as a clerk in a merchant's office, devoting his spare time to writing. After some of his plays had met with success, he abandoned commerce and settled down at Vienna (1875) as an author, and has written the following: "Der Improvisator," drama, 1874; "Vor der Ehe," drama, 1876; "Ein Ritt Durch Wien," a satirical poem, 1876; "Eine Visitenkarte," drama, 1877; "Der Goldene Reif," drama, 1878; "In Eigener Falle," drama, 1881; "Im Lichte der Wahrheit," drama, 1882; "Wie Gefällt Ihnen Meine Frau," a novel, 1886; "Der Beste Gegner," drama, 1892. Cohn is a prolific contributor to the press.

COHN, OSKAR JUSTINUS (also known as **Oskar Justinus**): German writer; born at Breslau Feb. 21, 1839; died at Bad Nauheim Aug. 6, 1893. Educated for a mercantile career, he succeeded his father as head of the Breslau firm founded by the elder Cohn. He was not successful as a merchant, and went into bankruptcy in 1880. Like his father and brothers, he had scientific and literary inclinations. Taking up his residence in Berlin, he turned his attention to literature. In 1861 his first dramatic effort, "Der Vereins-Held," was produced

in Breslau. Cohn wrote the following comedies: "Die Getreidespekulanten," 1876; "Eine Episode aus den Pickwickiern," 1876; "Zu Spät," 1877; "Oel und Petroleum," 1877; "Der Letzte Termin," 1877; "Die Gründung aus Liebe," "Unser Ziegeuner," and "Eine Stille Familie," 1878; "Das Vierte R!," 1879; "Drei Trotzköpfe," 1880; "Gesellschaftliche Pflichten" (with H. Wilken), 1881; "Apfelröschen," 1883; "Penelope" and "Kommerzienrat Königsberger," 1883; "Ein Photographiealbum," 1885; "Kyritz-Pyritz" (with H. Wilken) and "Griechisches Feuer," 1887; "Die Liebesprobe" and "Humoristisches Kleeblatt," 1888; "In der Kinderstube," 1889. He also wrote "Der Bauherr," a tragedy, 1877, and the following novels: "Amor auf Reisen," 1888; "Berliner Humor, Auf Rollendem Rade," 1889; "In der Zehnmillionen Stadt," 1890; "Italienischer Salat," 1892; "Ein Proletarierkind," 1893; "Häuslicher Bilderbogen" (published after his death), 1894.

COHN, RUDOLF: German physiologist; born at Schneidemühl, Posen, Germany, April 23, 1862. He received his education at the Kneiphöf'sche Gymnasium and at the University of Königsberg, graduating as doctor of medicine in 1886. In the same year he became assistant at the laboratory of medical chemistry and pharmacology at Königsberg. In 1892 he was admitted to the medical faculty of his alma mater as privat-docent, and in 1898 received the title of professor.

Cohn has published several essays on chemical physiology in "Zeitschrift für Physiologische Chemie," "Archiv für Experimentelle Pathologie," and "Berichte der Berliner Chemischen Gesellschaft." Since 1893 he has been the editor of the chemical department of Hermann's "Jahresberichte für Physiologie."

F. T. H.

COHN, SAMUEL: German political economist; born at Bromberg 1862; died in Berlin July 30, 1900. He attended the Joachimsthal-Gymnasium, and studied philology and history at Berlin University, where he took the degree of Ph.D. After graduating he turned his attention to economics. His introduction to journalism took place when he joined the staff of the Oldenburg "Korrespondenz," and from about 1889 he contributed frequently to Berlin newspapers and periodicals. For a number of years he acted as secretary to Friedrich Goldschmidt in his economic researches and studies. Toward the close of his life Cohn was editor of the "Oekonomist." His work, "Die Finanzen des Deutschen Reiches seit seiner Begründung" (Berlin, 1899), is the result of a number of years of labor, and is marked by the clear arrangement and the abundance of its material.

COHN, SOLOMON: German rabbi; born at Zülz, Prussian Silesia, March 24, 1822; died in Breslau Sept. 22, 1902. He was a grandson of Rabbi Meshullam Solomon Cohn of Fürth. Solomon Cohn attended the yeshibah at Presburg for a short

time, and then the gymnasium and university at Breslau. At the latter institution he studied Oriental languages and philosophy, and received the degree of Ph.D.

In 1847 Cohn was called as rabbi to Oppeln, then to Maestricht, Schwerin, and in 1876 to Berlin; he retired in 1894 to Breslau. Cohn married the eldest daughter of the chief rabbi Ettlinger of Altona, who often mentions him in his responsa, "Binyan Zion." From 1878 to 1894 he lectured on homiletics at the Orthodox rabbinical seminary of Berlin.

A. F.

COHN, TOBIAS: Polish physician; born at Metz, Germany, 1652; died at Jerusalem 1729. His grandfather was the physician Eleazar Kohn, who emigrated from Palestine to Poland, and settled

Tobias Cohn.

(From the frontispiece of his "Ma'aseh Tobiyah," 1707.)

in Kamenetz-Podolsk, where he practised medicine until his death. His father was the Polish physician Moses Kohn of Narol, in the district of Bielsk, who moved to Metz in 1648 to escape persecution during the Cossack revolution. Tobias and his elder brother returned to Poland after the death of their father in 1673. He received his education at Cracow and the universities of Frankfort-on-the-Oder (at the expense of the great elector of Brandenburg) and Padua, graduating from the latter as doctor of medicine. He practised for some time in Poland, and removed later to Adrianople, where he became physician to five successive sultans—Mohammed IV., Sulaiman II., Ahmad II., Mustapha II., and Ahmad III., moving with the court to Constantinople. In 1724 he went to Jerusalem, where he lived until his death.

Cohn was familiar with nine languages—Hebrew, German, Italian, French, Spanish, Turkish, Latin, Greek, and Arabic. This great linguistic knowledge made it possible for him to write his "Ma'aseh Tobiiyyah" (Work of Tobias), published in Venice in 1707, and reprinted there in 1715, 1728, 1769, and 1850. The work is encyclopedic, and is divided into eight parts: (1) theology; (2) astronomy; (3) medicine; (4) hygiene; (5) syphilitic maladies; (6) botany; (7) cosmography; and (8) an essay on the four elements.

The most important is the third part, which contains an illustration showing a human body and a house side by side and comparing the members of the former to the parts of the latter (see illustration).

In part 2 are found an astrolabe (see JEW. ENCYC. ii. 244) and illustrations of astronomical and mathematical instruments. Inserted between parts 6 and 7 is a Turkish-Latin-Spanish dictionary; and prefixed to the work is a poem by Solomon Conegliano.

Cohn's medical knowledge and experiences seem to have been of considerable importance. He gave, from his own observations, the first description of the "plica polonica," as well as many local symptoms and newly discovered medicinal herbs. He also published in three languages a list of remedies.

He criticized the anti-Jewish professors of Frankfurt-on-the-Oder as well as his coreligionists who were devoted to Cabala and committed to a blind belief in miracles.

F. T. H.

COHN, TOBIAS: German rabbi and writer; born at Hammerstein, West Prussia, Feb. 2, 1826. After graduating from the normal school, he conducted the Jewish elementary school of his native city until 1846. He then continued his studies at Berlin, where he received his doctor's degree in 1857. During this time he was living in the house of Sarah Levy (née Itzig), then the gathering-place for the

Jewish and Christian celebrities of Berlin. From 1857 to 1896 he officiated as preacher and rabbi of the community of Potsdam. With his wife, the daughter of Ludwig Philippson, he then took up his residence in Berlin.

Cohn is an honorary member of the Literarische Gesellschaft, a society composed of the intellectual leaders of Potsdam, and has been decorated with the Order of the Red Eagle. His larger works include: "Der Talmud" (1866); "Die Mosesgruppe von Rauch"; "Die Humanitätsperiode"; "Die Aufklärungsperiode"; "Die Araber im Chalifat";

"Israels Gemeinschaftsleben mit den Vorchristlichen Völkern" (1893). He also contributed many scientific essays to the "Allgemeine Zeitung des Judenthums," Geiger's "Jüdische Zeitschrift für Wissenschaft und Leben" (iv.), "Jahrbuch für die Geschichte der Juden und des Judenthums" (iv.), "Aus Alten Zeiten und Landen," "Im Deutschen Reich," etc.

s.

P. R.

COHN, TOBY: German physician and medical author; born at Breslau Dec. 26, 1866. Cohn was educated at the Elisabeth gymnasium of his native city and at the universities of Breslau and Freiburg. From Sept., 1891, to Jan., 1893, he was an assistant at Wernicke's university clinic for neuropathy, and

has since been assistant to Mendel at Berlin. Cohn is the author of "Klinischer Beitrag zur Kenntniss des Wasserverlaufs im Verlängerten Mark," 1894; "Infantile Hemiplegie mit Intentionstremor," 1895; "Posthemiplegische Bewegungsstörung," 1896; "Zur Symptomatologie der Gesichtslähmung," 1897; "Facialistik als Beschäftigungsneurose," 1897; "Die Mechanische Behandlung der Beschäftigungsneurosen," 1898; and "Leitfaden der Electrodiagnostik und Electrotherapie für Praktiker und Studierende," 1899.

COHNFELD, ADALBERT DOROTHEUS

SOLOMON: German author; born in Pyritz, Pomerania, Aug. 3, 1809; died in Berlin Jan. 20, 1868. He lived in Breslau during the earlier part of his life, and became a physician, but was best known as the editor of the "Norddeutsche Zeitschrift für das Theater" and of the "Erinnerungsblätter." He published: "Phantasmagorien," Berlin and Züllichau, 1837, and "Die Hospitalitäten," Berlin, 1838, both novels; "Ausführliche Gesch. des Preussischen Staates," 2 vols., *ib.* 1840; "Ausführliche Lebens- und Regierungsgesch. Friedrich Wilhelm III." *ib.* 1840-41; "Die Rückkehr des Landwehrmanns," a comedy.

N. D.

COHNHEIM, JULIUS: German pathologist; born at Demmin, Pomerania, July 20, 1839; died in Leipzig Aug. 15, 1884. He studied at the universities of Würzburg, Marburg, Greifswald, and Berlin, receiving his doctor's degree at Berlin in 1861. After taking a postgraduate course in Prague, he returned to Berlin in 1862, where he practised until 1864, when he took service as surgeon in the war against Denmark. In the fall of the same year he became assistant at the pathological institute of Berlin University under Virchow, remaining there until 1868. During this time he published several articles relating to physiological chemistry and histology, but finally turned his especial attention to pathological anatomy. In 1867 there appeared in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin" (xli.) Cohnheim's essay, "Ueber Entzündung und Eiterung," which made his reputation as a pathologist. In it he proved that the emigration of the white blood-corpuscles is the origin of pus, a statement which produced a great revolution in pathology. In 1868 Cohnheim was appointed professor of pathological anatomy and general pathology in the University of Kiel; and four years later (1872) he went to the University of Breslau to fill a similar position. His work there was interrupted in the winter of 1873-74 by illness. In 1876 he accepted an invitation to become professor of pathology in the University of Leipzig, which chair he occupied until his death.

Cohnheim was the first to use the now universal method of freezing fresh pathological objects for examination; he also first demonstrated nerve-termination in "Cohnheim's areas" (polygonal areas indicating the cut ends of muscle-columns, seen in the cross-sections of striated muscle-fiber); he was the

pioneer in the theory of inflammation, which is now universally accepted; and his researches in the field of pathological circulation and the causes of embolism marked a new departure in the methods of medical treatment.

Aside from his literary and experimental activity, Cohnheim was both popular and successful as a teacher.

Among his many works may be mentioned: "Ueber die Entzündung Seröser Häute," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," xxvii.; "Zur Kenntniss der Zuckerbildenden Fermente," *ib.* xxviii.; "Ein Fall von Abscessen in Amyloid Entarteten Organen," *ib.* xxxiii.; "Ueber die Endigung der Muskelnerven," *ib.* xxxiv., and in the "Centralblatt der Medizinischen Wissenschaften," 1863; "Ueber den Feineren Bau der Quergestreiften Muskelfasern," *ib.* xxxiv. (demonstration of the "Cohnheimsche Muskelfelder" by freezing fresh muscles); "Zur Pathologischen Anatomie der Trichinen-Krankheiten," *ib.* xxxvi.; "Ueber die Endigung der Sensiblen Nerven in der Hornhaut," *ib.* xxxviii. (demonstration of the termination of the nerves in the cornea through treatment with chlorid of gold); "Ueber Entzündung und Eiterung," *ib.* xli. (mentioned above); "Ueber Venöse Stauung," *ib.* xli.; with Bernhard Fränkel, "Experimentelle Untersuchungen über die Uebertragbarkeit der Tuberkulose auf Thiere," *ib.* xlv.; "Untersuchungen über die Embolischen Processe," Berlin, 1872; "Neue Untersuchungen über die Entzündung," *ib.* 1873; "Vorlesungen über Allgemeine Pathologie," *ib.* 1877-80, 2d ed. 1882; "Die Tuberkulose vom Standpunkt der Infectionslehre," Leipzig, 2d ed., 1881. His collected works ("Gesammelte Abhandlungen," Berlin, 1885) were edited by E. Wagner, with a biography by Kühne.

COHNHEIM, PAUL: German physician; born at Labes, in Pomerania, Dec. 2, 1867. He was educated at the gymnasium at Stettin and the universities of Berlin, Freiburg in Baden, Tübingen, and Würzburg, being graduated from the last-named as doctor of medicine in 1891. He settled in Berlin as a physician the same year, and till 1899 was assistant physician at the Boas private hospital. Since 1899 he has continued in practise as a physician, treating mainly diseases of the digestive organs.

Cohnheim is the editor of the yearly literary reports in "Archiv für Verdauungs-Krankheiten."

COHNSTEIN, ISIDOR: German gynecologist; born at Gnesen, province of Posen, Prussia, Aug. 1, 1841; died at Charlottenburg, near Berlin, July 25, 1894. He received his education at the gymnasium of his native town and at the universities of Berlin, Prague, and Heidelberg, being graduated as doctor of medicine in 1864. In 1866 he engaged in practise as a physician in Berlin, where he was admitted to the university as privat-docent in 1868. Three years later he gave up general practise, and became a

specialist in gynecology. Resigning his position in the university, he in 1877 removed to Heidelberg, where he established himself as a gynecologist.

Cohnstein has written several essays and books, especially on gynecology. Among these the following may be mentioned: "Ueber den Muskeltonus" (awarded a prize by the Brussels Academy); "Ueber Alte Erstgebärende"; "Ueber ein Neues Perforationsverfahren"; "Ueber Vaginitis Exfoliativa"; "Lehrbuch der Geburtshilfe"; "Grundriss der Gynäkologie."

COIMBRA: City of Portugal, capital of the province of Beira, in which there was formerly a "Juderia," or Jewish quarter, now called "Corpo de Deus." In April, 1395, the prior of the church in Coimbra and several of the clergy broke into the Jewry in order to obtain eggs (for Easter) from the Jews. The local rabbi, Solomon Catalan, the elder Isaac Passacom, and other Jews intimated to the priests that they had no right to demand eggs of the Jews, who were living in the street set apart for them. Upon this the clericals resorted to force, and broke into the house of a Jew named Jacob Alfayate. The Jews resisted and drove the importunate clericals out of the ghetto. The king protected them from further annoyances at the hands of the clergy.

Coimbra, the seat of the only Portuguese university, at which many Maranos studied, had a tribunal of the Inquisition, which, during several centuries, instituted numerous autos da fé and sentenced many secret Jews to life imprisonment or to be burned alive. Coimbra was the birthplace of Moses ibn Daon, who in 1510 wrote a Talmudic work at Fez.

COLCHESTER: County town of Essex, England. Jews are first mentioned as living in Colchester in 1185, and it is probable that they were involved in the massacre of 1190. The community was evidently of some importance, as it was ninth in the amount of its contribution toward the ransom of Richard I. in 1194. The community had in 1220 a special bailiff, probably for the purpose of collecting the taxes imposed upon it. In 1220 this officer was one Benedict. An agreement dated 1258, relative to the Colchester Jewry in Stockwell street, was transcribed by W. Bedwell in Roman letters, from which it was retransliterated into Hebrew by Neubauer ("Rev. Et. Juives," v. 247). In 1267 a curious incident occurred when several Jews and Christians were involved in an infringement of the forest laws. They had started and chased a doe in the woods in the neighborhood of Colchester. They were severely fined, the Jews more heavily than the others. One of the Jewish offenders escaped to Lincoln, but returned ten years later, when a portrait of him was drawn upon the Forest Roll by the scribe

who had described his offense (see *AARON, SON OF THE DEVIL*). The king claimed sole jurisdiction over the Jewry of Colchester, and when he granted the castle to Guy of Rochfort, he reserved the right to enter the town and hundred of Colchester to search for Jews' debts. When the Jews were expelled in 1290, nine houses and a "schola" of the Jewry escheated to the king, from which it may be assumed that the community of Colchester stood about seventh in order of importance at that time.

COLENZO, JOHN WILLIAM: Bishop of Natal and English Biblical critic; born at St. Austell, Cornwall, Jan. 24, 1814; died Jan. 20, 1883. He was educated at St. John's College, Cambridge. After obtaining his degree Colenso passed some time as a teacher at Harrow, where he produced his well-known school-books on arithmetic and algebra. He became Bishop of Natal in 1853. For the purposes of his mission to the Zulus he mastered their language. He wrote and published a Zulu grammar, and translated into that language the books of Genesis, Exodus, and Samuel.

During the course of his translation he was much troubled by inquiries from the intelligent Zulus whom he used as interpreters as to the discrepancies in the different narratives contained in Genesis and Exodus. This led him to write his "Pentateuch and Book of Joshua Critically Examined," of which the first part appeared in 1862, and created great excitement in the theological world. Colenso drew attention to the arithmetical difficulties attached to the acceptance of the Biblical estimate of the number of fighting men (600,000) who left Egypt at the time of the Exodus, since this number assumes a population of over two millions. Colenso's early studies enabled him to realize the difficulties of commissariat involved in the movement of such large numbers. He was ultimately led to deny the Mosaic authorship of the Pentateuch, and to declare that Jeremiah was the author of the Book of Deuteronomy. He was deposed by the Bishop of Cape Town for heresy in 1863, but the act of deposition was not confirmed by the Privy Council, and Colenso remained Bishop of Natal to his death.

His work, the later parts of which show considerable advance on the somewhat crude views expressed in the earlier portions, was concluded by the publication of part seven in 1879. He was for a long time the solitary English representative of the higher criticism, and was thereby exposed to much obloquy. The well-known "Speaker's Commentary" was projected mainly in order to combat his views. These created great interest in Jewish quarters, and were answered by Dr. H. Adler and Dr. A. Benisch.

COLLAR: 1. A rendering in Judges viii. 26 of the Hebrew word *נְטִיפֹת*. In the other passage (Isa. iii. 19) in which it occurs it is translated "chains." In both cases the word is used in the enumeration of ornaments: in Isaiah of the Jewish women, and in Judges of the Midianite kings. The root (*נָטַף*)

means "to drop," and the word may therefore mean "drops," "pendants from the ears," etc. Targum to Judges renders it by כְּלִילָה, which Jastrow, *s. v.*, translates "wreaths," "crowns." Rashi, as is his wont, agrees with the Targum; understanding by it, however, pendants falling upon the breast, as a string of pearls (see Rashi on Isa. iii. 19, where he interchanges עֵינָיִם and כְּלִילָה). Kimhi, starting from the root "drop," finds in "naṭifah" the idea "dropper," which he interprets to mean a bottle in which perfume was carried, and from which it was dropped as occasion required. Gersonides agrees with Kimhi.

2. A rendering, in Job xxx. 18, of the Hebrew word כַּפִּי (כָּפִי) where, however, the translation is scarcely warranted. The reference is merely to an opening for the head in a garment, and does not imply the elaborate idea conveyed by the word "collar" (Ex. xxviii. 32). The same word is found in Ps. cxxxiii. 2, where it indicates the top edge of the garment.

COLLINS, CHARLOTTE (Lottie): Anglo-American actress; born in London, England, about 1865. She began her stage career at the age of five, when she made her début as a rope-dancer. Having lost both her parents while still a child, she joined her sisters, Marie and Lizzie Collins, singing and dancing with them at various music-halls. In 1890 she became famous for the song entitled "Ta-ra-boom-de-ay," which she introduced at the Tivoli Music Hall in London. This song had enormous success. It was originally a boating-chant, used by sailors on the lower Mississippi. In 1892 she was engaged by Charles Frohman to sing in America.

COLMAR (German, **Kolmar**): Chief town of Upper Alsace, Germany, on the Lauch and the Fecht. At the beginning of the thirteenth century Colmar had a large community of Jews, who enjoyed the favor of the municipal authorities. They occupied a special quarter, where they had a synagogue. The building was destroyed by fire in 1279.

In 1285 the emperor Rudolph I. besieged Colmar, for which the Jews were held responsible by its citizens, who declared they had induced Rudolph to attack the city; the Jews were accordingly expelled. That this charge was groundless can be seen from Rudolph's subsequent treatment of them. Meir of Rothenburg, rabbi of Colmar, passing through Rudolph's camp, was held for a ransom of 1,500 marks. He, however, forbade his flock to pay such a heavy sum, and spent the remainder of his life in prison.

The period of banishment must have been brief, for several years later, when Adolph of Nassau, Rudolph's successor, besieged Colmar, Jews were among the defenders of the city. In 1292 the Jews of Colmar were accused of a ritual murder, and a riot ensued, in which many Jews lost their lives.

More fortunate than many other Alsatian communities, Colmar escaped the persecutions of the

hordes of Armleder, who, on hearing of the approach of the army of Louis of Bavaria, raised the siege. But this relief was dearly paid for. Louis of Bavaria handed over the Jews of Colmar, with their possessions, to the city for the sum of 200 marks. The year 1348 was fatal to the community of Colmar, as to all Alsatian communities. The accusation of having caused the Black Death found credence with the anti-Jewish council of Colmar. In fact, on Dec. 29, 1348, the city council announced to their fellows of Strasburg that one Hegman had, under torture, accused Jacob, the cantor of the synagogue of Strasburg, of having sent him the poison which he had put into the wells of Colmar. Thereupon the Jews, without being permitted a hearing, were burned outside the gates of the city. The place where the auto da fé occurred is still known as the "Judenloch" (Hole of the Jews). In the following year, Charles IV. of Germany absolved the inhabitants of Colmar from all responsibility for the burning of his "servi camerae."

Jews were again admitted to Colmar, at the request of King Wenceslaus, about 1375. Nevertheless, when the latter took the part of the nobles in their quarrels with the Alsatian towns, the Jews of Colmar helped to defend the city, and refused to pay taxes for three years (1385-88). They were, therefore, together with their Christian fellow citizens, put under the ban of the empire. Later an arrangement was made between the city and the emperor, relinquishing to the former the Jewish taxes for a period of ten years; whereupon the ban was removed. Wenceslaus, however, did not forget their recalcitrance, and in 1392 annulled all the claims of the Jews against their Christian debtors.

During the reign of Robert of Bavaria the condition of the community improved. On Sept. 28, 1401, he granted the Jews of Colmar a renewal of their old privileges. But the hostility of the council of Colmar continued to manifest itself in many ways; and in 1437 the council secured from King Sigismund an edict prohibiting the citizens of Colmar from renting or selling houses to Jews without special permission from the mayor. In 1468, the council made changes in the statutes affecting Jews, and added the following clauses:

"In addition to the yearly taxes, the Jews shall contribute to the tax for the maintenance of the fortress, and give New-Year gifts to the mayor. In case of war they shall pay supplementary taxes. They shall remain in their houses during Holy Week, Easter and the feasts of Corpus Christi and Assumption. Only unmarried children may reside with their parents, and no Jew shall harbor without special permission any foreign coreligionist. Foreign Jews shall pay, on entering the city, a 'blappert' at the gate, and a pfennig to the gatekeeper. If they wish to pass a night in the city, they shall pay one shilling. The city protects the Jews only from persons amenable to its tribunal."

At the end of 1476 the community suffered greatly at the hands of the Swiss Confederates, who, on their way to France, plundered the Jews and committed many acts of violence. Moreover, the council, fearing that the Christian inhabitants would get into trouble with the Confederates on account of the Jews, prohibited the latter from entering the

city. Thus in 1478 only two Jewish families were tolerated there. At length the council requested from Maximilian I., in Dec. 1507, per-

Their mission to banish the Jews from Col-
Banish- mar, which request was granted in
ment of 1510 (Jan. 22). In vain the com-
1512. munity exerted every effort to secure
the repeal of the decree of banishment.

All that it obtained, through the help of Josel of Rosheim, the leader of the Alsatian Jews, was the postponement of enforcement until St. George's Day, 1512. Thenceforth all Jews who came to Colmar for purposes of trade were compelled to pay a toll and to wear the yellow badge. The synagogue and the Jewish cemetery of Colmar were presented by Maximilian to his secretary, Jean Spiegel of Schlettstadt. The cemetery, however, was also used by the Jews in the seigniorship of Ribeaupierre. The council was therefore constrained to take over both the cemetery and the buildings formerly belonging to the Jews, paying an indemnity to both Jean Spiegel and William of Ribeaupierre.

The council was not yet satisfied. The banished Jews settled in the neighboring villages, and came daily to Colmar to transact business with its citizens. The council therefore passed a law prohibiting Jews from depositing their merchandise with Christians. On Feb. 2, 1534, the council passed another law forbidding the inhabitants, under penalty of loss of citizenship, to harbor Jews. These laws remaining without effect, the council solicited and obtained from Charles V. (April 25, 1541) permission to forbid them from entering Colmar. Through the intervention again of Josel of Rosheim the imperial chancery, a month later (May 24, 1541), renewed all the privileges previously enjoyed by the Jews of Colmar. These contradictory enactments became the occasion of litigation between the city and the Jews, lasting eight years, the Jews being ultimately defeated.

Until 1691 no Jew set foot into Colmar. A community, however, began to form in 1789; and its history, from that time on, differs little from that of other communities in France and Ger-

Recent many. With the introduction of the
History. system of consistories (1808) Colmar became the seat of one, with twenty-five dependent communities. At present (1903) Isidore Weill is grand rabbi of the consistory. The district of Colmar includes about 11,000 Jews. There are several benevolent societies, the most noteworthy of which are the Société de Patronage des Jeunes Israélites and the Société des Dames. See ALSACE.

COLOGNA, ABRAHAM. See ABRAHAM DE COLOGNA.

COLOGNE (German, **Köln** or **Cöln**; Latin, **Colonia Agrippina**): Chief city of Rhenish Prussia. There are indications that a Jewish community existed here long before Christianity had

become dominant. The first official document, however, concerning the Jews of Cologne dates from the time of Constantine, who issued a decree (Dec. 11, 321) abolishing their privilege of exemption from onerous municipal offices ("Codex Theodosianus," iii. 16, 8). His successors, especially Theodosius II., did not content themselves with the withdrawal of old privileges, but curtailed the civic rights of the Jews. Happily for the Jews of Cologne, it fell, in 462, into the hands of the Franks; and a long period of freedom and prosperity for the Jews of that city followed, though many attempts were made by the fanatical clergy to disturb the harmony and interrupt the friendship existing between the Jews and the Christians.

In 881 the Jewish community of Cologne ceased to exist, the city having been reduced to ashes by the Norman invaders. It was, however, soon rebuilt, and under the wise rule of the archbishops, which made the city a great industrial and commercial center, a prosperous and numerous Jewish community came into existence during the tenth century, accumulating material wealth and learning in an eminent degree. As in the old city, the Jews

occupied a special quarter, situated be-
First Be- tween the city hall and the Church of
ginnings. St. Laurentius, although they were
allowed to reside wherever they chose.

They had a synagogue and a Talmudical school, the origin of which is ascribed to AMRAM OF MAYENCE.

In 1010 a new and richly decorated synagogue was erected, and about the same time a hospital (**הקרן**) was built by a philanthropist named Eliakim ben Mordecai. The community was administered by a chief rabbi, officially called "episcopus Judæorum," who was elected annually. He was assisted by a council of twelve dayyanim, whose decisions had legal force. Disputes between Christians and Jews had to be decided by the Jewish council; and in grave criminal cases, in which the Jewish council was incompetent to decide, a Jew could be convicted only on evidence corroborated by a Jewish witness.

The Jews were engaged in all branches of commerce, trading especially in wool, leather, fur, and jewelry. They were also allowed to hold public offices; and many a Jew was entrusted by his Christian fellow citizens with the direction of public affairs. Thus, in the middle of the eleventh century, a Jew named Egeberth exercised the functions of burgomaster of the parish of St. Laurentius.

This golden period in the life of the Jews of Cologne was terminated by the Crusades. On May 29, 1096, the Jews of Cologne were informed of the approach of the Crusaders. Being well aware that they could expect no mercy from the pilgrims, who delighted in the spilling of Jewish blood, they sought refuge in the houses of their

The First Christian fellow citizens, who, touched
Crusade. with pity, did all they could to shield them. The following day the Crusaders, on entering the city, had to content themselves with pillaging the Jewish quarter, and tearing up and defiling the scrolls of the Law. Only two Jews, Mar Isaac and Rebekah, fell victims to

their rage. Both had refused to escape, and willingly accepted martyrdom. Mar Isaac was dragged to a church, and, spitting on the crucifix held up before him, was there killed.

Meanwhile the situation of the refugees became untenable, and detection was feared at every moment. The archbishop, Hermann III., who himself sheltered many Jews in his palace, decided to send them secretly away, to be housed in the neighboring towns and villages of his diocese. For three weeks the unfortunate Jews remained safely in their new hiding-places, but were finally discovered, and shared the fate of their brethren in other towns. Many ended their lives in lakes and bogs, following the example of a pious man named Samuel ben Yehiel. Standing in the water, and pronouncing a blessing, he killed his son; and his assembled coreligionists, while intoning the "Shema" ("Hear, O Israel!") threw themselves into the Rhine. Various "Memorbücher" preserve the names of a great number of these martyrs, among whom were several proselytes; and a prayer of commemoration is recited every year at Cologne on the Sabbath preceding Pentecost.

As soon as the horrors of the Crusade had ceased the community was reestablished by the remaining old settlers who had escaped massacre, and it was augmented by newcomers, who anticipated greater security at Cologne, as the Christian citizens of the city had shown themselves compassionate toward the Jews. Scarcely had fifty years passed in relative tranquillity when a new

The Second Calamity. The monk Rudolph arrived at Cologne (Aug. 1, 1146); and his anti-Jewish speeches soon bore fruit. Meanwhile pilgrims for the Second Crusade commenced to gather; and a renewal of the scenes of 1096 was to be apprehended. In their distress the Jews addressed themselves to Archbishop Arnold, who gave them the castle of Valkenburg and permission to defend themselves with arms. As long as they remained in this place of refuge they were safe; but as soon as they ventured forth the pilgrims, who lay in ambush, dragged them away to be baptized, torturing and killing those that resisted. In commemoration of their sufferings during the Second Crusade, the community of Cologne made the twenty-third of Nisan a fast-day.

After the departure of Rudolph the Jews of Cologne reoccupied their dwellings, and those who had under compulsion nominally embraced Christianity resumed their status and places as Jews. But other disastrous effects of the Crusades soon followed. Besides the great loss of life sustained by many communities, the traffic between Europe and the East, hitherto almost wholly controlled by Jewish merchants, passed rapidly into the hands of Christian competitors, and Jews were soon forbidden to engage in any commercial pursuit. Nor were they able to practise handicrafts, owing to the development of the guilds, which excluded Jews from membership. The only means of livelihood left to them, that of money-lending, entailed the ill will of the inhabitants. Thus the characteristic features of the history of the Jews of Cologne from the Second Crusade to their banishment were, as everywhere

else, perpetual renewals of privileges—dearly paid for and almost immediately revoked—and periodical outbursts of persecution on the part of the populace.

Under Archbishop Reinald (1157-67) the Jews of Cologne were regarded as "servi camerae," under the protection of the emperor; and the so-called protection, as it was elsewhere, was here an excuse for extortion. At the beginning of the twelfth century the archbishops of Cologne acquired temporal power over the diocese; and the protection of the Jews—in other words, the levying of taxes—was transferred by the emperor to the prelates. The Jews had now to pay, on the Feast of St. Martin, 10 marks and 6 pounds of pepper. But the archbishops understood how to extract additional taxes. Thus, the false accusation that a rich Jewish merchant and a rabbi, called Abrahams, had tendered to a saleswoman base coin in payment for their purchases, compelled the community, in order to save their lives, to pay to Archbishop Philip von Heinsberg 180 marks. Philip, however, carried extortion so far that he was subsequently called to account by the emperor Frederick Barbarossa.

An exception to the general conduct of the archbishops of the thirteenth century was that of Engelbert von Berg (1216-22). As provost of the Dom he had shown his kindly feeling toward the Jews by presenting them in 1212 with five acres of land for the enlargement of their cemetery. Under his rule the Jews were really protected, and this without the payment of special taxes. A noble who had robbed and killed a Jew was condemned to death by Engelbert. During the struggles between the municipality of Cologne and Archbishop Conrad von Hochstaden (1232-61), the Jews distinguished themselves by their courage in defending the city against the archiepiscopal troops. The municipality showed its gratitude by including them in the treaty of peace of March, 1252. A month later (April 27) Conrad granted the Jews a special privilege for two years.

Meanwhile the state of the Jews in Germany generally grew worse from year to year; and the community of Cologne was largely increased by refugees from neighboring towns. The consequence was renewed trouble and violence. Thus in 1266 (June 15), on a charge of having furnished arms to the invading Mongols and Tatars, the community had to mourn twelve additional martyrs, including Rabbi Isaac ben Simson. Whenever possible, the archbishops, for whom the Jews were an inexhaustible source of revenue, quelled the popular outbreaks, and the Jews were safer at Cologne than elsewhere in Germany. In the same year a new privilege was granted, modeled on that of 1252, but with several additional clauses, and with the following stipulations: that no execution should take place in or near the Jews' cemetery; that a foreign Jew might be buried therein; that Jews, whenever they might come, should not pay, in the territory of the archbishop, higher taxes than Christians; the archbishop should not tolerate in the city of Cologne any Cauwercini or Christian usurers.

These clauses were engraved on stone tablets in the wall of the treasury of the Dom.

Archbishop Wicbold (1297-1304) renewed the privilege in 1302 for the sum of 1,200 marks and a yearly payment of 60 marks, in addition to an existing payment of 1,600 shillings to the municipality.

In 1349 the sweeping accusation that the Jews had caused the Black Death by poisoning the wells and the rivers, stirred the ever-ready populace to violence. The municipality, be it said to its honor, did all in its power to prevent the im-

The Black Death. pending catastrophe, assuring the inhabitants that the plague was a punishment from God. It even encouraged the municipality of Strasburg, in a letter addressed to the burgomaster of that city, to stand by the Jews. But all these exhortations were of no avail:

the executioners would not let slip their prey. Seeing that escape was hopeless, the elders of the community, in a council held on the eve of St. Bartholomew's Day, decided that, in case of an attack, instead of being dragged to church for compulsory baptism, they would set fire to their houses and die with their wives and children in the flames. They had not long to wait. On St. Bartholomew's Day (Aug. 24, 1349) the Jewish quarter was attacked; fire

broke out simultaneously in different parts of it, and the whole community perished. It remained only for the authorities to dispose of the spoils; an agreement was made, in 1350, between the archbishop and the municipality by which the former secured the possessions of the victims.

For more than twenty years there were no Jews in Cologne. The first new settlers were one Schaaf and his son-in-law, who had to pay 1,000 gulden for admission to the city. It was agreed that each family admitted should pay 100 gulden for protection. Fourteen families settled in the year 1372, paying together 2,000 gulden for admission and 1,150 gulden annually for protection. In 1372 Archbishop Frederick III., in return for a yearly payment of 70 marks, granted privileges similar to those of his predecessors. The old cemetery near Severinsgate was restored to the community; and on St. Thomas' Day, in the following year, the municipality issued

a letter of protection, in which it acknowledged the benefits derived from the Jews.

About this time the Jews began to acquire houses in the Judengasse, Botengasse, and Burgerstrasse. A part of their old synagogue was restored to them; and in 1372 they acquired the remainder. But this relatively happy state of affairs did not last. The

increasing influence of the Dominicans, who had established their head-

Expulsion Through the quarters at Cologne—a center of the Hussite movement—showed itself in the enactment, in 1404, of laws prescribing special garments for Jews.

Dominicans in 1426. On the other hand, the municipality, weary of the struggle against the archbishops, who illegally arrested Jews whenever they needed money, eagerly embraced the opportunity to remove the

cause of the discord, and therefore refused, in 1426, to renew the Jewish privileges. The Jews had to leave the city, and thenceforth were not allowed even to pass a night in Cologne. Their synagogue was converted into a chapel, which still exists under the name of Rathauscapelle.

Though Cologne had ceased to be a home for Jews, it remained during the fifteenth and sixteenth centuries the center of an anti-Jewish movement. Thence arose the crusades against

Jewish books; and baptized Jews like Victor of Carben and John Pfefferkorn found it a fertile field for their anti-Jewish propaganda. Reuchlin encountered there his bitterest enemies, the Dominicans, who converted the inhabitants of the once liberal city into a bigoted mob. Even after the Protestant reform movement had triumphed, Cologne remained the citadel of the reactionary spirit. Jews of neighboring towns had the greatest difficulty in obtaining permission to stay in the city even for twenty-four hours. Not until 1798, when Cologne became a part of the French republic, were its gates opened to Jews.

In 1798 Joseph Isaac Stern of Mühlheim and his family, availing themselves of the declaration of the new government that each one was responsible to his own conscience for his religious belief, settled in Cologne as French citizens. Four years later seventeen other families, including that of Solomon

Hebrew Deed of Conveyance by Cologne Jews.
(From the "Judenschreibbuch" of the thirteenth century.)

Oppenheim, selected Cologne for their abode. A community was then formed and the statutes were drafted; but it increased very slowly,

Re-admission. especially when Cologne in 1815 was annexed to Prussia. At that time there were only thirty families; and this number increased but little in the following twenty years.

In 1830 the government charged the leaders of the community, Solomon Oppenheim and Solomon Marcus Cohen, with the supervision of the Jewish primary school, in which Joshua Schloss, Elkan Levi, Joseph Gottschalk, and Marcus Mannheimer were successively the teachers. The school was then attended by thirty pupils. In 1843 the community consisted of forty-six families, and was included in

ceeded Rabbi Israel Schwarz, and the recently nominated Dr. Ludwig Rosenthal.

At present (1902) the community numbers about 10,000 Jews. They are engaged in all branches of commerce and industry, and many of them follow the liberal professions.

Institutions and Societies. The community maintains numerous benevolent societies, of which the most important are: an asylum for sick and old; Die Philanthropie, an institution for the promotion of arts and handicrafts; Quelle des Heiles, for the relief of needy tradesmen; Gemilut Hasadim, for lending without interest; Semikut Dallim, founded in 1849; Kotnot Or, for furnishing clothing to children of the poor; Armenverein, for the relief of the poor; Frauenverein, founded in 1820; and Waisenstiftung, founded in 1878.

Among the recently erected institutions are: B'nai B'rith Rheinlandloge; an institute for training Jewish female nurses; a society for the study of Jewish history and literature; a children's settlement; and Das Jüdische Lehrlingsheim, a home for Jewish apprentices. The Central-Komitee der Zionist-Vereinigung für Deutschland has its seat in Cologne.

In the Middle Ages, Cologne was a center of Jewish learning, and the "wise of Cologne" are frequently mentioned in rabbinical literature. A characteristic of the Talmudical authorities of that city was their liberality. Many a liturgical poem which still has a place in the Ashkenazic ritual was composed by poets of Cologne.

Distinguished Cologne Jews. The names of many rabbis and scholars have been preserved: the legendary Amram, traditional founder of the Talmudic school in the tenth century; R. Jacob ben Yakkar, disciple of

Gerson Meor ha-Golah (1050); the liturgist Eliakim ben Joseph; Eliezer ben Nathan (1070-1152), the chronicler of the First Crusade; the poet Eliezer ben Simson, who, together with the last named, took part in the famous assembly of French and German rabbis about the middle of the twelfth century; the Tosafist Samuel ben Natronai and his son Mordecai; the liturgist Joel ben Isaac ha-Levi (d. 1200); Uri ben Eliakim (middle of the twelfth century); R. Eliakim ben Judah; Ephraim ben Jacob of Bonn (b. 1132), the chronicler of the Second Crusade. The last lost at Cologne, in 1171, his son Eliakim, a promising youth, who was murdered in the street. His tombstone is still to be seen in the cemetery of Cologne.

Among the rabbis and scholars of the thirteenth century were: Eliezer ben Joel ha-Levi; Uri ben Joel ha-Levi; Jehiel ben Uri, father of R. Asher; Isaac ben Simson (martyred in 1266); Isaac ben Abraham, brother of the Tosafist Simson ben Abraham of Sens (martyred in 1266 at Sinzig); R. Isaiah ben Nehemiah (also martyred in 1266 at Sinzig); the liturgist Eliezer ben Hayyim; Hayyim ben Jehiel (d. 1314) and Asher ben Jehiel (b. c. 1250; d. 1327); Yakkar ben Samuel ha-Levi; Reuben ben Hezekiah of Boppard; Abraham ben Samuel; Judah ben Meir; Samuel ben Joseph; Hayyim ben Shaltiel; Nathan ben Joel ha-Levi; Jacob Azriel ben Asher ha-Levi; Meir ben Moses; Eliezer ben Judah ha-Kohen, most of whom are known as commentators on the Bible.

(After a photograph.)

the rabbinate of Bonn, to which it contributed a yearly payment of 130 to 140 thalers. It took the leadership in the struggle for Jewish emancipation in Germany. In 1847 it summoned the Rhenish communities to a general assembly; and its leader, the municipal councilor Abraham Oppenheim, was sent to Berlin in order to prevent the passage of several impending anti-Jewish laws.

With the emancipation of the Jews in Germany the community increased, and in 1854 Dr. Israel Schwarz was nominated rabbi. In 1861 a beautiful synagogue, erected in the Glockengasse at the expense of Abraham von Oppenheim, was consecrated. In 1876 the seminary for teachers, which had been founded at Düsseldorf in 1867, was transferred to Cologne and placed under the direction of Dr. Plato, rabbi of the Orthodox congregation 'Adat Yeshurun. A new synagogue was dedicated in 1899, in the presence of many representatives of both the state and the municipality. The liberal congregation has two rabbis, Dr. S. Frank, who, in 1876, suc-

The rabbis and scholars of the fourteenth century include: Samuel ben Menahem, Talmudist and liturgist; Jedidiah ben Israel, disciple of Meir of Rothenburg; and Mordecai ben Samuel. These three are called in the municipal sources "Gottschalk," "Moyter," and "Süsskind." The rabbi who officiated at the time of the banishment was Jekuthiel ben Moses Möln ha-Levi (Pruno Süsskind).

COLOMBIA. See UNITED STATES OF COLOMBIA.

COLON. See PANAMA.

COLON, JOSEPH B. SOLOMON: The foremost Talmudist of Italy in the second half of the fifteenth century; born probably at Chambéry, Savoy, about 1420; died at Padua 1480. Colon (whose name is probably identical with the French "colombe," dove) belonged to the scholarly family of the Trabots, who emigrated from France to Italy in the fifteenth century. The teachers of the boy were his father—himself an eminent Talmudist—and a certain Mordecai b. Nathan. Colon left his home at an early age—not, however, as Grätz says (*"Gesch."* 3d ed., viii. 253), in consequence of the expulsion of the Jews from Savoy, which took place in 1471. For a time he led a wandering life, and was forced to gain his living by teaching children.

About 1469 he officiated as rabbi in Pieve de Sacco, in Venetian territory, whence he went to Mestre, near Venice. There he became acquainted with a pupil of Israel Isserlein, and was influenced by him in favor of the German Talmudists. Subsequently Colon was rabbi at Bologna and Mantua, and he became involved in a quarrel with Messer Leon, both being banished by the authorities. Thereupon he was made a rabbi at Pavia, and there he became the center of Talmudic learning in Italy. At the same time Colon's decisions in civil as well as religious questions were sought from far and wide—from German cities, such as Ulm and Nuremberg, as well as from Constantinople. He wrote a commentary on the Pentateuch, and novellæ on the Talmud and on the legal codex (*ḥalakot*) of Moses of Coucy; but the responsa, collected after his death by his son-in-law Gershon and by one of his pupils, Hayya Meir b. David, are all that have been printed of Colon's works (ed. princeps, Venice, 1519; several later editions).

Colon's responsa, which are among the classical productions in this field of rabbinical literature, exercised a great influence on the devel-

His opment of rabbinical law. One of the **Responsa.** most important was his responsum

No. 1, in which he decided that no one could be forced to take a case to an outside court when there was a court in the place where the defendant (*netbe*) was living; for it often happened that rich people took their cases to foreign rabbis in order to make the poor surrender. His responsum No. 4, addressed to the congregation of Regensburg,

is also highly important. A number of Jews of that community having been falsely accused, and a sum of money having to be raised for their ransom, the surrounding places and neighboring communities refused to contribute, at least in so far as it was a question of paying a fixed tax instead of making voluntary contributions. Colon decided that the communities in question could not refuse to pay their share, since the same false accusation (*בלבול*) might be made against them also, and if the accused in this case were proved innocent and ransomed, they would then be safe from danger.

In his responsa Colon endeavored not only to decide the case in hand, but to establish general principles according to which similar or related cases might be decided. In addition to an astonishing range of reading in the entire rabbinical literature, Colon displays a critical insight into the treatment of the Talmud that is remarkable for his time. This is all the more noteworthy since he was entirely under the influence of the German Talmudists, which preponderated in northern Italy. Colon's great self-confidence is remarkable; he paid little attention to Jacob ben Asher's "Turim," even then considered the most authoritative law codices; and he cared as little for mere custom (*Responsa*, No. 161, end). He had, besides, an inflexible regard for right and justice, and never stopped to consider persons. This becomes especially evident in the sharp yet duly respectful manner in which he reproved Israel Bruna, the foremost Talmudist of Germany of his time, when the latter presumed to act as judge in a certain dispute, though he was himself one of the contending parties.

It was natural that a man of Colon's stamp should sometimes be carried too far in his zeal for truth and justice; and this happened in his dispute with Capsali, the ḥakam-bashi of Turkey. Having been falsely informed by an emissary (*"meshullah"*) in

behalf of the people of Jerusalem that Capsali was very lax in divorce decisions, that he had declared that the betrothed (*ארונה*) of a man who had become converted to Christianity should be considered as single, and that he had declared an engagement (*קדושין*) void because it had not been entered into according to the laws of the community, Colon, in order to establish the sanctity and inviolability of marriage beyond the power of any individual rabbi, wrote three letters (*Resp.* Nos. 83, 84, 85) to the president and leaders of the community of Constantinople, threatening to place Capsali under the ban if he did not recall his decisions and do public penance; and at the same time making it understood that in no case would Capsali ever again be allowed to fill the office of rabbi (*Resp.* No. 83). This decree of an Italian rabbi pronounced against a Turkish colleague was an unprecedented attack on the rights of the community, and provoked the righteous indignation of the Constantinople community—all the more as it proved to rest upon a groundless and vulgar calumny. Capsali, conscious of having been maligned, did not mince matters in answering Colon's letters; and a bitter discussion arose between the two men, in which the leading rabbis of Germany, Italy,

and the Orient took part. It is characteristic of Colon that as soon as he became convinced that he had been the victim of an intrigue, and so had done injustice to the ḥakam bashi, he did not hesitate to make amends. On his death-bed he commissioned his son Perez to go to Constantinople and ask, in his father's name, the forgiveness of Capsali.

COLONIAL JEWISH MONTHLY. See PERIODICALS.

COLONNE, JULES EDOUARD: French musician; born at Bordeaux July 23, 1838. He studied at the Paris Conservatory, where he was awarded the first prize for harmony and for the violin. He gave up a position as first violinist at the Grand Opéra in order to found the Association Artistique des Concerts du Châtelet in 1874. By these concerts Colonne popularized the works of Berlioz, whose "L'Enfance du Christ," "Les Troyens," and especially "La Damnation de Faust," the one hundredth performance of which was given in 1898, were frequently rendered. He also gave prominence to the works of the younger French composers, such as Massenet, Dubois, Lalo, Vincent d'Yndy, as well as to the masterpieces of foreign composers.

The Association Artistique des Concerts du Châtelet, well known at Paris under the name of "Concerts Colonne," won signal success. Colonne was appointed leader of the official concerts of the Exposition of 1878. In 1891 he was appointed leader of the orchestra at the Opéra, his initial performance being in "Lohengrin." At the Exposition of 1900 he conducted the concerts in "Old Paris." Colonne gave many successful concerts in foreign countries, and also introduced to France, through the medium of his association, the most prominent of contemporary German conductors, like Siegfried, Wagner, Mottl, etc. Colonne was an officer of the Legion of Honor. He died March 28, 1910.

M. BL.

COLOPHON: An inscription or device placed at the end of books, generally with the intention of showing the title, the writer's or the printer's name, the date, and the place of printing. Originally the certificate of the illuminator, it was used by the early printers to attest that the work had been done by a reputable man and in a reputable manner. Early prints attempted only to reproduce faithfully the manuscripts. As these at times had neither title-page nor colophon, some of the earliest prints are wanting in both. This is true of such early Hebrew prints as the *editio princeps* of Maimonides' "Mishneh Torah" and Jacob b. Asher's "Turim" (Soncino, c. 1490). In the "Dikduk" of Elijah Levita (Isny, 1542) a poem takes the place of the usual colophon. In other works the colophon is extremely short, containing simply the word **תם** ("It is ended"); or **אמן**, as in Nahmanides' "Perush ha-Torah" (before 1480); or **תם ונשלם תלע (= תהלה לאלהי עולם)** ("Finished and ended! Praise be to the Lord of the

world!"), as at the end of the *editio princeps* of the Hebrew version of Avicenna's "Canon" (Naples, 1491).

In the course of time colophons grew in length, practically taking the place of the modern title-page. But even when the Hebrew title-page grew in size and completeness the colophon was still used, and either duplicated or supplemented the information given in the title-page. The colophons were used to extol the merits of the book as well as the excellence of its typography. Characteristic of the Hebrew colophons is the religious character imparted to them by an expression of thanks to God that the work had been happily completed, or a prayer that those who had assisted might be spared to do similar work for many years to come. The hope of the restoration of Palestine, and of the rebuilding of the Temple, often finds expression also. In the Soncino (1485) edition of the "Ikkarim" Isaiah ii. 3 is curiously changed into "From Zion goes forth the Law, and the word of the Lord from Soncino," eulogistic of the printer's profession. These colophons, which often mention the "printer" (**מחוקק** or **מורכב**), the "superintendent of the printing-office" (**נצב על הדפוס**), the "typesetter" (**מסדר**, **מורכב**, **מורכב**, or **מורכב ומורכב**), give us valuable information which can not otherwise be obtained. The colophon to Kimhi's commentary on the Psalms (1477) states that 300 copies of the book were printed. The word **דפוס** is first used for "print" in the colophon of the Ferrara (1477) edition of Gersonides on Job. Steinschneider states that the oldest book containing such a notice is the "Leshon Limmudim" (Constantinople, 1542); but the Constantinople Alfasi (1509) contains one also.

The Constantinople prints are noted for their long colophons. Those in the early Venice prints are shorter, probably because most of the printers were Christians. Many of the early Italian prints, however, do contain lengthy colophons. Thus the "Mahzor" of Castel-Maggiore (1486) contains, after the usual ending, "Ended and finished. Praise be to the Lord of the world," a very long account of the book itself, stating where the printing was commenced and where it was finished, with verses interspersed. This is followed by an invocation. The "Seder Tefillot" (Mantua, 1558) has a long colophon giving the date and place, and the name of the ruler ("Our Lord, Duke William Gonzago") of the country in which the city was situated, the names of all those who took part in the work, and ends with "For the sake of His mercy may He make us worthy to produce very many books and to exalt the Law. Amen." The date was often given in a CHRONOGRAM. The first edition of the "Yosippon" contains a long colophon, in which the editor, Abraham Conti, gives an account of himself; this is followed by the real epilogue of the work, and this in turn by a distich giving his name and the date, the initial letters of the last line being the numerical equivalent of the printer's name. Where a work was printed in several volumes, each volume is apt to have a colophon of its own. Thus in the Bologna "Mahzor" (1540)

Additions to Colophons. us worthy to produce very many books and to exalt the Law. Amen." The date was often given in a CHRONOGRAM. The first edition of the "Yosippon" contains a long colophon, in which the editor, Abraham Conti, gives an account of himself; this is followed by the real epilogue of the work, and this in turn by a distich giving his name and the date, the initial letters of the last line being the numerical equivalent of the printer's name. Where a work was printed in several volumes, each volume is apt to have a colophon of its own. Thus in the Bologna "Mahzor" (1540)

the colophon at the end of the first volume is in verse, commencing "Finished is the first part; Praise be to the Lord of the world"; it is then followed by the wish that the printer may be enabled to commence the second volume. Volume two contains the main colophon, with the date and an expression of thanks to God that the printer has been able to finish the work.

At times the printer uses the colophon to implore the pardon of the reader for any mistakes which may have crept into the text, as in the Bologna (1538) edition of the "Sefer ha-Hasidim," or in the colophon attached by Meir b. Jacob Parenz to "Kaftor wa-Ferah" (Venice, 1546). The value of the Hebrew colophon is enhanced at times by the addition of historical notes. The Fano (1506) edition of the "Cuzari" contains an account of the Yahya family of Lisbon. Simon Ashenburgh's "Debek Tob" (Venice, 1588) has in the colophon a long note by the corrector, in which an account is given of the author's journey to Jerusalem. In Elijah b. Hayyim's "Imre Shefer" (Frankfort, 1713) Judah Löb b. Joseph tells us that he did not put his name on the title-page because he was daily waiting to receive a privilege from the emperor to print the Talmud. The Constantinople (1562) edition of the "Emunot" contains a long note by the editor, Solomon Ya'bez, about the author, and the translation of his work from the Arabic. Colophons were also at times used to call

Historical Notes in Colophons. special attention to some one person who had assisted in the work. Thus, the Amsterdam edition (1711) of the "Seder 'Olam" contains, after a very simple formula, and on a separate page, a eulogistic notice of R. Hirsch of Szebrszescyn for the assistance which he had given to the printers.

Hebrew colophons were occasionally written in meter, as were those in some of the early Latin prints of Franz Rinner, the Speyers of Venice, and Ulric Hahn of Rome. Usually the verses are

merely complimentary to the author. These colophons at times attain a surprising length. In the Rimini edition (1525) of Rashi's Pentateuch commentary, Moses Soncino takes one whole page to explain how he came to reprint the work. Solomon Alkabiz's "Shores Yishai" (Constantinople, 1561) contains on a separate page a series of verses by Samuel Shullam in praise of the commentary. Some of these additions to the colophon are headed by a title, as **התימת המדפיס** ("Last word of the printer"),

attached to the Amsterdam (1765) edition of Jos. b. David's "Mebin Hidot." In the Amsterdam (1651) edition of Manasseh b. Israel's "Nishmat Hayyim," after the real colophon containing the date of printing and the printer's name, Jacob Sasportas has added five pages of corrections and a long account of how he came in contact with Manasseh, and headed by the title **התנצלות המניח** ("Apology of the corrector"). A remarkable exaggeration of the colophon may be seen in the Karaite Pentateuch (Constantinople, 1833), which contains not only notes on the correctors and poems in honor of the work, but also an account of the men who contributed money to make the printing possible. Such notes are not unusual in Karaite books.

At times several colophons are to be found; for instance, in Menahem Ziyyu-

ni's cabalistic commentary to the Pentateuch (Cremona, 1560). The principal colophon, giving the date and place, is found on page 104. This is followed by two and a half pages of **Compound Colophons.** verse, and these in turn by a short colophon **בנ"ק וא"ע** (compare Isa. xl. 29). Dei Rossi's "Me'or 'Enayim" (Mantua, 1574) contains on page 184 the words **תם . ברוך ה' לעולם . אמן אמן**, "Stampato in Mantova con licenza dei superiori"; then follow several pages of additions, with a colophon; an index, with the note "Et questo con la detta licenza"; and a **השנה** (critique), followed by the words "Con la detta licenza."

Colophon and Printer's Mark on the Last Page of "Tefillot Vulgar" (Mantua, 1561).

(In the Columbia University Library, New York.)

COLOPHON OF ABRAHAM CONAT ON THE LAST PAGE OF LEVI BEN GERSHON'S COMMENTARY ON THE BIBLE (MANTUA,
BEFORE 1480).
(In the Columbia University Library, New York.)

Colophons are almost invariably in Hebrew, though occasionally, especially in Italy, some Latin or Italian words are added; thus in the Venice edition (1582) of "Shalshelet ha-Kabbalah," after the words "It is finished," are found the words "In Venetia apresso Gio. de Garra. Con licentia de Superiori." Eliezer Ashkenazi's "Yosef Lekah" (Cremona, 1576) has the addition "In Cremona. Appresso Christoforo Draconi 1576. Con licenza de Superiori." The Venice (1625) edition of the "Sefer ha-Yashar" has as colophon an Italian permit, given by the ecclesiastical authorities, dated 1615, and countersigned by Georgio Domini (1625), secretary of the "Magistr. Ecclest. contra la Biastema." Such colophons are

Copyright. somewhat rare. Still more rare was the custom of adding, after the expression "Finished and ended," a warning against any editor reprinting the book within a specified time. Thus in the "Sefer ha-Mikḡah u-Mimkar" of Hai Gaon, edited by Moses Mintz (Venice, 1602), such a prohibition, covering a period of ten years, is printed in the colophon. To this the editor adds a note in regard to the translation of the work from the Arabic, and a long colophon giving the dates of the commencement and the conclusion of the work, to which is attached the Aramaic formula בריך רחמנא בריך מריש ועד כען רסייען מריש ועד כען ("Blessed be the Merciful One, who has helped us from the beginning to the end"). A similar copyright privilege is found in the colophon to Ibn Baruk's commentary to Ecclesiastes (Venice, 1598); though where such copyrights are published they were generally found following the title-page, and were known technically as "haskamot" (see APPROBATION).

Side by side with these long colophons shorter ones were in use. In the Augsburg edition of the "Arba' Turim" (1540) we have simply the names of the three publishers, Hayyim bar David, Joseph bar Yaḡar, and Isaac bar Hayyim, in large letters. These names, however, are preceded by a long poem by Joseph bar Yaḡar, addressed to Jacob b. Baruch. Such small colophons became more general as the title-page was enlarged. They usually read: תם ונשלם. שבה לאלהים בורא עלום. "Finished and complete. Praise be to the Lord, Creator of the World" (very often abbreviated תושלבע), and were followed by the names of the printers; or בריך השם רסייען עד כען, as in Heidenheim's "Mishpete ha-Te'amim" (Rödelheim, 1808). Such abbreviated formulas appear quite early. Albo's "Iḡgarim" (Soncino, 1485) has the letters תל"ה; it is signed by המחוקק השוניינו. The benediction is sometimes omitted in the short colophon, the date being retained. Abraham Bibago's "Derek Emunah" (Constantinople, 1521) has simply תם ונשלם. נשלם. זה הספר להרפים בחשון שנת ר"פ ב. The colophon was still further shortened into either the simple תם (or its Aramaic equivalent סליק; or סליק הספר; or סליק חזק ונתחזק (compare II Sam. x. 12); or both combined, as in the "Piske Hallah" of Rashba' (Constantinople, 1516).

In Hebrew books the colophon was usually printed in the same type as that used in the body of the work, or even in smaller rabbinical type. Only occasionally were larger characters used, to bring prom-

inently before the reader the names of the printers; e.g., in the Augsburg "Turim" mentioned above, and in Abraham Zāhalon's "Yesba' Elohim" (Venice, 1595), which bears in large letters, covering an entire page, the ab-

Ty-
pography. תושלבע בנלך לך וואעי (= Isa. xl. 29 + Gen. xlix. 18). Occasionally the printer's mark was added after the colophon, though already given on the title-page. Such marks are found at the end of the "Arba' Turim" (Iyar, 1485), of Bahya's "Kad ha-Kamah" (Constantinople, 1515), of the Constantinople edition (1514) of "Pirke R. Eliezer," and of Cresca's "Or Adonai" (Ferrara, 1556), printed by Abraham Usque.

The eccentric arrangement of the type, in the form of funnel, diamond, wine-cup, wedge, or pyramid, as found in early Latin prints, is only occasionally met with in Hebrew books. The most common form is that of the inverted cone, where the lines taper either to a very short line or to a single word. This custom is found in many Hebrew manuscripts; it being an old idea that nothing should be left blank upon the last page of a copy of the Torah ("Soferim," ed. Müller, p. 20). For colophons in manuscripts see MANUSCRIPTS.

G.

COLOR: It is noteworthy that Biblical Hebrew contains no term to express that property of light known as color. When a Hebrew writer wishes to compare an object with another in respect to color, he employs the word עין ("eye") or מראה ("appearance"). The former term is thus used in speaking of the appearance of the plague (Lev. xiii. 55), of bdellium (Num. xi. 7), of wine (Prov. xxiii. 31), of amber (Ezek. i. 4, 27; viii. 2), of burnished or polished brass (ib. i. 7; Dan. x. 6), of beryl (Ezek. i. 16, x. 9), and of crystal (ib. i. 22). The latter term is used of brass (ib. xl. 3).

In rabbinical literature are found the Aramaic "hazuta" (appearance, Hul. 47b), "guf" (body, Men. 44a), "keren" (ray, Niddah ii. 6), "or" (light, Num. R. ii. 7; compare Luria, note 10 *ad loc.*), "zeba'" (dye, paint, ib. = the Aramaic "zib'a") (Shab. 75a), the Persian loan-word "gawwan" ('Er. 53b = Aramaic "gawna"; compare Targ. Yer. to Lev. xv. 19: "color of saffron"), and אכרום, כרום, the Greek χρώμα (compare Krauss, "Lehnwörter," ii., s.v.; see, however, Jastrow, "Dict." s.v.).

Intensity of color is expressed by the terms "amok" (deep, Tosef., Niddah, iii. 11), "az" (strong, Neg. i. 1), "ad me'od" (to a high degree, Num. R. ii. 7), or syntactically by such expressions as "adamdam she-ba'adummim" (deep red, Neg. xi. 4), "yeraḡrak sheba-yerokim" (deep green, ib.).

Faintness or paleness of color is expressed by "kehal" (dim, faint, Lev. xiii. 39; Neg. ii. 2) or by "deheh" (Neg. i. 2). The same idea is expressed by reduplication, as "adamdam" (reddish), "yeraḡrak" (greenish, Lev. xiii. 49), and "sheḡarhar"

(blackish, swarthy, Cant. i. 6). Dark colors are expressed by "mashhîr" (Niddah 19a) or "makdir" (Yer. Niddah ii. 50b); bright, vivid, is "mezahzeah" (*ib.*); dingy, dirty, is "ka'ur" (ugly, B. K. ix. 4), "meko'ar," "meko'ar," the same (Baraita Niddah; Horowitz, "Uralte Tosephtas," V. ii., § 1); and clear (of liquids), "zalul" = Aramaic "zil" (Num. R. ii. 7; Hul. 55b).

There are but few real color-terms found in Biblical or traditional literature. Only white, and two of the elementary colors, red and green, are distinguished by name; while for blue and yellow distinct terms are entirely wanting. The other elementary colors are expressed by words denoting degrees of lightness and darkness; while non-elementary colors are indicated by the names of the objects from which they are derived. Moreover,

one and the same word is used to denote not only several shades of one color, but even what are now known as different colors; the context, or the object to which the color was applied, affording the clue as to the particular color intended.

The scarcity of color-names found in the Bible and other ancient literatures has been differently accounted for by various scholars. All that can with certainty be said of the ancients in this respect is that their color vocabulary was undeveloped.

To the psychological reasons for such an undeveloped state among all nations of antiquity (compare Wundt, "Völkerpsychologie: Die Sprache," ii. 513, 514) was added, in the case of the Israelites, the religious prohibition of idolatry at a period of history when painting, like other arts, was largely, if not altogether, in the service of idolatry. Needlework in colors, as well as dyed stuffs, was indeed known in Israel in very early times (compare DYEING; EMBROIDERY), but the coloring was in all probability of a simple kind.

In the determination of the various color-terms, notwithstanding the aid which the context and etymology offer, it is at times impossible to arrive at very definite conclusions. In the following lists the Biblical data are given under *a*; the data from traditional literature, inclusive of the Targumim, under *b*.

(*a*) "Zak" (literally, "clear," "pure") is applied in the Bible to the whiteness of the complexion (Lam. iv. 7); "zahob" (glistening like gold), to the golden tint of hair (Lev. xiii. 30, 32, 36); the hof'al participle "muzhab," to brass (Ezra viii. 27); "zah" (glowing, glistening), to the glow of a healthy complexion (Cant. v. 10); similarly, with the additional idea of whiteness, in Lam. iv. 7; to the clearness of a dry, hot atmosphere

Degrees of (Isa. xviii. 4); and to a dry, hot wind
Lightness. (Jer. iv. 11); "zahor" (light reddish; A. V. "white"), to the color of the ass (Judges v. 10).

(*b*) "Bahak" (be glistening white) is used in the later Hebrew to denote the color of the human skin in a diseased condition (Bek. 45b; compare Lev. xiii. 39); "hibhik" (to glisten), is used of jewels (Gen. R. xxxi. 11); *idem* (be bright), of the countenance (Pesik. R. xiv. [ed. Friedmann, p. 62b]); "hizhib" (become golden-hued), of a dove's plumage

(Hul. 22b); "hizhib" (to become glistening), of the metallic color of the dove's plumage (Hul. *ib.*), an earlier stage of coloration of plumage than the preceding hizhib; "zihub," of the getting of such color (*ib.*); "hizhil" (become bright), of the countenance (Gen. R. xcvi. 1); "hizhir" (make bright), of the skin (Lev. R. v. 3).

Aramaic: "barir" (pure) = "zak" (Targ. to Lam. iv. 7); "zehal" = Hebr. "hizhil" (Pesik. R. *l.c.*); "zehir" (bright) and "zihara" (brightness), used of the surface of peeled grain, and of a clear, translucent liquid (Bezah 14b; Kid. 48b); "faziah" (clear) = Hebr. "zah" (Targ. to Isa. xviii. 4), and (speckled) = Hebr. "bared" (Targ. to Zech. vi. 3).

(*a*) The usual term in the Bible to express the idea of darkness is "shahor" (black). It is used of the dark hair in a leprous scall (Lev. xiii. 31, 37), of a sunburnt skin (Job xxx. 30; Cant. i. 5) and of dark horses (Zech. vi. 2). The diminutive form "sheharhor" is applied to swarthy complexion (Cant. i. 6). When it is desired to express a particular shade of dark, another substantive is added for a closer definition, as "oven-black" (Lam. v. 10), and "raven-black," of hair (Cant. v. 11). "Hum" (literally, "hot," then "dark," "brown") is used of the wool of sheep (Gen. xxx. 32 and *pussim*). "Kadar," meaning primarily "to overpower," then "to be sad, gloomy, dirty, or dark" (compare the explanation of "shahuf," below), is applied to the turbid state of water (Job vi. 16), to a sad countenance (Jer. viii. 21), to mourning garments, to the gates of a mourning city (Jer. xiv. 2), and to the sky (*ib.* iv. 28). The hif'il of the same verb is used in a causative sense; *e.g.*, "make dark" the heavens (Ezek. xxxii. 7, 8), "cause sadness" (*ib.* xxxi. 15). The hitpa'el of this verb means "to become dark" with clouds of the sky (I Kings xviii. 45).

Degrees of The noun "kadrut" signifies "black-
Darkness. ness" (Isa. i. 3); and the adverb "qedorannit," "wrapped in mourning" (Mal. iii. 14).

"Hashak" (to be dark), a word generally employed to signify the darkness of approaching night (Isa. v. 30; Job xviii. 6), is also used of the eyes becoming dim (Lam. v. 17) or blind (Ps. lxix. 24), and of a black complexion (Lam. iv. 8). Hence the terms "hoshak" (darkness), "haklil" (Gen. xlix. 12), and "haklilit" (Prov. xxiii. 29) refer to the darkly lustrous or inflamed appearance of the eyes. The second, as used in Gen. xlix. 12, refers to the sparkling luster of dark-red wine, comparing the beauty of Judah's eyes therewith; the third (Prov. xxiii. 29) is descriptive of the inflamed eyes due to protracted night sessions over the wine-cup at the wine-shops (see Jastrow, "Proc. Soc. of Biblical Exegesis," xi. 128). "Kimrir" (Job iii. 5), originally "casting down," "oppression," seems to mean "blackness" (compare "shahuf," below).

(*b*) In the later Hebrew "shahor" is frequently more nearly defined as "ink-black" (Niddah ii. 7), or "black as the sediment of ink" (*ib.*), like black wax, pitch, grapes, olives (*ib.*), "mouse-gray" (Pes. 10b), or as black as a negro (Suk. iii. 6). In Num. R. ii. 7, the term "shahor" is applied to "bareket," probably taken here as sardonyx, and described as consisting of one-third white, one-third black, and

one-third red; to "sappir," black like stibium (*i. e.*, metallic grayish-blue [?]; to "leshem" and to "shebo," probably gray amethyst, said to be mixed black and white. The "shoham"—here the deep sea-green beryl—is said to be "shaḥor 'ad meod" (very dark). Hence, "shaḥrurit" = the Aramaic "shaḥrurita" (blackness, darkness, Ta'anit 23b; B. K. 20b; B. M. 117b) and the by-form "sheḥarḥarut" (Cant. R. i. 6). "Sheḥamtit" (brownish), of the color of grain (B. B. v. 6), is sometimes contracted to "shamtit" (Yer. Ma'as. Sh. iv. 54d).

Aramaic: "sheḥum," "sheḥim," literally "warm," "hot," = the Hebrew "ḥum" (brown, Targ. O. to Gen. xxx. 32).

"Shaḥuf" or "ṭaḥuf" (gray, dark), a term which is used of sheep's wool (Hul. xi. 2, 136b), goes back to "saḥaf" (cast down). The variation in the first consonant points to a differentiation of an original "thakhaf." (On the development of meaning from the idea of overpowering, casting down, oppressing, to that of darkness, compare "qadar," above, and Levias, "Babyl. Aram. Gram." p. 210, note 6). "Piḥem" (to blacken, soil), denominative of "peḥam" (coal, is used of soot, the sun, and other things. The passive of this may be used in the pu'al and nitpa'el (compare Jastrow, "Dict." *s. v.*). The verb "shetak" is used to designate "rust-colored" or "bronze" (Ta'an. 8a).

Aramaic: "ukkam," originally signifies "oppressed," then "black" (compare Levias, *l. c.*); "le-ḥush," literally "glowing," then "brown" (Targ. Yer. to Gen. xxx. 32, 33, 35); "ḥalid" (rust-colored [?]; compare Targ. Job xi. 17 Ms.; Jastrow, "Dict." *s. v.*). "Ḳewah" or "ḳaḥah" (deep black) is applied to horses (Targ. to Zech. i. 8).

(a) White is usually expressed in the Bible by the word "laban," which is used of the color of goats (Gen. xxx. 35, 37), of teeth (*ib.* xlix. 12), of manna (Ex. xvi. 31), of leprous hair (Lev. xiii.), of garments (Eccl. ix. 8), and of horses (Zech. i. 8; vi. 3, 6). Shades of white are: milk-

Degrees of White. white (Gen. xlix. 12), coriander-seed-white (Ex. xvi. 31), snow-white (Num. xii. 10; II Kings v. 27; Ps. lxxviii. 15 [A. V. 14]; Isa. i. 18), and dull white (Lev. xiii. 39). Hence the noun "loben" (whiteness, Ecclus. [Sirach] xliii. 18). The moon, on account of its pale light, is called "lebanah."

The Aramaic terms corresponding to "laban" are "ḥawar," used of the face becoming pale with shame (Isa. xxix. 22), and "ḥiwwar" (white), applied to a snow-white garment (Dan. vii. 9).

(b) The white color may be as white as snow, as the calcimining in the Temple, as wool, as the cuticle of the egg (Neg. i., referring to the color of leprous spots), as pearl (Yoma 75a), or as the wood below the bark (Hul. 47b). The color of the stone "yahalom," probably milky opal, is white (Num. R. ii. 7). "Libbun" (whitening) is used of wool (B. K. 93b). "Libben" means "to bleach cloth" (Yer. Ber. ix. 1, 13c), "to glaze tiles" (Bezah iv. 7), "to heat to a white heat iron instruments" (Ab. Zarah v. 12). "Hilbin" signifies "to grow white," used of hair (Neg. i. 6); "to whiten the wing of a raven" (Cant. R. v. 11); "to cause paleness of face through shame" (Ab. iii. 11). Hence, "labnunit"

(whiteness, Neg. iv. 4), and the by-form "labnut" (Lev. R. xiv.). The verb "kasaf," in various forms, is used to indicate paleness of countenance caused by shame or fright (compare Jastrow, "Dict." *s. v.*). The word is perhaps connected with "kesef" (silver). Notice also "lawkan," "labkan" = the Greek λευκόψ (albino, or white-spotted in the face, Ber. 58b). To express the idea of the hair becoming grayish-white through old age, the root "sib" is used (I Sam. xii. 2; Job xv. 10), whence the derivative "sebah," meaning "gray hair" (Gen. xlii. 38; xlv. 29, 31; Deut. xxxii. 25; Hos. vii. 9; Prov. xx. 29), or the "hoary hair" of old age (Isa. xlvi. 4).

In Aramaic the roots "ḥawar," "kesaf," and "sib" are used in the same senses as in Hebrew; add to which "ḳiṭman" (ash-gray, Targ. to Zech. vi. 3, 7).

(a) Red is expressed by "adom," a term probably connected with "dam" (blood). It is applied to blood (II Kings iii. 22), to blood-stained apparel (Isa. lxiii. 3), to a heifer (Num. xix.

Red. 2), to a horse (Zech. i. 8), and to brownish yellow lentils (Gen. xxv. 30). The

adjective "admoni" describes a reddish-brown complexion (Gen. xxv. 25; I Sam. xvi. 12). Verbal forms are used of becoming as red as crimson (Isa. i. 18), of skins dyed red (Ex. xxv. 5), and of a blood-besmeared shield (Nahum ii. 4 [A. V. 3]). The diminutive form of the adjective "adamdam" expresses "reddish," applied to the color of the leprous spot (Lev. xiii. 19, 24) or a sore (*ib.* xiii. 42).

Other terms occasionally occur which denote some shade of red, as "sarok" (reddish-brown, sorrel), applied to horses (Zech. i. 8); and "ḥamuz," some shade of red not more closely defined (Isa. lxiii. 3). "Amoz" (Zech. vi. 7), translated by the Targum "ash-gray," stands, in the opinion of modern scholars, for "hamez" (red; compare Gesenius-Buhl, "Hebräisches und Chaldäisches Handwörterbuch," *s. v.*). Some trace the root "ḥamar" (to be red) in Ps. lxxv. 9 and Job xvi. 16.

(b) Redness is applied in Talmudic literature to the scarlet lily (Cant. R. vii. 3), to collyrium (Lam. R. iv. 15), to wine (Num. R. ii. 7), to the ruby (*ib.*), and in the hif'il form is used also of "putting to the blush" (Num. R. iv. 20). Deep red is "adamdam she-ba'adummim" (Neg. xi. 4). Hence are formed the nouns "odem" (Niddah 32b), "admut" (Num. R. ii. 7, where אדמות, ed. Wilna, is to be corrected to אדמות), and "admumit" (redness, Hul. 87b). Compare also "giḥor" (red of complexion, Ber. 58b; Bek. vii. 6, 45b).

The usual term for red in Aramaic is "summaḳa" (reddish) or "simmuka" (compare Jastrow, "Dict." *s. v.*). Occasionally are found "giḥora," and "giḥya," "giḥya" (Bek. 45b). The latter properly means "flame-colored."

(a) The term "yarak," originally "pale," is used to describe those uncertain colors which waver between green, yellow, and blue. It is applied to the color of vegetation (Job xxxix. 8; II Kings xix. 26; Isa. xxxvii. 27), the fading color of

Green, Blue, decaying vegetation (Deut. xxviii. 22; Amos iv. 9; Hag. ii. 17), or of a panic-stricken countenance (Jer. xxx. 6). "Yerakraḳ" (greenish or yellowish) is used of the appearance of plague-spots (Lev. xiii. 49, xiv.

37) and of gold (Ps. lxxviii. 13). The term "haraz," applied to gold, probably means "yellow."

(b) The same root ירק is used in later Hebrew and Aramaic for green, yellow, and blue (compare Yoreh De'ah, 188, 1). Green is given as the color of leek (Ber. i. 2; Suk. iii. 6), and of myrtle (Meg. 13a). Yellow is the color of crocus (Niddah ii. 6; Hul. 47b), of cuscutea (Hul. l.c.), and of the yolk of an egg (*ib.*). The color of the "tarshish" (probably chrysolite or olivin) is like that of clear olive-oil (Num. R. ii. 7). Hence, "morika" (crocus) and "yeraḥon" (jaundice). The verb "horik" (Gen. R. xiii.; Ber. 44b) is used to denote "making pallid," "pale," especially the pale yellowish color of a frightened countenance (Soṭah iii. 4). The same idea is conveyed by the verb "kirkem," a denominative of the noun "karkom" (crocus). Compare, further, "morika" (saffron-colored), from מרק, a by-form of ירק (Levi's, "Am. Jour. Semitic Lang." xvi. 250); "hardali" (mustard-colored), used of the color of wine (Shab. 63a), "kela'llan," an adaptation of *κελαῖνον* (sea-green, blue; compare Krauss, *l.c.* s. v.).

Variegated Surfaces: (a) A party-colored appearance of one kind or another is denoted by the following terms: "barod" (grizzled, used of goats, Gen. xxxi. 10, 12; and piebald, of horses, Zech. vi. 3, 6); "ṭalu" (literally, "patched," hence "besprinkled," "flecked"), used of goats (Gen. xxx. 32 *et seq.*) and of dyed stuffs of many colors (Ezek. xvi. 16); "naḳod" (literally, "dotted," hence "speckled," having light spots on a dark skin), used of goats (Gen. xxx. 32; xxxi. 8, 10, 12); "aḳod" (ring-streaked; literally, "tied"), referring to light stripes on a dark skin (Gen. xxx. 35, 39; xxxi. 8, 10, 12), the stripes resembling ropes.

(b) From "namer" (leopard) the verb "nimmer" is derived, having the meaning of giving a checkered or striped appearance to something, and is used of the appearance of a field in which the fruits have been gathered in some places and left standing in others (Peah iii. 2), or of a checkered web (B. K. 119b), or of writing, in which a number of words are stricken out (Git. 54b). "Patuk" (mixed) is applied to the color of plague-spots, and is described as looking like wine mixed with snow, or wine mixed with water, or milk before being mixed (Neg. i. 2).

In Aramaic the following terms are used: "nemor" (speckled; compare "nimmer," above); "regol" (ring-streaked; literally, "having some spots on the feet"); "reḳoa'" (literally, "patched"), the same as the Biblical "ṭalu" (compare above); "ḳeruah" (literally, "bald"; having light-colored spots on a dark skin); and "huṭrana" (striped like a staff), used of swine (Shab. 110b).

Pigments: (a) Of pigments known and used in Biblical times, four are mentioned. Three were derived from animals and one from a metal. Scarlet or crimson was obtained from an insect (coccus), which gave its name to a species of oak (*Ilex coccifera*). By infusing the insect in boiling water a beautiful red dye was produced, superior in effect and durability to cochineal. To designate this color the word "tola'" (worm) is used (Isa. i. 18; Lam. iv. 5).

More often, however, the form "tola'at" is found preceded or followed by "shani," a word supposed

to mean "to glitter." In this form it is mentioned as a costly possession (Ex. xxxv. 23), and as being, therefore, suitable for an offering (Ex. xxv. 4, xxxv. 6; Lev. xiv.; Num. xix. 6), for the Tabernacle hangings (Ex. xxvi. 36, xxvii. 16, xxxvi. 37, xxxviii. 18), for the ephod (Ex. xxviii. 56, xxxix. 28), etc. A thread of this color was commonly used in early times as a sign to aid recognition (Gen. xxxviii. 28, 30; Josh. ii. 21). In these passages, as well as in II Sam. i. 24 and Cant. iv. 3, "shani" alone is used. The plural "shanim" (scarlet stuffs) occurs in Prov. xxxi. 21 and Isa. i. 18. In later times the Persian loan-word "karmil" came into use (II Chron. ii. 6, 13; iii. 14). The verbal form "metulla'im" (clothed in scarlet) occurs in Nahum ii. 4. A similar shade of color was derived from "shashar" (minium, red oxid of lead), used for painting ceilings (Jer. xxii. 14) and images (Ezek. xxiii. 14).

(b) The Targumim and Mishnah use for scarlet the expression "zehorit," on the etymology of which compare Jensen, in Brockelmann, "Lexicon Syriacum," 93b. The Aramaic has also the adjective "tol'ana," or "tolana" ('Ab. Zarah 28b). In later times crimson was also obtained from "puah" (madder; see Rieger, "Versuch einer Technologie und Terminologie der Handwerke in der Mischnah," i. 23, note 88). From seaweeds were obtained a cosmetic rouge, "piḳas" (fucus; Rieger, *ib.*), and the mineral pigment "sikra" (according to Löw, "Graphische Requisiten," etc., i. 165, vermilion; according to Rieger, *l.c.* p. 24, note 43, minium). A kind of scarlet was "sasgona," or "sasgewana," etymology unknown (Targ. to Cant. vii. 2).

(a) The purple dyes were obtained from the "hal-lazon," a species of shell-fish called *Murex brandaris* and *Murex trunculis*, on which see Rieger (*l.c.* p. 21). It yielded purple-red (Hebrew "argaman" = Aramaic "argewan") and purple-blue or violet (Hebrew "tekelet" = Aramaic "tikla"). Both colors figure largely in the decoration of the Tabernacle and the priestly robes. In Jer. x. 9 both are mentioned as contributing to the splendor of heathen worship. In Judges viii. 26 the Midianitish chiefs are said to have worn robes of purple-red. Ezekiel (xxiii. 6) relates how the robes of purple-blue worn

by the Assyrians impressed the women of Israel; and he knows also of purple-red and purple-blue from Elishah (*ib.* xxvii. 7). In Ecclus. (Sirach) xlv. 10 both dyes are mentioned as occupying a prominent place in the raiment of Moses; and ribbons of purple-blue are said to form part of the adornment of wisdom (*ib.* vi. 30). On the defeat of Gorgias, dyed stuffs of both colors were among the spoil taken by Judas Maccabeus (I Macc. iv. 23). Purple robes of office were common. Judas was struck by the fact that the Romans, notwithstanding their power and riches, were not clothed in purple (*ib.* viii. 14). When, however, Alexander appointed Jonathan high priest he sent him a purple-red robe (*ib.* x. 20); so likewise did Antiochus when he confirmed him in the office (*ib.* xi. 58). On the other hand, when the treachery of Andronicus was discovered he was at once deprived of the purple robe (II Macc. iv. 38).

(b) In Talmudic times purple-red was obtained also from "lakka" (lac-dye; compare Rieger, *l.c.*

i. 22). The Greek loan-word "porpura" (πορπύρα, "purple stuff") is very common in traditional literature (compare Krauss, *l.c.* ii., *s.v.*).

Other pigments known in Mishnaic times were "isatis" = *isatis* ("woad," *Isatis tinctoria*), "kozah" (madder or safflower); "kelife eguzim" (the fresh shells of the walnut); "kelife rimmonim" (pomegranate peel); "rikpah," a kind of onion-plant; and "heret" (vitriol). With the latter a black color was obtained (Rieger, *l.c.* i. 23, 24).

Symbolism of Colors: (a) It has been generally assumed that at times colors are used in the Bible symbolically, either in the ritual, as in the construction of the Tabernacle and in the priestly raiments; or apocalyptically, as in the visions of Zechariah and of Daniel; or, as a literary device, in poetical diction. Philo ("De Vita Mosis," iii. 6) and Josephus ("Ant." iii. 7, § 7) attempted to explain the ritual symbolism of colors, but without convincing force (see, also, Baehr, "Symbolik des Mosaischen Kultus," Heidelberg, 1874). The apocalyptic symbolism is admitted more generally; yet it fails when tested in detail. Literary symbolism, however, based on a psychological connection between the various color-sensations and moods of feeling, is found among most nations. Yet the relations between a given color and the symbolized objects or moods are not fixed; and they leave room for difference of explanation.

Black or dark color points to mourning or affliction (II Sam. xix. 24; Zech. vi. 6, 8); such was probably also the color of sackcloth used in mourning. On the other hand, white suggests purity (Isa. i. 18; Ps. li. 9) and joy (Mishnah Mid. v. 4). Scarlet or red is symbolical of bloodshed, of sin in general (Isa. i. 15, 18; lxiii. 1), and, in the opinion of some commentators, of vigorous life (Lev. xiv.; Num. xix.). Purple-red denotes royalty and royal splendor (Judges viii. 26; Esth. viii. 15; Dan. v. 7). Purple-blue, used for fringes in the garment of every Israelite (Num. xv. 38), is thought, on the one hand, to symbolize the high dignity of every member of the people of the covenant (compare Ex. xix. 6); and, on the other, to suggest the God of heaven (Gen. xxiv. 7; Ps. xi. 4), because of the same color as the sky.

(b) Color-symbolism plays a great part in the Cabala, where to each Sefirah are attributed one or more colors; and one who wishes to energize the influence of a certain Sefirah has to contemplate, or clothe himself in, the particular color attributed to that Sefirah. White signifies peace, mercy, and pity; black, latency of qualities; red, bloodshed, cruelty, and justice; azure, attributed to the Sefirah of wisdom, is said to denote the first step from black (latency) to the development of color—that is, active energy in general; saffron-color or yolk-yellow is considered a combination of red and white; green is said to be a combination of red, white, and azure; purple-red, a compound of all colors; golden yellow symbolizes cleaving, justice, etc.

C. L.

COLORADO: One of the United States of North America; bounded on the north by Wyoming and Nebraska; east by Nebraska and Kansas; south by Oklahoma and New Mexico; and west by Utah. It was admitted into the Union in 1876. The excitement consequent on the discovery of gold at Pike's Peak in 1858, following the panic of 1857, which clogged the wheels of industry in the Eastern States, brought the first settlers to Colorado. There were no railroads; and the pioneers crossed the plains and mountains in wagons drawn by oxen or horses. Among the Jews who survived the hardships of the long journey, the perils from wild animals, and the attacks of savage Indians, were Isidor Deutsch, Leopold Mayer, A. Jacobs, A. Goldsmith, F. Z. Salomon, D. Kline, and others.

Denver, the capital of Colorado and the most important city of the Rocky Mountain region, was

Temple Emanuel, Denver, Col.
(From a photograph.)

settled in 1858-59, and gradually became the center of Colorado Jewish life. In 1861 the United States government deeded to Denver a plot of ground for burial purposes; of this the Jews were allotted acres. A Cemetery Association was the first Jewish organization. In 1873 the Jews of Denver organized for worship, and in 1874 built Temple Emanuel, a small synagogue at 19th and Curtis streets. The members were for the most part energetic merchants of German birth. By 1882 Congregation Emanuel had outgrown the little synagogue, and a larger one was constructed at 24th and Curtis streets. This building was destroyed by fire Nov. 5, 1897, and a beautiful structure on 16th avenue and Pearl street was erected, and dedicated Jan. 29, 1899. Rabbis Block, Elkan, Schreiber, J. Mendes de Solla, and William S. Friedman have successively occupied the pulpit. A Ladies' Auxiliary, a Jewish Relief Society, mainly for indigent consumptives, and a

burial society, Hessed Shel Emeth, have also been established; and four Orthodox congregations are in existence. Denver also has lodges of the orders B'nai B'rith, Keshet Shel Barzel, Sons of Benjamin, and B'rith Abraham.

The most important philanthropic institution in Denver is the National Jewish Hospital for Consumptives, founded by Rabbi William

National Jewish Hospital for Consumptives. S. Friedman Sept. 10, 1890. This hospital became an imperative necessity by reason of the hundreds of penniless Jewish victims of tuberculosis who came to Colorado. In 1898

Denver Lodge of the Independent Order of B'nai B'rith appointed Alfred Muller chairman of a committee to urge the district Grand Lodge No. 2 of the order to espouse the cause of the consumptives by taking charge of this institution; and through his tireless energy, together with that of Rabbi W. S. Friedman, the National Jewish Hospital for Consumptives was dedicated Dec. 10, 1899.

The Constitution Grand Lodge of the order, at a meeting held in Chicago April 28, 1900, decided to tax all its members twenty-five cents yearly for the support of the hospital, and to make of it an independent corporation governed by thirty-five trustees, seven of whom should be elected by the Independent Order of B'nai B'rith—one from each district—the remainder to be chosen by the contributors. The trustees immediately added several buildings.

In 1902 M. Guggenheim's Sons donated \$30,000 for a "Guggenheim Pavilion." The National Jewish Hospital for Consumptives has accommodation for ninety patients. None but indigent consumptives in the curable stages of the disease are admitted; and these come from all parts of the United States.

Denver has about 4,000 Jews, most of whom are merchants. There are, however, miners, smelter-owners, day-laborers, and many lawyers and physicians. Twelve Jewish students attend the State University at Boulder, which has a chair of Hebrew occupied by Rabbi William S. Friedman.

Colorado Springs formed a Benevolent Association Oct., 1898, and a B'nai B'rith lodge in Oct., 1901. A congregation is now being organized. Colorado Springs is a health resort, and contains 250 Jews.

Cripple Creek and the adjoining town of **Victor** have 150 Jews. There is no congregation in the district; but services are held on the holy days. The two towns have a B'nai B'rith lodge. Cripple Creek and Victor are the chief gold-mining sections in America.

Leadville in 1864 established Congregation Israel, which has 25 members. The Orthodox congregation, Keneseth Israel, has a smaller following. There are also a Jewish cemetery and a relief society. The Jewish population is 175. Leadville is a noted silver-mining camp.

Pueblo, the second city of the state, founded Congregation Emanuel Oct. 3, 1899, with 50 members; it has a temple, and Rabbi Harry Weiss is in charge. The other Jewish organizations of Pueblo

are: Ladies' Temple Association, Auxiliary Society, Jewish Woman's Council, and B'nai B'rith lodge. The Jewish population is 500. Pueblo is a growing manufacturing town.

Trinidad founded Congregation Aaron in 1883, and has a temple, with a membership of 35. L. Freudenthal, the rabbi, has officiated since 1888. The Jews number 150, and have an Auxiliary Society, a Hebrew Ladies' Aid Society, and a B'nai B'rith lodge.

There are also several hundred Jews scattered throughout the smaller towns of the state. Altogether Colorado numbers about 5,800 Jews.

W. S. F.

COLORNI (COLORNO), ABRAHAM: Italian engineer; born at Mantua about 1580. His great skill in his profession caused him to be much sought after, and in 1578 he held the position of engineer at the court of Alfonso d'Este, Duke of Ferrara, who, in 1588 sent him to Prague. Soon after Colorni, with his son Simon, went to Mantua, looking after Alfonso's private affairs; and then returned to the court of Alfonso d'Este, who, at the request of the duke Frederick, sent him to his court at Württemberg in 1597.

Colorni was famous not only as an engineer and mechanic, but also as one of the greatest mathematicians and archeologists of his age, and above all as a man of charming manners and many accomplishments, including dueling, his skill in which he once had occasion to exercise against a slanderer. Tommaso Garzoni, in his work "La Piazza Universale," dedicates a sonnet to Colorni, and in a subsequent letter speaks in very high terms of him. He enumerates his achievements in the field of mechanics and his inventions, and expresses the wish that the man who possesses such high qualities should also become a Christian. Among Colorni's inventions was a kind of ten-chambered revolver, of which, it is said, he made 2,000 at the request of Alfonso.

Colorni was the author of the following works: "Entimetria," rules for the measurement of straight lines (mentioned by Garzoni); "Tavole," mathematical tables (also mentioned by Garzoni); "Clavicula Solomonis," translated into Italian, at the request of the Duke of Mantua, from the Hebrew work on magic, "Mafteah Shelomoh" (Mantua, 1580?). This translation served as a model for the French version (still extant in several manuscripts) entitled "La Clavicule du Très Savant Solomon, dans Laquelle les Secrets des Secrets Sont Ouverts et Découverts." It was probably against this work that Colorni, according to Garzoni, wrote a book in which he derided physiognomy and chiromancy. Colorni was also the author of a treatise upon the art of writing in cipher, entitled "Scotographia o Vere Scienza di Scrivere Oscuro Facilissima et Securissima per Quasi Voglia Lingua" (Prague, 1593), and dedicated to Rodolph II.

COLORNI, MALACHI: Italian author; lived at Modena in the eighteenth century. He wrote a guide to letter-writing, "Megillat Sefer," still extant in manuscript, containing thirty-one letters (Steinschneider, "Cat. Bodl." No. 1379). He also copied a large work of the same nature, the "Sofer Mahir" by Ishmael Hazaq of the seventeenth century (Steinschneider, *ib.*). These letters contain valuable notices of the lives of famous contemporaries, as well as of events of the Italian-Jewish world of that time.

COLUMBUS, CHRISTOPHER, AND THE JEWS: According to his own statement, Columbus had constant intercourse with Jews and Moors, with priests and laymen. He had personal relations with the mathematician Joseph Vecinho, physician-in-ordinary to King João II. of Portugal, and with other learned Jews of Lisbon. Vecinho presented him with his Latin translation of the astronomical tables of Abraham Zacuto, the famous mathematician, which Columbus always carried with him on his voyages of discovery and found most serviceable. He ascribed it principally to this "Jew" Vecinho, whom he mentions twice in his note-books, that the king of Portugal refused to consider his plans of discovery. At Salamanca Columbus became personally acquainted with Zacuto, whose scientific works he praised highly. At Malaga he met the Spanish farmer-in-chief of taxes, Abraham Senior, and also Isaac Abravanel, who was the first one to assist him financially in his undertakings. It is not known whether he had business relations with the Jews during his stay at Lisbon, or whether he borrowed or received aid from them in his financial difficulties there. In his testament he bequeathed half a silver mark to a Jew living by the gate of the Jews' street in Lisbon, or to the one whom a priest might designate ("a un Judio que moraba a la puerta de la Juderia en Lisboa o a quien mandare un sacerdote el valor de medio marco de plata"). See also AMERICA, THE DISCOVERY OF.

COMMANDMENT: The rendering in the English Bible versions of the Hebrew מצוה, which, in its technical sense, is used in the Bible of a commandment given either by God or by man (I Kings ii. 43). According to the critical schools, it is a word of comparatively late coinage, as it does not occur in documents earlier than D and JE. In the singular it sometimes denotes the "code of law" (II Chron. viii. 13; Ezra x. 3; Ps. xix. 9), or even "Deuteronomy" alone (Deut. vi. 25, viii. 1); and as such is parallel to "Torah" (Ex. xxiv. 12). In the plural it designates specific commands contained in the code, which are as a rule expressed in sentences beginning with "Ye shall" or "Ye shall not," and is sometimes combined with "hukkim," "hukkot"

(statutes), "mishpatim" (ordinances), and even "edut" (testimonies).

E. G. H.

In rabbinic terminology "mizwah" is the general term for a divinely instituted rule of conduct. As such, the divine commandments are divided into (1) mandatory laws known as מצות עשה, and (2) those of a prohibitory character, the מצות לא תעשה. This terminology rests on the theological construction that God's will is the source of and authority for every moral and religious duty.

In due logical development of this theology, the Rabbis came to assume that the Law comprised 613 commandments (see COMMANDMENTS, THE 613), of which 611 are said to have been given through Moses (Deut. xxxiii. 4, תורה being numerically equal to 611); the first two commandments of the Decalogue were given by the mouth of God Himself (R. Joshua b. Levi, in Pes. R. xxii.; compare Mak. 24b-25a; Hor. 8a; Pirke R. El. xli.). According to R. Ismael only the principal commandments were given on Mount Sinai, the special commandments having been given in the Tent of Meeting. According to R. Akiba they were all given on Mount Sinai, repeated in the Tent of Meeting, and declared a third time by Moses before his death (Sotah 37b; compare Mek., Mishpatim, xx. to Ex. xxiii. 19, and Sifre, Debarim, 104). All divine commandments, however, were given on Mount Sinai, and no prophet could add any new one (Sifra to Lev. xxvii. 34; Yoma 80a). Many of these laws concern only special classes of people, such as kings or priesthood, Levites or Nazarites, or are conditioned by local or temporary circumstances of the Jewish nation, as, for instance, the agricultural, sacrificial, and Levitical laws.

The Biblical commandments are called in the Talmud "mizwot de oraita"; commandments of the Law in contradistinction to the rabbinical commandments, "mizwot de rabbanan." Among the latter are: (1) the benediction, or thanksgiving for each enjoyment; (2) ablution of the hands before eating; (3) lighting of the Sabbath lamp; (4) the 'ERUB, on preparation for Sabbath transfer; (5) the HALLEL liturgy on holy days; (6) the HANUKKAH lights; and (7) the reading of the Esther scroll on PURIM. These seven rabbinical commandments are treated like Biblical commandments in so far as, previous to the fulfilment of each, this BENEDICTION is recited: "Blessed be the Lord who has commanded us . . .," the divine command being implied in the general law (Deut. xvii. 11, xxxvii. 7; Shab. 23a). Many of the Biblical laws are derived from the Law only by rabbinical interpretation, as, the reading of the Shema' (Deut. vi. 4-7), the binding of the tefillin and the fixing of the mezuzah (*ib.* 8-9), and the saying of grace after meals (*ib.* viii. 10). "While reciting the Shema' every morning the Israelite takes upon himself the yoke of the kingdom of heaven; while reciting the chapter 'We-hayah im shamoa'' [Deut. xi. 13-22] he takes upon himself the yoke of the divine commandments" (Ber. ii. 1). "In fulfilling a divine commandment one must do it with the intention of thus fulfilling God's will" (Ber. 13a, b; Naz. 23a, b). A hundred mizwot ought to be fulfilled by the Israelite each day (see BENEDICTION), and seven ought to surround him constantly like guard-

ian spirits (R. Meir, in Yer. Ber., end; Tosef., Ber., end). "Also, the commonest Israelite is as full of merit by fulfilment of divine commandments as the pomegranate is of seed" (Cant. R. iv. 3). The fulfilment of a divine commandment is a merit ("mizwah"); the neglect, a transgression ("aberaḥ"). These are weighed against each other in the balance on the day of judgment to decide whether a man belongs to the righteous or to the wicked to be accordingly rewarded or punished ('Ab. Zarah 2a, 3a; Kid. 39b).

The sons of Noah were also considered to be under the obligation to obey the will of God as revealed in direct specific orders or mizwot promulgated for them. These are variously enumerated as five, six, and ten. In Tos. 'Ab. Zarah viii. 4 seven Noachian commandments are enumerated: (1) to establish courts of justice, (2) to abstain from idolatry, (3) from blasphemy, (4) from incest, (5) from murder, (6) from robbery, (7) from eating flesh cut from living animals. In Gen. R. xvi.-xxiv. (compare *ib.* xxiv.; Lev. R. xiii.), only six are mentioned as having been given to the first man. In Sanh. 56a, 57a, seven Noachian commandments are spoken of, and derived partly as Adamitic, from Gen. ii. 16, and partly from Gen. ix. 4 *et seq.* To these some tannaim add three: the prohibition of blood from living animals, of castration, and of witchcraft. In Hal. 92a thirty commandments are mentioned as having been accepted, but not observed, by the sons of Noah (compare Gen. R. xcvi.; Midr. Teh. Ps. ii. 5; Yer. 'Ab. Zarah ii. 40c). In the Book of Jubilees (vii. 21) only the three capital sins are specified (see NOACHIAN LAWS).

"Mizwah," in the parlance of the Rabbis, came to express any act of human kindness, such as the burial of the body of an unknown person ("met mizwah"; compare Bernays, "Gesammelte Schriften," 1885, i. 278 *et seq.*, on the Buzygian laws mentioned by Philo in connection with these "commandments" of humanity; Sifre, Naso, 26; Naz. 47b). A mizwah which can be fulfilled only by the transgression of another law is considered unlawful ("mizwah ha-bo'ah ba'aberaḥ, 'aberaḥ"; Suk. 30a; Yer. Shab. xiii. 14a). The proselyte on being initiated into Judaism must be familiarized with commandments both of great and of small import (Yeb. 47b). This rule seems to be directed against the older practise followed by the Christian Church (see DIDACHE). The fulfilment of a commandment is a protection against evil powers (Ber. 31a; Pes. 8a; Soṭah 21a; Kid. i. 10), and becomes a guardian angel pleading for reward in the future life (Soṭah 3b).

According to the teachings of Judaism, all moral laws are virtually and in their ultimate analysis divine commandments. Obedience to the Divine Will is the first requisite of the moral life (see DUTY). This is the meaning of the Biblical account of Adam's offense. The first commandment was intended to test his obedience and thus to awaken his moral consciousness (see SIN; ORIGINAL SIN, DOGMA OF). In the Pentateuch the Ten Commandments are not designated as "Mizwot," but are called the "Ten Words" (עשרת הדברים). In Jewish literature they are spoken of as the עשרת הדברות (see DECALOGUE).
E. G. H. K.—E. G. H.

COMMANDMENTS, THE 613: That the law of Moses contains 613 commandments is stated by R. Simlai, a Palestinian haggadist, who says (Mak. 23b): "Six hundred and thirteen commandments were revealed to Moses; 365 being prohibitions equal in number to the days of the year, and 248 being mandates corresponding in number to the bones of the human body." The number 613 is found as early as tannaitic times—*e.g.*, in a saying of Simon ben Eleazar (Mek., Yitro, Baḥodesh, 5) and one of Simon ben Azzai (Sifre, Deut. § 76, Friedman's ed., p. 90b)—and is apparently based upon ancient tradition (see Tan., Ki Teze, ed. Buber, 2; Ex. R. xxxii.; Num. R. xiii., xviii.; Yeb. 47b; Shab. 87a; Ned. 25a; Shebu. 29a; comp. Bacher, "Ag. Tan." i. 413, ii. 436). The authenticity of the statements attributed to R. Simlai, however, has been questioned by authorities such as Nahmanides and Abraham ibn Ezra (see M. Bloch, in "Rev. Et. Juives," i. 197, 210; v. 27 *et seq.*; Weiss, "Dor," p. 74, note 50). The first to undertake the task of identifying the commandments was Simeon Kahira, in his "Halakot Gedolot." He begins with the prohibitions, which he classes in the order of the gravity of the punishments incurred by their transgression, while in regard to the mandates he follows the order of the parashiyyot, beginning with the Decalogue.

Kahira was followed by Saadia, Gabirol, and many others, who enumerated the 613 commandments in liturgical poems (see AZHAROT). In order to make up the number 613, Kahira and the poets just mentioned were compelled to incorporate many rabbinical laws. This method was criticized by Maimonides, who published a work entitled "Sefer ha-Mizwot," laying down fourteen guiding principles for the identification of the commandments, which he enumerates accordingly. Some of these principles were attacked by Nahmanides and others, who showed that Maimonides himself had not always been consistent. New identifications were therefore proposed by Moses ben Jacob of Coucy, author of the "Sefer Mizwot ha-Gadol" (SeMaG), and Isaac ben Joseph of Corbeil, author of the "Sefer Mizwot ha-Katon" (SeMaK). The following is a list of the 613 commandments of Maimonides:

MANDATORY COMMANDMENTS.

1. To know that the Lord God exists. Ex. xx. 2.
2. To acknowledge His unity. Deut. vi. 4.
- 3-4. To love and fear Him. Deut. vi. 5, 13.
5. To pray to Him. Ex. xxiii. 25.
6. To cleave to Him. Deut. x. 20.
7. To swear by His name. Deut. vi. 13, x. 20.
8. To resemble Him in His ways. Deut. xxviii. 9.
9. To sanctify His name. Lev. xxii. 32.
10. To read the Shema' each morning and evening. Deut. vi. 7.
11. To learn and to teach others the Law. Deut. vi. 7.
- 12-13. To bind teffilin on the forehead and arm. Deut. vi. 8.
14. To make zizit. Num. xv. 38.
15. To fix a MEZUZAH. Deut. vi. 9.
16. To assemble the people to hear the Law every seventh year. Deut. xxxi. 12.
17. To write a copy of the Law for oneself. Deut. xxxi. 19.
18. That the king write a special copy of the Law for himself. Deut. xvii. 18.
19. To bless God after eating. Deut. viii. 10.
20. To build the Temple. Ex. xxv. 8.
21. To reverence the sanctuary. Lev. xix. 30.
22. To watch the sanctuary perpetually. Num. xviii. 2.
23. That Levites shall serve in the sanctuary. Num. xviii. 23.

24. That at services the priests wash their hands and feet. Ex. xxx. 19.
25. That the priests kindle the lights in the sanctuary. Ex. xxx. 19.
26. That the priests bless Israel. Num. vi. 23.
27. To set showbread and incense before the Lord on Sabbath. Ex. xxv. 30.
28. To burn incense twice each day. Ex. xxx. 7.
29. To keep fire continually upon the altar. Lev. vi. 13.
30. To remove the ashes daily from the altar. Lev. vi. 10.
31. To put the impure out of the holy place. Num. v. 2.
32. That the Aaronites have the place of honor. Lev. xxi. 8.
33. To clothe the Aaronites with priestly garments. Ex. xxviii. 2.
34. That the Kehathites carry the Ark upon their shoulders. Num. vii. 9.
35. To anoint high priests and kings with oil. Ex. xxx. 31.
36. That the priests officiate by turns. Deut. xviii. 6, 8.
37. That the priests pay due honors to the dead. Lev. xxi. 3.
38. That the high priest take a virgin to wife. Lev. xxi. 13.
39. To sacrifice twice a day. Num. xxviii. 3.
40. That the chief priest offer an oblation daily. Lev. vi. 20.
- 41-3. To offer an additional oblation every Sabbath, on the first of every month, and on the Feast of Passover. Num. xxviii. 9, xxviii. 11; Lev. xxiii. 36.
44. To offer a sheaf of the first barley on the second day of Passover. Lev. xxiii. 10.
45. To add an oblation on the day of the Feast of Shebu'ot. Num. xxviii. 26.
46. To offer two loaves of bread on Shebu'ot. Lev. xxiii. 17.
47. To add an offering on the first of Tishri. Num. xxix. 1.
48. To add an offering on the Day of Atonement. Num. xxix. 7.
49. To observe the service on the Day of Atonement. Lev. xvi. 3.
50. To add an offering on the Feast of Sukkot. Num. xxix. 13.
51. To offer a special sacrifice on the eighth day of Sukkot. Num. xxix. 35.
52. To keep the festival at the three seasons of the year. Ex. xxiii. 14.
53. That every male appear at the feast. Deut. xvi. 16.
54. To rejoice at the feasts. Deut. xvi. 14.
- 55-6. To slay the paschal lamb and eat the flesh roasted, on the fifteenth night of Nisan. Ex. xii. 6, xii. 8.
- 57-8. To observe the second Passover and eat the paschal lamb with mazzah and maror. Num. ix. 11, 13; ix. 11.
59. To blow the trumpets over the sacrifices, and in time of tribulation. Num. x. 10.
60. That cattle, when sacrificed, be eight days old or more. Lev. xxii. 27.
61. That all cattle sacrificed be perfect. Lev. xxii. 21.
62. That all offerings be salted. Lev. ii. 13.
63. To bring a burnt offering. Lev. i. 3.
- 64-7. To bring a sacrifice for sin, for trespass, a peace-offering, and a meat-offering. Lev. ii. 1, vi. 25, vii. 1, 11.
68. That the Sanhedrin bring a sin-offering if they have erred in doctrine. Lev. iv. 13.
69. That one who has by error transgressed a KARET prohibition bring a sin-offering. Lev. iv. 27, v. 1.
70. That one in doubt whether he has transgressed a prohibition bring a sin-offering. Lev. v. 17, 18.
71. That a trespass-offering be brought for having sworn falsely and the like. Lev. v. 15, 21; xix. 20.
72. To offer a sacrifice according to one's means. Lev. v. 7, 11.
73. That confession of sins be made before the Lord. Num. v. 7.
- 74-5. That a man or woman having an issue offer a sacrifice. Lev. xv. 13, 28.
76. That a leper after being cleansed bring an offering. Lev. xiv. 10.
77. That a woman offer a sacrifice after childbirth. Lev. xii. 6.
78. To tithe the cattle. Lev. xxvii. 32.
79. To sacrifice the first-born of clean cattle. Deut. xv. 19.
80. To redeem the first-born of man. Num. xviii. 15.
- 81-2. To redeem the firstling of an ass, and to break its neck if the animal be not redeemed. Ex. xiii. 13.
83. To bring all offerings to Jerusalem. Deut. xii. 5, 6.
84. To offer all sacrifices in the Temple. Deut. xii. 14.
85. To bring to the Temple also the offerings from beyond the land of Israel. Deut. xii. 26.
86. To redeem holy animals that have blemishes. Deut. xii. 15.
87. That a beast exchanged for an offering is holy. Lev. xxvii. 10.
88. That the remainder of the meat-offerings be eaten. Lev. vi. 16.
89. That the flesh of sin- and trespass-offerings be eaten. Ex. xxix. 33.
- 90-1. To burn consecrated flesh that has become unclean; also the remainder of the consecrated flesh not eaten. Lev. vii. 17, 19.
- 92-3. That the Nazarite suffer his hair to grow during his separation, and shave it at the close of his Nazariteship. Num. vi. 5, 9.
94. That a man keep his vow. Deut. xxiii. 23.
95. That the judge act according to the Law in annulling vows. Num. xxx. 3.
96. That all who touch a carcass are unclean. Lev. xi. 34.
97. That eight species of animals contaminate. Lev. xi. 39.
98. That food is contaminated by contact with unclean things. Lev. xi. 34.
99. That a menstruous woman contaminates. Lev. xv. 19.
100. That a lying-in woman is unclean. Lev. xii. 2.
101. That a leper is unclean and contaminates others. Lev. xiii. 3.
- 102-3. That a leprous garment and a leprous house contaminate. Lev. xiii. 47, xiv. 35.
- 104-6. That a man or woman having a running issue contaminates, as does the seed of copulation. Lev. xv. 2, 16, 28.
107. That a corpse contaminates. Num. xix. 14.
108. That the water of separation contaminates the clean, cleansing only the unclean from the pollution of the dead. Num. xix. 26.
109. To cleanse from uncleanness by washing in running water. Lev. xv. 16.
- 110-12. That leprosy be cleansed with cedar-wood, etc.; that the leper shave all his hair, rend his raiment, and bare his head. Lev. xiii. 45; xiv. 2, 9.
113. To burn a red heifer and preserve its ashes. Num. xix. 9.
114. To pay the equivalent of a "singular" vow. Lev. xxvii. 2.
- 115-7. That one who vows an unclean beast, or his house, or his field, shall pay the appointed sum, or as the priest shall direct. Lev. xxvii. 11, 14, 16.
118. That he shall make restitution who trespasses through ignorance in things holy. Lev. v. 16.
119. That plantations in their fourth year shall be holy. Lev. xix. 24.
- 120-4. To leave to the poor the corners of the field unreaped, the gleanings of the harvest, the forgotten sheaf, the gleanings in the vineyard, and the residue of the grapes. Lev. xix. 9, 10; Deut. xxiv. 19.
125. To bring the first-fruits into the sanctuary. Ex. xxiii. 19.
126. To give the great heave-offering to the priest. Deut. xviii. 4.
127. To separate the tithe of corn for the Levites. Num. xviii. 24; Lev. xxvii. 30.
128. To separate a second tithe and eat it in Jerusalem. Deut. xiv. 22.
129. That the Levites shall give a tithe of the tithe to the priest. Num. xviii. 26.
130. To separate the tithe for the poor in the third and sixth years instead of in the second. Deut. xiv. 28.
- 131-2. To recite the chapter on the tithe and read it over the first-fruit. Deut. xxvi. 5, 13.
133. To separate for the priest a cake of the first of the dough. Num. xv. 20.
- 134-5. To let the field rest fallow every seventh year, and to cease from tilling the ground. Ex. xxiii. 11, xxxiv. 21.
- 136-8. To hallow the year of jubilee by resting, to sound the trumpet in the year of jubilee, and to grant a redemption for the land in that year. Lev. xxv. 9, 10, 24.
139. To allow a house sold in a walled city to be redeemed within the year. Lev. xxv. 29.
140. To number the years of jubilee yearly and septennially. Lev. xxv. 8.
141. To release all debts in the seventh year. Deut. xv. 2.
142. To exact the debt of a foreigner. Deut. xv. 3.
143. To give to the priest his share of the cattle sacrifices. Deut. xviii. 3.
144. To give the first of the fleece to the priest. Deut. xviii. 4.
145. To discriminate between what belongs to the Lord and what to the priest. Lev. xxvii. 21, 28.
146. To perform the right mode of slaughtering beasts. Deut. xii. 23.
147. To cover the blood of wild beast and bird. Lev. xvii. 13.
148. To set free the parent bird when taking a nest. Deut. xxii. 7.
- 149-52. To search diligently for the marks in clean beasts, fowl, locusts, and fish. Lev. xi. 2; Deut. xiv. 11; Lev. xi. 9.
153. That the Sanhedrin sanctify the new moon and reckon the years and months. Ex. xii. 2.

154-5. To rest on and hallow the Sabbath. Ex. xx. 8 and xxiii. 12.
 156. To remove the leaven. Ex. xii. 15.
 157-8. To relate the story of the Exodus and to eat unleavened bread on Passover night. Ex. xii. 18, xiii. 8.
 159-60. To rest on the first and seventh days of Passover. Ex. xii. 16.
 161. To reckon forty-nine days from the time of the cutting of the first sheaf. Lev. xxiii. 15.
 162-3. To rest on Shebu'ot and on the first day of Tishri. Lev. xxiii. 24.
 164-5. To fast and rest on the Day of Atonement. Lev. xvi. 29, xxiii. 32.
 166-7. To rest on the first and eighth days of Sukkot. Lev. xxiii. 35, 36.
 168. To dwell in booths seven days. Lev. xxiii. 42.
 169. To take the four kinds of branches of trees. Lev. xxiii. 40.
 170. To hear the sound of the trumpet on the first of Tishri. Num. xxix. 1.
 171. To give half a shekel each year as ransom. Ex. xxx. 13.
 172. To obey the prophet of each generation if he neither adds nor takes away from the statutes. Deut. xviii. 15.
 173. To appoint a king. Deut. xviii. 15.
 174. To obey the authority of the Sanhedrin. Deut. xvii. 11.
 175. To yield to the majority in case of division. Ex. xxiii. 2.
 176. To appoint judges in every town. Deut. xvi. 18.
 177. To administer judgment impartially. Lev. xix. 15.
 178. That whoever possesses evidence shall testify in court. Lev. v. 1.
 179. To examine witnesses diligently. Deut. xiii. 14.
 180. To do unto false witnesses as they themselves designed to do unto others. Deut. xix. 19.
 181. To decapitate the heifer as commanded. Deut. xxi. 4.
 182. To establish six cities of refuge. Deut. xix. 3.
 183. To give cities to the Levites for habitations. Num. xxxv. 2.
 184. To make battlements on the housetops. Deut. xxii. 8.
 185-6. To destroy idolaters and to burn their city. Deut. xii. 2, xiii. 16.
 187. To destroy the seven Canaanite nations. Deut. xx. 17.
 188-9. To blot out the remembrance of Amalek. Deut. xxv. 17, 19.
 190. To observe a certain procedure in voluntary battle. Deut. xx. 10.

100. To sustain the sojourning stranger. Lev. xxv. 49.
101. To return usury taken from an Israelite. Lev. xxv. 35.
102. To renounce profit from the Nazarite's hair. Num. vi. 5.
103. To make an ark and a mercy-seat. Ex. xxv. 15.
104. To keep an oath or vow. Deut. xxiii. 24.
105. To reckon months and years. Deut. xvi. 1.
106. To bring an offering morning and evening. Num. xxviii. 4.
107. To offer incense morning and evening. Ex. xxx. 7, 8.
108. To read the Shema' morning and evening. Deut. vi. 17.
149. To recognize unconditionally the first-born son. Deut. xxi. 17.
150. To liberate the slave whose tooth or eye has been knocked out by his master. Ex. xxi. 27.
151. To execute him who has incurred capital punishment. Deut. xvii. 7.
198, 227, 228. That the priest shall serve in the sanctuary all the sacrifices; to separate the wave-offering, a cake of the dough, and give it to the priest. Num. xviii. 7; Deut. xviii. 7; Num. xv. 21.
237. To separate the first tithe and give it to the Levite, and give the poor's tithe to the poor. Num. xviii. 24.
299. To consult the Urim and the Thummim for the king. Num. xxvii. 21.

Of the prohibitions Nahmanides rejects Nos. 2, 3, 5, 14, 28, 58, 69, 70, 92, 93, 94, 95, 143, 150, 152, 177, 178, 179, 190, 191, 199, 201, 294, 307, 319, 321, 353, substituting for them the following:

- 2-3. Forgetfulness of the law of God and of the sojourn on Mount Sinai. Deut. iv. 9, viii. 11.
5. Alteration of the order of the vessels in the Temple. Ex. xxiii. 13 (see Mekilta *ad loc.*).
14, 28. The offering of sacrifices with the intention of eating them in other than the prescribed time and place, and the eating of sacrifices so offered. Lev. vii. 18; Deut. xvii. 1.
58. Eating the bird slain for the cleansing from leprosy. Lev. xiv. 14.
69. Selection of the heave-offering by the Levites. Num. xviii. 32.
70. The acceptance of shekels from heathens. Lev. xxii. 25.
92. The condemnation on the testimony of only one witness. Deut. xvii. 6.
93. Allowing the faint-hearted to go to war. Deut. xx. 8.
94. To cause the Shekinah to depart from the camp by reason of any impurity. Deut. xxiii. 15.
95. Depriving the first-born of his birthright. Deut. xxi. 16.
143. Clemency to a murderer. Deut. xix. 21.
150. Marriage of the deceased brother's wife after "halizah." Deut. xxv. 9.
152. Cohabitation with a wife who has committed adultery. Deut. xxiv. 4.
177. Regretting the poing of charity and the freeing of a Hebrew slave in the seventh year. Deut. xv. 10, 18.
178. Robbery of vessels of the sanctuary. Num. iv. 20.
179. The Levite may not carry the holy vessels after the fiftieth year. Num. viii. 25.
190. The divorced wife when married to another may not be taken back. Deut. xxiv. 4.
191. Disputing the priesthood. Num. xvii. 5.
199. Deriving profit from the beheaded heifer. Num. xxxv. 34.
201. To marry a daughter to one who is forbidden to her. Lev. xix. 9.
294. Profanation of the Holy Land.
307. Leaving the sanctuary during the service.

Two prohibitions are contained in each of the following verses, by which the number of the remaining rejected prohibitions is made up: Lev. xxiii. 4; Lev. ii. 11; Deut. xxiii. 19; Ex. xii. 9; Ex. xxii. 21; Ex. xxviii. 7; Deut. xxiv. 5; Deut. xxi. 18; Deut. ii. 9. Moses of Coucy rejects Maimonides' mandates Nos. 142, 193, 198, substituting the following:

142. To justify the decision of the Lord. Deut. viii. 5.
193. To reckon the solstices and constellations. Deut. iv. 6.
198. To keep far from a false matter. Ex. xxiii. 7.

Of the prohibitions he rejects Nos. 14, 26, 67, 70, 78, 95, 140, 150, 152, 165, 177, 178, 199, 266, 278, 283, 291, substituting the following:

14. Abandonment of the Torah. Deut. iv. 9.
26. The kissing of idols. Ex. xxiii. 24.
67. The making of idols. Lev. xxvi. 1.
70. Pride. Deut. viii. 14.
78. Prostitution of a daughter of Israel. Lev. xix. 29.
95. Cursing oneself. Deut. iv.
140. A priest may not make himself unclean for the dead. Lev. xxi. 1.

There are two prohibitions in each of the following verses, by which the number of the remaining rejected prohibitions is made up: Ex. xii. 9; Lev. ii. 11; Deut. xxiii. 1, 13, 18; xxiv. 6.

Joseph of Corbeil has the following mandates not found in the lists of Maimonides, Nahmanides, and Moses of Coucy:

- To gaze upon the fringes. Num. xv. 39.
To show kindness toward the needy, both in feeling and in deed; to bury the dead; and to show forbearance. Ex. xviii. 20.
To practise modesty in privacy. Deut. xxiii. 15.
To remember the Exodus from Egypt. Deut. xvi. 3.
To love admonition. Deut. x. 16.
To teach. Lev. x. 11.
To cleanse soiled vessels with boiled water and to immerse vessels. Num. xxxi. 23.
To give to the stranger meat forbidden to Israelites. Deut. xiv. 21.
To sanctify the first-born of clean cattle. Deut. xv. 19.
That men shall live with their wives, but keep from them at certain times. Deut. xxiv. 5; Lev. xv. 31.
To blot out the names of idols, to break down their pillars, and hew down the "asherim." Deut. vii. 5, xii. 3.
To burn the asherah, demolish the places of idolatrous worship, break down the altars, and destroy the vessels used for idolatry. Deut. xii. 3; Num. xxx. 52; Deut. vii. 5; xii. 2, 3.

The prohibitions not included by the other compilers, but found in the Semak, are:

- Intolerance of admonition. Deut. x. 16.
Self-righteousness. Deut. ix. 4.
Delay in attending to the natural needs. Deut. xxiii. 15.
Sodomy. Ex. xx. 14.

COMMERCE: Sale or exchange of goods, generally on a large scale. During the Biblical period the Hebrews in Palestine had what is known as a natural self-sufficing economy (Benzinger, "Arch." p. 213)—that is, each household grew or made all the food, tools, and clothing it needed. A few articles of luxury or necessity, such as gold, silver, iron, and salt, which could not be found on the Israelitish farms, were supplied by merchants, who carried them round the country, and for that reason were known as "soher" (from a root meaning "to wander"). These merchants were almost exclusively Canaanites, probably Philistines. Hence, when the goodwife sells her wool (Prov. xxxi. 24) she disposes of it to the Canaanites (A. V. "merchants"). The Israelite tribes were mainly settled

on the uplands of Palestine, and therefore were not touched by the streams of commerce which flowed by the two great caravan routes along the coast, through Tyre, Acco, and Gaza, to Egypt, and from South Arabia, through Petra on the east side of the Jordan, to Damascus (Herzfeld, "Handelsgeschichte der Juden," pp. 22, 23).

The chief references to commerce in the Old Testament are, accordingly, to that of other than Israelitic peoples—to Ishmaelites (Gen. xxxvii. 25) and Phenicians (Isa. xxiii.; Ezek. xxvii. 27). It is only with the reign of Solomon that any signs are given of extensive external trade on the part of the Israelites. Solomon was himself a large exporter of wheat and oil, which he paid to Hiram, King of Tyre, for timber and the use of skilled workmen (I Kings v. 25 [Hebr.]; I Kings vii.). He doubtless obtained horses and chariots from Egypt (I Kings x. 28, 29) by similar payments. It is even recorded of Solomon that he sent ships of Tharshish every three years from Ezion-geber to Ophir, whence the fleet brought back gold, silver, iron, apes, and peacocks (I Kings x. 22). Solomon's example evidently led to a general development of trading (I Kings x. 15), but it was not followed up by his successors. Jehoshaphat tried in vain to revive the voyages to Ophir (I Kings xxii. 48), and the Prophets when speaking of merchants identify them with Canaanites or Philistines (Hosea xii. 7; Isaiah xxiii. 11; Zeph. i. 11; compare Job xli. 6). It has been assumed from the songs of Deborah, Jacob, and Moses (Judges v. 17; Gen. xlix. 13; Deut. xxxiii. 18, 19) that the tribes of Dan, Zebulun, and Issachar were connected with the Mediterranean trade; but there is very little evidence of this, and the ships used were known by a foreign name as "ships of Tharshish."

There seem to have been some attempts to encourage foreign trade in the northern kingdom, as Ahab is reported to have obtained from Ben-hadad the right to have "huzot" in Damascus (I Kings xx. 34); in other words, the Israelites were allowed a special street or bazaar in the market of Damascus. A somewhat similar activity on the part of Judah is indicated in Isaiah ii. 6 (Hebr.), where the "contracts made with the sons of aliens" refer, according to Cheyne, to the renewed commercial activity of the reigns of Uzziah and Jotham (II Kings xiv. 22, xvi. 6). The treasures of the kings must have been obtained indirectly from commerce; the tribute of Hezekiah to Sennacherib, which, according to the Taylor cylinder, amounted to 30 talents of gold and 800 of silver, besides precious stones, must have been secured in this way. The luxurious feminine apparel indicated in Isaiah iii. 18-24 must also have been obtained by commerce. Notwithstanding this, the merchant's profession was despised (Hosea xii. 7; compare Ecclus. [Sirach] xxvi. 29, xxvii. 2). The few laws relating to business in the Pentateuch and dealing with weights (Lev. xix. 35, 36), loans to the poor (*ib.* xxv. 36, 37), usury (Deut. xxiii. 20), debts in the Sabbatical year (Deut. xv. 2), and slave-trading (Lev. xxv. 44, 45), show that very little business was done. The fact that even tribute was paid in kind (I Sam. xvi. 20, xvii. 18) proves that not

much attention was paid to commerce, as is also proved by the fact that no coined money was made till the time of the Maccabees (see MONEY).

The highlands of Palestine in Bible times do not seem to have supplied very much material for foreign commerce. Honey, balsam, wheat, and oil were forwarded to Phenicia (I Kings v. 11; Ezra iii. 7; Ezek. xxvii. 17), while spices, balm, myrrh, honey, pistachio nuts, almonds, and oil were forwarded to Egypt (Gen. xxxvii. 25; Hosea xii. 1). In return timber was sent from Phenicia (I Kings v. 11); corn, horses, and chariots from Egypt (Gen. xli. 57; I Kings x. 29); gold, silver, spices, precious stones, ivory, apes, peacocks, armor, and mules from Arabia, OPHIR, and other Eastern countries. Wool and sheep were sent as tribute from Moab (II Kings iii. 4). Within Palestine itself salt was sent from the Dead Sea, cattle and wool from the pastures beyond the Jordan, corn chiefly from the plain of Esdraelon. These were sent up to the markets, one of which seems to have been at Jerusalem, at a place called "Maktesh" (Zeph. i. 11); later on there was a market even in the Temple precincts (John ii. 14).

Merchants carried wares to their customers or to the markets (Neh. xiii. 16) by caravans of camels, asses, mules, or oxen (Gen. xxiv. 10, xlii. 26, xliii. 18; I Kings v. 7; I Chron. xii. 40); sometimes merchandise was carried by slaves (II Kings v. 28).

After the return from the Exile the small and impoverished Jewish community had little business to transact except at Jerusalem, and even there it was conducted mainly by the Phenicians (Neh. iii. 31, 32; xiii. 15-20). When Jonah sailed for Tarshish he had to embark in a Gentile vessel, showing that little maritime trade was undertaken by the Jews. With the spread of Hellenism in the East, however, there were Greek mercantile settlements in Ptolemais, with connections with the coast of Palestine along the Gaza, Ashkelon, and Dor route (Schürer, "Geschichte," ii. 15); and by the time of Hyrcanus I. Athenian merchants came regularly to Judea (Josephus, "Ant." xiv. 8, § 5; "Corp. Insc. Att." ii., No. 470). It was with the intention of developing the foreign trade of Judea that Simon Maccabeus took Joppa (I Macc. xiv. 5), and similarly Herod built Caesarea for a port (Josephus, *l.c.* xv. 9, § 6).

By Maccabean times, indeed, it seems to have become a custom for the villagers to carry their products into towns once a month (I Macc. i. 58). Later on this became extended to twice a week, Mondays and Thursdays being traditionally set aside as market days; and the custom of having special services in synagogues on these days can be traced back to this period. Jerusalem became the commercial center of the whole country, and mention

Markets. is made there of markets for horses and wool ('Er. x. 9), for ironware, clothing, lumber (Josephus, "B. J." ii. 19, § 4; v. 8, § 1), and for fruit (Bezah v. 8). Besides these, there were markets at Hebron, Emmaus, Lydda, Antipatris, Haishub, Patris, Beth Hino, Sepphoris, Tiberias, Scythopolis, and Botna, the last three being especially devoted to cereals, which were exported

through Kesib to Tyre (Yer. Dem. i. 3), and from Arab in Galilee to Sepphoris (Yer. Ta'an. iv. 1); olives were sent to Italy (Shab. 26a; Josephus, *l.c.* ii. 22, § 2), and olive-oil was sent to Syria and Egypt (Pliny, "Historia Naturalis," xii. 54). The main ports engaged in these exports were Ashkelon, Joppa, Gaza, Ptolemais, Rephia, Yabne, Cæsarea, Dor, and Haifa.

Some outside trade in silk passed through Palestine into Tyre (Yer. B. K. iv. 2, vi. 7). Most of the more luxurious products were imported. As against 87 different materials produced in Palestine itself, Herzfeld enumerates 133 brought from almost all the known lands of antiquity: camels from Arabia (Ket. 67a); asses from Libya (Shab. 51b); byssus from Pelusium and India, to form the dress worn by the high priest on the Day of Atonement (Yoma iii. 7); linen and "himuza" from Rome (Yer. 'Ab. Zarah ii. 10; M. K. 23a); a garment called a "gomed" from Arabia (Kel. xxix. 9), as well as pottery (Kel. v. 10; Men. v. 9) from the same place; spoons from Sidon and wines from Ammon and Media (Sanh. 106a; Pes. ii. 1). Beans and linseed came from Egypt (Ma'as. v. 8); damsons from Damascus (Ber. 39a; B. K. 116b); palms, dates, and carpets from Babylon; timber, wine, and purple from Phenicia; wine, oil, and lumber from Syria. Specially important was the trade with Egypt, which probably took some of the cereals from Palestine in exchange for beans and writing-material. Philo speaks of several

Jewish shippers and wholesale mer-

Trade with chants in Alexandria ("In Flaccum," Egypt. § 8). Many Egyptian Jews attained

considerable wealth by this means.

Arion is said to have lent Joseph the "publican" no less a sum than 3,000 talents (Josephus, "Ant." xii. 4, § 7), and the alabarch Alexander lent 200,000 drachmas to Agrippa (*ib.* xviii. 6, § 3).

Salted fish was a specially favored article of commerce, as may be seen from the fact that Jerusalem had a fish-gate (Neh. iii. 3); it was brought from Egypt (Maksh. vi. 3) and Spain (Shab. xxii. 2) probably to Acco, whence the proverb "to send fish to Acco," corresponding to the English "to carry coals to Newcastle." Lake Tiberias was also the center of a great fishing industry. Josephus enumerates no less than 230 boats sailing upon it at one time ("B. J." ii. 21, § 8). Several kinds of traders are mentioned—cloth-dealers, horse-dealers, and cattle-dealers (Kil. ix. 5; M. K. ii. 5; B. M. 51b; 'Ab. Zarah i. 6; Shek. vii. 2). These carried their accounts in books ("pinkes," from the Greek *πίναξ*) made of two boards joined together with a hinge, and covered with wax on which marks could be made. Markets were held every Friday (Sifra 140b), and at Gaza, Acco, and Botna there were great fairs where slaves and horses were sold (Yer. 'Ab. Zarah i. 4). Goods were sold by contract (Shab. 120b) and paid for by bills which themselves were sold for cash before maturing (B. M. iv. 9). Merchants of different towns communicated by post (Shab. x. 4, 19a), and there even seems to have been a kind of parcel-post (R. H. 9b). Prices seemed to be fixed by local authorities (B. M. v. 7), and any speculation in necessities, such as corn, wine, or oil, was deprecated (B. B. 90b).

Notwithstanding this evidence of considerable commercial activity, it can not be said that the Jews in early post-Biblical times were at all inclined to commerce. Josephus, indeed, says: "We do not dwell in a land by the sea, and do not therefore indulge in commerce either by sea or otherwise" ("Contra Apion," i. 12). Several of the chief sages of the Talmud, however, were traders. Eleasar ben Azaria dealt in wine and oil (B. B. 91a). Notwithstanding this, many sayings in the Talmud show that little importance was attached to commerce as a means of livelihood; *e.g.*, "have little business" (Abot iv. 14); or, "the less trading the more Torah" (*ib.* vi. 6). It was recommended to lay out one's money in three parts: one-third to be invested in land; one-third in goods; one-third to

Prices. be kept on hand (B. M. 42a). It may be of interest to conclude this account

of trading among the Jews of Biblical and Talmudic times by the details given by Herzfeld relating to the prices of objects mentioned in these two sources, arranging the objects in the usual order: grain, cattle, fowl, fruit, wines, dress, slaves, beasts of burden, chariots, fields, vineyards, and houses, finishing with wages and fees. See accompanying table.

Hitherto there had been no signs of any special predilection or capacity for commerce shown by Jews, but they had developed special aptitudes in that direction by the early geonic period, when they are everywhere mentioned as merchants. As soon as the Teutonic nations had settled down after the great migrations of the fifth century, Jews are found mentioned together with Syrians as merchants at Narbonne and Marseilles (Gregory, "Epistles," vii. 24, 45). The Frankish kings bought goods from them (Gregory of Tours, "Hist. Gall." iv. 12-35, vi. 5, vii. 23), and they occur as traders at Naples (Procopius, "De Bello Gallico"), Palermo (Gregory, "Epistles," ix. 55), and Genoa (Cassiodorus, "Epistles," No. 33). They even chartered ships: Gregory of Tours ("De Gloria Martyrum," p. 97) mentions a Jew who owned a vessel sailing between Nice and Marseilles. It is recorded of Charles the Great that, after watching a ship nearing Narbonne, he decided that it was not a Jewish, but a Norman, vessel (Pertz, "Monumenta," ii. 737). The Visigoth king Egica, indeed, forbade them to engage in maritime commerce ("Leg. Visig." xii. 2, 18). They were particularly active in the slave trade (Agobard, "Opera," ed. Baluze, pp. 62-65), and Gregory the Great protested against their activity in this direction in North Gaul ("Epistles," ix. 36). It has been conjectured that through their means England was brought within the pale of Christendom (Jacobs, "Jews of Angevin England," pp. 3, 4). See SLAVE TRADE.

The cause of this sudden commercial activity and predilection for trading is probably to be found in the rise of Islam and its control of the lands whence came most of the luxuries demanded in Europe. Christians could not trade in Mohammedan countries, nor Moslems in Christendom, consequently an opening was left for Jews, who were tolerated in both spheres as commercial intermediaries (Cunningham, "Western Civilization," ii. 49, Cambridge, 1901). Within two centuries after the foundation of Islam the Jews appear to have almost monopolized the

They embark in the East Sea [Red Sea], and sail from Kolzum to El-Tar [port of Medina] and Jeddah [port of Mecca]; then they go to Sind, India, and China. On their return they carry back musk, aloes, camphor, cinnamon, and other products of the Eastern countries to Kolzum, and bring them to Farama, where they again embark on the Western Sea. Some make sail for Constantinople to sell their goods to the Romans; others go to the palace of the king of the Franks to place their goods.

"Sometimes these Jew merchants, when embarking in the land of the Franks in the Western Sea, make for Antioch [at the mouth of the Orontes]; thence they go by land to Al-Jabia [?], Al-Hanaya [on the bank of the Euphrates], where they arrive after three days' march. There they embark on the Euphrates for Bagdad, and then sail down the Tigris to Al-Obolla. From Al-Obolla they sail for Onan, Sind, Hind, and China.

"These different journeys can also be made by land. The merchants that start from Spain or France go to Sous Al-Akça [Morocco], and then to Tangiers, whence they march to Kairovan and the capital of Egypt. Thence they go to Ar-Ranila, visit Damascus, Al-Koufa, Bagdad, and Bassora, cross Ahwaz, Fersia, Kirman, Sind, Hind, and arrive at China. Sometimes they likewise take the route behind Rome, and, passing through the country of the Slavs, arrive at Khaulij, the capital of the Chazars. They embark on the Jorjan Sea, arrive at Balkh, betake themselves from there across the Oxus, and continue their journey toward Yourt, Toghozghor, and from there to China."

The name "Radanites" is a puzzle, but probably refers to the commercial metropolis of Persia—Rai (Rhaga), near Teheran, which was the commercial center for Armenia, Chorasán, and Chazaria (Ritter, "Asien," vi. 1, 595). The influence of the Radanites probably accounts for the adoption by the court of Chazaria of the Jewish religion (see CHAZARS), and it is also probable that the mission of a Jewish envoy from Charles the Great to Harun al-Rashid is connected with this extensive commerce. The Jews also appear to have taken wares from Byzantium to Prague, and to have exchanged them for corn, tin, lead, and slaves, from the Russians and Slavs who met them there (Ibrahim ibn Ya'kub, quoted by G. Jacob, "Handelsartikel der Araber," p. 9, Berlin, 1891). The large number of Arabic coins found throughout northeastern Europe (as many as twenty thousand in Sweden alone) shows the great extent of this Baltic trade with Chazaria, mainly conducted by Jews.

The spice trade appears to have been practically monopolized by Jews (Gregory of Tours, iv. 12, 35; vi. 5); and this was of consequence because of the demand for condiments to flavor the salted meats and fish on which medieval Europe lived during winter. An indication of the extent of their Lyons trade is found in the complaint of Agobard that, to suit their convenience, the market-day had been changed from Saturday to another day in the week ("De Insolentia," p. 64); indeed, so important had their commercial position in medieval Europe become by the tenth century that a usual formula in charters and like documents was "Jews and other merchants" (Stobbe, "Juden in Deutschland," pp. 103, 199, 200, 231). The emperor Henry IV. gave them permission to sell wine, pigments, and drugs (ib. p. 231). In the tenth century the commercial rivals of the Jews began to take measures to restrain their activity. The Venetians, for example, forbade ships' captains to take Jewish passengers on their voyages to the Levant (Depping, "Histoire du Commerce," ii. 22). Similarly as late as 1341 no Jew was allowed to pass from Aix to Alexandria, and only four each year for the Levant.

But the first systematic repression of Jewish com-

trade between Europe and Asia. There is a remarkable passage in the "Book of Ways," written about 817 by Ibn Khordadbeh (ed. De Goeje, in "Bibl. Geogr. Arab." vi. 114), giving the routes adopted by these Jewish merchants.

ROUTES OF THE JEWISH MERCHANTS CALLED RADANITES.

"These merchants speak Persian, Roman [Greek], Arabic, the language of the Franks, Spanish, and Slav. They journey from west to east, from east to west, partly on land, partly by sea. They transport from the West eunuchs, female slaves, boys, silk, castor, marten and other furs, and swords. They take ship in the land of the Franks, on the Western Sea, and steer for Farama [Pelusium]. There they load their goods on the backs of camels and go by land to Kolzum [Suez] in five days' journey over a distance of twenty-five farsakhs [parasangs].

mercial activity began in the twelfth and thirteenth centuries during the Crusades. All trade in the towns began to be monopolized by the merchants' gilds, from which Jews were excluded.

Influence of Crusades. In England, for example, there is only one known instance of a Jew in a merchant gild (Kitchin, "Winchester," p. 108); so the only way in which Jews could obtain possession of merchandise was not by direct purchase, but as pledges for money lent.

In this way, for example, Aaron of Lincoln came into possession of large quantities of corn at the time of his death (see "Trans. Jew. Hist. Soc. Eng." iii. 164, 165); and a large amount of corn was included in the property which escheated to the king on the expulsion of the Jews from Hereford (*ib.* i. p. 144-158). Heliot of Vesoul and his company similarly came into possession of stuffs and vestments which they transported by horses and carriages to various customers. They also sold wheat, soap, paper, wax, fur, leather, harnesses, kitchen utensils, spoons, forks, girdles, etc., besides horses and cattle (I. Loeb, in "Rev. Et. Juives," ix. 39); but these sales, which took place in the presence of the provost, and, probably, were mostly sales of pledges, can not be regarded as the ordinary sales of commerce, in which the buyer competes in open market and afterward sells at his own time, and without intervention of officials. Whatever the commercial activity of the Jews in the Middle Ages and after the Crusades, it was incidental to their trade of money-lending (see **USURY**) and the taking of **PLEDGES**. W. Roscher traces this activity to the introduction into commercial law of three important innovations which indirectly affected commerce: (1) the making of loans on interest; (2) the retention of goods bought bona fide, which has been applied in later commercial law to bonds and other securities to bearer; (3) the introduction, or, at least, the extensive use, of bills of exchange ("Ansichten der Volkswirtschaft," ii. 231, Leipsic, 1878). It is still, however, a doubtful point whether bills of exchange were not introduced quite independently of the Jews (see **EXCHANGE, BILLS OF**).

Though, as a rule, Jewish commercial activity was from the twelfth century almost up to the nineteenth generally restricted to usury and petty trading, there are occasional instances of commercial dealings on a large scale, chiefly at the great seaports.

Instances of Medieval Commerce. Thus at Marseilles, between 1260 and 1299, a Jewish merchant named Man-drul, and others, traded in spices, cotton, and medicines, like sulfur and tartar, from Egypt, the Barbary States, the Balearic Islands, and Pisa, the chief trade being with Valencia, Acco, and Boughiah ("Rev. Et. Juives," xvi. 23). By this time Jews had lost their monopoly of the slave trade; only two cases of slave-dealing occurred at Marseilles at that period among Jews as against seven among Christians. Similarly, in 1248 there were twenty-nine money-changers among the Christians of Marseilles, but not a single Jew. Jews appear also to have been interested in the export of corn and wine from Vienna to Salzburg (Pertz, "Monumenta," ix. 706), and the Jews of Laibach in 1368 are reported to have become rich through trade with Venetians,

Hungarians, and Croats (Scherer, "Rechtsverhältnisse," p. 519). It was indeed found necessary at times to prevent their competition with Christian merchants; thus the Jews of Linz in 1396 were forbidden to deal as merchants with the citizens of that town (Kurz, "Handel Oesterreichs," p. 89). In Spain the practice varied: in Castile, Henry IV. allowed the Jews to trade with Christians (Amador de los Rios, "Historia," iii. 134, 135), and there is evidence of a considerable wool trade between Navarre and England, conducted by Jews (Jacobs, "Spanish Sources," Nos. 1563, 1573, 1639, 1647), besides notices of dealers in cloth, fur, leather, silk, spices, timber, horses, mules, and wine (*ib.* p. xxxvii.); yet the Jews of Navarre were not allowed to sell anything without license from the king (*ib.* Nos. 1458, 1459). On the whole, fewer restrictions seem to have been placed upon the Jews in Spain than elsewhere; the silk industry was entirely in their hands (Grätz, "Geschichte," v. 396). This led to a remarkable extension of Jewish commercial activity when, in the fifteenth century, there spread throughout the world a class of persons which maintained intimate connections with Spain and Portugal at a time when those countries were receiving masses of the precious metals, which raised prices throughout Europe and gave abnormal profits to merchants, amounting, it is said, to between 300 and 400 per cent (Beer, "Geschichte des Welthandels," ii. 147).

The commerce of the Maranos served an important function in the development of trade between Europe, America, and the Levant.

Marano Trade. Manassch ben Israel, in his "Declaration" to the English Parliament, gives an interesting account of the wide extent of Jewish trade due to their family connections and common language (ed. Wolf, pp. 2, 3). The precious metals mined in America were transported to Spain and Portugal, and thence, in exchange for Oriental goods, were passed on to Antwerp, which thereby became the financial center of Europe. Jewish Marano families were especially active in all these countries. The Caceres family had members in Hamburg, England, Austria, the West Indies, Barbados, and Surinam in the middle of the seventeenth century. Similarly extended connections are found with the Conegliano and Alhadib families. The Mendez family was connected at first with Antwerp, then with Constantinople, while a branch, the Gradis family, settled at Bordeaux, dominated French colonial trade. Benjamin Gradis sent out wine, alcohol, meal, and pickled meats to Cayenne, Martinique, and San Domingo, getting sugar and indigo in return. The Maranos were especially active in the American interstate trade. From Curaçao Joshua Mordecai Henriquez shipped to New Netherland in 1568 Venetian pearls and pendants, thimbles, scissors, knives, and bells. The Jewish trade from Jamaica became so extensive that the English traders of that island petitioned against Jews being allowed to trade from it unless they became endenized. By 1753 the greater part of the British trade with the Spanish West Indies was in the hands of the Jews, especially the trade of Jamaica with the Spanish main ("Consideration on

the Act of 1753," p. 40). Aaron Lopez of Newport had no less than thirty ships engaged in this trade (see M. J. Kohler, in "Pub. Am. Jew. Hist. Soc." x. 62). This trade was naturally fostered by the Jews of New York, who were not allowed to engage in retail trade from 1683 (*ib. v.*). From Marseilles an extensive trade with the Levant was maintained by Spanish Jews. In the ten years 1670-79 the firm of Joseph Vaez Villarreal & Company insured ships to the amount of 866,400 livres ("Rev. Et. Juives," xi. 142). In 1693 merchants of Marseilles petitioned the intendant of Provence not to allow French subjects to lend their names to Jews bringing silk from the Levant, especially from Smyrna (*ib. xii.* 270). The Gorneyim of Algiers practically monopolized the trade between that port and Leghorn in the seventeenth century. (Grünwald, "Juden als Seefahrer," 1902, p. 48).

Meanwhile in Central Europe a special Jewish commerce was being developed in connection with the great fairs, especially during the Thirty Years' war. They purchased the soldiers' loot and thus acquired capital.

Central Europe. The position of Jews as pawnbrokers

led naturally to peddling. These peddlers often developed into traveling traders, purchasing the products of the villages, especially furs and leather, which they sold at the Fairs, especially at the great fair at Leipsic, which, after the close of the Thirty Years' war, became a clearing-house for the wares of North Germany. During the last quarter of the seventeenth century, 15,620 Jews, with 2,362 dependents, visited the three annual fairs at Leipsic, making an average of nearly 240 Jews at each fair. These came from all quarters of Europe; not less than 321 places are mentioned by M. Freudenthal ("Die Jüdischen Besucher der Leipziger Messen," Frankfurt, 1902). Chief among these were Prague, Hamburg, Halberstadt, Berlin, Dessau, Frankfurt, and, beyond Germany, Amsterdam and Venice. As early as 1590 Jews used to import fur, leather, lumber, and grain from Moscow to Gnesen. The memoirs of Glückl von Hameln show that these visits to the fairs were of social as well as of commercial importance. The Frankfurt fair became the center of the Hebrew book trade in the seventeenth century ("Rev. Et. Juives," viii. 75). By this means new connections were made with different parts of Europe by the rising Jewish merchants, and the international trade of the continent became concentrated for a time in their hands. The fur trade in particular was monopolized by Jews, owing to their wide connections, ranging from Novgorod to Nantes ("Rev. Et. Juives," xxxiii. 97). Similarly the Jews of Avignon, in the seventeenth century, used to travel as far as Nîmes and Montpellier (*ib. xxxiv.* 280), where they sold mules on credit, and thus took the business out of the hands of the Christian merchants of Languedoc. In 1738 the latter obtained a decree from the intendant of Provence prohibiting the sale of mules by Jews, though this decree was afterward withdrawn. In like manner German and Polish Jews, toward the end of the eighteenth century, settled in the chief English ports of the south and west as small pawnbrokers and shopkeepers, sending out agents from Monday to Friday to the neighboring villages

(L. Wolf, "Family of Yates and Samuel," p. 2, London, 1901).

The amount of trade conducted by the Jews depended in a large measure on the municipal or other authorities. In 1603 Henry IV. granted

Re- to Jews of Metz the right to trade, which
strictions was confirmed by Louis XIV. in 1657
on Jewish (Jost, "Geschichte," ix. 31). So, too,
Trade. the Jews of Leghorn were permitted
to trade from 1668 (Bedarride, "Les

Juifs," p. 364); on the other hand, the Jews of Rome and Ancona were only permitted to deal in second-hand clothing (Vogelstein and Rieger, ii. 198). As a rule, however, the right to trade was one of the municipal rights, and these were not granted the Jews till well on toward the middle of the nineteenth century. They were therefore generally confined to pawnbroking, peddling, and second-hand clothing, in which for a considerable time they had a monopoly. With the spread of colonization Jewish merchants found new spheres, especially in the Anglo-Saxon world, where there was little opposition to them. The firms of Montefiore in Australia, of Mosenthal and of Bergtheil in South Africa, were among the pioneers of those colonies, and a large proportion of the English colonial shipping trade was for a considerable time in the hands of Jews. On the continent of Europe Jews performed a special function in mediating between the domestic industries of the villages and the markets and manufactories of the chief towns. Thus in Vienna the woolen manufacturers obtained their raw material from Jewish traders who traveled round to Iglau, Reichenberg, and Brünn. Before the emancipation many expedients had to be resorted to before this centralization of the wool industry could be effected. Thus the firm of Tuchowsky used to have a Christian agent at Vienna to represent its interests. When he died one of the firm had to submit to baptism in order to reside in Vienna (S. Mayer, in Bloch's "Wochenschrift," Nov. 14, 1902).

Owing to a variety of circumstances the number of Jews applying themselves to commerce is heavily in excess of their proportion to the general population. Thus in Prussia in 1861 among

Numbers adult workers 58 per cent of Jews
Engaged in were engaged in commerce as against
Commerce. 6 per cent of the rest of the population (Legoyt, "Immunités," p. 34),

while in Italy the proportion was as 55 to 5. These figures are somewhat misleading, as most Jews live in cities; but, after allowing for this factor, a large discrepancy still remains. At Berlin, *e.g.*, in 1871 61.4 per cent of Jews were in commerce against 15.4 of the rest of the population (H. Schwabe, "Berlin in 1871," p. 100); in Vienna, 33.1 per cent against 11.5 per cent (Jeitteles, "Israeliten zu Wien"). Altogether it may be said that thrice as many Jews adopt commercial pursuits. The particular branch of commerce in which Jews appear to excel is mainly the "commerce of intangibles"—that is, dealing with money per se—and they excel as factors and shippers (see BANKING; FINANCE). The clothing trades seem to be largely in the hands of Jews, both as regards manufacture and the wholesale and retail trade. This may have developed out of the restric-

tion to the sale of second-hand clothing, but is probably due more to the economic pressure brought to bear in the Russian ghettos. The trade in furs and feathers is also largely in Jewish hands as a relic of the old peregrinations of the Jewish pedlers in East Europe, and can be traced back to the time of the Chazars. The fancy-goods trade is almost invariably a trade in imports, and here the cosmopolitan connections of the Jews have helped them to achieve conspicuous success. In England the fruit trade is wholly in the hands of Jews, because fruit can be sold on Sunday, and therefore the keeping of the Sabbath is not an obstacle to Jewish fruit-traders. In the United States the most striking characteristic in the large number of Jewish firms.

—In Russia: Under the Polish régime—that is, up to the end of the eighteenth century—commerce was almost the only occupation followed by the Jews in Russia. Neither the upper nor the lower classes among the non-Jewish native population cared to engage in it; and it consequently became centralized in the hands of the Germans and the Jews. As early as the fourteenth century there was a Jewish bazaar in Wilna. During the Middle Ages the Jews of Poland and of Lithuania were engaged in agricultural and industrial pursuits only in a small degree. After the Polish provinces had been annexed to Russia, and especially in the latter half of the nineteenth century, the Jews were attracted to handicrafts; but owing to certain restrictions placed on these occupations they were compelled, as they are even to-day, to rely chiefly upon commerce and finance.

The closing years of the nineteenth century were marked by a serious decline of Jewish commerce in Russia. Owing to a steady increase in the number of Jewish merchants, especially in the western regions, and to the consequent keenness of competition, commerce could hardly have been lucrative. The chief obstacle to its development was, and still is, the lack of capital, for the poverty of the Jewish population is extreme.

Business is frequently started exclusively upon credit. Consequently, when the manufacturer reduces or withdraws credit, the Jewish merchant is often forced to declare himself insolvent. But the manufacturer is not always the trader's only creditor. Advances secured by chattel mortgage are made by banks, by mutual loan associations, and by private persons. Usually the interest charged is very high, especially to small dealers. The "wocher"—that is, the plan of paying off a debt in weekly instalments—prevails. The profit is mostly absorbed by the interest on the capital borrowed. Therefore, in order to secure an in-

come, it is often necessary to put the capital repeatedly into circulation. By adopting this course the turnover of the Jewish merchants is, other things being equal, greater than that of their Christian competitors; but, notwithstanding their resourcefulness, the Jewish merchants do not realize as large a percentage of profits as do the Christians.

The foregoing applies to Jewish merchants doing business on a moderate scale. The majority of the Jews in the cities and villages within the PALE OF SETTLEMENT are not able to start business even of credit, and are therefore compelled to trade in small wares. Opening a small store on some street-corner they stock it with a few rubles' worth of goods, and make a profit of from twenty to thirty copecks a day. Frequently the business equipment consists only of a single stand stocked with provisions. Dealers of this kind are very numerous in the Jewish centers, as in Wilna, Minsk, and Kovno, where the percentage of poor Jews is exceptionally large. Thus, in Wilna their business center consists of a cluster of dark alleys, permeated with a fetid atmosphere, and resigned to rows of dirty, ill-smelling stores and stands. Although the range of prices is astonishingly low, little business is done, and often the dealers in the district outnumber the customers.

The Jewish interest in lumber, in agricultural produce, in the export of grain, flax, butter, eggs, fruit, wines, and tobacco, and in ker-

Branches of Trade. osene, is considerable. Before the promulgation of the law making the sale of liquor a government monopoly,

the Jews were active in the retail sale of vodka. At present Jewish merchants supply alcohol to the government in considerable quantities. In general, government contracts have been monopolized by the wealthier Jews. In recent years, however, many of the governmental departments have declined the services of Jewish contractors.

The Jews are prominent in the trade in grain. They have established branch offices in the chief centers of the grain-producing regions. In the autumn their agents travel through the grain belt and purchase its produce. Small dealers establish themselves at the railroad stations. They pay up to ninety-five per cent of the value of the grain shipped, deposit the bills of lading in a bank, and then send an order for sale to the agent at the port. When the sale has been consummated and the money from the commission agent received, accounts between seller and purchaser are adjusted. The dealers forward the grain to Black Sea and Baltic ports and to German frontier-towns like Danzig, Königsberg, etc. The number of Jews engaged in the grain-trade is considerable, and embraces buyers, commission agents, bankers, brokers, etc. To the poverty of the crops recently harvested in South Russia may be attributed the present (1902) deplorable condition of the Jews in that region.

A considerable portion of the Jewish population is engaged in the lumber trade. The Jews buy the standing timber from the landowners, especially in western Russia, and manufacture from it articles of various kinds for the home and foreign markets.

The part taken by the Jews in fairs, which are a distinguishing feature of trading life in Russia, also

erves notice. Whenever a fair is held they ply the peasants who visit the fair with all kinds of household necessities, such as iron, salt, kerosene, sugar, and dry goods, in exchange for their farm products. To the development of railroads in recent years may be attributed the decline of this method of doing. Another obstacle calculated to shut out the Jews from this class of trade is the law prohibiting them from living in small towns and villages. Practically no recent statistical data on Russian-Jewish commerce are available.

There are still some legal restrictions on Jewish commerce in force even within the Pale of Settlement. A typical example is the prohibition against dealing in objects held sacred by Christians, such as holy images and the like. Prior to the government monopoly of the sale of liquors, the Jews, while permitted to engage in that business, were hampered by various restrictions. Thus, they were forbidden to sell beyond the Pale; and within the Pale the sale was allowed only in houses owned by the sellers.

The chief obstacle which embarrasses Jews engaged in commerce in Russia is their exclusion from the interior governments of the country. Those enrolled in the mercantile guilds are allowed to travel there only for the purchase of commodities: members of the first guild are allowed to stay six months; those of the second guild, only two months. Certain fairs temporary sojourn only is permitted. Merchants domiciled in the interior governments may deal in their own manufactures. If a Jew be found dealing in prohibited articles, these articles are confiscated, and the transgressor is sent to the Pale of Settlement. A five years' enrolment with the merchants of the first guild in governments within the Pale confers the privilege of enrolment in the first guild in the interior governments. In consequence of this measure many of the wealthier Jews enroll as merchants, although not actually engaged in any business, to obtain the right of residing wherever they please. Those engaged in the liberal professions, physicians, druggists, etc., enjoy the privilege of settling wherever they may choose, though their right of engaging in business outside the Pale is often been contested by the administration. The matter, however, has invariably decided in their favor. For statistics regarding Jewish commerce in Russia, see RUSSIA.

COMMERCIAL LAW: According to Jewish law persons legally capable of entering into any form of contract are legally capable of making commercial contracts also; but it must not be forgotten that girls reach majority at twelve and boys at thirteen. Three kinds of incapables are barred out: the deaf-mute, the unsound in mind, and the minor. Widowers are excluded because their possessions as

well as their earnings belong to their masters. Married women have not full legal capacity, for they lack the control of their property, and their earnings belong to their husbands. But the authorities recognize the wife that "trades [buys and sells] within the house" with the permission of her husband (Shulhan 'Arukh, Hoshen Mishpat 62, 1); in fact, a woman may marry with the agreement that the husband shall have no interest in her property or its income (Ket. ix. 1). Yet the great majority of those women who have carried on trade and industry in Israel, often on a large scale and with marked success, have done so simply in the names and as the agents of their husbands.

There is an Assyrian word used in the Talmud for "partners" (שׁוֹחֵפִין), but in the Mishnah it is applied mainly to joint owners of land. In the Codes it is used both in this sense and in that of "partners" (Maimonides, "Yad," Sheluhin, *passim*). It will be seen under PARTNERSHIP that its formation is clogged by many doubts and formalities. Of joint-stock

companies or trading corporations the Talmud and the Codes show little trace; there were, indeed, societies in Palestine holding their property in common and working for the common profit—the Essenes, for instance—but neither the inclinations nor the purposes of these societies were in any way commercial, and seldom, if ever, did they go to law. Old trading companies may, perhaps, be recognized in the mutual insurance companies mentioned below, or in the caravan (שִׁירָא) repeatedly spoken of in the Talmud; but nothing is known from that source as to their workings as legal entities.

The commonwealth of Israel in its palmy days troubled itself but very little about ships, and controlled hardly any of the ports on its coast-line. Its maritime trade fell to the Phenicians and Philistines. There were, however, in Mishnaic times, Jews who owned trading-vessels; and in the article ALIENATION AND ACQUISITION the mode of making delivery of a vessel (ספינה) so as to give title to the buyer is discussed.

There is also, in a rather crude form, a law of jettison, or general average. Says a Baraita (B. K. 116b): "A ship is going along the sea; a squall arises and threatens to sink her, and they lighten her of her burden; then they take account, according to the weight, and not according to the money value; for they should not change from the usages of ship-owners." The reason of this rule is evidently that the owners of goods of small weight in proportion to value have done very little toward overloading the ship. No mention is made of other sacrifices for the common good than actual jettison; and the rule of apportioning the loss by weight rather unjustly relieves the ship-owner from contribution. But other laws on shipping, now generally in force, are not found. Rich Jews in the Middle Ages often owned ships and cargoes; but they of necessity settled disputes about these in the admiralty courts of the sea powers, not before their rabbis; and so no rulings on such disputes in the responsa literature, or in the Jewish Codes, are to be found.

There is but little mention of bills and notes in Jewish law, though it has been shown under ALIENATION that Abraham ben David was the first to suggest a form of bond with some elements of true negotiability; his idea, however, was not developed by later authorities. In questions of contracts with carriers and contracts of affreightment—that is, for carriage by water—the Talmud knows no special liability of the carrier; he is, like the shepherd, simply a hired keeper (see BAILMENTS). On that sort of affreightment known as a “charter party,” where a single freighter hires the ship for the voyage, the Talmud (B. M. 79a, b) gives some points which Maimonides repeats in “Yad,” Sekirut, vi. 4, but with a lack of clearness which indicates that the subject treated did not come up in actual practise.

A Baraita, probably of the second century (B. K. 116b), contains the principles of marine insurance: “And ship-owners have the right to contract that whosoever vessel is lost, they will get him another;

but if it be lost through his fault [כּוּסִיָּא]

Marine Insurance. (variant בּוֹמִיָּא; see Rabbinowicz, “Dik-duk Soferim” *ad loc.*)] they do not replace it; if not through his fault, they replace it; and if he has lost his vessel while deviating from proper course, they do not replace it.” This is the earliest known passage on insurance. The Justinian Code is silent; and when the Roman republic or empire, as Livy and Suetonius say, agreed to indemnify shippers against loss in case of war or famine, it was not insurance, for there was neither premium nor mutuality.

Another Baraita (B. K. 116b) approves mutual insurance among ass-drivers (חמרים), with this addition: “If he says, ‘Give me [the money] and I will watch,’ they do not listen to him”; for, as the Gemara explains, one of the considerations of the insurance is that every driver shall stay with the caravan and help to defend it. Note the phrases: “ship-owners have the right,” “ass-drivers have the right,” to insure. Generally, contracts depending on uncertain future conditions were not favored in Jewish law. Of life or fire insurance the Talmud knows nothing; nor is it cognizant of bottomry and respondentia bonds.

In the Jewish law contracts for hiring service are treated more from the moral than from the commercial standpoint. The subject of apprentices is also unknown to Jewish law, doubtless for the reason that boys are of age at thirteen and may dispose of their own services.

Of commercial remedies only the lien of the party in possession for work done and for advances is recognized in the Talmud, and this incidentally in the discussions on the liability for faulty work of mechanics entrusted with goods (B. K. 98–102); but there is none of the complication of the subject which has been introduced into modern law.

For the discussion of other points of commercial law see ACCEPTANCE; AGENCY, LAW OF; ALIENATION AND ACQUISITION; BAILMENTS; BROKER; CONTRACT; DEBTOR AND CREDITOR; OVERREACHING; PARTNERSHIP.

COMMISSION. See BROKERS.

COMMUNITY, ORGANIZATION OF.

Ancient and Medieval: At the beginning of the common era there were Jewish communities at Alexandria, Rome, Salamis, Corinth, Athens, Delos, etc.; at Antioch (in Pisidia), Iconium, Smyrna, Ephesus, and other well-known cities on the Mediterranean and in Asia Minor. In Palestine, which even as a Roman province retained its essentially Jewish character, the whole country formed one community, with its center at Jerusalem, where the highest religious, judicial, and executive authorities were located.

After the destruction of Jerusalem by the Romans, the national life of the Jews was replaced by the communal life, on which the Roman form of government was impressed. But while the Romans reserved for themselves the government of the province, they did not interfere with the internal affairs of the communities. The Jews still had a center in the person of the patriarch (“nasi”), who had the disposal of communal offices, and the right to levy a tax (AURUM CORONARIUM), which right, on the cessation of the patriarchate, was transferred to the emperor. At an early date the Babylonian communities separated from those of Palestine, and had their own head, called “resh galuta” (exilarch), whose authority was greater than that of the patriarch.

The communities, whether found in כפרים (“villages”), עירות (“cities”), or כריכים (“walled towns”), were composed of בני העיר (“full citizens”—residents of more than twelve months’ standing), יושבי העיר (“half citizens”—residents of from thirty days’ to twelve months’ standing), and “transients”—those who remained less than twenty days in the place. At the head of the community was a governing board (טובי העיר, פרנסים) consisting of at least three members, but usually of seven, and, in later times, of twelve. If brothers happened to be on the board, they had one vote only between them. All communal offices, even that of physician, were filled by appointment from the “court” with the concurrence of the community. The governing board, even where it had absolute authority, was expected to observe the wishes of the community. Membership in the board, as well as other communal offices, was sometimes hereditary.

The governing board conducted all the affairs of the community, giving special attention to the distribution of funds for alms; it apportioned communal and municipal taxes according to fixed rules,

The Governing Body. and decided on the acquisition and sale of communal property. It supervised the entire social and commercial life of the community, fixed weights and measures, the price of food, and the rate of wages; it issued police regulations, and could even interfere in the private affairs of the individual; and, in the interest of the community, could annul rules long sanctioned by usage and precedent. The board was responsible for the safety and the social and intellectual welfare of the community.

The Jews of ancient Rome were governed by a “gerusiarch,” that is, a president of the communal council (“gerusia”); an archon (מנהיג or פרנס);

an ARCHISYNAGOGUE (ראש הכנסת); etc. (Berliner, "Magazin," i. 66; for the later communal government at Rome see Berliner, *ib.* ii. 31). In Sicily the following expressions were current: "dienchelele" (chief district rabbi); "manigliori" (from מנעל = "keeper of the keys of the synagogue"); "presbyter" (hazzan and shoḥet); "sacristano" (נבאי); "celebrare missam" (literally, "to celebrate mass"), to conduct services, etc. (Güdemann, "Geschichte des Erziehungswesens," ii. 71, 281). At Cologne the president of the community was called "Judenbischof" (Jewish bishop), and was assisted by a chapter. At Speyer the archisynagogue, appointed by the Catholic bishop, was at the head of the community.

The governing board was subject to the "dayyan" (judge, also called "hakam," or "zaḥen"), who was ordained by the nasi or exilarch, and was the final authority on ritual, civil, and

The political questions. He decided unaided in money matters (without being obliged to make restitution in case of an error of judgment), where otherwise three lay judges were required. Criminal cases were decided only by three scholars of standing (בית דין), who were usually elected for life to insure impartiality and respect. They did not, in general, draw a salary, but when their entire time was devoted to the affairs of the community, they might receive means sufficient for a bare subsistence. They had supervision over all religious and political affairs. Those who had been ordained at Babylon were called "rabbonim"; those ordained in Palestine were called "rabbis." The title of "haber" (associate) was bestowed upon a person who had rendered special services to the community. He was considered in many cases as arbitrator. A community consisting of more than ten members was a synagogal community, and was obliged to secure a synagogue, the judicial and outer affairs of which were in the hands of a committee elected from the members of the governing board. It was not permissible to sell or exchange the synagogue, except in cases of extreme necessity, nor could the old synagogue be pulled down before the new one was built. Affairs pertaining to the ritual and liturgy were in the hands of the archisynagogue. (This term when applied to a woman, as in old Roman inscriptions, meant, no doubt, merely the president of a woman's philanthropic society, like the "parnesessa" at Rome in the sixteenth century.) The archisynagogue was especially honored, his office being for life and sometimes hereditary. In the Diaspora there were honorary titles, such as "fathers," or "mothers, of the synagogue"; thus, the title of "mater synagogæ" or "pateressa" was conferred upon Dona Gracia Mendes. The "rosh ha-keneset" (archisynagogue) was subordinate to the "hazzan ha-keneset," whose orders were authoritative in synagogal and in general matters; he was also executor of the punishments decreed by the court, and performed the functions of the later "shammash," who is otherwise called שליח בית דין ("the messenger of the court") in the Talmud and by the Geonim.

The שליח צבור ("delegate of the congregation," or "leader in prayer") stood before God as repre-

sentative of those who did not understand the import of the prayer. He, too, was an unsalaried official. All worthy persons, however,

Other and especially those in straitened circumstances or in trouble, were allowed to lead in prayer on days of fasting and repentance. The lesson from the Torah was read by the קורא ("reader") although any one called upon was to read his own section. The weekly section was translated into the Aramaic vernacular by the מתורגמן ("dragoman"), who was entitled to compensation; and in order to insure the requisite minimum for the service, ten men, called Baṭlanim, received a regular salary to attend.

The school, like the synagogue, was under the supervision of the community, which appointed the teachers (called variously מלמד הילנות, מלפנא, סופר, מוקרי ינוקא). The latter were paid by the parents of the children of school age, but this salary was generally so small that the community contributed an addition as צדקה ("relief"). No one who was unmarried, or under the age of forty, was employed as teacher. An assistant teacher (ריש דוכנא) was paid by the community when the pupils numbered forty or more; a second assistant being added when the number reached fifty. Private teachers were also allowed. A father or guardian was obliged to send his child to school, and he was not allowed to send the child to a neighboring school if there was one in his own community. Most of the communities had their own schoolhouses (בית המדרש), often adjoining the synagogues.

The management of the alms fund was an important matter; it was in the hands of a special committee (נבאי צדקה), chosen generally from among the members of the governing board, and hence also called פרנסים. The mere management, which involved no responsibility, was in the hands of one person; the levying of contributions, from which women, orphans, and the poor were

Benevolent exempt, was in the hands of two persons working together, who had the **Institutions.** right to fine delinquents. The distribution was in the hands of at least three persons, for they had to decide on the amount of the relief, and any court dealing with money matters had to consist of at least this number. This office, also, was often hereditary, and the antecedents of the incumbent had to be irreproachable. In expending the money the wishes of the givers were to be considered. There were two chief classes of poor-funds: (1) The קופה ("box"), for feeding and clothing the resident poor. Every Friday evening a collection was taken up for them, and they were provided for during the coming week. (2) The תמחוי ("dish"), for the support of transients, for whom collections might be taken up on any day, in such amounts as were necessary. Non-Jews, also, were to be relieved, but those who begged from house to house received only a trifle from the fund. On special occasions, as on Purim, the poor received additional gifts. Money was also distributed in the synagogues for philanthropic purposes. Orphans were cared for by their guardians, or, if there were none, by the local court (בית דין).

The irregular or special communal taxes were

levied only when occasion demanded, and only upon those directly concerned. This fund was managed by the treasurer (קצב), who was a member of the governing board. The budget included the expenses (1) of the synagogue and its service, to which the full citizens, including orphans, contributed; (2) of education, such as the building of the schoolhouse and the occasional relief of the teacher, to which all members of more than two months' standing contributed; (3) of the poor-fund, consisting of (a) the "kuppah" (weekly food distribution), supported by all members of more than one month's standing; (b) the "tamhui" (daily distribution of meals), supported by those of more than three months' residence; (c) the clothing fund, maintained by all residents of more than six months' standing; and (d) the burial fund, supported by all those of more than nine months' residence; (4) of the public safety, such as for walls, soldiers, etc., to which all full citizens and all landowners, and even orphans, contributed, Talmudic scholars only being excepted; (5) of the water-works, to which only those benefited contributed. The state taxes were apportioned among the communities, which divided them among their members. Only scholars were exempt from the poll-tax, while the tax on real estate was paid entirely by property-owners.

Along these lines developed the life of the community ("kahal," pronounced "kohl" in the districts where German-Polish was spoken; compare the term "kohlstibel" = "communal room"). Yet the rabbi (the designation רב [compare מרת, applied to women to-day] was dropped toward the end of the twelfth century, being later replaced by רב = "rabbi" [compare Zunz, "Literaturgesch." p. 284; Rahmer's "Jüd. Lit.-Blatt." vii., No. 81; Salfeld, "Martyrologium," xxiv.; on מארי and באבאי, חכם at Aden, see Rinman, "Massa'ot Shelomoh," pp. 10, 110]) no longer had the high position enjoyed by the "resh galuta" of Babylon and the "nagid" in Egypt until the fifteenth century. Until the end of the thirteenth century he was independent of the community as an unsalaried official. In England, before the expulsion, there was one "presbyter omnium Judæorum Angliæ," appointed by the king, generally for life. In Poland during the sixteenth century he was appointed by the king, in whose name he levied taxes and held court. The rabbinate in Bohemia was in a similar position during the same century; but here there was no regular district rabbinate, as in Galicia and Moravia. In Algeria at the beginning of the fifteenth century the appointment of the rabbi was subject to the sanction of the government. In countries bordering on the Rhine he was appointed every three years. Rabbinical synods were held in some places as early as the thirteenth century; at Bologna, after 1416. In Poland they were held annually, and known as the "wa'ad arba' arazot," COUNCIL OF THE FOUR LANDS.

In order to put an end to unpleasant rivalry for leadership in prayer, a salaried reader was appointed, who frequently discharged other religious functions and received the title קהן (hazzan). In his musical functions he was assisted by a "bass" and a "singer," and occasionally by boy choristers. The

hazzan was usually elected by the unanimous vote of the congregation: it is on record that one refused nomination at the hands of the Archbishop of Cologne.

The taxes which the governments demanded from the communities were often paid with difficulty. In Spain and in England, about 1273, even children of ten had to contribute, and in the latter country the Jews at times paid one-twelfth of the royal revenues. In Anjou the taxes were collected by a "sindic et procurator universitatis Judæorum." Where the Jews formed one-tenth of the population they often paid one-fourth of the taxes, more than one-half of this sum being frequently paid by the wealthier members of the communities; hence the moneyed aristocracy which arose toward the end of the seventeenth century. The rabbi (also his widow), other professional scholars, all salaried officials, and some physicians, were exempt from taxes; artisans paid only the poll-tax; in Christian countries the hazzan paid, but not in Mohammedan. Some communities elected a committee of ten to choose the rabbi, the hazzan, and the sexton (שמש). These three received perquisites. In Poland, Russia, and Hungary their salary was raised by collections at weddings; and they received special gifts ("kibbudim") during festivals.

Wandering beggars were, and still are, a plague to communities, particularly as the latter were responsible for any trespasses of the former. At Metz every one was subject to taxation if a beggar remained eight days. The tax for the Holy Land was confiscated by the Roman emperors as "fiscus," the so-called "golden sacrificial penny" which the Jews had to pay to the emperor when he had extraordinary expenses (Würfel, "Juden in Nürnberg," p. 49; Ulrich, "Juden in der Schweiz," p. 12). Even to-day money is paid into the קופת ארץ ישראל ("the collection-box for Palestine"). In many

Fines and Imposts. countries (as in Austria down to modern times) there were also taxes on meat, wine, artificial light, strangers, dowries, luxuries, houses, imports, and exports. In Prague there was a tax even on the writing-material used by school-children; in Rome a tax was levied for the benefit of the circus. In Switzerland the Jews of the village communities paid from 15 to 20 florins to get timber and foliage for their tabernacles (Ulrich, *l.c.* pp. 32, 287).

In Nuremberg (Würfel, *l.c.* p. 32) the municipal council and judges had the right to appoint annually a committee and recorder, who saw that the community lived in peace and amity. In Zurich, in 1335, the Jews were required "to obey the burgo-master and city council. If any Jew injured another the latter was to bring the matter before the said burgo-master and council, and when they had decided according to their 'light,' he was to abide by their decision forever, appealing to no special Jewish law or to any higher court. He who did so was to be adjudged guilty of perjury, and pay two hundred silver marks as penalty" (Ulrich, *l.c.*). The foregoing was construed as applying even to the internal affairs of the synagogue.

In Spain all the communal decisions had to be

confirmed by the government. Here, however, as late as 1379, the community could inflict capital punishment; but this measure was taken only against the "malshin" (slanderer), a term which has been adopted into Spanish. An efficacious mode of punishment exercised by the Jewish court, and still employed by the Church, was the BAN ("nid-
dui"), in its more stringent form called "herem."

The communal elections took place in the various countries and communities at different times between Passover and the Feast of Tabernacles. The

SCHULKLOPPER, generally identical with the שמש, was a curious institution. In Talmudic times, and later in Palestine, the "shofar" was blown at the beginning of the Sabbath. Still later (but as early as Yer. Bezah 63a), mention is made of מקושע דכנישה, the "Schulklopper," or "synagogue-knocker," who, crying "In Schul herein!" knocked at the window with a hammer every morning except on the Ninth of Ab. Usually he tapped three or four times, but in cases of death, twice; on the Sabbath he used his fist instead of the hammer. The שמש also acted as public crier in the synagogue, invited to the festivities, called together the council, acted as bailiff of the court ("shammash bet din") in the absence of a special officer, and arranged for "minyān" (the number [10] of men required to be present at any religious services), to help form which the members of the community could be forced only on New-Year and Atonement days.

Extraordinary legislation for the community was made public by means of the "takkanah" (enactment), proclaimed and sometimes posted in the synagogue, and written in a book. Such enactments were usually issued for a given time only, generally for five years. In this way was promulgated the decree of monogamy for western European Jews; the decision as to when and what taxes were to be paid, and as to when the "Schulklopper" should go round. One of the earliest "takkanot"

Takkanot. (dating before the ninth century) decreed that the dowry secured to the wife in the "ketubbah" (marriage contract) might be taken from the personal property of the husband after his death. The decrees against pronouncing the name of God, and against making proselytes, are also old. In Sicily begging from house to house was forbidden, under pain of the ban, by the takkanah. By this means the inclusion in letters of the usual formula, "may he live long," was enforced; sermons were announced; the rate of interest was determined; the conditions under which one might move from a community, thereby casting an additional burden on that community, were set forth; and purchasing imported fowls or wine, lending money on stolen property, and building houses which would obstruct the street leading to the synagogue, were prohibited.

A. M. GR.

Each community owned all the instruments of communal life. Foremost among these is the synagogue, with its sacred scrolls and other appurtenances; one or several "batte midrashim," or houses of study—in modern times Talmudic libraries; lodges for washing the dead; ritual

baths; slaughter-houses; lodging-houses for travelers; places for administering justice and for communal business; a large hall for the Communal solemnization of marriages; a dancing-hall (usually in Germany and France, but not in Spain and the East); bakehouses or ovens, for the annual Passover cakes and the weekly "schalet"; and many cooking and other utensils, which might be used in turn by such members of the community as needed them. Another class of communal property includes funds for carrying on worship and study, and for charities; funds for the use of the general body in dealing with the Gentile government, for the purpose of preventing the oppression of individuals. Where the Jews were confined to a separate quarter, funds to pave and to clean the streets, to build and to repair gates, were sometimes needed. In such cases they were raised by a tax on the householders.

The communal property, both real and personal, may be bought and sold by the "kahal" acting through its proper organs. The Codes take this power for granted, but restrain its exercise. Thus, a synagogue may be sold in order to put up a bet ha-midrash, or to buy scrolls of the Law, but not conversely (Megillah, 26b, 27a; Shulhan 'Aruk, Oraḥ Ḥayyim, 153, 1).

L. G.

L. N. D.

—**In Modern Times:** Notwithstanding the emancipation of the Jews from their medieval state of dependence on the government, the authorities in most of the European states still continue to regulate them in one way or another. This is especially the case on the continent of Europe, where most of the states have a ministry of public worship within whose jurisdiction all such matters fall.

The most important community organization in these states was the system of consistories established by Napoleon I. on March 17, 1808, and still effective as modified by an ordinance which was developed by Martin du Nord and promulgated by King Louis Philippe on March 27, 1844

France and the Netherlands. (see CONSISTORIES). The consistorial system exists not only in France, Belgium, Holland, and Luxemburg (see ANTWERP, BRUSSELS, AMSTERDAM, etc.), but also has survived the French régime in Alsace-Lorraine, there being three "Circonscriptions Consistoriales": at Strasburg for Upper Alsace; at Colmar for Lower Alsace; and at Metz for Lorraine.

Germany presents to-day the most varied assortment of communal organizations, due to the different regulative forms adopted by the states which make up the empire. In some this organization is perfect, and is in direct communication with the government—e.g., in Württemberg, Baden, Hesse, and Mecklenburg—in others it is imperfect, and the connection with the state is almost nominal.

In the kingdom of **Württemberg** the laws of April 25, 1828, and of Aug. 3, 1832, made it obliga-

tory upon every Jew to be a member of a congregation. All were to form "Kirchengemeinden" (church communities), electing their own officers and having at their head a rabbi selected by the "Oberkirchenbehörde" (upper ecclesiastical council), such selection to receive the sanction of the government. The chief rabbi, whose seat is in Stuttgart, has the title "Kirchenrath." The congregations are divided into 13 "Rabbinatsbezirke" (rabbinical districts) and 41 "Gemeindebezirke" (community districts). The Oberkirchenbehörde or Kirchenoberbehörde, is made up of a government commissioner, a Jewish theologian, three or more additional members, and an "expeditor." It nominates all ministers and officers, and regulates the affairs of the congregations throughout the kingdom.

In the grand duchy of **Baden**, as early as 1809, an organization of the Jewish communities was effected. The synagogues were divided into provincial synagogues, with a "Landesrabbiner" (chief rabbi of the district or province) and elders at their head—all to be approved by the government—and "Ortssynagogen" (local synagogues), dependent upon the provincial ones. At the head of the organization is an "Oberrath" (high consistory) in Carlsruhe, made up of an "Obervorsteher" (rabbi or layman), two "Landesrabbiner," two "Oberrathen," three additional "Oberrathen," and a scribe. The Oberrath was chosen by the grand duke, the Obervorsteher (chief warden) by the ministry, and the rabbis by the Oberrath, subject to confirmation by the government. The "Ortsrabbiner" were to be elected by the "Jüdische Landvorstand," with confirmation by the Oberrath. The decisions of the Rath in important matters is also subject to confirmation by the ministers. On May 4, 1812, a government commissary was added to the Oberrath; and for the provincial synagogues were substituted (March 5, 1827) "Bezirkssynagogen" (district synagogues), a "Landessynode" (national synod) being added. According to the law of June 18, 1892, every Jew is bound to pay a certain church tax regulated according to his general state tax, and for this purpose the individual congregations divide their members into sixty different classes. There are now in Baden both "Bezirksrabbiner" (district rabbi; *e.g.*, at Bruchsal and Freiburg) and "Stadtrabbiner" (city rabbi, as at Carlsruhe, Pforzheim, and Mannheim).

In **Mecklenburg-Schwerin**, according to the statute of May 14, 1839, the Jewish Church was recognized as such by the state, and all congregations were put under an Oberrath made up of two government commissaries (who have, however, no voice in religious matters), the Landesrabbiner, and a Rath of five, to be changed every four years. The Landesrabbiner is elected by the Rath subject to confirmation by the government, which contributes to his salary.

Mecklenburg-Strelitz has an "Ober- und Landesrabbiner" confirmed by the state. The Jewish communities in the grand duchy of **Hesse** were to be divided in 1825 into grand-ducal rabbinates; while **Saxe-Weimar-Eisenach** (which, according to the "Juden Ordnungen" of 1823 and 1833, was to have a Landesrabbiner and to receive a state sub-

vention) has a grand-ducal "Aufsichtsbehörde" for Jewish affairs and a Landesrabbiner. **Saxony** has only individual congregations and no general organization; but since Dec. 30, 1834, these congregations have been placed within the jurisdiction of the ministry of education, and since Jan. 30, 1836, the government contributes toward their expenses. **Oldenburg, Birkenfeld, Saxe-Meinigen** (which, according to the edict of Jan. 21, 1829, was to have a Rath made up of the Landesrabbiner and a deputation from the consistory), **Anhalt**, and **Bruswick** still have a Landesrabbiner whose election is subject to confirmation by the state. The province of **Hesse-Nassau** is divided into Rabbinatsbezirke, each with a Provinzialrabbiner at the head, and with a Landrabbinat in Cassel. The cities of **Frankfort-on-the-Main** and **Homburg** have each a separate Stadtrabbinat. In some districts (*e.g.* Fulda, Hanau, Marburg) the religious affairs of the Jews are in the hands of a "Königliches Vorsteheramt der Israeliten" (royal directoral board of the Jews), in others (*e.g.*, Wiesbaden), of "Regierungs Commisaren" (governmental commissioners). In **Bavaria** the law of June 10, 1813, allowed every fifty families to form a congregation; but no organization was given to the Jews as a body. There are at present Bezirksrabbinat, Distriktsrabbinat, and Stadtrabbinat.

The greatest difficulty in organizing the Jewish communities was experienced in Prussia, due to the various enlargements of the kingdom during the first quarter of the nineteenth century. In 1815 portions of Germany which had been under French rule were added to the kingdom. In these former French provinces the consistorial arrangement had been introduced by the decree of March 17, 1808, and in Westphalia by the royal decree

Prussia. of March 31, 1808. In the province of Posen the law of June 1, 1833, recognized the Jewish congregations as corporations, at the head of which were representatives elected under the auspices of the government. The law of Jan. 14, 1834, gave these corporations further administrative powers. A third set of communities was governed by Frederick the Great's "General-Juden-Reglement" of April 17, 1750, for the kingdom of Prussia, Brandenburg, and part of Pomerania, and by the law of May 21, 1790, for Breslau. In **Lübeck** the heads of the congregations had to be confirmed by the "Landgericht." In religious matters the members of the congregations were placed under "the elders and rabbi," and were watched over by a royal commission. A fourth class comprised Jewish congregations, especially in Silesia, for which no especial regulations had been issued.

According to the "Allgemeine Landrecht" the Jewish communities are considered as "merely tolerated church societies," like the Herrnhuter and Mennonists. The communities have therefore been allowed to develop their own organization as they best seemed fit, only under a general supervision of the state. Each province, or district, has developed a "Verband der Synagogen-Gemeinden" *e.g.* (East Prussia with 45 congregations, West Prussia with 41, Pomerania with 21, in Posen with 26, Bromberg with 27, Breslau and Liegnitz with 36, Saxony with 15, and Westphalia with 44). The Jews in

each place are forced to belong to the Jewish congregation, no matter what their religious affiliations may be. Thus the Reform-Gemeinde in Berlin is a part of the Jüdische-Gemeinde of the city. The extreme Orthodox party has found this arrangement burdensome; and in 1873 a law was passed by the Reichstag, largely through the efforts of Lasker, which permitted any one to declare himself "Confessionslos." This enabled the Orthodox Jews to found their own synagogue apart from the general organization, as was done in Berlin by the Synagogen-Gemeinde Adass-Jisroel, in Frankfurt by the Israelitische-Religions-Gesellschaft, and in Mayence.

The simple form of city and district organization in Germany, as above described, has not been found sufficient to meet all the demands, and attempts have been made to bring the congregations and communities into closer touch with one another. For this purpose the Deutsch-Israel Gemeindebund was formed in 1869; its council sat at first in Leipzig, and since 1883 has met in Berlin. It is a purely deliberative assembly, so far as its power goes; but it deals with questions which affect the Jews of Germany as a whole. The Central Verein Deutscher Bürger Jüdischen Glaubens has a similar object in view; while the Deutscher Rabbiner Verband (founded in 1884), the Verein Traditionell-Gesetzestreuer Rabbiner in Deutschland, the Vereinigung der Liberalen Rabbiner Deutschlands (founded in 1898), and the Deutscher Reichsverband Jüdischer Religionslehrer (founded in 1901) deliberate upon questions affecting the purely religious interests of the congregations.

Austria also presents a very varied organization of Jewish communities. Up to the end of the reign of Francis II. (1835) the Vienna Jews were not allowed to use the term "congregation"; they were merely "the Jews of Vienna," at the head of whom were "Vertreter" (delegates); their rabbi was an "inspector of meat," and their preacher a "teacher of religion." The law of March 21, 1890, definitely regulated the Jewish communities, ordering that every Jew must be a member of the congregation of the district in which he resided, and giving the congregation the right to tax its members. The Jewish congregation of Vienna is presided over by the Vorstand der Israelitischen Cultus-Gemeinde with a "Vertreter-Collegium," or board of delegates, consisting of eleven members and various permanent and temporary commissions. Its religious affairs are in the hands of a "Rabbinats-Collegium," with a chief rabbi, a "Rabbinats-Assessor," and various other rabbis. They are responsible for the proper keeping of the registers. The congregation has a number of synagogues, each with its own management. There are also a number of unofficial "Vereinsbethäuser." The Turco-Israelitish congregation (Sephardic) has had since 1737 its own synagogue, with a "Vorstand" and a hakam or rabbi. The rest of Lower Austria has only local congregations, which at times have combined with a Bezirksrabbiner at their head.

Maria Theresa tried to introduce a sort of consistorial arrangement of the Jewish communities in Galicia by the law of July 16, 1766. This provided

for an Oberlandesrabbiner and twelve parnasim, who formed a "Juden-Direction," which had both spiritual and temporal powers. This

Austria. Direction was dissolved in Nov., 1785, because of the misuse of its powers; and on May 29, 1789, the emperor Joseph issued a new "Judenordnung" dividing the country into districts, each having a rabbi who held office for three years. At present there is no general organization except in the larger cities. Thus Lemberg has a "Cultus-Representanz," at the head of which is a Vorstand, a "Cultusrath," and a rabbinate made up of a Gemeinde-Rabbiner, a Synagoge-Rabbiner and Rabbinats-Assessoren. **Bohemia** formerly had a "Representanz der Landsjudenschaft," with representatives from the various districts of the kingdom. At present no such organization exists. The city of Prague has an Oberrabbiner, at whose side are Gemeinde-Rabbiner and preachers. **Bosnia and Herzegovina** have an Oberrath whose seat is at Sarajevo. The Jewish communities of **Moravia** have had an even still more interesting development. At the beginning of the eighteenth century Moravia had its "Landesrabbiner," "Landesältesten," "Landeseinnehmer," and a "Solicitor." The law of 1754 reorganized the Jewish communities and instituted a royal commission in matters relating to the taxation and policing of the Jews. Under Emperor Joseph II. there was a further reorganization. The special Jews' Law was done away with, and there was founded the Mährisch-Jüdischer Landesmassafond, which has been of great help in regulating the financial status of the congregations. In 1798 the number of Jewish congregations was fixed at 52; in 1877 at 55. According to the law of May 20, 1874, the governing board of every congregation must be announced to the police, and the election of a rabbi must be confirmed by the authorities. The law of March 21, 1890, mentioned above, did not do away with the Landrabbinat of Moravia, and it has remained the only one of its kind in the Austro-Hungarian monarchy. It still has a Landesrabbiner. The law of Jan. 1, 1892, fixed the number of Jewish congregations in Moravia at 50.

There is no general Jewish congregation in **Hungary**, and the congregations have perfect freedom in managing their affairs. The Jewish community of Budapest is presided over by a Rabbinats-Collegium and a commission. In Austria, as in Germany, the attempt has been made to form larger and more comprehensive organizations of the Jewish communities. The Israelitische Allianz in Wien was founded (1873) with the intention of subventioning schools, of furthering the study of Jewish history, and of combating anti-Semitism. The Allgemeiner Oesterreichisch-Israelitischer Bund and the Oesterreichisch-Israelitische-Union pursue similar objects.

In Italy, in the former kingdom of Sardinia, the Jews were organized under deputies or syndics, elected by the notables. They were divided into four communes or universities: Piedmont, Monferrato, Alessandria, Nice, each with a chief rabbi. These universities were subdivided into smaller groups. Piedmont, under French domination, was divided in 1808 into two consistories (Turin and Casale); but in 1815 the old order was reestablished. In what was for-

merly the grand duchy of Tuscany, an old corporation statute of Cosmo I. (1569-74) ordered that the Jews should be under forty "govern-

Italy. nanti," appointed for life by the grand duke, and at the head of whom there was to be a "cancellero." Venice had a head commission of twenty-four notables ("sezioni rinnite"). Various other systems prevailed in different parts of the country, which have largely been abolished in united Italy. The leading congregations have a chief rabbi, the others a vice-rabbi or teacher. The affairs of each congregation are in the hands of a commission of from two to four members, recognized by the government.

In Denmark the Jewish communities were organized by the edict of March 14, 1813. Each synagogue was to have a priest (rabbi); the chief rabbi was to reside at Copenhagen. The

Denmark. power of the latter was afterward considerably reduced; the congregations outside Copenhagen were to be perfectly free, each having a "katechete" or teacher, responsible to the government. In **Sweden**, according to the edict of May 27, 1782, the Jews are free to form congregations wherever they wish; but synagogues can be built only with the consent of the king. Every congregation chooses seven electors, and these choose three wardens for three years.

In Russia every Jew is forced to belong to some religious organization; the government rabbi being held to a strict registration of all births, marriages, and deaths. New congregations can be formed only with the permission of the government. There is no hierarchy: the congregations usually have two rabbis; one the religious head, whom they elect, and a second appointed by the government, who need not necessarily be a theologian. The affairs of the individual congregations are in the hands of the "kahal" or board (see COUNCIL OF FOUR LANDS). For purposes of taxation the government divides the Jews into certain definite classes. The Karaites have their own organization; their head rabbi is called "hakam" (see CRIMEA). In Ru-

Russia and mania (Moldau-Wallachia) a peculiar organization existed since the beginning of the eighteenth century. At the head of the Jews in Moldau there was a "haham-basha," nominated by the prince, whose jurisdiction extended also over Wallachia. He was usually a layman, though the post was often confided to a rabbi. At his side was a "vakil-haham-basha." Each community was presided over by one or more provosts and notables, whose election had to be confirmed by the prince upon the recommendation of the haham-basha. The post of haham-basha was abolished in 1832 at the request of the Jews themselves.

In Turkey the Jewish communities have preserved more of a political character than anywhere else. Their head is a state official (who was responsible for the collection of the poll-tax ["kharaj"], up to 1855, when it was abolished), as were the heads of the Greek Orthodox, Armenian Orthodox, and Armenian Reform bodies. According to the "Hatt-i-Humayun" of "Gul-hane," 1839, the internal affairs of the Jewish community were placed under the

supervision of a board comprised of lay and clerical members; with the exception of legal questions which were to be decided by the reg-

Turkey. ular tribunals. The hakam-bashi and one delegate were to take part in the deliberations of the supreme court of justice. A similar representation was given to the Jews in the vilayets, sanjaks, etc. The hakam-bashi of Constantinople was formerly chosen by the Jews themselves; though the government might annul the choice. They had, also, their purely spiritual head, the "rab-ha-kolel."

In 1860 a supreme tribunal for the Jews was instituted, consisting of four members, and an assembly of notables (Majlis Pakidim, Majlis Jashmi, Tobe ha-'Ir), elected by the most important men of the community. A new constitution was granted to the Jews by Sultan 'Aziz, May 5, 1865, which instituted three different councils: a "Majlis 'Umumi" (national council) of 24 notables, a "Majlis Gashim" (temporal council) of 7 lay members, and a "Majlis Ruhani" (spiritual council) of 9 rabbis. The communities in the various vilayets and sanjaks are under a hakam-bashi of their own, who is supported by an administrative council.

The congregational system has been largely developed in English-speaking countries. In England, before the middle of the eighteenth century, the synagogues were entirely independent of one another. In 1757 the Great and the Hambro synagogues appointed one chief rabbi. In 1868 the three London synagogues and their two branches united into one organization; and in 1870 the United Synagogue was formed with the intention of comprising all the synagogues of the United Kingdom. The chief rabbi of the United Synagogue has the title of "chief rabbi of the united congregations of the British empire." He has at his side a bet din, and the worldly affairs of the United Synagogue are managed by a council consisting of life members and certain officers, of the wardens for the time being of the constituent synagogues, and of a certain number of representatives at council.

The Spanish and Portuguese congregations of London have their own organization, with their own ecclesiastical chief, who is called "haham." In 1840 the West London Synagogue of British Jews was

formed as a Reform congregation; it and the daughter congregations in **England.** Bradford and Manchester do not form part of the United Synagogue. In 1887 a fourth organization was effected for the purpose of associating together the synagogues in East London. This organization, known as the "Federation of Synagogues," is managed by a board consisting of a president, one elected member from each confederated synagogue, and one representative for every fifty contributing members of each synagogue, and seven elected elders. Steps have recently been taken to form in England an organization to be known as the "Jewish Congregational Union," on lines similar to those followed by the Union of American Hebrew Congregations.

The English Jews have also organized, without respect to congregational affiliations, the Anglo-Jewish Association (1871), the objects of which are

the protection of persecuted Jews, and the education of Jewish children in Eastern countries. The London Committee of Deputies of British Jews (founded 1760) watches and takes action with reference to all matters affecting the welfare of British Jews as a religious community. It consists of 65 deputies: 31 elected by 18 metropolitan synagogues; 32 by provincial synagogues; and 2 by colonial congregations.

Organization on strictly congregational lines has been most completely developed in the United States. Here each congregation is a law unto itself. It may elect its own ministers and arrange its services at will. The Union of American Hebrew Congregations, organized July 1, 1873, in Cincinnati, is merely a deliberative body,

United States. and has no power to make its decisions effective in the congregations composing the Union.

As the Union represents the congregations belonging to the Reform wing, a similar organization of Orthodox Jewish congregations was formed in New York in 1898. No distinction is made in the status of the various rabbis, a very large number of whom are banded together for mutual help in the Central Conference of American Rabbis (founded 1891). In some of the larger cities—e.g., New York, Chicago, and Philadelphia—local rabbinical associations have been formed. A National Council of Jewish Women was formed in 1893.

No international organization of Jews has been attempted until quite recent times. The Alliance Israélite Universelle of Paris (founded 1860) was intended to be such; but, though it has branches in almost every country, the foundation of similar societies in England, Germany, and Austria shows that it has not attained this end. The International Zionist Organization, with its periodic congresses, has, since 1897, moved in this direction.

COMMUTATION OF SENTENCE. See JUDGMENT.

COMO: City on the Italian lake of the same name. Como never possessed a Jewish community, although a single Jewish family, with employees and servants, lived there for a time and conducted a banking business which was handed down from father to son for four generations. They owed their permission to live in Como to the dukes of Milan—at first to the Viscontis and then to the Sforzas—who granted them protection partly for the sake of their taxes and the benefit to be derived from entering into business relations with them, and partly from dictates of humanity, though the inhabitants of Como and the adjacent districts were extremely hostile to the Jews.

In 1436 Duke Philip ordered the city to admit Giuseppe and his son Abraham, of Mantua, to whom

the council of Como had in the previous year refused admission. The city authorities, however, demanded, in addition to the payment by the newcomers of the usual taxes, that they wear the Jews' badge. Abraham's son Mandolino opened a bank at Mandello, Lake of Lecco; and in 1467 his son Benedetto obtained the exclusive right for a period of ten years to conduct a bank in the territory of Como. No more Jews were to be admitted except those from Lugano. Notwithstanding this restriction of competition, however, Benedetto failed in 1472.

The city intended to expel the Jews in 1478; but, on the intervention of the duke, it made a new contract with them for ten years, restricting usury and increasing their taxes. But the inhabitants remained hostile; and Benedetto's widow, named Gentile, was obliged to appeal to the duke to protect her rights. She had been required to sell her house at a sacrifice, because it was too near a convent, and, for a similar reason, to leave a house which she had rented; and she was even prevented from moving into a third dwelling, for which she had already paid. Finally she asked the duke to secure for her "a safe and permanent lodging in a locality not isolated." As the hostility of the inhabitants increased during the excitement following the blood accusation at Trent (1475), the Jews disappeared entirely from Como.

COMPASSION: Sorrow and pity for one in distress, creating a desire to relieve, a feeling ascribed alike to man and God; in Biblical Hebrew, רַחֵם ("riham," from "rehem," the mother, womb), "to pity" or "to show mercy" in view of the sufferer's helplessness, hence also "to forgive" (Hab. iii. 2); חָמַל, "to forbear" (Ex. ii. 6; I Sam. xv. 3; Jer. xv. 15, xxi. 7); חָסַם, "to spare" (Deut. vii. 16, xiii. 8; Ezek. vii. 4, xx. 17); חָסַד and חֲסִיד, "to be gracious" and "kind" (Isa. xxii. 23 [if the text is correct]; Prov. xx. 28; Job vi. 14; Num. xiv. 19; Gen. xxx. ii. 10; Isa. lxiii. 7). The Rabbis speak of the "thirteen attributes of compassion," יְגִמְלוּת שֶׁל רַחֲמִים (Ex. xxxiv. 6; Pesik. 57a; R. II. 17a). Later a distinction is made between attributes of compassion and those of love (חֶסֶד; see ASHER BEN DAVID in his commentary on the Thirteen Attributes, where he classifies them under "justice," "love," and "compassion").

The Biblical conception of compassion is the feeling of the parent for the child ("pitieth"; Ps. ciii. 13). Hence the prophet's appeal in confirmation of his trust in God figures the feeling of a mother for her offspring (Isa. xlix. 15), and Pharaoh's daughter, moved by maternal sympathy, has compassion on the weeping babe (Ex. ii. 6).

But this feeling should mark the conduct of man to man (I Sam. xxiii. 21); its possession is a proof that men are among those deserving recognition as "blessed unto YHWH"; and in Zech. vii. 9 it is included among the postulates of brotherly dealings. Inversely, the lack of compassion marks a people as "cruel" (אַכְזָרִי; Jer. vi. 23). The Chaldeans are without compassion in that they slay the young and helpless (II Chron. xxxvi. 17); and Edom is censured for having cast away all "pity" (Amos i. 11).

The poor are especially entitled to compassion (A. V. "pity"; Prov. xix. 17). The repeated injunctions of the Law and the Prophets that the "widow," the "orphan," and the "stranger" shall be protected show how deeply rooted was the feeling of compassion in the hearts of the righteous in Israel. It can not be admitted that the provisions for the extermination of the seven original Palestinian tribes (Deut. vii. 3, 16) indicate the absence of kindly sympathy for aliens. Even if these provisions do not, as the critical school insists, represent merely pious wishes, they are at least entitled to be regarded as war measures, and, as such, were exceptional. They rank with similar provisions to cover the cases of the murderer and the false prophet (Deut. xiii. 8; xix. 13, 21). The very horror with which the conduct of the Chaldees and Edom (see above) was regarded proves the contrary. Even the "enemy" was within the sweep of Jewish compassion. And so was the dumb animal, as the humane provisions of the Pentateuch against cruelty to them demonstrate (see CRUELTY TO ANIMALS).

The physiological psychology of the Bible places the seat of the sympathetic emotions in the bowels.

But the eyes were credited with the function of indicating them. Hence the frequent use of the expression "the eye has," or "has not," pity. The "length of the breath"—that is, in anger or wrath (אֵרֶךְ אַפַּיִם)—is another idiomatic expression for compassionate forbearance.

God is full of compassion (Ps. ciii. 11, cxlv. 3); and this compassion is invoked on men (Deut. xiii. 17), and promised to them (Deut. xxx. 3). "His compassions fail not, being new every morning" (Lam. iii. 22). Repeatedly He showed His compassion (II Kings xiii. 23; II Chron. xxxvi. 15). His "mercy [or "compassion"] endureth forever." He loveth the "poor," the "widow," the "orphan," and the "stranger." He is named חֲנוּן וְרַחוּם ("gracious and full of compassion"; Ex. xxxiv. 6, *passim*). To obtain His "compassion," as the quality that pardons, sinners must first repent and return to Him (II Chron. xxx.). But when they do this, even non-Jews will experience His compassion (Book of Jonah). For God "pitieth" like a father those "that fear him" (Ps. ciii. 13).

These Biblical ideas become the foundation of the ethical and theological teachings of the Rabbis. Israel especially should be distinguished for its compassionate disposition (Yeb. 79a), so that one who is merciful falls under the presumption of being of the seed of Abraham (Bez. 32b). One who is not prone to pity and forbearance is cruel (B. K. 92a), and this though to be compassionate has the tendency to rob life of its savor (Pes. 113b). The thoughtlessly frivolous is like a cruel man, but one who is compassionate experiences the lot of the poor man (B. B. 145b). Compassion shown to fellow man will win compassion from on high (Shab. 151a). Eyes without pity will become blind, and hands that will not spare will be cut off (Ta'an. 21a). Women are recognized as prone to pity (Meg. 14b). In fact, this trait of its women was one of the glories of Jerusalem (B. B. 104b). To praise God meant to become merciful like unto Him (Shab. 133b; Ex. xv.).

Strangers certainly came within the scope of the rabbinical ideas of compassion. Their dead were buried with the dead of Israel; their poor were assisted; their sick were visited (Git. 61a, Tos. v. 4, 5). The angels when about to celebrate in song Israel's victory over Egypt were hushed by God with the rebuke: "The works of My hands have been drowned, and you would intone jubilant pæans!" (Meg. 10b).

The peculiar interdiction of the explanation of Pentateuchal laws as manifestations of divine compassion for dumb creatures (Ber. 33b) proves that this explanation was popular (see CRUELTY TO ANIMALS). But the Rabbis often lay stress on the fact that the Torah takes great care to "spare" (חָסָה) the property of man (Soṭah 14b; Nega'im xii.).

God is recognized as the "Compassionate" (רַחֲמָן; compare the frequent use of "rahman" in the Koran). He is invoked as the אֲבִי הַרְחֻמִּים (Father of Compassion). So close is this association with Him that "Rahmana" becomes the usual designation for His revealed word. He suffers with His people (Rabbi Meir: "The Shekinah exclaims with the suffering patient, 'Oh, my head! Oh, my arm!'" Sanh. iv. 46a; but see Levy, *s.v.* קָל). He mourns with His people (Lam. R. to i. 1). The relation which God's "compassion" sustains to His "justice" is also a subject of rabbinical inquiry, as it was among the early Christian sects. When the shofar is sounded "God's quality of compassion mounts the throne" (Pesik. 151b, 155a; Lev. R. xxix.; compare also Abraham's prayer [Yer. Ta'an. 65d]). The name "Elohim" designates God's justice (מִדַּת הַדִּין), and the name יְהוָה God's compassion (מִדַּת הַרְחֻמִּים; Ex. R. vi.). Even while God is preparing to inflict punishment, God's compassion is bestirring itself (Yer. Ta'an. 65b, bottom; Pesik. 161b; Midr. Teh. to Ps. 86; Pes. 87b). Philo says "God's pity is older than His judgment" ("Quod Deus Sit Immutabilis," 16). The name יְהוָה is repeated twice in Ex. xxxiv. 6 to allay the fears of Moses. As before the sin of the golden calf had been committed God dealt with Israel according to His compassion, so even now, after their sinning, will He deal with them in mercy (Pesik. R. 5; Num. R. xii.).

COMPENSATION. See FEES.

COMPIÈGNE DE WEIL, LUDWIG: Convert to Christianity; lived at Paris, later at Metz, in the second half of the seventeenth century. He was a descendant of the rabbi Jacob Weil of Nuremberg. Having embraced Christianity while still a youth, he studied theology at the Sorbonne, and devoted himself to the interpretation of Maimonides' "Yad ha-Hazakah," of which he translated into Latin the following halakot: "Abodat Yom ha-Kippurim," Paris, 1667; "Hamez u-Maz-zah," *ib.* 1667; "Kiddush ha-Hodesh," *ib.* 1669; "Ta'aniyyot," *ib.* 1667; "Sefer ha-'Abodah," comprising all the halakot concerning the service of the Temple, *ib.* 1678; "Sefer ha-Korbanot," with Abbravanel's introduction to Leviticus, London, 1683. A separate edition of this introduction appeared under the title "Haḳdamat Abravanel el Sefer Wa-Yikra," Amsterdam, 1701.

In addition to these works Compiègne translated into Latin Abraham Yagel's catechism, "Lekah Tob," London, 1679.

COMPRAT VIDAL FERUSSOL. See **FARRISSOL**, **COMPRAT VIDAL**.

COMTINO, MORDECAI BEN ELIEZER: Turkish Talmudist and scientist; lived at Adrianople and Constantinople; died in the latter city between 1485 and 1490. The earliest date attached to any of his writings is 1425. The form of his family name is doubtful. In Hebrew it is usually written כומטניו, as, for instance, in one of his acrostic piyyuṭim, and has been transcribed by modern scholars "Comtino." Some manuscripts, however, give כומטינו or כומטיאנו; and Mordecai's biographer, J. Gurland, uses the form "Kumatyano," a name which he finds still in use in Turkey (Geiger, in "Wiss. Zeit. Jüd. Theol." iii. 445; *idem*, "Melo-Chofnazim," p. 13). He was the pupil of Enoch Saporta, a distinguished Talmudist, known for his cultivation of the sciences and his tolerance toward the Karaites.

Mordecai was the teacher not only of Elijah Mizrahi, but also of the Karaites Elijah Bashyazi and Caleb Afendopolo. Though an opponent of their teachings, Mordecai was held in honor by the Karaites, two of his piyyuṭim being included in their Siddur (Landshut, "Ammude ha-'Abodah," p. 200). Most of his works have come down in manuscript, selections from which have been published by Gurland, in his "Ginze," part iii., 1866. The scientific bent of his mind is shown in his commentary to the Pentateuch (MSS. Paris, Nos. 265, 266; St. Petersburg, No. 51), in the preface to which he speaks of his researches in grammar, logic, physics, astronomy, arithmetic, geometry, and metaphysics. This commentary, in which he especially criticized Ibn Ezra, was attacked by Shabbethai ben Malchiel Kohen ("Hassagot," c. 1460), which attack Mordecai answered in his "Teshubot Hassagot" (Steinschneider, "Cat. Codicum Hebr. Bibl. Acad. Lugduno-Batavae," pp. 202-207). He also wrote commentaries to Ibn Ezra's treatises "Yesod Morah" (dedicated to his pupil Joseph Rachizi), "Sefer ha-Shem," and "Sefer ha-Ehad" (MS. Paris, No. 661; compare Neubauer, "Cat. Bodl. Hebr. MSS." col. 436), and a commentary to Maimonides' "Millot ha-Higga-yon," printed in Warsaw, 1865.

Mordecai was a teacher of mathematics, and did much to advance the study of the exact sciences in Turkey. In his commentaries to Ibn Ezra he has often occasion to touch upon such subjects. His chief works in this branch are: a treatise in two parts on arithmetic and geometry, in which he follows partly the Greek and Latin authors, partly the Mohammedan (MSS. Berlin, No. 49; Brit. Mus. 27,107 A; Paris, 1031, 5; St. Petersburg, 343, 344, 345, 346); "Perush Luhot Paras," a commentary written in 1425 on the astronomical tables of Yezdegerd, tables already treated of by Solomon b. Elijah Sharbiṭ ha-Zahab (MSS. Paris, Nos. 1084, 1085; St. Petersburg, 359); glosses to Euclid (MS. Ginzburg, No. 340, 5); an essay upon the construction of

the astroabe, "Tikkun Keli ha-Nehoshet," as a complement to the Hebrew works on the subject, which he found to be superficial; an essay (1462) upon the construction of the astronomical instrument ("Al-Zafihah"), invented by Al-Zarkala, written at the request of his pupil Menahem (MSS. Munich, No. 36, 13; Paris, 1030, 5; St. Petersburg, 353); an essay upon the construction of an instrument for measuring time (sun-dial), which can be made in two different ways (MS. St. Petersburg, No. 361).

I. BER.—G.

CONANIAH: 1. A Levite who in the reign of Hezekiah had charge of the offerings and tithes brought to the Temple. Associated with him in this work was his brother, Shimei (II Chron. xxxi. 12, 13; A. V. "Cononiah").

2. Leader of the Levites who in the reign of Josiah raised flocks and donated them for the paschal sacrifices of the Levites (II Chron. xxxv. 9).

E. G. H.

G. B. L.

CONAT, ABRAHAM BEN SOLOMON:

Italian printer, Talmudist, and physician; flourished at Mantua in the second half of the fifteenth century. He obtained the title of "haber" (associate of a rabbi) for his learning, but displayed it chiefly in the choice of works selected by him for printing, which art he and his wife Estellina expressly learned. He embarked upon the business of printing at Mantua in 1476, and became celebrated as one of the earliest printers of Hebrew books in Europe, producing the third to the tenth of Hebrew incunabula as recorded by De Rossi. In 1475 he established a printing-office at Mantua, from which he issued: "Tur Orah Hayyim," by R. Jacob b. Asher (1476); "Tur Yoreh De'ah," by the same author, only one-third of which, however, was printed by him, the rest being executed at Ferrara; "Behinat Olam," by Jedajah Bedersi, in which Conat was assisted by his wife Estellina and Jacob Levi of Tarascon; Levi b. Gershon's (Ralbag's) commentary on the Pentateuch; "Luhot," astronomical tables giving the length of day at different times of the year, by Mordecai Finzi; "Yosippon," the pseudo-Josephus or Gorionides; "Eldad ha-Dani"; "Nofet Zufim," the rhetoric of Messer Leon (Judah).

All these books were printed between 1476 and 1480, when the business was suspended on account of the rivalry of Abraham ben Hayyim at Ferrara. Abraham Conat was proud of his work; he used to accompany his name in the colophons by the words "Who writes with many pens without the help of miracles, for the spread of the Torah in Israel." He was especially delighted that four pages could be printed at one time on a large sheet, and that he could produce two thousand pages every day. His type was of such a shape that his editions are often taken for manuscripts.

M. SEL.

CONCIO (קונציו), **JOSEPH B. GERSHON**: Italian author; lived at Asti and Chieri in the beginning of the seventeenth century. He published several Hebrew poems, including: "Ot le-Tobah," twenty-two sentences on Talmudic arguments in the order of the Hebrew alphabet, which appeared together with "Shir le-Siman ha-Parashiyyot" and "כ"ב Shirim bi-Leshon Hidah Mehubbbarim" (Riddles and Their Solution) (Chieri, 1627); "Dibre Ester," allegorical commentary to Esther, together with "Zeh ha-Shulhan" (ib. 1628); "Ma'agal Tob," seventeen sentences of the Talmud (ib. 1627-28), in which he was assisted by his son Abraham as printer or editor (Steinschneider, "Cat. Bodl." col. 2866); "Shir Yehudit" (Asti, 1628); "Mar'eh Hayyim," halakic matter in verse (Chieri, 1629); "Me'kom Binah," comments on certain passages in Proverbs (ib. 1630); "Tehillat Dabar," a treatise on logic, preserved in a Cod. Almanzi; besides a collection of poems, reviewed by Steinschneider in "Ha-Asif," ii. 225. Concio also wrote in Italian, as two poems, "Cinque Enimmi" (Asti, 1628) and "Canto di Judit" (1628), bear witness.

G.

I. E.

CONCORDANCE (Latin, *Concordantiæ*): An alphabetical list of all the words in a book, with references to the passages where each word is found. The appellation indicates the concordance or similarity of all such passages. In Jewish literature the term is applied exclusively to concordances of the Bible and of the Talmud.

— **Biblical**: The word, in this connection, was first used by Hugo de Sancto Caro (named from Saint-Char, a suburb of Vienne in southern France), who compiled a concordance to the Vulgate about 1244. The revised edition of this work, made by the Franciscan Arlotto di Prato (Arlothus), about 1290, served as a model for the concordance to the Hebrew Bible which Isaac Nathan b. Kalonymus, of Arles in Provence, compiled 1437-45. Isaac Nathan, also known as the author of Biblio-exegetical and religio-philosophical works, was led to undertake this task by discovering, during the polemic discussions forced upon him by Christian scholars, that, in order to refute the arguments drawn by his opponents from the Bible, it was necessary to have an aid that furnished a ready reference to every Biblical passage and a quick survey of all related passages. He called his concordance "Meir Natib" (Enlightener of the Path); on the title-page of the first edition, however, it is also called "Yair Natib" (It Will Light the Path, after Job xli. 24 [A. V. 32]). This work, on which all later Hebrew concordances were based, is the first Jewish work in which the original text of the books of the Bible is divided into chapters, and these and the verses are numbered according to the Vulgate. Isaac Nathan also found it necessary to add to his preface a list of the first words of each chapter. He followed the Vulgate in

the sequence of the Biblical passages, keeping the order of the books of the Bible as found therein.

Isaac Nathan's concordance was first published by Bomberg at Venice in 1523, this edition being followed by several others.

Isaac Nathan's. (Venice, 1564; Basel, 1556, 1569, 1581). The first Basel edition has a Latin translation of the principal words. An enlarged edition, containing a concordance to the Aramaic parts of the Bible and an index of Biblical proper names, places, etc., was undertaken by Marius de Calasio at Rome 1621. Other editions appeared at Cologne, 1646; London, 1647-49; and Rome, 1657.

Even before Isaac Nathan's work was printed Elijah Levita of Rome began to work out a concordance on a Masoretic basis, which he at first intended to entitle "Sefer Beki'ut" (Book of Scholarship), but afterward called "Sefer Zikronot" (Book of Remembrance), indicating thereby its function as an aid to the memory. The manuscript of the first draft—probably by the author himself—finished between 1515 and 1521 and dedicated to Cardinal Ægidius of Viterbo, is now in the Royal Library at Munich (Steinschneider, "Die Hebräischen Handschriften der Königlichen Hof und Staatsbibliothek in München," No. 74; "Joodsche Letterbode," vii. 174). The manuscript of the second draft, finished at Venice 1536, is in the Bibliothèque Nationale, Paris (Frensdorff, in Frankel's "Monatsschrift," xii. 101). Levita's concordance has not been printed; the beginning only was issued by B. Goldberg (Frankfort-on-the-Main, 1875). It has this great advantage over Isaac Nathan's, that the several forms of each word are arranged grammatically and lexically according to a definite scheme; while in Nathan's work only the various meanings of the same root are distinguished, all forms falling under one definition, being not separated, but arranged according to the sequence of the books and the chapters. Levita, moreover, added—and this was his chief purpose—the Masoretic notes belonging to every word; he, therefore, included proper names and particles wherever they were found with Masoretic comment.

The usefulness of Levita's concordance is impaired, however, by the fact that he cites every passage only once, and not under every word occurring therein. As he says in his preface, his concordance is intended not only as an aid in polemic discussions with Christians, as Nathan's professed to be, but also to serve other purposes; viz., to be a manual for the grammatical and lexical knowledge of the Hebrew language, a book of reference for Bible quotations, a book for preachers seeking the Bible passages concerning a certain point, an aid toward acquiring a polished Hebrew style, a riming dictionary, and even a reference book for cabalistic speculations ("Z. D. M. G." xliii. 235). With this schedule for his work, Levita almost exhausted the uses to which a Bible concordance can be put: there remains to be added only its utility to the Bible exegete and critic.

Levita's Masoretic concordance, as has been stated, was never published, and therefore could not supplant Isaac Nathan's work as an aid to Biblical study; a thoroughly revised edition of the latter by

COLOPHON ON THE LAST PAGE OF "TUR ORAH HAYYIM," PRINTED BY ABRAHAM CONAT, 1476.
(In the collection of Hon. Mayer Sulzberger.)

the eminent scholar Johann Buxtorf the Elder of Basel became the concordance par excellence. Buxtorf followed Nathan's work closely;

Buxtorf's. he retained the latter's remarks on the meanings of the root placed at the head of every article, but also gave these in Latin, and explained every form of the word in Latin. He materially increased the usefulness of the concordance by separating from one another the derivatives of a root, the nominal and the verbal forms, and by arranging them systematically, as Levita had done. Buxtorf's concordance appeared after his death (Basel, 1632), his son Johann adding to it a concordance of the Aramaic portions of the Bible as well as a long preface. This concordance, which was authoritative for more than two hundred years, was reedited by John Taylor, London, 1754. Extracts from it were made by Christian Ravius, Frankfurt-on-the-Oder, 1676, and by Andreas Sennertus, Wittenberg, 1653. A most useful and important addition to it was made by Christian Nolde (Noldius) in his "Concordance of the Particles," Copenhagen, 1679; new ed., Jena, 1734.

A highly valuable revision of the concordance was undertaken by Julius Fürst. In the Latin preface to his great work (Leipsic, 1840) he described the relation of the latter to Buxtorf's concordance in the following words: "I admit that I have used Buxtorf's concordance as the foundation for my own work; but I may claim that I have not only revised and enlarged Buxtorf's work, but have worked it over to such an extent that I do not hesitate to affix my name to the concordance. I have enriched Buxtorf's work with many additions; adding, for instance, Wolf Heidenheim's manuscript notes contained in his copy of the book, and articles that Buxtorf had omitted, as on the verb *יָדָה* and the divine name *יְהוָה*. All these additions are in accordance with the advances in philology, and especially in etymology; and in some cases I have followed an entirely new arrangement, founded upon a careful examination of the origin and the form of the words." Fürst added new material, and made some minor changes, especially by

Julius Fürst's. substituting Arabic numbers for the quotations instead of the Hebrew letters. The headings of the articles are entirely new, having been transformed into interesting lexicographical articles in which the etymology and meaning of the root are explained by the aid of comparative philology.

Unfortunately, however, Fürst goes too far in applying his theory of the primitive roots of the Semitic languages and of the original relationship of the latter with the Indo-Germanic languages. This theory had been propounded by Fürst's pupil, Franz Delitzsch, in his work "Jesurun" (Grimma, 1838), which was designated as "Prolegomena to Fürst's Concordance of the Old Testament." Fürst's peculiar views on certain Hebrew roots affected unfortunately the arrangement of the concordance, as he often places a word in a connection in which it would not be sought according to the commonly accepted view; as, for instance, *דָם* ("blood") under the root *אָדָם* ("man"). The work has a number of interesting appendices, including: an etymologic

index to the concordance; an alphabetical list of 2,668 Biblical proper names, with their etymologies, but without reference to the passages; a list of about 600 Phenicio-Punic proper names; an index of Aramaic and Neo-Hebrew words compared in the headings to the articles; an etymological table of Hebrew and Aramaic particles; a systematic view of the noun forms; "Propylæa Masoræ," a view of the most important topics of the Masorah; a synopsis of the history of the Hebrew language, written in Hebrew; and a comparative glossary of Hebrew, Aramaic, Syriac, and Arabic words. In the "Literaturblatt" of the periodical "Der Orient," edited by Fürst, additions and revisions to the concordance repeatedly appeared in the years following 1840. B. Bär issued a new edition of Buxtorf's concordance—in quarto instead of in folio—making use in part of Fürst's work (Stettin, 1862, *et seq.*). An English version by B. Davidson appeared in London in 1876.

An entirely new revision of the concordance was undertaken a few years ago by Solomon Mandelkern. He had found, after a thorough examination of the entire material, that "in the concordances of Fürst and Bär about 5,000 omissions and grammatical errors, as well as countless misquotations and wrong references, must be rectified." Mandelkern's new concordance appeared in Leipsic in 1896. To the material of the preceding concordances is added an appendix, containing all proper names, as well as, in a separate division, a list of the most important particles. Mandelkern corrected the errors of the previous concordances and filled in the omissions. He arranged the passages according to the sequence of the Biblical books obtaining in the Hebrew Bible, instead of the sequence of the Vulgate hitherto used. Especially noteworthy is the care that Mandelkern

displays in regard to the exact and logical completeness of the Biblical passages used to illustrate each word. **Solomon Mandelkern's.** The headings of the articles furnish the lexicographical explanations of the roots and their derivatives, while due attention is paid to the latest philological discoveries and textual criticism. Mention must also be made of the practical arrangement of this latest concordance. Mandelkern has issued it in a smaller edition (Leipsic, 1900), which contains all the material of the larger edition, but only a list of the passages where the respective word-forms are found, without any quotation.

That Mandelkern's concordance itself contains numerous errors and omissions has become evident since its appearance, especially from the reviews in Stade's "Zeitschrift" and in the "Monatsschrift." The editor of the latter, M. Brann, mentions in this connection a most complete and careful concordance to the particles, and one to the proper names (preserved in manuscript in Breslau), made by Moritz Piorkowsky, a teacher in Silesia in the first half of the nineteenth century ("Monatsschrift," xlii. 529 *et seq.*). Two other concordances of Biblical proper names may be mentioned: one by Gideon Brecher, Frankfurt-on-the-Main, 1876; the other by Schusslovicz, Wilna, 1878.

Among concordances to the Septuagint are: the

earlier ones of Conrad Kircher (Frankfort-on-the-Main, 1607) and of Abraham Tromm (Trommius) (Amsterdam, 1718); and the large concordance by E. Hatch and H. A. Redpath (Oxford, 1892-97), which covers also the other Greek Bible translations and the Apocryphal writings, and is compiled with extraordinary care. A supplement to this work (Oxford, 1900) deals with the proper names.

BIBLIOGRAPHY: The introductions to the concordances of Buxtorf, Fürst, Mandelkern; Andr. Glauchius, *De Usu Concordantiarum Biblicarum*, Leipsic, 1660. A detailed list of concordances is given at the beginning of Fürst's introduction.

W. B.

— **Talmudical:** In 1899 the library of the "Landesrabbinerschul" of Budapest came into possession of a manuscript in two folio volumes, containing the first half of a concordance to the Babylonian Talmud. The first volume (from א to י) has 237 pages with 1,890 columns; the second (from י to י), 169 pages with 1,347 columns. The writing is exceedingly elegant and small (cursive), and shows equal care from beginning to end. Each column contains about 80 lines, so that nearly 260,000 Talmudic passages are recorded. The letter א takes up 648 columns; ב, 504; ג, 241; ד, 260; ה, 228; ו, 9; ז, 184; ח, 507; ט, 166; and י, 491. The Talmudic passages follow in the sequence of the Talmudic treatises, and are arranged according to roots and words, like the Biblical passages in Isaac Nathan's concordance, without regard to their grammatical form. The passage is given in such a way that it always forms a complete sentence clear in meaning. An index of all the articles, with a short explanation of the words, is given at the beginning of each volume. The work has the significant title "Asaf ha-Mazkir" (after II Kings xviii. 18, 37; Isa. xxxvi. 3, 22), meaning a collection of words serving to aid the memory.

The author of the work, Moses Rigotz (Rigócz), or Moses Sande (*i.e.*, Szántó), who lived toward the end of the eighteenth century and at the beginning of the nineteenth in Balassa-Gyarmat, the chief town of the county of Nograd, Hungary, was notary of the Jewish community in the county, and was held in high esteem by the nobility and the authorities. He was a pupil of the Moravian chief rabbi R. Gerson Politz, with whose successor, R. Mordecai Benet, he corresponded in regard to the Talmudic concordance he had undertaken. Other Talmudic authorities also encouraged him to carry out his plan; for instance, R. Wolf Boskowitz; R. Meir Eisenstadt (a pupil of R. Moses Sofer), rabbi at Balassa-Gyarmat; and R. Moses Minz of Alt-Ofen. Notwithstanding the approbation ("haskamah") of these authorities, neither the author himself nor (after his death) his son succeeded in having the work published; and it seems to have remained unfinished. The two volumes remained in the possession of the author's family, until the last owner, Joseph Weiss, presented them to the above-mentioned library. The work and the author were first noticed by W. Bacher in the Hungarian weekly "A Jövő," Jan. 22, 1897, pp. 6-8 (see extract in Brody's "Zeit. für Hebr. Bibl." 1898, iii. 63).

CONCUBINAGE. See PILEGESH.

CONDITIONS: Qualifications or limitations annexed to an agreement by which it may be continued, altered, or rendered of no effect upon the performance or non-performance of something, or the happening or non-happening of an uncertain event. If the event must happen before the agreement begins to operate, the qualification is called a "condition precedent"; if afterward, a "condition subsequent."

A condition may be attached to any contract or legal act. The various conditions known to Roman and common law may be divided as follows: (1) positive, *i.e.*, the happening of some event which may or may not happen; (2) negative, *i.e.*, the non-happening of such an event; (3) authoritative, *i.e.*, dependent on the power of the party in whose favor the obligation is contracted; (4) dependent on the party binding himself with the obligation; (5) casual, *i.e.*, dependent on an accident, or on the act of persons in no way controlled by either of the parties to the contract; (6) mutual, *i.e.*, dependent on the acts of both parties; (7) mixed, *i.e.*, dependent on the act of one of the parties and a third person. The condition may be either expressed or implied, and it may be lawful or unlawful.

The law of conditions is well developed in the Jewish law-books. All these classes of conditions were known to the Jewish law. Nevertheless the classification of the subject-matter must differ somewhat from that of the other systems of law.

Express conditions are created by the use of one of three formulas: "im" (if); "me'akshaw im" (from now on, if); and "al menat" (on condition that). The condition "if" differs materially from the other two. The latter are simpler, and not subject to the same rules that must be observed in order to create a valid condition with the form "if." The first consideration refers, therefore, to the condition "if." There are four principal rules to be observed in the creation of a condition with the word "if."

(1) The condition must be "double" ("tenai kful"); that is, it must be expressed in a positive as well as a negative form. R. Meir derived this rule from Num. xxxii. 29, 30: "And Moses said to them, 'If the children of Gad and the children of Reuben will pass with you over Jordan, . . . then ye shall

give them the land of Gilead for a possession: but if they will not pass over with you, . . . they shall have possessions among you in the land of Canaan'" (see Mishnah Kid. iii. 4). The following example is given by Maimonides ("Yad," Ishut, vi. 3): "If a man says to a woman, 'If thou givest me two hundred zuzim thou art betrothed to me by this denarius [coin], but if thou dost not give them to me thou art not betrothed'; and after having expressed this condition he gives her the denarius, the condition is a valid one, and she is 'betrothed on condition.' If thereafter she gives him the two hundred zuzim she is betrothed absolutely; and if she does not give them to him, she is not betrothed."

Some of the later geonim ruled that conditions need not be "doubled" except in cases of conditions annexed to betrothal or divorce, and that in ordinary contracts referring to money matters this form of expressing the condition doubly is unnecessary.

Maimonides dissents from this (Ishut, vi. 14), and his opinion is the adopted law. If the condition is not properly expressed in its double form it is void, and the contract is unaffected by it. Thus, if, in the case above, the man had merely said, "If thou givest me two hundred zuzim thou art betrothed to me by this denarius," and had omitted the clause, "if thou dost not give them to me thou art not betrothed"; and had then given her the coin, the condition would have been void, and she would have been betrothed to him absolutely (Ishut, vi. 5).

(2) The double condition must be so expressed that the positive form precedes the negative. This is shown in the above example. If the man had put the negative form first, thus: "If thou dost not give me the two hundred zuzim thou art not betrothed, but if thou givest them to me thou art betrothed with this denarius," and if he then gave her the coin, she would have been betrothed without condition (Ishut, vi. 1; Git. 75b).

(3) The condition must precede the act, or the conclusion of the contract. Maimonides illustrates it thus: "If the man says to the woman, 'Thou art betrothed to me by this coin,' and gives her the coin; and then expresses the condition, saying, 'If thou wilt give me two hundred zuzim thou art betrothed; but if not, thou art not betrothed,' the condition is void, because the legal act of betrothal was complete before the condition was expressed" (Ishut, vi. 4). In taking the view that the

act itself may not precede the expression of the condition, Maimonides follows the literal meaning of the Mishnah (B. M. vii. 11): "And every condition which is preceded by the act is void." Other authorities go even further, and maintain that the substance of the contract may not even be expressed before the condition is expressed, or else the condition is void (Maggid Mishneh to "Yad," Ishut, vi. 4). Thus the contract and the condition in the following case are well expressed: "If you do this I will give you that; but if you do not do this I will not give you that." But if a party says, "I will give you this if you do that," the condition is void.

(4) The condition must be one possible of fulfillment. If the condition of the contract is that the party shall climb into heaven, or walk through the sea, or swallow a reed a hundred yards long, the condition is void, and the contract is complete without condition (B. M. 94a).

The condition created by the words "me'akshaw im" (from now on, if) differs in many important respects from the condition "if." The latter is, in fact, a condition precedent, and the former a quasi condition subsequent. Where the condition is that a certain thing shall be done "if" something else is done, the condition must be fulfilled before the contract to do the thing can be enforced; whereas in a condition subsequent, the contract is immediately effective, but may be ended

Condition
"from now on, if," by the performance or non-performance of the condition at some future time. In the Jewish law this is accomplished by use of the words "from now on, if." The distinction between these two cases is thus expressed by Maimonides (Ishut, vi. 15, 16): "If one

betroths a woman 'on condition,' she is betrothed from the moment the condition is fulfilled, and not from the time of the actual ceremony of betrothal. For example, if he says to a woman, 'If I give thee two hundred zuzim during this year thou art betrothed to me by this denarius, and if I do not give them to thee thou art not betrothed,' and gives her the denarius in the month of Nisan, and the two hundred zuzim in the month of Elul, she is betrothed from Elul. Therefore if another betroths her before the condition imposed by the first man is fulfilled, she is betrothed to the second." And this is also the law in cases of divorce and of money matters. The divorce is absolute or the sale or gift perfected at the time when the condition is fulfilled. All this is true only if, in imposing the condition, he did not say "from now on." If, however, he said, "Thou art betrothed unto me by this denarius from now on if I give thee two hundred zuzim," and he eventually gives her the two hundred zuzim, she is betrothed from the time of the ceremony of betrothal, even though the condition was not fulfilled until after some time. Therefore if a second man betroths her before the fulfillment of the condition, her betrothal to the latter is void. And this is also the law in cases of divorce and of money matters (Kid. 60a; Git. 74a).

Three of the above four rules that must be observed in creating conditions with the word "if" need not be observed when the words "from now on, if" are used. The only one in force in this case is that the condition must not be impossible of fulfillment (Ishut, vi. 17). But the Shulhan 'Aruk states that there is a difference of opinion on this point among the authorities, some holding that even when the form "from now on, if" is used, all the rules must be observed (Eben ha-'Ezer, 38, 3).

The form "al menat" (on condition that) is in all respects similar, in its legal effect, to the form "from now on, if" (Ishut, vi. 17; Git. 74a).

Conditions may be implied from the nature of the contract and from its terms. Thus if a contract is

reduced to writing and contains a date, the question as to when it is to go into effect is determined thereby (Ket. 2b). The date in the contract is equivalent to the use of the form "me'akshaw." If a contract is entered

into for a specific reason, as where one sells a piece of ground because he urgently needs the money, and the reason fails, as when the need for the sum of money is no longer pressing, the contract may be rescinded, because it is an implied condition of the contract that it is to be considered null and void if the reason that caused its consummation no longer exists (ib. 97a). It is necessary, however, that this reason be clearly stated at the time the contract is made, or otherwise the implied condition is not presumed to exist, for the maxim of the law is that "words which are in the heart are no words" (Kid. 49b). This rule applies only to contracts concerning real estate, for in contracts concerning movable property the conditions, if any, must be expressed according to the rules of law governing the making of conditions (gloss to Hoshen Mishpat, 207, 3). There are some acts which are subject to conditions,

because it is presumed that all men are familiar with them. They need not be expressed in any way; they are absolutely presumptions of law. Thus where a man on his sick-bed transfers his entire estate to another, the law presumes that it was done in contemplation of death. The condition is implied that if he dies it shall be a valid transfer, but if he recovers it shall be void. It is not to be presumed that a man would have given away his entire estate if he expected to recover from his illness (Mishnah B. B. ix. 6; see also Hoshen Mishpat, 246, 1; "Yad," Zekiyah, vi. 1).

Unlawful conditions are void. Such are conditions that are contrary to the precepts of the law (Mak. 3b). For instance, if a man marries a woman on condition that he shall not live with her as her husband, such a condition is absolutely void. But if he stipulates that he shall not provide her with

food and clothing, his condition is a valid one (Eben ha-'Ezer, 38, 5). The distinction between the two cases is based on the fact that the cohabitation of husband and wife is of the very essence of marriage, whereas the questions of food and clothing are financial considerations, in regard to which conditions may be made even though they are opposed to the law, provided they are made as waivers of rights given by the law, and are not stated in such a manner as to imply that the parties do not recognize the law. There can, however, be no diminution of the amount of the Ketubah, or of the husband's rights of inheritance. These are excepted, even though they are mere matters of money (Ishut, xii. 6; see also "Yad," Mekirah, xiii. 3; Hoshen Mishpat, 67, 9; 227, 21).

There is another class of exceptions to unlawful conditions. Where the condition is that the party shall do something contrary to law, it is not ipso facto void, because the party need not fulfil it. For example, if the condition is that the party shall eat forbidden food, and the condition is fulfilled, the contract is valid, even though a breach of the dietary law has been occasioned thereby (Ishut, vi. 8). But this fulfilment of such conditions must be in the power of the party alone. If the condition is a mixed one—that is, if it requires the act of the party and a third person—it is void, because it is presumed that the third person will not be a party to a breach of the law (Git. 84a, b; Ishut, vi. 11).

Conditions in cases of delivery of bills of divorce present a specially interesting phase of the subject. Where a husband was about to go abroad, or to sea, or with a caravan through the desert, it was customary for him to give his wife a bill of divorce "on condition."

The condition annexed was that if he did not return within a certain time, the divorce should be absolute; but that if he did return within such time, the bill of divorce should be null and void (Mishnah Git. vii. 8). The purpose of this proceeding was to prevent the wife from becoming an 'AGUNAH.

The husband could make his own death the condition upon which the divorce became absolute (ib. vii. 3); the happening of this event worked retroactively, and during the interval between the deliv-

IV.—14

ery of the GET and the death of the husband the wife was, according to R. Judah, considered a married woman in every respect; but, according to R. Jose, one whose divorce was doubtful (ib. vii. 4). This peculiar use of the get "on condition" seems to have arisen out of the desire of the husband to save his wife from the levirate marriage (Ned. 27a, Rashi). According to the Law the death of the husband without issue made his wife ipso facto the bride of his brother, whose duty it was to marry her or release her through the ceremony of "halizah" (Deut. xxv. 5-10). The divorced woman was, of course, not subject to this law. So that when the husband gave his wife a bill of divorce on condition that it should become absolute at his death, she remained his wife as long as he lived, but at the moment of his death she was not his widow, but a divorced woman (Mishnah Git. vii. 3).

The general rules of conditions are set forth in detail in the Shulhan 'Aruk, Eben ha-'Ezer, 38, 2-3; for betrothal on condition, see Eben ha-'Ezer, 38, 39, 40; for divorce on condition, see Eben ha-'Ezer, 143-148. See also Hoshen Mishpat, 207; Ishut, vi.; and ASMAKTA.

CONDOM (קונדר or קונרן): County seat in the department of Gers, France. Jews were found there at the beginning of the fourteenth century. In order to pass through this locality, they were heavily taxed. A Jewess, not enceinte, had to pay eight deniers Tours currency; if enceinte, she had to pay double that amount. In 1320, during the persecutions of the Pastoureaux, all the Jews of Condom were massacred.

CONDUITS. See AQUEDUCTS IN PALESTINE.

CONEGLIANO (also known as **Conian**): A prominent Jewish family of northern Italy. The spelling "Conian," according to Kaufmann, is a misreading of the Hebrew קוניאן. It takes its name from the town of Conegliano, which at one time belonged to the republic of Venice. A branch of the family flourished in Ceneda. Its members were distinguished by their learning. The family seems to have originated in Asti, where the name is first met with in the sixteenth century. The best-known members are:

Israel Conegliano: Italian physician and statesman; born at Padua in the middle of the seventeenth century; died in Constantinople in the second decade of the eighteenth century.

After obtaining his diploma Israel Conegliano practised medicine in Venice for two years, and then went to Constantinople. Despite the state of anarchy which reigned at Constantinople at that time, he won the favor and respect of the sultan, and also of his grand vizier Kara Mustapha. Giovanni Morosini, the ambassador of Venice, and his successor, Giambattista Donato, realizing the influence the

young Jewish physician had obtained over the ruling powers, asked their government to attach him to the legation. The matter was, however, left in abeyance until 1681, when Mustapha sent Conegliano to Venice to consult other eminent physicians about the illness of the sultan's son-in-law.

On Oct. 10, 1682, Conegliano was appointed physician extraordinary to the Venetian embassy, with an allowance of one hundred zecchinos (about \$475), a quarter more than had ever been previously paid, and a further payment of forty zecchinos for personal expenses. Conegliano arrived at Constantinople in December of 1682.

Shortly after his arrival the relations between Turkey and Venice became strained, because of a massacre of Turks by the Morlaks of Dalmatia, then under the suzerainty of Venice. The Porte demanded 175,000 reals for the sultan, and 25,000 each for Mustapha and Husain Aga. Donato, the ambassador, went back to Venice to conduct the negotiations, and Conegliano was left as the unofficial representative of Venice.

Conegliano, however, was soon deprived of his most powerful protector. Mustapha had been in supreme command of the Turkish forces that had threatened Vienna. Driven off by John Sobieski of Poland, Mustapha was murdered Dec. 25, 1683, by order of Mohammed IV. In the alliance made by Poland with Venice it became the duty of Conegliano to keep his government posted on the movements of the common enemy, Turkey. This he did, though at the imminent risk of his life, sending the reports through his brother Solomon, then a practising physician in Venice. On the death of his first wife in 1687, Conegliano went to Venice in order to superintend the education of his two boys. In 1690 he returned to Constantinople, and soon gained greater influence than before. A change of sultans and the secret aid of France had induced the Turks to renew a warfare, which was stopped only by the approach of winter. Conegliano unearthed a plot to burn the Venetian fleet, just in time to prevent its execution. So active was he in the service of his country that, despite his popularity, his house was attacked, and he was saved only by the prompt and energetic action of the French ambassador, M. de Castagnères.

In 1693, however, France withdrew her protection from Venetian subjects, and Conegliano sought in vain to enlist the good services of Holland. In May of this year five poor Jews were arrested on fictitious charges of espionage. Conegliano was able to procure their release; but he had aroused antagonism, and he was secretly advised by Ali Pasha, the grand vizier, to flee the city. This he refused to do, and a contemplated order to arrest all Venetians and confiscate their property was stayed for two months. He had, during all this period, been an ardent advocate of peace.

In June, 1694, he returned to Venice, leaving his brother Leo and his friend Husain Aga in Constantinople to work for a cessation of hostilities. On arriving in Venice, Conegliano learned that the Senate had, on June 12, 1693, exempted him and his two brothers from wearing the yellow hat, and had made them citizens of the republic. In February, 1696,

the Turks under Mustapha II. invaded Hungary, but were crushed at Zenta by Eugene of Savoy. Peace, however, was not declared until 1698. On Aug. 23 of that year Conegliano was appointed an ex officio member of the peace congress, with Ruzzini, the Venetian ambassador to Constantinople, as the active member. The congress met at Carlovitz, near Belgrade, but bickerings and differences led to a deadlock. Matters were approaching an open rupture, when at last the jealousy of Lord William Paget and of Ruzzini abated, and Conegliano was permitted for the first time to use his influence with the Turkish commissioners. His efforts were crowned with success, and on Jan. 26, 1699, the peace protocol was signed.

Conegliano returned to Venice and was further honored by his government by receiving permission to travel at will, without the special license usually required of the Jews. In 1700 Conegliano went again to Constantinople, where he died.

BIBLIOGRAPHY: David Kaufmann, *Dr. Israel Conegliano*, 1895, E. Ms.

Israel Conegliano: Preacher at the Ashkenazic synagogue of Padua; born there at the end of the eighteenth century; died March, 1824. He was the pupil of Azariel Alatino, and the teacher of Joseph Almanzi, who bewailed his death in a special publication, "Me'il K'in'ah." Israel wrote a work entitled "Sefer Derashot," still extant in manuscript in Almanzi's collection. M. S. Ghirondi published a poem in his honor in "Bikkure ha-Ittim," vi. 57.

BIBLIOGRAPHY: Ghirondi, *Toledot Gedole Yisrael*, p. 204; Tobias Cohn, *Ma'aseh Tobiah*, Introduction; Mortara, *Indice Alfabetico*, p. 16; Fürst, *Bibl. Jud.* i. 186, ii. 201; David Kaufmann, *Dr. Israel Conegliano*, pp. 6 et seq.

I. Br.

Joseph ben Israel Conegliano: Physician, and probably son of the preceding; lived at Padua at the end of the eighteenth century. He was the author, in conjunction with his brother Naphtali, of a poem entitled "Zemer le-Se'udat Purim" (Song for the Meal of Purim), published at Mantua.

Judah Conegliano: Talmudist; rabbi in Acqui at the end of the sixteenth century and the beginning of the seventeenth. He was among the rabbis whose interdiction of the bath of Reggio provoked so much discussion. Judah Saltaro, in his work "Mikveh Yisrael," Venice, 1607, invokes Conegliano's authority on a ritual question.

Naphtali ben Israel Conegliano: Hebraist; brother of Joseph, and joint author with him of the poem "Zemer le-Se'udat Purim."

I. Br.

Solomon Conegliano: Venetian physician; born about 1642; died in 1719. Conegliano was the elder brother of Israel Conegliano, and, like him, served the Venetian republic with great credit. He was educated at Padua, where he attended the university, obtaining the degrees of M.D. and Ph.D. Jan. 22, 1660. He returned to Venice shortly afterward, and soon developed remarkable talent as a teacher of medicine. Young Jews from all parts of Europe sought his house, to attend the preparatory school which he had established there. Tobias Cohn, who, in his encyclopedia entitled "Ma'aseh Tobiyah," represents Solomon as one of the greatest physicians and philosophers of his time, was one of

his pupils. A poem by him was prefixed to Cohn's encyclopedia. So eminent were his qualifications, both as teacher and as practitioner, that the government permitted him to exercise the privileges of a citizen of the republic. Conegliano's services to Venice and the honors conferred upon him and on his brother by the republic are given in detail in the biography of Israel Conegliano.

CONEGLIANO, IMMANUEL. See PONTE, LORENZO DA.

CONEY: A small herbivorous animal (*Hyrax Syriacus* or *Hyrax Daman*) mentioned in the Bible. "Coney" is the traditional rendering of the Hebrew "shafan" (שָׁפָן), which occurs four times in the O. T. (Lev. xi. 5; Deut. xiv. 7; Ps. civ. 18; Prov. xxx. 26). In the first two places the "shafan" is classified among the unclean animals, along with the hare, "because he cheweth the cud but parteth not the hoof" (Lev. xi., R. V. 5). In the Book of Proverbs the shefannim are described as one of the "four things which are little upon the earth," but "are exceedingly wise." They "are but a feeble folk, yet make they their houses in the rocks" (Prov. xxx. 24, 26). The rendering "coney" is principally supported by the Jewish interpreters and lexicographers of the Middle Ages. None of the ancient versions, however, lend it support in more than one out of the four passages—for instance, the Septuagint in Psalms, and the Vulgate in Proverbs (see Bochart, "Hierozoicon," pp. 1002-1003). Besides, this interpretation is inadmissible for one if for no other reason: the "coney" is a European animal, unknown to the Israelites; and it does not live in the rocks.

Bochart, who refuted the Jewish opinion, tried to demonstrate that the shafan, which, he says, the Septuagint generally and rightly translates *χοιρογρόλιος*, and which St. Jerome rightly identifies with the *ἀρκτομυς*, can not be anything else than the jerboa. His arguments are: (1) the authority of the Copto-Arabic lexicon, the "Scala Magna" of Kircher ("Lingua Aegyptiaca Restituta," p. 165); (2) the analogy between the habits of the two animals (*ib.* p. 1016). Since then, however, travelers who have made on the spot a thorough study of the habits of the jerboa have pronounced that identification impossible (see Bruce, "Voyage," v. 145, Paris, 1791). Shaw ("Travels," p. 386) was the first to propose to identify the shafan with an animal called "ghanam Isra'il" (Israel's lamb). This identification found a warm supporter in Bruce (*l.c.* p. 165), who further identifies it with the "ashoko" of the Abyssinians. The Arabs call this animal "wabr" also, which, it may be added by way of confirmation, is the word used by the Arabic versions to render "shafan" in the first two passages, Lev. xi. 5 and Deut. xiv. 7. Finally, Fresnel ("Journal Asiatique," 3d series, v. 514) says that in the Ehkili dialect (Sabean) the wabr is called "thufun," from the root "thafan," Hebr. "shafan."

The shafan, it is said, does not chew the cud. But here, as in many other cases, Scripture speaks according to appearances. Bruce, who studied carefully the habits of this animal, says that it certainly chews the cud (*l.c.* v. 168). "The shafan,"

says Shaw, "is a harmless creature of the same size and quality with the rabbit, having the like incurvating posture and disposition of the fore teeth. But it is of a browner color, with smaller eyes and a head more pointed. . . . The usual refuge of it is in the holes and clefts of the rocks" (*l.c.* p. 376). Like the ants they live in large numbers, and display considerable wisdom in guarding themselves against surprises from their enemies.

Their habitat extends from Abyssinia into Arabia, Palestine, and Syria. In Abyssinia both Christians and Mohammedans abstain from their flesh; but the Arabs of Arabia Petrea, and also the inhabitants of Mount Lebanon, consider it a great relish. For the place of the coney in the totemistic theories, see TOTEMISM.

H. II.

CONFERENCES, RABBINICAL: Assemblies of rabbis to determine common courses of action or common principles of faith. Rabbinical conferences are a late phenomenon in the history of Judaism, dating, as they do, only from the fourth decade of the nineteenth century. There had been occasional gatherings of Jews during earlier centuries to consider important issues touching the life and religious practise of the people; but the deliberations at these gatherings, or synods, as they are usually called, were not participated in exclusively by the rabbis (see CONSISTORIES; SYNODS, RABBINICAL).

The changed conditions in the life of the Jews in the early years of the nineteenth century, owing to the emancipation from medieval legislation and the accompanying necessity of reconciling the religious beliefs and practises with the demands of the new era upon which they had entered, were the moving causes for the convening of the first rabbinical conference. There have been five notable conferences: viz., at Brunswick, June 12-19, 1844; at Frankfort-on-the-Main, July 15-28, 1845; at Breslau, July 13-24, 1846; at Philadelphia, Pa., Nov. 3-6, 1869; and at Pittsburg, Pa., Nov. 16-18, 1885. Besides these, mention may be made of the following: the Jewish Ministers' Association, an organization of rabbis stationed in the eastern cities of the United States, which met annually from 1885 to 1890;

Early Con- the Conference of Southern Rabbis of ferences. the United States, which existed from April 14, 1885, to Nov. 20, 1887, when

it held its final meeting; and the Rabbinical Literary Association, which was organized at Detroit, Mich., July 13, 1880, and existed only two years. After the rabbinical conference at Philadelphia three meetings were held in 1871 at Cleveland, New York, and Cincinnati respectively. The so-called Cleveland conference (Oct. 17-20, 1855) was not strictly a rabbinical conference, since there were also a few lay delegates present. The same was the case at the synods of Leipsic (June 29-July 4, 1869) and Augsburg (July 11-17, 1871). Hence, these three meetings do not come properly within the scope of this article. The same may be said of the so-called French Sanhedrin, that met in 1807 at the call of Napoleon, and all previous synods. In Germany and Hungary, local conferences of rabbis are still held from time to

time. The Central Conference of American Rabbis, organized in 1889, meets in annual session.

In point of fact, however, the first purely rabbinical conference took place at Wiesbaden in 1837, in answer to a call issued by Abraham Geiger. In a letter to a colleague, dated May of that year, Geiger had written as follows in reference to the purpose of the proposed meeting: "It is not intended to create a new Judaism, nor yet to assume the authority of a synod: it shall merely give honest men the opportunity to discuss the proper methods of conducting their office, and shall be the beginning of the restoration of the almost vanished spirit of Judaism" ("Wiss. Zeit. Jüd. Theol." iii. 321). This conference was attended by Rabbis Geiger of Wiesbaden, Aub of Bayreuth, Bloch of Buchau, Guttman of Redwitz, Herxheimer of Bernburg, Kohn of Hohenems, Maier of Stuttgart, Stein of Burgkurstadt, Wagner of Mannheim, Wassermann of Mülhingen, and Wechsler of Oldenburg. Friedländer of Brilon, Grünebaum of Landau, and Hess of Eisenach arrived too late. These men discussed various questions, but did not enunciate any important decisions. The mere fact, however, that they had gathered for such discussion was significant. A committee was appointed to prepare a manual for domestic devotion in accordance with the needs of the time. It was resolved to discuss in the pages of Geiger's "Wissenschaftliche Zeitschrift für Jüdische Theologie" the practical questions which were agitating the Jewish communities at that time.

The epoch-making conferences have been the five mentioned by name above; they were respectively attended by most of the prominent Reform rabbis of the time in Germany and America; and their deliberations and decisions form an important chapter in the development of the faith.

During the opening years of the fifth decade of the nineteenth century the Jewish communities of Germany were stirred by religious agitation as never before; the issue between the traditionalists and the reformers was acute; the bitter opposition of Tiklin, rabbi of Breslau, to the appointment of Geiger, the most prominent reformer in Germany,

Controversies had induced the officers of the congregation to address the rabbis of Europe **Regarding** for opinions on the subject; and these **Reform.** opinions were published in two volumes entitled "Ueber die Verträglichkeit der Freien Forschung mit dem Rabbineramte." The publication in 1842 of the new prayer-book of the Hamburg Temple (Reform) congregation had called forth from Isaac Bernays, the Orthodox leader, a declaration anathematizing the book and the reformers. These latter, in their defense, published a number of opinions of rabbis who sanctioned the reforms introduced into the prayer-book; these rabbis were, besides the two preachers of the congregation, Salomon and Frankfurter, the following: L. Auerbach, Friedländer, Geiger, Guttman, Holdheim, Kohn, Maier, Maunheimer, Philippson, and Stein. The volume was entitled "Theologische Gutachten über das Gebetbuch nach dem Gebrauche des Neuen Israelitischen Tempelvereins in Hamburg" (Hamburg, 1842). The action of a society of Jews in Frankfort-on-the-Main in 1843, condemning circumcision, and resolving to

abolish the rite in the future so far as their children were concerned, had induced Solomon Trier, the chief of the Orthodox of that city, to address his colleagues for opinions on the absolute requirement of circumcision as an essential of Jewish practise. These opinions, also, were published in a volume entitled "Gutachten über die Beschneidung" (Frankfort, 1814).

The time was ripe for the organization of a society of rabbis at whose meetings all these vexed questions could be discussed, and decisions reached for the guidance of the troubled communities. Ludwig Philippson, editor of the "Allg. Zeit. des Judenthums," recognized this need of the hour, as Geiger had done before him; and he issued a call in the columns of his journal (Jan. 15, 1844, p. 27) for a rabbinical conference. In this call he wrote:

"Let us speak plainly. The issue is no longer the permissibility or non-permissibility of this or that synagogal institution, of this or that alleviation for civil or social life: the issue before us is concerned with the entire content of our religion, which we must present and strengthen in its purity in order to rescue it from deadening rigidity on the one hand and from benumbing unfaith on the other. Judaism is losing influence day by day, and every layman is asking us, 'What are you doing?' The objects of the conference shall be: (1) to bring the rabbis into closer relations and acquaintanceship; (2) to promote unanimity in the conduct of the rabbinical office; (3) to further the founding of communal institutions; and (4) to deliberate upon all Jewish affairs."

A number of rabbis declared themselves in sympathy with this call, and it resulted in the convening of the Brunswick conference of 1844.

The Brunswick Conference (June 12-19, 1844): This was attended by the following rabbis:

A. Adler of Worms; S. Adler of Alzey; Ben Israel of Coblenz; Bodenheimer of Hildesheim; Adler of Minden; Formstecher of Offenbach; Frankfurter of Hamburg; Geiger of Breslau; Goldman of Kurhessen; Heidenheim of Sondershausen; Herzfeld of Brunswick; Herxheimer of Bernburg; Hess of Weimar; Hirsch of Luxemburg; Hoffmann of Meiningen; Holdheim of Mecklenburg-Schwerin; Jolowicz of Marienwerder; J. Kahn of Treves; Klein of Pomerania; Maier of Stuttgart, who was president of the conference; Philippson of Magdeburg; Salomon of Hamburg; Schott of Randegg; Sobernheim of Bingen.

The purpose of the conference was declared to be "to consider the ways and means for the preservation of Judaism, and the awakening of the religious spirit."

The resolutions passed by the conference were as follows:

"The oath of a Jew is binding without any further ceremony than the invocation of the name of God. The prayer 'Kol Nidre' is unessential; and the members of the conference were to take steps to abolish it on the following Day of Atonement."

The conference indorsed the responsa of the French Sanhedrin, with the exception of the third, which it changed to read as follows:

"The marriage of a Jew with a Christian—in fact, the marriage of a Jew with the adherent of any monotheistic religion—is not forbidden if the civil law permits the parents to raise in the Jewish religion the children issuing from such a union."

A commission was appointed to consider a number of important questions and to report at the next conference.

The Frankfort-on-the-Main Conference (July 15-28, 1845): The deliberations were concerned mainly with the reports of the commission appointed at

the Brunswick conference. There were present, besides the above-mentioned:

J. Auerbach of Frankfort-on-the-Main; Einhorn of Birkenfeld; Frankel of Dresden; Gosen of Marburg; Güldenstein of Buchau; Jost of Frankfort; Reiss of Alt-Breisach; Stein of Burgkumstadt; Suesskind of Wiesbaden; Treuenfels of Weiburg; Wagner of Mannheim; Wechsler of Oldenburg; Leopold Stein of Frankfort-on-the-Main, who was president of the conference.

The first report discussed was that on the retention of Hebrew in the public services. The conference voted unanimously for the retention of the sacred language. On the question, to what extent, there was a decided difference of opinion. The recommendation of the committee, adopted by a vote of 18 to 12, was that the "Bareku" with its response, the "Shema" (first paragraph), the first and last three benedictions of the "Tefillah," and the selection from the Torah should be in Hebrew, and that the remainder of the service should be in the vernacular.

The conference also decided (in the affirmative) the question "Shall the prayers for the return to the land of our forefathers and for the restoration of the Jewish state be eliminated from the ritual?" Closely connected with this was the question as to whether the Messianic idea was to receive prominent and distinct expression in the ritual. This also was decided in the affirmative.

Although the conference voted for the retention of the "Musaf" prayer, yet it was definitely understood that the traditional supplication for the restoration of the sacrifices should be so changed as to be a mere mention of the sacrifices as historical reminiscences.

On the question of the reading from the Torah, the majority voted for the triennial cycle; and the reading of the "Haftarah" in the vernacular was favored.

The conference was unanimous in its affirmative vote on the admissibility of the organ into the synagogue. All the members but three agreed that a Jew was permitted to play the organ on the Sabbath, and that by so doing he did not violate the law of Sabbath observance.

The conference considered favorably the suggestion submitted by the Berlin Reform Association for the calling of a synod "in which the lay and the theological elements shall be alike represented."

The conference decided in the affirmative the question whether modern bathing establishments can be used for ritualistic purposes. A committee was appointed to direct the attention of the people to the need of theological seminaries.

It was at this conference that the irreconcilable differences between the traditionalists and the reformers received decisive expression. The discussions had shown that many of the

Historical Judaism. members held radical views on a number of vital points connected with the ritual. Zacharias Frankel, who declared himself to be a champion of positive historical Judaism, desired the conference to issue a statement of definite principles. In this he was opposed particularly by Geiger and Holdheim, and, although a majority of the meeting was in sympathy with Frankel's views, yet the conference supported his

two chief opponents in their contention that no definite declaration of principles should be formulated, because such a theoretical document would result only in antagonisms and would not assist in solving the burning questions of the day. Frankel withdrew from the conference, and became the leader of the adherents of so-called "positive historical" Judaism. Frankel issued a call in May, 1846, for a conference of Jewish theologians, to be held in the fall of that year, and to be the organ of the opposition to the Reform conferences; but the meeting did not take place.

The Breslau Conference (July 13-24, 1846): This was attended by:

A. Adler of Worms; S. Adler of Alzey; J. Auerbach of Frankfort-on-the-Main; Ben Israel of Coblenz; Einhorn of Birkenfeld; Formstecher of Offenbach; Geiger of Breslau (who was president of the conference); Goldstein of Waren; Gosen of Marburg; Güldenstein of Buchau; Herxheimer of Bernburg; Herzfeld of Brunswick; Hess of Eisenach; Holdheim of Mecklenburg-Schwerin; J. Kahn of Treves; M. Levy of Breslau; L. Lövy of Münsterberg; Pick of Teplitz; Philippson of Magdeburg; Sobernheim of Bingen; Stein of Frankfort-on-the-Main; Wagner of Mannheim; Wechsler of Oldenburg.

A number of important declarations were made on vital subjects, such as the Sabbath, the holidays, circumcision, and mourning customs. The conference expressed itself on the Sabbath question to the effect that the restoration of the solemn observance of the Sabbath as a day of rest and sanctification is incumbent not only upon the teacher in Israel, but upon every Israelite. Therefore special care must be taken in these days to insure the solemnity of the public services and to secure the observance of Sabbath in the home. Work which is ordinarily prohibited on the Sabbath is permitted in connection with

divine services if necessary for the proper conduct of these services. If a man's livelihood is endangered by the closing of his business on the Sabbath, he may have his business attended to by non-Jews. If contingencies arise threatening the material welfare, any kind of work may be done on the Sabbath to avoid this; for example, in case of fire. Any and all manner of labor is permitted on the Sabbath in cases where human life—whether of Jew or non-Jew—is in danger. The rabbinical prohibitions known as "hedges"—rigorous interpretations of Sabbath laws—are no longer binding. Such institutions as "Erube Hazerot" and "Erube Tehumim," which are mere evasions of the Sabbath laws, although their ostensible purpose is relaxation of the strictness of these laws, are both superfluous and inadmissible. The Jewish soldier must attend to his duties on the Sabbath. As for the Jew who holds a public office, although he is bound to perform the duties connected with his office, yet he should exert himself to restore the solemnity of the day in his home. Brain-work is not included in the categories of labor prohibited on the Sabbath.

The conference made the following pronouncements concerning the holidays: Congregations are justified in abolishing the second day's observance of the holidays with the exception of the second day of Rosh ha-Shanah. If, however, some of the members of a congregation should object to such abolition, these days are to be continued as occasions for public worship, but the prohibition to work on them

is no longer binding in any event. The eating of leavened bread is permitted on the twenty-second day of Nisan, the so-called eighth or last day of Passover. It is permitted to blow the shofar on the first day of the New-Year when it happens to fall on the Sabbath. The same is the case with the use of the four fruits on the first day of Succot when that falls on the Sabbath.

The question of circumcision was made the occasion for a number of declarations, of which the most important were these: Every "mohel" should be required to pass an examination, after being instructed by a surgeon, and should prove by his credentials his authority to perform the operation. The so-called "peri'ah" may be performed with a surgical instrument if the assisting surgeon prefers this to the finger-nail, which, as a rule, is used for the purpose. The "mezizah" is to be dispensed with. (See CIRCUMCISION.) A physician should treat the child after circumcision. A physician should examine the child before circumcision, and decide whether the operation can be safely performed, or whether on account of sickness or bodily weakness it had best be postponed. If parents have had the misfortune to lose a child, or a child has become a chronic invalid, owing to the operation, and they fear to have other children circumcised, they may postpone the rite until the physician declares that there is absolutely no danger from its performance.

The conference gave expression to some decided views on traditional mourning customs. It declared that such practises as the rending of the garments, allowing the beard to grow for thirty days after the death, sitting on the floor, removing the leather shoes, the prohibitions of washing, bathing, and greeting, have lost all significance in these days; nay, more, are repulsive to the religious feeling, and should be abolished. The mourner should remain at home for three days, counting from the day of burial. The mourner should also, as far as possible, abstain from business on the day of the funeral and for two days after the burial. Many important resolutions were referred to committees, but were not acted upon by the conference.

Each of these conferences aroused intense excitement; protests against the discussions and resolutions of the conferences being issued by opponents, while pamphlets in defense were published by participants. The Brunswick conference called forth a protest from seventy-seven German and Hungarian rabbis; also publications such as "פְּרִיָּתָא דְּרַבִּינֵי אֶרֶץ גֵּרָמָה. Protestation Gegen die Rabbinerversammlung von D. Deutsch, Rabbiner in Sohrau, O. S." In defense were issued; "Die Erste Rabbinerversammlung und Ihre Gegner," by Kirchenrath Dr. Maier, and the pamphlet by Holdheim, "Die Erste Rabbinerversammlung und Herr Dr. Frankel." The press of the day, notably the three Jewish publications, "Die Allgemeine Zeitschrift des Judenthums," "Orient," and Frankel's "Zeitschrift für die Interessen des Judenthums," contained articles pro and con. Feeling ran very high, and this was intensified by the Frankfort conference, which had resulted in an open break with Frankel and the conservatives. The bitterness of the feelings engendered is apparent

from such an incident as the refusal on the part of Michael Sachs, the famous preacher of the Berlin congregation, to receive one of the rabbis who had attended the Frankfort conference.

A conference of the rabbis of Baden, held in the summer of 1845 after the Frankfort conference, declared for Reform on the historico-traditional basis. The Breslau conference called forth a bitter declaration from some Jews of Frankfort-on-the-Main, condemning the conference for its cowardice in not dealing fearlessly with the Sabbath question. This aroused the participants in the conference, notably Geiger, Philippson, Stein, and Wechsler, who wrote in defense of their action. These were days of "storm and stress" in Judaism. No further conferences were held. The hope of the founders of the rabbinical conference, that it might become the authoritative tribunal for the solution of the vexing problems that were agitating the Jewish congregations, was not realized, owing to the political reaction following the year 1848. In 1868 an unsuccessful attempt was made to convene a rabbinical conference at Cassel.

These conferences did not succeed in effecting their object because the differences in Jewry were too pronounced. Had they frankly and outspokenly taken either the Reform or the Orthodox position, they might have received acknowledgment as the authority from the adherents of the cause they espoused. It was impossible to satisfy all parties; the participants in the conferences represented many shades of opinion, from the extreme radicalism of Holdheim to the conservative traditionalism of the sympathizer with Frankel, although their main tendency was toward Reform. The conferences furnished at most a forum where vital questions were discussed, and expression was given to interesting views, but they did not attain an authoritative place. They were at best expressive of the conflicts and disturbances that were agitating Jewish thought in the fifth decade of the nineteenth century.

The Philadelphia Conference (Nov. 3-6, 1869): There were present:

S. Adler of New York; J. Chronik of Chicago; D. Einhorn of New York; B. Felsenthal of Chicago; J. K. Gutheim of New York; S. Hirsch of Philadelphia; K. Kohler of Detroit; L. Mayer of Selma, Ala.; M. Mielziner of New York; S. H. Sonnenschein of St. Louis; M. Schlesinger of Albany, N. Y.; I. M. Wise of Cincinnati.

The following statement of principles was adopted:

"1. The Messianic aim of Israel is not the restoration of the old Jewish state under a descendant of David, involving a second separation from the nations of the earth, but the union of all the children of God in the confession of the unity of God, so as to realize the unity of all rational creatures and their call to moral sanctification.

"2. We look upon the destruction of the second Jewish commonwealth not as a punishment for the sinfulness of Israel, but as a result of the divine purpose revealed to Abraham, which, as has become ever clearer in the course of the world's history, consists in the dispersion of the Jews to all parts of the earth, for the realization of their high-priestly mission, to lead the nations to the true knowledge and worship of God.

"3. The Aaronic priesthood and the Mosaic sacrificial cult were preparatory steps to the real priesthood of the whole people, which began with the dispersion of the Jews, and to the sacrifices of sincere devotion and moral sanctification, which alone are pleasing and acceptable to the Most Holy. These institutions, preparatory to higher religiosity, were consigned to the

past, once for all, with the destruction of the Second Temple, and only in this sense—as educational influences in the past—are they to be mentioned in our prayers.

"4. Every distinction between Aaronides and non-Aaronides, as far as religious rites and duties are concerned, is consequently inadmissible, both in the religious cult and in social life.

"5. The selection of Israel as the people of religion, as the bearer of the highest idea of humanity, is still, as ever, to be strongly emphasized, and for this very reason, whenever this is mentioned, it shall be done with full emphasis laid on the world-embracing mission of Israel and the love of God for all His children.

"6. The belief in the bodily resurrection has no religious foundation, and the doctrine of immortality refers to the after-existence of the soul only.

"7. Urgently as the cultivation of the Hebrew language, in which the treasures of divine revelation were given and the immortal remains of a literature that influences all civilized nations are preserved, must be always desired by us in fulfillment of a sacred duty, yet it has become unintelligible to the vast majority of our coreligionists; therefore, as is advisable under existing circumstances, it must give way in prayer to intelligible language, which prayer, if not understood, is a soulless form."

The conference passed a number of resolutions on marriage and divorce, and declared that "the male child of a Jewish mother is, no less than her female child, in accordance with a never-disputed principle of Judaism, to be considered a Jew by descent, even though he be uncircumcised."

The Pittsburg Conference (Nov. 16-18, 1885): There were present at this conference:

I. Aaron of Ft. Wayne, Ind.; J. Bloch of Youngstown, O.; S. Falk of Buffalo, N. Y.; A. Guttmann of Syracuse, N. Y.; E. G. Hirsch of Chicago; A. Hahn of Cleveland, O.; K. Kohler of New York; J. Krauskopf of Kansas City, Mo.; M. Lessler of Wheeling, W. Va.; A. Moses of Louisville, Ky.; M. Machol of Cleveland, O.; L. Mayer of Pittsburg; L. Naumberg of Pittsburg; D. Philipson of Baltimore; S. Sale of Chicago; S. H. Sonnenschein of St. Louis; M. Schlesinger of Albany, N. Y.; S. Weil of Bradford, Pa.; I. M. Wise of Cincinnati.

The following declaration of principles was formulated:

"1. We recognize in every religion an attempt to grasp the Infinite, and in every mode, source, or book of revelation held sacred in any religious system the consciousness of the indwelling of God in man. We hold that Judaism presents the highest conception of the God-idea as taught in our Holy Scriptures and developed and spiritualized by the Jewish teachers, in accordance with the moral and philosophical progress of their respective ages. We maintain that Judaism preserved and defended, midst continual struggles and trials and under enforced isolation, this God-idea as the central religious truth for the human race.

"2. We recognize in the Bible the record of the consecration of the Jewish people to its mission as the priest of the one God, and value it as the most potent instrument of religious and moral instruction. We hold that the modern discoveries of scientific researches in the domain of nature and history are not antagonistic to the doctrines of Judaism, the Bible reflecting the primitive ideas of its own age, and at times clothing its conception of Divine Providence and Justice dealing with man in miraculous narratives.

"3. We recognize in the Mosaic legislation a system of training the Jewish people for its mission during its national life in Palestine, and to-day we accept as binding only its moral laws, and maintain only such ceremonies as elevate and sanctify our lives, but reject all such as are not adapted to the views and habits of modern civilization.

"4. We hold that all such Mosaic and rabbinical laws as regulate diet, priestly purity, and dress originated in ages and under the influence of ideas entirely foreign to our present mental and spiritual state. They fail to impress the modern Jew with a spirit of priestly holiness; their observance in our days is apt rather to obstruct than to further modern spiritual elevation.

"5. We recognize in the modern era of universal culture of heart and intellect the approaching of the realization of Israel's great Messianic hope for the establishment of the kingdom of truth, justice, and peace among all men. We consider ourselves no longer a nation, but a religious community, and there-

fore expect neither a return to Palestine, nor a sacrificial worship under the sons of Aaron, nor the restoration of any of the laws concerning the Jewish state.

"6. We recognize in Judaism a progressive religion, ever striving to be in accord with the postulates of reason. We are convinced of the utmost necessity of preserving the historical identity with our great past. Christianity and Islam being daughter religions of Judaism, we appreciate their providential mission to aid in the spreading of monotheistic and moral truth. We acknowledge that the spirit of broad humanity of our age is our ally in the fulfillment of our mission, and therefore we extend the hand of fellowship to all who operate with us in the establishment of the reign of truth and righteousness among men.

"7. We reassert the doctrine of Judaism that the soul is immortal, grounding this belief on the divine nature of the human spirit, which forever finds bliss in righteousness and misery in wickedness. We reject, as ideas not rooted in Judaism, the beliefs both in bodily resurrection and in Gehenna and Eden (Hell and Paradise) as abodes for everlasting punishment and reward.

"8. In full accordance with the spirit of Mosaic legislation, which strives to regulate the relation between rich and poor, we deem it our duty to participate in the great task of modern times, to solve, on the basis of justice and righteousness, the problems presented by the contrasts and evils of the present organization of society."

The conference adopted the following resolution on the proselyte question:

"Inasmuch as the so-called Abrahamic rite is by many, and the most competent, rabbis no longer considered as a *conditio sine qua non* of receiving male Gentiles into the fold of Judaism, and inasmuch as a new legislation on this and kindred subjects is one of the most imperative and practical demands of our Reform movement, be it

"Resolved that a committee of five, one of them to be the president of this conference, be entrusted with framing a full report to be submitted for final action to the next conference."

This conference has been the only one to make a definite statement on the question of Sunday services. Its declaration on the subject was to this effect:

"Whereas we recognize the importance of maintaining the historical Sabbath as a bond with our great past and the symbol of the unity of Judaism the world over; and whereas, on the other hand, it can not be denied that there is a vast number of working men and others who, from some cause or other, are not able to attend the services on the sacred day of rest; be it resolved that there is nothing in the spirit of Judaism or its laws to prevent the introduction of Sunday services in localities where the necessity for such services appears or is felt."

The conference also recommended that each rabbi read only such sections of the Pentateuch as he thinks proper, but with regard, however, to the regulations of the Hebrew calendar.

Central Conference of American Rabbis:

The first meeting was held in Detroit, Mich., July 9, 1889, at the initiation of Isaac M. Wise. The meeting for organization was presided over by David Philipson, with Henry Berkowitz as secretary. At a session on the following day a series of resolutions was adopted as the working basis of the conference. One of these fixed the position of the conference in the historical succession of rabbinical deliberative bodies, by declaring that "the proceedings of all the modern rabbinical conferences, from that held in Brunswick in 1844, and including all like assemblages held since, shall be taken as a basis for the work of this conference in an endeavor to maintain in unbroken succession the formulated expression of Jewish life and thought in each era."

Actuated by the spirit of this resolution, the conference elected as honorary president Samuel Adler, the only surviving member of the various German con-

ferences held after the year 1840; and Isaac M. Wise was elected president. The conference has since met in annual session in the following cities: Cleveland, 1890; Baltimore, 1891; New York city, 1892; Chicago, 1893; Atlantic City, 1894; Rochester, N. Y., 1895; Milwaukee, Wis., 1896; Montreal, Canada, 1897; Atlantic City, 1898; Cincinnati, 1899; Buffalo, 1900; Philadelphia, 1901; New Orleans, 1902. All of these meetings were held in the month of July, with the exception of those at Chicago, Cincinnati, and New Orleans. The Chicago conference took place Aug. 23-26, introductory to the Jewish Denominational Congress, held in connection with the World's Parliament of Religions; and, together with the Union of American Hebrew Congregations, it represented Judaism officially at the Parliament. The papers read by the members of the conference, both at the Jewish Denominational Congress and at the general Parliament, were published by the Union in a volume entitled "Judaism at the World's Parliament of Religions" (Cincinnati, 1894). The Cincinnati meeting in 1899 was held in March instead of July, in order to celebrate the eightieth birthday of Isaac M. Wise, founder and president of the conference from its organization. An extra session was held at Washington, D. C., in Dec., 1892. The meeting at New Orleans took place May 6-10, 1902. The proceedings of the various meetings of the conference are given in detail in a series of year-books, containing not only the record of the business transacted and the discussions by the members on religious doctrine and practise, but also of the papers read at the sessions.

Although the conference is open to rabbis of any opinion, it is in reality an association of ministers of the Reform school; and while it formulated no declaration of principles, yet its position in all its deliberations and proceedings has been taken firmly on the basis of the Reform movement. This was evident particularly in the discussion of the authority of the Talmud and the rabbinical codes. At the meeting held in Rochester in 1895, the president in his annual address proposed for discussion and decision the question, "What is our relation in all religious matters to our own post-Biblical and patristic literature, including the Talmud, casuists, responses, and commentaries?" The committee to whom the question was referred reported as follows:

"From the standpoint of Reform Judaism, the whole post-Biblical and patristic literature, including the Talmud, casuists, responses, and commentaries, is, and can be considered as, nothing more nor less than 'religious literature.' As such it is of inestimable value. It is the treasure-house in which the successive ages deposited their conceptions of the great and fundamental principles of Judaism and their contributions to the never-ceasing endeavor to elucidate the same. Consciously or unconsciously, every age has added a wing to this great treasure-house, and the architecture and construction of each wing bear the indelible marks of the peculiar characteristics of the time in which it was erected. Our age is engaged in the same task. We too have to contribute to the enlargement of this treasure-house; but we have to do it in our own way, as the spirit of our time directs, without any slavish imitation of the past.

"To have awakened the consciousness of this historic fact is the great merit of Reform Judaism; and the more this consciousness grows upon our mind, the more the conditions and environments of our modern life force it upon us, the more persist-

ently we have to assert that our relations in all religious matters are in no way authoritatively and finally determined by any portion of our post-Biblical and patristic literature."

The notable achievements of the conference are: its preparation and publication of the Union Prayer-Book for Jewish worship; its successful representation of Judaism at the World's Parliament of Religions, as described above; its declaration on the requirements for the admission of proselytes; and, more than all, its uniting in one body the Reform rabbis of the country. The Union Prayer-Book is used at present (1902) by 158 congregations, in all portions of the country, having superseded most of the prayer-books in use heretofore. It attempts to

combine the best elements of the traditional service with prayers expressing the aspirations of modern days. In its report to the general meeting, the ritual committee entrusted with

the preparation of the work stated thus the principles that had guided it:

"Imbued with the earnestness of the task that was laid upon us, we endeavored to conform the ritual for these two great holidays to the spirit and principle of the first part of our Union Prayer-Book, to unite the soul-stirring reminiscences of the past with the urgent demands of the present, and to enhance the solemnity of the service by combining the two essential elements, the ancient time-honored formulas with modern prayers and meditations in the vernacular."

The declaration of the conference on the admission of proselytes, adopted at the New York meeting in 1892, is as follows:

"Resolved that the Central Conference of American Rabbis, assembled this day in this city of New York, considers it lawful and proper for any officiating rabbi, assisted by no less than two associates, and in the name and with the consent of his congregation, to accept into the sacred covenant of Israel, and declare fully affiliated with the congregation *כל דבר שבקרינה*, any honorable and intelligent person who desires such affiliation, without any initiatory rite, ceremony, or observance whatever; provided such person be sufficiently acquainted with the faith, doctrine, and religious usages of Israel; that nothing derogatory to such person's moral and mental character is suspected; that it is his or her free will and choice to embrace the cause of Judaism; and that he or she declare verbally, and in a document signed and sealed before such officiating rabbi and his associates, his or her intention and firm resolve—

"1. To worship the One Sole and Eternal God, and none besides Him.

"2. To be conscientiously governed in his or her doings and omissions in life by God's laws, ordained for the child and image of the Father and Maker of all, the sanctified son or daughter of the divine covenant.

"3. To adhere in life and death actively and faithfully to the sacred cause and mission of Israel, as marked out in Holy Writ."

The conference has published, in addition to the eleven year-books and the two volumes of the Union Prayer-Book, a Union Hymnal, and a volume entitled "Sermons by American Rabbis." One-half of the income from the sale of the Union Prayer-Book is placed to the credit of the fund for superannuated ministers; and a number of worthy rabbis, incapacitated from active service by age or physical infirmity, have been assisted by donations from this fund.

At present (1902) the conference has 149 active and four honorary members. Its constitution declares that "all active and retired rabbis of congregations, and professors of rabbinical seminaries, shall be eligible for membership." In March, 1900, it suffered the loss of its founder and president, Isaac M. Wise, in whose honor the meeting at Buffalo in July of that year largely assumed the character

of a memorial meeting. At this meeting Joseph Silverman of New York, who had been first vice-president, was elected president of the body.

Conventions of the Union of Orthodox Congregations of the United States and Canada: The great influx of Orthodox Jews—that is, of those who follow the rabbinical ordinances of Judaism besides the prescriptions of the Bible—within the last twenty-five years in America has made a union imperative.

The first real attempt to effect a union of Orthodox congregations was made on June 8, 1898, when a convention met in New York, in which fifty congregations were represented. H. Pereira Mendes was elected as president, and as vice-presidents Ph. Klein, Meldola de Sola, and H. W. Schneeberger.

The following principles were agreed to:

"This conference of delegates from Jewish congregations in the United States and the Dominion of Canada is convened to advance the interests of positive Biblical, rabbinical, and historical Judaism.

"We are assembled not as a synod, and therefore we have no legislative authority to amend religious questions, but as a representative body, which by organization and co-operation will endeavor to advance the interests of Judaism in America.

"We favor the convening of a Jewish synod specifically authorized by congregations to meet, to be composed of men who must be certified rabbis, and (a) elders in official position (cf. Num. xi. 16); (b) men of wisdom and understanding, and known among us (cf. Deut. i. 13); (c) able men, God-fearing men, men of truth, hating profit (cf. Ex. xviii. 21).

"We believe in the Divine revelation of the Bible, and we declare that the Prophets in no way discountenanced ceremonial duty, but only condemned the personal life of those who observed ceremonial law, but disregarded the moral. Ceremonial law is not optative; it is obligatory.

"We affirm our adherence to the acknowledged codes of our Rabbis and the thirteen principles of Maimonides.

"We believe that in our dispersion we are to be united with our brethren of alien faith in all that devolves upon men as citizens; but that religiously, in rites, ceremonies, ideals, and doctrines, we are separate, and must remain separate in accordance with the Divine declaration: 'I have separated you from the nations to be Mine' (Lev. xx. 26).

"And further, to prevent misunderstanding concerning Judaism, we reaffirm our belief in the coming of a personal Messiah, and we protest against the admission of proselytes into the fold of Judaism without 'milah' and 'tebilah.'

"We protest against intermarriage between Jew and Gentile; we protest against the idea that we are merely a religious sect, and maintain that we are a nation, though temporarily without a national home; and

"Furthermore, that the restoration to Zion is the legitimate aspiration of scattered Israel, in no way conflicting with our loyalty to the land in which we dwell or may dwell at any time.

It was determined that the object of the organization, to be known as the "Jewish Congregational

Union of America," should be the promotion of the religious interests of Orthodox Jews. Questions of Orthodoxy in connection with the admission of members should be decided by a sub-committee of five. H. Pereira Mendes was elected permanent president. The objects of local unions were stated to be:

"1. To strengthen congregational life, but not to interfere in congregational autonomy.

"2. To advance the interests of local Judaism by the appointment of committees on congregational membership; civil legislation; Jewish presentations; city religious work (mission, circuit preaching); to devise uniform methods in Hebrew and religious schools; a union to send out rabbis for propaganda under the direction of the executive committee.

The convention held in New York Dec. 30, 1900, under the presidency of H. P. Mendes, represented 104 congregations.

CONFESSION OF SIN (וִּידּוּי).—Biblical

Data: The Scriptures repeatedly prescribe confession of sin as a means to expiation and atonement. "It shall be that when he is guilty of any one of these things, he shall confess that he hath sinned in that thing" (Lev. v. 5). "Aaron shall . . . confess over him [the scapegoat] all the iniquities of the children of Israel, and all their transgressions in all their sins" (*ib.* xvi. 21). "When a man or woman shall commit any sin that men commit . . . they shall confess their sin which they have done" (Num. v. 6, 7).

The effect of confession is remission. Thus the Bible states, "And David said unto Nathan, I have sinned against the Lord. And Nathan said unto David, The Lord also hath put away thy sin; thou shalt not die" (II Sam. xii. 13). Elihu says, "God looketh upon men, and if any say, I have sinned, and perverted that which was right, and it profited me not [or, 'I have not been requited']:

Its Effect. He will deliver his soul from going to the pit, and his life shall see the light" (Job xxxiii. 27, 28); and Jeremiah declares, "The Lord said to me . . . go and proclaim these words toward the north, and say, Return, thou backsliding Israel, saith the Lord; and I will not cause mine anger to fall upon you: for I am merciful, saith the Lord, and I will not keep anger for ever. Only acknowledge thine iniquity that thou hast transgressed against the Lord thy God" (Jer. iii. 11-13). Elsewhere the prophet says, "Take with you words, and turn to the Lord: say unto him, Take away all iniquity, and receive us graciously. . . . I will heal their backslidings, I will love them freely" (Hos. xiv. 2 et seq.; see ATONEMENT).

Confession may be individual, that of a person repenting backslidings; or it may be national, when the public at large humble themselves before God. As examples of the former may be cited the confession of Cain (Gen. iv. 13), of Jacob (*ib.* xxxii. 9), and of David (II Sam. xxiv. 10; Ps. xli. 4, li. 3, lxix. 5); of the latter, that of the Israelites in the wilderness (Num. xiv. 40); in the dispersion (Lev. xxvi. 40); at Mizpah, when admonished by Samuel (I Sam. vii. 6); and again at Gilgal, after choosing their first king (*ib.* xii. 10). National confessions are sometimes made through national representatives, as by Moses, after the Israelites worshiped the golden calf (Ex.

xxxii. 31), by the high priest on Atonement Day (Lev. xvi. 21), by Ezra (ix. 6, 7, 15), and by Nehemiah (i. 6, 7; ix. 2, 33-35).

—**In Rabbinical Literature:** Here repentance is likened to a door which, if man opens only as much as the eye of a needle, God opens as wide as a gateway (Cant. R. to v. 2), for whoso is willing to cleanse himself is assisted from above (Shab. 104a; Yoma 38b); and confession may be said to be the opening wedge, or the hinge on which repentance turns. Accordingly the Rabbis teach that Samuel, interceding for Israel (ISam. vii. 5 *et seq.*), addressed to God the following argument in favor of his people's salvation: "Lord of the universe! Dost Thou ever require of man more than that he utter, 'I have sinned'? Now, the Israelites do plead, 'We have sinned' [*ib.* 6]: forgive them" (Midr. Sam. to vii. 6; Yer. Ta'an. ii. 65d). Elsewhere this doctrine is

sinneth, it shall die," rabbinical lore (with reference to Ps. xxv. 8 and Amos v. 4) teaches that God Himself says, "Let him repent and he shall be pardoned" (Yer. Mak. ii. 31d; Pesik. xxv. 158b; compare Soṭah 7b; Sanh. 43b).

No formal confession is prescribed in the Scriptures; time and circumstances suggested the penitent's thoughts or utterances (compare "Yad," Tefillah, i. 1; Kesef Mishneh *ad loc.*). Post-

Formula some formulas. Of these, that embodying the phrase "I have sinned, transgressed, and rebelled" **in the Talmud.** חטאתי ופשעתי, seems to be the oldest,

having formed part of the high priest's confession in the course of the Temple service on the Day of Atonement (Yoma iii. 8, iv. 2; Tosef., Yoma, ii. 1; Sifra, Aḥare, i. 2). It is based on similar expressions

JEWS CONFESSING THEIR SINS ON THE DAY BEFORE THE FEAST OF PENTECOST.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

presented in another form (Yalk., Ps. c. 1; Pesik. xxv. 159a). Citing the Scriptural verse (Prov. xxviii. 13), "He that covereth his sins shall not prosper; but whoso confesseth and forsaketh them shall have mercy," the Rabbis remark, when a man is charged of crime before a human tribunal, as long as he denies his guilt he has a chance for escape, but when he admits his guilt he receives punishment; not so before God: unless man confesses, he receives punishment, but when he confesses, he receives remission, provided he confesses with the determination to forsake his sins. According to another Midrash, even Balaam knew of the insuperable power of repentance and confession when he said (Num. xxii. 34), "I have sinned." He knew that nothing may avert heavenly visitation except repentance, and that over one who has sinned and then says, "I have sinned," the messenger of retribution has no power (Tan., Balak, 10). Hence, although Solomon declares, "Evil pursueth sinners" (Prov. xiii. 21); and Ezekiel (xviii. 4, 20) says, "The soul that

used in Biblical times (I Kings viii. 47; Ps. cvi. 6; Dan. ix. 5), and is considered the principal of all confessions (Sifra, *l.c.*; "Yad," Teshubah, i. 1; compare Pesik. R. 35, 160b). A rabbi of the fourth century recommends the following to be recited on the eve of the Day of Atonement: "I confess all the wrong I have done before Thee. I have indeed stood on the way of evil; but as I have done I shall do no more. May it please Thee, O Lord my God! to forgive all my errors, to remit all my offenses, and to pardon all my transgressions" (Lev. R. iii. 3; compare Yer. Yoma viii. 45c). A formula somewhat older, used by some daily, and by others only on the Day of Atonement, is the following: "My God! Before I was formed I was worthless, and now that I am formed I am as if not formed: I am dust while I live; how much more so shall I be when dead. Behold, I am before Thee as a vessel full of shame and disgrace. May it be Thy will, O Lord my God and God of my fathers! that I shall sin no more, and what I have sinned before Thee blot out

in Thy abundant mercy, but not through sufferings and serious diseases" (Ber. 17a; Yoma 87b).

The alphabetic confessions אֲשַׁמְנִי ("We have incurred guilt"; see ASHAMNU) and עַל הַטָּא שְׁחַטְאֵנוּ לְפָנֶיךָ ("For the sin which we have committed before Thee") are first mentioned in the literary productions of geonim of the eighth century, the former by Simon Kahira ("Halakot Gedolot,"

Later Formulas. Kippurim," missing in ed. Warsaw, 1874), the latter by Aḥai of Shabḥa ("She'iltot," clxvii.). The Talmud, however, explicitly says (Yoma 87b), "When one utters the simple expression, 'Verily we have sinned,' he need say no more"; and this is also the opinion of the casuists ("Hal. Gedol." l.c.; "Yad," Teshubah, ii. 8; Tur Oraḥ Ḥayyim, 607). One nearing death, or even when first taken ill, should be exhorted to make confession (Shab. 32a; Sanh. vi. 2, 43a *et seq.*), as were all those about to be executed for crime (see ATONEMENT; CAPITAL PUNISHMENT). If one is unable himself to frame a confession, he is prompted to say, "May my death prove an atonement for all my sins" (Sanh. l.c.).

S. M.

—**In Hellenistic Literature and in the Liturgy:** Ever since the return from the Exile (see Ezra ix.; Dan. ix. 4-20), confession of sins has formed an integral part of prayer, and verses selected from such passages as the penitential Psalms, xxxii., li., lxxxvi., were used in the liturgy. An example of elaborate confession of sins, composed in the second century B.C., is presented in the Apocrypha under the name of "The Prayer of Manasseh," and in all probability it formed originally a part of a Midrashic addition to II Chron. xxxiii. 19 (as may be learned from Apostolical Constitutions, ii. 22; see DIDASCALIA). A characteristic feature of this confession is the reiteration of certain formulas: "I have sinned, O Lord; I have sinned"; "Forgive me, O Lord, forgive me." Another example of a confession of sin is contained in the prayer of Asenath, xii. (see JEW. ENCYC. ii. 173):

"I take refuge with Thee, Lord, my God, from now; to Thee I cry, O Lord, and before Thee I confess my sins. Spare me, O Lord, spare me! for I have greatly sinned; I have transgressed and done evil. I have spoken harsh words before Thee that should not be spoken. . . . I have sinned before Thee, O Lord; I have sinned, knowingly and unknowingly."

With these words Asenath begins her prayer while repenting of her idolatrous life, thus offering to proselytes an example of due preparation for admission into the Jewish fold. Confession of sins preceded baptism (Mark i. 5; compare Soṭah 12b) and was made the condition of admission into the Christian Church, as may be learned from Didache iv. 14, xiv. 1 (compare James v. 16).

The common formulas for confession of sins in the Christian Church being in the main exactly like those of the Synagogue, the conclusion is to be

drawn that they go back to pre-Talmudic times. The words "Forgive, remit, pardon, O God, our offenses, voluntary and involuntary, committed knowingly or in ignorance, by transgression or through omission," in the closing prayer of propitiation in the liturgy of James (Hammond, "Eastern and Western Liturgies," p. 54), as well as the formula still found in the common prayer of the Episcopal Church: "We have left undone those things which we ought to have done; and we have done those things which we ought not to have done," are nearly identical with the closing words of the Atonement-Day confession: "O God of forgiveness, forgive us, pardon us, grant us remission . . . for the violation of mandatory and for the violation of prohibitive precepts, for sins known or unknown to us."

In the time of Rab and Samuel in Babylonia and R. Johanan in Palestine the confessions of sin in the Day of Atonement liturgy was fixed by tradition, as is proved by the fact that these amoraim of the beginning of the third century refer to the liturgical portions containing these confessions as familiar and known by their initial words (Yoma 87b). The quotation of the confession of sins in Pesik. R. (ed. Friedmann, xxxv. 160b; see note) also shows that the whole portion of the "Widdui" was known and familiar to all, and was included in the Talmudical reference in Yoma, אָבֵל אֲנַחְנוּ הַטָּאֵנוּ. See LITURGY.

The alphabetical enumeration of sins in ASHAMNU and אֵלֶּיָּהֶּת may also be traced to pre-Talmudic times, as the catalogue of sins in Rom. i. 29, with its number of twenty-two, seems to be based upon an alphabetical confession of sins used in Paul's time (see J. Rendel Harris, "The Teaching of the Apostles," Baltimore, 1887, who refers to Shab. 55a: "They that observe the Law from Aleph to Taw").

The confession of sins is recited during bathing in preparation for the Day of Atonement, by the bridegroom before his wedding, and by the sick who prepares for the approaching end. For a still larger catalogue of sins, see "Kizzur Shene Luḥot ha-Berit, Seder Widdui," pp. 126b, 127, Amsterdam, 1683.

K.

CONFIRMATION, THE RITE OF: Solemn form of initiation of the Jewish youth into their ancestral faith. The rite is mentioned officially for the first time in an ordinance issued by the Jewish consistory of the kingdom of Westphalia at Cassel in 1810. There it was made the duty of the rabbi "to prepare the young for confirmation, and personally to conduct the ceremony."

Earliest Confirmation. At first only boys were confirmed, on the Sabbath of their BAR MIZWAH, and the ceremony was performed at the home or in the schoolroom. In Berlin girls were confirmed for the first time in 1817, in Hamburg in 1818. The rite was at first rigidly excluded from the synagogue, because, like every innovation, it met with violent opposition. Gradually, however, it found more favor; classes were confirmed together, and confirmation became a solemn and impressive celebration at the synagogue. In 1822 the first class of boys and girls was confirmed by Dr. Kley at the Hamburg Temple, and in 1831 Rabbi Samuel Egers, one of the most prominent rabbis of his time

and a man of unquestioned orthodoxy, began to confirm boys and girls regularly at the synagogue of Brunswick.

While in the beginning some Sabbath, frequently Sabbath Hanukkah or Passover, was selected for confirmation, it became more and more customary, following the example of Egers, to perform the ceremony at the synagogue on Shebu'ot, because this festival is peculiarly adapted for the rite. As it celebrated the occasion when the Israelites on Sinai, of their own free will, declared their intention to accept the obligation of God's Law, so those of every new generation should follow the ancient example and declare their willingness to be faithful to the religion transmitted by the Fathers.

Confirmation was introduced in Denmark as early as 1817, in Hamburg 1818, and in Hessen and Saxony in 1835. The Prussian government, which showed itself hostile to the Reform movement, prohibited it as late as 1836, as did Bavaria as late as 1838. It soon made its way, however, into all progressive congregations of Germany. In 1841 it was introduced in France, first in Bordeaux and Marseilles, then in Strasburg and Paris, under the name "initiation religieuse." The first Israelitish synod in 1869 at Leipsic adopted a report by Dr. Herxheimer on religious education, the thirteenth section of which contains an elaborate opinion on confirmation, recommending the same to all Jewish congregations.

In America the annual confirmation of boys and girls was first resolved upon by the congregation of Temple Emanu-El of New York on Oct. 11, 1847; and the first confirmation at that temple took place on Shebu'ot, 1848. A confirmation had been held two years before at the Anshe Chesed Synagogue of New York. The ceremony has since gained so firm a foothold in America that there is now no progressive Jewish congregation in which the annual confirmation on Shebu'ot is not a regular feature of congregational life and one of the most inspiring ceremonies of the whole year.

Grätz ("Gesch." xi. 374) blames Israel Jacobsohn for having introduced, among many other synagogue reforms, the confirmation of boys and girls, which, he says, "has no root in Judaism."

Objections to the Rite. In the opinion of reform Jews confirmation, like the organ and other innovations traceable to non-Jewish associations, lends an impressiveness to the initiation of the young into their ancestral religion which the bar mizwah institution had lost, owing to the unfamiliarity of the children with Hebrew. Besides, there was no provision for a solemn consecration of the Jewish maiden to her religious duties. Confirmation was the first step toward the official recognition of woman as a member of the Synagogue. While many Orthodox leaders object to confirmation on the ground that it has been borrowed from the Protestant Church, where also it is but a recent development and not at all characteristically or typically Christian (see "Confirmation," in Herzog-Hauck, "Real-Encyc."), or because it contradicts the principle that the Israelite is pledged by the covenant of Sinai by his birth (מִשְׁבַּע וְעוֹמֵד מִהַר סִינַי Shebu. 22b), there is nothing in the rite which is not thoroughly in harmony with the

spirit of Judaism. It does not mean initiation into the faith, or admission into the Jewish community, but is a solemn declaration of the candidates, after having been sufficiently

In Harmony with Judaism. instructed in their duties as Jews, and being imbued with enthusiasm for their religion, to be resolved to live as Jews and Jewesses. For this purpose, after their religious sentiment has been

awakened and strengthened, and their minds have been prepared for their becoming faithful members of the Jewish congregation, of society, and of the state, confirmation comes as the solemn graduation from the school of religious and ethical instruction, and is intended to consecrate the young to their duties as Jews. It appeals not only to those confirmed, but to the entire congregation, and thereby becomes for all a renewal of the Sinai covenant. In order to produce this lasting effect it is becoming customary to delay the rite until the sixteenth or seventeenth year.

With the freedom and self-government universally prevailing in Jewish congregations, it is natural that the confirmation services should differ according to the subjective views and to the tastes of the rabbis. Thus some introduce a formal confession of faith, while others prefer a statement of principles. But the essential features are everywhere about the same, and may be stated as follows: The act is preceded by a public examination in the history, doctrines, and duties of the Jewish religion, held

Essential Features. either in connection with the celebration or on some day during the preceding week. The sermon preached at the exercises refers to the importance of the epoch which the young people have reached, and closes with an impressive address to them. Thereupon follows a prayer, either a profession of faith or a statement of principles by members of the class, and in conclusion is invoked the blessing of the candidates by the rabbi. The rite is accompanied by impressive music.

M. LAN.—K.

CONFISCATION AND FORFEITURE.—

1. Confiscation: Appropriation of private property to the public use or treasury. Confiscation of the property of peaceable aliens in Palestine who belonged to a nation at war with Israel, is not mentioned in either Biblical or rabbinical literature. Biblical history, on the contrary, records instances where such people as chose to remain in Israel's midst were left unmolested in possession of their estates, paying only the usual tribute to the country (Josh. xvii. 13; Judges i. 28 *et seq.*). Nor is confiscation, in the sense of appropriation to the use of the state as a judicial punishment for the violation of law, known in the history of Israel's first commonwealth. The case of Ahab and Naboth (I Kings xxi.; see АНАВ), which some cite in support of the contrary view (Michaelis, "Mosaisches Recht," i. 261; Mayer, "Rechte der Israeliten," i. 218, iii. 132).

is not considered as a criterion in rabbinical law. Tradition asserts that Ahab was his victim's cousin, the son of the brother of Naboth's father; and in the absence of nearer agnates, he was Naboth's legal heir (Tosef., Sanh. iv. 6; Sanh. 48b). Such confiscation came into vogue in the early days of the second commonwealth, and was an importation from Persia. In the rescript which Artaxerxes gave to Ezra (Ezra vii. 12-26), and the authenticity of which is proved by E. Meyer ("Die Entstehung des Judenthums," pp. 60 *et seq.*), "confiscation of goods" is decreed as one of the punishments of those who failed to "do the law of . . . God and the law of the king." This decree was adopted by Ezra; and in a proclamation subsequently issued by him he threatened, "Whosoever would not come within three days, according to the counsel of the princes and the elders, all his substance should be forfeited" (Ezra x. 8).

There is, however, a controversy in the Talmud as to the right of confiscation of the property of executed criminals, and the decision is a compromise: "The property of criminals executed by order of the king [for treason] lapses to the king; but the property of those executed by a verdict of a regular court [for other crimes] descends to their legal heirs" (Tosef., *l.c.*; Sanh. *l.c.*; Maimonides, "Yad," Ebel, i. 9; see CAPITAL PUNISHMENT). Private property may be seized for the personal needs and conveniences of the king, or for the advancement of public safety; but for all such property the state must remunerate the owner (Sifre, Deut. 161; Sanh. i. 4; B. K. 60b; "Yad," Melakim, iv. 3 *et seq.*). This royal prerogative was greatly abused by some kings, particularly in fulfilling literally Samuel's prediction (I Sam. viii. 14): "He will take your fields, and your vineyards, and your olive-yards, even the best of them, and give them to his servants" (compare *ib.* xxii. 7; Ezek. xlv. 7, 8; xlv. 16-18), which probably suggested the comparatively late homiletic remark, "As soon as one is promoted to leadership in Israel he becomes rich" (Yoma 22b; Yalk., Sam. 119). Rabbinical law, therefore, restricts this right of confiscation to the actual needs of the king and his court and army (Sifre, Deut. 158 *et seq.*; Sanh. ii. 4; "Yad," *l.c.*).

2. Forfeiture: A penalty for misconduct, crime, or breach of duty. Pentateuchal and rabbinical laws prescribe specified amounts as forfeitures for certain crimes or misdemeanors (Ex. xxi. 32; B. K. 48a; Deut. xxii. 19; Ket. 46a; Deut. xxii. 29; Ket. 33a). These will be found detailed under DAMAGE, FINES AND FORFEITURE, or in the articles treating of the respective causes.

Among the purely rabbinical enactments, one prescribes the forfeiture of rights where, through them, injury may accrue to innocent parties. For example: Where a bond bears a date antecedent to the day of actual execution, its holder forfeits the right of levying on the debtor's property, if otherwise encumbered, even where that encumbrance dates posteriorly to the delivery of the bond (Sheb. x. 5; B. M. 72a; "Yad," Malveh, xxiii. 1; Hoshen Mishpat, 43, 7). Also, where the amount denominated in a bond includes usury, and it can not be ascertained how much of that amount is principal, the creditor forfeits the principal as well as the

usury (B. M. 72a; Yoreh De'ah, 161, 11; Hoshen Mishpat, 52, 1). A forfeiture of ten gold pieces ("zehubim") is also prescribed for depriving a person of the privilege of discharging a religious duty, when that person is fit and willing to discharge the duty himself (B. K. 91b; "Yad," Hovel, vii. 14; Hoshen Mishpat, 382, 1).

CONFISCATION OF HEBREW BOOKS:

The first known decree directed against Hebrew literature is one of the emperor Justinian (553) forbidding the Jews to use "what is called by them 'The Second Edition'" (*Secunda Editio*, *δευτέρα*). Apparently this term was used to designate the Midrashic, traditional interpretation of the Scriptures. To what extent the decree was enforced is not known. Entirely unauthorized and without definite purpose was the action of the Crusaders six centuries later, when, in their march through Germany, they confiscated all the Hebrew books they could find in the various cities, and left behind them piles of burning Talmuds and prayer-books to mark their path.

In the thirteenth century France was the center of a series of deliberate attacks directed against Hebrew books. The typical order of procedure in nearly all such movements was as follows: the bringing of charges against the Talmud by a converted Jew; the issuing by the pope of a decree for its confiscation; the carrying out of the decree by the Inquisition; a disputation of the charges, including a defense of the work by the rabbis; finally, the condemnation and public destruction of the Talmud by burning. Very often other books were confiscated along with the Talmud.

In 1232 Jewish scholars in France were divided into two hostile camps, consisting respectively of the followers and opponents of Moses ben Maimon's philosophy. Solomon ben Abraham

Con- of Montpellier was at the head of
fiscation in the latter—the Orthodox—party, and
France. looked upon his opponents as heretics.

In an evil moment he carried the quarrel outside the Jewish ranks, and invited the Dominican and Franciscan inquisitors, then busied with the enemies of the Catholic Church, to proceed against Jewish heretics also. In Provence his request met with an eager response; the papal cardinal-legate gave the command, and in Montpellier a house-to-house search was made for Maimonidean writings. All such as could be found were brought together, and in Dec., 1233, the first public official burning of Hebrew books took place.

This action on the part of Solomon ben Abraham led to results which he had not expected. The Inquisition did not long restrict its activity to the writings of Maimonides, and the Talmud itself soon became the object of attack. A little more than a month after the affair of Montpellier a public burning of Talmudic and other kindred works was held in Paris, at which 12,000 volumes were destroyed together. In 1239 the baptized Jew Nicholas (Donin) brought the charge against the Talmud that it insulted Christianity, and Pope Gregory IX. sent a general order on the subject to the temporal and ecclesiastical rulers in France, England, Castile, Aragon, and Portugal. He decreed that the Domin-

icans and Franciscans confiscate all copies of the Talmud, submit them to the heads of the two orders for examination, and, should the charges prove to be true, cause them to be destroyed (May, or June 1239). In Paris the decree met with a ready response from King Louis IX. and the Dominican Henry of Cologne. The Jews were forced, under threat of death, to surrender their books; and a commission was appointed to hear the defense of the rabbis. The Talmud was condemned to the flames; but a stay was secured and a second hearing accorded, in which R. Jehiel of Paris headed the defense. The Talmud was, however, again condemned (1240). Three years later the decree was carried out, under urging from the new pope, Innocent IV. A general confiscation took place throughout France, and on one day fourteen wagon-loads were brought into Paris. Later, six more wagon-loads were added, and all the books were publicly burned on June 17, 1244.

Similar confiscations took place in Rome about the

ordered: (1) of the Talmud in southern France, by Pope Alexander V., carried out by the inquisitor Pons Feugeyron, 1409; (2) of the Talmud and other "anti-Christian writings like the 'Marmar Yeshu,' " (Toledot Yeshu?) in Spain, by the anti-pope Benedict XIII., 1415 (never carried into effect, owing to the pope's deposition); (3) of all Hebrew books in Portugal, 1497.

One of the most important of anti-Talmud movements occurred in Germany at the opening of the sixteenth century. Two converts, the Dominicans Victor of Carben and Johann Pfefferkorn, brought the customary charges against the Talmud, whereupon King Maximilian in 1509 authorized the confiscation of Hebrew books throughout Germany, and the destruction of such as contained anything contrary to the teachings of the Bible or of Christianity. In Frankfort, Worms, Lorch, Bingen, Laufen, Mayence, and Deutz such confiscations were held; that in Frankfort taking place on Sept. 28, when all books found in the synagogue were seized. A house-to-house search was to have been made on the following day; but the archbishop Uriel of Gemmingen forbade this, and together with several other Christians who showed themselves friends to Jewish literature, succeeded in inducing the emperor to order the return of the books to their owners. Later, this order was revoked; 1,500 books and manuscripts were again seized in Frankfort (April 11, 1510). The question in general was then submitted to the scholars of Germany for decision, and men like Reuchlin gave their answer in favor of the Talmud and kindred works, though naturally against Lipman's anti-Christian writings and the "Toledot Yeshu" (History of the Birth of Jesus of Nazareth)—works condemned by the Jews themselves. The weight of opinion, including that of all the large universities except Heidelberg, was against the Talmud, however; and Reuchlin was charged with heresy. After further vacillation on the part of the authorities, Reuchlin's case was carried to Rome, and finally decided against him; but the Talmud question seems to have been dropped for a while.

The question was reopened in Italy in 1553 by Cardinal Caraffa, leader of the Italian Inquisition, and from this time on down to the nineteenth century the attacks on Hebrew books continued almost without interruption. The usual apostate charges preceded the confiscation orders issued by Pope Julius III. in 1553, and were eagerly carried out by the inquisitor-general. In Rome the "familiaris," dread servants of the Holy Office, forced their way into synagogues and homes, and returned

Action of the Inquisition. A defense was allowed the rabbis, a formality the uselessness of which history had already made evident. On an appointed day all the copies of the Talmud were carried to the Campo di Fiori, and once again, as the flames arose, Rome rang with mingled shouts of glee and cries of anguish (Sept., 1553). And not Rome alone; for the Inquisition's decree had reached all places where the Catholic Church was supreme. Barcelona obeyed first; then Venice, where the apostate Eleazar ben Raphael wished to include many other books in the condemnation, and a commission

Flames.
(From Jacob Emden's "Sefer Shimmush," 1762.)

same time; again in Paris, four years later, under the cardinal-legate Odo; in Barcelona and Tarragona under Pope Clement IV., the Archbishop of Tarragona, and the apostate Pablo Christiano of Montpellier, King James of Aragon, though he had at one time ordered the confiscation of Nahmanides' writings, showing himself now somewhat more lib-

erally inclined; in Paris under Philip the Fair, in 1299, and again in 1309, when three wagon-loads of books were burned; in Toulouse, under the inquisitor Bernard Gui, aided by officials of King Louis in 1319. Before this last burning the books were carried through the streets of the city, while royal officers proclaimed publicly that their condemnation was due to the insults to Christianity which they contained. In 1320 the Archbishop of Bourges received orders from Pope John XXII. to confiscate all copies of the Talmud in his city. Finally, in Rome during the Feast of Weeks, 1322, occurred a confiscation and a burning of the Talmud, accompanied by robbery and murder on the part of the mob.

In the fifteenth century three confiscations were

finally decided partially in his favor. On a Sabbath the sentence was carried out, and Judah Lerma has narrated that he alone lost 1,500 volumes. Romagna, Urbino, and Pesaro held burnings before the end of the year; and early in 1554 books were burned by hundreds of thousands in Ancona, Ferrara, Mantua, Padua, Candia (an island belonging to Venice), and Ravenna.

In the catalogue of prohibited books ("Index Librorum Prohibitorum") published in 1554 by order of the pope, in Milan and Venice, the "Talmuth" appeared in the list for the first time, and thereafter was prohibited by the indexes published in various parts of the Catholic world, with the modifications, on two occasions, mentioned in the article CENSORSHIP. In 1557 the baptized Jew Andrea del Monte directed another confiscation in Rome, sparing not even the prayer-books; and in the following year the inquisitor-general Cardinal Ghislieri ordered still another. In Milan the Spanish general Gonzalo Fernandez de Cordua, after resisting the Inquisition for some time, finally agreed that the Talmud should be burned, and ordered his Spanish soldiers to aid in the work. Other books were not spared, however, and between 10,000 and 12,000 volumes formed a pyre over which Sextus Sinensis presided in April or May, 1559. Other confiscations took place in Cremona and Lodi (July, 1566); Romagna and Bologna (1567); Vercelli, in Piedmont-Savoy (1592); Avignon and neighborhood (1593); Pavia and Lodi (1597); and Rome (1601). In Cremona and Lodi, however, the books were later returned by order of the Senate of Milan.

Meanwhile Prague had become the scene of violent anti-Talmud movements. As early as 1560 a confiscation, including even the prayer-books, had taken place under the Dominicans, but the emperor Ferdinand, when appealed to, had ordered the return of the books. Toward the end of the century the movement was carried on even more energetically by the Jesuits, and on Dec. 7, 1693, the Jesuit Father Wolfgang Preissler, charging that the Talmud and kindred works were dangerous to civil and religious authority, secured permission for a confiscation. A search through the Jewish

In the Jewish schoolhouse and the synagogues **Seven-** resulted in the discovery of more than **teenth and** 200 works. The movement then spread **Eighteenth** to other parts, and after the customary **Centuries.** charges against the Talmud, a confiscation took place in Friedeberg (Neumark), but King Frederick I. ordered the return of the books seized.

Fürth, in Bavaria, was the scene of the next confiscation. A certain Mordecai (Marx) ben Moses, who had embraced Christianity, assuming the name "Philip Ernst Christfels," brought charges of blasphemy against Jewish prayer-books (1702). In company with several others he visited some of the Jewish houses in Fürth, and seized eighteen books. Most of these were prayer-books of various editions, but among them were also the Yoreh De'ah and two commentaries to the Earlier Prophets (Abravanel's and the "Leb Aharon"). Christfels made a list of the so-called blasphemous words contained in these works, and this was used at the sittings (March

27-April 4, 1702) of an inquisition appointed by the margrave Georg Friedrich of Brandenburg-Onolzbach to examine into the charges. The head of the commission was Rudolf Martin Meelführer, who took during the trial a position in regard to Hebrew literature very similar to that which Reuchlin had taken; and the commission was discharged without having accomplished anything. A similar result followed in 1712, when the matter was reopened in connection with charges of blasphemy brought against a certain Elkan Fränkel. Meelführer, however, fell into disfavor this time at the court of Georg Friedrich's successor, Wilhelm Friedrich, and was charged with having had a secret understanding with Fränkel in bringing about the discharge of the former commission. About this same time another series of house-to-house searches was instituted in the city of Prague by a permanent Inquisition commission of Dominicans which had been established there. Certain books were found in the homes of forty-two families and were seized (1711). Still another search took place twelve years later under the Jesuit Franz Haselbauer.

During the next thirty years a series of confiscations occurred in Italy. The first took place in Ancona in 1728, though the books seized were afterward returned. In 1731 the Dominican Giovanni Antonio Costanzi directed searches in all the Jewish quarters throughout the Papal States; these searches were repeated in 1738, 1748, and finally in 1753, the last by order of Benedict XIV., who had learned that books were being smuggled into the ghettos in rolls of cloth and by means of other subterfuges. In Rome, on a night in April, after the ghetto gates had been closed, officials entered houses previously marked as suspicious. Outside, at stated distances on the streets, wagons and carts were stationed under escort. As the books were taken from each house they were placed in one of the sacks with which each searching party had been provided, the sack was sealed in the presence of two Christian witnesses, and a tag bearing the owner's name was attached. The books were then conveyed to an appointed official; and in this way thirty-eight carts were filled from the ghetto of Rome alone. Similar confiscations took place in Lugo (Ravenna), Pesaro, Ferrara, Urbino, Ancona, Sinigaglia; and the next year in Avignon, Carpentras, Cavaillon, and Lille.

Trouble arose next in Poland, consequent on the Frankist disturbances in 1757. The charge was made that as a result of Talmudical teachings Jews were accustomed to use the blood of Christian children in their ceremonies. All books except the Bible and the Zohar were confiscated, and about 1,000 copies were thrown into a ditch and burned. The search was then continued, and repeated in Lemberg, but after the leader of the Frankists had been convicted of intrigue and deception the whole movement was allowed to lapse in Poland; and though severe edicts were yet to be issued in Italy (1775 and 1793) the Napoleonic era brought to a general close the history of measures directed against Hebrew books.

CONFLICT OF LAWS: A disagreement between the laws of two states with reference to litigation affecting private rights claimed to be subject to their jurisdiction.

The Mosaic law recognizes no distinction between a native and a foreigner (Ex. xii. 49; Num. xv. 15, 16). In questions of ritual and religious practices the Talmudic principle enjoins obedience to local custom. One who comes from Palestine, where the second day of the holidays is not observed, to a land where it is observed, must follow the custom of the country wherein he has settled. If, however, his intention is to return to his former abode in a short time, he must follow the more rigorous observance of either place (Pes. 50a; Maimonides, "Yad," Shebitot Yomṭob, viii. 20; Shulḥan 'Aruk, Oraḥ Ḥayyim, 468, 3, 4, and 496, 3).

In criminal cases the Jewish law has practically abdicated its authority in favor of the law of the land. Forty years before the destruction of the Second Temple, the Sanhedrin in Jerusalem adjourned; and since then the Jewish courts have had no jurisdiction in cases involving capital punishment (Ab. Zarah 8b; Sanh. 41a, 52b; "Yad," Sanh. xiv. 11, 13). Nor are cases involving pecuniary penalties adjudicated upon by Jewish courts. Only such cases as occur frequently and involve actual loss to one of the parties may now be judged by Jewish courts; but in matters involving no actual loss, as the double payment for theft, or in matters that are not of frequent occurrence, as when one animal injures another, the rabbis of the present day can exercise no authority (B. K. 84b; Maimonides, *l.c.* v. 8 *et seq.*; Shulḥan 'Aruk, Hoshen Mishpat, 1 *et seq.*).

In civil cases the following rules were established by the Rabbis.

1. In suits between two Israelites the law of the place where the contract was made governs, or, if the place is not mentioned in the contract, the law of the place where the case is tried rules (B. M. 83a; Ket. 110b; "Yad," Ishut, xxiii. 12; Hoshen Mishpat, 42, 14, 15; Eben ha-'Ezer, 117, 19, Isserles' gloss).

2. In suits between non-Jews the law of the land or the Jewish law—to whichever the parties submit themselves—governs ("Yad," Melakim, x. 12).

3. In matters between a Jew and a non-Jew the suit is decided according to the law of the land or according to the Jewish law, that system being chosen which favors the Jew. In each case, however, the non-Jew should be informed by what system he was judged (B. K. 113a; Maimonides, *ib.*). If the non-Jew observes the general laws of morality and religion ("ger toshab," Lev. xxv. 35, and elsewhere), the law of the land must govern (Maimonides, *ib.*). A non-Jew who sells a promissory note to a Jew can not afterward absolve the debtor, although the Jewish law permits it; for the law of

the land governs. If a Jew sells a promissory note to a non-Jew, it is as if he sold it to a Jew; and the Jewish law holds sway (Hoshen Mishpat, lxvi. 25). See ASSIGNMENT.

4. Documents of purchase and sale, or promissory notes, prepared in non-Jewish courts and signed by non-Jews, are valid. Documents of gift or of the admission of a debt, where actual delivery of money did not accompany the act, are not valid (Git. 10b; "Yad," Malveh, xxvii. 1; Hoshen Mishpat, 68, 1).

Where there is a decree of the government ordering the record of all negotiations, all documents prepared in non-Jewish courts are valid (Hoshen Mishpat, *l.c.*, Isserles' gloss).

5. It is forbidden by Jewish law to litigate a suit between two Israelites before a non-Jewish court, even when both parties desire it (Git. 88b; "Yad," Sanh. xxvi. 7; Hoshen Mishpat, xxvi. 1). If one of the parties refuses to appear before a Jewish court, the other must first summon him through the Jewish court; and if he does not heed the summons, permission will be granted to him to sue the defendant before a non-Jewish court (Maimonides *ib.*; Hoshen Mishpat, *ib.*).

6. Referring to the Persian law, the amora Samuel said: *דינא דמלכותא דינא* ("the law of the land is the law," Git. 10b; B. K. 113a). This dictum is particularly applied to cases between Jews and non-Jews. Although according to the Jewish law three years' uninterrupted possession of real estate ("Ḥazakah") establishes one's right to land, in Persia, where forty years of uninterrupted possession was necessary, the same law held good also for the Jews of that land (B. B. 55a; see Rashbam's commentary). This principle has been accepted as valid by all well-regulated governments in cases of taxes or of other regulations made for the welfare of the community ("Yad," Gezeleh we-Abedah, v. 11-18; Hoshen Mishpat, 369, 6-11). Where, however, the case does not affect the community, and the government derives no special benefit from it—where the law of the land is that the husband does not inherit from his wife—the Jewish law predominates; and the wife's relatives have no claim on her property, if she dies during the life of her husband (Hoshen Mishpat, *l.c.*, Isserles' gloss; see "Pitḥe Teshubah" *ad loc.* § 3, and to 248, § 2; "Hatham Sofer, Hoshen Mishpat," 172). Of course, this could be the case only in those countries where Jewish autonomy is recognized in cases of inheritance. It is not the case in England, America, or western European states, for example.

The tendency of the Talmud and of the later codes is generally toward submission to the law of the land in all civil cases, when such law is humane and the Jews are allowed an equal hearing in the courts with non-Jews. The fact that now the Jewish court has almost entirely lost its power, and the Rabbis, even those of the most Orthodox wing, raise no objection against those who resort to non-Jewish courts, upon whom Maimonides and his followers have pronounced the ban of excommunication (see Midr. Tan., Mishpatim, 10; "Yad," Sanh. xxvi. 7), proves that this is the tendency in the progress of the Jewish law. In civil cases, therefore, the law

of the land, even when in conflict with the Jewish law, is now tacitly recognized by all as binding.

The question was frequently raised whether marriage and divorce are religious acts, and must, therefore, be in accordance with Jewish law and custom; or whether they may also be included under civil laws generally and be governed by the laws of the state; or whether they are partly religious and partly civil in their character. This question was discussed in periodicals and in books and at the different conferences of rabbis held during the nineteenth century; but no uniform law has as yet been established in regard to it.

The Assembly of Notables, convened by Napoleon I. in 1806 in Paris, among other matters brought before it, had to answer the question as to the relation between the civil and the Jewish

Marriage Laws. law in matters pertaining to marriage and divorce. The following resolutions were adopted, and were later (1807) confirmed by the Sanhedrin, two-thirds of which consisted of rabbis and one-third of laymen: "That intermarriages between Jews and Christians were to be considered binding, and, although they were not attended by any religious forms, yet no religious interdict could be passed upon them; . . . that divorce by the Jewish law was effective only when preceded by that of the civil authorities; that marriage likewise must be considered a civil contract first" (Graetz, "Hist. of the Jews," American ed., v. 497).

The rabbinical conference held in Brunswick, Germany, in 1844, resolved "that the intermarriage of Jews and Christians, and, in general, the intermarriage of Jews with adherents of any of the monotheistic religions, is not forbidden, provided that the parents are permitted by the law of the state to bring up in the Jewish faith the offspring of such marriage." This resolution entirely abandons the Talmudic standpoint; and when it was brought up for ratification before the second rabbinical convention at Augsburg, even Aub and Geiger, the most pronounced advocates of Reform present at that convention, agreed to have it tabled.

The second Israelitish synod, held at Augsburg in 1871, passed the following resolution concerning civil marriages: "Civil marriage has, according to the view of Judaism, perfect validity or sanction; provided that the Mosaic law of prohibited degrees (*e.g.*, marriage between aunt and nephew) is not violated. The religious solemnization, however, is required as a consecration befitting the dignity of marriage."

The question of the dissolution of marriage by the death of the husband, which has been dealt with so minutely by the Rabbis (see 'AGUNAH), especially where evidence was necessary to establish the identity of the deceased, has also been acted upon by modern conferences. The rabbinical conference held at Philadelphia in 1869 and the Augsburg synod of 1871 passed resolutions to the effect that "the final decision of the courts concerning the identity of a dead person, and a judicial decision declaring a lost person to be dead, have also sanction for ritual cases."

In cases of divorce the question assumes a still

more serious aspect; and the discussions for the last century on this subject have grown very bitter. Although the Jewish authorities readily submitted to the non-Jewish courts questions affect-

Divorce Laws. ing civil rights and contracts, they refused to recognize their authority in matters of divorce (Git. 88b). In the seventh century of the common era, when Jewish women sought to obtain bills of divorce from their husbands in the Mohammedan courts, the geonim Hunai and Mar-Raba introduced many reforms into the Jewish laws of divorce so as to prevent such action on the part of the Jews by making these appeals unnecessary (Graetz, *l.c.* iii. 92).

In more modern times, when the autonomy of the Jewish courts was entirely abolished in most of the European countries, the question assumed greater importance, and was discussed more minutely by rabbis. In most civilized countries—even where the rabbis have the right to perform marriage ceremonies, and the state would recognize their act as valid—they have no authority to enforce a dissolution of marriage when it is required by Jewish law, or to conduct the ceremony of a ritual GET or BILL OF DIVORCE, so long as the marriage has not been duly dissolved by the competent courts of the country. The tendency, therefore, of the modern Reform rabbis is to look upon divorce as a civil act, and thus to submit entirely to the laws of the country; the ritual get is thus considered superfluous. While the German rabbis, in their various conventions, did not pass any definite resolutions concerning this matter, the American rabbis in the Philadelphia conference of 1869 passed the following resolution:

"The dissolution of marriage is, on Mosaic and rabbinical grounds, a civil act only, which never received religious consecration. It is to be recognized, therefore, as an act emanating altogether from the judicial authorities of the state. The so-called ritual get is in all cases declared null and void. The dissolution of marriage, pronounced by a civil court, is also fully valid in the eyes of Judaism, if it can be ascertained from the judicial documents that both parties consented to the divorce. Where, however, the court issues a decree against one or the other party, by constraint, Judaism recognizes the validity of the divorce only when the cause assigned is sufficient in conformity with the spirit of the Jewish religion. It is recommended, however, that the officiating rabbi, in rendering a decision, obtain the concurrence of competent colleagues."

By this resolution the Jewish law of divorce is entirely abrogated, and the law of the land takes precedence.

The great majority of Jews, however, have not accepted these regulations, and still cling to the enactments of the Shulhan 'Aruk. In cases of marriage and divorce, they still endeavor to maintain the autonomy of the Jewish law; and no conservative rabbi will sanction the second marriage of a woman who has obtained her divorce through a non-Jewish court, unless she has also obtained a ritual get. In order not to come into conflict with the civil authorities of the state, many rabbis are careful not to grant a get unless the courts of the land have previously sanctioned a dissolution of the marriage.

CONFLICT OF OPINION (Hebrew, **Mahloket**; Aramaic, **Pelugta**): Rarely did an opinion expressed by one of the rabbis of the Talmud pass unchallenged. In questions involving logical reasoning, or the interpretation of some Biblical passage, or an opinion of an earlier authority, there were conflicts of opinion among the teachers of the Talmud. The conflicting opinions were usually represented by different schools; for example, those of Shammai and Hillel, Rab and Samuel, Abaye and Raba. In fact, most of the rabbis of the Talmud, from the earliest tannaim to the latest amoraim, can be grouped into antagonistic couples, one in opposition to the other.

Just as a tanna could not express an opinion which was in conflict with a Biblical passage, so an amora could not contradict a Mishnah or a generally accepted Baraita, unless he was able to produce another Mishnah or Baraita to support his view. Nor could an amora express an opinion which was in conflict with an accepted decision or principle expressed by an earlier leading amora (Bezah 9a, and Rashi *ad loc.*). Otherwise, every rabbi had a right to his opinion, even though it conflicted with the opinion of the greatest of his contemporaries (B. K. 43b).

Scattered throughout the Talmud there are various rules by which the Rabbis were guided in deciding cases of conflicting opinions. When the opinion of an individual conflicted with that of the majority, the opinion of the majority prevailed (Ber. 9a *et al.*). If one Mishnah records a conflict of opinion between two tannaim, and a subsequent Mishnah in the same book records the opinion of only one without mentioning any name (Setam), the opinion expressed in the latter Mishnah is to be followed (Yeb. 42b). In laws concerning mourning, the more lenient opinion is usually observed (M. K. 18a). With a few exceptions, an opinion expressed by the school of Hillel prevails against an opinion by the school of Shammai ('Er. 13b). Because Eliezer ben Hyrcanus was under the ban (B. M. 59b; Shab. 130b), decisions were not, except in a few instances, rendered in accordance with his opinions. Decisions are always in accordance with the opinions of Simeon ben Gamaliel, except in three cases (Git. 38a), and of Rabbi (Judah the Patriarch), when in conflict with any other tanna. In questions involving logical reasoning, the decision is never rendered in accordance with the opinion of R. Meïr when in conflict with the opinions of his colleagues, because his reasoning was too subtle ('Er. 13b; compare Ket. 57a).

Rules of Decision. In conflicts of opinion between amoraim the following rules were employed. In matters of civil law the opinion of Rab prevails against the opinion of Samuel; in religious laws the reverse is the case (Bek. 49b). The same rule applies to conflicts of opinion between Rab Nahman and Rab Sheshet. With the exception of six cases, decisions are always in accordance with the opinion of Raba when

in conflict with Abaye (B. M. 22b). The opinion of Rabbah generally prevails against that of Rab Judah or Rab Joseph (Git. 74b). In rabbinical institutions the more lenient opinion is followed (Yer. Git. i. 2). In a conflict between earlier and later authorities (those coming after the period of Abaye and Raba) the opinion of the later takes precedence (see Asheri to Sanh. iv. 6; compare B. B. 142b).

These rules were followed by the various codifiers of the Jewish law. Although the law is now fixed in the codes of Maimonides and Caro, many of these rules have still their application, especially the one last mentioned, for it is considered that the later rabbis, who knew of the opinions advanced by their predecessors, were in a better position to decide correctly (compare **AḤARONIM**; **AMORA**; **AUTHORITY**; **LAWS**, **CODIFICATION OF**).

J. H. G.

CONFLICT OF PASSAGES. See **HERMENEUTICS**.

CONFORTE or **CONFORTI, DAVID**: Hebrew literary historian; born in Salonica about 1618; died about 1685. Conforte came of a family of scholars. His early instructors were R. Israel Ze'evi, R. Judah Girasi, and R. Baruch Angel. As a young man he studied the Cabala under R. Jefeth the Egyptian, and philosophy under R. Levi Pasriel. His chief teachers, however, were Mordecai Kalai and Daniel Estroza. Conforte married a granddaughter of Menahem de Lonsano. He journeyed twice to Palestine, once in 1644, alone, and a second time in 1652, when, together with his family, he settled in Jerusalem, founding there a bet ha-midrash. In 1671, however, he was in Egypt, where he occupied the position of dayyan. He is also known to have been in Smyrna.

His chief work is a literary chronicle now known by the title "*Kore ha-Dorot*," which contains the names of all the teachers and writers from the close of the Talmud up to his own day. This chronicle is divided into three parts, the first two of which, referring to the time before the expulsion of the Jews from Spain in 1492, are very short. The third part is divided into eleven generations, and is not systematically arranged. Conforte used all the earlier historical works, such as Abraham ibn Daud's "*Sefer ha-Kabbalah*," Zacuto's "*Yufasin*," and Yahyah's "*Shalshelet ha-Kabbalah*," especially the first mentioned, from which he cites whole passages. He also gathered material from various printed and manuscript responsa, and was the first to collect the names mentioned in these works. His chronicle is valuable for the literary history of the Jews in the sixteenth and seventeenth centuries, especially in Turkey, Italy, Africa, and the near East. Probably it was composed in Egypt, about the year 1683, if Cassel's conjecture be correct. Conforte was a mere compiler, and at times his data are contradictory. The original manuscript was brought from Egypt by R. David Ashkenazi of Jerusalem, who, to judge from a note in his preface, gave it the title "*Kore ha-Dorot*," and had it printed in Venice in

1746, without mentioning the name of the author. This poor edition has been critically recited, and supplied with notes and index, by David Cassel (Berlin, 1846), who follows the pagination of the first edition. Conforte also wrote a volume of responsa, of the fate of which, however, nothing is known.

Gabriel Confoto, a Turkish Talmudist who is mentioned in the responsa literature of the seventeenth century, was probably a son of David Conforte.

G.

CONGREGATION: 1. An assembly convoked for a certain time and purpose (קהל = ἐκκλησία, I Kings viii. 65; Joel ii. 16; Ps. xl. 10. For מקהלים and מקהלות in Ps. xxvi. 12, lxviii. 26, "assemblies" would be more correct than "congregations" [A. V.]; and מועדיך in Ps. lxxiv. 4 should be rendered "synagogues," not "congregations," as in A. V.).

2. A single community (עדה = συναγωγή, Num. xxxv. 23 *et seq.*).

3. The whole body of Israel, called יי קהל ("the congregation of the Lord," Deut. xxiii. 1 *et seq.*; R. V. "assembly" is incorrect); יי עדה, Num. xxvii. 17; עדה ישראל = "the congregation of Israel," Ex. xii. 3; עדה בני ישראל = "the congregation of the children of Israel," Ex. xvi. 1; קהל עדה ישראל = "the assembly of the congregation of Israel," Ex. xii. 6 and Num. xiv. 5; or simply הקהל and העדה used indifferently, Lev. iv. 13 *et seq.*; Prov. v. 14, where עדה is preferably translated by LXX. συναγωγή, and קהל, ἐκκλησία. To this must be added קהלת יעקב = "the congregation of Jacob," Deut. xxxiii. 4 (R. V. "assembly"; LXX. συναγωγὰς, plural; so also Ecclus. [Sirach] xxiv. 23).

From the Apocryphal and other Hellenistic writings (see Ecclus. xxiv. 2, xlv. 15, i. 12 *et seq.*; I Macc. ii. 56, iii. 13, etc.), and the inscriptions in Schürer ("Gesch. des Jüdischen Volkes," ii. 432 *et seq.*, iii. 40-46), it appears that "synagogue" = συναγωγή was the name, corresponding to בִּנְיָן, Aramean כְּנִישָׁא, given to the Jewish congregation as a community, as well as to the place of worship; while the name ἐκκλησία (τοῦ Θεοῦ, or Κυρίου = "assembly of the Lord"; hence κυριακή [oikia] = "church") was chosen to designate the assembly of worshipers.

It was owing to the influence of Paul that ἐκκλησία (= "church") became the distinctive name of the Christian communities, while "synagogue" became that of the Jewish congregation, and for some time, also, of the Judæo-Christian congregations (compare Schürer, *l.c.*). See COMMUNITY, ORGANIZATION OF; MINYAN; SYNAGOGUE.

K.

CONGRESS OF JEWISH WOMEN: One of the denominational congresses of the World's Parliament of Religions, held at the Columbian Exposition in Chicago, Ill., 1893. It was the first delegate body of Jewish women ever called together. There were present 93 delegates from 29 cities of the United States. The congress was organized by (Mrs. Henry) Hannah G. Solomon, chairman, as-

sisted by Miss Sadie American, secretary, and a committee of 25 other Chicago women. Its sessions were held Sept. 4-7, inclusive. Papers were presented setting forth the work and thought of Jewish women in philanthropy and religion. At the final session a resolution was adopted calling for the formation of a permanent organization of Jewish women, to be called the "National Council of Jewish Women" (see COUNCIL OF JEWISH WOMEN). As a souvenir of the congress, there was issued a "Collection of Traditional Jewish Melodies," arranged and edited by the cantors William Sparger of New York and Alois Kaiser of Baltimore, with an introduction by Dr. Cyrus Adler of the United States National Museum, Washington.

S. A.

CONIGLIANI, CARLO: Italian jurist and political economist; born at Modena June 25, 1868; died there Dec. 6, 1901. After studying law at Modena, receiving the degree of doctor of laws in 1889, he was sent by the government to Padua and London for further study. On his return to Modena he became lecturer at the university, being made instructor in finance in 1892. In 1898 he was appointed assistant professor on the faculty of law. He died suddenly on the same day on which he had been named for the full professorship. Conigliani was an earnest student of economics, being attracted especially to the problem of the effect of duties and taxes on the masses. When Minister WOLLEMBORG was planning in 1901 a thorough reform of taxation, with the object of relieving the poorer classes, he called Conigliani into the ministry of finance as scientific adviser, to help him in elaborating his measures. Conigliani was also interested in Jewish communal affairs, and was for a long time a member of the governing board of the Jewish community of Modena.

During the last years of his short life he was the enthusiastic leader of the Zionists in Italy. He founded in 1901 "L'Idea Sionista" for the expression of their views, and acted as its editor until his death.

His works include: "Teoria degli Effetti Economici delle Imposte," Milan, 1890; "Un Nuovo Sistema di Tariffe Ferroviarie," Florence, 1890; "Le Basi Subbiettive dello Scambio," Padua, 1890; "Le Dottrine Monetarie in Francia nel Medio Evo" Modena, 1892; "I Pronostici del Futuro Sociale" and "Per l'Imposta Progressiva," Turin, 1896; "La Riforma delle Leggi sui Tributi Locali, Studi e Proposte," Modena, 1898; "Ueber das Hausiergewerbe in Italien" (with Ugo Rabbeno); "Gladstone e la Finanza Inglese," Turin, 1898; and many shorter articles contributed to "Riforma Sociale," "Critica Sociale," "Rivista Popolare," and "Giornale degli Economisti."

CONITZ. See KONITZ.

CONJUNCTIVE. See ACCENTS IN HEBREW.

CONNECTICUT: One of the six New England States, and one of the thirteen original states of the

Union. The first mention of a Jew in Connecticut is apparently that of a certain "David the Jew" in the Colonial Records, under date of Nov. 9, 1659 (i. 343); the records further show that a Jacob Lucena was fined £20 in 1670, probably for Sabbath-breaking, since the court, "considering he was a Jew," reduced his fine to £10, and later, upon petition of Asser Levy, to £5 (Hühner, in "Pub. Am. Jew. Hist. Soc." No. 8, pp. 21 *et seq.*).

In a short history of the New Haven congregation, deposited in the corner-stone of the new temple, and published in the local press of March, 1896, it is stated that about six Jewish families settled in New Haven as early as 1770. According to the recently (1901) published diary of Ezra Stiles, this statement is inaccurate. Stiles was born in New Haven in 1727, continuing his residence there till his removal to Newport in 1755. In an account of his visit to New Haven in 1772 he makes this assertion: "The summer past a family of Jews settled here, the first real Jews (except the two brothers Pintos, who renounced Judaism and all religion) that settled in New Haven." He adds that they were "10 or 8 Souls Jews, with six or 8 Negroes. Last Saturday they kept holy . . . the Family were worshipping by themselves in a Room in which were Lights and a suspended Lamp. This is the first Jewish Worship in New Haven" ("Diary of Ezra Stiles," i. 283). It is quite probable that of the Jews who came to Connecticut up to the year 1840 the greater number left the state, the others amalgamating with the families of other faiths. There are a few Christian families of Connecticut—notably those of an ex-president of Yale College, a former governor of the state, and an ex-minister to Russia—that trace their lineage to these early settlers, claiming relationship with Ralph Isaacs.

Considerable interest attaches to the brothers Pinto. They were doubtless the first Jewish settlers of Connecticut. A building known as the "Pinto Place," in State street near the railroad bridge in New Haven, is still in existence (see PINTO). In the "Roll of the Citizens of New Haven, Feb. 5, 1784, at their first incorporation," are found the names of the Pinto brothers—Jacob and Solomon. The latter was a student at Yale College, graduating there in 1777. He took part in the defense of New Haven against the British July 5 and 6, 1779, and was taken prisoner in that engagement ("Diary of Ezra Stiles," ii.).

New Haven is the most important city of Connecticut, having a population of 108,027 (1900). The

number of its Jewish inhabitants is about 5,500. All records having been destroyed by fire, there exist no available data regarding the Jewish congregations of New Haven. The first synagogue, Mishkan Israel, had its origin between 1840 and 1843, as in the latter year a parcel of land in Westville (1½ acres) was purchased for \$50 for a cemetery. The first congregation consisted of twenty Bavarian families, among which were the Adlers, Bretzfelters, Lehmanns, Lauterbachs, Milanders, Ullmans, Watermans, and Rothschilds. Milander was the first reader of the synagogue. The congregation worshiped from time to time in the Armstrong

Building (at the corner of Fleet street and Custom House square), in the Brewster Building (at the corner of State and Chapel streets), and in Todd's Hall (in State street, near Court street). Meininger, Sternheimer, and Samuel Zunder being the successive readers. In 1854, by the will of Judah Touro, the congregation came into possession of \$5,000, which enabled it to purchase the property of the Third Congregational Church in Court street. The new synagogue was dedicated in the following year, the Rev. B. E. Jacobs being minister. In 1855 a mere handful of people formed an Orthodox congregation, under the name "B'nai Sholom." They worshiped from time to time in West Water street, William street, and in Olive street; their present synagogue was built in 1894.

During 1862-64 the Court street congregation introduced a choir and an organ in the services, under the direction of Morris Steinert the Rev. Jonas Gabriel being minister. In 1873 the "Minhag America" was adopted as the ritual, and the first Sabbath-school established, with the Rev. Judah Wechsler as minister. He was succeeded in 1878 by the Rev. Dr. Kleeberg. Regular weekly sermons in German were introduced, the temple was enlarged, and a new organ installed. In 1893 Rabbi David Levy was elected minister. Various changes were made in the ritual, the sermon and a large part of the services being given in English, and the congregation decided to move to a more convenient quarter of the city. In 1896 the corner-stone of the new temple at Orange and Audubon streets was laid, and in March of the following year the new structure was dedicated. Since the Russian and Rumanian immigration there have been established a number of other congregations, among which are Bnai Israel, Bikur Cholim, Bnai Abraham, B'nai Jacob, and Shewath Achim, each having a large membership and being in a thriving condition. Daily religious schools are connected with these congregations.

While the Jewish community of New Haven consists mainly of merchants with large business and manufacturing establishments, it has had distinguished representatives in the legal and medical professions also. Some have been specially prominent, as Max Adler, president of the chamber of commerce; I. M. Ullman, officer on the staff of the governor; Morris Spier, commissioner of charities; Isaac Wolf, member of the legislature; H. W. Asher, president of the board of education; and J. B. Ullman, assistant corporation counsel. A considerable number have held important positions as teachers in the public schools. Maier Zunder (d. 1901) was for twenty years a member of the board of education. In recognition of his services in the cause of public-school education, a prominent school building bears his name. He was for many years, and up to the time of his death, treasurer of the Congregation Mishkan Israel, trustee of the B'nai B'rith Home, member of the board of the Masonic Home, and president of the Savings Bank of New Haven.

During the past twenty years there has been a considerable increase in the Jewish populations of other towns and cities of the state, especially in Bridgeport, Ansonia, Derby, Waterbury, and New

London. Though without a resident minister, they each maintain a cemetery and a Sabbath-school, and hold religious services during the important holidays of the year. The combined population of Jews outside of Hartford and New Haven is estimated to be one thousand. Since 1891 a number of Jewish farmers have settled in various parts of the state (see **AGRICULTURAL COLONIES IN THE UNITED STATES**).

The capital city of the state is Hartford, with a population of 79,850 (1900), the Jewish inhabitants numbering about 2,000. The first congregation established there was Beth

Hartford. Israel (1843). Among its rabbis have been Deutsch, Mayer, Rundbaken, and the present incumbent, Meyer Elkin. The congregation numbers about 100 members, and is in a flourishing condition. There are two or three other congregations, established by the Russian community within the past ten years, notably Adas Israel and B'nai Israel. Many Hartford Jews have held positions of honor in civic affairs, while not a few have held distinguished places in the medical and legal professions.

D. LE.

CONQUE, ABRAHAM BEN LEVI: Cabalist; lived at Hebron, Palestine, in the second half of the seventeenth century. Swayed by his cabalistic studies, Conque threw himself into the Shabbethaian movement, and became one of the most earnest apostles of the pretended Messiah. Even the apostasy of SHABBETHAI ZEBI did not shake Conque's belief, and he remained until his death a faithful follower.

Conque traveled, as a collector for the poor of Palestine, throughout Germany and Russia, and everywhere endeavored to win adherents to the movement. At the request of a friend residing at Frankfort-on-the-Main, he wrote, in 1689, an account of Shabbethai Zebi's life, which reveals in the author a peculiar state of mind. The account is full of miracles and prodigies, firmly believed in by Conque. It is referred to in Jacob Emden's history of the Shabbethaian movement, "Zot Torat ha-Kena'ot." Conque was also the author of the following works: (1) "Abak Soferim" (Dust of Scholars), Amsterdam, 1704, the first part, under the special title of "Em ha-Yeled," comprises homilies on the Pentateuch; the second, "Uggat Rezafim," contains Biblical interpretations by himself and others; and the third, "Em la-Binah," consists of nineteen sermons. (2) "Minhat Kena'ot" (Offering of Jealousy), a treatise on jealousy. (3) "Abak Derakim" (Dust of Roads), a collection of sermons. The last two are mentioned by Azulai, who claims to have seen them in manuscript.

CONRAD (CUNTZE) OF WINTERTHUR: Burgomaster of Strasburg during the Black Death, in 1348. Together with the councilors Goffe Sturm (Schöppe) and Peter Schwarber, he opposed the mob which, believing the Jews had caused the Black Death by poisoning the wells and rivers, demanded their lives. When a deputation of the citizens appeared before the council to insist upon the

arrest of the Jews, Conrad energetically refused. They insolently demanded that he divide among the citizens a part of the money he had taken from the Jews for protection; whereupon Conrad arrested the whole deputation. His attitude toward the Jews was the more meritorious in that he exposed himself to the resentment of the populace, knowing clearly the consequences. Conrad and his colleagues were deposed, their property was confiscated, and they were excluded from the council for ten years.

I. BR.

CONRAT, MASE: Professor and writer on Roman law; born in Breslau Sept. 16, 1848. His original name was Cohn, which he exchanged for Conrat in 1882, when he embraced the Christian faith. Conrat attended the gymnasium of St. Maria Magdalena in Breslau up to the year 1867; and then entered successively the universities of Breslau, Heidelberg, and Berlin. At the last he took his doctor's degree in 1870. From 1870 to 1872 he filled the office of referendar in Breslau; he was appointed privat-docent in Roman law at the University of Heidelberg in 1873; and in 1874 he became professor at the University of Zurich. In 1878 he accepted a call as professor in Roman law to the University of Amsterdam.

His early studies lay mainly in the field of ancient Roman law; but afterward, and for twenty years, he turned his attention to the Roman law of the Middle Ages. Besides numerous articles in various periodicals, he is the author of the following works: "De Natura Societatum Juris Romani Quæ Vocantur Publicæ," 1870; "Zum Römischen Vereinsrecht," 1873; "Die Sogenannte Actio de Eo Quod Certo Loco," 1877; "Beiträge zur Bearbeitung des Römischen Rechts," 1880, vol. i.; "Das Florentiner Rechtsbuch," 1882; "Die Epitome Exactis Regibus," 1884; "Pandekten und Institutionen auszugsweise der Britischen Dekretensammlung," 1887; "Geschichte der Quellen und Litteratur des Römischen Rechts im Früheren Mittelalter," 1891; "Die Christenverfolgungen im Römischen Reich vom Standpunkt des Juristen," 1897. He translated from Dutch into German Asser's "Das Internationale Privatrecht," 1880, and Kappeyne van de Cappello's "Abhandlungen," 1885.

S.

CONREID, HEINRICH: American theatrical manager and impresario, born at Bielitz, Austria, Sept. 13, 1855; died at Meran, Austria, April 27, 1909. In 1887 he leased the Irving Place Theater, and introduced German plays there with great success. He succeeded Maurice Grau as manager of the Metropolitan Opera House, New York, in 1903, producing "Parsifal" and "Salome" in 1907. F. H. V.

CONSANGUINITY AMONG JEWS: Owing to their dispersion among populations professing creeds different from their own, Jews have married near relatives more frequently than the rest of the world. The marriage of first cousins and even of uncle and niece is quite legal and usual among them (see **MARRIAGE**). The limitations on the marriage of those of priestly descent would tend to limit the choice of Cohens to those nearly related to them.

The tendency seems to have begun early, since Abraham is represented as having sought a wife for Isaac in his mother's family. In the Middle Ages it is difficult to ascertain how far the Jews tended to marry within their own families; but the Ghirondi family, to which Nahmanides, Gersonides (who married his first cousin), and Simon Duran belonged, appeared to have married relatives for several generations (Steinschneider, "Cat. Bodl." cols. 2305-2310).

An attempt has been made to ascertain the proportion of first-cousin marriages among English Jews upon the method invented by G. H. Darwin ("Fortnightly Review," July, 1875), based on the number of marriages in which both bride and bridegroom have the same surname. This method gives a proportion of about one-fifth. Judging by this criterion, the percentage of cousin-marriages in the English peerage was 4.50 among the landed gentry, 3.75 in rural districts, 2.25 in London. Applying the same method to English Jews, Jacobs calculated that 7.52 per cent of their marriages were first-cousin marriages. By another method W. Stieda found that there were 23.02 per cent per thousand consanguineous marriages among the Jews of Alsace-Lorraine as compared with 8.97 among Catholics and 1.86 among Protestants ("Die Eheschliessungen in Elsass-Lorhringen," 1872-76, Dorpat, 1878). It would therefore appear that the proportion of first-cousin marriages among Jews is about three times greater than among the non-Jewish population.

It seems that consanguineous unions are more fertile and less sterile than other marriages. In England the ordinary percentage of sterile marriages is as high as 16.03 (Duncan, "Fecundity, Fertility and Sterility," p. 153, Edinburgh, 1856), whereas among a number of Jewish consanguineous marriages only 5.4 per cent were sterile. The children who lived numbered 4.6 on an average as compared with 2.26 among ordinary Englishmen.

It has been contended that the neurotic tendency of Jews is due to these consanguineous marriages. Boudin ("Traité de Géographie Médicale," ii. 140, Paris, 1857) contended that the greater prevalence of deaf-mutism among Jews was due to this cause; but this view is no longer credited among medical men, who regard consanguinity in marriage as aggravating any diathetic tendency in a family, but not as causing the tendency per se.

J.

CONSECRATION or DEDICATION (חֲנֻכָּה):

The solemn setting apart of a person or thing to a special use or purpose. According to Fleischer (Levy, "Neuhebr. Wörterb." ii. 206), the word "hanak" (to initiate) is derived from the "rubbing of the throat" of an infant for the purpose of cleansing it and enabling it to take the mother's milk, and is therefore applied to every form of initiation. It appears, moreover, that the "rubbing" remained for a long time an essential feature of the rite of initiation, for "every consecration in Biblical times was accompanied by rubbing or anointing with oil the object to be consecrated. Thus the pillar at Bethel

was anointed (Gen. xxviii. 18; compare the "dedication" of Nebuchadnezzar's image, Dan. iii. 2 *et seq.*). The priests and the vessels of the Tabernacle were anointed with oil (Ex. xxviii. 41, xxx. 26; Lev. viii. 10-12; Num. vii. 13), and by this rite they were "hallowed." "Mishpat Adonai" is, therefore, "consecration to the Lord" (Lev. x. 7).

In the case of a priest to be consecrated there was also an anointing with the blood of the initiation "sacrifice" (Ex. xxix. 1), the sacrifice

Priests receiving the name of מְלֻאִים, from **and Altar.** מִלֵּא אֶת יָד, "the filling of the hand"

of the priest with the offering which he had to bring in order to be thereby initiated as ministering priest (see Dillmann's and Strack's commentaries on Lev. vii. 37). The anointing of kings with oil (I Sam. xvi. 13, xxvi. 11; I Kings i. 39; II Kings xi. 12) is also a consecratory rite; hence, also, that of prophets (I Kings xix. 16). The consecration of the altar was most essential, and therefore accompanied with special solemnities in the form of sacrificial offerings (see Num. vii. 10, 11, 84-88). The consecration (חֲנֻכָּה) of Solomon's Temple consisted of a dedicatory prayer and a blessing, in addition to the sacrifices (I Kings viii. 15 *et seq.*, 55 *et seq.*, 63 *et seq.*). The consecration of the Second Temple is mentioned in Ezra vi. 16, 17, and for the probable date (25th of Kislev) see Num. R. xiii. 4 (compare Hag. ii. 10). It was the consecration of the newly erected altar which gave the feast of the Maccabees the name of חֲנֻכָּה (I Macc. iv. 53, 59). According to Deut. xx. 5, private houses also were consecrated, and as to the gates of a city see Neh. iii. 1 and CORNER-STONE.

The warrior when going to battle was also "consecrated" (Joel iv. 9; Micah iii. 5; Jer. xxii. 7, Hebr.); hence, probably, the name חֲנֻכָּה for the young warrior initiated into war (Gen. xiv. 14). This gave rise to the proverb (Prov. xxii. 6, Hebr.): "Initiate the lad [A. V. and R. V. "Train up a child"] in the way he should go."

It was considered the duty of parents to "initiate" the young into every religious practise, and this was a "consecration" to a life of religious duty (מְחֻנְכֵּי, Yoma 82a; Nazir

Rabbinical 29b). When children were to be initiated into the study of the Law or of

Times. the Hebrew language, Hebrew letters or Biblical sentences upon honey-cakes covered with honey were given them to eat, in accordance with Ezek. iii. 3 (see Mahzor Vitry § 508, p. 628, ed. Horwitz; Zunz, "Z. G." pp. 167 *et seq.*; and compare Soṭah 11b and the symbolical offering of honey and milk as a similar Christian baptismal rite; Tertullian, "De Corona Militis," iii.; and Augusti, "Handbuch der Kirchlichen Archäologie," ii. 445 *et seq.*).

For the consecration of synagogues there is no special form mentioned in Talmudical literature; but the fact that in the beginning of the fourth century the churches had their dedication ceremonies (Eusebius, "Hist. Eccl." x. 4) makes it probable that the synagogues had some such form, as indeed Greeks and Romans also had for their temples (see Pfannenschmid, "Germanische Erntefeste," 1878, pp. 524-530). Mishnah M. K. i. 6 speaks of consecration of family sepulchers (מְחֻנְכֵּי אֶת הַכּוֹבֵּץ), and Yer. M.

ק. i. 80d of consecration of cemeteries (חֲנוּךְ בֵּית הַקְּבָרוֹת). But this does not always imply a formal act, as may be learned from Sheb. 15a: "The vessels of the sanctuary after Moses' time were consecrated by their use without being anointed." Later practice, however, introduced ceremonies of dedication for synagogues, and also for a newly written "Sefer Torah" when given to a congregation. Modern life extended dedication ceremonies to every communal institution of an educational, charitable, or religious character. A fixed form for such dedication exercises does not exist; the Psalms to be read and the prayers to be offered are left to the discretion of the rabbi or officers in charge.

At the dedication of cemeteries a superstitious custom, sanctioned by R. Juda the Pious, was to kill a rooster (נֶכֶר, a term used for both man and rooster) and bury it as the first victim of death (see Isaac Lampronti, *בית הקברות*). For a wise selection of Psalms and prayers at the dedication of a cemetery, see Praeger, "Gebet- und Erbauungsbuch für Israeliten," 1860, pp. 178-181, and M. Silberstein, "Predigten bei Besonderen Veranlassungen," p. 163, Breslau, 1870. For the consecration of a new house see Singer, "Authorized Daily Prayer Book," pp. 300-303, London, 1891. For other dedications see "Liturgies" in Zedner, "Cat. Hebr. Books Brit. Mus."

E. G. H.

K.

CONSENT: A voluntary yielding of the will, judgment, or inclination to what is proposed or desired by another. A rational and voluntary concurrence of the parties is necessary in all cases involving a legal act or contract. This principle gives rise to several distinctions in civil law. If a man has been forced to make a gift to another, his act is considered invalid, even though he made no formal protest (B. B. 40b; Hoshen Mishpat, 242, 1). If he has been compelled, however, to sell either personal or real estate, the contract is valid, for it is presumed that, unless he had previously made a formal protest ("moda'a") before two witnesses, he was reconciled on the receipt of the money (B. B. *ib.*; Maimonides, "Yad," Mekirah, x. 1, 6; Hoshen Mishpat, 205, 1).

Minors above six years of age, who show intelligence and an understanding of business, are presumed to be capable of consenting to the purchase, sale, or gift of personal property, but not of real estate (Git. 59a; Mekirah, xxix. 1; Hoshen Mishpat, 235, 1). If a guardian ("apitropos")

In Business is appointed for them, they can negotiate no business without his consent **Trans-**
actions. (*ib.* 235, 2; see "Pithe Teshubah," quoting the opinion that even then his gifts should be valid).

The deaf-mute can enter by signs into contracts concerning personal estate. He must, however, be examined to see that he understands what he is doing (Git. *l.c.*; Mekirah, xxix. 2; Hoshen Mishpat, 235, 17). The mute can sell and buy and give away either personal property or real estate (*ib.* 235, 18). The idiot can make no contract, and the court appoints a guardian for him as for a minor (Ket. 48a; Mekirah, xxix. 4, 20; Hoshen Mishpat, 235, 20).

The consent need not always be expressed. Silence is regarded as voluntary consent (Yeb. 87b;

B. M. 37b). Therefore, in marriage contracts, if a man gave a coin to a woman and pronounced the prescribed formula in the presence of two witnesses, and she did not protest immediately, the marriage is valid (Eben ha-'Ezer, 42, 1; see Isserles' gloss). By "immediately" a space of time is meant which would

In be sufficient for a disciple to greet his master thus: "Peace be with thee, my master and teacher" (B. K. 73b).
Marriage
Contracts. If, however, she was under duress, the marriage is invalid (Yeb. 19b; see

Rashi's commentary, where the principle of consent on the part of the woman is derived from Deut. xxiv. 2: "She may go and be another man's wife"; Kid. 2b; Eben ha-'Ezer, *l.c.*). Authorities differ, however, regarding cases in which the man is under duress in contracting a marriage; some are of opinion that inasmuch as he can divorce her at will afterward, the marriage should be valid (Eben ha-'Ezer, *l.c.*). Since, however, compulsory divorce is now impossible, according to the decree of R. Gershom, the man would be in the same position as the woman, and a forced marriage, whether the man or the woman be the party under duress, would be considered invalid (Mielziner, "Jewish Law of Marriage and Divorce," § 29).

Consent being necessary, insane persons or idiots were considered incapable of entering into a marriage contract (Eben ha-'Ezer, 42, 2). If a person who is only weak-minded or tempo-

Insanity rarely insane has contracted a mar-
and Idiocyriage, it is doubtful whether such a
Barred. contract could be declared invalid, so that the woman may be allowed to

marry again (*ib.* Isserles' gloss). A marriage contracted by an intoxicated person is valid, unless he was at the time of his marriage entirely unconscious, "as the intoxication of Lot" (*ib.* 42, 3). Deaf and dumb persons, being looked upon as idiots, could not contract a marriage according to Biblical law, but the Rabbis sanctioned such a marriage when performed by signs. This being merely a rabbinical institution, it is not as valid as other marriages, and a very serious question would arise were another man to contract a marriage with the woman after she had been married to the deaf-mute (Yeb. 112b; "Yad," Ishut, iv. 9; Eben ha-'Ezer, 44, 1; see Mielziner, *l.c.* §§ 33, 34). Minors are usually classed with deaf-mutes and idiots by the Talmudists, and their marriage is also considered invalid by lack of consent (Eben ha-'Ezer, 43, 1).

While mutual consent is absolutely necessary in marriage, it is, according to the old Jewish law, not necessary in divorce, and the husband can divorce his wife even without asking her consent (*ib.* 119, 6; from Mishnah Yeb. xiv. 1). As in the course of time the act of divorce came under the control of the rabbinical courts, the Rabbis had an opportunity to restrict this law gradually by many regulations, until, in the eleventh century, by a decree of R. Gershom, this arbitrary right of the husband was entirely abrogated.

In Divorce. Although Maimonides made no mention of it in his code, this bold regulation was soon adopted by the great majority of the Jews, and a divorce without sufficient cause will not be granted unless the con-

sent of both parties is obtained (Eben ha-'Ezer, *l.c.* Isserles' gloss; see Amram, "Jewish Law of Divorce," *iv.*). In certain cases this decree is disregarded—for instance, if the woman commits adultery, or is even denounced as an adulteress by persons in whom the husband has faith (Eben ha-'Ezer, 115, 7); if she conducts herself in a manner unbecoming a Jewish woman (*ib.* 115, 4); if she causes her husband to transgress the religious precepts with regard to food or to cohabitation; if she curses her father-in-law (*ib.* 115, 4); if she contracts an incurable disease (*ib.* 117, 11); if she refuses him connubial rights for a whole year (*ib.* 77, 2, Isserles' gloss). There is a difference of opinion among authorities whether, under the decree of R. Gershom forbidding bigamy, the husband may marry another woman if he can not force his wife to the acceptance of the bill of divorce in the above-mentioned cases ("Pitḥe Teshubah" to Eben ha-'Ezer, 1, 10, and 119, 6).

An insane person, or one who is intoxicated to the degree of unconsciousness, is incapable of divorcing his wife. A deaf-mute, who became so after his marriage, can not divorce his wife. If, however, he was so when he first married, he may divorce her by signs as he married her by signs (Eben ha-'Ezer, 121, 1, 6).

For questions involving legal rights, see RIGHT OF EMINENT DOMAIN; RIGHT OF WAY; for those involving consent to a crime see ACCESSORIES.

J. SR. J. H. G.

CONSISTORY: An ecclesiastical court; in Jewish usage, a body governing the Jewish congregations of a province or of a country; also the district administered by the consistory. The term was originally, and still is, applied in the Roman Catholic Church to the College of Cardinals, assembled for deliberation or to hear a solemn declaration from the pope. Similarly every bishop has the right to convene for the purpose of deliberation a consistory composed of priests of his diocese. After the Reformation the Protestant Church adopted this term for the body which governed the ecclesiastical affairs of a country. In the latter sense the Jews in countries under French influence made use of the term in the beginning of the nineteenth century, when the movement for political emancipation demanded the creation of a representative body which could transact official business with a government in the name of the Jews, and when the desire for reform among the educated classes demanded the creation of a body vested with authority to render religious decisions.

The first attempt to create such a consistory was made by Napoleon I. In 1806 he convened the Assembly of Jewish Notables, whose

France. resolutions were confirmed by a subsequently convened Sanhedrin; after which, by the decree of March 17, 1808, he organized a consistory. According to this decree every department containing 2,000 Jews might establish a consistory. Departments having less than this number might combine with others; but none had

more than one consistory. Above these provincial consistories there was a central consistory. Every consistory consisted of a grand rabbi, with another rabbi where possible, and of three lay members, two of whom were residents of the town where the consistory sat. They were elected by twenty-five "notables," who were nominated by the authorities. Eligible to become members of the consistory were Israelites who had reached the age of thirty years, who had never been bankrupt, and had not practised usury. The central consistory consisted of three grand rabbis and two lay members. Every year one retired, and the remaining members elected his successor.

Napoleon demanded that the consistories should see to it that the resolutions passed by the Assembly of Notables and confirmed by the Sanhedrin should be enforced by the rabbis; that proper decorum should be maintained in the synagogue; that the Jews should take up mechanical trades; and that they should see to it that no one evaded military service. The central consistory watched over the consistories of the various departments, and had the right to appoint the rabbis.

This organization was also introduced in the various countries which were under the sway of France during the Napoleonic era, as Holland, Belgium, and Westphalia. In the last-named country, ruled over by Napoleon's youngest brother, Jerome, a consistorial organization was introduced by the decree of March 31, 1808. It was composed of a president (who could be either a rabbi or a layman), three rabbis, two lay members, and one secretary. It was chiefly the outcome of Israel Jacobson's efforts, who hoped to introduce through such a medium his Reform ideas. A circular of this consistory ordered the introduction of confirmation and removed the prohibition against leguminous plants on Passover. None of these organizations survived the Napoleonic era with the exception of that in Belgium, where the consistorial organization still exists as in France.

The following is a list of the original consistories as drawn up by Napoleon for the whole of the territory under his influence, in his Madrid decree of Dec. 11, 1808, with the census of Jews in each consistory and in its chief town (Halphen, "Recueil des Lois . . . Concernant les Israélites," pp. 55-57):

The desire to introduce reforms, and the difficulty of making them popular so long as they were individual decisions, led to various attempts during the middle of the nineteenth century to introduce either a consistory or a synod which should, by an author-

itative vote, settle the difficulties which arose when the demands of the time came into conflict with the traditional law. None of these attempts was successful.

Since Napoleon's decree of March 17, 1808, various changes have been introduced in the method of electing the delegates, and some of the provisions assigning to the rabbis the rôle of informers were dropped.

The most important changes are contained in the laws of Louis Philippe (May 25, 1844) and of Napoleon III. (June 15, 1850, and Aug. 29, 1862), and the law of Dec. 12, 1872, which introduced the system of universal suffrage in the elections of the consistories. There are at present twelve consistories: Paris, Nancy, Bordeaux, Lyon, Marseilles, Bayonne, Epinal, Lille, Besançon, Algiers, Constantine, Oran; each is composed of the grand rabbi of the consistorial district and six lay members, with a secretary. Each consistory has a representative in the central consistory, which therefore is composed of twelve members and the grand rabbi of France; its seat is in Paris. In Alsace-Lorraine the former consistories of Metz, Strasburg, and Colmar still exist, but they are not united under a central consistory, though the establishment of such an organization is now (1903) under consideration. The consistory of Belgium has its seat in Brussels. See COMMUNITY, ORGANIZATION OF, IN MODERN TIMES.

D.

CONSOLATION.—**Biblical Data:** Comfort; alleviation of sorrow (נַחֲמָה, תְּנַחֲמִים); relief from grief (from נָחַם, meaning in pi'el form "to remove grief"); words of sympathy and encouragement offered to persons in distress (Gen. xxxvii. 35; II Sam. xii. 24; Job xvi. 2; Ps. cxix. 50, 82). After the burial of the dead, mourners were offered "consolation" by the friends, who made them partake of the mourners' meal and the cup of consolation (see Jer. xvi. 7; compare Ps. lxix. 20; Job xlii. 11). These friends, called "comforters," are frequently mentioned in the Bible (see Lam. i. 2 et seq.; Eccl. iv. 1; II Sam. x. 2; Job xvi. 2; Ps. lxix. 20; Nahum iii. 7), and the act of consolation is alluded to in Job xxix. 25, and especially in Isa. lvii. 18 et seq., Hebr.: "I will restore comforts unto him and to his mourners—food for the refreshment of the lips" (the last Hebrew words, "bore nib sefatayim," have been strangely misinterpreted by the commentators, A. V. giving, "I create the fruit of the lips"; see Luz-zatto *ad loc.*). Isa. lxvi. 10 et seq., Hebr.: "All ye that mourn over her that ye may suck and be satisfied with the overflow of her consolation," also contains an allusion to this custom (compare Ps. xciv. 19, "thy comforts," and Job xv. 11). Also the interpretation of the name of Noah as the one who shall "comfort" men for their hard toil because of the curse of the earth (Gen. v. 29, יִנְחֵםנוּ, *qal*), alludes

to the wine of which he was the first producer (Gen. ix. 20; see Gunkel, commentary, *ad loc.*, and Prov. xxxi. 6). Consolation was especially promised by the prophets of the Exile to the people mourning over Jerusalem (Isa. xl. 1; xlix. 13; li. 3, 12; lii. 9; lxi. 2 et seq.; lxvi. 10-13; Jer. xxxi. 12 et seq.; Zech. i. 13, 17). Hence the name "Nehamah" or "Nehamata" (consolation) given to the prophetic literature as offering comfort to the mourners over Jerusalem by the promise of the advent of "the comforter," either "the Messiah" (see "Menahem" as name of the Messiah, Sanh. 98b) or the "messenger of glad tidings" (see PARACLETE; B. B. 14b; Ber. 31b; Yer. Ber. v. 8d).

—**In Rabbinical Literature:** "The consolation of Jerusalem" (see above) is mentioned in the prayer recited at meals (see GRACE AT MEALS); also by the Karaites in the wedding eulogy (see Müller, "Masseket Soferim," p. 273), before the reading of the Haftarah (see "Massek. Soferim," xiii. 12), and particularly in the benedictions recited over the cup of consolation at the mourners' meal. The consolation of Jerusalem is thus brought into connection with that of the mourners over the dead (see Ket. 8b; Siddur R. Amram, i. 55; Tur Yoreh De'ah, 379; Shulhan 'Aruk, 2).

There were two gates in the Temple at Jerusalem, believed to have been built by King Solomon, through one of which bridegrooms marched, through the other mourners and anathematized persons; the former to receive the congratulations, the latter the consolations, of the inhabitants of Jerusalem, who gathered before these gates for the purpose of showing their sympathy. After the destruction of the Temple the synagogue became the place where bridegrooms received the congratulations and mourners the condolences of the people (Soferim, xix. 12; compare Pirke R. El. xiii.). Formerly the mourners stood still, and the people offering consolation passed by them; later on, in consequence of rivalry between families claiming rights of precedence on account of higher rank, the people were ranged in lines, and the mourners passed them, receiving consolation (Sanh. 19a). Ten men were necessary to form such a line (Sanh. *ib.*). Where there were no mourners to receive consolation, a congregation of ten men paid the honors to the dead (Shab. 152a, b). If the king was a mourner, the people said to him: "May we be thine atonement!" that is, May we suffer for thy sin! And he rejoined: "May ye be blessed from the Lord!" (Sanh. ii. 1). To the priest in the Temple who was in mourning or in misfortune, the friends standing to the right said: "May He who dwells in this house be thy Comforter!" (Middot ii. 2).

The friends who offered consolation sat down on the ground with the mourners and waited for the latter to speak first (Yer. M. K. iii. 83a). When Johanan ben Zakkai lost his son his disciples came to offer him consolation. R. Eliezer said: "The first man lost his son Abel, and was comforted; so should you be comforted." R. Joshua said: "Job had many sons and daughters, and lost them all on one day, and was comforted; so should you be comforted." R. Jose referred to Aaron the high priest, who lost his two sons on the day of the dedication of the

Sanctuary, and was comforted; R. Simeon referred to King David, who lost a son and was comforted. But R. Johanan ben Zakkai rejoined: "Your consolations only awaken grief, inasmuch as they recall the evil destiny which befell all these men." Then R. Eleazar b. 'Arak began: "A king gave a precious boon in trust to a man; and, behold, the man was in constant dread lest he might have it damaged or lost; and only when he had returned it safely did he feel at ease. The King of the world gave to thee a son who became a devotee of the Law; and then, having become familiar with all branches of learning, he departed this world free from sins; oughtst thou not be thankful that thou couldst return the treasure to God in such blameless shape?" Whereupon R. Johanan b. Zakkai replied: "Truly, thou, R. Eleazar, hast comforted me" (Ab. R. N. xiv.; compare BERURIAH). Judah bar Nahmani, the meturgeman of Resh Lakish, spoke at the death of a child to the mourners: "Ye brethren who are afflicted by this loss, ponder upon this bitter lot of man foreordained from the days of creation; many have drunk of this cup, and many will yet drink of it. May the Lord of Consolation console you! Blessed be the Comforter of the Mourners!" To the friends who had come to condole with the bereft he said: "Brethren who practise benevolence, sons of practisers of benevolence, adhering to the covenant of Abraham our father, may the Lord of Recompense recompense you! Blessed be He who recompenseth good deeds!" (Ket. 8b).

In Midrashic literature God Himself is regarded as giving men an example of the "consolation of mourners" (Soṭah 14a, with reference to Gen. xxv. 11: "After the death of Abraham God blessed Isaac"). It is said of consolation that "it is one of those things which bring happiness to man" (Ab. R. N., A., xxx., ed. Schechter, p. 89); and it is declared that "wine has only been created for the cup of consolation" ('Er. 65a, with reference to Prov. xxxi. 6). Regarding the mourners' meal see FUNERAL RITES and MOURNING CUSTOMS. K.

CONSOLO, BENJAMIN: Italian Hebraist; born at Ancona in 1806; died at Florence in 1887. He received his elementary instruction from Rabbi David A. Vivanti at the Talmud Torah of his native city, and then took up eagerly the study of secular sciences, though against the wishes of his teachers.

As he was excluded from the schools of Ancona, which were then under papal control, and was too poor to pay private tutors, he encountered great difficulties. He studied Italian with Count Pietro Alecy, a student of Dante, and then Latin with Lorenzo Barili, who subsequently became a cardinal. Consolo was appointed secretary of the Jewish community at Ancona, and later of that at Florence. In the latter city he formed a friendship with the litterateur Cesare Scartabelli, whose enthusiasm in behalf of purism and a return to the language of the trecentists he shared. His love for Judaism, together with his interest in Italian literature, induced Consolo to translate Hebrew works into Italian.

His works include: "I Capitoli dei Padri, Trattato Misnico Morale con Commenti," an Italian transla-

tion of Abot; "I Doveri de' Cuori," Prato, 1847; "Volgarizzamento del Libro di Job," Florence, 1874; "Volgarizzamento delle Lamentazioni di Geremia"; "Il Salterio o Canti Nazionali del Popolo d'Israele Spiegati e Commentati," Florence, 1885. He was also the author of several shorter essays and poems. The autographs of these works, as well as the manuscript of his comparative treatise on Biblical and Roman law, entitled "Jus Civile," are preserved in the Biblioteca Nazionale at Florence. Consolo's wife, Regine, published an Italian translation of the "Enchiridion d'Egitto." The composer and virtuoso Federico Consolo is his son.

BIBLIOGRAPHY: Introduction to Consolo's translation of the Psalms; A. de Gubernatis, *Dizionario Internazionale degli Scrittori Contemporanei*; *Il Vessillo Israelitico*, xxxiv. 148, s. I. E.

CONSOLO, FEDERICO: Italian violin virtuoso, composer, and scholar; born at Ancona in 1841. After studying the violin with Giorgetti in Florence and Vieuxtemps in Brussels, and composition with Fétis and Liszt, he played with great success at almost all the European courts and in the Orient. In 1884, however, he was compelled by a nervous affliction to discontinue violin-playing. He removed to Florence, and devoted himself to composition. His works include a number of Oriental cycles, concertos, and "Shire Yisrael" ("Libro dei Canti d'Israel," Florence, 1891) a collection of Sephardic synagogal melodies and original compositions. He subsequently undertook archeological studies, writing on musical notation, and especially on music in the Bible. He is a knight of several orders in different states.

CONSONANTS. See HEBREW LANGUAGE.

CONSTANCE, DISTRICT OF THE LAKE

OF: Region in the northeastern part of Switzerland. Of the Jewish communities designated as belonging to the district of the Lake of Constance, those of Ueberlingen, Constance, Schaffhausen, and Diesenhofen deserve special mention, although many others belong to the same district, as Bregenz, Engen, Aach, Feldkirch, Randegg, Isny, Donau-eschiugen, and Thiengen. This designation is found also in the "Memorbücher." The cemetery of the Jews at Ueberlingen is mentioned as early as 1226. The earliest Jewish settlement at Constance dates from the beginning of the thirteenth century. Jews of Schaffhausen are referred to in documents in 1299; while those of Diesenhofen are not mentioned until the fourteenth century, although probably some were living there long before that time.

In 1314 the Jews of Ueberlingen paid their taxes to King Frederick and Duke Leopold of Austria; in 1332 they were cruelly persecuted, more than 300 being killed, and their synagogue destroyed. Their synagogue and the Jewish quarter are again mentioned in 1349, when the Jews were completely exterminated by the FLAGELLANTS (Feb. 11), while the tombstones of their cemetery were used in building the cathedral and the hospital. Jews were again admitted in 1378. They suffered much under

AUSCHER, URS
(From a manuscript chronicle of Ulrich von Richental, in the library of the town hall at Basel.)

King Wenzel's law which canceled all debts owing to them (1385); and in 1429 twelve were banished.

In 1312 many Jews of Constance were burned on a charge of having desecrated the host. They had a synagogue at this time. In 1314 their quarter was destroyed by fire; 330 were killed by the Flagellants in 1349. In 1417 Jews from Constance went to meet Pope Martin V. in solemn procession.

Their synagogue is again mentioned in 1424. The liaison of a Jewess of the community with a member of Emperor Sigismund's family, in 1424, was used by Scribe as the subject of his libretto to Halévy's opera "La Juive." In 1429 and in 1443 all the Constance Jews were imprisoned; and from 1448 to 1533 none lived there.

At Schaffhausen many were slain in 1349 on a charge of having poisoned the wells. Their synagogue is mentioned in 1391; 30 Jews were burned in 1401; and in 1475 the last remaining Jew removed to Winterthur. At Diessenhofen, where they had a synagogue at an early period, they were persecuted in 1349. In 1401 a Jew, accused of having murdered a Christian boy, was burned; and in 1494 the Jews left the city.

In 1547 Charles V. gave Ueberlingen certain privileges regarding usurious contracts with the Jews, which were renewed by Maximilian in 1566. As late as 1853 two Jews who desired to live in Ueberlingen encountered difficulties in so doing; three were living there in 1880, and nine in 1902.

In 1533 it was decreed that but one Jew a week might remain for one night at Constance. Since 1847 Jews have been permitted to live there, though under many restrictions. In 1863 five Jewish families settled in Constance, and in 1866 formed a community that by 1902 numbered 130 families.

At Schaffhausen a Jewish physician, David, with his family of six members, was admitted as a resident in 1535. He was made to suffer many persecutions; and his son Samuel was expelled in 1562. Since 1865, Jews have again settled there, though only two families were resident in 1880.

At Diessenhofen, where, in 1667, six families were living, a Jew received permission to settle in 1865, and ten Jewish families were living in the town in 1880.

CONSTANTINE I. (FLAVIUS VALERIUS AURELIUS CONSTANTINUS): Roman emperor; born Feb. 27, 274; died May 22, 337; proclaimed emperor by the army in Gaul on the death of his father, Constantius Chlorus (306). He defeated Maxentius, his rival in Italy, in 312; and after routing Licinius, Emperor of the East (323), became sole ruler. In 330 he transferred his court to Byzantium, thenceforth called Constantinople; but died in the midst of his preparations for a Persian campaign, after receiving baptism from Eusebius, Bishop of Cæsarea. Being the first Christian emperor, the Church conferred upon him the title of "The Great."

Political and religious considerations dictated Constantine's friendly attitude toward Christianity. As early as the war against Maxentius, his standard

bore a Christian emblem; but previous to his victory over Licinius he contented himself with placing Christianity upon a footing of equality with heathendom. As sole ruler he did not go materially beyond the gradual repression of heathenism and the public encouragement of Christianity; he showed his attitude on this question especially by conducting the first ecumenical council at Nicæa (325).

After his victory over Licinius, Constantine inaugurated a more and more hostile policy toward the Jews. It is true that as early as 321 a law was promulgated which made it obligatory for Jews to fill onerous, expensive municipal offices; while on the other hand such Jews as had devoted themselves to the service of their own religion were exempted in 330 from all public services, and those who were already "curiales" were freed from the levying of taxes. In 329, however, the Jews were forbidden to perform the rite of circumcision on slaves or to own Christian slaves; the death penalty was ordained for those who embraced the Jewish faith, as well as for Jews versed in the Law who aided them. On the other hand, Jewish converts to Christianity were protected against the fanaticism of their former coreligionists. Simultaneously with this an edict was issued forbidding marriages between Jews and Christians, and imposing the death penalty upon any Jew who should transgress this law. Some of these enactments were affirmed in 335. Noteworthy is the hostile language of several of these laws, in which Judaism is spoken of as an ignominious or as a bestial sect ("secta nefaria" or "feralis").

The hostile attitude of the Christianized state, which later became more and more accentuated under Constantine's sons, thus owed its origin to Constantine himself; it is even probable that it was Constantine who renewed the law prohibiting the Jews from entering Jerusalem.

CONSTANTINE (ancient Cirta): City in Algeria; capital of the department of the same name. In ancient times it was the capital of Numidia. Jews lived there as early as the first centuries of the common era, as is attested by epitaphs found in several places in that province. As Constantine remained under the Roman domination until its conquest by the Arabs (710), it is probable that, toward the middle of the fifth century, the greater part of the Jewish inhabitants left it and settled in the neighboring towns under the Vandals, among whom the Jews enjoyed a far greater amount of freedom than they did under Christian Rome.

In common with all Algerian Jews, those of Constantine enjoyed peace from the time of the Arabian conquest until the middle of the twelfth century. Under the Almohad dynasty they were subjected to frequent persecutions. From 1509 until 1555 Constantine was in the hands of the

Spaniards. During this period the Jewish community suffered severely. Under the domination of the Turks, Constantine was administered by beys, almost independent of the deys of Algiers, and under them the state of the Constantine Jews was similar to that of Jews elsewhere in ALGERIA.

Like all Algerian communities, that of Constantine was governed by a "muḳaddam," or president, assisted by a council. Since the French conquest the city has been the seat of a consistory, to which belong the following communities: Ain Beida, Batna, Bône, Bougie, Guelma, Philippeville, Setif, Tebassa. This district counts 6,800 Jews, of which number 3,321 live in Constantine. The rabbis of the last thirty years have been: Netter, Abraham Cahen, Jacques Levy, and Paul Haguenauer, the present incumbent. Until recently there existed in Constantine an important rabbinical school called "Ez Hayyim."

See ALGERIA.

I. BR.

CONSTANTINIS, ABRAHAM: Greek manufacturer, and president ("proëdros") of the Jewish community of Athens, Greece. He was born at Zante in 1865. After receiving an elementary education in his native city, he studied at Paris, where he took the degree of doctor of science, and graduated as engineer at the Ecole Supérieure de Télégraphie. He was at first in the employ of the Société Edison of Paris, and afterward in that of the Société d'Entreprises of Athens, in which city he constructed, in 1887, the first electric-lighting establishment, thereby greatly contributing to the popularization in the Greek peninsula of the most recent discoveries in electricity and telephony.

A commission and banking business which he founded has, in less than thirteen years, taken the foremost position in the commercial and industrial affairs of Athens. The emery trade of the island of Naxos is a state monopoly managed by the firm of A. Constantinis, which exports three-fourths of the emery consumed in the world. In recognition of Constantinis' services the Greek government appointed him secretary of the commission in charge of the Athens exhibit in the Paris Exposition of 1900. As president of the Jewish community he uses his influence for the protection of his coreligionists at Athens.

M. FR.

CONSTANTINOPLE (Turkish, **Stambul** or **Istambul**): Capital of the Ottoman empire, situated on the Bosphorus; the "Byzantium" of the ancients. The earliest official document hitherto discovered relating to the Jews of Constantinople dates from 390. A decree of that year (Feb. 23) bearing the successive signatures of the emperors Valentinian II., Theodosius, and Arcadius, exempted the Jewish and Samaritan ship- and cargo-owners from sharing the burdens of the society known in that city as the "Navicularii" ("Codex Theodosianus," xiii. 5, 18). Other decrees in favor of the Jews were issued during the reign of Arcadius.

Theodosius II. was the first Byzantine emperor to curtail the civil rights of the Jews. Instigated by the clergy, he expelled the Jews from the city proper, and assigned to them a district at the other side of the Golden Horn, above Galata, called Stenum (the modern Pera). Hitherto they had occupied in the city itself a special quarter known as the "copper market," where they had their synagogue, which was later converted into the Church of the Holy Mother. Instead of being included in the jurisdiction of the municipal authorities, the Jews were placed by Theodosius under that of a special strategus. According to Ibn Verga ("Shebet Yehudah," p. 40), the expulsion from the city proper was really a measure of clemency on the part of Theodosius, who had previously subjected the Jews to more rigorous persecutions in order to force them to embrace Christianity. This statement has, however, no historical basis, as such action was contrary to the policy of Theodosius, who in 412 forbade the disturbance of Jewish services and the appropriation of Jewish synagogues (compare "Novellæ Theod." title iii.).

It was Justinian I. (527-565) who first interfered with the religious customs of the Jews, forbidding them to celebrate the Passover before the Christian Easter. It is said that during his reign the holy vessels of the Temple were brought by Belisarius to Constantinople; but on the remark of a Jew that they would bring misfortune to Constantinople as they had done to Rome and Carthage, they were returned to Jerusalem.

There are no records of the fate of the Jewish community of Constantinople during the reign of Heraclius I. (610-641), who, after he had massacred thousands of Jews in Palestine in the course of his war with the Persians, ordered the remainder throughout his empire to be baptized. It seems, however, that the Constantinople Jews found protectors in the persons of Heraclius' wife, the empress Martina, and her son Heracleonas; for the historian Nicephorus records that, emboldened by their influence, the Jews on one occasion stormed the Church of St. Sophia.

With the accession of the Iconoclasts the Jewish community of Constantinople, like those of the other cities of the Byzantine empire, underwent terrible persecutions. Indeed, during the reign of Leo the

The Iconoclasts. Isaurian—as well as later under Basil I.—it actually ceased to exist, the Jews having been forced either to emigrate or to embrace Christianity. But

the Byzantine capital, the greatest commercial center of that time, had such attractions for the Jews that the slightest relaxation in the persecutions brought thither masses of new settlers. No wonder, therefore, that it became the center of Judaism as soon as Leo VI. (886-911) had restored religious freedom to the Jews; although their social condition continued to be intolerable. Benjamin of Tudela, who visited Constantinople in 1176, gives the following account of the Jews there:

"No Jew dwells in the city, the Jews having been expelled beyond the one arm of the sea. They are shut in by the channel of Sophia on one side; and they can reach the city by water only, whenever they visit it for the purpose of trade. The number of Jews at Constantinople amounts to two thousand Rabbinites and five hundred Karaites, who live on one spot;

but a wall divides them. The principal Rabbinites, who are learned in the Law, are Rabbi R. Abatlion, R. Obadiah, R. Aaron Kustipo, R. Joseph Sargeno, and R. Eliakim the Elder. Many of the Jews are manufacturers of silk cloth; many others are merchants, some of them being extremely rich; but no Jew is allowed to ride upon a horse except R. Solomon

ha-Mizri, who is the king's physician, and by whose influence the Jews enjoy many advantages even in their state of oppression. This state is very burdensome to them; and the hatred against them is enhanced by the practise of the tanners, who pour out their filthy water in the streets and even before the very doors of the Jews, who, being thus defiled, become objects of hatred to the Greeks. Their yoke is severely felt by the Jews, both good and bad: they are exposed to beatings in the streets, and must submit to all sorts of harsh treatment. But the Jews are rich, good, benevolent, and religious men, who bear the misfortunes of exile with humility. The quarter inhabited by the Jews is called Pera."

The king referred to by Benjamin was Manuel Comnenus (1143-80), who—probably owing to the influence of Solomon ha-Mizri—placed the Jews of Constantinople again under the jurisdiction of the municipal authorities.

A new era for the Jewish community began with the fall of the Byzantine empire (May 29, 1453).

Mohammed the Conqueror (1451-81),

Under the Turks. on entering his new capital, granted to the Jews equal rights with all his non-Mussulman subjects, assigning to their chief rabbi a seat in the divan next to the spiritual chief of the Greek Church. Foreign Jews were invited to settle in the suburb of Haskeui, where building sites were gratuitously divided among the newcomers. Two Jews, Hakim Ya'akub and Moses Hamon, were elevated to high official positions: the former being appointed minister of finance; the latter, physician to the sovereign.

The sixteenth century was the golden age of the Jewish community of Constantinople. Sultan Bayazid II. (1481-1512) received the exiles of Spain; and these gave a great impulse to its material and intellectual life. Moreover, thousands of wealthy Maranos, who had been persecuted in Italy and Portugal, sought refuge in Constantinople, where they resumed their former religion. Among these were Joseph Nassi, created Duke of Naxos by Selim II. (1566-74), and Donna Gracia, his mother-in-law, both of whom liberally endowed the community with schools, charitable institutions, and synagogues. According to Stephan Gerlach ("Tagebuch," p. 90), the number of Maranos who settled in Constantinople up to 1574 amounted to 10,000, and the whole Jewish population numbered 30,000. There were 44 synagogues, representing as many separate congregations, each of which retained its own customs, rites, and liturgy.

Under Murad III. (1574-95) and Mohammed III. (1595-1603) many Constantinople Jews became very prominent in the politics of the Turkish empire. In addition to Joseph Nassi, Duke of Naxos, who held a high office, a physician named Solomon ben Nathan Ashkenazi, a native

Influential Jews. of Poland, held, about 1580, the office of ambassador at Venice. A Jewess named Esther Kiera, widow of Elijah Chendali, was powerful at court, being the favorite of the sultana Baffa, wife of Murad III. No less prosperous was the material condition of the community. The wholesale trade, customs dues, shipping, and coin-

age were mainly in Jewish hands. As Moses Almosnino relates in his description of Constantinople, Jews owned the largest houses, with gardens and kiosks equal to those of the grand viziers. Many easily earned a livelihood by teaching languages and by acting as interpreters, as is attested by Petrus della Valle, who himself learned foreign languages from a Jew at Constantinople ("Viaggi de Pietro della Valle," i. 71 *et seq.*).

An interruption of this happy state of the community took place in the seventeenth century. The ever-growing weakness of the sultans and the increase of the religious fanaticism of the Mussulmans made the Jews the prey of the soldiery, who often set fire to the Jewish quarters in order to plunder during the confusion. Another factor which contributed largely to the intellectual and material ruin

of the prosperous community was the **Shabbethai Zebi.** SHABBETHAI ZEBI agitation. The scenes of disorder of which Constanti-

nople became the theater during the pseudo-Messiah's stay in the city, alienated from the Jews the good will of the sultan, who saw in the movement not a purely religious manifestation, but a rebellion against his authority. Further, their affairs being neglected during the years of this Messianic chimera, the Jews were supplanted everywhere by the Greeks and Armenians; and they had neither the courage nor the power to regain their former position. All these causes combined to make the community a veritable type of the Turkish empire—without strength to live and without desire to die. Misery and ignorance went hand in hand, and annihilated all energy and enterprise in this once industrious and rich population. There were, indeed, from time to time some wealthy and influential families, such as the Agimans, the Gabbais, and the Carnionas, members of which held official positions; but the majority remained in the most abject destitution and ignorance.

An endeavor to raise the material and intellectual condition of the community was undertaken with some success in the second half of the nineteenth century, first by Albert COHN, who in 1854 founded at Constantinople a school patterned after European institutions, and then by the Alliance Israélite Universelle through the numerous institutions which it established there for the instruction of young people.

In 1853 two Jews of Constantinople, Behar Effendi Ashkenazi and David Effendi Cremona, were appointed by 'Abd al-'Aziz members of the council of state; and in 1876 both of them were nominated senators by Sultan 'Abd al-Hamid.

Persecutions contribute but little to poetry and learning; and during the Byzantine period Constantinople did not produce any noteworthy rabbinical scholars. The Karaites, however, displayed some

Literary Pro- ductions. scientific activity, and counted among their number prominent men like Judah ben Elijah Hadassi (1150), author of "Eshkol ha-Kofer"; Aaron ben Joseph ha-Rofe (1290), author of the "Kelil Yofi" and "Sefer ha-Mibhar"; Aaron ben Elijah of Nicomedia, author of "Ez Hayyim" (1346).

The security and prosperity enjoyed by the Jews under the first Turkish rulers brought about a great

scientific movement; and Constantinople became the focus of Jewish learning. Mohammed the Conqueror followed the custom established by his predecessors in nominating a ḥakam bashi, or grand rabbi, chosen from the Rabbinite Jews. Sambari (Neubauer, "Medieval Jewish Chronicles," i. 153) gives the names of the rabbis of Constantinople who officiated from 1453 to 1672 as follows:

Moses Capsali; Elijah Misrahi; Tam ben Yahya, author of "Ohole Tam"; Elijah Capsali, author of a historical work entitled "Debe Eliyahu"; Samuel Yafe, author of "Yefeh Toar," etc.; Samuel Saba; Joseph ibn Leb; Joshua Zonzin, author of "Naḥlah li-Yeboshu'a"; Hananiah ben Yaḥar;

Rabbis. Jehiel 'Anabi; Elijah ben Hayyim, author of "Torat Mosheh" and responsa; Moses Aruk;

Mordecai ha-Kohen; Gedaliah Hayyun; David ha-Kohen; Samuel di Curiel; Elijah ha-Levi; Abraham ibn Jamil; Gabriel Alia; Eliezer ben Naḥmias; Shemariah Sharbiḥ ha-Zahab; Hayyim Egozi; Abraham Monson; Isaac Ashkenazi; Jehiel Bassan; Joseph of Trani; Jeremiah Mabrogonato (מאברגונאט); Salomon Caro; Samuel ben Yisai (?) ; Yom-Tob ben Ya'ish; David Egozi; Abraham Allegre; Baruch ben Ya'ish; Baruch ben Hayyim; Judah Afna'im; Abraham Sharbiḥ ha-Zahab; Aaron Cupino; Hayyim Alfandari; Moses ben Shangi; Baruch Ashkenazi; Joseph ben Shangi; Isaac Ispania ha-Rofe; Zemah of Narbonne; Isaac Sasson; Moses Bassan; Elijah; Meir Isaac; Eliezer ben Shushin (שׁושׁין); Isalah of Trani; Joshua Benveniste; Hayyim Benveniste; Moses Benveniste; Yom-Tob ben Yaḥar; Joseph ha-Kohen Hasid; Hayyim Algazi; Moses Afna'im; Solomon ben Mubhar; Yom-Tob Birbinya; Aaron Hamon; Jehiel Bassan the Younger; Aaron Yizḥaki; Nissim Egozi; Abraham Ashkenazi; Meir de Boton; Samuel ha-Levi; and Samuel 'Adilah.

Besides these rabbis, many of whom were equally renowned for their great Talmudical knowledge and for their proficiency in the secular sciences, there were in the second half of the fifteenth century and during the sixteenth a succession of brilliant writers and scholars, such as Mordecai Comtino, Shabbethai ben Malkiel, Solomon Sharbiḥ Zahab, Joseph ibn Verga, and Moses Pizanto. The characteristic feature of that period was the scientific intercourse between the Karaites and the Rabbinites. In spite of some obscurantists, who attempted to interrupt these relations by excommunications and other violent measures, Rabbinite scholars instructed the Karaites in rabbinical literature and the secular sciences; and this circumstance had a salutary effect upon the Karaite community, which had hitherto been immersed in ignorance. A series of brilliant writers and scientists, such as the Bashyazis, Caleb Afendopolo, Abraham Bali, Moses Bagi, and Joseph Rabizi, arose within it and became illustrious in various branches of knowledge.

The impetus to learning was much furthered by the establishment in Constantinople of Hebrew printing-offices, the first of which was opened in 1503 by David Naḥmias and his son. In 1530 the renowned printer Gerson Soncino established another; and a third was opened in 1560 by the Ya'abez family. Authors who could not afford to publish their works found at Constantinople Mæcenates who were willing to defray the necessary expenses.

Printing-Offices. Thus Esther Kiera paid the cost of publication of the "Sefer ha-Yuhasin" of Zacuto in 1566; Nathan Ashkenazi, the son of the ambassador, published at his own expense the responsa of Moses Alshech. In 1579 the duchess Regina Nassi established a printing-office in her palace at Belvedere, where authors without means were sure of assistance. See CONSTANTINOPLE (TYPOGRAPHY).

The retrogression in the political and economic conditions of the community extended to the literary movement. After the Shabbethai Zebi agitation Constantinople ceased to be a focus of Jewish learning, and during the eighteenth and nineteenth centuries it could not boast of a single name of importance. The rabbis of this period were:

Abraham Rozanes (c. 1727); Samuel Moohas (1790); Abraham Levy (1835-36); Samuel Hayyim (1836-39); Moses Fresco, called "Rab ha-Zaken" (1839-41); Jacob Behar David (1841-54); Hayyim Cohen, called "Rab Cahana" (1854-60); Jacob Abigdor (1860-63); Yaḥir Geron, called "Rab Preciado" (1863-72); Moses Halevy (1872).

The leading rabbinical writers of this period were:

Abraham Soncino (1703); Eliezer ben Sanche (1720); Elijah Alfandari (1720); Tobias Cohen (1729); Jacob Kull (1733); Elijah Palombo (1804); Moses Fresco and Abraham Abigdor (1827); Raphael Shacky (1839); Jacob Rofe (1849); Solomon Kimhi (1862); Joseph Alfandari (1863); Hayyim Menahem Frangl and Hezekiah Medini (still living in 1902).

In 1853 Leo Hayyim de Castro founded the first Jewish periodical in Judæo-Spanish, entitled "Or Yisrael; ô La Luz de Israel," which was followed by "Jornal Israelit" (1860); "Sefat Emet, ô El Luzero" (1867); "Sharkiye" (The Orient), in Turkish, with Hebrew characters (1869); "El Tiempo" (1871); "El Sol" (1879); "El Radio de Luz" (1885); "El Amigo de la Familia" (1886); and "El Telegrafo." Of these papers two only are still in existence; viz., "El Telegrafo," a daily, and "El Tiempo," a biweekly.

There are about 55,000 Jews in a total population of 1,000,000, distributed in the following quarters: Haskeui, 20,000; Balata, 15,000; Ortakeui, 7,000; Kuskunjuk and Daghamam, near Scutari, 6,000; Pera and Galata, 5,000; Stambul, around the Sublime Porte, and Maḥmud Pasha, 1,000; various suburbs along the Bosphorus—Arnaut-Keui, Pasha Bagtche, and Buyukdere—300; Haidar Pasha and Kadi Keui, 700. Ritually they are divided into three classes; viz., Sephardim numbering 51,000; Ashkenazim, 3,000; and Karaites, 500.

In conformity with the "Constitution of the Jewish Nation" granted to them in 1865 by the Ottoman government, the Jews of Constanti-

Population and Constitution. nople are governed by a ḥakam bashi, or chief rabbi, and two assemblies, the civic communal council, Mejlis Jasmani, and the spiritual council, Mejlis Ruḥani, each council being elected for three years by an assembly of notables. The former numbers among its members the majority of the Jewish officials employed by the government; while the latter is composed exclusively of rabbis well versed in the Talmud. The Jewish settlement in each quarter has in addition a spiritual leader, who is consulted on all sorts of religious questions, and who presides at the administrative council of every synagogue. In every quarter there is a Jew bearing the title "Kehaya," whose duty it is to notify the city government

Rabbinical Courts. of Jewish births, deaths, and transfers of real estate. In the three populous suburbs of the city there are three rabbinical courts, which, however, decide only in divorce cases, all other legal matters being under the jurisdiction of the state. The rabbinical court of

Balata has at its disposal a prison called "Hakan Khane."

The annual budget of the consistory amounts to 111,692 francs, being revenue from the tax on meat, cheese, wine, brandy, and unleavened bread, from a poll-tax paid by the rich notables, and from taxes on marriage certificates, passports, and transfers of real estate.

There are in Constantinople 40 synagogues and 4 batte midrashim. None of the synagogues is very old, all having been burned down and rebuilt. Those of Istipol and of Galata seem to be the oldest. In 1453 the physician to Mohammed the Conqueror, Moses Hamon erected a house of prayer at Haskeui,

(1) The Society of Jewish Women of Pera and Galata, founded in 1893, to assist lying-in women, widows, the sick, and the poor; (2) Ahabat Hesed, founded by young men of Pera and Galata, to provide clothing for poor children of the Jewish schools; (3) Bruderverein, founded in 1875, to assist the poor and the sick of the Ashkenazic congregation; (4) Jungbundsverein, founded in 1897, to provide meals for poor children of the German Talmud Torah; (5) the Society of German Women, founded in 1897, to establish a hospital and to maintain an asylum for the aged; (6) the Society of Jewish Young Women of Pera, founded in 1894, to feed the poor pupils of the girls' school at Galata: it clothes 150 children every year, besides furnishing medicine and relief to the poorest; (7) the Society of Jewish Women of Haskeui, founded in 1895, to aid lying-in women; (8) Or ha-Hayyim of Balata, founded in 1885, to establish and maintain a Jewish hospital, which latter was inaugurated Sept. 1900 in a handsome new building on the

Benevolent Institutions.

THE JEWISH HOSPITAL AT CONSTANTINOPLE.

(From a photograph.)

and called it by his name, "Kahal Qadosh Hamon." Other synagogues, notably that of the Exile ("Gerush"), were built after 1492 by Spanish exiles and others.

The Alliance Israélite Universelle supports 11 schools at Constantinople: 6 for boys and 5 for girls, with a total attendance of 3,000. More than 1,000 children attend the Talmud Torah; and there are about 30 private schools. In 1898 a Jewish seminary was founded under the direction of Abraham Danon. Some young Jews attend the higher schools of the state, for the study of medicine, law, pharmacy, fine arts, agriculture, etc.

The community possesses the following twelve benevolent agencies:

shores of the Golden Horn; (9) Society Me'or ha-Hayyim of Haskeui, founded in 1895, to aid the poor and to provide pecuniary assistance to young men studying in the government colleges; (10) Society Z'ror ha-Hayyim of Haskeui, founded in 1896, for a similar purpose; (11) Society Ha-Hemlah of Balata, founded originally under the name "Ha-Tikvah," for mutual financial aid; (12) Society 'Ozer Dallim of Kuskunjuk, for the same purpose as the preceding. There is also a hebra kadisha in each quarter.

The majority of the Jews of Constantinople are poor, and are engaged in petty trade, in peddling, or as porters, fishermen, and boatmen. A small industry peculiar to the Jews is the cutting of cigarette-paper. Still, there are among them rich wholesale merchants and bankers of the second or third rank. A dozen Jewish banks are connected with

PAGE FROM MIDRASH TEHILLIM, PRINTED AT CONSTANTINOPLE, 1512.
(In the Columbia University Library, New York.)

the stock exchange of Galata. At Pera four or five large Jewish houses manufacture novelties known as "articles de Paris." The principal houses for ready-made clothing are conducted exclusively by Jews from Vienna. A Jew from Salonica named Modiano owns the glass-works at Pasha-Bagtche, the only one of its kind, which fur-

Present nishes glass to the whole of Turkey. **Conditions.** Many Jews (almost all the Karaites) are goldsmiths, jewelers, and money-changers. Through the Alliance Israélite Universelle, Jewish young men are taught various trades, as carpentry, turning, goldsmithery, cabinet-making, type-setting, upholstery, etc. But the Alliance prefers to have them employed as secretaries or accountants in European companies: banks (Ottoman Bank, Crédit Lyonnais), insurance societies, water-works, gas companies, wharves, etc.

A number of Jews are employed in the government offices. The first secretary of the Imperial Divan, who collects all the reports of the Turkish foreign ambassadors and translates them into Turkish, is the Jew David Molho Pasha. Elias Cohen (known as "Elias Pasha") is physician to the sultan.

Jews are found in the civil list of the ministry of public instruction and in consular offices. There are among the 55,000 Jews of the city 20 physicians, and as many druggists, all educated in the government schools, some of them having completed their studies at Paris, Berlin, and Vienna. See BYZANTINE EMPIRE.

—**Typography:** In the year 1503 David Nahmias, a descendant of an old Spanish family, established, in conjunction with his son Samuel, the first printing-office in Constantinople. According to Steinschneider, the first work published by the Nahmias firm was the *Tur*, of which edition only one copy, now in the Oppenheim collection (No. 521 F) in the Bodleian Library, is extant. At the death of David Nahmias in 1511, the press fell under the direction of Samuel, in conjunction with Astruc of Toulon and Judah ben Joseph Sasson. Together with Samuel Rikonim, Astruc of Toulon established, in the same year, an independent press, from which, however, the former withdrew two years later. Astruc continued the office until 1513.

In 1518 another printing-office, in existence only five years, was established by Solomon ben Mazzal-Tob. About the same time new presses were established by Joseph ben Ajid al-Kabizi, Yom-Tob Sichri ben Raphael, and Moses ben Samuel Facilino. In 1526 the well-known printer Gerson Soncino entered the field. After his death, in 1530, the business was continued by his son Eliezer until 1547, when it became the property of the physician Moses ben Eliezer Parnas, who held it until 1554. From 1560 typography in Constantinople began to decline; and

in the last years of that century there was no press in the city. Printing was then carried on at Belvedere, where the widow of Joseph, Duke of Naxos, had established presses. In 1593 these presses were transferred to Kura Chesme, a village near Constantinople. In 1639 printing was resumed in Constantinople by Solomon Franco and his son Abraham, which concern was still in existence at the end of the century. The leading printers of the eighteenth century (some books appearing at Ortaköi, a suburb) were Jona Ashkenazi (with Naphtali ben Azriel) and his son Nissim Ashkenazi. The following list of the principal publications issued during the sixteenth century will give some idea of the activity of the Constantinopolitan presses during that period. It should be remarked that several of the prints are without the printers' names, some without place of origin, and a few without either.

1503. Arba' Turim.
1505. I. Abravanel's "Rosh Amanah."
1505. Torah, Megillot, and Haftarat.

During the nineteenth century a few Hebrew books were printed at Ortakeui or Constantinople;

e.g., Abraham Abigdor's "Zeker le-Abraham" (1824), Isaac Farhi's "Marpe le-'Ezem" (1830), Abraham Zaki's "Shemen Rosh" (1839), and Joseph ha-Rofe's "Shemen ha-Tob" (1849). But a very large number of books in Judæo-Spanish, and not a few journals, have been issued, a list of the latter being given in the article CONSTANTINOPLE. Karaite books have been published in the nineteenth century by Irab Oglu & Sons.

CONSTANTINOV, VOLHYNIA. See STARO-KONSTANTINOV.

CONSTANZA (until 1878 **Custendje**): Rumanian town in the province of Dobrudja. During the Russo-Turkish campaign of 1828 some Jewish purveyors came with the Russian army to Constanza, and, settling in the place, formed the nucleus of a small community. A separate community was founded later by some members of the Sephardic (Spagnoli) communities of Asia Minor. In 1853, during the Russo-Turkish campaign, the community was further increased, and a cemetery was laid out. Sir Moses Montefiore, visiting Constanza on his journey to Jerusalem in 1868, gave £200 to the president, Ilie Avram, for the purpose of building a synagogue. At present (1902) there are about 1,000 Jews in Constanza; of this number about 400 persons are Sephardim (Spagnoli), and form a separate community. The majority of the Jews are engaged in trade, but there are also some tailors, shoemakers, tinkers, watchmakers, etc. There are two religious schools for boys, one Sephardic, conducted in Spanish, and the other where German is used. There are the usual philanthropic institutions. Aaron Leib Feigenbaum is rabbi of the Hobebe Ziiyyon, and Hayyim Solomon Donauefeld of the Bene Ziiyyon.

CONSTELLATIONS: Clusters of stars. The number of constellations named in the Biblical writings is small. In view of the extensive astronomical attainments of the Assyro-Babylonians, it is safe to predicate of the Hebrews larger knowledge of the starry heavens (compare Ps. viii.) than appears from references actually embodied in Biblical literature; and there is no necessity for accepting Stern's explanation that only such celestial bodies were regarded with interest by the Hebrews as were of importance for calendric purposes in ushering in the seasons (Stern, in Geiger's "Jüd. Zeit." iii. 258; Friedrich Delitzsch, "Hiob," p. 169; see also ASTRONOMY).

"Ash" or "Ayish" is mentioned twice in Job (ix. 9, xxxviii. 32, R. V.), and has been identified with the Great Bear, though this identification has been rejected by many Biblical scholars. The Arabs certainly knew this brilliant cluster of stars by the name of "Na'sh" (the Bier); and the three stars in the tail they designated as "Banat Na'sh" (the Daughters of the Bier); i.e., the "followers," an appellation still in vogue in modern Syria. A legend is connected therewith, according to which Gedi (the

pole-star) slew Na'sh, whose children now are intent upon avenging the murder; while "Suhail" (Canopus) would rush to the slayer's aid (Wetzstein, in Franz Delitzsch, "Hiob," 2d ed., p. 501). The assumed etymological affinity between "Ash" and "Na'sh" is more than doubtful. Still, in Job xxxviii. 32 the "children" are also introduced, while it would be strange if this most brilliant group were omitted from Job ix. 9.

The vocalization "Ayush" is proposed by Hoffmann (in Stade's "Zeitschrift," iii. 107); "Iyush," by Brown-Briggs (Genius, s.v.); and "Esch," by Friedrich Delitzsch (in "Hiob," xxxviii. 32), who previously identified it with "Moth," a star known as such to the Assyrians ("Assyr. Handwörterb." s.v. "sāsu"), but in his "Hiob," in ix. 9, translates by the German equivalent of "Great Bear." Luther renders "Wagen" (Wagon), and in this has been followed by Ideler ("Sternnamen," pp. 21 *et seq.*), Hirzel, Ewald, Franz Delitzsch, Hitzig; and R. V. Stern (l.c.) maintains that the Pleiades are meant—a view accepted by Schrader, Nöldeke (Schenkel's "Bibel-Lexikon," iv. 370), and G. Hoffmann (l.c.). Merx writes "Canopus," of the old versions, the LXX. in Job ix. 9 has Πλειάδες, and in *ib.* xxxviii. 32, Ἑσπερος. The Vulgate and A. V. in ix. 9 have "Arcturus," and "Vesperus" and "Arcturus" respectively in xxxviii. 32. Targum in the former verse gives the Hebrew word; in the latter renders by the Aramaic for "hen" (= Pleiades). The Syriac has "Iyuta" (= Aldabaran; see Merx, in xxxviii.) or the Hyades, which Jensen (l.c.) also suggests. Of this Syriac word, the Talmudical יוֹטָא (אֵלֶּס in some manuscripts), Ber. 58b, is the East Aramaic form. According to Levy, the latter is the seven-starred (Little) Bear;

"**Ash.**" but in the passage itself R. Judah explains it as the tail of the Ram, if not the head of the Wagon or, according to Rasht, of the Bull. Kohut ("Aruch Completum," s.v.) derives it, as Stern and others before him, from the Greek *Yádes*, and explains it as a cluster of seven stars in the head of Taurus. Of medieval Jewish commentators, Saadia identifies it with the Bear; ReDaK, again, in his dictionary, under עֵשׂ, explains it as תַּבַּל טַלֵּה as the tail of the Ram. Ibn Ezra merely states that עֵשׂ = "seven stars." Gersonides locates it as a constellation "within the sphere of the fixed stars."

What terrestrial being עֵשׂ is, is not known. Ewald thinks of the Arabic "ayyath" (lion), and says that the Hebrews called the group the "Lioness and Her Whelps."

Orion is undoubtedly designated by the Hebrew "Kesil" ("Fool"; see below) in Job ix. 9, xxxviii. 31; Amos v. 8; Isa. xlii. 10. Of the ancient versions, the LXX. has "Orion" in Job and Isaiah, while Targum and Peshitta render by "Giant." In this there is a reminiscence of an ancient, perhaps pre-Semitic, myth—also current in variants among the Greeks—concerning a giant bound to the sky, whom the Hebrews, with characteristic reflection upon his presumption to resist and defy heavenly power, labeled "Fool." Nimrod was associated with this "Fool" by later folk-lore. The question in Job about loosening the bands (xxxviii. 31) has reference to this, and not, as Dillmann contends (commentary, *ad loc.*), to the rise and fall of the stars according as the "rope with which they are drawn" is tightened or slackened.

The Jewish medieval commentators hold the "Kesil" to have been either the Arabic "Suhail" (= Canopus) or Sirius. On the plural, in Isa. xlii. 10, see Jensen, l.c. (note also his suggestion that "Kesil" is a generic name for "comet").

"Kimah" (Job ix. 9, xxxviii. 31; Amos v. 8) is the "Hen" (Luther) with her brood. Etymologically, the name signifies "a heap," and is thus very appropriately descriptive of the cluster, now known as the Pleiades, in the zodiacal sign of the Bull.

Stern (l.c.) argues that "Kimah" is Sirius. In the Talmud occurs this statement: "But for the heat of Kesil, the world could not endure, on account of the excessive cold of the Pleiades, and vice versa" (Ber. 59a; B. M. 106b). "Kimah" is

Pleiades. qualified as a planet (מַזְלָה; Ber. 58a); the etymology מַזְלָה כּוֹכָבִים = is, of course, fanciful. The setting of the Pleiades is said to have been the cause of the Flood (Yer. Ta'an. i. 64a, at foot). According to Abu al-Walid, "Kimah" is the Arabic "Al-Thurayya" (= Pleiades). Ibn Ezra reports that his predecessors held it to be a group of seven stars in the tail of the Ram, but he believes it to be a single star, "the left eye of Taurus."

In Job xxxviii. 31 A. V. occurs the puzzling phrase "the sweet influences of Pleiades" (R. V. "cluster of the Pleiades"; margin, "chain"); מַעֲרֹנוֹת, as shown by the parallelism with the "bands of Orion," and the expression "canst thou bind," is a transposition of מַעֲרֹנוֹת ("chains" or "fetters"). Some mythological allusion is probably hidden in the expression.

Kimhi's explanation, that the reference is to the ripening of the fruit ("Kesil"), or the reverse ("Kimah"), is plainly too rationalistic, notwithstanding the Talmudic authority he quotes or the opinion of his father (under מַעֲרֹנוֹת).

What "Mazzarot" (Job xxxviii. 32) may be is still unsettled. Perhaps it is identical with "Mazzalot" (II Kings xxiii. 5). If so, it might designate Saturn or the seven planets. Stern (l.c.) would have this strange expression denote the Hyades. Ewald, for the passage in Job, claims the reference to be to the Northern and Southern Crowns, corresponding to the "chambers of the South" ("Teman") in Job ix. 9. Others have suggested the constellation of the Southern Ship, characterized in an Arabic translation as the "heart of the South"; others again suggest Sirius. Friedrich Delitzsch leaves the problem open, simply transliterating the Hebrew (see his "Hiob," p. 169, note to verses 31 *et seq.*). It has also been held to designate the Zodiac.

According to Schrader (Schenkel, "Bibel-Lexikon," v. 398), the constellation of the Dragon is mentioned in Job xxii. 13 (R. V. "swift serpent"); but this is very problematic. Winckler has suggested to read for "Nadgalot"; in Cant. iv. 4, 10, "Nergalot"; i.e., the Twins (Gemini; see "Altorientalische Forschungen," i. 293).

CONSTITUTION. See GOVERNMENT.

CONSUMPTION (TUBERCULOSIS): An infectious disease, due to the entrance of the tubercle bacillus into the body. The question of the relative infrequency of consumption among Jews has engaged much attention among physicians and anthropologists. It is well known that dwellers in large cities, particularly those living in crowded and insufficiently ventilated tenement-houses, are generally the first victims of the tubercle bacillus. Tailoring and other sedentary occupations that are favored by Jews tend to raise the percentage of tuberculous patients. Consanguineous marriages, common among Jews, are also a predisposing cause of this disease.

Accordingly, the Jews, particularly those residing in the congested tenement districts of large modern cities, like New York, London, Vienna, Odessa, etc., suffer from this disease more than others. In fact, the appearance of many a modern Jew would immediately lead one to suspect the presence of tuberculosis. He is more stunted in growth than almost any other European. According to the statistics given by Jacobs (see AN-

THROPOLOGY), "the average height of the Jews is 162.1 cm. [5 ft. 3 in.]; span of arms, 169.1 cm. [5 ft. 6½ in.]; and girth around the chest, about 81 cm. [31.9 in.]: so that they are the shortest and narrowest of Europeans." The exceptionally narrow girth of Jews gives them what is technically known as the lowest "index of vitality." The Jews are also town-dwellers; four-fifths of the Jewish populations live in large towns, while only one-third of the non-Jewish populations live in cities.

All these conditions, added to their poverty, constant grief, anxiety, and mental exertion, besides the ceaseless persecutions to which they are subjected, tend to make them ready victims to tuberculosis; and when Jacobs attempted to collect statistics on the subject in 1885 ("Racial Characteristics of Modern Jews," in "Journal of the Anthropological Institute," 1885, xv. 23-62) he found only two favorable reports—one by Lombroso in regard to the Jews in Verona, showing a mortality from consumption of 6 per cent as against 7 per cent among Catholics; and the other by Glatzer, from a Hungarian district, giving 14.4 per cent for Jews as against 16.9 per cent among Magyars, 16.4 per cent among Slavs and 19.5 per cent among Servians, but as against only 13.5 per cent among Germans. On the other hand, Jacobs has found in London no less than 13.1 per cent among Jews, against 11.3 per cent for the whole Whitechapel district. He further quotes Pruner to show that consumption is very prevalent among the Jews in Egypt, as it is in Algeria, according to Haspel and others, and in South Russia, according to Tchubinsky, etc.

More recent statistics on the subject, however do not bear out the contention that the Jews are more liable to consumption than non-Jews.

In the Russian Army. Thus, in a paper on consumption in the Russian army, Shtchepotyeff ("Vratch," 1900, viii. 232) states that among a certain number of soldiers, composed of 88.82 per cent Christians, 5.79 per cent Mohammedans, and 5.03 per cent Jews, the percentage of consumption was 88.89 for Christians (527 cases), 7.21 for Mohammedans (37 cases), and 3.98 for Jews (21 cases).

In the evidence taken before a commission in Victoria, Dr. MacLaurin stated that among the Jews of New South Wales, numbering 4,000, and dwelling mostly in towns, but one death from consumption had occurred in three years; whereas, if the disease had been as prevalent among them as among the rest of the population, 13 or 14 would have succumbed. Dr. Behrend says that their "comparative immunity from the tubercular diathesis has been recognized by all physicians whose special experience entitles them to express an opinion"; and it is the more remarkable when the adverse conditions under which the vast majority live are taken into consideration.

Drs. Loane, Gibbon, and Drysdale, medical officers of health in some of the poorest quarters of London, where the bulk of the Hebrew population dwell, have repeatedly commented upon this fact in their official reports. In May, 1897, the Jewish Board of Guardians in London appointed a committee to inquire into the increasing prevalence of con-

sumption among the Jewish poor, with a particular view to the adoption of suitable prophylactic measures. The committee in its re-

In London. port arrived at the unexpected conclusion that during the preceding fifteen years there had been no increase in the prevalence of consumption among the Jewish poor, allowance being made for the growth of the Jewish population of the East End of London ("British Medical Journal," July 2, 1898). Dr. Gaster, basing his opinion on the burial returns of the United Synagogue from 1889 to 1893 as compared with those of the registrar-general, states that among the Jews in London there are relatively only about one-half as many cases of consumption as among the non-Jews.

Drs. Tostivint and Remlinger, who have lately investigated the subject in Tunis, state that during the four years 1895-99 the Jews of Tunis lost 2,744 by death, of whom only 34, or 1.24 per 1,000, died from tuberculosis. They further calculate that the average annual mortality from tuberculosis between the years 1894 and 1900 was:

Mussulman Arabs.....	11.30 per 1,000
Europeans.....	5.13 " "
Jews.....	0.75 " "

In the United States, Dr. Bowditch was the first to call attention to the fact that the Jews are less susceptible to tuberculosis than other races. Dr. John S. Billings, in his "Reports on Vital Statistics of the Eleventh Census of the United States," has again drawn attention to this curious fact. He has conclusively shown that the death-rate from consumption per 1,000 deaths among Jews was 36.67 for males and 34.02 for females; while that of the United States (1880) was 108.79 for males and 146.12 for females, and that of Massachusetts

In the United States. (1888) was 129.22 for males and 146.97 for females. Again, in his "Report on Vital Statistics of New York and Brooklyn," Billings has shown (see table below) that in 1890 the mortality from tuberculosis among the Russians and Poles of New York city, who are mostly Jews, was lower than that among any other race.

TABLE SHOWING THE DEATH-RATE FROM CONSUMPTION PER 100,000 POPULATION IN NEW YORK AND BROOKLYN DURING THE SIX YEARS ENDING MAY 31, 1890.

"From these figures," says the census report, "it appears that consumption was most fatal among the

colored, the Irish, and the Bohemians, and least fatal among the Russians and Hungarians; that is to say, among the Jews."

These statistics were objected to by some, on the ground that many of those registered by the census officials as Russians or as Poles, were not Jews, but Catholics. In order to test the validity of the figures, Dr. Maurice Fishberg has collected statistics of the mortality from consumption in the New York ghetto. By computing the mortality from this disease in each ward, approximately correct figures were easily obtained. The reports of the board of health of New York show that during the three years 1897, 1898, and 1899 there occurred 119,226 deaths from all causes, and of these, in the boroughs of Manhattan and the Bronx, 15,038 were due to tuberculosis. Of these the proportion for each of the wards in the section of the city below Fourteenth street is indicated in the accompanying map.

The average mortality from tuberculosis in the seventh, tenth, eleventh, and thirteenth wards (the Jewish wards) was 162.99 per 100,000 population for the three years 1897, 1898, 1899, while the average for Manhattan and the Bronx was 268.19; while in Manhattan and the Bronx during these three years the deaths

Map of New York City South of Fourteenth Street, Showing Average Death-Rates Due to Consumption, During 1897-99.

due to tuberculosis amounted proportionately to 126 per 1,000 deaths; as is shown by the figures recorded above, in the four Jewish districts referred to the total number of deaths from tuberculosis was 1,419—that is, 99 per 1,000 deaths.

Consumption is undoubtedly on the increase among the poorer classes of Jews living in New York city. Dr. Lee K. Frankel, manager of the United Hebrew Charities, has shown that while in 1895 the ratio of consumptive applicants for relief was 2 per cent, in 1899 it reached 3 per cent, an appalling increase of 50 per cent in four years. Frankel also shows that

consumption among the Jews in New York is almost wholly confined to the poorer classes, and that foreign-born Jews who suffer from this disease have contracted it after their arrival in the United States. He bases his deduction on an examination of 10,000

death certificates in the office of the New York City Board of Health, beginning with Jan. 1, 1900. In 888 of these the cause of death was stated to be tuberculosis, 72 relating to Jews. Recalling the fact that the Jewish population of New York city is estimated to be at least 15 per cent of the total population, it will be found from Frankel's figures that if consumption were as prevalent among the Jews as among the general population, the number of deaths due to this cause would have been 133. As it is, only 72 were recorded—a little over one-half the rate for the city at large. It is also to be noted that of these 72 cases, 39 died in tenement-houses, 23 in institutions, and only 1 in a private house. This tends to show that the well-to-do Jews are even less liable to consumption than the

unfortunate poor, who are huddled together in congested tenements, in poverty and in want, and are exposed in every possible way to infection.

For this comparative immunity of the Jews from tuberculosis different causes have been assigned. Lombroso attributes it to the fact that the Jews are usually engaged in occupations which require no exposure to the vicissitudes of the weather, this conclusion being strengthened by the fact that other pulmonary diseases, particularly

pneumonia, are also infrequent among them, their lungs being consequently in a condition to resist infection by tubercle bacilli. Tostivint

Causes of and Remlinger do not think it likely **Relative** that ethnic differences afford the explanation. Nor are they able to discover the reason in deficient nourishment, lack of clothing, etc. The poor Jews in Tunis occupy a portion of the town in common with the Mussulmans; while the few rich Jews live in the European quarter. There is, however, one cause which has been selected as affording a probable explanation. Jews abhor the dusting-brush. They wipe all dusty surfaces with damp cloths, in some instances several times daily. By this means less dust is raised, and the risk of inhaling air laden with tubercle bacilli is lessened. Moreover, the Tunisian Jews use less furniture than their

French and Italian neighbors, and the opportunities for the settlement of dust are correspondingly diminished.

Behrend, with many others, is of the opinion that the relative immunity of the Jews is due to the careful inspection of their meat, examination being made particularly as to disease of the lungs and pleura, and bovine tuberculosis being thereby intercepted. More frequent house-cleaning is another reason given. Of all the causes assigned, however, the most probable are the careful selection of carcasses in Jewish slaughter-houses and the infrequency of alcoholism among Jews. It has been repeatedly shown that the flesh of tuberculous cattle sold for food is responsible for many cases of tuberculosis, and the rigid inspection of meat practised by the Jews has, therefore, the effect of checking to a very great extent the ravages of the disease.

In regard to the infrequency of alcoholism among Jews (see ALCOHOLISM), it may be said that the deleterious effects of alcohol as a predisposing cause of consumption are now recognized by all authorities. Alcohol lowers the vitality of the tissues of the body, and thus enables tubercle bacilli to develop more readily.

In view of what has been said on the infrequency of consumption among the Jews, the conclusion that their comparative immunity from the disease is not due to any racial characteristic of a purely physiological nature, but to kasher meat and the non-abuse of alcohol, may be considered as established.

CONTEMPT OF COURT: Disrespectful demeanor before, or disobedience of, a public authority. Courts of justice must be treated with respect, and their orders must be obeyed; therefore they have in all countries the power to punish acts of disrespect, and to enforce their orders by punishing disobedience.

The judges may punish any disrespect, or any annoyance of their messenger while he is in the exercise of his office (Kid. 12b), by infliction of stripes or by the lesser excommunication (M. K. 16a). When the disrespect is shown to the judges, the guilty party is subject to the law against insults to the learned (Shulhan 'Aruk, Yoreh De'ah, 342). But the service of a process of contempt for disobedience to the court's orders, and as a means of enforcing obedience, is the more important branch of the subject. An offender is not warned; he is bidden to appear and submit to the court. If he does not he is guilty of disobedience; he has violated a high duty; and so, when the court's messenger reports that he summoned the defendant, and that he refused to appear, the court puts him under the lesser ban (שמתא or נרף). But if the defendant, being summoned, simply does not appear on the day set for hearing, the ban is pronounced on the day following (B. K. 112b, 113a). The defendant is in

contempt, and can clear himself only by submitting to the jurisdiction of the court and paying the cost of the writ of excommunication.

The notion arose as early as the tenth or eleventh century (see historic examples in Bloch, "Die Civilprozess-Ordnung," p. 27) that the court might bring the pressure of the community to bear on the renitent by suspending public worship in the synagogue which he attended, at first on work-days only, and then, this step being insufficient, on Sabbaths also.

After judgment rendered, if the condemned does not obtain a stay of proceedings, or show by oath his inability to pay, and no property of his is in sight, though the judges feel assured of his ability to pay, some maintain that a process of contempt in the shape of imprisonment can be awarded (Isserles' gloss to Hoshen Mishpat, 97, 15; see Ket. 86a). If he declares that he will not obey, he should be put under the lesser ban at once; if he still fails to comply with the judgment, he must first be warned, and may then be put under the ban; and if he remains obdurate for thirty days, he is then subject to the greater excommunication ("herem"—see Hoshen Mishpat, 19, 8; Sanh. 25, 11).

Although it is the duty of those who know disputed facts to come forward and testify (Lev. v. 1), yet rabbinical jurisprudence has not provided a writ to call for the attendance of witnesses at the instance of a litigant, like the subpoena of English and American law. Hence the process of contempt most frequent under that law, the attachment against the body of a witness who fails to appear when called, is not known to the Jewish codes.

L. N. D.

CONTRACT: In law a formal agreement recognized as constituting an obligation to do or not to do a particular thing. Both Bible (Prov. vi. 1-5; perhaps also Deut. xxiii. 23 and Ps. xv. 4) and Mishnah (B. M. iv. 2) attach great sacredness to a promise, and rebuke a breach of promise, even where the courts of law can not enforce its observance. From the above-cited passage in Proverbs and from other passages in the same book, it seems that at one time "striking hands" over a promise, like the "Handschlag" in German law, gave special force in the courts to a promise or contract. In the Talmud this ceremony carries only a moral or religious sanction. There is no one word, either in Bible or in Mishnah, which, like the Latin "contractus" or "pactum," or the English "contract," covers all agreements from which a liability or change of rights may arise. Different kinds of

Contract by Deed. contracts, whether executed or executory, are denoted by their own special names. As to some of these the

article on DEED may be consulted; in which article it also appears that greater force is given to a contract by the formality of drawing it up in writing and by having it attested by two competent witnesses. In the article ALIENATION AND ACQUISITION it has been shown that the executed contract of sale, conveyance, or gift can take effect only by the actual delivery of an article, and not by the assent of the parties alone.

An undertaking, in the course of judicial proceedings, to pay a stated sum—for instance, an undertaking by a friend of the defendant to become surety for him in order to postpone execution on a judgment—has in all respects the same force as an attested bond (this doctrine is deduced by the codifiers from Mish. B. B. x. 8; see references in "Be'er ha-Golah" to Shulhan 'Aruk, Hoshen Mishpat, 129, 6); just as in common law a recognizance in court becomes a "debt by specialty" as much as a bond under seal.

The law, written or oral, has established certain rules which govern the ordinary relations of life and the contracts growing out of them; such as the relations between the owner and bailor, and the bailee or keeper of goods (see BAILMENTS). In most cases it is competent for the parties to change the implied rules by express contract. He who exacts or stipulates for such special terms is called "matneh" (מתנה), and while the Mishnah

Revocation (B. M. vii. 11) lays down the rule, by "Whoever stipulates against what is

Contract. written in the Torah finds his terms void," this is but one of those opinions of R. Meir which form the undistinguished text of the Mishnah, but are not always good law; while, according to the Gemara (B. M. 94a), the opinion of his contemporary, R. Judah ben 'Illai, prevailed; viz., that in mere matters of money, stipulations contrary to the Torah were admissible. In the case of marriage it seems that all are agreed that a stipulation not to pay the wife the minimum of a jointure in case of the husband's death, or of divorce, being altogether contrary to the policy of the Law and to the dignity of the daughters of Israel, must be deemed void as well as immoral (see KETUBAH). A contract for the payment to a fellow Jew of interest on a loan is, of course, void; for the Mosaic law forbids by its own terms the debtor's promise as well as the creditor's exaction of interest. For like reasons, it seems that an agreement to keep alive a debt (at least one arising from a loan) beyond the year of release would have been deemed ineffectual but for Hillel's institution ("takkanah") of the PROSBUL.

The rule as to conditions precedent, found in the same section of the Mishnah, has, at the end of the article on ALIENATION, been explained by a quotation from Maimonides applicable to cases where the

fulfilment of the condition is to lead to the transfer of property. The Shulhan 'Aruk (Hoshen Mishpat, 207, 11, **Con-
ditional
Contracts.** 12) shows how in other cases promises to take effect upon the fulfilment of a future condition are ineffectual, even where the promisor, to give effect to his promise concerning a bond or deed, puts it into the hands of a trustee ("shalish"). It seems to have been the policy of the sages to exclude everything like complication in contractual dealings between man and man.

Under the Jewish law an executory contract had to rest upon a consideration; but this need not go to the personal benefit of the obligor. There is a consideration for the promise of the surety, in a loan or forbearance given to the principal debtor, provided the surety binds himself at the time the

debtor receives the benefit (see DEED, referring to B. B. x. 8); while a subsequent promise by the surety would be without consideration (see ASMAKTA).

But while, generally speaking, a consideration is necessary to support a promise, a person may, with his eyes open, bind himself by bond, or by a promise in the presence of witnesses, to pay to another a sum of money, though he does not owe him anything whatever, just as he may make to another a deed of gift of land; which principle is derived from B. B. 149a, "to acquire by acknowledgment," and from Ket. 101b (see Maimonides, "Yad," Mekirah, xi.; also Shulhan 'Aruk, Hoshen Mishpat, 40). But where the bond or promise is made under a mistaken belief by the obligor that he owes, or is liable for, the sum named (see, for an illustration, Hoshen Mishpat, 126, 3), such bond or promise may be avoided upon a showing of the true facts and of the mistake committed, just as a mistaken purchase may be set aside. For, as at common law "fraud vitiates everything," so, to a great extent, does mistake.

Where a contract is made on a Sabbath or a day of festival, although the parties should be punished for breaking the custom which forbids trading on the Sabbath and on festivals, yet the contract is good; for the act giving effect to it,

**Date of
Contract.** such as the handling or moving of a bought chattel, or occupancy of a bought parcel of land by the purchaser, is not generally a breach of the Sabbath under the Mosaic law; and, after the day closes, the contract may be reduced to writing (Mekirah, xxx. 7; Hoshen Mishpat, 235, 28).

For different kinds of contracts see ALIENATION AND ACQUISITION; BAILMENTS; BROKER; DEED; LOANS; MASTER AND SERVANT; SURETYSHIP.

CONVERSION TO CHRISTIANITY:

Conversion is the Biblical term for the turning of the sinner from his evil ways to God (השׁוּבָה). "Sinners shall be converted unto thee" (Ps. li. 13; compare Isa. i. 27, and Jer. iii. 12, 14, 22, where the A. V. has "return"; Ecclus. [Sirach] v. 7, xvii. 24-26, xviii. 13, xlix. 2). There can be no conversion without change of heart and conduct; that is, repentance of sins committed (Deut. xxx. 2; Isa. lv. 7; Jer. xxiv. 7; Ezek. xviii. 27 *et seq.*; Joel ii. 13; see REPENTANCE).

Conversion of the heathen nations to a belief in God is one of the fundamental Messianic expectations (Isa. lxvi. 19-23; Zeph. iii. 9; Zech. xiv. 9), and it is based upon the conception of an original revelation of God common to all men, wherefore heathen sinners are also expected to repent and turn to God (Jonah iii. 3; Sibyllines i. 129, iv. 169). For the sake of converting the heathen, idolatry was denounced by the seer of the Exile (Isa. xli.-xlv.), and individual heathens were in fact won over (Isa. lvi. 6). The whole Hellenistic propagandist literature, foremost in which are the Sibylline Books,

had the conversion of the Gentiles for its object, though its intention was to make them rather observers of the Noachidic laws, which

Conversion included the worship of God as the **Only One**, than members of the Abrahamic covenant; that is, full proselytes. A prayer for the conversion of the heathen is offered at the close of every service in the synagogue (see *ALENU*). In pre-Christian times very determined efforts were made toward proselytizing the heathens (see Matt. xxiii. 15: "Ye compass sea and land to make one proselyte"; compare Gen. R. xxviii. and Cant. R. i. 14: "The annual conversion of one heathen saves the whole pagan world"); but as soon as the Church took up the task, following the methods of Paul, who was eager to let "the fulness of the Gentiles come in" (Rom. xi. 25), the zeal of the Jews diminished, and "the conversion of the Gentiles," which "caused great joy unto all the brethren" (Acts xv. 8), became obnoxious to the Synagogue (Yeb. 47b; see PROSELYTES AND PROSELYTISM).

No sooner had the Roman world been conquered by the Church than the conversion of the Jews became its ever present aim, much against the intention of the founder of Christianity (Matt. x. 6); and henceforth conversion assumed a new meaning.

It was no longer a return to God in **Conversion** repentance, but the adoption of a new **of** faith—not always from inner conviction, but under the influence of a ruling and threatening outward power. No **the Jews.** barbarity seemed too cruel to be used as a means of enforcing the conversion of the Jews (see the letter of Bishop Severus concerning the Jews of Magona [island of Minorca], in Grätz, "Gesch." 3d ed., iv. 363; compare v. 47, 49, etc.), although Pope Gregory I. (*ib.* v. 41), Bernard of Clairvaux (*ib.* vi. 151), and other prelates deprecated such measures (see Ersch and Gruber, "Encyc." section ii., pp. 57, 62, 68, 77, 124, 151 *et seq.*, 221 *et seq.*, 230 *et seq.*). Even when, for the sake of keeping up the semblance of conversion by arguments, "disputations" were held between Jews and Christians in the presence of potentates, prelates, and the people, the defeat of the Jews was a foregone conclusion, and renewed persecution the unfailing sequel. Strangely enough, Jewish apostates acted as the most unscrupulous defamers of Judaism with the view of converting their former brethren (see APOSTASY). The conversion of the Jews formed at all times an object of ambition of the Roman pontiffs, who compelled the Jews to attend at least once a year the Catholic service, for the purpose of listening to a conversionistic appeal. This practise was also followed in England, where the legal enactment forbidding Jews to disinherit their baptized children (see DISABILITIES) was enforced. In 1550 Pope Paul III. founded an institute for the conversion of Jews. England had its Hospital of Converts and House of Converts in London and Oxford as early as the thirteenth century (see "Missionen unter den Juden," in Herzog-Hauck, "Real-Encyc." 2d ed.).

As to the results of such efforts Luther's utterance is characteristic: "It is as easy to convert Jews

as to convert the devil himself" (quoted by Heman in "Missionen," in Herzog-Hauck, *ib.*). More typical is the story related of Everard, a

Futility of highly respected Christian convert **Con-** of the thirteenth century (see Brisch, **versionism.** "Gesch. der Juden in Cöln und Umgebung," i. 76 *et seq.*). After having led a secluded life as canon of the Church of St. Andrew in Cologne, he refused to take the sacraments in his dying hour, but gave orders to have a dog, a cat, a hare, and a mouse—animals which he had for years kept penned up in his courtyard—brought before him in the presence of all his friends; no sooner were they let loose than the dog seized the hare and the cat the mouse. "Behold," he then said to his assembled friends, "these four animals, which have never seen one another before, but have always been kept apart, acted simply in obedience to the instincts of their nature. Yet as little as the dog will ever cease running after the hare, and the cat after the mouse, so little will the Jew ever become a true Christian." Soon after, he breathed his last.

For medieval conversions to Christianity see APOSTASY AND APOSTATES.

The modern era of culture and reason greatly changed the attitude of the Christian toward the Jew. No longer did the broad-minded Jewish man of affairs, such as the Spanish period produced, look down with disdain upon his intellec-

Modern tually inferior Christian antagonist. **Con-** The breadth of view and the larger **versionism.** knowledge were now on the side of the Christian, while in the narrow

ghetto the mind of the Jew had become cramped, and his whole life and thought were circumscribed by the Talmud. It was frequently from sincere pity that Christian statesmen and religious leaders looked for the day when, as the Church believed, "the veil of Moses" would be taken from the Jewish people, so that they should no longer appear "as a mere wreck and ruin of the past, a mummy preserved by the centuries only to testify to the living truths of Christianity." Their conversion was one of the motives which led men like Cromwell (Grätz, "Gesch." x. 104; Blunt, "Status of the Jews in England," p. 30) and Vane (see O. S. Straus, "Roger Williams," p. 172) to grant liberty and civil rights to the Jews. Others, again, were moved by the same motives to oppose such concessions (see "Juden-Emancipation," in Ersch and Gruber, "Encyc.").

In his turn the Jew came to regard Christianity in a different light, especially where a return to the simple teachings of the New Testament became the aim of many Christians, and where the growth of friendly relations disclosed to both Jew and Christian the fact that they had many more interests to unite them than differences to keep them apart. To Jews ambitious to obtain worldly success, the temptation came in many forms to remove the barrier of creed by a few drops from the baptismal font, willingly bestowed by the ruling Church; and many a descendant of Abraham, eager to eat of the fruit from the tree of modern knowledge, forbidden to him in the ghetto, was perplexed by the question whether he might not don the garb of Christianity in order to participate in its culture. The Protes-

tant Church was quick to perceive her opportunity, and organized her efforts toward the conversion of the Jews, being in many countries supported by the government in its dealing with the Jews as citizens. Still the spirit of loyalty held the Jew within the fold, and only a few, and those rarely of the best elements, yielded to such influences.

Strange to say, Great Britain, with her liberal policy toward the Jews, presented at the close of the eighteenth century the first large list of secessions from the Jewish camp. The descendants of those who bravely resisted the storms of persecution in Spain were ready, when the sun of prosperity smiled on them, to sacrifice the pride of their ancestral heritage to the blandishments of fortune and fame offered to the converts (see J. Picciotto, "Sketches of Anglo-Jewish History," pp. 196 *et seq.*, and CONVERTS, MODERN).

In America, too, the same fate befell a number of Jewish families scattered throughout the country. Without organization and the strength of conviction, they were lost in the various churches; only occasionally features and names betray their Jewish origin (see "Publications Am. Jewish Hist. Soc." i. 98, ii. 91, iv. 197; Kohut, "Ezra Stiles and the Jews," pp. 37-49, 85, 111; Wise, "Reminiscences," pp. 62-70, 272; Lowell, in "Atlantic Monthly," Jan., 1897; Kohler, in "American Hebrew," Jan., 1892).

The first attempt to organize the work of converting the Jews was made in Holland at the synods of Dordrecht, Delft, and Leyden (1676-78). The example was followed in other Protestant countries. In Hamburg Esdras Edzard, a disciple of John Buxtorf, founded an institute for the con-

Christian version of the Jews, and the munici-
Missions to pal laws of Hamburg, which forced
Jews. the children of the Jews to attend the
Christian schools, greatly aided him

in obtaining converts. In Hesse-Darmstadt, where the Jews in the sixteenth century were, as elsewhere, compelled to attend the church once a year to listen to conversionist addresses, there existed also an institute for the conversion of the Jews. In 1736, "400 erring sheep were admitted into the Christian fold, and 600 impostors were refused admission," naively says the official record (see Herzog-Hauck, *ib.*). The next to take up the work of converting the Jews were the Moravian brethren in the middle of the eighteenth century, and the Pietists of Halle, whence the Callenberg Institute (1728-92) sent forth its missionaries over the world. But all these efforts were of little avail. Lavater's attempt to convert Mendelssohn showed the futility of such endeavors (see MENDELSSOHN, MOSES).

The tidal wave of cosmopolitan enlightenment achieved for the Church more than all her conversionists could. Captivated by the lib-

Con-eral thought of the age which beheld
versions in creeds the work of priestcraft and
from superstition, the upper classes of Jews
Worldly in Germany, Austria, and France
Motives. gradually broke away from their ancestral religion, which appeared to them as a shackle and a misfortune, and felt no scruple in taking a step which was the only means of freeing the Jew in the eyes of the Christian world

from the yoke and the shame of centuries. Not from conviction, but attracted by the hope of brilliant careers or grand alliances, hundreds of Jewish families in Berlin, Vienna, Königsberg, and elsewhere joined the Church, "fluttering like moths around the flame until they were consumed" (Grätz, "Gesch." xi. 155 *et seq.*).

As Grätz correctly states, aversion to the Christian dogma and a profound attachment to the home life and the traditions of the past kept the majority from following the example. Only one power could really stem the evil of apostasy, and this Grätz ignores—the inner reform of Judaism which would again imbue the Jew with self-respect while disclosing to him his historical mission in the world (see Holdheim, "Gesch. der Entstehung der Jüdischen Reformgemeinde Berlin," pp. 33, 251, Berlin, 1857). The first attempt made by Zunz and his friends failed, and the consequence was despair and new conversions; *e.g.*, that of Eduard Gans, Heine, and others (Grätz, "Gesch." xi. 403 *et seq.*). And when at last a maturer stage was attained by the leaders of REFORM, and measures were proposed to improve the religious and social life of the Jew, the governments interfered, preventing and prohibiting, as far as they could, reforms, in order to force the Jew to seek salvation in the arms of the Church. In fact, government and Church, press and people, conspired to render the life of the Jew as miserable as possible, a continual martyrdom, while the strong conviction which produced martyrs in former ages was lacking. And as if to deprive the Jew of every spark of self-respecting manhood, it was made part of the Pharaonic system to declare the Jewish persuasion to be a disqualification for governmental offices and posts of honor in civic life or in the army, and at the same time to bribe Jewish men of letters and learning by offering them promotion in case they would change their faith.

To this was added another factor opening a new field of promise to converts. Inspired undoubtedly by a genuine love for the Jewish nation (see WAX, LEWIS), "societies for the promotion of Christianity among the Jews" were started at the beginning of the nineteenth century in Great Britain, and spread under various names over the whole earth, sending forth missionaries and publishing tracts, books, and periodicals at an immense cost with the sole purpose of converting the Jews. Insignificant as the results were compared with the amount of labor and money spent by these societies, they have in the opinion of unbiased observers, Jews and Christians (see the opinions of the latter in Brann's "Jahrbuch," 1895, pp. 28-36), done great harm in endeavoring to uproot the faith of a race admired for its steadfast loyalty, and to alienate children from their parents and from domestic traditions which formed the basic element of their morality. Their main acquisitions seem to be the numerous converts in their employ, to whom they chiefly owe their success, if not existence, all of whom might have done far nobler work for the elevation of the Jewish race, had they been encouraged to strive for Judaism rather than against it. No reflection upon their sincerity of conviction or of purpose is necessary. That which offends the Jew in these conversionist efforts is that a premium

should be put on an act of disloyalty as if it were a meritorious one (see Felsenthal, "Zur Kritik des Christlichen Missionswesens," Chicago, 1869; N. Samter, "Judentaufen im Neunzehnten Jahrhundert," in Brann's "Jahrbuch," 1895, pp. 9-48, where the literature is also given; "Missionen," in Herzog-Hauck, *ib.*; De Le Roi, "Gesch. der Evangelischen Judenmission, i. and ii., 1899).

As regards the number of converts, De Le Roi, in his work on missions, has estimated that they run to something like 204,540 during the nineteenth century. Of these, 72,240 have transferred their allegiance to Protestantism, 57,300 to Roman Catholicism, and 74,500 to the Greek Church in Russia (but see CONVERTS TO CHRISTIANITY, MODERN). The exact numbers for the latter country are only known from 1836 to 1897, when they ran up to 58,502, which did not include conversions to Roman Catholicism and Protestantism in that country. Naturally, conversions occur most frequently during periods of persecution; thus while in Prussia between 1872 and 1879 the average was only 65 per annum, in 1888, at the height of the anti-Semitic movement, the number was 348. In the year 1897 they sank to 299. Similarly in Vienna during the seventies the average was only 40 per annum, whereas in 1896 457 were converted, and 468 in 1898 ("Statist. Jahrb. für Wien," p. 346). According to the "Oesterreichische Wochenschrift," Nov. 21, 1902, the figures were: in 1898, 472; in 1899, 565; in 1900, 627; in 1901, 615; and up to Nov., 1902, 555 converts. In the whole of Hungary in 1897 only 220 were converted ("Magyar Statist. Evkönyv," iv. 435). The number of working agents employed by the English and Scottish societies in 1877 was 220, costing £670,000 ("Israel's Watchman," April, 1877, p. 55).

The number of conversions reached their height at the close of the nineteenth century, when under the watchword of anti-Semitism all the medieval fury of Jew-hatred was revived, and the Jews of continental Europe were made to feel that, in spite of their full and hearty participation in the political life and intellectual progress of their country, they were yet regarded and treated as aliens. Having in their worldly pursuits allowed their religious sentiment to fall to the freezing-point, and finding themselves disappointed in all their aims and aspirations, many wealthy Jewish families took that step which opened to them the door of admission into the highest circles. It must be left to the moralist to decide whether conversions caused by mere worldly motives benefit or demoralize society. It must be left to the statesman to decide whether in thus forcing Jewish elements to amalgamate with non-Jewish under the thin cover of a formal profession of creed, anti-Semitism does not rather defeat its own ends. From the Jewish point of view the law of natural selection, which is ever at work weeding out the weaker elements and allowing only those to survive that have the power of resistance, has been fitting the Jew for his highest task even in this crisis, just as Isaiah saw it in the vision of the tree reduced to a "tenth" by storm and fire (vii. 13).

The Berlin Society for Promoting Christianity Among the Jews spent more than 117,152 reichsthaler

upon the conversion of 461 Jews during the fifty years of its existence (W. Zichte, "Fünfzig Jahre der Judenmission," Berlin, 1872), while the London Society paid between the years 1863 and 1894 from £600 to £3,000 for the conversion of a single Jew ("Saat auf Hoffnung," 1863, iii. 16; "Friedensbote," 1871, p. 149; "Jeshurun," 1895, p. 274).

The policy of the Roman Catholic Church, though formally prohibiting forcible conversion (Decretals, c. 5, D. 45), has always been to facilitate conversion as much as possible, even when the subject was not of an age to appreciate the gravity of the act. The age did not seem to have been settled till a decision was passed by the Holy Congregation of the Curia (June 16, 1809), which fixed it at seven years. Besides this, children, if in danger of dying or if one of the parents had been converted to Catholicism, might be baptized against the will or without the knowledge of their parents. On Oct. 22, 1587, the Roman Curia decided that a Jewish child, when baptized even against the canonical law, must be brought up under Christian influence. A special house for converts was created at Rome (see CATECHUMENS, HOUSE OF), and many Jewish children were immured in it up to 1858, when the case of Edgar MORTARA drew the attention of the whole of Europe to the method of Roman Catholic propagandism as directed against the Jews at Rome. See also COEN, JOSEF DI MICHELE.

The converts also seem to be destined to do work, though involuntarily, for Judaism. Whatever of mental vigor there is in an offspring of the Jewish race, whatever spark from the fire of Sinai still burns in a descendant of the house of Israel, he can not help, even though he stray far away from his Jewish cradle, contributing a share of the Jewish

spirit to the upbuilding of the divine kingdom of truth and righteousness in the larger world which he has entered.

Converts. Just as it was the religious genius of the Jew that made Saul of Tarsus the great missionary for the heathen, so did the Oriental imagery of Benjamin Disraeli, and the wit and ardent love of liberty of Heine and Börne, carry Jewish elements into the life and literature of the English and the German peoples. To the cosmopolitan character of modern art, literature, and philosophy, Jews, even under the guise of a Christian confession, have contributed very essentially. It is the cosmopolitan idea of humanity which even the disjoined and disloyal members of the Jewish race are bound to proclaim.

Most modern converts, unlike the apostates of former centuries, have retained in their heart of hearts love for the faith and the history of their nation, and in critical hours many have stepped forth in its defense. They are, in the terminology of the Rabbis, **טומרים להיחבן** ("such as apostatized for personal motives"), but not **להכעיס** ("such as apostatized to provoke the wrath of Heaven by any malice of their own") (see 'Ab. Zarah 26a). K.

CONVERSION TO JUDAISM. See PROSELYTE AND PROSELYTISM.

CONVERTS TO CHRISTIANITY, MOD-

ERN: The number of post-Mendelssohnian Jews who abandoned their ancestral faith is very large. According to Heman in Herzog-Hauck, "Real-Encyc." (x. 114), the number of converts during the nineteenth century exceeded 100,000; Salmon, in his "Handbuch der Mission" (1893, p. 48), claims 130,000; others ("Divre Emeth," 1880, p. 47; 1883, p. 187) claim as many as 250,000. For Russia alone 40,000 are claimed as having been converted from 1836 to 1875 ("Missionsblatt des Rheinisch-Westphälischen Vereins für Israel," 1878, p. 122); while for England, up to 1875, the estimate is 50,000 (De Le Roi, "Die Evangelische Christenheit und die Juden," iii. 60).

Modern conversions mainly occurred en masse and at critical periods. In England there was a large secession when the chief Sephardic families, the Bernals, Furtados, Ricardos, Disraelis, Ximenes, Lopez's, Uzzielis, and others, joined the Church (see Picciotto, "Sketches of Anglo-Jewish History"). Germany had three of these periods. The Mendelssohnian era was marked by numerous conversions. In 1811 David Friedländer handed Prussian State Chancellor Hardenberg a list of thirty-two Jewish families and eighteen unmarried Jews who had recently abandoned their ancestral faith (Geiger, "Vor Hundert Jahren," Brunswick, 1899). In the reign of Frederick William III. about 2,200 Jews were baptized (1822-40), most of these being residents of the larger cities. The third and longest period of secession was the anti-Semitic, beginning with the year 1880. During this time the other German states, besides Austria and France, had an equal share in the number of those who obtained high stations and large revenues as the price for renouncing Judaism. The following is a list of the more prominent modern converts, the rarity of French names in which is probably due to the fact that conversion was not necessary to a public career in that country. The names of living converts are not included.

Abrahamson, A. (1754-1811), German stamp-cutter.
Assing, David (1787-1842), German physician and poet.
Bach, Friedrich Daniel (1756-1830), German painter.
Bartholdy, Jacob (1779-1825), Prussian diplomatist.
Benary, Franz Friedrich (1805-60), German philologist.
Benary, Karl Albert (1807-60), German classical scholar.
Bendemann, Eduard (1811-45), German painter.
Benedict, Sir Julius (1804-85), English composer.
Benfey, Theodor (1809-81), German philologist.
Bernays, Michael (1834-97), professor of literature at Munich.
Bernhard, Max Adolf (1799-1866), German professor of music.
Bernhardy, Gottfried (1800-75), German philologist of Halle.
Bloch, Moritz (Ballagi) (1815-91), Hungarian professor of ecclesiastical history.
Börne, Ludwig (1786-1837), German political writer.
Braham, John (1774-1856), English composer and singer.
Breidenbach, Moritz Aug. Wil. (1796-1856), German lawyer.
Büdinger, Max (1823-1902), professor of history at Vienna.
Capadose, Abraham (1795-1874), Dutch physician and writer.
Caspari, Karl Paul (1814-92), professor of theology at Christiania.
Cassel, Paulus (1821-92), German writer and preacher.
Cerf, Karl Fr. (1782-1845), German theatrical manager, of Berlin.
Cohn, Ludwig (1834-71), German historian.
Cohnheim, Julius (1839-84), German pathologist.
Costa, Isaac da (1798-1860), Dutch historian.
Creizenach, Theodor (1818-77), German professor of literature.
Csémegi, Karl (1826-99), president, Hungarian supreme court.
David, Christian Georg Nathan (1793-1874), professor of jurisprudence at Copenhagen.
David, Ferdinand (1810-73), German virtuoso and composer.
Dessoir, Ludwig (1810-74), actor at Berlin.

Detnold or Detmond, John (1807-56), German statesman.
Disraeli, Benjamin (Lord Beaconsfield) (1804-81), British statesman and writer.
Dittl, Leopold, Ritter von (1815-98), Austrian surgeon.
Drach, David Paul (1791-1865), librarian of the Propaganda in Rome.
Ebert, Georg (1812-84), professor of jurisprudence, Breslau.
Edersheim (1825-89), English theologian and writer.
Ewald, F. C. (d. 1874), German divine.
Feinberg, Oscar (1844), artist of Mitau, Courland.
Felix, Rachel (1820-58), French actress.
Fould, Achille (1800-67), French minister of finance.
Fraknoi, Wilhelm (1843), Hungarian bishop; president of Hungarian Academy of Science.
Friedberg, Emil Albert von (1837), German professor.
Friedberg, Heinrich von (1813-95), Prussian minister of justice.
Friedenthal, Rudolf (1827-90), German deputy.
Friedländer, Ludwig (1824), German professor of archeology.
Friedländer, Ludwig Herman (1790-1851), German professor.
Friedländer, Max (1829-72), German-Austrian journalist.
Gans, Eduard (1798-1839), professor of jurisprudence, Berlin.
Goldschmidt, Hermann (1802-66), German astronomer.
Güterbock, Karl Eduard (1830), German professor.
Hahn, Elkan Markus (1781-1860), professor of philology.
Heine, Heinrich (1799-1856), German poet.
Henle, Friedrich Gustav Jacob (1809-85), German anatomist, Göttingen.
Henschel, A. U., professor of botany (1824-37), Breslau.
Herz, Henrietta (1764-1803), German authoress.
Hiller, Ferdinand von (1811-86), German musical composer.
Hirsch, Siegfried (1810-60), professor of history, Halle.
Hirsch, Theodor (1806-81), professor of history, Greifswald.
Jacobi, K. G. (1804-57), professor of mathematics, Berlin.
Jacobsohn, Heinrich (1826-90), professor of medicine, Berlin.
Jacobsohn, Ludwig (1766-1842), professor of medicine, Königsberg.
Jacoby, Heinrich Otto (1815-64), professor of Greek, Königsberg.
Jaffe, Philip (1819-70), professor of history, Berlin.
Joachimstadt, Ferdinand (1816-61), professor of mathematics.
Josephsohn, Jacob (b. 1818), Swedish musical composer.
Kalisch, David (1820-72), German dramatist.
Kalkar, Christian (1803-86), Danish writer and divine.
Klein, J. L. (1810-76), German litterateur.
Kossmann, Heinrich (1813-86), mathematician.
Kronecker, L. (1823), German mathematician.
Lebert, Hermann (1813-78), professor of medicine, Breslau.
Lehrs, Karl (1802-78), professor of Greek.
Lehrs, Siegfried, philologist.
Lessmann, Daniel (1794-1831), German writer.
Levin, Rahel, German social leader.
Lewald, Fanny (1811-89), German authoress.
Lopez, Sir Menasseh (1831), English judge; M.P.
Magnus, Eduard (1799-1872), professor of arts, Berlin.
Magnus, Heinrich Gustav (1802-70), professor of chemistry.
Magnus, Ludwig Immanuel, mathematician, Berlin.
Margollouth, Moses (1818-81), Jewish historian.
Marx, Karl (1818-83), German socialist.
Mayer, Solomon (1797-1862), German professor of law.
Meier, Moritz Her. Ed., professor of philosophy, Halle.
Mendelssohn, Dorothea (1769-1839), German social leader.
Mendelssohn-Bartholdy, Felix (1809-47), German composer.
Montefiore, Lydia (baptized 1858), aunt of Sir Moses Montefiore.
Neander, Johann August Wilhelm (1789-1850), professor of ecclesiastical history, Berlin.
Neumann, Karl Fred. (1793-1870), German Orientalist.
l'algrave, Sir Francis Cohen (1788-1861), historian.
Philippi, Fr. Ad. (1809-82), professor of theology, Dorpat.
Ponte, Lorenzo da (1749-1839), writer and composer.
Ricardo, David (1772-1823), political economist.
Rosenbalm, Johann Georg (1816-87), professor of mathematics.
Rubino, Joseph Karl (b. 1799), professor of history, Marburg.
Rubinstein, Anton G. (1829-89), Russian musician.
Samuda, Joseph d'Aguilar (1813-85), English shipbuilder and Member of Parliament.
Simson, Martin Eduard von (1810), lawyer; president of German Parliament; leader of the conservative party.
Spiegelberg, Otto (1830-81), professor of medicine, Breslau.
Stahl, Fried. (1802-61), professor of jurisprudence.
Stronsberg, Bethels Henry (1823-84), German financier.
Wolfers, Jacob Philip (1803), professor of astronomy.
Wolff, Oskar Ludwig (1799-1851), German professor of literature.
Wolff, Joseph (1795-1862), traveler.
Ximenes, Sir Moses (1762), English high sheriff.

CONVICTS. See CRIME.

COOKERY.—Biblical Data: The preparation of the meal was in ancient times a very simple process. The principal articles of diet were bread and milk, to which were added, as supplementary dishes, fruits and vegetables (compare BAKING and MILK). Meat was eaten only on festivals; and many vegetables, such as cucumbers, garlic, leek, onions, etc., were eaten raw. Lentils (Gen. xxv. 29; II Sam. xvii. 28) or greens (II Kings iv. 38 *et seq.*) were boiled in either water or oil. Fruit was often dried and compressed into solid, cake-like masses, making raisin-cake, fig-cake, etc. (I Sam. xxv. 18, xxx. 12; II Sam. xvi. 1, etc.; compare the "kamr al-din," or flat cake of compressed apricots, still popular among the Syrians); and a kind of sirup, or HONEY ("debash") was sometimes extracted from it. A kind of porridge was made from corn by adding water, salt, and butter ("arisah," probably the "arsan" of the Talmud, which was a paste prepared of crushed and malted grain); and from this many kinds of cakes were made with oil and fruits (II Sam. xiii. 6 *et seq.*; Num xi. 8; Ex. xxix. 2, etc.; see the importance of these cakes in later sacrificial ceremonies, as mentioned, for example, in Lev. ii.).

Meat, in ancient times, was usually boiled, and was consequently thus served at the table of YHWH (Judges vi. 19; I Sam. ii. 15). The sauce in which it was cooked was also relished ("marak," Judges vi. 19; perhaps also "merkahah," Ezek. xxiv. 10). That the custom of boiling a young lamb or a kid in milk—still prevalent among the Arabs—existed among the ancient Hebrews, is proved by the prohibition of the custom in Ex. xxiii. 19. The word בָּשָׂל, which may also signify "roasting," is usually applied to cooking in the sense of "boiling." It is reported of the wicked sons of Eli that they preferred roasted to boiled meat (I Sam. ii. 15). The meat of the Passover lamb was usually roasted; and indeed the custom of roasting ("zalah") became ever more prevalent. As among all the nations of antiquity, it was effected at the open fire, either by placing the meat directly upon the coals (compare the roasting of the fish mentioned in John xxi. 9), or by using a spit or grate, which appurtenances, though not specifically mentioned in the Old Testament, may reasonably be supposed to have been employed. Even in Genesis (xxvii. 6 *et seq.*) it is stated that Rebekah could prepare the flesh of a kid so that it tasted like venison; and from this statement a certain degree of

culinary skill may be inferred. The progress of civilization, bringing about increased importation of provisions, materially contributed to the refinement of the culinary art among the Hebrews (compare Food).

E. G. H.

I. BE.

—**Modern Jewish:** It is not surprising that Jewish cookery possesses characteristics of its own which differentiate it from ordinary cookery. The dietary and ceremonial laws to which orthodox Jews conform have naturally evolved a particular kind of culinary art. The institution of the Passover, the distinction between permitted and forbidden foods, the regulations as to butter and meat, and the custom of abstaining from meat at certain seasons, have all contributed to make Jewish cookery distinctive. But the preparation of food for the table is a matter which will always be influenced by local conditions. Every country and district has its favorite dishes, largely dependent upon its particular food products.

Hence, Jews have carried with them, wherever they have wandered, the styles of cookery prevailing in the countries from which they have migrated. Thus in England old-fashioned Jews, who retain the customs of the ghetto, are comparative strangers to the plain English roast, boiled, and grilled meats, preferring the more savory dishes of the Continent. From Spain and Portugal they

have derived, along with their fondness for olives, their custom of frying fish and other foods in oil. From Germany they have taken the habit of sour-stewing and sweet-stewing meats. To Holland they owe a taste for pickled cucumbers and herrings, and from the same country come such Jewish dainties as butter cakes and "bolas" (jam-rolls). From Poland, on the other hand, Jewish immigrants have brought into their new homes "lokschen" or "frimzel" soup (cooked with goose fat), stuffed fish, and various kinds of stewed fish. In this way almost all varieties of Jewish cookery are reproduced in an English form, to which this article is mainly confined.

Another influence has to be noted. The stringency of the dietary laws has combined with the peculiar domesticity of Jewish life to make cooking the special business of Jewish wives and daughters. It has thus been raised to the character of a fine art, even among the humblest classes. In the ghettos of Jewry no housewife would think of relegating the preparation of meals to a servant. Only by attending to them herself can she satisfy her conscience

(After Lepsius, "Denkmäler.")

that such ritual requirements as the "kashering" of meat, the keeping apart of butter and meat, and the separation of "hallah" (the bread-offering) have been duly complied with. The kitchen has, therefore, always been regarded among orthodox Jews as the chief province of a Jewish housewife, and to her supremacy in this region the Scriptural words "The king's daughter is all glorious within" (Ps. xlv. 13) have not inaptly been applied. In times gone by, especially when the facilities of travel were few, the male members of a Jewish family whose vocations took them away from home would be exposed to many privations. Thus the responsibilities of Jewish housewives would be heightened. They would exercise their ingenuity to the utmost so that on the return of the breadwinners their hardships might be forgotten in the enjoyment of appetizing dishes. The influence of the dietary laws and ceremonial customs on Jewish cookery can be further traced in the details of the kitchen.

The institution of the Passover, with its commandment to abstain during the festival from eating leavened bread, has had the natural effect of developing special kinds and methods of cooking appropriate to that period. The unleavened

Passover Cookery. bread is not merely a staple article of food, but an ingredient of almost every Passover dish. "Mazzah klös" (dumpling) soup takes the place of lokshen for this week, and an immense variety of sweet cakes and puddings, manufactured from ground mazzah meal, replaces the confectionery and pastries of ordinary occasions. Fish, instead of being fried in a batter, is cooked with meal. An excellent flour can be made of potatoes, and Jewish cooks make use of it for pastries during Passover. All dishes which can be made from eggs are in special request, and this accounts for the popularity of almond pudding as a Jewish delicacy. Jews are also debarred during Passover from drinking malt liquor, which has to be replaced by such beverages as sassafras and lemonade.

From very early times, as far back even as their sojourn in Egypt (Num. xi. 5), Jews have shown a strong liking for fish, and have developed special skill in its preparation.

Fish. There are many reasons for this preference: (1) The necessity of abstaining from meat not killed according to Jewish law makes them particularly dependent upon fish. (2) It is not regarded as meat, and can therefore be eaten in conjunction with butter. (3) There are seasons, such as the "Nine Days," when strict Jews abstain from meat altogether. (4) The eating of fish has always been associated with the celebration of the Sabbath. From no orthodox table is fish absent at one or more of the Sabbath meals, however difficult it may be to procure. In inland countries like Poland, Jews are limited to fresh-water fish.

There are several distinctively Jewish modes of preparing fish, and English Jews have paid special attention to their practise. Anglo-Jewish methods of cooking fish were first introduced by Portuguese Jews, and copied by German Jews. Their favorite fish is salmon, which is either fried, white-stewed, or brown-stewed. Fish, white-stewed, with lemon

and bread balls, is a specifically Jewish preparation, typical of their fondness for piquant stews in preference to the plain preparation common in non-Jewish families. Smoked salmon is another Jewish delicacy, and this, together with pickled herrings, pickled (yellow) cucumbers, and olives, is often to be seen on Jewish tables as appetizing adjuncts to fried fish.

The principal concern in the preparation of food for a Jewish table is compliance with the ritual requirements for KASHER meat. Orthodox

Preparation of Meat; Butter and Meat. Jews will not partake of meat unless, in addition to having been killed in accordance with rabbinical law, it has been entirely drained of blood. Therefore, before being cooked, it needs to be steeped in water for half an hour.

On being taken out it is laid on a perforated board, sprinkled lightly with salt, and left for one hour. At the end of this time the salt is washed off (see MELIHAN). Meat may not be cooked with butter or milk. Oil, and certain portions of the fat of clean animals (the שומן or kosher fat, as distinguished from the חלב, or terefah fat), are the only fats that may be used. So far as cookery is concerned, the distinction between butter and meat necessitates the use of a double set of utensils. Some Jews have two kitchens, one for meat and one for butter; and two separate dressers are common. Jewish cooks are debarred from using butter in pastries, which are to be eaten in conjunction with meats, and from using milk or cream under the same circumstances. For butter, melted fat must be substituted, while cream may be imitated in a variety of ways. One reason why almond pudding is a favorite in Anglo-Jewish households is that it does not require either meat or butter, and can therefore be eaten at any meal.

Notice must be taken of the special preparations made for the Sabbath. The Sabbath dish par excellence is the "kugel." Orthodox

Sabbath Preparation. Jews not being permitted to cook on the Sabbath, their ingenuity has been much taxed to provide hot food for the day of rest. In the height of summer, cold meats are acceptable enough. The difficulty is to provide hot dishes in winter, and it has been overcome by the preparation of a dish known as "kugel." It consists, generally, of meat stewed with peas and beans, and placed in the oven before Sabbath. The fire having been made up, and the oven firmly closed, the dish requires no further attention, and will retain its heat until it is wanted for the Sabbath midday meal. The term "shalet" (see "sholent" in the article COOKERY IN EASTERN EUROPE) is used in some parts of Europe to designate what has just been described as kugel, while "kugel" is used as the name of a variety of shalet containing much fat; in other parts (e.g., Bavaria) "shalet" is used of a sort of baked pudding; e.g., mazzah, apple, nudel, or almond shalet. The form "shulet" also occurs, as in Bohemia, to indicate the "gesetztes essen" called "kugel" in the beginning of this paragraph. "Shalet" is explained by some authorities as a corruption of the German "schul ende," that being the name of a pudding which is prepared on Friday, to be ready when Sab-

bath morning or afternoon service is over. Others derive it from *שול* ("that which remains [in the oven] overnight"), the final "t" being the German ending. The real derivation is probably from the Old French "chauld" (warm). The prohibition against cooking on Sabbath explains why fried fish, being primarily a Sabbath dish, is eaten by Jews cold, whereas other people eat it hot. Stewed fish is, of course, also eaten cold.

A prominent feature of Sabbath cookery is the preparation of twists of bread, which are known as "hallahs" or, as in southern Germany, Austria, and Hungary, as "barches." They are often covered with seeds to represent manna, which fell in a double portion on the sixth day. One other item remaining to be mentioned is raisin wine. Jews are required to offer over a cup of wine the Sabbath prayer for the sanctification of food. But in many countries wine is too expensive a luxury for the majority of Jewish families. A cheap preparation, made of boiled raisins, is therefore substituted, which, though it is far from resembling wine, satisfies all the requirements of the ritual.

—**In Eastern Europe:** Most of the dishes cooked by the Jews in eastern Europe are akin to those of the nations among whom they dwell. Thus the *kasha* and *blintzes* of the Russian Jews, the *mamaliga* of the Rumanians, the *paprika* of the Hungarians, are dishes adopted by the Jews from their Gentile neighbors. Only on religious and ceremonial occasions do they cook peculiarly Jewish dishes.

The food prepared on Friday for the Sabbath is called *sholent* (the Russian equivalent of "shalet"). The most popular form of *sholent* is made of potatoes placed in the pot with meat, fat, and water. The potatoes appear on the table on Saturday glistening with fat, and are of a dark, brownish color. Some even consider them not alone palatable, but an excellent remedy for various ills. The commonest form of *sholent* is the *kugel*, a kind of pudding made of almost any article of food; the *magen-kugel* and the *lokshen-kugel* are two favorite varieties. The former consists of an animal's stomach filled with flour, fat, and chopped meat, peppered and salted to taste. The latter is made of *lokshen*; often raisins and spices are added. It is cut as ordinary pudding. Other *kugels* are compounded of rice, potatoes, carrots, etc. *Lokshen* consists of flour and eggs made into dough, rolled into sheets, and then cut into long strips. Macaroni is an excellent substitute for it. Cut into small squares, these strips are called "farfil." They are usually boiled and served with soup. On the day preceding Tish'ah Be'ab, *milchige lokshen* is eaten. This is ordinary *lokshen* boiled in milk.

Zimes, or compote, consists generally of cooked fruits, such as plums (flaumen *zimes*), or of veg-

etables, well spiced. The most popular vegetable is the carrot (*mehren zimes*), which is cleaned and cut into small slices, and boiled in water for about three hours. The water is then poured off and mixed with flour, sugar, and cinnamon. The carrot is then replaced, a fat piece of meat, preferably from the breast, added, and the concoction is again cooked for two or three hours. Turnips are also extensively used for *zimes*, particularly in Lithuania. In southern Russia, Galicia, and Rumania *zimes* is made of pears, apples, figs, prunes, etc. It is then somewhat like a compound of stewed fruits.

Another dish for Saturday is called *petshai* in Lithuania, *drelies* in South Russia, Galicia, and Rumania. This consists of cow's or calf's leg prepared in a special manner. The hair is burned off, and the leg is then thoroughly cleaned, and cut into pieces of a convenient size. These are placed in a pot with water, and pepper, salt, and onions are added. Then it is placed in the oven just as are the other *sholent* dishes. When it is removed from the oven on Saturday morning, it is either served hot, or it is distributed in plates, hard-boiled eggs being sliced into it, and it is put in a cool place. When served in the evening for "shalesh se'udot," it is a semi-solid mass, in which the meat is embedded. *Drelies* is made by adding soft-boiled eggs and also some vinegar as soon as it is removed from the oven, when it is served hot.

Soups are naturally the great standby of the poor. The best known of these is the *krupnik*, made of oatmeal, potatoes, and fat. This is the staple food of the poor students of the yeshibot; in richer families meat is added to this soup.

Kreplech or **krepchen** is another dish peculiar to eastern European Jews. It is prepared in the following manner: Flour and eggs are mixed into a dough. This is rolled into sheets and cut into three-inch squares. On each square of dough is placed fine-chopped meat, to which salt, pepper, and onions are added. The edges of the rolled dough are then brought together and well pasted. This is then placed in a soup previously prepared for the purpose. This *kreplech* is eaten at least three times a year by every pious Jew—on Purim, on the day preceding the Day of Atonement, and on Hosha'na Rabbah. On occasions when meat is not eaten, chopped cheese is placed inside the *kreplech*.

At weddings "golden" soup is always served. The only reason for its name is probably the yellow circular pieces of chicken fat floating on its surface.

The preparations of fish made by the eastern European Jews are famous even among the Gentiles, the most popular being the *gefillte* (filled fish). This is prepared thus: After undergoing the usual processes of cleaning and washing, the fish is cut into two or three parts. The bones are then taken out, the skin is removed, and the meat is chopped fine, eggs, salt, pepper, and onions being added. This mass is then replaced in the skin, dropped into boiling water, and cooked for about three hours.

B. FR.

Besides the very popular dish of groats called

krupnik, and many other grit soups, which are also common among non-Jews, there are still a number of soups which are more or less characteristically Jewish. The soup into which "kneidlach" (= "knoedel," dumplings) are put, is the dish used most often on Saturdays, holidays, and other special occasions, particularly at Passover, when it corresponds to the "mazzah kloes" of western Europe. The expression "Me meint nit di Haggadah nor di kneidlach" (It is not the Haggadah that we like so much as the dumplings) owes its origin to the great favor this

soup has attained among the Jews of eastern Europe. The kneidlach in most cases are made by grinding mazzahs into flour, and adding eggs, water, melted fat, pepper, and salt. This mixture is then rolled into balls about one and one-half inches in diameter. The kneidlach are then put into the soup, and it is ready to be served about half an hour after. Often the kneidlach are fried in fat and served apart from the soup. Another kind of kneidlach, made from mashed potatoes put into warm milk, forms a well-liked soup among Lithuanian Jews. The village folk of some parts of eastern Europe have still another form of soup, which is made by putting crisp "beigel" (round cracknel) into hot water and adding butter. Because of its nutritious qualities it is called **michyeh**, a corruption of the Hebrew word "mihyah" (*i.e.*, food κατ' ἐξοχήν; compare the Latin "victus"). There are, however, a number of soups in the preparation of which neither meat nor even fat is used. Such soups form the food of the poor classes. An expression current among Jews of eastern Europe, "soup mit nisht" (soup with nothing), owes its origin to dissatisfaction with soups of this kind.

There are a number of sour soups, called **borshtsh**, the most popular of which is the "kraut," or cabbage, borshtsh, which is made by cooking together cabbage, meat, bones, onions, raisins, sour salts, sugar, and sometimes tomatoes. Before serving, the yolks of eggs are mixed with the borshtsh. This last process is called "farweissen" (to make white). Borshtsh is also made from the beet-root and "rossel" (the juice derived from the beet).

Gebrattens (roasted meat), chopped meat, and **essig fleish** (vinegar meat) are the favorite forms in which meats are prepared. The essig or, as it is sometimes called, "honnig," or "sauer fleish," is made by adding to meat which has been partially roasted some fish-cake, sugar, bay-leaves, English pepper, raisins, sour salts, and a little vinegar.

Fat of cattle, because of its cheapness, is used in the preparation of a great number of dishes. The fat of geese and chickens is used only on special occasions, but is kept in readiness for use when needed. Fat, being used so freely during Passover, is prepared in quantities long before that feast, in many cases as early as Hannukah (in December).

Gribenes, or "scraps," form one of the best liked foods among the Jews of eastern Europe. It is eaten especially on the Feast of Hannukah. So much do the Jews share in the belief "that there is no flavor comparable with the tawny and well-watched scraps," that it is often suggested as an inducement to friends to make a visit.

IV—17

Jews of eastern Europe bake both black ("proster," or "ordinary") bread and white bread, or **hallah**. Of great interest are the various forms into which these breads are made; for while the black bread is usually circular in form, the shapes in which hallah is baked vary as the different holidays pass by. The most common form of the hallahs is the twist ("koilitch" or "kidke"). The koilitch is oval in form, and about one and a half feet in length. On special occasions, such as weddings, the koilitch is increased to a length of about two and a half feet. Some are made in miniature for the small boys, as an inducement to say the "kiddush" (bread benediction) which is required on Friday night.

The dough of hallah is often shaped into forms having symbolical meanings; thus on New-Year rings and coins are imitated, indicating "May the new year be as round

Bread and Cakes. and complete as these"; for Yom Kippur (Day of Atonement) the hallah, which on that occasion is circular, carries a

piece of dough in imitation of a dove, the significance being "May our sins be carried away by the dove." Hallah is also baked in the form of a ladder for Yom Kippur, expressing thereby the desire, "May our prayers climb up to heaven"; for Hoshana Rabbah, bread is baked in the form of a key, meaning "May the door of heaven open to admit our prayers." The **Haman tash**, a kind of a turnover filled with honey and black poppy-seed, is eaten on the Feast of Purim, but probably has no special meaning.

The **mohn kihel**, a circular or rectangular wafer having in it a quantity of poppy, forms a part of the Sabbath breakfast. **Pirushkes**, or turnovers, are little cakes fried in honey, or sometimes merely dipped in molasses, after they are baked. The **strudel**, or single-layered jelly or fruit cake, takes the place of the pie for dessert. **Teigachz**, or pudding, of which the kugel is one variety, is usually made from rice, noodles, "farfel" (dough crumbs), and even mashed potatoes. **Gehakte herring** (chopped herring), which is usually served as the first dish at the Sabbath dinner, is made by skinning a few herrings and chopping them together with hard-boiled eggs, onions, apples, sugar, pepper, and a little vinegar.

Teiglach and **ingberlach** are the two popular home-made candies. The teiglach are made by fry-

ing in honey pieces of dough about the size of a marble, the dough being mixed with sugar and ginger. The **Savories and Candies.** ingberlach are ginger candies made into either small sticks or rectangles.

Jellies are made from all juices of fruits, and are used for different purposes; they are used in making pastry and are often served with tea. Among the poorer classes jellies are reserved for the use of invalids and patients, and so well has the practise of making jelly solely for that purpose been established, that often the words "Allewai zol men dos nit darfen" (May we not have occasion to use it) are repeated before storing it away.

I. G. D.

COOKING-UTENSILS: Among the ancient Hebrews cooking was naturally entrusted to the women of the household (compare I Sam. viii. 13), as was also the task of grinding the flour required for daily use, and that of preparing the bread. Even ladies of rank thought it no degradation to cook, and Princess Tamar is said to have displayed especial skill in preparing certain articles of food (II Sam. xiii. 8). The slaughtering and the dressing of meat were done by the men (Gen. xviii. 7; I Sam. ix. 23, ii. 14 *et seq.*), who also understood how to prepare food (Gen. xxv. 29; II Kings iv. 38).

Kitchens were found only in the palaces of the wealthy, a particular room for culinary purposes being scarcely requisite, since the primitive hearth consisted merely of a few stones upon which the pot was placed, and beneath which a fire was lighted on the mud floor (for oven, see **BAKING**). In later times mention is made of fire-basins, כִּיּוֹר (kiyyor, Zech. xii. 6), and of a species of small, portable cooking-stoves, "kirayim" (Lev. xi. 35; in the Talmud the singular כִּירָה is used); the latter, according to the Mishnah, was so constructed as to afford space for two pots.

Wood (often in the form of charcoal) and dried dung were used as fuel, and a draft was made by means of a fan, "menafah" (Kil. xvi. 7), as in the Orient at the present day. Fire-tongs, "melkalah-yim" (Isa. vi. 6) and shovels, "ya'im" (I Kings vii. 40), also formed part of the equipment.

In addition to the hand-mill, an indispensable adjunct of the Hebrew kitchen, were two large earthen jugs, called "kad," one of which was for carrying water (Gen. xxiv. 15 *et seq.*; I Kings xviii. 34), the other for storing meal or corn (I Kings xvii. 12). Milk and wine were preserved in goat-skins ("hemet," Gen. xxiv. 15, and elsewhere; "nod," Judges iv. 19, and elsewhere); oil and honey, in small earthen or metal jugs, "zappahat" (I Kings xvii. 12, *etc.*); fruits and pastry, in various kinds of **BASKETS**.

The "dud," "kiyyor," "kallahat," "parur," "sir," and "zalahah" ("zallahat") are mentioned as vessels for cooking, but their specific uses are unknown. The sanctuaries were amply provided with these dishes and bowls (Num. lxxi. 3 *et seq.*; I Kings vii. 45, 50), which, as might be expected, were usually of bronze, silver, or gold (Jer. lii. 19); in the homes, however, metal vessels were found in great number only among the wealthy. As these vessels were introduced by the Phenicians (I Kings vii. 13 *et seq.*), whose artisans long continued to supply the Hebrew market, it is safe to assume that their forms were similar to those of the Phenician utensils. Among the common people and for daily use, it was customary to employ earthen vessels (Lev. vi. 21), the receptacle most frequently mentioned being the sir, a pot in which usually the family meal was cooked, and in which occasionally the sacred meat was prepared (II Kings iv. 38 *et seq.*; Ex. xvi. 3; Zech. xiv. 20, and elsewhere). It sometimes served also as a ewer (Ps. lxxix. 10). For baking cake, *etc.*, a tin plate ("mahabat barzel," Ezek. iv. 3; Lev. ii. 5) or a deep pan ("marheshet") was used (Lev. ii. 7). Mention is also made of three-pronged forks, which were used, not for eating with, but for lifting the meat

from the pot (I Sam. ii. 13). Knives were used for slaughtering animals, and for dressing the meat ("ma'akelet," Gen. xxii. 6, 10).

E. G. H.

I. BE.

COPENHAGEN: The capital of Denmark. Shortly after the opening of Denmark in 1657 to settlement by Jews, a number are known to have resorted to the capital. A few were there even earlier; for there is a record of a Jew having been baptized in 1620. The first room for prayer-meetings was opened Dec. 16, 1684, in which year Israel David, the court jeweler, and his partner, Meyer Goldschmidt, were given permission to hold devotional exercises, provided they took place behind closed doors and without a sermon, that there might be no cause for scandal. The Jews were already in possession of a cemetery, the first interment in which is said to have occurred in 1670. This, the earliest known congregation in Copenhagen, probably followed the Sephardic ritual, since the first Jews permitted to settle in Danish cities were of Spanish-Portuguese extraction (see **DENMARK**); though they were doubtless soon outnumbered by German Jews who emigrated from Hamburg, northern Germany, Holland, and Poland, either directly or by way of Sleswick-Holstein.

The Copenhagen community is probably first mentioned in specifically Jewish literature in 1691, in which year a number of Jews, bound from Holland to Courland, perished by shipwreck at Marstrand, near the Swedish coast. When the Copenhagen Jews heard of the disaster, they sent two members and the shammash to ascertain the details, according to Jewish law, so that the widows of the drowned men, who were then in Poland, might be enabled to marry again (see **AGUNAH**; compare responsa "Sha'agat Aryeh we-Kol Shahal," ed. Salonica, 1746, p. 35a). At that time no Jews were living in Sweden.

The condition and mode of life of the Jews of Copenhagen were, on the whole, similar to those of Jews in other parts of Denmark; but

Social jewelers, agents, manufacturers, and **Condition.** merchants of all sorts had better opportunities for business in the capital than in the provincial towns. They soon increased to such an extent that the rooms hitherto used for prayer-meetings were no longer large enough; and the first synagogue was dedicated in 1729. The community had had rabbis for some time. The first was Abraham ben Salomon; he was followed by Israel ben Issachar Berendt, who had officiated as rabbi in Altona, and whose little book "Ohel Yisrael" (The Tent of Israel), a commentary on Jacob Weil's "Schlachtregeln," was printed at Wandsbeck in 1733, a year after his death. At that time there was no Hebrew printing-establishment at Copenhagen, although Hebrew types were to be found in the common printing-offices. Rabbi Israel died at Fredericia. He was succeeded by Mordecai ben David. Then followed Zebi Hirsch ben Samuel Halevy and Gedaliah ben Aryeh, the latter being succeeded in 1793 by his son Abraham, who, in order to accept the post, resigned his rabbinate in Gnesen.

Even in the eighteenth century the community was distinguished for its men of culture. A branch

of the WESSELY family, to which belonged Hartwig Wessely, Mendelssohn's faithful coworker, and his

The Eighteenth Century. brother Moses, the friend of Lessing, was established in Copenhagen. Although Hartwig Wessely, the most eminent of all the Jews of Copenhagen in the eighteenth century, left his native town, he still kept in touch with it, and when, in 1766, a new synagogue was dedicated, he wrote the dedicatory poem and delivered the oration. Another eminent family, the Wallichs, repeatedly intermarried with the Wesselys; but the Eichel family, to which belonged Isaac EICHEL, one of Mendelssohn's foremost pupils, is even better known than either of the other families mentioned. Isaac's equally talented brother, Gottlieb, was a businessman in Copenhagen, and was also successful as a writer.

The community grew rapidly in the eighteenth century, notwithstanding the difficulties attendant upon immigration; but a serious calamity befell it when, in 1795, during a conflagration in the city, the principal synagogue was burned. There had been occasional dissensions in this, as in every other old Jewish community. At the end of the century, however, the movement with which Mendelssohn's name is associated had obtained so firm a footing in Copenhagen, and the differences between the older and younger members had become so acute, that an agreement in regard to the building of a new synagogue was impossible; and, accordingly, none was built. Several houses were, however, fitted up and utilized as synagogues. Although, as early as 1804, one of the Progressives, M. L. NATHANSON, with the assistance of an Orthodox relative, had organized an excellent parochial school—still (1902) in existence—for poor boys, and though a similar school for poor girls was established a few years later, the members of the Jewish community could not unite in building a synagogue; nor could they do so even when, by the decree of March 29, 1814, civic equality was conferred upon them. The differences between the old Orthodox rabbis, supported by the majority of the community, and the younger, impetuously progressive minority, who were in intimate association with many highly cultured Christians, were too great.

The public schools, as well as the university, were open to Jewish students; and the above-mentioned

The Nine-teenth Century. Nathanson, with his friends, was actively interested in enabling poor but talented children to pursue their studies.

The first Danish theologian produced by the community was Isaac Noah MANNHEIMER, who was appointed teacher in 1816, when only twenty-three years of age. It was his duty to "confirm"—that is, to hold an examination upon the completion of a course in religion; and since there was no public place in which he could preach, his friends and patrons met for devotional exercises at their homes. His activity in his native community, however, was of but very short duration. Dissensions, on the one hand, and an eager desire for Danish culture, on the other, added to the impossibility of finding positions, led many Jewish students in the first decades of the nineteenth century to em-

brace Christianity. While, formerly, Christian missionaries had worked among the Jews without appreciable results—even though Jews were compelled, for a short time in 1728, to listen to Christian sermons, and proselytes thus won were materially favored—there was now an increasing number of conversions, whereby the community was robbed of many among the educated families. Just as in Germany the children of Moses Mendelssohn were baptized, so also in Copenhagen a number of his relations, friends, and followers became converts.

Mannheimer's successor as teacher was the younger and less gifted E. Levison, who continued religious instruction and confirmation, but abandoned the devotional exercises. In 1827 the death of the chief rabbi, Abraham Gedaliah, created a vacancy for which his son, although popular in the community, and possessed of wide Talmudic scholarship, proved unsuitable; for the congregation had learned to demand of its rabbis a wider range of knowledge. Accordingly an endeavor was made to find a chief rabbi who united Talmudic with secular learning; and an invitation was extended to A. A. Wolff, then rabbi in Giessen.

This young rabbi and doctor of philosophy succeeded in drawing both parties together to the extent indicated by the fact that a synagogue was dedicated in 1833. The services, on the whole,

Struggles for Reform. were arranged according to the old ritual—even now (1902) all the institutions of the community are conducted in the time-honored way—but Rabbi Wolff, to satisfy the younger members, added choral singing and a weekly sermon. In most respects the community was at peace; but some of the elder members, deeming the service too modern, maintained, in addition to the principal synagogue with the Portuguese ritual, a small private synagogue, which is still in existence. The extreme Radicals however, did not consider the innovations sufficient. They called for a greater number of prayers in the Danish language; and as this was not conceded they absented themselves from the service. Although secessions to Christianity gradually ceased, there was an increasing indifference to the affairs of the synagogue. But the chief inducement to baptism disappeared when, in 1849, the Jews throughout Denmark were accorded equal rights with their fellow citizens (see DENMARK).

The sphere and influence of the Copenhagen Jews were now more widely extended. Many achieved distinction as bankers, manufacturers, and merchants; among them being the Meyers, Goldschmidts, Rubens, Malchioris, Hambroes, Triers, Baron Gedalia, the "etatsraad" Philip W. Heymann, the banker D. B. Adler, and Isak Glückstadt, a bank director and the present president of the community. The merchant Nathanson was prominent also as a statistician, political economist, and journalist.

Among other well-known members of the community mention may be made of the students Abrahams, David, and Lewy; the poet Henrik (Heiman) Hertz, who was baptized; the painters David Monies and Ernest Meyer; Joel Ballin, the etcher; and the musicians Bendix and Rosenfeldt; all of

whom flourished in the nineteenth century. The community has also produced many scientists, including S. Trier, the clinical lecturer;

Persons of Dis- L. Jacobson, the anatomist and practicing physician; A. Hannover, the
inction. physiologist; H. Hirschsprung, director of the children's hospital; Israel

Rosenthal, chief physician of the communal hospital; Salomonson and L. Meyer, university professors; and Goldschmidt and Henriques, lecturers. Especial mention should also be made of L. I. Brandes, philanthropist and physician, uncle of Georg Brandes, and his brother, Eduard Brandes; Siesbye, the classical philologist; Hannover, of the Polytechnic; Fredericia, the historian; David and Rubin (1902), directors of the bureau of statistics; while the two Levy brothers are among many Jews who have held government positions.

Jews have also been active as politicians in Copenhagen. Among them were the poet Meier Goldschmidt; D. B. Adler, mentioned above; and the educator Herman Trier, vice-president of the Folkething, and chairman of the municipal council (1902).

The community of Copenhagen maintains a number of philanthropic foundations, many of them of considerable age. Their poor and sick are well cared for. The most recent of the many institutions is the Home for the Aged, founded a few years ago by N. J. Fränkel. The communal council holds bequests, exceeding one million dollars, for definite philanthropic purposes, while many societies and institutions hold property of their own. It should be noted that the Jews have also contributed generously to many non-Jewish philanthropies, among the more

prominent of those leaving bequests for such purposes being D. A. Meyer and S. A. Eibeschtütz. Their own prosperous circumstances have never
Phil- caused the Jews of Copenhagen to
anthropic forget their less fortunate coreligion-
In- ists elsewhere. As early as the reign of Maria
stitutions. Theresa appeals were made to the Danish government to intercede for the suffering Jews of Austria; while in recent times undertakings like the Alliance Israélite Universelle have found prompt support in Copenhagen. In addition to the religious and parochial schools, several lecture societies are engaged in spreading a knowledge of Judaism.

The Jewish community of Copenhagen has never been large. In 1902 it numbered about 3,500, including the neighboring communities, about 1,000 being taxpayers. The affairs of the community are conducted by seven representatives, who, in conjunction with four wardens of the synagogues, constitute the representative committee, at the head of which is the rabbi. At Professor Wolff's death D. Simonsen succeeded to the rabbinate, and occupied it till his resignation in 1902.

COPONIUS: First procurator of Judea, about 6 C.E. He was, like the procurators that succeeded

him, of knightly rank, and "had the power of life and death" (Josephus, "B. J." ii. 8, § 1; "Ant." xviii. 1, § 1). During his administration occurred the revolt of Judas the Galilean ("B. J." *l.c.*), the cause of which was not so much the personality of Coponius as the introduction of Roman soldiers. Moreover, owing to the reconstruction of the province of Judea then in progress, the census was being taken by Quirinus, which was a further cause of offense. In Coponius' term of office this incident occurred: During the Passover festival, when the doors of the Temple were opened at midnight, it happened that some Samaritans entered by the first door, and scattered human bones along the colonnade of the sanctuary. Shortly after this event Coponius was recalled to Rome, and replaced by Marcus Ambibulus ("Ant." xviii. 2, § 2). Probably it is on account of this occurrence that one door of the Temple bore the name of "door of Coponius" (Mid. i. 3; compare the reading in Parhi 16a, ed. Edelman). Regarding the personal attitude of Coponius toward the Jews nothing definite is known.

COPPER: The first common metal to come into use, as it is easily obtained and readily worked. Burial-places in which utensils, weapons, etc., of iron are found are ascribed to a later period than are those containing copper or bronze weapons.

The word "copper" is derived from the name "Cyprus," the island from which the ancient Greeks obtained this metal; hence the name *χαλκος* *kóprwos*, Latin *as cyprium*, copper. The Hebrew name "nehoshet" denotes not only

Name and copper, but also copper alloy. Since
Origin. copper is rather soft and very flexible, it was mixed with other metals, especially with tin, thereby becoming almost as hard as steel.

Of such a copper alloy, probably, were made the spear-head (I Sam. xvii. 7), the lance (II Sam. xxi. 16), and the bow (II Sam. xxii. 35), and perhaps also fetters (Judges xvi. 21). In the earliest times swords and axes, doubtless, were cast in copper alloy (I Kings vii. 46); later on they were forged in iron (I Sam. xiii. 19; Isa. ii. 4).

In Palestine itself there were no copper-mines, and probably none in the Lebanon Mountains, though iron ore was found there; hence the Israelites had to import their raw material either from the Egyptians or the Phenicians. The former in very early times worked copper-mines on the Sinai peninsula; and the ruins of immense works may still be seen in Wadi Meghara and Wadi Nasb. The Egyptian inscriptions found there state that even before the time of Cheops or Khufu, who built the great pyramid at Gizeh, copper was mined by Senoferu, a king of the fourth dynasty. The Phenicians probably mined copper first in Cyprus. But Ezek. xxvii. 13 states that later on they obtained ore also from the Colchian Mountains through the Tibareni and Moschi. The Israelites had commercial relations both with the Egyptians and the Phenicians, but not in very early times. Moses, however, is represented as having made a serpent of brass ("nehushtan," Num. xxi.

9), which was later on worshiped in the Temple of Jerusalem, and which Hezekiah "brake in pieces" (II Kings xviii. 4); and Bezaleel, while in the desert, is said to have made partly out of brass the vessels for the Tabernacle.

These instances are anachronisms; for it is shown in I Kings vii. 13 (compare II Chron. ii. 12 *et seq.*) that in the days of Solomon the process of casting brass was still unknown to the Israelites, since the king had to send to Tyre for a worker in brass (Hiram). Ex. xxxviii. is also an instance of anachronism, the furnishings of Solomon's Temple being taken as a pattern; while the *nehushtan* of II Kings xviii. 4, if it actually belongs to early times, must have been imported from elsewhere. That such things were imported may be gathered from the commandment of YHWH in Ex. xxxiv. 17. If a "molten image" (*מסכה*) is here forbidden to the people, it may be assumed that, in contradistinction to the old Hebrew *Ephod* of wood or stone, the imported image of brass was interdicted, and that in Ex. xxxiv. 17 the term "*massekah*" (*מסכה*) is to be

taken in its specific sense of a brazen manufacture; for in early times idols and altars of wood or stone, plated with gold or silver, were worshiped ("efod" or "pesel"; compare Judges viii. 23 *et seq.*, xvii. 1 *et seq.*). This assumption is all the more probable since there is no longer any doubt that foreign, more especially Phœnician, influences affected the construction and furnishing of Solomon's Temple.

In early times the altar of YHWH was built of earth or of unhewn stone (Ex. xx. 24 *et seq.*). The brazen altar in the Temple of Solomon indicates a breaking away from this old Israelitic custom; and Ahaz afterward had a new altar built in the Temple, patterned after an altar he had seen at Damascus (II Kings xvi. 10 *et seq.*). From this time on it probably became the custom in Israel to make their vessels of brass. Unfortunately the costly brazen pillars, calves, vessels, etc., that adorned the Temple since the days of Solomon, were destroyed by the vandalism of the Babylonians, who broke them into pieces and carried the metal to Babylon (II Kings xv. 13 *et seq.*; Jer. lii. 17 *et seq.*). In the Second Temple there were also brazen vessels, but not in such quantities; brazen cymbals are mentioned in I Chron. xv. 28 (compare Josephus, "Ant." vii. 12, § 3). The heaven of brass referred to in Deut. xxviii. 23 does not mean that after a long-continued drought the sky gleams like new molten bronze, since in the parallel passage of Lev. xxvi. 19 the earth also is compared to brass. It means rather that the vault of heaven is closed so tight that no drop of rain can descend, and the earth in consequence is turned into brass; that is, becomes hard and unproductive.

COR. See WEIGHTS AND MEASURES.

COR ASHAN. See CHOR-ASHAN and ASHAN.

CORAL: A genus of polypus known to science as "coralligenous zoophytes"; also the hard struc-

tures secreted by these animals. The variety known as the red coral (*Corallium rubrum*) (Pliny, xxxii. 2, 11, and elsewhere) is found in the Mediterranean, and was greatly valued by the ancients. It was used for personal ornament, and also for talismans and amulets. It is not certain that the ancient Hebrews were familiar with the coral. The A. V. translates the Hebrew *ראמות* "coral" in Job xxviii. 18 and in Ezek. xxvii. 16, while in Prov. xxiv. 7 both the A. V. and R. V. give "too high" as an equivalent for the same Hebrew word.

In favor of a derivation from *רום* ("to be high") it might be urged that the red coral has a natural upward form of growth. According to Freitag ("Einleitung in das Studium der Arabischen Sprache," p. 332), the coral in use among the Arabs was white, not red. But he confounds glass beads with corals. In Job xxviii. 18 the Septuagint reads *μετέωρα*, Sym. *ὑψηλά*, Vulgate *excelsa*, showing the influence of the etymology from the word meaning "to be high." The Targum renders *סנדלכין* according to Cheyne = *σανδαράκη*, which is entirely inapplicable here; Jastrow prefers "sardonx," Levy "sandarachina." Rashi holds *ראמות* to be the name of a precious stone found in the water. Ibn Ezra gives no explanation, and Gersonides, with the Targum, the paraphrase "costly pearls."

Of modern commentators, Dillmann thinks that "ramoth" (Job xxviii. 18), which Luther simply transliterates, designates something less valuable than "peninim," mentioned in the second half of the verse. Friedrich Delitzsch (in his German translation of Job, 1902) translates it "pearl shells." In Ezek. xxvii. 16 the Septuagint (Alexandrine Codex) has the transliteration *ραμμωθ*, the Vulgate *sericum*, and Targum "precious stones"; Luther, "sammet."

In Prov. xxiv. 7 "ramoth" suggests perhaps a play upon the word (= "too high"), but Bickell suggests a change into *רמות*, the Septuagint having an altogether different reading. In the margin of R. V. (Lam. iv. 7) "corals," "red corals," and "pearls" are suggested as truer renderings for the Hebrew word "peninim" (Job xxviii. 18; Prov. iii. 15, viii. 11, xx. 15, xxxi. 10). Luther has this translation in Lam. iv. 7; Friedrich Delitzsch in Job xxviii. 18. Gesenius ("Th.") holds "peninim" to be the red coral, and "ramoth" to be another, probably the black, variety. The use of the word *משך* ("draft") in connection with "peninim" in Job xxviii. 18, appears to recall the method employed in coral-fishing. Coral is broken off from the rocks by long hooked poles, and "drawn out."

Of medieval Jewish lexicographers, Abu al-Walid, in his "Book of Roots," rejects the opinion that "ramoth" signifies "coral." Kimhi, in his dictionary, explains it as a precious stone. See Menahem ben Saruk in "Mahberet," and "Sefer ha-Parhôn."

E. G. H.

CORBEIL (קורביל or קורביל): City in the department of Seine-et-Oise, France. Jews were settled very early in Corbeil, occupying a special quarter, called the "Juderia." It is mentioned in Tosafot to Ket. 12b, Hul. 122b, and is probably referred to in a document of the fifteenth century wherein is mentioned a place "où souloit estre aulterfois l'escholle aux Juifs" (where formerly the school of the

Jews used to be) ("Rev. Et. Juives," ix. 62). In 1184 King Philippe Auguste presented the cleric Pierre with a house that had belonged to the Jew Hélie (Eli). In 1202 special taxes were imposed upon the Jews of Corbeil; and they were obliged to pay into the treasury a sum for affixing seals to the documents relating to their transactions with Christians. The journal of the treasury of the Louvre, 1298, mentions the Jew Hagin, who was a receiver of taxes, and the Jewess Thyerma, whose taxes amounted to 41 livres. In 1306 the Jew Cressant owned a house on the Seine which yielded a rent of 520 Paris livres. This Cressant is probably identical with the "Croissant, neveu Croissant de Corbueil" mentioned in the "Document sur les Juifs du Barrois" ("Rev. Etudes Juives," xix. 250), and with Cressant of Corbeil, one of the commissioners appointed by the king in 1315 to supervise the payment of the debts of his coreligionists (Saige, "Les Juifs du Languedoc," pp. 106, 330).

Many eminent Talmudists lived in this city. Among them were Judah of Corbeil; Jacob the Saint; Joseph, mentioned by Aaron ben Hayyim ha-Kohen in his commentary to the Mahzor, written about 1227; Simson; Isaac ben Joseph; Perez ben Elia; Mordecai ben Nathan; Elhanan, son of Isaac the Elder, of Dampierre.

CORCOS (קורקוס or קורקוש): A family whose history can be traced back to the end of the thirteenth century, and members of which are still living in Gibraltar and Morocco. The name first appears in Spain; but it was only in the two centuries following the expulsion of the Jews from that country that the family rose to distinction, in Italy, its new home. Here it was considered one of the most distinguished families of the country, owing to the culture, piety, and wealth of its members. Although the family pedigree, as given herewith on the authority of Vogelstein and Rieger, is in some points only conjectural, yet it may still be safely assumed that all who bear the name of "Corcos" in Italy belong to one family. On the other hand, the relationship of these to others of the name in Spain has not as yet been ascertained.

It is alleged that the family originated at a place called "Corcos," which, however, can not be satisfactorily identified. Some scholars therefore think that the name is a corruption of "Carcassonne," a place in southern France. Doubtful, likewise, is the statement made by Christian scholars that one branch of the family embraced the Christian faith in the sixteenth century and attained high distinction.

BIBLIOGRAPHY: Bartolocci, *Bibliotheca Rabbinica*, iii. 821-827; Berliner, *Aus Schweren Zeiten*, in the *Hildesheimer Jubelschrift*, pp. 162-163; Steinschneider, in *Hebr. Bibl.* xi. 71-72; Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 101-108.

1. Abraham Corcos: The earliest known member of the family, father of Solomon Corcos (No. 14). He flourished in Spain in the second half of the thirteenth century.

2. David Corcos: Ancestor of the Corcos family

in Italy; went in 1492 from Castile to Rome, where his son Solomon (No. 15) afterward became rabbi (Vogelstein and Rieger, *l.c.* p. 101).

3. Donna Corcos: Daughter of Solomon. About 1585 Lázaro da Viterbo dedicated to her his translation of the "Me'on ha-Sho'alim" (Steinschneider, "Cat. Bodl." col. 1987).

4. Elijah ben Solomon Corcos: Italian financier; flourished about the middle of the sixteenth century. In conjunction with his brother Joshua (No. 9), he opened a banking establishment in Rome June 11, 1537. He took part in the conference held by the Jewish bankers on that day, the object of which was to fix certain business usages which were to form the basis of an arrangement with Christian bankers.

He was an active member of the congregation in Rome, the financial affairs of which, especially in relations with the authorities, were entrusted to him. Thus (July 20, 1558) he engaged to pay to the papal vicariate 1,000 scudi in three instalments, this sum having been imposed as a fine upon the congregation because, a few days after the seizure of the Hebrew books by the officers of the Inquisition, a copy of Ibn Ezra's Commentary to the Pentateuch was found. So likewise the tax upon the congregation, which had been fixed at 360 ducats by Paul III., was paid by Elijah and two other Jewish bankers. Similarly, the tax on the congregation of Benevent, amounting to 35 scudi in gold, was handed to the authorities by Elijah on Jan. 31, 1542.

It seems that Elijah lived to an advanced age; for in 1581 he is still found as one of the delegates of the congregation who were appointed to confer with the tax-farmers of Romagna, Lombardy, and Tuscany concerning the security which the congregation in Rome was to furnish for them.

Elijah was also a rabbinical scholar; whose decisions, in his own handwriting, are still extant ("Revue Etudes Juives," x. 185). His identity with Elijah Corcos, the physician referred to by David de Pomis in the preface to his "Zemah Dawid" (fourth line from foot), is, however, doubtful. Elijah had two sons, **Isaac** and **Moses**.

BIBLIOGRAPHY: Berliner, *Aus Schweren Zeiten*, in the *Hildesheimer Jubelschrift*, pp. 150-160; idem, *Gesch. der Juden in Rom*, pp. 9-10; Vogelstein and Rieger, *Gesch.* pp. 112-118.

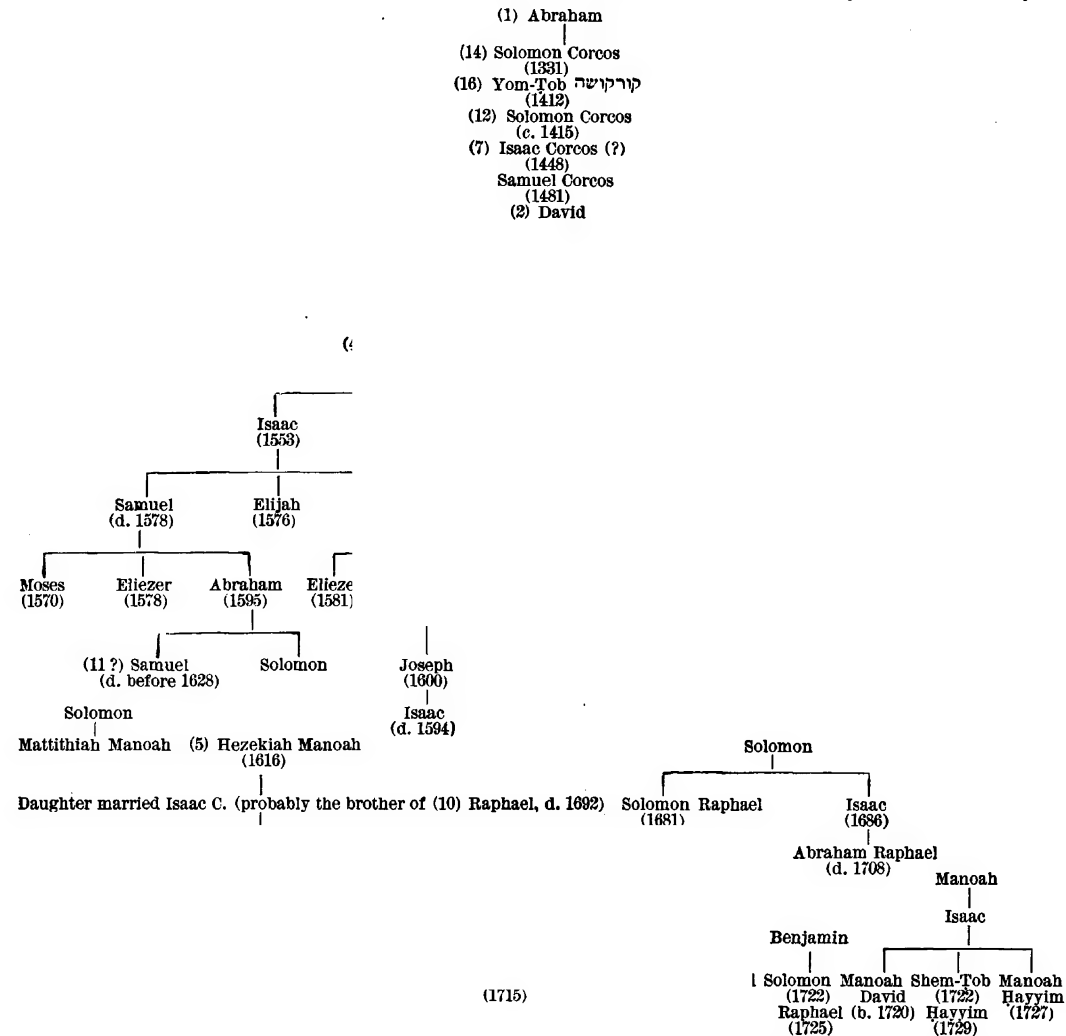

5. Hezekiah Manoah Corcos: Rabbi and Talmudist; born about 1580; died about 1650. In 1620 Hezekiah was appointed rabbi of the congregation in Rome, which position he held till his death. Though he shared his functions with A. di Iscario, D. della Rocca, and S. Castelnuovo, he was the dominant spirit; and it was through him that the rabbinate recovered to some extent its former importance. When, in 1629, an inquisition of Hebrew books was ordered in Modena, Hezekiah addressed a letter to Pelegrino Sanguinetti, calling his attention to the papal brief dated April 17, 1593, and to the decree of the Index Committee issued Aug. 29, 1596 (Stern, "Urkundliche Beiträge," p. 181).

Hezekiah was regarded as one of the foremost Talmudists of his day; and the few fragments of his literary activity found in the contemporary responsa literature show him to have been a very clever casuist (compare, for instance, Shabbethai

GENEALOGICAL TREE OF THE CORCOS FAMILY.

(From Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 106.)

Dates, unless otherwise indicated (i.e., b. for "born," d. for "died") are such as are mentioned in documents concerning the respective members of the family.

6. Hezekiah Manoah Hayyim b. Isaac Corcos (in Italian, *Tranquillo Vita*): Italian rabbi, physician, and scholar; born in Rome 1660; died there Jan. 13, 1730. Hezekiah, who, on his mother's side, was a grandson of Hezekiah Manoah (No. 5), and, on his father's, a nephew of Raphael Corcos (No. 10), early distinguished himself both as physician and preacher. His activity in the affairs of the congregation began with his election to membership on Aug. 12, 1692. Until the day of his death he

speeches in the churches and in the public squares of Leghorn, Pisa, Florence, and Bologna. In the last-named city these addresses led to bodily assaults. Corcos then published a memorial (Rome, 1692), addressed to the congregation of the Holy Office, refuting the charges of hatred against Christianity brought by Medici, explaining correctly the derided sayings of the sages, and directing attention with special emphasis to the fact that Medici's writings had already been several times suppressed by the

ecclesiastical authorities. Another work by Corcos, written in 1698 or thereabouts, but not printed, was his memorial to the pope regarding the high rents which the Jews in the Roman ghetto had to pay in consequence of the papal edicts; the result of the memorial was that Innocent XII. ordered a reduction amounting to 12 per cent. In his "Informatione" (Rome, 1699) he attempted to show that every Jew had the right to dispose freely of his fortune by will; this right having been disputed by Christians in order to prevent converts being disinherited.

Great excitement was caused in Italy by the arrest in Viterbo (1705) of five Jews on a blood accusation, such charges having never before been preferred in Rome or its vicinity. Corcos came forward with his "Memoriale" (Rome, 1705), addressed to Monsignore Ghezzi, the papal reporter on Jewish affairs, wherein he demonstrated the groundlessness of the accusation. In addition to this, Corcos (*ib.* 1706) wrote a "Summarium," in which he produced documents, relating to the blood accusation, from secular and ecclesiastical authorities; and also a "Memoriale Addizionale," in which he presented additional material concerning the historical treatment of this subject. Of apologetic character is his "Spiegazione" (Rimini, 1713), which was written at the request of the inquisitor-general, and deals with the question whether the "mezuzah" serves superstitious purposes. Corcos, of course, denied this, and advanced instead a theory of angels, which reveals him as an adherent of the Cabala of Luria. This is also seen in his founding various mystical societies for private worship.

Aside from this, however, Corcos' activity in Rome, where he filled the office of rabbi from April 9, 1702, was highly beneficial. In consequence of his petition to the "Tribunal of Grace," the sale of meat in the ghetto was regulated, and the Jews were permitted to sell to non-Jews the meat which was forbidden to themselves. In 1727 he submitted to the Inquisition a memorial concerning Hebrew books. It should also be mentioned that Corcos brought about in 1719 the use of Italian in keeping the communal records, Hebrew having formerly been employed.

Corcos, who in point of secular education had no equal among the Jews of his time, was also considered a high rabbinical authority, as is shown by his decisions in the contemporary rabbinical literature, many of which are still extant. Apart from his works discussed above, in all of which he pursued some practical object, Corcos wrote a philosophic treatise for Purim, "Discorso" (Rome, 1710), in which he develops the pragmatic history of Esther and Mordecai; parts of it were recited by pupils of the academy at the Purim celebration. He left behind him an only son, **Samuel Hayyim** (died April, 1731), an active and noted member of the congregation, who wrote an introduction to his father's "Discorso."

BIBLIOGRAPHY: Berliner, Vogelstein and Rieger, as above; Steinschneider, in *Monatsschrift*, xliii. 517-529, 563-564; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 105; Kaufmann, in *Revue Etudes Juives*, xxvi. 268-270.

7. Isaac Corcos: According to some authorities, the earliest known bearer of the name in Italy. Bartolucci records the Hebrew inscription on his tomb,

which is dated Laterna, 1448. This reading must, however, be wrong, as the Corcos family probably did not go to Italy until after 1492; though the name Isaac is frequently found in the family.

8. Joseph Corcos: Spanish Talmudist; flourished at the end of the fifteenth century and in the first half of the sixteenth. Joseph left Spain as a youth, presumably in consequence of the expulsion of the Jews, and settled in Palestine. Here he occupied a high rank among the scholars of the day. David Abi Zimra, Joseph Caro, and Joseph Trani speak of him as a rabbinical authority of the first rank. He wrote a commentary on Maimonides' "Yad ha-Hazakah," which Joseph Caro had before him when he was writing his own commentary on that work. A small portion of it only has been printed (Smyrna, 1757; reprinted in the Warsaw ed. of the "Yad"), under the title "Hai Safrade Rab," which work furnishes ample testimony of the author's wide scholarship and critical mind. Some of Joseph's responsa were published by Azulai in his "Hayyim Sha'al II.," Leghorn, 1792-95. The treatises containing his detailed studies of the "Yad," to which the Oriental scholars of the seventeenth century had access, seem to have been lost. Corcos must have reached an advanced age; for, as his responsa in Joseph Caro's "Abkat Rokel" show (No. 200, erroneously ascribed to Caro), he was still living when Caro's "Bet Yosef" appeared. He must have died after 1575, to judge from a remark of Ibn Yahya in "Shalshet ha-Kabbalah" (ed. Warsaw, p. 88; compare also Sambari in Neubauer's "Med. Jew. Chron." i. 140).

Not to be confounded with this Joseph Corcos is the Italian of the same name, author of the homiletico-exegetic work "Yosef Hen" (Leghorn, 1825), and compiler of a little volume entitled "Shi'ur Komah" (*ib.* 1825?), containing readings taken principally from the Zohar.

9. Joshua ben Solomon Corcos: Italian banker of the sixteenth century. In conjunction with his brother Elijah (No. 4), he carried on an extensive banking business in Rome, which they had established in 1537. A century afterward Manasseh ben Israel could still point to the great wealth of the firm, which in 1656 represented the sum of 700,000 crowns. Joshua was an active member of the congregation; and as such, on March 16, 1558, acted as the representative of the united synagogues of Castiglione and Zafartine in the drafting with the united synagogues of Catalonia and Aragon of a deed of partnership in the use of certain synagogal utensils. Significant also is the compact drawn up by Joshua between the Jewish and the Christian tailors in regard to the manufacture of certain articles of attire. In more than one respect this document is highly interesting, but especially from the fact that the idea of a tailors' union was suggested by the Christians, who were aiming at common business methods with the Jews.

BIBLIOGRAPHY: Berliner, *Aus Schweren Zeiten*, pp. 159-160.

10. Raphael Corcos: Italian rabbi; died about 1692. He seems to have succeeded his kinsman

Hezekiah Manoah (No. 5) as rabbi. After the death of the latter he was the real representative of the Corcos family. This is why his nephew Hezekiah Manoah Hayyim held no office in the congregation during Raphael's lifetime, as the presence of uncle and nephew in the same rabbinate would not have been looked upon with favor. Corcos is to be distinguished from his namesake who was rabbi in Padua about 1620. The latter is mentioned by Isaac Cantarini ("Paḥad Yizḥaq," p. 106) as a noted scholar.

BIBLIOGRAPHY: Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 106-107.

11. Samuel Corcos: Italian rabbi of the first half of the seventeenth century. He was rabbi at Sinigaglia, where he delivered the funeral sermon at the burial of Mordecai Graziani, father of Abraham Joseph Graziani (Nov. 7, 1643).

BIBLIOGRAPHY: Jona, in *Revue Etudes Juives*, iv. 113; Kaufmann, in *Monatsschrift*, xxxix. 352-353.

12. Solomon Corcos: Spanish Talmudist; flourished at the beginning of the fifteenth century. A responsum by Zerachiah ha-Levi, a disciple of Hasdai Crescas, addressed to Corcos, is included in the responsa collection of Solomon ben Abraham Adret, v. 166 (Halberstamm, in "Hebr. Bibl." xii. 42).

13. Solomon Corcos: Converted Jew, who is said to have embraced Christianity in 1573. Bartolucci states ("Bibliotheca Rabbinica," iii. 821) that, under Pope Gregory XIII., Corcos, together with his son Lazaro, became a Christian, and in consequence received titles and honors. He also identifies them with Ugo and Gregory, who, according to a papal "motu proprio" of the year 1582, the text of which he cites, were raised to the nobility. Proof of the correctness of this assertion, however, is wanting. It is certain that neither Solomon ben David (No. 15) nor his grandson Solomon ben Joshua, an active member of the congregation in Rome as late as 1574, is identical with the convert referred to by Bartolucci.

BIBLIOGRAPHY: Berliner, *Aus Schweren Zeiten*, in *Hildesheimer Jubelschrift*, p. 162.

14. Solomon b. Abraham Corcos: Spanish Biblical scholar; flourished in the first third of the fourteenth century. He was a disciple of Judah ben Asher, and wrote in Avila (Aug., 1331) a commentary to Israeli's "Yesod 'Olam," the manuscripts of which commentary are now in the libraries of Munich and Turin.

BIBLIOGRAPHY: Steinschneider, *Hebr. Bibl.* xi. 71; *idem*, in *Katalog der Hebräischen Handschriften in der Königliche Hof- und Staats-Bibliothek in München*, Nos. 33, 3; 43, 10; 261, 1; Vogelstein and Rieger, as above.

15. Solomon ben David Corcos: Italian rabbi in the sixteenth century. He was by birth a Spaniard, but, owing to the expulsion of the Jews from Spain, went to Rome with his father. As early as 1536 he appears as rabbi; afterward, in 1540, 1542, as מִשְׁרֵת דָּקָא רֹמָא. The father of Donna Corcos is not identical with Solomon ben David; since Viterbo, in his work "Me'on ha-Sho'alim," which appeared about 1585, speaks of Solomon, Donna's father, as one still living; while Solomon ben David, in a record of March 16, 1558, is spoken of as deceased.

BIBLIOGRAPHY: Berliner, *l.c.* p. 159.

16. Yom-Tob Corcos: Spanish rabbi; flourished in Monzon at the beginning of the fifteenth century. He was one of the Jewish delegates at the disputation of Tortosa in 1413. Ibn Verga, who reports this fact, writes the name in his "Shebet Yehudah" (ed. Wiener, p. 68) as קֶרְקוֹס, which is probably only a variant of קורקוס (Corcos).

CORDOVA: A city in Andalusia, Spain. As early as the eighth century it included Jews among its inhabitants. They lived in a separate quarter or "Juderia," one of the gates of which was called "Bab al-Yahud," now the Almodovar gate. At this gate, later known to the Moslems as "Bab al-Huda," the Jews carried on an extensive trade in silks and slaves. They developed considerably in numbers and importance under 'Abd al-Rahman I.—whose

(From a photograph by Dr. W. Pepper.)

greatness is said to have been prophesied by a Jew—and under his successors. The Jews were not behind the Moors in their efforts to promote education and culture; and at the Academy of Cordova, founded by the califs, Jews and Moors together received instruction in philosophy, grammar, mathematics, botany, and even in music. One of the graduates from this academy was a Jew named Elias, who is referred to as a poet and as an author of synagogal verses and songs. Mention is also made of a Jewish musician by the name of Mansur, who is said to have been a great favorite with Al-Hakim (Mariano Soriano Fuertes, "Historia de la Musica Española," i. 82, Madrid, 1855).

In Cordova, as in Mohammedan countries generally, the Jews enjoyed the same privileges and were subject to the same duties as the other inhabitants. They fought in the Moorish army and held government positions. The cleverest Hebrew diplomat was HASDAI IBN SHAPRUT, minister of finance under

'Abd al-Rahman III. It was he who brought about the visit to Cordova of the proud queen Toda of Navarra with a large retinue, for the **Hasdai ibn Shaprut**, al-Rahman for protection and assistance. Through Hasdai's intercession the scholar Moses b. Hanok, who had been exiled to Cordova, was liberated. Hanok was afterward elected to succeed the chief rabbi, Nathan, who had voluntarily resigned. Hasdai founded at Cordova a school entirely independent of the gaonate, and thereby established the study of the Talmud in Spain. Through the efforts of Hasdai, who had attracted to himself many scholars, poets, and grammarians, such as Menahem b. Saruk, Dunash b. Labrat, and others, Cordova became the seat of Jewish learning.

After Hasdai's death (about 970) a dispute arose in the community concerning the rabbinical office at Cordova, which, after the death of Moses b. Hanok, was filled by his son. Many members of the community, especially the rich silk-manufacturer Ibn Gau, favored Joseph ibn Abitur for the position. The latter belonged to a prominent family of Cordova, and was greatly superior to Hanok in learning; furthermore, he was a poet of distinction and a master of Arabic. But the greater part of the community sided with Hanok. The dispute lasted for a long time, and was finally brought before the calif, Al-Hakim, who, yielding to the will of the majority, decided in favor of Hanok. When Jacob ibn Gau, however, received from Mohammed Abi-Amr the appointment of "nasi" and supreme judge of all the Jewish communities of Andalusia, and was elected by the Jews of Cordova as their chief, he removed Hanok from office, and, with the concurrence of the members of the community, recalled the banished Ibn Abitur as rabbi. But Ibn Abitur failed to respond to the call; and after the death of Jacob ibn Gau, who had meanwhile been removed from office and thrown into prison, Hanok was reinstated as rabbi, and retained his position until his death, which occurred on the last day of the Feast of Tabernacles (Sept. 29, 1014).

Hanok lived long enough to witness the evil that came upon Cordova. After the death of Al-Mansur a furious civil war broke out. The Berber chieftain Sulaiman, who was ambitious to be ruler, had united with Count D. Sancho of Castile; whereupon Mohammed, his rival, sent a deputation of rich Jews to invoke the aid of Count D. Ramon Borrell of

Barcelona, who at once responded with an army. On hearing this, Sulaiman swore to avenge himself upon the Jews; and on April 19,

Persecutions Under the Moors. 1013, he broke into Cordova, destroyed their dwellings, burned their storehouses, and drove the Jews from the city; only those living in one of the eastern suburbs being spared. This

was the first persecution suffered by the Jews of Spain (V. Balaguer, "Historia de Cataluña," I., book iii., ch. v.). The most noted families of Cordova were reduced to beggary and driven into exile. Joseph ibn Shaprut, the son of Hasdai, and the grammarian Jonah ibn Jannah settled at Saragossa; Samuel ibn Nagdelah, at Malaga. In Cordova, where, in 1117, a false Messiah had appeared, there remained but a comparatively small Jewish community; and this was soon subjected to new persecutions at the hands of the fanatical Almohades, whose leader, 'Abd al-

Mumin, in 1148, compelled the Jews to choose between Islam and death. Many underwent the formality of conversion to Islam; while many others emigrated. The magnificent synagogue at Cordova, erected by Isaac ibn Shaprut, father of Hasdai, the rabbi of which was the scholarly Joseph ibn Zaddik, became a prey to insatiate pillage by the fanatics.

Cordova, the old seat of the califs and the birthplace of Moses Maimonides, was retaken in 1236 by Ferdinand III., "the

Saint" of Castile; and the Jews of the city again came under the jurisdiction of the canonical laws. The king assigned to them as their habitation the old Juderia, situated near the cathedral, and next to the fish-market ("la Pescaderia"); the principal street of the quarter being known as the "Calle de los Judios"—now the Calle de Maimonides. This Juderia was surrounded by walls, and dominated by a fort. They were obliged to wear distinctive badges and, in accordance with a decree of Pope Innocent IV., to contribute a tithe to the clergy. As soon as the Jews, in consequence of the privileges which had been granted to them by Ferdinand III. (Fuero de

Under Castilian Rule. Cordova), again felt certain of protection, they began to build a synagogue, the height and magnificence of which aroused the wrath of the bishop and the chapter, who submitted a protest to the king. As this protest remained unheeded, however, the clergy turned to the pope, requesting him to forbid the completion of so imposing a structure. On April 15, 1250, Innocent IV. issued the desired pro-

CALLE DE MAIMONIDES, CORDOVA.
(From a photograph by Dr. W. Popper.)

hibition; but the structure was nevertheless completed in the same year. The papal decree had this effect, however, that thereafter the Jews of Castile and Leon could not erect a synagogue without special permission (Amador de los Rios, "Historia," i. 365 *et seq.*, 556 *et seq.*; "Boletin Acad. Hist." v. 202, 234, 361 *et seq.*; "Rev. Etudes Juives," ix. 157 *et seq.*). Fifty-five years later a new and magnificent synagogue was built by the architect Isaac Mehab b. Ephraim, in the middle of the Calle de los Judios, between the Place de las Bulas and the Almodovar gate. It was designed in the Moorish style, and had ogives 5 meters long and 6 meters wide. The northern and southern façades were decorated with colored faience, and bore Hebrew inscriptions, consisting principally of verses from the Psalms. The ornamentation of the western wall contained the only Arabic dedication to be found in any synagogue of Spain; while the eastern wall bore, in the form of a square, the following Hebrew inscription:

מקדש מעט ונוה תעודה שכללו
יצחק מחב בן הנביר אפרים
נבנה שנת שבעים וחמש בנין שעה
[קום] אל והיש לבנות ירושלים

("This little sanctuary and a house of testimony was built in the year 75, by Isaac Mehab, son of the honorable Ephraim, as a temporary structure: Haste, O God, to rebuild Jerusalem!")

In שעה ("temporary," lit. "of an hour") the year 75 (שנת ע"ה) is again indicated. Since 1722, and possibly from an earlier period, this building was in the possession of the Shoemakers' Guild. The original purposes to which it had been dedicated were unknown. In 1884, however, the

origin of the building was discovered by two academicians, D. Fidel Fita of Madrid and D. Romero y Barros of Cordova; and, like the two synagogues of Toledo, it is now set apart as a national monument ("Boletin Acad. Hist." v. 202 *et seq.*; "Rev. Etudes Juives," x. 246 *et seq.*).

The history of the Jews in Cordova differs but slightly from that of those of other communities in Castile. Upon the death of Ferdinand IV., his widow, Queen Constance, decided (Oct. 4, 1312) that a yearly requiem should be sung in memory of her husband; the expenses to be defrayed out of the annual revenue of the slaughter-house at Cordova, aggregating about 4,000 maravedis. For about ninety years the Jews of Cordova enjoyed uninterrupted tranquility, until they, too, became vic-

tims of the general persecution of 1391. The clergy, especially the archdeacon Ferrand Martinez, had so persistently instigated the people of Seville and Cordova against the Jews, that in Jan., 1391, an outbreak was considered imminent; and in June of the same year massacres of the Jews spread from Seville to Cordova. The dwellings, storehouses, and factories of the Jews became a prey to the flames; virgins were dishonored; and men, women, and children, without distinction of age or condition, were shockingly murdered. More than two thousand corpses lay in the streets, the houses, and the synagogues. Many persons, through fear of death, decided to embrace Christianity; and the community, once so flourishing, lay desolate. Of the beautiful synagogues, that built in 1315 alone remained. In **Massacres.** 1406 these persecutions were renewed.

The shops and dwellings of the Jews were plundered or burned, and hundreds of persons were ruthlessly massacred. In consequence of these repeated cruelties the feeble king, Henry, imposed

DECORATIONS ON THE WALLS OF THE ANCIENT SYNAGOGUE AT CORDOVA.
(From a photograph by E. N. Adler.)

a fine of 40,000 doubloons upon the city of Cordova. Only 10,000 were paid, as the king died before the negotiations for a diminution of the sum had been completed (*De los Rios, l.c. ii. 105, 361, 415 et seq.*; *Epistle of Hasdai Crescas, in the Appendix to "Shebet Yehudah," ed. Wiener, p. 129*). After the massacre many Jews left Cordova and settled at Granada, which was still under Moorish dominion. In 1470 the "corregidor" (governor) of Cordova ordered the few Jews still remaining in the city to be removed from the Juderia, where their ancestors had dwelt for centuries, and to be transferred to the old Alcazar. At the petition, however, of Moses Barchillo, president of the Jewish congregation, this order was abrogated by a decree of Isabella the Catholic (March 16, 1470).

Still more violent was the hatred against the apostate Maranos—a hatred which soon resulted in the formation of two parties; viz., the Old Christians, headed by the Bishop of Cordova and the Count of Cabra, and the Maranos, or New Christians, whose protector was the powerful Alfonso de Aguilar. One of the associations organized by the clergy was the Caridad, a society which excluded all Maranos without exception from membership. The solemn inauguration of this society was celebrated by a procession on March 14, 1473. All the streets through which it passed were strewn with flowers; and all the houses—excepting those of the Maranos, which remained closed—were decorated with flags and costly carpets. As the procession reached the Calle de la Herreria ("street of the smiths"), in the vicinity of the cathedral and the Juderia, the signal for assault was given. A smith, Alonzo Rodriguez by name, seized the torch illuminating an image of Mary, and set fire to the house of one of the richest Maranos of the city—an act which he averred to

**Procession
of the
Caridad.**

have committed out of vengeance, because water had been poured from one of the windows of the house in question upon the canopy under which the image was placed. In explanation of this charge it is said that a Marano girl, eight or ten years of age, had indeed inadvertently poured some water from the window. With the cry of "Viva la fé de Dios," the fanatical mob broke into the houses of the Maranos, pillaged and burned them, and mercilessly slaughtered the inmates. In order to terminate this cruelty, the governor, Alfonso de Aguilar, accompanied by his brother, Gonçalo Fernandez de Cordova, and several knights, ordered the smith, who acted as leader, to withdraw with his band. The smith answered with a volley of abuse, while the enraged mob attacked the governor, who thereupon ran the smith through with a lance. The governor's action infuriated the mob to such a degree that it poured into the streets inhabited by the Maranos—the S. Maria de Gracia, La Roperia ("street of the pedlers"), La Curtiduria ("street of the tanners"), La Alcaiceria ("the silk-market"), La Plateria ("street of the goldsmiths"), and many others, all of which soon ran with the blood of the slaughtered. De Aguilar was obliged to withdraw to the Alcazar, which also served as a place of refuge for many Jews and Maranos. After the storm had subsided the governor was obliged to

leave Cordova; and he proceeded to Aguilar, whither he was followed by many Jews and Maranos. In 1473 an order was issued prohibiting Maranos from holding public office in Cordova; and this was soon followed by another royal decree prohibiting Jews from residing in that city and in Seville under penalty of death. Nineteen years before the general expulsion, therefore, the Jews were obliged to dispose of their houses in Cordova at any price and leave the city.

Cordova and Seville were the first to furnish victims to the Inquisition, which afterward destroyed so many thousands of Maranos in those cities (see INQUISITION). The chief autos da fé held in Cordova (and the victims at each) were: June 29, 1665 (Jorge Mendez de Castro and Domingo Rodriguez de Caceres); July 6, 1666 (Diego de Herrera, Juan Nicolas Lopez de la Peña, Catalina de Reyna y Medina, and Antonio Gabriel de Torres); June 13, 1723 (Miguel de Soto y Herrera, Juan Fernandez Dias and Simon de Molina); and April 23, 1724 (Bernardo Philip de Soria de Caceres and Diego de Acosta).

CORDOVERO, GEDALYAH BEN MOSES: Talmudic scholar; lived at Safed in the sixteenth century. He was a son of the famous cabalist Moses Cordovero, a nephew (on his mother's side) of the cabalist Solomon Alkabiz, and a pupil of Solomon Sagis. He edited three works of his father: "Abodat Yom ha-Kippurim"; "Or Ne'erab," to

which he wrote a preface (Venice, 1585); "Pardes Rimmonim," also with a preface by him (Venice, 1586). He further edited "Heshek Shelomoh," the work of an anonymous writer (Venice, 1588), and compiled a glossary of all the non-Hebrew words occurring in the Bible, giving their equivalents in Spanish (Venice, 1616). In addition, a responsum by him is mentioned by Yom-Tob Zahalon, in his collection of responsa (§ 116). See LONSANO, MENAHEM DE.

G. M. FR.

CORFU: Most northerly of the Ionian Islands. The native Jews of Corfu fall into three distinct divisions of different origin (Greek, Spanish, and Apulian) and belonging to different epochs. There was formerly also a fourth division, that of the Levantines, the greater part of whom apparently became merged into the Italians.

1. Greek Division: Composed of Jews who came from Thebes toward the end of the twelfth and in the thirteenth century. Benjamin of Tudela, visiting the island in

Origin. 1147, found only one coreligionist, the dyer Joseph. A large number of Jews came to establish themselves on the island after it had passed from Byzantine dominion to that of the Angevin kings of Naples. Many documents show that there were Jews in Corfu in the thirteenth century, having been carried thither as prisoners by King Roger of Sicily, who conquered Thebes (in Boeotia) and Corfu about 1150, or having voluntarily migrated from Thebes, and perhaps also from Sicily. King Roger had previously sent Theban Jews to the island for the purpose of introducing sericulture, Sicily being at that time under Angevin kings, who favored the Jews. A proof of the Theban origin of the Jews of Corfu is found in the word *aida* ("pomegranate"), from the ancient dialect of Thebes, a word used only by them, though their dialect is the Apulian.

The Greek Jews (who called themselves "Toshebim" or "Terrieri") differ from the other Jews on the island by various customs—*e.g.*, they celebrate the additional day of Purim (Shushan Purim; see Esth. ix. 18), while the Jews belonging to the Apulian synagogue celebrate only the first day. The former observe on the first day only the religious ceremony at the Temple and the small banquet, reserving the masquerading, the ball, and the grand banquet for Shushan Purim. They have also preserved Greek elegies for the Ninth of Ab (see specimens in "Israelite Chronographos," No. 2, Corfu, July, 1899), and until recently a Greek chant was recited in their

synagogue on the day of Pentecost. The first complete Biblical text in modern Greek is a translation of Jonah (twelfth century) made for the Jews of Corfu. The Greek synagogue is the oldest on the island. Until recently it differed somewhat from the others in its liturgy, and the ministers officiating in Greek still preserve that nasal chant peculiar to the Greco-Oriental preachers. The Greek Jews, who were absorbed by the more numerous Apulians, forgot their language, but have retained characteristic words and phrases. Their family names are, or have been, Gesuā, Eliezer, Belleli, Moustaki, Naxon, De Semo, Mazza, Pangali, and Abdalā. At present they possess not only their own synagogue, but also their own burial-ground, called "the Greek cemetery."

2. Spanish Division: Composed of Spanish Jews who had lived for a time in the Two Sicilies, and who emigrated to Corfu at the end of the fifteenth and during the sixteenth century; among their number was Don Isaac Abrabanel. It seems that these few families for a long time preserved the Castilian language, for in a polyglot chant which can not date further back than the beginning of the nineteenth century, there are found Spanish verses, together with Hebrew, Greek, Italian, and Apulian; and it is evident that the author of the production, Dr. Lazarus de Mordo, wished to incorporate into it all the languages or dialects then spoken by the Jews at Corfu. These Spaniards united with the Apulians, who came at the same time or a little later, to form the Apulian or Italian congregation. Their family names, of Spanish origin, are as follows: Aboaf, Gaon, Cherido, Sarda, Razon, Castro, and Sforno; in addition to which there were formerly Abrabanel, De Miranda, Senior, and Coronel. They are few in number.

3. Apulian or Italian Division: Composed of Jews who had been driven (1540) from Apulia by Don Pedro of Toledo, viceroy of Naples. They were so numerous that in time they imposed upon their coreligionists not only their Apulian dialect, but also their costume. The fact that they possess their own synagogue and cemetery is attributed to the unfriendly reception which they met with at the hands of their Greek coreligionists. Eventually, however, their suffering must have softened the original ill will. As a matter of fact, the Greeks, who now constitute the majority of the Jewish population, speak the despised Apulian dialect, while the Apulians have generally adopted the more refined Venetian.

Many of the Apulian families have Biblical names: Israel, Nissim, Mattatia, Misan (מיסן), Azar, Baruch, Acco (?), Hanen, Hayyim, Elia, Levi, and Mordo (Mordecai); also Dente, Osno, Vivante, and Minerbo. The Nahamali and Maurogonato families, who belong to the Italian synagogue, though they apparently should belong to the Greek, probably either came after Corfu had become Italianized, or else left their original synagogue; the latter is known to have been the case with the Mazza family. Elegies in the Apulian language for the Ninth of Ab have been preserved, and it is still a custom, even among the well-to-do classes, who have given up the Spanish dialect, to explain the symbolic

rites in Apulian ("kadesh," "u-rehoz," "karpas," etc.) on Passover eve. The population, which to-day (1901) exceeds 3,000 souls, numbered 1,171 in 1760.

The position of the Jews during the first two centuries of their establishment on the island was enviable, especially toward the end of the Angevin régime, the princes of that house issuing decrees which took the Jews under their protection (1317, 1324, 1364, 1365, and 1370). In 1332 Philip II. of Taranto called the attention of the Corfu authorities to the fact that his previous decrees (*e.g.*, March 12, 1324) in favor of the Jews had not been carried out. These privileges were renewed by his grandson, Philip III., in 1370, and probably also by Robert of Anjou in 1338. Robert's widow, Marie de Bourbon, Empress of Constantinople, especially charged the captain of Corfu to see that the Jews of the island were well treated. The same privileges were confirmed Dec. 18, 1382, by Charles III. (Duras), King of Naples.

Jews were often attachés of embassies sent by the community of Corfu to the King of Naples. In 1386 the island voluntarily sought the protectorate of Venice, remaining under Venetian rule until 1797. Among the six ambassadors sent to that city to conclude the negotiations was a Jew, David de Semo; while another Jew, Johama Mayeha, was a member of a foreign embassy in 1515. The seigniory of Venice, which became possessed of Corfu Jan. 1, 1385, took the Jews under its protection. By a decree issued Jan. 22, 1387, it assimilated the Corfiote Jews with the other citizens in the matter of taxation, and granted them the free exercise of their religion, though still holding them to the distinctive signs in their dress. But the Christian Corfiotes, jealous of the commercial success of the Jews, repeatedly sent delegates to the Senate of Venice to petition for humiliating measures against them; and in time the Senate weakly yielded. It did indeed deny the request for permission to stone the Jews ("de Judeis lapidandis"), made by the embassy of Corfiote patricians that came to Venice in 1406; but in order to satisfy the embassy, it decreed that the Jews should wear thenceforth on the front of their dress a yellow wheel or disk as large as a cake of bread, and the women yellow veils on their heads, under penalty of 300 ducats for non-compliance. It also forbade them to acquire houses or lands outside the city or outside the Jewry.

At the instance of a Jewish deputy, the physician Master Angelus, the Senate abrogated this decree in 1408, and in 1423 confirmed to the Jews the proprietary rights in their houses, and, upon the whole, recognized, as had its predecessors, the great services rendered by the Jews to the city. They carried on an extensive commerce and contributed more than their share to works of public utility

(construction of walls, fountains, etc.),

Jews to the running expenses of the city, **Protected.** and to public loans. Many documents remain, dating from the time of the Byzantine emperors, the kings of Naples, and the republic of Venice, testifying to these acts of patriotism on the part of the Jews. For this reason there was never a ghetto at Corfu, in the ex-

act sense of the word; and when in 1571 the republic of Venice expelled the Jews from its dominions, it excepted those of Corfu. By a strange combination of circumstances the republic of Venice, which, on its accession to power, had apparently awakened among the inhabitants the spirit of hatred and contempt against the Jews, protected these very Jews as soon as it recognized their utility to the state.

Documents are extant which show that the Jews knew how to defend their ancient rights. One of these, dating from 1425, is especially noteworthy. According to this document an attempt was made to force the Jews to tear down their houses, on the pretext of erecting upon the sites new walls for the city; whereupon the Jews reminded the magistrate that at the cession of the island a clause placed them on an equal footing with their fellow citizens, and (adds the document) "dicunt et affirmant se esse cives et habitatores Korphoy." Eventually, however, they were compelled to yield to the demand, and consequently dispersed over the entire city, to the great scandal of the Christians. They lived thus more than a hundred years without being molested.

About 1524 the Corfiote Christians began to protest against this close neighborhood, and sent an embassy to Venice to petition that the Jews be confined to a special quarter. The republic thereupon issued a ducal order to that effect, which, however, for unknown reasons (possibly at the instance of the Jews themselves) remained a dead letter. On Oct. 28, 1578, the brothers Menahem and Aaron Mozza received from the doge, Nicholas de Ponte, a confirmation of the ancient privileges of the Corfu Jews. They were expressly exempted from the levy of 50,000 scudi placed upon the Jews by the Venetian Senate July 12, 1573. Petition followed petition (1532, 1546, 1562, 1592), but only after the lapse of a hundred years (1622) were the Jews restricted to a special quarter (near the old fortifications at the Porta Reale and the Via Schulemburg), which still exists. This was not more of a ghetto than the old quarter had been; for a number of Christians lived there, and, unlike the ghetto at Zante and elsewhere, it had no gates to be closed at night.

The larger number of Jews followed some handicraft, and the rich ones were engaged in commerce, acquiring great wealth. They were devoted to their country, fighting for it and giving freely of their money, as may be seen from the written testimonials they obtained from the Venetian governors

when the latter laid down their office and left the island. In 1431 they lent **Ocupations.** the Venetian Senate 3,000 ducats. In the seventeenth century they aided the

Venetian armies with money during the disastrous wars with Crete and the Peloponnesus. But in 1656 the captain of the island levied a tax of 10,000 reals upon them, though they had declared themselves ready to pay 500 ducats a year for military purposes. The Jews protested, and on Oct. 25 the Senate ordered the money to be returned. In 1716 they bravely assisted in defending the island of Corfu against the Turks. Two documents testifying to their exceptional heroism are extant. One of these, written by the Venetian generalissimo

himself, Count de Schulemburg, tells of the remarkable conduct of the Jewish community; the other, prepared by the governor-general of Venice, Count Loredan, is in favor of Mardochee Mordo (Barbanera), who particularly distinguished himself. Furthermore, the aide-de-camp of Schulemburg, the Corfiote strategos, writes that, of all the inhabitants, the Jews rendered the most signal services. This deliverance is solemnly commemorated every year on Aug. 6.

In the seventeenth century there were 500 Jewish families at Corfu, and in the eighteenth 1,171 Jews, according to the statistics of the governor Grimani. About this time the Corfiote Christians were greatly excited over the conversion to Christianity of the Jewess Rachel, daughter of the rich merchant Vivante. Notwithstanding all their difficulties, the Jews still enjoyed some rights. Aside from the profession of medicine, which they practised everywhere, they were allowed at Corfu (certainly at a very early time) to practise law. It is true that a decree of May 14, 1637, inhibited the Jews of Venice from practising law; but although the attempt had

been made to extend this inhibition to Corfu in 1679, it was withdrawn May 7, 1680. In 1654 Mordecai Cohen was granted a special authorization to defend his coreligionists at the bar. According to an ordinance of 1698, twenty candidates were admitted to the bar in that year, among them being seven Jews; namely, Mordecai Cohen, Elia Cohen di Mordecai, Joshua Forte, Matthew Forte, Solomon Nacamulli, Abraham Pipi, and Abraham Israele. When in 1728 a tax was levied upon the Jews of Dalmatia and of Venice, those of Corfu were again exempted, because of their ancient privileges. They were likewise exempted from the restraints put upon the Venice Jews in 1771. In 1774 orders were sent to Gen. Antonio Renier to remove the Jewish lawyers from the court. Renier's report on the subject was, however, so favorable to the Jews of Corfu that on Aug. 26 he received orders that they were in no way to be further molested.

While Corfu was under French dominion (1797-1799 and 1805-15) the Jews enjoyed all the rights of citizenship, and their rabbi ranked with the Catholic bishop and the Orthodox archbishop. But when, together with the other Ionian islands, it formed a republic under the protectorate of England (1815-1863), the Jews were not only forbidden to practise in the courts, but lost all their rights. When Corfu was annexed to Greece the Jews of the former, as well, as of Chalcis (Eubœa) became entitled to full civil and political rights, for the Grecian constitution makes no religious distinctions. That they entered into the enjoyment of these rights was due in large measure to the initiative of Ad. Crémieux, who in 1864 called the attention of the Ionian Senate to their situation. Since then Jews have figured among the municipal councilors of the island; e.g., Dr. Victor Semo, Joseph Nacamulli, Raphael Gesuà, etc. Elia de Mordo, merchant, was the first assessor; and there have been three notaries and several other Jewish government officials.

In 1891 some evil-minded Christians of the island

created a scandal in order to hinder the Corfiote Jews from participating in the elections. A little Jewish girl, Rubina Sarda, was killed, probably by some of these anti-Semites, and the report was spread that a Christian child had been slain for ritual purposes, thereby arousing the opposition of the populace against the Jews. Most of the latter were obliged to leave the place in order to escape a massacre. Although the impartial Greek press disclosed the plot, the instigators, protected, it is said, by high personages, were not punished.

Until the annexation the community of Corfu was governed by two councils of administration

(one for each congregation), whose decisions regarding communal matters were sanctioned by the government.

Each congregation had two syndics ("memunim") and two parnassim. During the Venetian régime the syndics were elected every year by the council in the palace of the governor. They were responsible for order in their district, and occupied the office of conciliators and ediles. They attended the public ceremonies of the governor in their costume of cloth, the costume of the Christian syndics being of silk. Under the British protectorate the interference of the government in communal matters was limited to the presence of a sergeant-at-arms of the municipality at the conferences of the council. The two councils assembled together when questions of general interest were to be discussed. Since the annexation the government has had nothing whatever to do with communal affairs, the rabbis filling the position of civic officials. The two synagogues have been under one administration and one council since 1891.

Religious studies formerly flourished in Greece, and especially in Corfu. A new impetus must have been given to these studies after the

advent of the Apulian Jews, in whose communities they were assiduously cultivated. The paraphrase of the Bible verse "From Bari goeth forth the Law, and God's word from Otranto," is well known. David b. Hayyim ha-Kohen, the chief rabbi of Padua in the fifteenth century, was of Corfu. Moses ha-Kohen, rabbi of Corfu, wrote (1580-1600) a poetical version of the story of Esther, entitled "Yashir Mosheh" (ed. princeps, of David Mazza, Mantua, 1612). Mazza calls himself the most humble of the disciples of the chief rabbi Kohen, and in his preface announces the early publication of a work by himself, a commentary on Canticles. The following rabbis have lived at Corfu within the last two centuries: Joseph ha-Kohen, Menahem b. Samuel Vivante (about 1710), Eliezer de Mordo, Mordecai Hayyim Elie Mordo, Hayyim Shab. Jos. ha-Kohen (about 1744), Elia Menahem ha-Kohen (died 1803), Jeshurun Hai-Penso, Raphael Eliezer Shabbethai Semo, and Abraham Hayyim Caliman Ferro (died 1820), all of whom were Corfiotes except, perhaps, R. Penso (probably identical with a physician of the same name known to have lived in Corfu). The last of the native rabbis to officiate was R. Ferro.

Strangers were henceforth summoned to the office, the first of these being the chief rabbi Rabi Shem-Tob Amarilio, a native of Salonica, who occupied

the chair of Corfu until 1830. This rabbi, who subsequently went to Larissa, Thessaly, was a great Talmudist, and left a large number of manuscripts, chiefly sermons, which are still preserved at Larissa. He was succeeded at Corfu by the chief rabbi (חסידא קדישא = "the pious sage") Judah Bibas of Gibraltar (or of Morocco), who had a large following there. Bibas left Corfu in 1852, going to Hebron, where he died shortly after his arrival. During the following six years the pulpit of Corfu was occupied by Moses Israel Hazan of Jerusalem, distinguished as an orator and writer, after whose departure it remained vacant for about five years, when it was again occupied (1865) for six years by the pious and learned R. Isaac Raphael Tedeschi, an octogenarian, who became later the grand rabbi in his native place, Ancona. An important event during his rabbinate was the official visit of King George of Greece to the Apulian temple, June 5, 1869.

Four years after the departure of R. Tedeschi the pulpit of Corfu was occupied by the grand rabbi Joseph Emmanuel Levi (1875) of Italy, previously rabbi of Mondovi and Cuneo, Piedmont, who held the position until his death in 1887. He founded

the girls' school and the institute of arts and crafts, organized lotteries for charitable purposes, and by his virtues won the support of the government and the people. Before his arrival he

had written a good French grammar for Italians, and from 1878 to 1885 he published the review "Mosé Antologia Israelitica." At his death the government took charge of his funeral, burying him with the military honors due to a general. He died a poor man. In 1888 the community of Corfu called as rabbi the Rev. Alexander da Fano, then occupying the pulpit at Reggio (Italy), who after four years went to the grand rabbinate of Milan. R. Fano was distinguished by his pious eloquence and his kind heart. He tried in vain to found a kindergarten in Corfu. From 1900 till May, 1902, the pulpit of Corfu was occupied by Nathan Levy, a graduate of the seminary of Paris.

Among the Jewish physicians of note may be mentioned the Cesanas (father and son); Aboaf, the elder; Emmanuel Sipilli, surgeon in the Venetian army; Jacob and Marc Cohen, also army surgeons; Moses Sipilli; Lazarus and Shabbethai de Mordo; and especially Lazarus de Mordo, the younger (1744-1823), a member of the Ionian academy; and Cæsar USIGLIO. Of Cypriote origin are the ophthalmologist Maimonides Levi; Victor de Semo, the director of the city hospital at Pisa, and Victor Belleliat Port Said.

The "Cronica Israelitica" (1861-63), a political and literary journal, aimed to bring about the political emancipation of the Ionian Jews. It was edited by Joseph Nahamali (died 1886), who was

Periodicals also the author of a grammar of the Greek language, a translation of the daily prayers, and a Greek translation of the Pirke Abot. From 1864 to 1879

he also edited at intervals the Italian weekly review called "Famiglia Israelitica," a periodical devoted to light literature. Nahamali was president of the community, and an indefatigable

promoter of education among the people. In 1878 the grand rabbi Levi, began, the publication of "Mosé, Antologia Israelitica" (which was suspended in 1885); and in 1899 the Greek monthly "Israelite Chronographos" was established by M. Caïmi. The purpose of this periodical was to acquaint the Christian population with Judaism and the legitimate aspirations of the Jews and to create a rallying-point for the Greek Jews. Prof. Maimon Ventura of Egypt has published some poems in classical Hebrew; and the former grand rabbi of Corfu, Alexander da Fano, is the author of a volume of prayers, entitled "Preghiere" (1889). Dr. Lazarus BELLELI has written (1890) a valuable study on the Greek Bible of Constantinople. Sp. C. Papageorgi and M. Caïmi published the dirges sung in private houses and synagogues in Corfu; and the former presented to the Orientalists' congress at Berlin a Greek hymn at one time used on the Pentecost festival, and originally sung in alternate Hebrew and Greek verses (see "Jew. Chron." July 26, 1901, p. 25). Prof. Dario Levi occupied in 1899 a chair at the Academy of Lacedogna, Italy. Alexander Levi (born 1871), an eminent sculptor, is established at Naples.

About 1840 a struggle broke out between the Orthodox members of the community and the Reformers, the former calling themselves "Marrochini," from "Morocco," the alleged birthplace of R. Bibas,

and the latter "Sabbatini," perhaps after a certain "Shabbethai," one of the leaders of the party. The struggle was bitter, dividing the community into two hostile camps, which carried their differences even into the streets. The reformers founded the Hebrew institute. The pietists eventually obtained supremacy over the Sabbatini, who, it seems, constituted a secret society.

Two parochial schools for girls and boys have been founded, the expenses for general instruction being defrayed by the government and those for Hebrew by the community, the rabbi himself conducting the advanced class in this branch. The children of the well-to-do class attend the public high school. There is a committee on philanthropy, which derives its revenues from voluntary contributions; this being the only relief society, with the exception of the two burial associations ("gemilut hasadim"), one for each congregation. No bequests of any importance have been left to the community, excepting those of Samuel Gaon to the city hospital.

The Apulian congregation has three temples, two of them large and the other small but attractive.

In the two larger temples the women's gallery is supported by stone pillars. **Synagogues;** The large Apulian temple has a very fine mahogany Ark and reading-desk; **Rite.** while the temple of the Greek congregation is an immense structure devoid of pillars on the sides and containing a splendid ancient reading-desk designed in the Corinthian style and constructed of white wood, with well-preserved gildings. The rite of Corfu has in some respects the same peculiarities as has the Roman. Among those who have com-

posed liturgic additions to this rite are Mazzal-Tob, Isaac ben Abraham, Abraham b. Gabriel b. Mordecai, and Moses ha-Kohen. Joseph b. Abraham, the commentator of the Mahzor, lived in Corfu in 1554. The details of the Corfu rite may be seen in Bodleian MS. No. 1082 (Neubauer, "Cat. Bodl. Hebr. MSS." col. 275) and in those of the Montefiore Library in London (Hirschfeld, in "Jew. Quart. Rev." xiv. 395 *et seq.*).

Among the customs still peculiar to the Jews of Corfu may be mentioned that of celebrating the third night after a birth, when the Three Fates are believed to visit the child and pronounce its destiny. Gold coins and rue twigs are placed in the linen of the child, and visitors are treated to "kukkudi," a dish made of boiled wheat, pomegranate, and currants. This festival is called "Mire" (Moirai). The game of knuckle-bones ("astragali") has survived in its ancient form among the Corfiote Jews ("Jew. Chron." Sept. 19, 1902), p. 23.

Many Jews of Corfu are dealers in oil and manufactured goods. Others are engaged in manufacturing umbrellas, hats, artificial flowers,

Statistics. shoes, tinware, and jewelry, and a number are employed as grocers, printers, and tailors. The population in 1901 numbered 5,000 Jews in a total of 25,000 inhabitants. On account of adverse business conditions many of the Jews are now (1901) emigrating to Egypt.

CORI (Chore): Village of Campania, Italy, about thirty miles from Rome. There is a small Jewish community there, the origin of which is not positively known, though it is probable that it was formed by settlers from Rome. The community is first mentioned in a document dated 1535, where it is stated that of the Turkish tax imposed upon Rome, the community, as "vicesima," paid about one-eighth (amounting to the twentieth part of all its property). In 1536 the community was granted permission to move its synagogue to another site. Owing to persecutions, the community of Cori, like most of the others in the Papal States, rapidly declined in the next few years, the taxes turned over to the state by the head of the community, Sabatismus Amedei, in 1542 showing a material decrease. In 1566, after the Jews of the pontifical states had lost all their rights by the bull of Paul IV., and after the murderer of Abraham b. Bezalel of Cori had gone unpunished, the community, then numbering about 200 persons, resolved to emigrate to Palestine under the leadership of its rabbi, Michael Gallico, and join the Jewish colony founded at Tiberias by Don Joseph Nasi. The expenses were to be covered by a collection among its Italian coreligionists. It is not known whether the emigration was successfully carried out. In fact, there was still a small number of Jews there in 1569, paying a reduced tax-rate.

IV—18

CORIANDER: An umbelliferous plant with white blossoms, which is peculiar to the Mediterranean district (*Coriandrum sativum*). It is widely cultivated in the East, and grows wild in Egypt and Palestine. It is especially abundant in the valley of the Jordan. Its fruits or seeds, which have a distinctly aromatic flavor, are used in the preparation of confectionery and also in ordinary cooking. They are employed medicinally to produce a stimulative effect and to relieve flatulence.

The only allusions to the plant in the Bible are in Ex. xvi. 31; Num. xi. 7, where the seeds are compared to MANNA.

The Hebrew name "gad" was thought by Lagarde to be of Indo-European origin ("Gesammelte Abhandlungen," p. 57). It is probably not connected with any Semitic root (compare Löw, "Aramäische Pflanzennamen," No. 155). By some scholars it is identified with "goid," which the Scholiast in Dioscorides, iii. 64 states is the Punic equivalent of κόριον ("coriandrum"). This Greek name is probably derived from κόρις ("bug"), owing to the unpleasant odor emitted by the plant when handled, which is highly suggestive of the effluvium of the bedbug. The Aramaic name "kusbara" appears in modern Greek in the form "kusbaras," which has supplanted the older name.

CORIAT: Jewish family of Morocco. In 1812 there appeared at Pisa a Hebrew work, under the title "Zekut Abot," in which three members of this family collaborated—Judah, his son Abraham, and his grandson Judah. This book contains an account of the religious customs of the Jews of Morocco, and gives their names, as well as the names of the places in Morocco inhabited by Jews.

CORINALDI, DAVID HAYYIM: Italian rabbi and author of the first half of the eighteenth century. He was a pupil of N. Pincherle, and rabbi at Reggio, Leghorn, and Triest. He wrote "Bet Dawid" (House of David), on the Mishnah; at the end of his work are diagrams relating to certain halakic points, and showing considerable mathematical knowledge (Amsterdam, 1738–39). Corinaldi also wrote notices on the Shulhan 'Aruk, part of which were published by Azulai. There is, besides, a manuscript collection of sermons delivered in Triest, and an article, under the title "Dibre Shalom we-Emet," on the short י found in the word "shalom" (Num. xxv. 12). In this MS. are also some critical notes against David Pardo, author of "Shoshannim le-Dawid," which had caused a conflict between the two rabbis. They were, however, induced to sink their differences by the intervention of the rabbis of Leghorn.

CORINTH: A city in ancient Argos, Greece, and the center of the cult of Aphrodite. Jews lived here, as in the other cities of Greece (Philo, "Lega-

tio ad Caium," § 36), although little is known of their history. The apostle Paul preached Christianity in the synagogue of Corinth for eighteen months, and baptized the archisynagogue Crispus (I Cor. i. 14); but he was reviled by the other Jews and accused before the governor, Junius Annæus Gallio (53 c.e.). The latter, however, contemptuously declined to have anything to do with the religious quarrels of the Jews; and the populace maltreated before his eyes the archisynagogue Sosthenes (Acts xviii. 12-17), who was probably the inefficient successor of Crispus.

The occurrence of this scandalous affair in the very presence of the Roman governor shows that there were a large number of Jews at Corinth. They seem to have had a preference for that city; for Aquila and his wife Priscilla, who came originally from Pontus, went to Corinth with the Jews who were driven from Rome. Silas and Timothy, also, went there from Macedonia (Acts xviii. 2-5).

Pharisaic Judæo-Christians were the cause of much dissension in the young Christian community (II Cor. iii. 1, x. 13, xi. 5); for they objected to the celibacy of their Christian brethren (I Cor. vii. 1); and the Christian community was probably obliged to take a stand against the immorality that prevailed in certain circles (I Cor. v. 9-11, vi. 12-19; II Cor. xii. 21). These conditions have given rise to the modern hypothesis that the Jewish Book of Jubilees—which insists upon marital fidelity and condemns unchastity—was directed against the immorality at Corinth (Singer, "Das Buch der Jubilæen," p. 200, Stuhlweissenburg, 1898).

Corinth was a great center of art, and its influence spread as far as Judea. Josephus, in describing the Temple of Solomon, mentions the Corinthian style of architecture ("Ant." viii. 5, § 2). This, however, is an anachronism, and is copied from the description of the Herodian Temple, which had a number of columns in the Corinthian style (*ib.* xv. 11, § 5). There were splendid Corinthian candlesticks in the palace of Agrippa II. at Tiberias (Josephus, "Vita," § 13). The Corinthian bronze that Pliny praises ("Historia Naturalis," xxxiv. 1, § 3) was prized at Jerusalem (Josephus, "B. J." v. 5, § 3), and is also mentioned in rabbinical sources (Tosef., Yoma, ii. 4; Bab. 38a).

CORMORANT: The translation given in the Bible (Lev. xi. 17; Deut. xiv. 17) of the Hebrew word שָׂרָף. In these passages it is specified as one of the unclean fowls. The A. V. (Isa. xxxiv. 11; Zeph. ii. 14) gives "cormorant" as the translation of נָחָשׁ; but the R. V. renders it correctly as "pelican." Tristram, Post, and others agree that the derivation of the word from a root signifying "plunger" indicates the bird known to-day as *Phalacrocorax carbo*, which is abundant on the Mediterranean coast of Palestine and in the valley of the Jordan. Its classification among the unclean birds is due to the fact that it feeds upon fish. Its name indicates its characteristic of plunging into the water to catch its prey. Its habits seem to be

similar to those of the tern or gull of Western waters.

I. M. P.

CORN (כֹּרֶן): The seeds of cereal plants. (1) Barley ("se'orah"), which was and still is the most common grain of Palestine, is the ordinary food of horses, asses, and oxen. (2) Beans ("pol") were also in very general use. They were brought to David on his flight from Absalom (II Sam. xvii. 28), and were one of the ingredients which Ezekiel was commanded to mix with his bread (Ezek. iv. 9). (3) Fitches, or vetches ("kezah"), really the seed of the nutmeg-flower (bot. *Nigella sativa*), were no doubt used as a condiment sprinkled over cakes, as at the present day (see Tristram, "Natural History of the Bible," p. 444). (4) **Grains.** Lentils ("adashim") were a sort of vetch, grown in poor soil and often mixed with meal for bread. (5) Millet ("doḥan"; bot. *Panicum miliaceum*) was and is used in baking certain sweet cakes. Compare Ezek. iv. 9, where the prophet is commanded to use millet in making his bread. (6) Pulse ("zera'im") was a general name including most edible seeds, such as millet, peas, etc. (7) Vetch ("kussemet"; bot. *Vicia ervilia*) is wrongly translated "rye" in the A. V. (see Ex. ix. 32; Isa. xxviii. 25). Rye is unknown in Palestine. (8) The most important grain of ancient times was undoubtedly wheat ("ḥiṭṭah"). Compare the wheat-harvest mentioned in Gen. xxx. 14.

The following are the most important terms used in the O. T. in connection with corn:

"Abib," "fresh young ears of corn" (Lev. ii. 14; R. V. "corn in the ear"; "grain of wheat"). "Bar," literally "clean, winnowed corn" (compare modern Arab. "burr," and Gen. xl. 49; Prov. xi. 26). "Belil," "cattle-fodder" (Job xxiv. 6; A. V.

Terms "mingled corn, dredge"). "Dagan," **for Corn in** as indicated above, was the general

O. T. term for corn or grain. It is very commonly used with "tirosḥ," "must, wine" (Deut. xxxiii. 2). It is probably not connected with the god-name DAGON. "Geresh" (Lev. ii. 14, 16), "beaten corn"; R. V. "bruised corn." "Karmel" (II Kings iv. 42), "ears of corn"; better, "fruit, garden-produce." "Abur" (Josh. v. 11), "old corn"; R. V. in marg. "produce," "corn." "Aremah" (Ruth iii. 7), "heap of corn." "Kali" (I Sam. xvii. 17), " parched corn." "Kemah," "standing corn" (compare Judges xv. 5, where it is stated that Samson tied firebrands to the tails of foxes and loosed them in the Philistines' standing grain). "Ripot" (II Sam. xii. 19), "bruised corn." "Sheber" (from the root meaning "to break"), perhaps "broken corn," or "that which breaks the hunger" (Gen. xlii. 1), or simply "that which breaks the fast" ("sheber ra'abon"; compare *ib.*, verse 19); from this the denominative "hishbir," "sell corn." "Shibboleth" (Ruth ii. 2; Gen. xli. 5), "ear of corn" (Greek *στάχυς*, Matt. xii. 1; Mark ii. 23).

Grain was reaped at about knee-height from the ground, quite near the ear. It was gathered up in the reapers' bosoms and tied into sheaves, which were then carried on pack-animals to the threshing-floor ("goren"), an open space exposed to the wind. Here it was threshed, either by the hoofs of cattle,

which were driven around the floor on the spread-out grain, or by mechanical means. Of the latter the "morag" was the most important.

Reaping and Threshing. This was a heavy sledge with a rough bottom which was weighted both by stones and by the driver, who stood upon it or else sat upon it on a stool (see AGRICULTURE). The grain was then winnowed by being, for example, thrown into the air both by the "fan" (A. V.), more properly "fork," and by the "grain-shovel." The grain which fell back was heaped up (Ruth iii. 7) separately from the straw, which was reserved for fodder (Isa. xi. 7). The chaff was, of course, blown away.

Very little is known about the nature of the storage-places for grain mentioned in the Old Testament. At the present day grain is kept in underground chambers, which are usually hewn out of the rock, but sometimes dug in soft soil.

"CORNER-STONE." See PERIODICALS.

CORNER-STONE: The laying of the corner- or foundation-stone (פִּנֵּה אֶבֶן, or אֶבֶן מוֹסָדוֹת, or אֶבֶן מוֹסָדוֹת) (Job xxxviii. 4-6; Ps. xviii. 15, xxiv. 2) of the earth by the Creator is a conception borrowed from Babylonian Cosmogony, the earth being regarded as a huge mountain piled upon the abyss (Job xxvi. 7; "Journal Asiatique," ix. 101; Prayer of Manasses; compare Ps. xviii. 7; Micah vi. 2; Deut. xxxii. 22).

The laying of the corner-stone of a city or of a great structure was the occasion of a solemn rite in ancient times. To the pagan mind it appeared as an undertaking provoking the jealousy of the deity unless some bloody sacrifice was offered to pacify him (see Tylor, "Primitive Culture," pp. 104-108). Henceforth the foundation-stone, or the threshold beneath which the sacrificial blood was shed, remained the seat of the guardian spirit of the edifice, and hence the altar of the household (see H. Clay Trumbull, "The Threshold Covenant," New York, 1896). The finding by Nabunahid, the last Babylonian king (556-538 B.C.), of the foundation-stone of the temple of Istar, built by Sargon I. 3800 B.C., is related as a triumph in his inscription (Schrader, "K. B." 1890, iii. 85), and the laying of the foundation-stone for his restoration of the temple of Nebo, with all the solemnities connected therewith, is described in another inscription (Schrader, *l.c.* iii. 5).

The story of HIEL the Bethelite, who rebuilt Jericho, laying "the foundation thereof in Abiram, his first-born," and setting up "the gates thereof in his youngest son" (I Kings xvi. 34; Josh. vi. 26), seems to be connected with the primitive custom of laying foundations with blood, as, indeed, skulls were found built in with the brickwork when the tower ("zikkurat") of the temple of Bel at Nippur was excavated (see "Jour. Bibl. Lit." 1896, xvi. 11, and Cheyne and Black, "Encyc. Bibl." s.v. "Hiel"). The Midrash also knows of Hebrews who were immured in buildings in Egypt (Ex. R. v.; compare Trumbull, *l.c.* pp. 47 *et seq.*, and Simrock, "Handbuch der Deutschen Mythologie," 1874, p. 57). One of the many symbolical names given to the terraced tower of the temple of Bel-Marduk was "the foundation-

stone of heaven and earth" (Jastrow, "Religion of Babylonia and Assyria," p. 639).

The same importance seems to have been attributed also to the foundation-stone of the Temple at Jerusalem. In I Kings v. 17, vii. 9, the costly wrought stones used for the foundation of Solomon's Temple are described, and in I Kings vi. 37 the time of the laying of the corner-stone is especially mentioned. In Ezra iii. 10-11 the solemnities at the laying of the corner-stone of the Second Temple by Zerubbabel are detailed (see also Hag. ii. 15, 18-23, and Zech. iii. 9, iv. 9-10, viii. 9). Indeed, the exilic seer must have been familiar with solemn corner-stone rites when picturing the rebuilding of Jerusalem (Isa. liv. 11; compare li. 1), just as Isaiah was when predicting a new and "tried and precious corner-stone of sure foundation" for Zion (Isa. xxviii. 16 *et seq.*; compare xiv. 32, Hebr.). The fragmentary beginning of Ps. lxxxvii. obviously refers to the foundation-stone of Zion as the most sacred spot of the earth, and the rabbinical "eben shetiyyah" (the foundation-stone of the world, Yoma 54b) is but the proof of a continuous popular tradition. But that here also the ancient rite of some blood-sacrifice was not altogether forgotten, seems to be indicated by the connection, preserved at least in the Book of Chronicles, between the laying of the corner-stone of the Temple and the sacrifice offered by David for the cessation of the plague, at the threshing-floor of Ornan the Jebusite (II Chron. iii. 1-3; compare I Chron. xxi. 18-31 with II Sam. xxiv.).

The ceremonious laying of the corner-stone of public buildings, especially of religious and charitable institutions, has become a universal custom, and was adopted by the Jews during the last century. The ceremony consists of placing an appropriate record or memorial in the hollow part of the stone beneath, and then of laying in place the corner-stone, accompanied by certain solemn forms. See also CONSECRATION.

K.

CORNWALL: Extreme southwest county of England; distinguished in early days by the tin-mines which are said to have been visited by the Phœnicians. Some of the relics of the old workings are still called "Jews' tin" and "Jews' houses." There is a town in Cornwall known as "Market Jew" (modern Marazion). Prof. Max Müller suggested that this was a folk etymology for "Thursdaies market" ("Marhas diow"), but there is distinct evidence of the connection of the Jews with the stannaries or tin-mines of Cornwall in the reign of King John, when they farmed the whole product of the mines for 100 marks, one-tenth of which was paid as a title to the Bishop of Exeter (Camden, "Britannia," ed. Gough, "Damnonii," p. 9). Besides this, in the Red Book of the Exchequer, in some clauses concerning the Cornwall stannaries dated 9 Ric. I., 1198, every regulation is drawn up with reference to "man or woman, Christian or Jew." There are no other traces of Jews in Cornwall in early times; but at the end of the eighteenth century a number of Jewish merchants settled in Falmouth, whence they sent out hawkers through the country towns,

who returned on Friday evenings for Sabbath worship.

J.

CORO: A town in Venezuela, five miles from its seaport, La Vela de Coro, on the Caribbean Sea. It had, in the early days of the republic, many Jewish inhabitants, who came from the island of Curaçao, in the Dutch West Indies, about sixty miles from La Vela de Coro.

In the year 1855 the Jews of Coro, numbering about 300, were plundered, maltreated, and driven to seek refuge in their native place, Curaçao. As they claimed Dutch citizenship, the consul-general for the Netherlands, Van Lansberge, informed the home government, and three ships of war were sent to La Guayra, the principal seaport of Venezuela, and the redress demanded was at once granted. The Venezuelan government agreed to salute the Dutch flag; to restore to the Jews their property; and to pay an indemnity of 200,000 pesos (\$160,000), the last clause being carried into effect in 1859, after lengthy diplomatic negotiations with the ambassador of the Netherlands, Jhr. O. van Rees.

In 1863 there were about 250 Jews in Coro, and religious services were held at the residence of Mordehay Abraham Senior, and afterward at that of his son Isaac. The cemetery, established in 1858, is situated on the outskirts of the town.

Another outbreak against foreigners, in June, 1902, compelled the Jews again to seek an asylum in Curaçao, tendered to them by the governor of the island, Jhr. J. O. de Jong van Beek en Doorn, who, upon learning the facts, despatched the Dutch man-of-war "Koningin Regentesse" to protect them. It returned to Curaçao with eighty Jewish women and children on board. In July following, the same vessel was sent to La Vela de Coro for the remainder, and only a few Jewish residents remained behind to protect the property of the exiles.

CORONATION CHAIR: The so-called "Stone of Destiny," forming part of the coronation chair of the kings of England in Westminster Abbey, is said by tradition to be the identical stone on which Jacob rested his head when he saw the vision of the angels going up to heaven (Gen. xxviii. 11-12). According to some, the stone was that on which Abraham had intended sacrificing Isaac (see Rye, "Visits of Foreigners," p. 10, and compare Pirke R. El. 35, where the two stones of the Biblical stories are identified). According to a legend first found in the "Chronicles" of John of Fordun, the stone was transferred from Palestine to Egypt; from there Gathelus, son of Cecrops, King of Athens, who had married Scota, daughter of Pharaoh, transferred it to Spain, whence it was carried by Simon Brech, son of Milo the Scot, to Ireland. There it was used on the sacred Hill of Tara as the "Lia Fail," or "Stone of Destiny," on which the kings of Ireland were anointed. Fergus More, the founder of the Scotch monarchy, is said to have borne it from Ireland to Dunstaffnage about 500, and it was ultimately

taken by Kenneth II., about 840, to Scone. All the kings of Scotland were crowned upon it, until it was removed by Edward I. to Westminster Abbey; and upon it every king of England from Edward III to George V. has been crowned. An attempt to get it back was made by the Scotch in the reign of Edward III., and that king even wrote to the Abbot of Westminster ordering him to return it (Legg, "London Coronation Records," Westminster, 1901, p. 77); but the people of London would not allow it to be taken (Holinshed, "Historie of Scotland," p. 132). It has always been one of the chief attractions of Westminster Abbey, and is referred to as such by Addison ("Spectator," No. 329) and by Goldsmith ("Citizen of the World," letter xiii.).

The veneration with which the stone is regarded is undoubtedly due to the legend connecting it with Jacob; but Dean Stanley suggests that it was originally connected with St. Columba, and geologists are inclined to trace its origin to the island of Iona, the scene of St. Columba's last days.

The Anglo-Israelites make much of this connection of Jacob's stone with the coronation chair, and largely base upon it their claim to the identification of the English people with the Lost Ten Tribes (see ANGLO-ISRAELISM).

J.

CORONEL, NAHMAN NATHAN: Palestinian scholar of Sephardic-Ashkenazic parentage; born at Amsterdam 1810; died at Jerusalem Aug. 6, 1890. His teacher was R. Abraham Susan. In 1830 he emigrated to Safed, Palestine, where he married, afterward settling in Jerusalem. There he studied in the Sephardic yeshibah. He became especially interested in rabbinical manuscripts, and acquired many rare copies, some of which he sold to European libraries, while others he published with his own annotations. The latter are: (1) "Bet Nathan" (The House of Nathan), containing a varied version of Berakot, MSS. of Cairo, and decisions by Isaiah di Trani, the elder, with an introduction by Coronel (Vienna, 1854). (2) "Hamishshah Koterisim" (Five Pamphlets), containing a varied version of Kallah, decisions in jurisprudence by R. Solomon Tazerat, and a letter of excommunication by David, the exilarch, etc. (Vienna, 1864). (3) "Seder R. Amram Gaon" (846 C.E.), containing a liturgy of the geonic period, of decided literary value (Warsaw, 1865). (4) "Teshubot ha-Geonim" (Responsa of Geonim), rules for the slaughter and examination of animals, by R. Jonah (Vienna, 1871). (5) "Zeker Nathan" (Memory of Nathan), selected religious regulations for travelers (Vienna, 1872). (6) Decisions by R. Solomon b. Adret in reference to appropriating hallah (the priests' share of the dough), and decisions by R. Jacob b. Zahal of Jerusalem. Coronel, in his own essay, "Hakor Dabar" (Search out a Matter), attempted to establish a precedent for the exemption, like the Levite tithe, of the appropriation of hallah outside the Holy Land, for which he was rebuked by the rabbis of Jerusalem. (7) "Alfasi Zufa" ("The

[abridged] Alfasi), by Menahem Azariah of Fano, with Coronel's commentary (Jerusalem, 1885). Coronel was awarded by the emperor of Austria the gold medal for art and science.

CORONEL, PAUL NUÑEZ: Spanish Orientalist; born at Segovia; died Sept. 30, 1534. Though baptized before the expulsion of the Jews from Spain in 1492, he was educated for the rabbinate, became conversant with Hebrew and with Biblical literature, and was on this account appointed professor of Hebrew at the University of Salamanca. Together with Alfonso de Alcalá, of Alcalá la Real, who had been baptized in 1492, and was also a professor at Salamanca, Coronel was commissioned by Cardinal Ximenez de Cisneros to translate the Bible into Latin. This translation is contained in the Complutensian Polyglot (1514-17). He also wrote "Additiones ad Librum Nicolai Lirani de Differentiis Translationum (Verborum)," which has not been printed.

CORONEL-CHACON, AUGUSTINE: Portuguese Jew and agent at the court of Charles II. of England; born in Beira, Portugal; died after 1665. After living at Bordeaux (1640-44), he settled in Rouen in 1644, where he became an intimate friend of Enriquez Gomez, the Marano soldier and poet, to one of whose works he contributed a sonnet. Early in the fifties he established himself in England as a merchant and royalist agent, and there, associated with David da Costa and the Mendes family, to whom he was related, he received and distributed funds for Charles II. On 'Change he was known as "the littell Jue."

At the restoration, Coronel-Chacon was made consular and financial agent for Portugal in London, and was the first to suggest to Monk a match between King Charles and the infanta Catherine of Bragança. This marriage naturally increased his influence at court, and after embracing Christianity, in 1660, he was knighted in October of that year. As a Christian, Sir Augustine was not fortunate. He became a bankrupt in 1665, and after having been prosecuted by the Portuguese ambassador, was expelled from the 'Change and imprisoned in the Fleet. Afterward he turned informer against some of his former coreligionists, but to no avail. The latter part of his life was spent abroad, a dependent on his wealthy Jewish relatives.

J. M. W. L.

CORPORAL PUNISHMENT: Physical chastisement inflicted as legal punishment. Corporal punishment is one of the oldest forms of chastisement known to the law. The method of its infliction according to Jewish law differs from that of other penal codes, inasmuch as the former law carefully

guards the convict from cruelty and excessive pain, stating expressly (Deut. xxv. 3), if the judge sentenced the wicked to be beaten a certain number of times, according to his fault, "Forty stripes he may give him, and not exceed; lest if he should exceed, and beat him above these with many stripes, then thy brother should seem vile unto thee." Upon this passage the Rabbis comment, saying: "The wicked is thy brother still" (Sifre 286; Mak. 22).

The Talmudic law provides that whenever the infliction of corporal punishment is ordained, it is peremptory, and allows no discretion to the judge (Maimonides, "Yad," Sanh. xvi. 1), except in regard to the number of blows. Three judges must be present at the beating (*ib.* xvi. 2); one of them ordering the blows to be administered; the second counting them; and the third reading the verses Deut. xxviii. 58, 59, as an accompaniment (*ib.* xvi. 11). The punishment was inflicted by the beadle

of the congregation, and the law recommends that the man chosen for this purpose shall be stronger in mind than in body, so that he may not strike too hard or upon a dangerous or weak spot (*ib.* xvi. 9; Mak. 23). The convict was tied to a post by his hands, his back and breast bared, and the beadle stood behind him, a fourfold thong of leather in hand. He was then bent forward and the lashes administered, one stroke on the breast and one on each shoulder alternately (Macc. iii. 12; "Yad," Sanh. xvi. 8-10). The maximum number of blows was thirty-nine (compare Mak. iii. 10, 22b with LXX. to Deut. xxv. 3, which reads במספר ארבעים, "about the number of forty").

One less than the Biblical number of blows was given, in order to prevent the possibility of a mistake in giving one more than the lawful number.

When the convict was found by medical examination to be physically unable to receive the full number of blows according to the sentence of court, he was given a smaller number, always a multiple of three ("Yad," Sanh. xvii. 1, 2). If he died under the lash, no one was held responsible, but if he died as the result of the infliction of a greater number of strokes than the law permitted, he was considered murdered (*ib.* xvi. 12); for no more blows could be given than the sentence of the court required, and in no event could the maximum of thirty-nine blows be exceeded (*ib.* xvii. 12). If the convict broke his bonds and escaped, he could not again be subjected to punishment for the same offense (*ib.* xvii. 6).

The infliction of corporal punishment was not, as Josephus says in the "Antiquities" (iv. 8, § 21), "a most ignominious one for a free man." Josephus' idea of its effect was probably the result of his affiliation with the Romans, among whom such punishment was infamous. The maxim of the Jewish law was that after the man had received his punishment he was again to be considered a brother (Mak. 23a). The infliction of stripes provided by the Biblical law was permitted only in Palestine; but the rabbinical authorities assumed the right, from the necessity of the case, to decree the infliction of corporal punishment outside of Palestine, denomina-

ting it "makkat mardut," or beating for disobedience ("Yad," Sanh. xvi. 3).

Maimonides enumerates 207 cases in which corporal punishment by the lash may be inflicted. They may be divided as follows: twenty-one cases of breaches of negative commandments, chiefly crimes against morality, punishable by KARET (excision), but not by death; eighteen cases of breaches of the laws relating to the priesthood and sacrifice; and one hundred and sixty-eight cases of breaches of negative commandments which are not punishable either by karet

Punishable or by death. Among the last are

Cases. included the making of idols, breaches of the Levitical laws, of priestly regulations, of the dietary laws, of the land laws, of the laws of pledge, of sumptuary laws, of marriage laws, as well as slander, cursing, perjury, breaking vows, and others (*ib.* xiv. 1, 4). See CAPITAL PUNISHMENT; LEX TALIONIS.

D. W. A.

CORPORATION: A combination of several persons, for certain purposes and under a common name, into one artificial body, which the law permits to act as a single person. In technical language there can also be a "corporation sole"; that is, one person filling a public position, who transmits the property rights and obligations of that position to his successors, as a natural person transmits his rights and obligations to his heirs.

A "corporation aggregate" is either public or private. The cities of the Holy Land were public corporations, and Jewish communities in the Exile corresponded to them (see COMMUNITY, ORGANIZATION OF). Between the public and the private corporation stands the court (חצר) of the Mishnah, a group of houses surrounding an open place with a common entrance, the occupants of which have certain duties and corresponding rights (B. B. i. 6).

A private corporation is either eleemosynary (formed for purposes of charity) or commercial (that is, formed for the common good of the members). The former is known by the name of "hebra," the most important being the "hebra kaddisha" (burial gild); other hebras attend to the reception of travelers, the visitation of the sick, the maintenance of hospitals, etc., all more or less independent of the "kahal" (community). They have a common name, and a continuous life unhindered by change of members; they take property by purchase, gift, or will, and can dispose of it, and the rabbinical courts would recognize these rights; but the reported precedents are very few, and the various codes have but little to say on these points. The Shulhan 'Aruk (Yoreh De'ah, 258, 8, 9) shows how an action may, under certain circumstances, accrue to the collectors of alms from an arrangement among the collectors, a contributor, and the latter's debtor; and similarly in other passages the right of action in eleemosynary corporations is incidentally acknowledged.

Commercial societies for various purposes, such as

the caravan, and the mutual insurance company of muleteers or of shippers, are mentioned in the Mishnah (see COMMERCIAL LAW). Whether they had any corporate powers or functions is not known. In later times, during the dispersion, Jews could hardly have entered corporations for profit except under the laws of the governments to which they were subject, and for many centuries there were few, if any, of these corporations in existence anywhere.

L. G.

L. N. D.

CORPSE: A body of a dead human being polluted not only those that touched it, but also the dwelling, its inmates, and all uncovered utensils (Num. xix. 14 *et seq.*). A person made unclean by a corpse was required to be sprinkled with water on the third and the seventh day thereafter, and to bathe and wash his clothes on the seventh day (Num. xix. 19). It was a sacred duty to bury a corpse; and even the priests, with the exception of the high priest, were permitted to defile themselves by the dead bodies of their nearest kin (Lev. xxi. 2, 3, 11). The Nazarites, however, were required to keep away from all corpses (Num. vi. 6). Yet the Nazarite Samson ate honey which he had taken out of the carcass of a lion (Judges xiv. 9), since only the human body could be the source of uncleanness in others (Num. xix. 22). During the forty years in the wilderness, those polluted by touching human corpses were put out of the camp (Num. v. 2), nor could they partake of the Passover sacrifice or any other offerings (ix. 6). Even those polluted in battle must be purified (xxxi.

19). Not to bury a corpse was con-

Need
of Burial. sidered the greatest disrespect that could be shown to the dead (Jer. viii.

2; Ps. lxxix. 2, 3), although in time of

war this was necessarily a frequent circumstance. The law demanded the burial of a condemned person (Deut. xxi. 23), this applying even to the bones of those who had been executed in vengeance (II Sam. xxi. 13). The Egyptians were experts in embalming; but in Palestine, where little was known of the art, bodies were removed as quickly as possible from the houses (compare Amos vi. 10; see BURIAL). Places where human bones accumulated, such as Tophet in the valley of Hinnom, near Jerusalem, were held to be especially polluted, and therefore horrible. "High places" were defiled by human bones more than by all else (II Kings xxiii. 14).

CORREA, ISABELLA (REBECCA): Spanish poetess of the seventeenth century; born in Spain; lived successively in Brussels, Antwerp, and Amsterdam; wife of the cosmographer D. Nicolas de Olivier y Fullana (Daniel Judah) of Majorca. Isabella Correa was a friend of Daniel Levi de Barrios, whose "Coro de las Musas" was praised by herself and her husband in verse. She was celebrated for her beauty and wit, her knowledge of the arts, and her linguistic attainments, which are said by some writers to have included nearly all the languages of Europe.

Her principal work is a metrical Spanish translation, with explanatory notes, of the "Pastor Fido" by Guarini (1st and 2d eds., Antwerp, 1694; 3d ed., Amsterdam, 1694), which is dedicated to

Manuel de Belmonte, the founder of De los Floridos, an academy of poetry of which Isabella was a member. Another of her works, entitled "Varias Poesias," which is said by De Barrios to have been ready for the press, was never published.

CORREGAL. See CARREGAL.

CORRENTI, CESARE: Italian statesman and author; born in Milan Jan. 3, 1815; died at Lesa, Novara, Oct. 4, 1888. He was one of the best friends of the Jews in Italy and a thorough enemy of anti-Semitism, whose adherents he regarded as "madmen." On various occasions he gave expression to his feelings of sympathy with the Jews; and in his work "Gli Ebrei Come Patrioti" he praises them for the great services they have rendered in the emancipation and progress of Italy.

CORRIERE ISRAELITICO: Italian monthly magazine devoted to Jewish history and literature; founded at Trieste in 1863 by Abrama Vito Morpurgo, who edited it six years, and at his death the editorship devolved upon A. di S. Curiel, Morpurgo's son-in-law, its present editor. At times Morpurgo was assisted by Leone Racah and, later, by his son Gustavo. For several years Dante A. Lattes was one of the directors, and he has become the magazine's chief representative and contributor. During the early days of its career the "Corriere" published not only careful accounts of Jewish events at home and abroad, but also scientific articles by S. D. Luzzatto, Lelio della Torre, and their most distinguished pupils; poems and stories on Jewish subjects; and translations of scientific, devotional, and belletristic works. Later on it devoted itself entirely to the setting forth of the cabalistic theories current in Italy, Elia Benamozegh and his pupils becoming the chief of its contributors, among whom is also Prof. Vittorio Castiglioni.

G. I. E.

CORTISSOS, DON JOSÉ: Spanish army contractor; born 1656; died in London 1742. He was fifth in direct descent from Emanuel José Cortissos, Marquis de Villa, a grandee of Spain, who flourished about 1475. José Cortissos was ambassador of the emperor Charles to Morocco. He was invited, as a man of property and thoroughly acquainted with the Peninsula, to contract for the supply of provisions to the allied armies under the Earl of Peterborough in the year 1706, but he declined through want of confidence in the Portuguese government. However, on the personal assurances of Earl Galway, commander of the British forces, and Earl Stanhope, British minister to the court of Spain, that the British government would answer for the payment on the part of the Portuguese government, he undertook to supply the army. From authentic reports it appears that Cortissos actually saved the army from starvation. Notwithstanding these assurances, he never obtained payment in full for his services, and

he eventually went to England in 1712 to urge his claims, but failed to obtain more than a fraction of the sum due him leaving a considerable balance owing from the British and Portuguese governments, all attempts to recover this proving unavailing. The unfortunate contractor, worn out in mind and body, died in poverty. It is reported that a portrait of him has been preserved, representing him in the court dress of the reign of Queen Anne, with a petition concerning his claim in his hands.

COS. See Kos.

COSENZA: City in southern Italy. Ferdinando Ughelli, in the ninth volume of his "Italia Sacra," reproduces two documents referring to the Jews of Cosenza. One was given by King Ferdinand I. to Pirro Caraccioli, Archbishop of Cosenza (1467), re-establishing the former archiepiscopal jurisdiction over the Jews of his diocese. Depping thinks that this prelate was authorized to bestow property belonging to Jews upon any one within his jurisdiction, or to confer upon him rights at the expense of Jews; for in 1469 the above-mentioned King Ferdinand confirmed him in such investitures. The Jews were expelled from Cosenza, as well as from the rest of the kingdom of Naples, in 1540 by a decree of the emperor Charles V.

E. C. G. J.

COSIN, LEWI: Rabbi at Salonica, and later a preacher at Venice; born in 1573; died in 1625. He was the author of a collection of sermons arranged in the order of the Sabbatic sections, and entitled "Aliyat Kir Keṭannah" (A Little Chamber in the Wall). It was published by the son of the author, the first volume at Venice, 1636, the second at Constantinople, 1643. Conforte also ascribes to Cosin the ethical work "Toze'ot Hayyim," published at Salonica. Steinschneider, however, believes that Conforte confounded Cosin with Moses Nathan, who is generally believed to be the real author of the "Toze'ot Hayyim."

L. G. I. BR.

CÖSLIN, HAYYIM BEN NAPHTALI: Talmudical scholar and Hebrew grammarian of Berlin; died at Stettin, Prussia, March 21, 1832. He wrote the following works: (1) "Maslul," a Hebrew grammar, written in a catechetical form. It was used for a long time as a primer and text-book in Jewish schools. It was first published by the author himself at Hamburg in 1788, and was republished as follows: Brunn, 1796; Zolkiev, 1798; Wilna, 1815, 1848, 1859, 1890. (2) "Keriat ha-Torah" (Reading of the Law), a treatise on the literal changes in Biblical passages found in the Talmud, and on some Talmudical rules concerning the Masorah (Berlin, 1814). To this work is appended an article by Cöslin, under the title "Be'er Rehobot," on the language of the Mishnah, which is a reprint from "Ha-

Meassef" of 1786, and was republished in the "Bikkure ha-Ittim," 1825.

N. T. L.

COSMOGONY.—**Biblical Data:** A theory concerning the origin ("begetting") of the world; the mythological or ante-scientific view, as preserved in the traditions, oral or written, and the folk-poetry of primitive and ancient peoples.

Curiosity concerning the origin of the visible universe and the manner and order in which the various forms of life came into being, manifested itself at a comparatively early period. Cosmogonies are, therefore, found among nearly all races, and form a large part of their mythologies, preserved as tribal or national traditions. Old as they are, they reflect climatic and cultural conditions of various localities; and these differences, often unharmonized, appear in the later literary and religious versions. The original cosmogonies are spontaneous productions of folk-fancy, and are therefore unsystematic, forming as a rule only a chapter in the theogonies or genealogies of the gods. Systematization is a sign that primitive notions have been subjected to treatment in the interest of a certain theology or advanced religious consciousness. By those who ascribe to the Hebrew mind the same process of development and to Hebrew literature the same manner of growth as are observed among other peoples, the cosmogony—or, to be more exact, the cosmogonies—of the Bible must be viewed and analyzed according to the light derived from comparison with similar conceits among non-Hebrews. By analogy, then, with other ancient peoples, the form in which the Hebrew cosmogony presents itself in the Bible is not the original. The literary documents are later than the material incorporated. They exhibit the influences of a developed theology as well as the effect of a blending of different accounts that are at variance with one another in their radical versions.

The comparatively late date of the literary documents—according to the critical schools—has misled most of the modern commentators into the assumption that the early Hebrews were without cosmogonies. Rénan's denial to the Semites of the mythopoetic faculty seemed thus to be borne out by the results of Pentateuchal analysis and of literary criticism of the other Biblical books. This inference, however, can not be maintained

Early Hebrew Cosmogony. (see Gunkel, "Schöpfung und Chaos"; *idem*, "Genesis"). The Hebrews must have had the same impulse toward speculation on the origin of things as had other groups of men; and as this impulse manifests itself always at a very early period in the evolution of mind (the tribal or national consciousness), one is safe in the a priori ascription to the Hebrews of the production and possession of cosmogonic legends at a very remote epoch. This conclusion from analogy is corroborated by the study of the literary documents bearing on this point. Gunkel (*l.c.*) has demonstrated that the cosmogonic accounts or allusions thereto (technical archaic terms, like "tohu wabohu"; the use of words in an unusual

sense, for instance **אֱלֹהִים** **וְרַח**; and mythological personifications, like Rahab) display easily discernible signs of incorporated old material (Gen. i., ii.; Job xxvi. 12, xl. 25, xli. 26; Ps. xl. 5, lxxiv. 12-19, lxxxvii. 4, lxxxix. 10; Isa. xxvii. 1, li. 9). That Gen. i. belongs to the later strata of the Pentateuch (P) is conceded by all except those scholars that reject higher criticism altogether. Dillmann, for instance, and Delitzsch (in the last edition of his commentary) do not hesitate to assign it to the Priestly Code, though they would have it be pre-exilic. It certainly has the appearance of a systematic presentation, but nevertheless *it is not a free invention*.

It has long been recognized that Biblical cosmogony bears certain similarities to that of other peoples; e.g., the Phenicians (who speak of *πνεῦμα* and dark *χάος* originally existent; through their union, *πόθος* ["desire"], *μῶρ* ["primordial mud"] is generated; but of this *μῶρ* come the egg, etc. [for other versions see Damascius, "De Primis Principiis," p. 125]; the wife of the first man is *Babv* [= **בַּרְבָּה**]), or the Egyptians (who spoke of primeval water ["nun"] and the primeval egg [see Dillmann, Commentary on Genesis, p. 5, and De la Saussaye, "Religionsgeschichte," 2d ed., i. 146 *et seq.*]). The notion of the primeval egg seems to be a universal one (see Dillmann, *l.c.* p. 4; "Laws of Manu," i. 5 *et seq.*).

Strikingly similar to the Biblical cosmogony is that of the Babylonians (Friedrich Delitzsch, "Babylonischer Welterschöpfungsepos"; Jensen, "Kosmologie der Babylonier," pp. 263-364; Zimmern, in Gunkel, "Schöpfung und Chaos," pp. 401 *et seq.*;

Schrader, "K. B." vi.). Its birth-place is betrayed by its reflection of the climatic conditions of Babylonia. In winter, floods and darkness prevail. With the advent of spring the waters "divide" and are "subjugated"

through the power of the winds that blow. Applying to primeval days this yearly phenomenon of the conquest of the flood and darkness, the Babylonian fancy assumes as self-existent in the beginning the great expanse of water (and unlit darkness). The former is conceived of as a monstrous dragon, Tiamat (= **תִּיַמַּת**), which, in the epitome given by Berosus,

is represented as the "primeval woman," with whom Bel cohabits, splitting her into two halves, one of which becomes the earth and the other the sky, in characteristic reflection of Babylon's climate, and of the spring sun piercing the

waters at the end of the winter's rainy season. Stories about Tiamat have been found as far back as the fourth millennium B.C. The narrative, as recovered from the tablets, begins by recording that "long since, when above the heaven had not been named, and earth was also without name [*i.e.*, non-existent] there was only primeval ocean-flood." This is personified as a male (Apsu) and a female (Tiamat). The gods, which had not yet arisen, were then made: Tiamat was their mother. Hatred of the new-born light causes her to rebel against the higher deities. Some of the gods side with her, and to aid her in her fight she produces huge monsters. Marduk offers to punish her, on condition that the supreme rule over heaven and earth be ac-

corded him after the victory. He rides to the combat in his war-chariot, and, meeting Tiamat, kills her by forcing open her mouth, which he fills with the hurricane that cuts her in two from within, and puts her crew in chains. He then divides her carcass: out of one part he makes heaven; out of the other, earth. The following is the order in which Creation is said to have been successively called forth by Marduk: (1) the heaven; (2) the heavenly bodies; (3) the earth; (4) the plants; (5) the animals; (6) man.

It is plain that not only in Gen. i., but in other Biblical cosmogonic descriptions (notably in Ps. civ. 5-9; also in Job xxxviii. 10; Ps. xxxiii. 6, lxv. 8; Prov. viii. 29; Jer. v. 22, xxxi. 35; the Prayer of Manasses), traits and incidents abound that suggest this Babylonian myth. In the main, four theories have been advanced to account for this: (1) Both the Babylonian and the Hebrew are varied versions of an originally common Semitic tradition. (2) The Hebrews carried an originally Babylonian tradition with them when emigrating from Ur-Kasdim. (3) They adopted the Babylonian epos during the Babylonian captivity. (4) This tradition, originally Babylonian, as the background shows, had long before the Hebrew conquest of Palestine been carried to Canaan through the then universal domination of Babylon; and the Hebrews gradually appropriated it in the course of their own political and religious development. This last theory (Gunkel's) is the most plausible. Gen. i. marks the final adaptation and recasting under the influence of theological ideas (*i.e.*, monotheism; six days for work and the seventh day for rest). As now found in Gen. i., it seems to be a composite of two, if not more, ancient myths. Besides those Babylonian elements indicated above, it contains reminiscences of another Babylonian tradition of a primitive (golden) age without bloodshed (vegetarianism), and recalls notions of non-Babylonian cycles ("the egg idea" in the brooding of the *רוח*, the Phenician *ברו*).

The allusions to this ancient (Babylonian) cosmogony are really much fresher and fuller in mythological conceits in the other passages quoted above. These, then, represent a cosmogony anterior to the reconstruction on monotheistic lines now incorporated in Genesis. In them the Dragon

Earlier Versions. myth ("Tiamat," "Rahab") is of frequent recurrence; but while it points to a cosmogonic source, it may in some cases (Job xxvi. 13, for instance) have sprung from a natural celestial phenomenon such as an eclipse. So also in eschatological descriptions and apocalyptic visions these incidents of the old tradition recur (Ps. xviii., lxxvii., xciii. 3 *et seq.*; Nahum i.; Hab. iii.). See DRAGON; LEVIATHAN.

On the other hand, the Bible has preserved cosmogonies, or reminiscences of them, that are not of Babylonian origin. Gen. ii. 4 *et seq.*, belonging, according to critics, to the Jahvistic source, starts with *dry* earth, and makes the sprouting of vegetation depend on man's previous creation; that is, on his labor. This exhibits Palestinian coloring. The dry, parched, waterless soil without rain is taken from a Palestinian landscape (see, however, Cheyne in "Encyc. Bibl." i. 949). Again, Ps. xc. 2 speaks of

the time before the birth of the mountains and the parturition of earth and world. In Job xxxviii. it is said that God laid the foundations of the earth "when the morning stars sang together," and all the "sons of God" broke forth in glee. In Ps. xxiv. 2 there is a reference to the mystery involved in God's grounding the earth on the waters so that it can not be moved. These are not mere poetic explications of Gen. i. They are derived from other cosmogonic cycles, which a tone time may even have included, as among all other ancient peoples, a theogony (notice the "sons of God"; see Gunkel, "Genesis," p. 119).

The value of the cosmogony of Genesis lies in its *monotheistic* emphasis. Though the plural "Elohim," the words "let us make," and the view of man being "the image of God" reflect polytheistic and mythological conceptions of a previous stage, the stress is laid on the thought that one God made the all by His will, and made it "good." The Sabbath—originally not a part of the Babylonian epos—is the crowning glory of this cosmogony, notwithstanding the strong anthropomorphism of the concept that the Creator Himself rested. The attempt to establish a concordance between Genesis and geology seems to do an injustice to science and religion both. The ancient Hebrews had a very imperfect conception of the structure of the universe. Gen. i. was not written to be a scientific treatise. It was to impress and to express the twin-doctrine of God's creative omnipotence and of man's dignity as being destined on earth to be a creator himself.

With the Babylonians, the Hebrews believed that in the beginning, before earth and heaven had been separated ("created," *ברא*), there were primeval ocean ("tehom," always without the article) and darkness (*חשך*). From this the "word of God" (compare such passages as, God "roars" [*נער*], Ps. xviii. 16; civ. 7) called forth light. He divided the waters: the upper waters he shut up in heaven, and on the lower He established the earth. In older descriptions the combat against the tehom is related with more details. Tehom (also Rahab) has helpers, the *תנין* and the Leviathan, Behemot, the "Nahash Bariah." The following is the order of Creation as given in Gen. i.: (1) the heaven; (2) the earth; (3) the plants; (4) the celestial bodies; (5) the animals; (6) man. The Hebrews regarded the earth as a plain or a hill figured like a hemisphere, swimming on water. Over this is arched the solid vault of heaven. To this vault are fastened the lights, the stars. So slight is this elevation that birds may rise to it and fly along its expanse.

—**In Post-Biblical Literature:** Cosmogony, or the theory concerning the origin of the universe, began with pagan systems which recognized no Creator, and was therefore viewed with mistrust in rabbinical circles. For this reason it was taught in strictest privacy: "The creation lore is not to be taught before more than one disciple" (Hag. ii. 1; see CABALA). Even the oldest schools, the Hillelites and Shammaites, differed on the question whether

the heavens (Gen. i. 1) or the earth (Gen. ii. 4) was created first, the Shammaites deciding that the heavens were created first, the Hillelites maintaining the contrary contention. The Hillelites, referring to Amos ix. 6, argued: "No architect, in building a house, begins with the upper story"; the Shammaites replied with reference to Isa. lxvi. 1: "No artificer makes the footstool first and then the throne." This difference of view was readjusted afterward by R. Simeon b. Yoḥai, who said, referring to Isa. xlviii. 13, that heaven and earth were created simultaneously, the former being put upon the latter as the cover upon the pot (Ḥag. 12a; Yer. Ḥag. ii. 1; Gen. R. i. and xii.; Pirke R. El. xviii.). The Shammaites seem to represent the older view, shared also by the Alexandrians (זקני הנגב, Tan. 32a; compare Bacher, "Agada der Tannaiten," i. 17 *et seq.*).

Probably connected with this difference of opinion is the controversy between R. Eliezer and R. Joshua regarding the origin of earth and sea, Joshua, with reference to Job xxxvii. 6, xxxvi. 28, claiming a cosmic or celestial origin for them; Eliezer, with reference to Ps. cxlviii. 4 *et seq.*, Gen. ii. 6, a mere terrestrial one (compare Gen. R. xii., xiii.; Yoma 54b; Bacher, *l.c.* i. 135, 173 *et seq.*). The principal concern of cosmogony was with the primal elements and their mode of composition; and in dealing with the question, the Gnostics resorted to both mythological and philosophical speculation, while Scripture treated it from the standpoint of theology (see Gnosticism).

In the third century Rab, basing his speculation on Gen. i. 1-5, spoke of ten primal elements created on the first day: heaven and earth, **The Primal Elements.** wind and water, night and day (the last as time-measures); and of ten creative potencies: wisdom and understanding, knowledge and strength, rebuke and might, righteousness and judgment, mercy and loving-kindness, with reference to Prov. iii. 19, 20; Ps. lxxv. 7 (6); Job xxvi. 11; Ps. lxxxix. 15 (14); xxv. 6 (5). Of these potencies he explained rebuke as the restraining power or the limitation exerted by God when the world (earth) and the sea expanded in all directions after He had turned the primal elements like the warp and woof of the weaver's loom (Ḥag. 12a). The older schools, however, spoke of only six, four, or two primal elements, and also of fewer potencies. When R. Joshua ben Hananiah was asked by the emperor Hadrian how God made the world, he answered: "He took the six elements and led them like weaver's threads in six directions: four horizontal and two vertical" (Gen. R. x.). To Gamaliel II. a philosopher said: "Your God is a great artist, but He found fine pigments to use as colors for his painting: Tohu and Bohu, darkness and wind, water and the abyss"; whereupon Gamaliel replied: "All these six God Himself created, as is shown by Isa. xxxiv. 11 (Hebrew, "Ḳaw tohu we-abne bohu"), xlv. 7; Ps. cxlviii. 4 *et seq.*; Amos iv. 13; Prov. viii. 24 (compare Gen. R. i.; Bacher, *l.c.* i. 86, note 4). These six elements are compared by R. Levi (Gen. R. i.) with the six things required for every structure: water, earth, wood, stone, iron, and the measuring-line. An old Baraita gives, with reference

to Isa. xxxiv. 11, a deeper insight into Jewish or gnostic cosmogony: Tohu is the green circle ("ḳaw") which surrounds the cosmos, and from which darkness emanated, according to Ps. xviii. 12 (11); and Bohu is the foundation of the primal mire or chaos ("abne mefulamot" = Πηλωμα; see Lev. W. B. T., *s.v.* פילומא) sunk into the abyss, whence the water issues forth (Ḥag. 12a). Here Tohu and Bohu are actually the two primal elements out of which the other two, darkness and water, respectively emanated. Wind is taken by R. Jose (Ḥag. 12b; compare Yer. Ḥag. ii. 77a, and Bacher, *l.c.* ii. 186) to be a potency emanating from God's arm, whereas heaven is explained as a composite of primal fire and water (שמים=אש ומים; Ḥag. 12a). According to Pirke R. El. iii. (compare Yer. Ḥag. *ib.*) the earth was created from the snow from under God's throne, which, when cast upon the primeval water, turned into a solid mass (Job xxxvii. 6; compare Ex. R. xiii., where עפר ["dust"] is probably a corruption of שלג ["snow"]). Fire and snow are taken as primal elements also in Gen. R. x.

Whether light was the first created thing (compare IV Esdras vi. 40) or not is a matter of dispute between R. Judah and R. Nehemiah. Samuel bar Nahman said: God wrapped Himself in light as in a garment and its radiance lit up the universe; that is, light is not created, but is eternally a part of God (Gen. R. iii., based upon Ps. civ. 2). From that light heaven also emanated, according to Pirke R. El. *ib.* It must be further noted that Pirke R. El. has only eight of Rab's ten elements, night and day being added by some one else; and instead of Rab's ten creative potencies there are only three: wisdom, understanding, and knowledge (compare Tan., Wayakhel, 6, ed. Buber; Midr. Teh. to Ps. i. 1). So are Yalda Bahut (= Βυθός) and Hokmota (= Ḥokmah) fundamental in the various gnostic cosmogonies, the rest evolving in pairs (see Gnosticism). In Ex. R. three primal elements, water, fire, and wind or breath ("mayim," "esh," "ruah"), are mentioned, begetting respectively three potencies, darkness, light, and wisdom.

Better than these scattered Midrashic fragments does the Slavonic Book of Enoch (xxiv.-xxx.) disclose the secrets of Ma'ase Bereshit, which God Himself revealed to Enoch, though "not known even to the angels":

Out of the regions of the deep God caused a fiery stone, Adol ("Ariel" = "fire of God" [?]), to rise; out of this broke light, and forth came the great upper world revealing the whole creation of God's design. Of it God made His own throne, and above it rose the light which became the foundation of all celestial things (compare Pes. 54a; Ned. 39b; Gen. R. i.; Tanna debe Eliyahu R. xxxi.; "Kisse ha-Kabod," after Ps. xciii. 2 and Prov. viii. 27, LXX.: "When He established His throne upon the winds"). Then God laid the

The Upper and the Lower World. foundation of the world of darkness below by calling into existence a firm, heavy, and red substance called "Arkhas" (= ארקח, the lowest part of the abyss; see "Seder Rabba di Bereshit" in Wertheimer's "Batte Midrashot," i. 15, 18; certainly not ארקח, as Charles thinks), and after it was divided there issued forth a very dark world bearing the creation of all things below; there was nothing beneath the darkness.

Out of the mixture of light and darkness a thick substance came forth; this was the water which was spread in both directions above the darkness below and below the light above, and thus were the seven circles of heaven created like crystal, moist and dry; that is, like glass and ice (compare "a sea of glass."

Rev. iv. 6, xv. 2; "and the pure marble stones that seem like water," Hag. 14b; compare Joël, "Blicke in die Religionsgeschichte," i. 163 *et seq.*).

Out of the waves of the water below, which were turned into stones, the earth was formed on the second day of Creation, and the myriads of angels and all the heavenly hosts were created out of the lightning which flashed forth from the fiery stone as God gazed upon it (compare Pesik. i. 3a: "The firmament is made of water, and the stars and angels of fire," and Cant. R. iii. 11: "The firmament is made of hoarfrost [Ezek. i. 22, "crystal"], and the Hayot of fire").

Charles ("Book of the Secrets of Enoch," 1896, p. 32) and Bousset ("Religion des Judenthums," 1903, p. 470) find in this cosmogony traces of Egypto-Orphic influence; but a comparison with the Babylonian—that is, the Mandæan—cosmogony, with its upper world of light and lower world of darkness (see Brand, "Mandäische Religion," 1889, pp. 41–44), is no less in place. Remarkable is the cosmogonic view of Abbahu (Gen. R. iii.): "God created worlds after worlds, and destroyed them until He found the one which He pronounced as good."

The Baraita on Tohu and Bohu, Hag. 12a, and on wind or breath, Hag. 12b, quoted above, formed undoubtedly part of an ancient Midrash,

Midrash Ma'aseh Bereshit, of which the **Midrash Konen** preserved essential parts (Jellinek, "B. H." ii. 23–39; Introduction, xiii.). It is based on Prov. iii. 19, and the Torah being identified with the creative wisdom (compare Gen. R. i.), the sacred names or letters are made potencies of creation. The Midrash shows how, by the aid of three names, water, light, and fire were created; how, by the mixing of these, the heavens and the clouds of glory and all the celestial hosts were made; and, how from a lump of snow from under the Throne of Glory, the earth was formed and the foundation-stone of the world laid upon the water. The celestial orbs were made of fire; the water animals, including the leviathan, out of light and water; the birds, including the ziz or simurg, out of these elements mixed with mud; the terrestrial beasts, including the behemoth, out of water, earth, and light. The Midrash Ma'ase Bereshit, which is attached to Midrash Konen (Jellinek, "B. H." pp. 32 *et seq.*), forms also part of the Seder Rabba di Bereshit, published in Wertheimer's "Batte Midrashot" (i. 1–31), and presents the entire cosmogonic and cosmological system of the Rabbis (or Essenes, as is shown by the apotheosis of the Sabbath, pp. 7–8). Part of this cosmology—that is, the description of the upper and lower worlds and all their parts in their topographical relations—is found also in Pirke R. El. (iii.–ix.).

Another and altogether different cosmogonic system is presented in the geonic work "Sefer Yezirah."

Here letters and numbers, as in the

Sefer Yezirah. New Pythagorean system, but scientifically arranged, are creative principles, and the three primal elements of

the rabbis, fire, water, and light (אש מים אור) are, by the change of one vowel, transformed into fire, water, and air (אש מים אויר = the Greek ἀήρ), the Spirit of God (Gen. i. 2) taking the place of the former "wisdom" as the creative power (see SEFER YEZIRAH). For the cosmogony of the cabalists, based chiefly upon the idea of a primal and endless light, and a primordial "point" expanding into

the Ten Sefirot, and upon Abbahu's view, quoted above, of worlds ever created and destroyed by the Creator, see CABALA; EMANATION; SEFIROT.

K.

COSSACKS' UPRISING: Since the fifteenth century, semi-military bands of Cossacks have been scattered over the steppes of southern and southeastern Russia, and have materially influenced the history of the Jews in that region. The Cossacks originally appeared as traveling merchants, pursuing their vocation generally in the steppes of South Russia, beyond the limits of their own country. For the sake of mutual protection they organized themselves into armed bands, led by hetmans, or atamans. Becoming permanent settlers, they retained their military and social organizations. Later there appear groups of Cossack agriculturists, Cossack settlements, and Cossack villages.

Of the different branches of Cossacks, only those of the Ukraine (Little Russia) are considered here. When King Casimir Jagellon transformed the principality of Kiev into a Polish waywodeship (1476), the Russian nobles of the Ukraine received equal rights with the Polish nobility (Kostomarov, "Bogdan Chmielnicki," i. 114). The free cities, towns, and villages being distributed among the nobility, the ancient system of self-government was abolished, and the first step taken toward the forced adoption of Polish customs and methods by the Russian nobility. The peasants of the Greek faith thus became the serfs of the landlords. Soon after the Ukraine Cossacks became conspicuous. Their organizations bore some resemblance to those of the order of knighthood, for they announced themselves as the champions of Christendom. When Poland and Lithuania were merged by King Sigismund Augustus into one commonwealth (1569), the provinces of Volhynia, Podolia, and the Ukraine were separated from Lithuania and came under the immediate rule of Poland. About that time the Ukrainian lord Wishnewetzki (Polish, "Wisniowiecki") built on an island in the River Dnieper the fortress of Khor-titza, and placed Cossacks there for protection against the invasions of the Crimean Tatars ("Akty Yuzhnoi i Zapadnoi Rossii," ii. 148). This fortress with its garrison was known as the "Zaporogian Syech" (the fortified camp beyond the rapids). These Cossacks were joined by Little Russian peasants of the Greek faith who had broken away from their Polish Catholic landlords, by fugitives from justice, and by adventurers. It may be mentioned here that Jews also served in the ranks of the Cossacks. In 1681

Ahmad Kalga, chief counselor of the **Complaint of Cossack Depredations**. Khan of the Crimea, complained to the Polish ambassador, Piasaczinski, that the Cossacks of the Lower Dnieper had made attacks on the Crimea. Piasaczinski replied stating that the Cossacks were not subjects of the Polish king, and that he therefore could not be held responsible for the acts of uncontrollable rovers of the desert; for while there were some Poles, there were also Muscovites, Wallachians, Turks, Tatars, Jews, etc., among them (Kostomarov, *l.c.* p. 55).

In the responsa of Joel Särkes mention is made of "Berakah the Hero," who fought in the ranks of

the Cossacks and fell in battle against the Muscovites (1601; Harkavy, "Yevrei-Kazaki," in "Russki Yevrei," 1880, p. 348). In 1637 a certain Ilyash (Elijah) Karaimovich (the name indicates a Karaite origin) was one of the officers of the registered Cossacks, and became their "starosta" (elder) after the execution of Pavlyuk (Kostomarov, *l.c.* p. 135). In ballads of Little Russia reference is made to a colonel named Matvi Borochoovich (1647), who, as his family name (meaning "son of Baruch") indicates, was probably also of Jewish origin. The feeling against the Jews spread very rapidly from Poland into the Ukraine in the reign of Sigismund III. (1587-1632), who was an obedient pupil of the Jesuits. The guilds, which always feared the competition of the Jews, were prominent in connection with the accusations. The higher nobility, however, depended largely on the Jews to act as their leaseholders, agents, and financial managers, and this served in a measure as a bar to persecution.

Stephen Bathori (1575-86) intended to disband the Cossacks, who were a menace to the union of the Ukraine with Poland. Not long before his death he said: "Some day an independent state will spring up from this scum" (Kostomarov, *l.c.* p. 21).

As the power of the Jesuits increased, and with it their determination to force the peasants and Cossacks into the Catholic Church, there were manifest signs of trouble between the Cossacks and the Polish nobility. From time to time armed

Attacks by Cossack bands swept over the Ukraine, **Cossacks.** plundering the estates of the nobility, pillaging the Catholic churches, and robbing the Jews. When the Polish nobles Wisnietzki, Potocki, and Koniecpolski settled in the Ukraine and began to build palaces and castles, the Jews were their trusted agents and managers, leasing their estates, mills, inns, rivers, lakes, and all other sources of revenue.

The Jews increased rapidly in the Little Russian territories at the beginning of the seventeenth century. They farmed not only the taxes, but even the revenues of the Greek Orthodox Church. At every christening or funeral the peasants had to pay a fee to the Jew. The lords were the absolute rulers of their estates, and the peasants their dependent subjects. When a lord or any other member of the nobility leased his villages or estates to a Jew, his authority also was delegated to the latter, who even had the power to administer justice among the peasants ("Yewen Mezulah," p. 2a). The extravagant life of the Polish landlords, who spent most of their fortunes abroad, frequently placed them in pecuniary difficulties, and their Jewish tax-farmers were often forced into exactions against the advice and warnings of the wise leaders of the Council of Four Lands, and the Jews of the Ukraine often suffered grievously for the sins of individuals of their race. The uprising of the peasants in the Ukraine has been ascribed by most historians to their oppression by Jewish leaseholders, as well as to the privileges granted to the latter by the kings and nobles of Poland. Recent historical research, however, indicates that the Jews living in the cities, particularly in those of the Ukraine, were not afforded the protection enjoyed by other citizens, and moreover

were excluded from the privileges granted to the Christian merchants and burghers (Antonovich, "Monografii po Istorii Zapadnoi i Yugo-Zapadnoi Rossii," i. 188). Notwithstanding this, the Jews managed to gain control of the commerce of the country, as is evidenced by the complaints of the Christian merchants of Lemberg, Kamenetz, Kiev, and many other cities, shortly before the Cossack uprising ("Archiv Yugo-Zapadnoi Rossii," v., part i., xxxiv. 134, xl. 156, cxxi. 323; "Starozytna Polska," 11, 1023, 1369; "Sbornik Mukhanova," p. 192; Antonovich, *l.c.* p. 189). It was the combined opposition to the Jews of the urban and the peasant populations that made it possible for Chmielnicki to arm the entire country against them within so short a time.

During their first uprising under Nalivaika and Kossinski (1591-93), and that under Taras (1630), the Cossacks did not exhibit any special animosity toward the Jews, but complained only of the Roman Catholics. But in the subsequent re-

Early revolt, under Pavlyuk (1637), 200 Jews, **Uprisings.** mostly leaseholders and farmers of taxes, were killed in Pereyaslav, Lokhvitza, and Lubny, and many synagogues were destroyed; and when the Polish government restricted some of the rights of the Cossacks their animosity toward the Jews was still further increased.

In 1646 a general European alliance, including Ladislaus IV., was formed for the purpose of driving the Turks out of Europe. The Polish chancellor Ossolinski visited the Ukraine and opened negotiations with the Cossacks. The king was accused before the Diet of 1646 of attempting to curtail the rights of the "Shlyakhta"; the proposed war with Turkey was not sanctioned by the Diet, and the Polish cause was thus injured.

The contents of the agreement between King Ladislaus and Bogdan Chmielnicki, the leader of the Cossacks, have never been positively ascertained, nor has it been shown how far, if at all, the latter was encouraged by Alexis, the Rus-

The Great sian czar. It is only known that on **Uprising.** Oct. 1, 1653, the Russian government

decided to include the Cossacks among its subjects, whereupon war was declared against Poland by the Muscovites. Most of the historians, Russian, Polish, and Jewish, think that the personal animosity of Chmielnicki against Koniecpolski and Chaplinski (see CHMIELNICKI, BOGDAN) caused the Cossack uprising; yet even such a shrewd, ambitious, and daring leader as Chmielnicki could not so soon have become such a popular hero throughout the Ukraine had not the ground been prepared. When Koniecpolski learned of the alliance formed by Chmielnicki and the Tatars to make common war on Poland and to drive the Poles out of the Ukraine, he cast Chmielnicki into prison. A Jew, Jacob Sabilenki, helped Chmielnicki to escape; and when he was subsequently imprisoned for the second time, he again succeeded in effecting his escape. He then went with his fellow conspirators to the Syech, whence he issued his appeal to the Cossacks to rise and take revenge on both the Poles and the Jews. In his address to the Cossack elders Chmielnicki said: "You must be aware of the fact that the Po-

lish nation is gaining power daily and that it oppresses our coreligionists. But it is not the noblemen alone who lord it over us: even the most abject nation [the Jews] hold us in subjection" ("Yewen Mezulah"). This was enough to excite the people of Little Russia. The flame of revolution spread with great rapidity throughout the Ukraine, and Chmielnicki, encouraged by Ladislaus himself, concluded a treaty with the Khan of the Crimea. Chmielnicki still derived encouragement from the king himself, who, being often opposed in the Diet by the nobility, desired to make use of the Cossacks. Some historians hint that he even secretly promised to help them assert their rights against the nobles.

One of the paragraphs of this treaty stipulated that all prisoners of war should belong to the Tatars, as also the right to sell them as slaves in Turkish markets; and that the property of the Polish nobility and Jews should be allotted to the Cossacks. When the Tatar general Tugai-bey joined Chmielnicki with an army of 4,000 men, the whole of Little Russia, Podolia, and the Ukraine rose en masse, and, leaving their estates and homes, assembled in the Syech. The Jews soon learned of the plans of the allied armies, and warned the Polish field-marschals Potocki and Kalinowski to be on their guard (Kostomarov, i. 264); but they disregarded the warning. On May 18, 1648, the Poles were defeated near the Yellow Waters ("Zholtyya Vody"). Potocki was killed and Kalinowski made prisoner.

After this, bands of the Zaporogians, the Little Russian peasants, and the roving Cossacks of the Ukraine joined the insurrection, and invaded the towns of Pereyaslav, Piryatin, Lubny, and Lokhvitza, plundering, robbing, and cruelly torturing the Jewish inhabitants. The Jews of Pogrebishche, Zotov, and Bozovka, about 3,000 in number, were more fortunate; for they gave themselves up to the Tatars, who, though they took them into captivity, treated them humanely. They were

Attacks on the Jews. taken to the Crimea, and subsequently ransomed by the Jews of Constantinople. On the day of the above-mentioned battle, King Ladislaus died, which was a great misfortune for Poland as well as for the Jews. During the interregnum (May to Oct., 1648) the dissensions throughout Poland increased, and the conflicts between the different parties in the confederation weakened the resistance of the Poles.

While Chmielnicki negotiated with the Polish magnates, and especially with the Archbishop of Gnesen, troops from the Ukraine, both regular and irregular, were organized under brutal leaders, who reveled in the death-struggles of their Polish and Jewish foes. These bands, called "Haidamaks," were ordered by the Greek Orthodox popes to murder both Roman Catholics and Jews in the name of religion, and soon changed the whole country into a desert; only those Jews who fell into the hands of the Tatars, or those who changed their religion, escaped death. The most cruel leaders of the Cossacks were Krivonos, Morozenko, and Chmielnicki's son, Timofei.

After the defeat of the Poles near Korsun, the Cossack troops and the peasant bands under their leader Ganzha advanced against the fortified town

of Nemirov, which had 6,000 Jewish inhabitants, and where the fugitives from the neighborhood were assembled. This was a very wealthy community, and contained many prominent and learned men. The Jews, who were in possession of the fortress, had closed the gates; but Greek Christians of the town, disguised in Polish uniforms, urged the Jews to open them again for their friends. They did so, only to be mercilessly slaughtered by the Cossacks and the Russians, those escaping immediate death undergoing frightful tortures (June 10, 1648). Among the victims was Jehiel Michael ben Eliezer, the cabalist, and the head of the yeshibah of Nemirov. While most of the Jews remained true to their faith, some escaped by embracing Christianity, although most of these returned to Judaism when the riots were over (Graetz, "Hist." Hebrew ed., viii. 135).

At the town of Tulchin about 600 Polish soldiers and 2,000 Jews had taken refuge in the fortress (called Nestrow); some of the latter being brave soldiers, sworn to defend the town and fortress to the last man. The Cossack peasants, knowing little of tactics, resorted to a trick. They assured the nobles that their hatred was directed solely against the accursed Jews, and that if these should be delivered up to them they would withdraw. The nobles, forgetful of their oath, proposed that the

Treachery at Tulchin. Jews should give up their arms to them. The Jews, who exceeded the Poles in number, at first thought of

revenging themselves on the latter for their treachery; but Rabbi Aaron of Tulchin warned them that the Catholics would take bloody vengeance, and that all Poland would be excited against the Jews, who would doubtless be exterminated. The Jews then delivered up their arms, whereupon the Poles admitted the Cossacks into the town. After the Cossacks had taken everything from the Jews, they offered them the choice between death and baptism. Three rabbis, Eliezer, Solomon, and Hayyim, urged their brethren not to change their religion; and about 1,000 Jews who remained steadfast were tortured and executed before the eyes of the Polish nobles (June 24, 1648). Ten rabbis were spared by the Cossacks in order to extort large ransoms from their communities. The Poles were immediately punished for their treachery. Deprived of the assistance of the Jews, they were slain by the Cossacks. This sad event had a good effect, as the Poles after that sided steadfastly with the Jews, and were not opposed to them throughout the course of the long war ("Yewen Mezulah," p. 23).

From Podolia the bands of rebels penetrated into Volhynia. Here the carnage continued during the whole summer and autumn of 1648. About 10,000 Jews were slain by the Cossacks or taken captive by the Tatars at Polonnoye. The cabalist Samson of Ostropol, who had been revered by the populace, with 300 pious inhabitants, was put to death in the synagogue. Similar massacres took place in Zaslavl, Ostrog, Starokonstantinov, Bar, Narol, Kremenetz, and other towns of the Ukraine. The Polish troops, especially those under Jeremiah Wishevetski, subdued the Cossacks here and there, but they were unable to put down the rebellion. In Sept., 1648,

the forces of Chmielnicki had advanced to the very walls of Lemberg, which was subjected to a protracted siege. Having reduced the inhabitants by starvation, the Cossacks withdrew upon receiving from the city an enormous ransom, a considerable share of which was paid by the Jews (Caro, "Gesch. der Juden in Lemberg," pp. 51-64). From Lemberg, Chmielnicki with his hordes turned to Zamoscz and Lublin, even approaching Warsaw, where the election of the king was in progress. The choice fell upon the primate of Gnesen, Cardinal John Casimir (1648-68), brother of King Ladislaus IV.

The new king at once entered into peace negotiations with Chmielnicki, but owing to the excessive demands of the Cossacks no conclusion was reached. The war broke out afresh, and lasted to the end of the summer of 1649. In the course of it many more Jewish communities were desolated. After a series of battles unfavorable to the Poles a treaty of peace was concluded at Zborowo, between John Casimir and Chmielnicki. In this treaty there was a clause forbidding the Jews to live in the Ukraine; that is, in the waywodeship of Chernigov, Poltava, Kiev, and part of Podolia (Aug., 1649).

After eighteen months of torture and hardship the Jews could once more breathe freely. To all who had entered the Greek Orthodox Church under threat of death, the king gave permission to

Interval of Peace. return to their former faith. Jewish women who had been forcibly baptized

fled in numbers from the Cossack husbands who had been forced upon them, and returned to their families. The Council of Four Lands, at its session in the winter of 1650, worked out a long series of measures intended to restore order in the family and social life of the Jews. The 20th of Nisan, the day of the Nemirov massacre, was the day previously set apart as a fast-day in memory of the martyrs of the Crusades, and was now made a day of mourning for the victims of the Cossack rebellion as well. The prominent rabbis of the time composed many elegies and prayers, which were recited in the synagogues on every anniversary of the fatal day.

But the Jews were not to rest for a long time. The treaty of Zborowo was satisfactory neither to the Polish government nor to the Cossacks, and in 1651 war again broke out. This time the Poles gained the advantage over Chmielnicki's forces, and the campaign ended with a treaty advantageous to the Poles. Under the treaty of Byelaya Tzerkov (Sept., 1651), many of the Cossacks' claims were rejected, and the right of the Jews to settle in the Ukraine was restored.

It was at this time that the agitation among the Cossacks and the Greek Orthodox Ukrainians was renewed. Bogdan Chmielnicki opened

Alliance with Russia. negotiations with Czar Alexis with the view of transferring Cossack-Ukraine, under the name of "Malorossia" (Little Russia), to the Muscovite realm.

These negotiations were successful in 1654. In the same year the Russian troops penetrated into White Russia and Lithuania and began a war with Poland. During this war, which lasted two years (1654-56),

the Jews of White Russia and Lithuania underwent much suffering. The seizure of many cities by the united Cossack-Muscovite army was accompanied by the extermination or exile of the Jews. When the city of Mohilev on the Dnieper surrendered to the Muscovite forces, Alexis, as requested by the local Russian inhabitants, ordered all the Jews to be banished from the city, and their houses to be distributed among the magistrates and other Russian officials. The Jews, however, trusting that the military disturbances would soon cease, did not immediately leave Mohilev; and for this they paid a heavy penalty. At the end of the summer of 1655 the commander of the Russian garrison at Mohilev, Colonel Poklonski, learned that the Polish army, under Radziwill, was marching on the city. Fearing that the Jews might unite with the advancing enemy, Poklonski ordered them to leave the city, promising them an escort as Polish subjects to Radziwill's camp. No sooner were the Jews, with their wives, children, and belongings, outside the walls, than the Russian soldiers, acting upon Poklonski's orders, fell upon them, killed nearly all of them, and appropriated their possessions.

At Vitebsk the Jews took an active part in the defense of the city against the besieging Muscovites. For this the enemy took ample revenge, the Jews being either forcibly baptized or sent into exile to Pskov, Novgorod, and Kazan. The Jews in the community of Wilna also suffered in the sack of that city by the Muscovite-Cossack forces in Aug., 1655. Most of the Wilna Jews, how-

Massacres in Poland. ever, found safety in flight; those remaining being either slain or banished by order of the czar. It was

soon the turn of the native Polish provinces to become the scene of war and invasion. The irruption of Poland's third enemy, the Swedes (1655-58), under Charles Gustavus, brought carnage into the very heart of the country. The greater portion of Little and Great Poland passed into the possession of the Swedes, and King John Casimir had to flee. At the hands of the Swedish invaders Jews suffered equally with Christians; but they often found themselves between the hammer and the anvil. The Polish leader, Czarniecki, while escaping from the Swedes, devastated all the country through which he passed, but manifested exceptional harshness in his treatment of the Jews. The Polish auxiliary bands were equally severe in their treatment of the Jews and other non-Catholics.

The horrors of the war were brought to a climax by the outbreak of the plague in Poland. The Jews in the provinces of Cracow, Posen, Kalish, Piotrkov, and Lublin perished in large numbers, both by the sword of the enemy and by disease. Only after 1658 did the disturbance caused by the war begin to subside. According to the chronicles, the number of Jews who perished during this time (1648-58) exceeded half a million. Over three hundred Jewish communities (740, according to the unreliable Samuel Phoebus in "Tiṭ ha-Yawen") were massacred and sacked. Approximately only one-tenth of the Jewish population remained in Polish Ukraine, Volhynia, and Podolia. The remainder had either perished or had emigrated into Lithuania, Poland proper, and

the states of western Europe. Jewish fugitives from Poland, and captives ransomed from Tatar bondage, could at that time be met with in all the countries of Europe and Asia.

The following is a list of the towns in which outbreaks occurred during the uprising of the Cossacks (1648-58):

Alexandria (Volhynia)	Kanev
Alexandrovka (Podolia)	Kiev
Arhat	Kishinev
Bagrinovtzy (Podolia)	Klevan
Bar	Kobrin (Minsk)
Bazhin	Kobrin (Volhynia)
Berestechko (Volhynia)	Kolki (Volhynia)
Berezino (Minsk)	Komorno (Galicia)
Berezovka (Poltava)	Konotop
Berezovka (Volhynia)	Kopys
Bershad	Koretz
Bieleza (Galicia)	Korsun
Bielgoria (Poland)	Kovel
Borisovka (Poltava)	Kovno
Borispol (Poltava)	Krainepole
Bozovka	Krasnik (Lublin)
Bragin	Krasnobrod (Poland)
Bratzlav (Podolia)	Krasny
Bratzlavshchina (Podolia)	Kremenetz
Brest-Litovsk	Krichev
Brezna (Poland)	Kunitza
Breznitza (Poland)	Ladyzhin
Brody	Latischan
Buchach (Podolia)	Lemberg
Busk (Galicia)	Lesla
Byelaya Tzerkov	Letichev (Podolia)
Byeltzy	Lobemla
Byely (see Kostomarov, iii. 154)	Lokhvitz (Poltava)
Byely-Kamen	Loyev (Kostomarov ii. 186)
Bykhov	Lublin
Chernigov	Lubny (Poltava)
Chigirin	Lubentz
Chirikov	Luntschitz
Chudnov (Volhynia)	Luzk
Derazhnya	Lyubartovo or Lyubar (Volhynia)
Drogobuzh	Lyubom (Volhynia)
Druya	Makhnovka (Kiev)
Dubno	Medzhibozh (Podolia)
Dubovaya Volost (see Kostomarov, ii. 402)	Mezhirich (Great)
Dubrovna	Mezhirich (Little)
Fastov or Khvastov (Kiev)	Minsk
Galich (Galicia)	Miropol (Volhynia)—See Polonnoye
Gora (White Russia)	Mohilev (Podolia)
Goria (Poland)	Mozyr (Minsk)
Grodno	Mstislavl
Grubeshov (Lublin)	Murakhva (Podolia)
Gushcha (Volhynia)	Narol (Volhynia)
Gusyatin (Podolia)	Nemirov
Hamel	Nevel
Hrubieszow or Rubieszow (Lublin)	Novopole (Poland)
Husan	Novozhmir
Ivanovich	Olyka
Ivnirod	Opta
Kamenetz-Podolsk	Orsha
	Ostrog (Volhynia)

Pereyaslav	Tomashev
Pinczow	Tornograd (Poland)
Pinsk	Trilisy (Kiev)
Piotrkov	Tuchin (Volhynia)
Piryatin	Tulchin
Pkut	Turbino
Podgayetz (Galicia)	Uchanie (Lublin)
Pogrebishche (Kiev)	Ulanov (Volhynia)
Polonnoye (Volhynia)	Vankovtzy
Polotzk	Verkhovka (Podolia)
Pomorany (Galicia)	Vinnitza
Posen	Vitebsk
Priluki (Kiev)	Vladimir (Volhynia)
Prolikowitz	Wilna
Propolsk (Mohilev)	Wisloz (Galicia)
Przemysl (Galicia)	Wlodow
Rogschany	Wreshna
Roslavl	Yampol
Rovno	Yanuschov (Podolia)
Ryechitza	Yaslovitza (Podolia)
Satanov	Zabrazh
Serpeisk	Zamoscz (Zamostye)
Sharograd or Shargorod (Podolia)	Zaslavl (Volhynia)
Slutzk	Zbaraz (Galicia)
Sokol (Volhynia)	Zborowo (Galicia)
Starodub	Zhier (Zgierz)
Starokonstantinov (Volhynia)	Ziatowo
Stary Bykhov	Ziochev (Polish, Zloczow [Galicia])
Strelitz	Zmiyev (Kiev)
Szczecbrszyn	Zotov

COSTA, DA, PEDIGREE: The family of Da Costa is probably identical with that of the Mendez da Costa. It has even been suggested that an early Mendes called himself Mendez da Costa ("Mendes of the Coast"). The arms of the two families both in England and in Holland are practically identical. Their wide connections with so many Marano families—Bravo, Bueno, Dias, Fernandez, Gradis, Jachia, Lopez, Silva, Suasso, Pinto, Mesquita, Ricardo, Belmonte, Capadose, Henriques, Aguilar, Osorio, Villa-Real, Franco, Quiro, Paiba—the large families resulting from these alliances, coupled with the wide extent of their migrations—make the Mendez da Costa pedigree the key to Sephardic genealogies. The principal branch of the Da Costa family in the Netherlands (pedigree I.) and the Holland Mendes da Costa branch (pedigree II.) follow herewith:

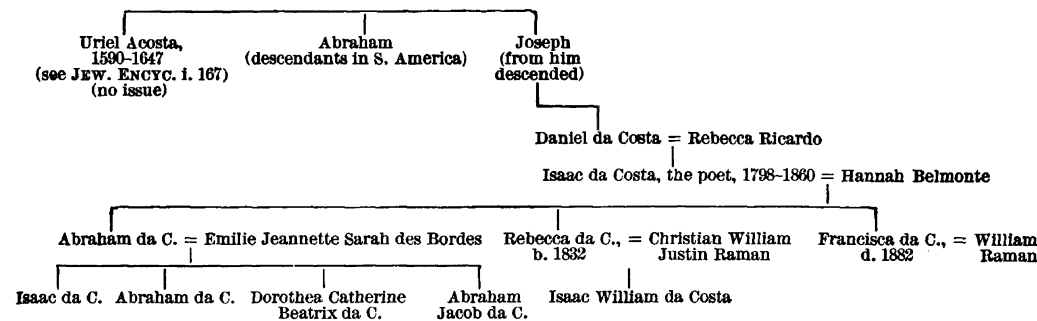

I.

MENDES DA COSTA OF THE NETHERLANDS

II.

DA COSTAS OF HOLLAND.

The English branch of the Mendez da Costas is especially noteworthy, and the genealogy for the early stages was compiled by an eminent member of the family, Emanuel Mendez da Costa, secretary of the Royal Society, London. He traces his own descent back to two Da Costas from whom he was descended on the father's (pedigree III.) and the mother's (pedigree IV.) side respectively. The two pedigrees follow on page 290.

The last inheritor of the fortunes of the English Da Costa appears to have been Mrs. Sarah Williams, who left £40,000 to Benjamin Disraeli, with the request that he should adopt the Da Costa arms.

COSTA, ANDREA MENDES DA: Chamberlain of Queen Catherine of Bragança, wife of Charles II. of England; flourished about 1665. His position at court was due to the influence of his brother, **Antonio Mendes**, who had cured Queen Catherine, while in Portugal, of erysipelas. The queen had persuaded Antonio and his brothers to accompany her to England, where they all became members of her household. After their arrival in London they openly proclaimed themselves Jews. Andrea Mendes, as well as his brothers, is said to have taken an active interest in the affairs of the Jews of London, and frequently influenced Charles II. on their behalf.

COSTA, ANTHONY DA (sometimes known as **Moses da Costa** or **Antonio da Costa**): An opulent Jewish London merchant of the eighteenth century. He attained the position—unusual for a Jew in those days—of a director of the Bank of England. In 1727 he brought an action against the Russia Company, which refused to admit him to membership on the ground of his being

IV.—19

a Jew. The attorney-general decided that he must be admitted, whereupon the company petitioned Parliament to modify the former's charter so as to give it the right of refusal. Anthony also figured, in 1736, in a case with W. Monmartel relating to a bill of exchange.

Anthony was the son of Jacob (Alvarez or Alvaro) da Costa, who is probably the Da Costa referred to in the "Thurlow Papers." Jacob Alvarez (or Alvaro) da Costa arrived in England with his family in 1655. He married Leonora (Rachel) Mendes, sister of Fernandez (Fernando) Mendes, the Marano physician of John IV., King of Portugal.

Anthony married his cousin Catherine Mendes, in 1698. Catherine was born in Somerset House, and was named after Queen Catherine of Bragança, wife of Charles II., who graciously consented to stand sponsor to her. This Catherine da Costa is supposed to have made, in 1721, the water-color portrait of her father which now hangs in the vestry of the Bevis Marks Synagogue. Anthony and Catherine da Costa had a daughter, also named Catherine, who married a M. Villareal, becoming a widow at the age of twenty-one. She figured in the famous case of *Da Costa v. Villareal*, and subsequently in that of *Villareal v. Mellish*.

COSTA, BENJAMIN MENDEZ DA: Philanthropist; born in 1704; died in England 1764. His family was among the most ancient and honorable of the Portuguese Jews, and Da Costa himself was in the foremost ranks of the Hebrew merchants of his day. As an instance of his philanthropy he distributed, during his lifetime, £3,000 a year in charity to the poor of all creeds. In 1762, in conjunction with Isaac de David Levy, he endowed a yeshibah, bestowing yearly distributions on the students who attended it. By a codicil to his will he desired his benefactions to be continued during the

GENEALOGICAL TREE OF DA COSTA FAMILY.

lives of the indigent families who had received his bounty.

G. L.

COSTA, EMANUEL MENDEZ DA: Librarian and fellow of the Royal Society of London, scientific writer, and fellow of the Antiquarian Society of London; born in 1717; died in 1791. He was a son of Abraham Mendez da Costa, who had come from Normandy to reside in England about 1696, and in 1702 had married Esther da Costa, his first cousin. Emanuel Mendez da Costa was distinguished as a botanist, naturalist, philosopher, and collector of anecdotes of literati and of valuable notes and MSS. He was made a member of the Aurelian Society Feb. 7, 1739, and in 1746 was elected a member of the Gentleman's Society at Spalding, and maintained a regular correspondence with Dr. Green, the secretary of that organization. On Nov. 26, 1747, Da Costa was elected fellow of the Royal Society of London, and later its librarian, after which he was elected a member of the Botanic Society in Florence. His publications were: "A Natural History of Fossils" (at the time of its publication the author was esteemed the greatest master of the subject in England); "Elements of Conchology, or An Introduction to the Knowledge of Shells," 1776; and "British Conchology," 1778. He also contributed several valuable papers to the "Philosophical Transactions" and other scientific publications. It was in his library that the list of the original Jewish settlers in England was found. His collection of printed books, manuscripts, engravings, and drawings of natural history was sold by public auction after his death.

G. L.

COSTA, ISAAC DA: Dutch poet; born Jan. 14, 1798, at Amsterdam; died there April 28, 1860. His father, Daniel da Costa, a relative of Uriel Acosta, was a prominent merchant in the city of Amsterdam; his mother, Rebecca Ricardo, was a near relative of the English political economist David Ricardo. Daniel da Costa, soon recognizing his son's love for study, destined him for the bar, and sent him to the Latin school from 1806 to 1811. Here Isaac wrote his first verses. Through his Hebrew teacher, the mathematician and Hebraist Moses Lemans, he became acquainted with the great Dutch poet Bilderdijk, who, at the request of Isaac's father, agreed to supervise the boy's further education. Bilderdijk taught him Roman law, and a familiar intercourse sprang up between them, which afterward developed into an intimate friendship.

In 1817 Da Costa went to Leyden, where he again saw much of Bilderdijk. He there took his degree as doctor of law in 1818, and as doctor of philosophy June 21, 1821. Three weeks later he married his cousin, Hannah Belmonte, who had been educated in a Christian institution; and soon after, at the instance of Bilderdijk, he was baptized with her at Leyden. At that time he was already well known

as a poet. After Bilderdijk's death Da Costa was generally recognized as his successor among Dutch poets. He was a faithful adherent of the religious views of his friend, was one of the leaders of the Orthodox Reformed party, and during the last years of his life was a teacher and a director of the seminary of the Independent Scotch Church. However severely his religious views and efforts be censured, his character, no less than his genius, was respected by his contemporaries. Although he wrote much on missionary matters, he is distinguished from many other converts in that, to the end of his life, he felt only reverence and love for his former coreligionists, was deeply interested in their past history, and often took their part.

Aside from his fifty-three longer and shorter poems, Da Costa wrote largely on theological subjects. He also wrote "Israel en de Volken" (2d ed., Haarlem, 1848-49), a survey of the history of the Jews to the nineteenth century, written from the standpoint of the Church. The third volume, dealing with the history of the Spanish-Portuguese Jews, is especially noteworthy on account of the mass of new material used. The work was translated into English, under the title "Israel and the Gentiles," by Ward Kennedy (London, 1850), and into German by "A Friend of God's Word" (Miss Thumb), published by K. Mann (Frankfort-on-the-Main, 1855).

Da Costa's two papers, "The Jews in Spain and Portugal" and "The Jews from Spain and Portugal in the Netherlands," which appeared in 1836 in the "Nedersche Stemmen over Godsdienst, Staat-Geschied- en Letterkunde," may be considered as preliminary to the history. Of interest also are his works on the Von Schoonenberg (Belmonte) family ("Jahrb. für Holland," 1851) and on "The Noble Families Among the Jews" ("Navorscher," 1857, pp. 210 *et seq.*, 269 *et seq.*; 1858, pp. 71 *et seq.*; 1859, pp. 110 *et seq.*, 174 *et seq.*, 242 *et seq.*). Da Costa possessed a valuable library which contained a large number of Spanish, Portuguese, and Hebrew manuscripts, as well as rare prints from the Spanish-Portuguese Jewish literature. It was sold at public auction a year after his death. A catalogue of the library, compiled by M. Roest, was published at Amsterdam in 1861.

COSTA, ISRAELE DI EMANUELE: Italian rabbi; born 1819; died 1897. He succeeded Abraham Baruch Piperno as rabbi of Leghorn in 1864. Of his works the following may be mentioned: "Sefer Bet ha-Zikkaron" (Maḥzor for Rosh ha-Shanah), with annotations, 1869; complete Sephardic Maḥzor, with Italian translation, 1892; The Zohar, in square Hebrew letters, with punctuation and vowel-signs, Leghorn, 1888; "Mikveh Yisrael" (Hope of Israel), one hundred stories, 1851; "Yashir Yisrael" (Let Israel Sing), 1853; "'Arabim be-Tokah" (The Willows in Her Midst), 1880; "Ki Na'ar Yisrael" (For Israel Is a Lad), 1890; a Hebrew grammar for the use of children, several times reprinted; a Hebrew-Italian dictionary, in collaboration with the rabbi Funaro

and Cabib, 1853; various remarks on the validity of the celebrated will of Caid Nissim Samama, 1877-78.

Costa was a Freemason, and reached the thirty-third degree. His Italian songs are very popular among the youth of the Jewish schools.

COSTA, SIR MICHAEL: Musical composer and conductor; born at Naples of a Sephardic family Feb. 4, 1810; died in Brighton April 29, 1884. He studied under his father, Pasquale Costa, his grandfather, Tritto Costa, and Zingarelli. In 1829 he visited England, assisting at the Birmingham musical festival, and conducting at Her Majesty's Theater in 1831. He was naturalized as a British subject in 1839. Subsequently he conducted at the Philharmonic Society concerts 1846, at the Royal Italian Opera 1847, for the Sacred Harmonic Society 1849, at the Handel festivals 1857, and at Her Majesty's Theater in 1871. Costa was knighted at Windsor April 14, 1868, and invested with the Royal Order of Frederick in 1869. He was also knight of the Turkish Order of the Medjidie, and knight commander of the Crown in Italy.

Costa's works include the operas and ballets "Il Delitto Punito," 1826; "Il Sospetto Funesto," 1827; "Il Carcere d'Ildegonda," 1828; "Malvina," 1829; "Malek Adhel," 1837; "Don Carlos," 1844; "Kenilworth," 1831; "Sir Huon," 1833; and "Alma," 1842; and the oratorios and cantatas: "L'Immagine," 1815; "La Passione," 1827; "Eli," 1855; and "Naaman," 1864. He also wrote many songs and miscellaneous compositions.

COSTA, SOLOMON DA: Donor of Hebrew library to the British Museum; flourished about 1760. A broker by profession, he acquired a considerable fortune, much of which was distributed in deeds of piety and beneficence to non-Jews, as well as to his coreligionists. He was also able to render monetary assistance to several of the leaders of the House of Commons, and by his credit with them effected at times national good services. Among these was the preservation of the collection of Hebrew books at present in the library of the British Museum. These had been collected during the Commonwealth, and had fallen to Charles II. at the Restoration. They lay unnoticed throughout the reign of Charles, and this neglect continued during the reigns of James II. and William III. At length in Anne's reign they were sold to a bookseller, from whom, some time in the reign of George I., the entire collection was purchased by Solomon da Costa,

then a young man, and desirous of knowledge, who subsequently presented it to the British Museum.

COSTER, ABRAHAM: Dutch anti-Jewish preacher; lived at Amsterdam in the seventeenth century. He wrote "Histoire der Joden," a history of the Jews from their dispersion to the author's time (Amsterdam, 1658). In this history he described the manners, customs, and fables of the exiles, with the purpose of influencing the authorities to prevent the Jews of Amsterdam from building a new synagogue.

COSTS: The outlays made by suitors which are incident to the administration of justice. The question of costs is a twofold one: (1) What do the several officials and the witnesses receive? and (2) What, if anything, does the successful recover from the losing party?

1. Among the officers the judge or judges are foremost; then such experts and referees as assist the court by their reports (*e.g.*, the appraisers of land; see APPRAISEMENT); next the clerks who take down the proceedings or make out judicial writings; next the messengers who summon the defendant and who carry out the judgment by seizure of goods and lands; and, lastly, the witnesses.

As to the judges and witnesses the Mishnah (Bek. iv. 6) lays down the stern rule: "One who takes hire to judge, his judgments are void: he who testifies for hire, his testimony is void."

Later authorities saw the impossibility of obtaining the services of the judge for nothing, and, following Ket. 105a, allowed him to charge for loss of time if he had a known occupation; but the mere claim that during the time consumed he might have secured some employment did not entitle him to any costs. The payment of a judge's fee was shared by the two parties in equal parts (compare BRIBERY; FEES).

The clerk's fees for noting the proceedings in open court, and for making out all writings in which both parties join, are borne by both parties in equal shares (B. B. x. 4). But if the ban has been pronounced against the defendant for refusing to appear, and he comes in to clear himself, he has to pay, before the ban is removed, the fee due to the clerk for making out the instrument (B. K. 112b).

The messengers are of course paid for their services and traveling expenses. In the Talmudical passage relating to the corrupt practise of Samuel's sons of enriching their underlings (Shab. 56a), the messenger is called *ḥan* ("apparitor," lit. a synagogue official).

2. There is no provision for awarding to the winning party his outlay for costs against the loser, except in a procedure arising after Talmud times, and first mentioned by Alfasi; namely, that of FOREIGN ATTACHMENT, a procedure which is peculiar.

being due to the necessities of the times when the Jews had become wanderers from land to land.

L. N. D.

COSTUME.—In Biblical Times: The general Hebrew designation for "costume" is "beged," applied indifferently to the garments of rich and poor, male and female. Other general designations are "keli," "lebush," "malbush," "tilboshet," and also "kesut." An exact description of the successive styles of costume in use among the people of the Bible is impossible, since the material at hand is insufficient.

The earliest garment was the apron around the hips or loins ("hagorah" or "ezor"), made, in primitive times, of the skins of animals. This apron developed in course of time into the undergarment ("ketonet" or "kuttonet" = *χιτών*, "tunica"), which was worn next to the skin (Gen. ix. 21; II Sam. vi. 20), and taken off at night (Cant. v. 3). (See *Coat*.) It seems to have been distinct from the "sedinim" = *σινδόνες* (Judges xiv. 12 *et seq.*; Isa. iii. 23; Prov. xxxi. 24), usually designating undergarments of fine linen worn under the ketonet (compare the Assyrian "sudinnu").

In ancient times undergarments of this kind were held together by a girdle, made of linen (Jer. xiii. 1), leather (II Kings i. 8), or gold

Undergarments. "ezor" in the case of the priests (Ex. xxviii. 4 *et seq.*), or "abnet" (Isa. xxii. 21) in the case of officials. The original dress of the Israelites changed somewhat under Syrian and Babylonian influence. On Egyptian monuments the Syrians are clad in long, tight-fitting upper garments, striped in blue and dark red, richly embroidered, and in yellow undergarments with tight-fitting sleeves, and tight trousers (compare Josh. vii. 21). Trousers, which are now worn in the East, especially by women (compare "Zeit. Deutsch. Paläst. Ver." iv. 62), are not mentioned among the appointments of an ordinary wardrobe, but the priests in later times (compare Ex. xx. 26) wore a garment resembling modern trousers ("miknasim" or "miknasayim"; Ex. xxviii. 42 *et seq.*, xxxix. 28; Ezek. xliv. 18).

A cloak ("me'il") was generally worn over the undergarment (I Sam. ii. 19, xv. 27). This, like the me'il of the high priest, may have reached only to the knees, but it is commonly supposed to have been

Cloak. a long-sleeved garment made of a light fabric, probably imported from Syria. Every respectable man wore generally the upper garment ("simlah") over the ketonet; for any one dressed only in the ketonet was considered naked ("arom"; I Sam. xix. 24; Amos ii. 16; Isa. xx. 2; Job xxii. 6, xxiv. 7, 10). The fellahs of modern Palestine wear the "abayah," a cloak usually black, or in black and brown stripes, which corresponds to the (outer) coat of the ancient Israelites.

The 'abayah consists of a rectangular piece of woolen cloth, sewed together so that the front and the two openings on the sides for the arms are unstitched.

Like the fellah of to-day, so the poor Israelite of ancient times wrapped himself in this garment at night to keep warm (Ex. xxii. 26; Deut. xxiv. 13). Deuteronomy and the ordinances for the priests command that tassels ("gedilim," and "zizit") be attached to the corners of the coat (Deut. xxii. 12; Num. xv. 38 *et seq.*); and, according to the later interpretation, not given in Deuteronomy, these tassels were to serve the Israelites as a perpetual reminder to keep the commands of YHWH. At the breast the upper garment was arranged in a wide fold ("hek"; Ex. iv. 6), into which idlers put their hands (Ps. lxxiv. 11), and which was frequently used as a pocket (II Kings iv. 39; Hag. ii. 12). Since the upper garment was in the way when worn at work, it was either left at home or removed by the workman. It was made of the same

Upper Garments. materials as the lower one, in early times generally of wool, in Palestine of flax also; but later on purple stuff was imported from Phenicia, byssus from Egypt, and artistic weavings and embroideries from Babylonia (Josh. vii. 21; Zeph. i. 8). The nobles often dressed in white (Eccl. ix. 8; compare the garments of the priests), but it is probable that gorgeously colored garments, like those found on the Syrian figures in Egyptian monuments, were also much used. According to Deut. xxii. 11; Lev. xix. 19, garments woven of both wool and linen were forbidden, probably for superstitious reasons (compare Stade's "Zeitschrift," xx. 36 *et seq.*; see SHA'ATNEZ).

At a later period the nobles wore over the upper garment, or in place of it, a wide, many-folded mantle of state ("adderet" or "ma'atafah") made of rich material (Isa. iii. 22), imported from Babylon (Josh. vii. 21). As costly garments were worn only on special occasions and removed immediately afterward, they were called "mahalazot" (Isa. iii. 22; Zech. iii. 4) or "halifot" (Gen. xlv. 22; Judges xiv. 12 *et seq.*). This was especially the case with garments worn during the service in the Temple, which, having come close to the divinity, had become, figuratively speaking, saturated with the divine effluvium and could easily imperil the wearer. Persons of higher rank, especially the princes, had a great number of these festive garments (II Kings x. 22), which were taken care of by a special keeper of the wardrobe (compare II Kings xxii. 14). They were not merely for personal wear (Job xxvii. 16), but, as in the East to-day, they were frequently offered as presents (Gen. xlv. 22; I Sam. xviii. 4; II Kings v. 5).

The dress of women corresponded in the main to that of the men. They also wore the ketonet and simlah. According to Deut. xxii. 5,

Women's Dress. however, there must have been some difference. The garments of the women were probably longer (compare Nahum iii. 5; Jer. xiii. 22, 26; Isa. xlvii. 2), provided with sleeves (II Sam. xiii. 19), and wider than those of the men, and therefore better adapted to conceal the figure (compare "Zeit. Deutsch. Paläst. Ver." iv. 60). The dress of noblewomen was distinguished for its luxury and ornaments (compare Isa. iii. 16 *et seq.*; Ezek. xvi. 10 *et seq.*), and was even scented with perfumes (Ps. xlv. 8; Cant. iv. 11; compare especially the catalogue in Isa. iii. 16

et seq.). The luxury in dress displayed by women in the East at the present day suggests the probability of similarly luxurious habits on the part of their sisters of former times. Niebuhr saw women appear in eight or ten different dresses during one evening. Sandals ("na'alayim") of leather, fastened with a strap ("serok"; Gen. xiv. 23), were generally worn to protect the feet in summer against the burning sand, and in winter against the damp ground; but they were worn neither in the house nor in the sanctuary (Ex. iii. 5; Josh. v. 15). Otherwise, however, to walk about without sandals was a sign of great poverty (Deut. xxv. 19) or of deep mourning (II Sam. xv. 30; Ezek. xxiv. 17, 23).

Neither the monuments nor the written documents of Biblical times give any information of value concerning head-gear. On the marble relief of Sennacherib the Israelites appear uncovered; and while on the Shalmaneser stele Jehu's ambassadors have head-coverings, these are evidently patterned after the Assyrian fashion. Only one passage of the older literature (I Kings xx. 31) makes mention of "habalim" that are wound around the head; these recall the Syrians on Egyptian monuments, who appear with a rope coiled around their long, flowing hair, as is still the custom here and there in Arabia. This custom, probably a very ancient one, did not long obtain, since it afforded no protection

Head-Covering. against the sun. It may be assumed, therefore, that even the ancient Hebrews had a style of head-covering still used by the Bedouins. This consists of a square woolen cloth ("kaffiyah"), folded triangularly, and laid upon the head, over which one corner depends to protect the nape of the neck, while the two side corners are crossed under the chin and also hang down the back. A heavy woolen cord ("akal") holds the cloth firmly on the head. In later times both men and women wore a covering more closely resembling the turban of the modern fellahs of Palestine.

The cap (takiyah), often the only head-covering worn by boys, is generally made of two or three thicknesses of cotton cloth, intended to protect the rest of the head-covering against perspiration; over this are placed one, and often two, felt caps ("lubbadah"), and then the Turkish national head-covering ("farbush"); finally a fringed cloth of unbleached cotton, a colored figured mandil, a yellow and red striped kaffiyah, a black cashmere shawl, a piece of white muslin, or a green cloth is wound around this. This style of head-covering not only protects against the sun, but is also an admirable pillow, and serves as a repository for valuable documents (compare "Zeit. Deutsch. Paläst. Ver." iv. 57 *et seq.*). The use of a similar head-covering among the Hebrews seems to be indicated by the noun "zanif" (from the verb "zanaf"; Job xxix. 14; Isa. iii. 23), as well as by the verb "habash," applied to the act of arranging the "zanif"; for the verb "habash" means literally "to wind around," and the verb "zanaf" similarly signifies "to wind into a ball." It is possible that the various classes gradually came to use different forms of the turban.

Since the ancient Hebrews evidently knew nothing of the strict separation of men and women cus-

tomary among the Moslems, the women wore veils only on certain occasions, as on the wedding-day (Gen. xxiv. 65, xxix. 22 *et seq.*). Later

Veils. on, veils and gauze garments, adopted from other nations, apparently came into more general use among the Israelites (compare Isa. iii. 16 *et seq.*). The most common term for "veil" is "za'if" (Gen. xxiv. 65), while "re'alot" (Isa. iii. 19) probably designates a veil consisting of two parts, one of which, adjusted above the eyes, was thrown backward over the head and neck, while the other, adjusted below the eyes, hung down over the breast. It does not follow from Ex. xxxiv. 33 *et seq.* that men also wore veils.

—**In Post-Biblical Times:** The dress indicated in the Talmud does not differ much from that described in the Bible. Rules were given for the order in which the different articles of dress were removed

COSTUME OF GERMAN JEWS OF THE FIFTEENTH CENTURY.
(From Herrad von Landsberg, "Luftgarten.")

before a bath, and from this can be ascertained the costume of the ordinary Israelite of the time, which consisted, in order of removal, of shoes, head-covering, mantle, girdle, shirt, and finally a vest known by the Greek name "epikarsion" (Derek Erez Rabbah x.).

Many, if not most, of the terms applied to articles of dress were derived from the Greek, and it is therefore probable that their form and style

Generally speaking, it may be assumed that the Jewish dress of Palestine, at least in the cities, was adapted in a large measure from that of the Romans; yet at times conservatives like the masters of the Law kept to the old Palestinian costume: the "gol-lok," which they wore under the tallit (B. B. 57b), is specially declared to be like the so-called "coat of many colors" of Joseph (Gen. R. lxxxiv.). Owing to the flowing character of the robes there was very little difference in male and female dress, so that Rabbi Judah and his wife were able to manage with one street-robe between them. The stola, for instance, was used indiscriminately by men and women. It was a long mantle of finer material than the tunic or shirt, girdled under the breast and provided with a stripe of a different color and sometimes embroidered with gold. It was often very expensive, costing occasionally as much as 100 minas (Shab. 128a). The waistcoat, or epikarsion, used by both men and women, was brought round under one arm and then knotted over the shoulder of the other (Niddah 48b; compare Mik. x. 4). The trousers or drawers of the ordinary Israelite differed from those of the priests of earlier times only by being provided with openings (Niddah 13b). In regard to covering for head and feet see HAT; SHOES.

Mourners as well as excommunicated persons (Yer. R. H. i. 3) wore black, as did those accused of adultery (Soṭah 7a); but shoes were not to be black, because the wearing of black shoes was a distinctively Gentile practise (Ta'an. 22a). White was used at weddings and other festivals, and for this reason was adopted for the festival of

Color. New-Year (Yer. R. H. i. 3); for special apparel as a sign of mourning see MOURNING, and for the use of crowns on festive occasions see CROWNS. Jewesses did not wear red,

German Jew of the Early Sixteenth Century.
(After Hans Burgkmair.)

were Hellenic. Thus the sagum, or armless mantle of the laborer (Kel. xxix. 1); the dalmatic of the leisurely classes (Kil. ix. 7); the sudarium, or handkerchief (Shab. iii. 3; Sanh. vi. 1; compare Luke xix. 20); the pileum, or felt hat (Niddah viii. 1); and the stola (Yoma vii. 1) are all spoken of by their Greek names. A more complete enumeration of clothing in Talmudic times is given in Shab. 120a, in which the question is raised as to what clothes may be carried out of a burning house on Sabbath, Rabbi Jose limiting them to eighteen of the more necessary articles. The parallel passage in the Jerusalem Talmud gives different names, which fact points to a difference in costume between Palestine and Babylonia. Most of these names, as well as those in Yer. Kil. ix. 4 and in Massek. Zizit, p. 22, are of Greek origin, and indicate the extent of Hellenic influence on Jewish dress. The Jews even borrowed from the Romans the superstitious practise of drawing on the right shoe first (Derek Erez R. x.; Shab. 61a), though previously the opposite custom had prevailed among

Hellenic Influence. them (Yer. Shab. vi. 2). The panula, a round cape with hood, mentioned in Yer. Hag. i. 8, and generally used by day-laborers to protect their tunics from rain and snow, is contrasted with the tallit as a Japhetic or foreign garment (Gen. R. xxxvi.).

Jews of the Upper Rhine, End of the Sixteenth Century.
(From the Basel "Stammbuch," 1612.)

which was regarded as licentious (Ber. 20a). Jews were cautioned against adopting the many-colored or purple garments of the heathen, or their wide

pantaloon (Sifre, 81), and it became a general principle in later Jewish law that one should not follow in the ways of the heathen or use costumes pe-

(Derek Erez Zuta x.); dress was considered of even more consequence than food and drink: "Dear upon you, cheap within you" (B. B. 52a); and the rule was to dress according to your means, **Importance of Dress.** but to eat below them (Hul. 84b; but see Gen. R. xx.). The scholar especially was required to dress neatly and respectably. It was regarded as bringing shame upon scholarship if a learned person went out with botched shoes or darned garments (Shab. 114a). A bride was given a year to prepare the trousseau (Ket. 57a), and a man was obliged to give his wife each year one hat, one belt, three pairs of shoes (for the three feasts), and other articles of dress, amounting in all to fifty zuzim (Ket. 64b). While there was a strong tendency to adopt foreign costume, as shown by the names of garments, there was an equally marked tendency to avoid this, probably as part of the general principle of placing a fence about the law.

The great change came with the Lateran Council of 1215, which instituted the **Badge**. Innocent III. in the preamble to the law enforcing the badge complains that Jews were being mistaken for Christians. From this time onward there was little danger of such mistake. The tendency among the Jews themselves was to make a distinction be-

Influence of the Badge. tween their own dress and that of their neighbors. In particular, black became the favorite color of the Jews in Spain, Germany, and Italy (Berliner, "Aus dem Inneren Leben," 1st ed., pp. 36-37). Their frequent expulsions caused them to carry into other lands the dress of their native places, and their natural conservatism caused them to retain it. The Rabbis, however, had throughout to contend with the innate tendency

(After Daniel Meisner, "Politica Politica," 1700.)

culiar to them (Shulhan 'Aruk, Yoreh De'ah, 178, 1); and though this was interpreted as applying only to that kind of Gentile dress which was associated with some specifically religious practise, it was held that, if a religious principle were involved, it were better to face martyrdom than to change even the style of a shoelace (Sanh. 74b). The pious were particularly careful. Moses Sofer in his ethical will says: "Be careful of changing your name, language, or costume, which God forbid" ("Leb ha-'Ibri," i. 35). Only one exception was made to this general principle: those who were "near the government" were allowed and even recommended to wear the ordinary clothes of office (Yoreh De'ah, 178, 2). There is no definite proof that a distinctively Jewish dress was worn during the Middle Ages, either in Asia or in Europe. The gaon of Bagdad was clothed like a king ("Travels of R. Pethahiah," ed. Benisch, p. 43). Pethahiah himself noticed the difference between the costumes of Eastern and Western Jews (*l.c.* 11), the Persian Jews at that time wearing full and flowing outer robes. Considerable elegance was displayed by the wealthier classes. Gold embroidery is mentioned (Yer. Yoma vii. 3); and women were not above using false hair ('Er. 7b), and false teeth made of gold or silver (Sheb. 64b); the hair was also dyed (B. B. 60b).

Great importance was attributed to dress: "The glory of God is man, the glory of man is dress"

(From a caricature of the early eighteenth century.)

of the Jewess toward luxury and display, and they passed in vain many **SUMPTUARY LAWS**.

The only restriction on material is in the Biblical injunction against using garments "mingled of linen

and woolen" (Lev. xix. 19; see SHA'ATNEZ). The leather of forbidden animals would also be unsuitable for Jewish use. Generally speaking, the material used was of the richest kind for female dress,

but was chosen more for use than for show in the case of the men.

Even from Talmudic times it was usual to reserve a better suit of clothes for the Sabbath. Every one should have two suits, one for week-days and one for Sabbath (Yer. Peah viii. 7), and where two suits are unattainable, the one should be differently arranged on Sabbath (Sanh. 113a). It is quite customary on modern Jewish holidays to carry out the Talmudic precept.

Regarding the costume of Jews in early Germany there are a few details in the sources given by Berliner in "Aus dem Innern Leben," 2d ed., pp. 62-65. The "Sachsenspiegel" speaks of the gray coats of the Jews, but black was generally recommended (Benjamin Ze'eb, Responsa, No. 282), though Jews might wear bright colors on journeys or in times of trouble ("Aggudah," 125b). Similarly fringes were disliked (Israel Isserlein, Responsa, No. 296), though the "kurse" worn by brides,

11,

Tu

(After a photograph.)

a mantle with narrow sleeves, was trimmed with fur. Both sexes wore long garments. The Jew wore a "kappa" reaching to his heels, while on his head was placed a "mitra," or hood ("Maharil," pp. 86, 82). The mantle of the Jewess, however, was longer, and was held back by a brooch called a "nuschke" ("Or Zaru'a," ii. 39). The best-known garment worn by the German-speaking Jews was the white "sargenes," called "kitel" in the Rhine regions. This was made of silk, often embroidered, and flowed ungirdled to the feet (Menz, Responsa, No. 86). It was worn mainly on the Sabbath and on festivals, and was without the right armhole, so that the right arm could not profane the Sabbath. Later on it was used as a shroud, but the earliest notice of this refers to the beginning of the fourteenth century. Grünbaum ("Jüdisch-Deutsche Chrestomathie," pp. 502-504) derives it from "sarge," but Berliner (*l.c.* p. 132) from the Old

High German "sarroc," or shirt. For garments for the dead see SHROUD.

The pupils of Isserlein describe him as wearing a "geriffelte," a fur-lined mantle like that worn by women, with ruffles round the neck (Responsa, No. 297); but at the same time they state that only the older rabbis in Austria wore it. Sebastian Brant, in his "Narrenschiff," describes a particularly popular fringed mantle of his time as "Judisch syt" (Güdemann, "Erziehungswesen in Deutschland," Vienna, 1888, p. 274).

For information concerning the actual dress used by Jews in medieval and modern times, the portraits and caricatures of Jews found in manuscripts and books must be examined. These are rarely of Jewish origin except in the case of the illuminated Hag-

(From a photograph.)

gadot, and in these it is difficult to determine how far the illustrations represent specifically Jewish dress. In an early fourteenth-century Spanish manuscript Haggadah the tunics of the men come to a

point in front, while the women wear an outer mantle without sleeves which passes over the head, leaving the breast bare. The hat is large, and is worn toward one side of the head, with the back bent up and the front flat (Brit. Museum, Add. MS. 27,210). In an Italian Haggadah dated 1269 the women wear tight-fitting low dresses and have their hair fastened in nets and caps (*ib.* Add. MS. 26,957). The chief characteristic which will be observed in the first row

of costumes in the accompanying plate is the length of the outer robe, which, except in the case of No. 12, a Swiss Jew of the fifteenth century, comes down to the feet. This points to the fact that the Jews during the three centuries indicated were debarred from handicrafts. A peculiarity that is particularly to be observed in the costume is that it exactly resembles that of the sedentary monk. The sole exception to the rule of the long outer robe is found in a representation (see illustration, p. 296) of a Jew of Swabia early in the seventeenth century, figured in Meisner's "Politica Politice," whereas the Italian Jew (No. 5) in the plate is more prepared for outdoor and a traveling life.

JEWESS OF BRUSA, TURKEY.
(After Racinet.)

With the Renaissance a new principle seems to have come into play: the Jews clung more tenaciously to their usual dress, and did not follow the innovations of fashion; so that they became distinguished by wearing the

Medieval old-fashioned costume of their native **Costumes.** country. The pictures of German Jews and Jewesses of the seventeenth century given by Hottenroth (Nos. 13, 15) do not differ in any respect from the ordinary dress of citizens of Worms, Nuremberg, and Frankfort, except by being somewhat old-fashioned. The same applies to the Jew and Jewess of Fürth (No. 18). Similarly, the costumes of Jews of Amsterdam depicted in Picart's "Coutumes Religieuses" exactly resemble those of the wealthier classes of Holland at that period.

It is doubtful whether, since the destruction of the Temple, Jews have had anything corresponding to the sacred vestments of the Church—that is, garments exclusively used in the discharge of certain religious functions. Archeologists endeavor to

prove that Christian sacred utensils and vestments were directly derived **Sacred** from the Jews (J. W. Legg, "Inventories of Christ Church, Canterbury," London, 1902, Introduction), but without considering the historic conditions. Since the days of the

Temple there has been practically no priestly caste among Jews. Every layman is qualified to perform all ecclesiastical functions, except that of the dukan. Consequently there was no need for special vestments either within or without the synagogue. On the other hand, the injunction (Deut. xxii. 12) to wear fringes led to the use of the ARBA' KANFOT and the TALLIT. Of recent years, however, and in Western countries, it has become customary for the Jewish clergy to adopt a distinctive garb. In the synagogue a velvet biretta is, perhaps, the most usual head-covering, with an ordinary academic gown, over which, on suitable occasions, the tallit is placed. Outside the synagogue there is a tendency to adopt the clerical dress of each country. Thus the chief rabbi of England wears a costume resembling that of the dean or bishop of the English Church, while a rabbi of a French consistory wears a hat with curved rims, and the lace bands, the broad sash, and surtout of a French parish priest.

In the East, Jewesses for the most part adopted the Mohammedan custom of wearing veils, though the custom was by no means so rigorously observed by them as by their Mohammedan sisters. In 1697 the Jews of Metz passed a law ordering all their women to wear veils when going to synagogue, except on Saturday nights, at the close of festivals, and on Purim. See VEIL.

FRENCH RABBI IN OFFICIAL GARB.
(From a photograph.)

With regard to those modes of dressing the hair which go with certain costumes, see BEARD; HAIR; PE'OT; WIG.

In Eastern countries both law and custom compel a distinct difference in costume between Jew and Moslem, which difference was also enforced by Jewish law ("Kehunnat 'Olam," p. 14). Green veils are avoided because these are distinctive of descendants of Mohammed. In Egypt, Jews were obliged to

wear yellow turbans. The dress of an Oriental Jew, especially when on his travels, is described at length by Ezra Stiles in his "Diary" (p. 362), but it would be dangerous to regard his description as typical.

Striped clothing is one of the striking characteristics of the Oriental male Jewish dress. This seems against the medieval principle of avoiding party-colored garments. It is not an invariable custom, but is frequent enough to deserve mention. J.

A contemporary Jewess of Algiers wears on her head a "takrita" (handkerchief), is dressed in a "bedenor" (gown with a bodice trimmed with lace) and a striped vest with long sleeves coming to the waist. The "mosse" (girdle) is of silk. The native Algerian Jew wears a "tarbush" or oblong turban with silken tassel, a "sudriyyah" or vest with large sleeves, and "sarwal" or pantaloon fastened by a "hizam" (girdle), all being covered by a mantle, a burnus, and a large silk handkerchief, the tassels of which hang down to his feet. At an earlier stage the Algerian Jewess wore a tall cone-shaped hat resembling those used in England in the fifteenth century (Jew. Encyc. i. 384; see also plate, No. 21). The costume of Tunis is very similar, and was described by Mordecai Noah as follows ("Travels in the Barbary States," p. 311, New York, 1819):

"The Barbary Jews wear a blue frock, without a collar or sleeves, loose linen sleeves being substituted, with wide drawers of the same article, no stockings, excepting in winter, and black slippers, a small black skull-cap on their head, which is shaved, and around which a blue silk handkerchief is bound; they are permitted to wear no colors. The Italian Jews dress like Christian residents, with the addition of a haik, or bournoise, thrown over their heads. The Jewish women, like the Turkish, are considered as an inferior race—they are fat and awkward, their dress consisting of a petticoat of silk of two colors, principally yellow and purple, around which is thrown,

in several folds, a thin gauze wrapper; the head is covered with a colored silk handkerchief; those who are single have their hair plaited in two or three rows, to the end of which they suspend colored ribands; they wear no stockings, but slippers, with silver enclures around their ankles; and the soles of their feet, their hands, nails, and eyebrows, tinged and colored of a dark brown, from the juice of a herb called henna. When they walk they unloosen from their neck a piece of black crape, with which they cover their mouth and chin, leaving the upper part of their face bare."

Whatever the costume, in almost every case the

outer garment is supported by a belt or girdle. This has Biblical authority, and besides enables the ultrapious to carry a handkerchief as a girdle on Sabbath; on other occasions the handkerchief is tucked inside the girdle, as is seen in a curious caricature of an English Jew of the Stock Exchange, as well as in a figure after Hans Burgkmair showing a Jewish pedler of the sixteenth century wearing a relatively modern felt hat (see illustrations, pp. 295 and 296). In the eighteenth century the Jew generally wore the ordinary three-cornered hat of the time, and even had his hair powdered (Arye ben Hayyim, Responsa, No. 6).

In Turkey the costume of the Jews was mainly

distinguished by the black turban, but the outer garment was an "antari," a robe opening in front, of silk or figured calico, reaching a little

Turkish. below the knee and fastened round the waist by a sash passing twice round the body; over this was a "jubbah" lined with cats' fur. Some wore the "bunnefah," or conical hat; some the "meminah," a cap of dark cloth round which a piece of silk was twisted several times like a turban. The modern Turkish Jew adopts mainly European dress with a fez. An especially dignified dress is that of the Jew of Salonica (see plate, No. 24). His 'antari is covered by a "kundi," a long, showy, varicolored mantle lined with fur. The 'antari

Jews of Jerusalem.

(From a photograph by the American Colony, Jerusalem.)

reaches to his feet, and the sleeves are longer than that of the jubbah, under which is to be seen the "saltah" or cloth fur-lined vest. The Jews of Brusa wear a high cap of pasteboard covered with black material, resembling the cylindrical hats worn by Greek priests. Around this is wound a piece of light-colored cotton to form a turban. This is the only distinction between Jewish and non-Jewish dress in Brusa. The Jewesses there have a house-dress

The hotoz is built up from a large number of figured "yemeni" and twisted one above the other in the form of a melon; round the lower edge is a row of gold coins; a small veil of white muslin is fastened to the top of the hotoz and is gathered round the face. **M. FR.**

The Jews of the Caucasus are distinguished mainly by their head-dress, the men wearing a kind of busby, mushroom-shaped and made of fur, while the Jew-

stripes, shalwar (pantaloon), "mintan," vest of the same material as the 'antari, with very long sleeves, hurka of plain taffeta, and a shawl of plain silk and cotton used as a girdle and tied in the front. They wear soft shoes and yellow "pabujas." In Jerusalem one Jewess has been described as wearing a "fistan" (gown) of dark-green satin trimmed with gold embroidery over the plaited skirt, the hem of which is also trimmed with embroidery, as well as the long open sleeves which open out of the narrow sleeves of the "saltah," or jacket of white cashmere.

HAPODI OF THE ORIENT.
(From a photograph.)

moved while at work. The white Jews wear a kind of paletot, and under this a waistcoat buttoned up to the chin; both classes wear a cap resembling a smoking-cap. In earlier times the men used to wear the gored pantaloons and white turbans of the Mohammedans of India (see plate, No. 20).

The Hasidim of Galicia tend to distinguish themselves in dress as well as in customs; besides the fur hat and the old-fashioned "paletot" reaching to the

ankles, the modern Hasid is invariably to be recognized by the pair of white socks into which the trousers are tucked.

A number of superstitions have grown up about costume among the Jews of eastern Europe, though they have doubtless copied many of

Super- them from their neighbors. For every
stitions. new garment a child puts on, the parents give a small sum in charity; and

it is customary to dress a bridegroom, as soon as he is betrothed, in entirely new clothes. It is bad for the memory to put off or on two garments at the same time, or to put on one that has been washed within seven days. It is unlucky to put on a garment upside down or to

catch it in a nail, the latter being a sure sign that an enemy is pursuing you. It is unlucky for two persons to dress a child at the same time: it may die or become sick. If you are mending your dress hold a part of it in your mouth, or it will tie up your memory.

The following is a table of illustrations of costumes in the first four volumes of THE JEWISH ENCYCLOPEDIA:

Volume I.: Aaron, Son of the Devil, page 8; N. M. Adler, 198; Mauricio colonists, 243; Baron d'Aguilar, 274; Algerian Jewess, 384; Chinese Jews, 431; Amsterdam Jews, Jewesses, and children (Picard), 543.

Volume II.: Moses Arragel, page 139; Benj. Arton, 156; Zebi Ashkenazi, 202; Atonement, Day of, 283-285; badge, 425-426; Bagdad, 437; Jerusalem Jew, 614; beard, 614; Belais, 652.

Volume III.: Mordecai Benet, page 14; Beni-Israel, 18-19; Isaac Bernays, 90; betrothal, 126-128; Bokhara, 293-295; bridegroom of the Law, 383; Brussels, 407-408; burial, 432-437; Raphael Isaac Carregai, 532; Caucasus, 628-629; Zebi Chajes, 660.

Volume IV.: China, page 36; Cochinchina, 135-136; Cohn, Tobias, 161; Constance, 235; Cracow, 326-328; Death, 485; Delmedigo, Joseph, 508; disputation; divorce. For

sources of the figures in the colored plate of costumes of Jews see LIST OF ILLUSTRATIONS.

—**In Russia and Poland:** In the Middle Ages the Jews of Poland and Lithuania dressed like their Christian neighbors, as is indicated clearly by Cardinal Commendon in his well-known description of the condition in which he found the Jews when he visited Poland in 1561 ("Czacki Rosprawa o Zy-dach," p. 93). The special garb which, in medieval times, the Jews of Germany and other European countries were compelled to wear (see Bruno Köh-

ler, "Allgemeine Trachtenkunde," iii. 100) was not known in Poland. There is in fact seemingly no

(After a photograph by Orden.)

liable evidence that the so-called Jewish garb of Poland, including even the "jarmulka" (under-cap), is simply the old Polish costume which the Jews retained after the Poles had adopted the German form of dress (see Plungian, "Ben Porat,"

(After Le Prince, 1765.)

p. 59, Wilna, 1858, quoting from Russian sources). As the Jews lived under their own jurisdiction

practically until the division of Poland, and as the interior of Russia had no Jewish population before the acquisition of the Polish provinces, all Russian legislation on the subject of Jewish costumes is naturally confined to the nineteenth century.

But the strictly Orthodox not only had religious scruples against wearing the costume of the Gentiles, which is prohibited, though not clearly and decisively, by Maimonides, and the Shulhan 'Aruk (Yoreh De'ah, 178), but considered the new law as another one of the many efforts of the emperor to Christianize them by force. It caused as much dismay as the worst decree of that harsh reign, and the number of Jews who preferred to suffer the penalty rather than comply with the law was so large that its enforcement was postponed for five years. But the suspension of the law, like most acts of the Russian government, was not complete, and some of the taxes were still collected which had been imposed upon those who desired exemption from that law. Among such taxes was that collected for wearing jarmulkas, which seems to have been collected in various places in an irregular manner, but was finally compounded, by a special decree of Feb. 11, 1818, for a tax of five rubles annually, the proceeds to go to the fund of the "korobka" (basket tax). The decree was reenacted May 1, 1850, to take effect Jan. 1, 1851, giving permission, however, to the governors-general of the various provinces to allow Jews over sixty years of age to continue the old garb.

Now that the costume laws are obsolete the Jews dress as they please. Old-fashioned Jews still cling

Warsaw Jew and Jewess of the Early Nineteenth Century.
(From Hollaenderski, "Les Israélites de Pologne.")

At first such legislation was limited only to special occasions. The "Polozhenie," or enactment concerning the Jews, issued by Alexander I. in 1804, permitted those Jews who adopted the German style of dress to visit the provinces of Russia outside of the Pale of Settlement, and allowed Jewish boys attending lower schools to retain their distinctive costumes, while at the high schools they were obliged to wear the German dress. The "Polozhenie" issued by Nicholas I. (April 13, 1835) reenacted this statute, with the addition that Jewish students at the universities must wear the costumes usual in those institutions, and that Jews elected to civil offices must wear the apparel fixed by law for such municipal dignitaries. In December, 1841, the Jews then actually residing in Riga received the permission of the government to remain there permanently on condition that they would conform to the dress of the inhabitants. The law of April,

Law of 1845. 1845, compelled all Jews in Russia to assume the German costume. The progressists among the Jews of Russia considered the law a great victory for their cause, and scoffed in prose and poetry at the consternation caused among the old-fashioned (Levanda, in "Den," 1870, Nos. 6-17; I. M. Dick, "Die Jüdische Kleiderumwechslung," Wilna, 1870; Goldberg, "Massa' Zafon," in "Kokbe Yizhak," No. 35).

Hassid and Wife of the Early Nineteenth Century.
(From Hollaenderski, "Les Israélites de Pologne.")

to the long frock-coats and cloaks, length being the distinguishing feature of all kinds of Jewish costumes (see Carl Köhler, "Trachten der Völker in Bild und Schrift," p. 300, Dresden, 1871). The preference for silk, velvet, and expensive furs, against which the Jewish Council of the Four

Lands legislated from the sixteenth to the eighteenth century, still prevails in many parts of Russia, though it is waning. The **HASIDIM**, especially in the smaller towns of

Present Day. Poland, Podolia, and Volhynia, still use the old-time Jewish costume with

some modifications. This includes the long coat; short white trousers, or rather knee-breeches, which also serve instead of underwear; long white stockings; and low, slipper-like shoes. The "arba' kanfot," or "little tallit," takes the place of a vest; the girdle, and—with the more pretentious—the "stramcle" or "spodek" (round fur cap) over the jarmulka, complete the costume, which is not much unlike that described by Holländerski as worn before the government began to legislate on the subject. In larger and more progressive places, as well as in Russia proper, most of the Jews dress like their Christian neighbors, always with a tendency, among the older people, toward longer coats. The dress of Jewish women never differed much from that of other women, and any difference was more in the material used than in the form or style. Further descriptions of Jewish costumes in Russia will be found in the articles on the respective provinces and governments.

COTA, RODRIGO (also known as **Cota de Maguaque**): Spanish poet; born at Toledo; died 1497. He came of a Marano family, three members of which—Francisco Cota, Lopez Cota, and Juan Fernandez Cota—were employed by the state, and were deprived of their offices in 1450. It is uncertain whether Rodrigo was the son of Sancho Cota, the Toledo councilor.

Instead of taking the part of his former coreligionists, Cota sided with their persecutors, and in consequence was reproved by the Marano poet Anton de Montoro, who warned him that the Christians would always scorn him as a convert. The list of secret Jews who had recanted, published at Toledo in 1497, contains the entry "Rodrigo Cota el Viejo [the Elder], y el Mozo" [the Younger]. Rodrigo "the Elder" is the subject of this article. He flourished at the courts of Henry IV. and Queen Isabella, and is usually considered to have been the author of the first act of "Celestina," the earliest Spanish drama. He also composed the "Dialogo Entre el Amor y un Viejo," one of the finest Spanish poems of the fifteenth century (often printed since 1511; in Medina del Campo, 1569).

From Cota's poems, preserved in manuscript in the National Library at Madrid, a scurrilous one on his Marano relation Diego Arias Davila—who had not invited him to the marriage of his son or nephew with a relation of Cardinal D. Pedro Gonzalez de Mendoza—has been printed ("Rev. Hispanique," I, 69 *et seq.*, Paris, 1894).

COTTBUS: Important manufacturing city of Prussia. It includes about 500 Jews in a total population of 40,000 inhabitants. Jews lived here during the fourteenth and fifteenth centuries, but were subsequently expelled. In the nineteenth century Jews resettled in Cottbus; and now (1902) have a synagogue, a B'nai B'rith lodge, a society for Jewish history and literature, a hebra kaddisha (organized 1875), a woman's society, and the Samson Armenkasse founded by Rabbi Leo Kamerase. Its first rabbi was Dr. Dienstfertig (d. 1895). The community is now under the direction of Rabbi Kamerase.

L. KA.

COTTON: This word does not occur in the A. V., but express mention is made of the material in Esth. i. 6, where it is stated that in the court of the king's palace-garden were "white, green, and blue hangings." The Hebrew word here translated "green" is "karpas" (Greek, *καρπάσινα*). It should probably be rendered "cotton" (so R. V., margin) or, more accurately, "cotton muslin." It is plainly a loan-word from the Persian "karpās" (fine linen), which itself goes back to the Sanskrit "karpāsa" (cotton). The English "cotton" is probably a loan-word from the Arabic "kutun," through the Spanish and French "coton."

It is quite evident that cotton grew and was used for clothing in very ancient times in India. Although the nature of cotton was plainly known as early as Herodotus (iii. 106), it was the eastern conquests of Alexander that first made the Greeks, and subsequently other Western nations, acquainted with cotton fabrics. The Latins were especially familiar with it (compare Strabo, 15, § 71; Lucan, iii. 209, etc.), although "carbasus" was also applied to fine linen and cambric (see Yates, "Texturum Antiquorum," i. 333 *et seq.*).

The cultivation of the cotton-plant (*Gossypium herbaceum*) spread from India throughout the entire East. It is now one of the most important staples of Palestine. The botanically allied cotton-shrub (*Gossypium arboreum*) probably originated in Egypt, more particularly in Abyssinia. It was formerly extensively cultivated in Lower Egypt, but was later driven out by the superior *Gossypium herbaceum*. This probably explains the fact that the Egyptians were not acquainted with cotton before the time of the Greek conquest in 333 B.C.

J. D. P.

COUCH: Structure on which to rest or sleep. The Hebrew term **מִטָּה**, meaning "divan" as well as "bed," is synonymous with **עֶרֶשׂ** (Amos iii. 12) and **מִשְׁכָּב** (II Sam. xvii. 28). In olden times the Jewish bed, a plain wooden frame with feet, and a slightly raised end for the head (Gen. xlvii. 31), probably differed little from the simple Egyptian bed. The frame, covered with **מַרְבְּרִים** (Prov. vii. 16), served as a bed for the old and sick during the day (Gen. xlvii. 31; I Sam. xix. 13 *et seq.*), while at meals people sat on it, perhaps with crossed legs (compare Ezek. xxiii. 41; I Sam. xx. 25).

Amos, who denounces the habit of reclining at table as a foreign custom (Amos iii. 12, vi. 4), speaks also of the luxury prevailing in the furnishing of

N. R. L.

Beginnings at Lublin Fair. during the great fairs, when considerable masses of people gathered in one place. The chief meeting-place was the fair at Lublin (לובלין), which city was the residence of the father of Polish rabbinism, Rabbi Sheknaḥ (d. 1558), among whose pupils was Moses Isserles. Here, even as early as the reign of Sigismund I., the rabbis used to assemble and try civil cases "in

W.

Hosted by Google

accordance with their own law." The king himself, in an edict of 1533, characterized one of their decisions in a private case as a decision of a supreme court for the Jews ("Russko-Yevreiski Archiv," i. No. 152).

The rabbis and kahal elders of the various districts of Poland and Lithuania (דייני הארץ; פּרנסֵי המדינה; Isserles, Responsa, Nos. 63, 64, 73, belonging to the period 1550-58) took part in the periodic sessions of the Lublin supreme court. It was here, too, that the rabbinical college investigated spiritual cases affecting all Polish Jews. Thus, for example, the rabbis and "rashe yeshivot" (rectors of Talmudic schools) of three countries (שְׁלֹש מדינות)—Poland, Russia, and Lithuania—sanctioned the printing at Lublin (1559-80) of the Babylonian Talmud, with the proviso that copies of the edition be used in all the schools. This approbation ("haskamah") is printed on the title-pages of the several treatises, for general information. Here already appears the classification of the members of the Lublin congress according to the localities, three in number—namely, Poland (Great and Little, together); Lithuania, which came into closer administrative connection with the crown lands of Poland after the Lublin union of 1569; and Polish Russia; *i.e.*, Podolia, Volhynia, and Galicia.

These "fair congresses" formed the nucleus of the great central institution, which was firmly established during the last quarter of the sixteenth century under the designation "Council of Lands" (ועד הארצות). The ever-widening autonomy of the Polish Jews rendered imperative the founding of an institution which might serve not only as the supreme court in judicial and spiritual cases, but also as a central deliberative and legislative body to regulate the activity of all local institutions. Owing to this necessity, the Lublin Fair congresses became regular periodic sittings of the assembly of delegates, or the general congress ("Congressus Judaicus," or "Seim" [Diet], in the Polish documents). The general designation, ועד הארצות, varies in accordance with the number of provincial delegations participating in a "wa'ad" (council).

The In the earlier acts there is often encountered the designation ועד שלש ארצות ("Council of Three Lands") alternating with the usual designation "Council of Four Lands." During the same period occurs (comparatively rarely) the designation ועד חמש ארצות ("Council of Five Lands"); *i.e.*, of Great Poland, Little Poland, Russia, Lithuania, and Volhynia (compare Liva ben Bezalel, "Netivot 'Olam," ch. ix., Prague, 1596, where a decision of the wa'ad of 1587 is quoted). Among the leaders of the "wa'ad" up to this time (*c.* 1590) was Mordecai Jaffe, rabbi of Grodno and Posen, author of the rabbinical code "Lebushim" (see "Zemah Dawid," chronicle of 1592).

In the course of time the designation ועד ארבע ארצות ("Council of Four Lands") supplanted the others entirely, as is shown by documents of the seventeenth century. The four lands that sent their representatives to the wa'ad were Great Poland (with its capital, Posen), Little Poland (Cracow), Polish or Red Russia (Podolia, and Galicia

with its capital, Lemberg), and Volhynia (capital, Ostrog or Kremenetz). Lithuania seemed to have its regular or extraordinary representative in the Polish-Jewish wa'ad until 1623, but in that year it established its own central organization (ועד מדינת ליטא), which acted independently (see LITHUANIA). In this crystallized state the Council of Four Lands is represented by writers of the middle of the seventeenth century, as, for example, Yom-Tob Lipman Heller (in his autobiography "Megillat Ebah," wherein he refers to the wa'ad of 1635) and the annalist Nathan Hannover ("Yawan Mezulah," Venice, 1653). The latter thus characterizes this institution (p. 12a):

"The representatives [פּרנסֵי] of the four lands had sessions twice in the year . . . at the fair in Lublin, between Purim and Passover, and at the fair in Yaroslav [Galicia] in the month of Ab or Elul. The representatives of the four lands resembled the Sanhedrin in the session chamber in the Temple of Jerusalem [לישכת הגזית]. They had jurisdiction over all the Jews of the kingdom of Poland, with power to issue injunctions and binding decisions [הקנות] and to impose penalties at their discretion. Every difficult case was submitted to them for trial. To make the task easier for themselves, the representatives of the four lands would select special judges from each land, who were called 'land-judges' [רִיבֵי מדינה], and who tried civil suits; while criminal cases, disputes over priority of possession [hazakah], and other difficult cases were tried by the representatives themselves [in full session]."

This testimony of a contemporary characterizes the flourishing period of the wa'ad's activity (*c.* 1600-1648). The record-books ("pinkeses"), wherein were written the decisions of this Jewish congress, have not been discovered, and it is doubtful whether they will ever be found; so far only seven separate sheets from the pinkes of the wa'ad in Yaroslav, of the years 1654 and 1671, have been unearthed, a facsimile of one of which accompanies this article. But in the extant manuscript pinkeses of individual kahal a great many copies of such decisions, relating to these kahal, have been preserved. Some, indeed, were published in old rabbinical works, responsa, etc., while others have been reproduced in recent times from manuscripts, in the monographs of historians of the Polish-Russian Jews. From this material, both manuscript and printed, it is possible to give a more detailed account of the organization and activity of the wa'ads.

Organization: At first the wa'ads met annually at Lublin during the great spring fair, which began on the Catholic holiday Gromnice (Candlemas Day), in February, and lasted about a month.

Place of Meeting. At the beginning of the seventeenth century another place of meeting was the Galician city of Yaroslav, where the chief fair took place toward the end of the summer. During the flourishing period of its activity the wa'ad's sessions occurred twice a year: before the Passover holiday, at Lublin, and before the autumn holidays, at Yaroslav. In exceptional cases, however, the sessions took place on other dates and (rarely) in other cities (Tishvitz, 1583; Lenczna, 1668, etc.). The fullest activity of the wa'ad was especially displayed after the catastrophe of 1648-55—the Cossack raid of CHMIELNICKI, followed by the secession of Little Russia, and the Swedish war—when the Jewish communal

organization, wrecked in many parts of Poland, needed restoration.

During the second half of the seventeenth century the sessions of the wa'ad occurred once or twice a year, and more frequently at Yaroslav than at Lublin. In 1671 the wa'ad decided to meet no longer in Yaroslav proper, on the ground that it was "a dangerous and pernicious place," but to assemble at a spot ten miles distant; subsequently this decision was rescinded. The number of delegates to the wa'ad can not be exactly ascertained. Nathan Hannover, in the above-mentioned chronicle (1653), maintains that one parnas, or representative to the wa'ad, was elected from each kahal, and that to these kahal delegates were added the six leading rabbis of Poland. It appears from the kahal pinakes that only the most important kahals of each region sent their delegates to the wa'ad. The capitals (Posen, Cracow, Lemberg, and Ostrog) of the "four lands" each sent two or even more. The signatures of fifteen to twenty-five delegates—though often the signatures of the six rabbis

Number of Delegates. only—are usually found attached to the extant decisions of the wa'ads.

The total number of delegates, together with the rabbis, evidently reached thirty.

In the eighteenth century the operations of the wa'ad became more and more limited; its sessions took place less regularly, often at long intervals, and mostly at Yaroslav. One of the last important congresses was that held at Yaroslav in the fall of 1753. Among other matters considered was the famous dispute between the rabbis Emden and Eybeschütz over the Shabbethaian movement, resulting in the latter's acquittal on the charge of heresy. In 1764 the Polish Diet ordered Jewish general congresses to be discontinued (Vol. Legum, vii. 50); and in this way the activity of the Council of Four Lands came to an end. The subsequent partition of Poland among Russia, Austria, and Prussia, changing, as it did, the whole kahal system, was unfavorable to the existence of such central autonomous bodies as the wa'ads.

Activity: During the two centuries of the existence of the wa'ad its activity may be divided into four branches: (1) legislative; (2) administrative; (3) judicial; and (4) spiritual and cultural.

The legislative activity of the wa'ad consisted in working out definite regulations and rules for various institutions which embodied Jewish self-government in Poland, as well as in issuing prescriptions extraordinary, called for by the exigencies of the moment. Such were the decisions of the Tishvitz wa'ad, 1583, enjoining the election of kahal elders and rabbis in the Jewish quarter only, without any interference from the local Christian authorities. The wa'ads of 1587, 1590, 1635, and 1640

Legislative Functions. solemnly interdicted the Jews from seeking rabbinical posts in communities by bribing kahals or by soliciting

the Polish authorities. The wa'ads of 1671, 1677, and other years prohibited the Jews from leasing estates or farming other revenues from Poles, without the knowledge of the kahals in which they were enrolled; and they also ordered merchants to trade honestly with the Christians and not to engage in un-

lawful practises, lest they incur the wrath of the populace and the government. Most striking is the edict of the wa'ad of 1607, containing a series of detailed rules regulating the economic and religious life of the Jews. These rules dealt with credit operations, methods of charging interest, and obligations under promissory notes, while special attention was paid to the prevention of abuses under these heads on the part of creditors. This regulation was drawn up at the instance of the wa'ad by one of its participants, the Lublin rabbi Joshua Falk Kohen, and was subsequently published in "Me'irat 'Enayim" (קונטרס העינים), Prague, 1606.

The administrative activity of the wa'ad was very closely linked, and often identified, with its legislative activity. The wa'ad took necessary steps to better the general condition of the Jews in Poland or to avert some common danger. It sent

Administrative Functions. its legal agents (שוחרינים) to Warsaw during the sessions of the Polish Seim, to represent Jewish interests before the government and the delegates.

Here, by means of entreaties, money, and presents, privileges for the Jews were obtained or legislative curtailments of their ancient rights and privileges were forestalled. For such emergencies the wa'ad had a separate fund made up of special dues from each of the "four lands." Its activity was especially important at the "Coronation Diets," when, in accordance with custom, every new king was expected to confirm the rights and privileges granted to the Jews by his predecessors. On such occasions the wa'ad's representatives were on the alert lest Jewish interests should sustain damage through the influence of the anti-Jewish party of the Diet.

Cases are on record when the wa'ad did not succeed in averting oppressive measures against the Jews; and then, where resistance might prove dangerous, the only course left to the wa'ad was to support with its authority the measures of the government. Thus, in 1580 the wa'ad solemnly confirmed the government's edict forbidding the Jews to engage in farming state taxes and customs duties in Great and Little Poland and Mazovia. The wa'ad's edict explains its prohibition by the fact that the Jewish revenue farmers and leaseholders, in their pursuit of gain, give rise to accusations against Jews in general, and excite against them the Christian populace. In this case the "Jewish parliament" was confronted with the canonical principle, which permeated Polish legislation, that Jews must not hold offices which would give them power over Christians. The constitution of the Polish Diet held at Piotrkow in 1538 reads: "Statuimus inviolabiliter observandum, Judæos teloneis quibuscunque præfici non debere, neque posse, indignum et juri divino contrarium censentes, ejus generis homines aliquibus honoribus et officiis inter Christianos fungi debere" (Vol. Legum, i. 525). The

wa'ad also saw to it that Jews should not settle in places interdicted to them.

Nature of Edicts. Thus, in 1669 the wa'ad confirmed the edict forbidding Jews to settle in Mazovia in the district of Warsaw. Such orders of the wa'ad were read publicly in all synagogues, with the addition of the threat of excommunication

("herem") for transgressors. A whole series of orders of the wa'ad urges the cessation of internal contentions in Jewish communities; strict obedience to kahal discipline; and the prosecution of those who, by their reprehensible occupations, bring upon Jews the wrath of the government and of the Christian populace.

Yet, while thus remaining strictly within the limits of the existing state laws, the wa'ad was untiring in its struggle against the violation of the legal rights of the Jews on the part of local administrative and judicial institutions. Against unlawful decisions it appealed to the higher resorts: the chief tribunal, the Diet, the highest dignitaries, and the king. But the greatest energy was displayed by the wa'ad in combating false accusations against the Jews, prompted by religious fanaticism and superstition, such as the heinous charges of using Christian blood, outraging church sacraments, etc. The wa'ad also took care that the state taxes on Jews did not increase unduly, and were correctly apportioned to the four districts of Poland proper, the detailed apportionment of taxes within each province and each community being the task of minor provincial congresses (ועדרי הנגל) and kahal boards.

The judicial functions which the wa'ad exercised were very comprehensive. The wa'ad court was chiefly engaged in settling disputes between neighboring kahalns concerning the boundaries of their administrative and fiscal districts. As each kahal district consisted of one city and the adjacent minor boroughs and villages, there often arose disputes between neighboring kahalns as to which was to have the jurisdiction in certain border boroughs and villages, and especially over newly settled villages. The state and communal taxes being heavy, the more extensive and thickly populated the territory

of a kahal was, the wealthier was it deemed to be; accordingly the contests over boundaries and parishes often reached quite a violent stage. The wa'ad had to try such inter-kahal suits, which often dragged on for decades. It was also the wa'ad's duty to delimit the local judicial circuits, to fix the grades of lower and higher rabbinical courts, and to assign the trial of a case to this or that court. In this respect the wa'ad in general, and its rabbinical board in particular, served as the highest court of appeal for all Polish Jews. The copies of the wa'ad's acts, preserved in the kahal pinkeses, consist mainly of such judicial decisions and prescriptions.

The spiritual and cultural activity of the wa'ad was centered on the task of strengthening Judaism and establishing a uniform internal discipline as a means for the national unification of the Jews. Shortly after its formation (1594), the wa'ad passed a rule that all Hebrew books printed in Poland should be published only with the permission of the rabbis, who were to furnish each book with their approbation. Certain important publications were approved by the rabbis at the sittings of the wa'ad. The wa'ad also issued rules and programs for schools ("hedarim" and "yeshivot").

With a view to bringing up the people in a moral, religious, and national spirit, the wa'ad published fairly strict regulations. In the Lublin constitution

of 1607, referred to above, the wa'ad prescribed, among other things, that the dietary laws concerning "kasher" and "terefah" should be strictly observed in all communities; that a Jew should

Cultural Activity. not drink wine in inns where Christians congregated, else he was to be stricken off the list of reputable mem-

bers of his community and was to be ineligible for office in the kahal; that Jewish costumes should differ in their cut from those of the Christians, and that modesty and moderation be observed in dress, especially by women, who are always eager for sumptuous apparel; that the chastity of women, especially those living among Christians in villages, be safeguarded, etc. In the first half of the eighteenth century the wa'ad was particularly energetic in counteracting the dangerous heresy of Shabbethai Zebi, which spread among the Polish Jews and gave origin to the sect of Frankists, whose members openly embraced the Catholic faith (1759), owing to persecutions on the part of their coreligionists.

While thus guarding strict rabbinism, the wa'ad was evidently preparing for the struggle with the newly born Hasidic movement; but at that moment it had to cease its activity owing to the above-mentioned edict of the Diet of 1764, which prohibited all manner of congresses of rabbis and kahal elders under penalty of a fine of six thousand grivnas. The fall of the wa'ad was the beginning of the general decadence of the kahal system in Poland during the partition period of that kingdom.

The acts and decisions of the wa'ad were usually written in rabbinic Hebrew; while acts of the proclamation type, designed to be read publicly in synagogues (כרומים), were written in Yiddish. Below are given specimens of two minor acts, one of each kind, in the respective originals. The first is a decree of the year 1678, admitting to the wa'ad one regular delegate from the kahal of the city of Tiktin or Tykotszyn (from an old manuscript pinkes of that city). The second is a portion

Specimens of En-actments. of the proclamation issued by the wa'ad at Yaroslav in 1671, on the necessity of stopping the quarrels that had arisen in the midst of the Jews of the Chelm district (from extant separate sheets of the wa'ad pinkes).

I.

We have this day granted the petition of the elders of the community of Tiktin, recorded on page for representation on the Council of the Four Lands. We have acceded to their request that they be allowed to have a representative from this time forward, in the manner set forth on page, and again in the page for to-day.

These are the words of the Council of the Four Lands this day, Wednesday, 4 Siwan, 5438, at Lublin.

II.

האלופים הקצינים והרוזנים מנהיגי הארצות יצו לאון מוריץ. מאחר דו זיך גיפונג האט דו אזו איין שערורי' און מחלוקת האט זיך דער וועקט אין גליל העלם דו כמעט דאש גליל ווער אויף גינאנגין און חלילה מוין גיוועזן מעמד ומצב הכלל שארית ישראל און איז פרקניש גיווארין כמה אלפים אזו האבן רוזני דאש יצו דאש זאך פ'ר זיך גינמגן און האבן גישטראפט דאש לייט דאש האבן אן גיהובן און דאש האבן איין חלק דראן גיהט וועלכ' דו מען גיט וויל פירט זיין מפני הכבוד. ומאחר דו זיך זילכי זכין דרוועקן אין קהלות דו לייט מכן קנוניות וקשרים בעניה די'ניש זיין דרהורט גיווארין און זיין עובר אויף חרמות קרמונים און זיין מחריב דאש קהלות, און איכר זילכי מעשים קאן מען גיט יוצא זיין ידי חובות כרנא דמלכא און קהלות וגלילות שולדיגין זיך דריכר בייא פריצים און גלחת וואש אייטל סכנת נפשות איז. . . . אזו גיבן ראשי רוזני קציני מנהיגי דאש יצו רשות ומקל ורצועה לראשי הגלילות ולראשי הקהלות דו זיא זאלין רודף זיין זילכי לייט און שטראפן מיט חרפות (חרמות) און קנסות והפיסות אפילו בריני גוים און אל דאש הוצאות זאלין זיין מכיס קישרי קשרים. . . . און די זעלביגן לייט זאלין כל ימיהם קיין החמנה האבן אין אירי קהלה או גליל און קיין חוקה. . . . מאחר דו זי גיט האבן רחמנה אויף זיך זעלבשט און איכר דער קהלה אדר גליל און אויף דעם כלל. . . . און זיא גידענקן גיט דו מיר זיין שפל און מאוס וביאוס בעיני האומות. מכין זילכי לייט נאך גאר דו מיר בעי' זיין שפל ונבוה. אזידוע איז דו שריס רבים רידן פון זילכי זכין. . . . ע"כ זאל אישלכר משים על לב זיין גיט צו גיין אין זילכי דרכים רעים וילכו בדרך טובים. און דער כרוז איז איין גישיבן גיווארין בפנקס דאש יצו בחוקה פסיד גמור.

[TRANSLATION.]

II.

The Council of the Four Lands report that a violent quarrel having arisen which almost ruined the whole district and—which God forbid!—might have harmed the remnant of Israel and involved the loss of thousands, the Council of the Four Lands took upon themselves the task of punishing those who initiated the quarrel or subsequently participated in it, whose names, out of respect for their position, are withheld.

And since, when similar events occur in communities, and persons intrigue and violate the ancient ordinances, and ruin the communities, reports of these things arouse the government, and communities and districts are considered guilty by the nobles and priests, and there is real danger to life, . . . the Council of the Four Lands hereby fully authorize the leaders of communities and districts to prosecute persons so intriguing and offending, and to punish them with the ban, with fines, or with imprisonment . . . at the cost of the offenders. . . . Such persons should never be nominated to any office in any community or district, nor should they have the right of *hazakah*, . . . since they have no pity on themselves, on the community or district, or on the whole of Israel. . . . They ignore the fact that we are already humiliated and abject in the eyes of the Christians—so much so that the authorities speak contemptuously of us—and make us still more so. . . . Let every one, therefore, take care to avoid such wrong courses and to walk circumspectly. This notice has been inscribed in the pinkes of the Four Lands.

The second specimen here given is an authentic reproduction of a sheet of the pinkes of the Council of Four Lands. The original document contains the decision (mentioned above) of the council at Yaroslav, Sept., 1671, to the effect that thereafter the sessions be held, not in Yaroslav proper, which repeatedly proved "a dangerous and pernicious place," but ten miles away, the final decision as to the location of future congresses being postponed till the ensuing Gromnice (Candlemas) congress; *i.e.*, the spring fair at Lublin. Then follow fourteen signatures of delegates to the wa'ad, from Cracow, Posen, Lemberg, Lublin, Ladmir, Przemysl, etc. The authenticity of the signatures is made clear by the dissimilarity in the handwriting, which proves the document to be original and not a copy. It is taken from the few extant sheets of an old pinkes of the wa'ad of the "four lands," which sheets were found in the city of Dubno, and are now in the possession of S. M. Dubnow of Odessa.

BIBLIOGRAPHY: Manuscript Sources: fragments of an original pinkes of the Council of Four Lands (seven sheets), containing acts of 1654-71; decisions of the wa'ad, copied in the kahal pinkes of the city of Tykotszyn (28 documents of 1621-1700); the pinkes of the kahal-rabbinical congresses in Lithuania during the years 1623-1761, and various other pinkes preserved in the archives of societies and private persons. S. M. D.

COUNCIL OF JEWISH WOMEN: An organization which came into being as a result of the CONGRESS OF JEWISH WOMEN, one of the denominational congresses of the World's Parliament of Religions held at the Columbian Exposition in Chicago in 1893. It was organized in response to the appeal of Sadie American, and in pursuance of the following resolution offered by her at the final session of the congress:

"Resolved, That we, Jewish women, sincerely believing that a closer fellowship will be encouraged, a closer unity of thought, sympathy, and purpose, and a nobler accomplishment will result, from a wide-spread organization, do therefore band ourselves together in a union of workers to further the best and highest interests of Judaism and humanity, and do call ourselves the 'National Council of Jewish Women,' whose work shall be:

"(1) To seek to unite in a closer relation women interested in the work of religion, philanthropy, and education, and to consider practical means of solving problems in these fields.

"(2) To organize and encourage the study of the underlying principles of Judaism, the history, literature, and customs of the Jews, and their bearings on our own and the world's history.

"(3) To apply knowledge gained in the study and improvement of the Sabbath-school and in the work of social reform.

"(4) To secure the interest and aid of influential persons in arousing general sentiment against religious persecution, whenever, wherever, and against whomsoever shown, and in finding means to prevent such persecution."

Hannah G. Solomon and Sadie American, respectively chairman and secretary of the congress, were elected president and secretary of the council, and have continued to hold these offices. In Jan., 1894, a circular was issued, setting forth the need, desirability, and objects of the National Council of Jewish Women, together with a provisional constitution, which called for a delegate convention to be held in 1896, when a permanent constitution would be adopted. This meeting took place in New York city in Nov., 1896, by which time 50 sections had been organized; it was attended by 83 delegates and alternates from 31 sections. The word "National," which, as originally employed in the name of the organization, referred only to the United States, was dropped on account of the entrance of two sections formed in Canada; and the title became "The Council of Jewish Women."

The objects of the council, as defined in the constitution finally adopted, are: "To further united efforts in behalf of Judaism by supplying means of study; by an organic union to bring about closer relations among Jewish women; to furnish a medium

PAGE FROM THE PINKES (MINUTE-BOOK) OF THE COUNCIL OF FOUR LANDS, WITH SIGNATURES OF DELEGATES
(Through the courtesy of S. M. DUBNOW of Odessa.)

for interchange of thought and a means of communication and of prosecuting work of common interest; to further united efforts in the work of social betterment through religion, philanthropy, and education."

The constitution provides for a continuous board of directors, who, with the general officers, form the executive committee, which has full charge of the affairs of the organization, and for five committees—to wit: on religion, religious school work, philanthropy, reciprocity, and junior sections—who respectively arrange the plan of work. There is no individual membership in the council, but membership through its branches, which are called "sections," and are organized (one only in each city) on the plan of the general society. Meetings with two delegates from each section are held triennially, and executive sessions annually. Junior sections have been formed with a membership of both sexes, between the ages of fifteen and twenty-one; these are under the guidance of the senior section in so far as three members of the latter sit on the executive committee.

The council "seeks to give its utterances no color of orthodoxy or reform." It is not propagandist, and stands for no particular phase of Judaism. Recognizing the existence of differences of belief and observance, and "seeking only to square conviction and conduct," but leaving each free to follow her own bent, it has united the Jewish women in a strong and unique organization. The council carries out its objects in meetings, conferences, study circles, lectures by specialists, and its various philanthropies, which can, perhaps, be measured and numbered; its significant and important results, however, can be neither measured nor stated in exact terms.

Born of the two tendencies of the time—the growing self-consciousness of the Jew and the tendency of women to unite in associations for self-development and preparation for the new responsibilities which modern life is thrusting on them—the council is becoming the center of religious and intellectual activity of the Jewish women, and the means of throwing them into the active life and work of the community at large. It is the policy of the council to cooperate and affiliate with the organized forces at work for progress and social betterment, both Jewish and non-Jewish. It is a member of the National Council of Women of the United States, and of the International Council of Women of the World. The visit of Sadie American, as delegate to the quinquennial of the International Council of Women, held in London in June, 1899, resulted, through a presentation of the work before a representative body of London Jews and Jewesses, in the formation of the Jewish Study Society of England, which is organized on the plan of the council; and between this society and the council there is close affiliation, as well as an exchange of pamphlets, plans of work, etc.

The sections are members of the city, county, and state federations of women's clubs, and are actively cooperative in all work for the public welfare. During the Spanish-American war the council within one week set its sections to work in aid of the soldiers and sailors, and in several places was the first organized body to take any steps for their relief.

It raised ten thousand dollars in money, an equal amount in goods, and a nurse was sent to the army; the members were, during the continuance of the war, among the most active workers in the service of relief. It cooperated with the National Red Cross Society, the regimental auxiliaries, and the various state organizations. Through the influence of the council, 72 women have been placed on Sabbath-school boards of congregations; interest in the schools has been greatly increased thereby, and, what is of signal importance, the age of confirmation, in a number of communities, has been raised. It maintains fifteen mission schools.

The philanthropies of the council, numbering 85, are supported by voluntary subscription, and include settlements, clubs, libraries, free baths, night-schools, manual-training classes, household-schools, employment bureaus, penny provident funds, classes for crippled children, ice funds for consumptives, recreation-rooms, and gymnasiums. The following meetings have been held: first triennial, New York, Nov., 1896; Omaha Exposition, Oct., 1896; Chautauqua summer assembly, July, 1897, 1898; second triennial, Cleveland, March, 1900; first annual executive, New Orleans, La., Feb., 1901; third triennial, Baltimore, Md., Dec., 1902. The present officers, elected in 1900, are: president, Hannah G. Solomon; first vice-president (resigned); second vice-president, Babette Mandel, Chicago, Ill.; recording secretary, Gertrude Berg, Philadelphia, Pa.; corresponding secretary, Sadie American, New York city; treasurer, Bertha A. Selz, Chicago, Ill. It has (Nov., 1902) 7,000 members, in 70 sections; 15 junior sections, with 500 members; 89 study circles in religion, and 12 in philanthropy.

COURAGE: That quality which enables one to encounter danger and difficulties with firmness, calmness, and intrepidity; Hebrew, חֹזֶק וְנִתְחַזֵּק ("Be of good courage," II Sam. x. 12), or חֹזֶק וְאִמְּךָ ("Be strong and of a good courage," Deut. xxxi. 7, 23; Joshua i. 6).

Physical courage, the result of man's struggle against conditions that threaten his very existence, and which often develops boldness, fearlessness, and an utter disregard of physical pain, is extolled by the Hebrews as a valued possession (compare Judges viii. 21; Eccl. x. 17; I Kings xvi. 27; II Kings xviii. 20; Micah iii. 8). Often the victor was made a popular idol. "Saul has slain his thousands, and David his ten thousands" (I Sam. xviii. 7), the women of Israel sang when David returned from a campaign against the Philistines. The angel of the Lord says to Gideon: "The Lord is with thee, thou mighty man of valor" (Judges vi. 12).

The examples of courage found mentioned in the records of ancient Israel are numerous. The undaunted valor of Barak, of Gideon, and of Jephthah; the fearlessness of Samson, of Saul, and of David, are eloquent testimonies of physical courage. But the Bible sets more value upon moral courage, which is so prominent in the life-history of

the Jew, and which goes far to explain the power of resistance that he has shown at all times against those who made plans for his destruction.

Biblical Examples of Courage. This courage is fostered by confidence and trust in God. "Hope in the Lord, be strong, keep thy heart steadfast, yea, hope thou in the Lord" (Ps. xxvii. 14, Hebr.); "But they that wait upon the Lord shall renew their strength" (Isa. xl. 31); "Through God we shall do valiantly" (Ps. lx. 14; compare Num. xxiv. 18; Ps. xxxi. 25; Prov. iii. 23-26); "Fear thou not; for I am with thee. . . . I will strengthen thee" (Isa. xli. 10); "Yet now be strong O Zerubbabel . . . and be strong, O Joshua . . . and be strong, all ye people . . . for I am with you, saith the Lord of hosts" (Hag. ii. 4; compare Zech. viii. 9, "Let your hands be strong, ye that hear").

In post-Biblical times the Jew displayed both physical and moral courage while standing for truth and right against a hostile world. He would face the obloquy of centuries to support a principle which, though unpopular, he believed to be true. "Strive for the truth unto death; and the Lord shall fight for thee" (Ecclus. [Sirach] iv. 28; compare *ib.* iv. 9, ii. 12; Baruch iii. 14).

In Post-Biblical Times. "In a place where there are no men, endeavor thou to be a man" (Ab. ii. 6b). Crushed to earth, defeated, driven from his native soil, pining in dungeons, made to furnish murderous sport for the wild beasts of the Colosseum and food for the flames of pyres and stakes, he still refused to surrender; struggling against terrible odds for national and political independence, for liberty of conscience, and for the rights of man.

Nothing stirred the Jew to resistance so much as interference with his religious belief and practises; for the abandonment of the Law was deemed the most heinous of crimes. Men had fought at all times for house and hearth; but to fight for one's religion was new. The plan of Antiochus Epiphanes to uproot the religion of Judea met with stubborn resistance. "God forbid," says Mattathias, the aged priest of Modin, "that we should forsake the law and the ordinances. We will not harken to the king's word to go from our religion, either on the right hand or the left" (I Macc. ii. 21, 22). Eleazar, one of the scribes, chose rather to die the glorious death of a martyr than to be faithless to his religion. "But when he [Eleazar] was ready to die . . . he groaned, and said, It is manifest unto the Lord . . . that . . . whereas I might have been delivered from death, I now endure sore pains in body . . . but in soul am well content to suffer. . . . And thus this man died, leaving his death for an example of a noble courage . . ."

The Martyrs. (II Macc. vi. 30, 31). Seven brothers, who were seized by the minions of Antiochus and scourged, to compel them publicly to abjure their faith by eating forbidden food, refuse to do so, and suffer the penalty of most cruel deaths. One of them voices the sentiment of all when he exclaims, "We are ready to die rather than to transgress the laws of our fathers" (*ib.* vii. 2; compare *ib.* xiv. 18). Though the seven were tortured in the presence of their mother, the awful

sight did not weaken her resolution to endure a similar fate. "But the mother was marvelous above all, and worth of honorable memory: for when she saw her seven sons slain within the space of one day, she bore it with a good courage, because of the hope she had in the Lord" (*ib.* vii. 20). Even the king, and those who were with him to witness the torture of the seven brothers, marveled at their remarkable courage (*ib.* vii. 12; IV Macc. viii. 9).

Later, in the desperate life-struggle of the Jews against the trained legions of mighty Rome, which ended in the overthrow of the Jewish state and the loss of Jewish independence (70 c.e.), the heroism and self-sacrifice of the Jews were such as to elicit the admiration of all time. Josephus extols the courage of his fellow believers in facing death for the sake of the Law. "I do not mean such an easy death as happens in battles, but that which comes with bodily torments and seems to be the severest kind of death" ("Contra Ap." ii. 33).

Later, under Hadrian (117-138), the Jews were goaded by edicts of violence and oppression into open revolt. With a desperate but ill-fated heroism the Jews under BAR KOKBA made a last effort to regain their freedom. Rabbi AKIBA, one of the ten martyrs, on the pyre praised his fate that it was now his good fortune to fulfil the Law: "Thou shalt love the Lord with all thy soul" (Deut. vi. 5); explaining that "with all thy soul" means "even by giving up one's life" (Ber. 61b).

Especially rich in deeds of martyrdom is the history of the Jews during the Middle Ages. Hated and despised, pelted and jeered at, burned and tortured, they nevertheless remained true to their ancestral faith. Moral cowardice was unknown to the Jew of the Middle Ages. During the reign of Richard I. Cœur de Lion the Jews of York were persecuted by their Christian townsmen, who were incited to rapine and robbery by the Crusaders. The Jews sought shelter in the castle, where they were besieged for several days. Spurning the thought of embracing Christianity in order to be free, the men, after slaying their wives and children to prevent them from falling into the hands of their enemies, killed themselves (1190). The expulsion of the Jews from Spain (1492) furnishes a most glorious lesson of moral heroism among the Jews. Those who had risen to opulence and to positions of honor and trust in Spain willingly gave up all they had achieved rather than go to the baptismal font. The heroic efforts on the part of Gabriel Riesser and others (1815) in behalf of the emancipation of the Jews in Prussia; Johann Jacoby's protest against the edict of Frederick William III. curtailing certain privileges of the Jews; and the heroism of the Reform pioneers, one of whom, Abraham Kohn, rabbi of Hohenems, was poisoned (1848) because of his advocacy of reforms within Judaism, give sufficient proof of the moral courage of the Jews in modern times. The persecutions within the last twenty years of Hebrews in Russia and Rumania have given rise to many exhibitions of courage in the Jew, who has left the land that cradled him and has become a friendless wanderer rather than forsake what he believes to be the highest truth. The

heroism of DREYFUS, the French captain, has thrilled the whole civilized world.

K.

A. G.

COURLAND: A government in the Baltic provinces of Russia, bounded on the west and north by the Baltic Sea; on the northeast by the River Dūna; and on the south by the government of Kovno. At the end of the eighteenth century the Jewish population was 9,000; in 1835, 23,030; in 1850, 22,743; in 1858, 25,641; in 1891, 42,776; and in 1897, 49,102 in a total population of 672,634 = 7.3 per cent. The Jews are distributed among the cities and towns of Courland as follows: Bausk, 3,000; Friedrichstadt, 3,800; Goldingen, 3,000; Grobin, 450; Hasenpot, 1,600; Jacobstadt, 2,400; Libau, 10,860; Mitau, 5,000; Pilten, 800; Talsen, 1,500; Tuckum, 2,500; Windau, 1,350; Griva-Semgallen, 3,240; Il-luxt, 812; Polangen, 900; Sasmaken, 1,600; Frauenburg, 1,048; Zabeln, 830; and in the villages Kandau, Neu-Subbat, Schönberg, etc., 5,242.

In the thirteenth century Courland was an independent territory, consisting of the two duchies of Courland and Semgall and of the bish-

Early History. oprie of Pilten, and was under the domination of the Livonian Order of the Knights of the Sword. The Liv-

nian Knights offered little encouragement to the settlement of Jews in Courland, as is shown by the following extract from a decree of their grand master Zeyfridt (Siegfried) von Feuchtwangen (1309): "For the glory of God and the honor of the Virgin Mary, whose servants we are, we decree . . . that no Jew, necromancer, magician, or waydeler [pagan priest] shall live in this country; and that any one sheltering one of such shall suffer with him . . ." (Jolowicz, "Gesch. der Juden in Königsberg i. Pr." 1867, p. 1).

Notwithstanding this decree, the Jews toward the end of the fourteenth century found their way into the country from Lithuania, as is intimated in the chronicles (Hennenberg, cited by Jolowicz, *l.c.* p. 2). At that time Vitold, Grand Duke of Lithuania, had already granted to the Jews of the neighboring Lithuanian towns the privileges of June 24 and July 2, 1388. Two gravestones were excavated in the vicinity of Mitau in 1857 which, it has been claimed, go to show that Jews had lived in that country even earlier than 1388; but the claim is hardly well founded, as there is a possibility that Firkovitch, who was consulted in the matter, was guilty of deception (see Wunderbar, in "Allg. Zeit. des Jud." 1857, No. 1).

When Courland came into the possession of Poland, according to the treaty between the last grand master of the Order, Gottbard Kettler,

Under Polish Rule. and King Sigismund Augustus (Sept., 1561), it was stipulated that no Jews should be permitted to engage in commerce or to lease customs duties or

taxes in Livonia ("Pacta Subjectionis," in "Codex Diplomat. Regni Polon." V. cxxxviii. 238; Moraczewski, "Dzieje Rzeczypospolitej Polskiej," iv. 231). The treaty of 1561 did not, however, forbid the Jews to settle in Courland or to sojourn there temporarily for any particular commercial transaction. It was without any effect whatever in the

bishopric of Pilten, where the Jews had not only been tolerated from the earliest time of the Order, but were permitted by law to organize communities and to engage in trade and commerce.

The district of Pilten contained the present districts of Grobin, Hasenpot, and a part of Windau.

The last Bishop of Courland, Johann

Pilten. von Münchhausen, who owned the bishopric of Pilten by inheritance, induced rich Jews to settle in his territory, and he derived "considerable income by taxing them for the right of residence and the privilege of engaging in trade."

As early as 1570 the Jews of Pilten enjoyed the rights of citizenship, and many of them owned real estate (Wunderbar, *l.c.* p. 17). When, in 1611, Pilten became part of Poland the position of the Jews became still stronger. As throughout Poland, the Jews of that district not only enjoyed all civil and religious rights, but also were made citizens of Hasenpot—a rare privilege at that time for Jews. Of the history of the Jews in this district during the seventeenth century there is but scanty information. The archives of Pilten have not yet been published, and the only complete history of the city of Hasenpot, written by Huhn, lies hidden in manuscript in the Rittenbibliothek at Riga. It is known, however, that during the great northern war (1718) a synagogue existed in Pilten (Manteuffel, "Piltyni Archivum Piltynskie," in "Warszawska Biblioteka," No. 2, p. 177; cited by Brutzkus, in "Voskhod," 1896, Nos. 7-8, p. 26). During the eighteenth century Pilten lost its importance.

The greatest number of Courland Jews lived in Hasenpot, where they carried on a considerable export trade; but at the last division of Poland, toward the end of the eighteenth century, only 896 males among the Jewish inhabitants were registered as citizens. They enjoyed all civil rights, and were often chosen to fill honorable positions. Thus in 1797 the Jew Euchel of Hasenpot was elected councilman ("Rathsherr"). Jewish affairs were governed by a *kahal*; and the Jews paid a special tax on their synagogue, which tax was called "Jüdische Capellengelder."

The oldest community in the district of Pilten is that of Polangen, which formerly belonged to the grand duchy of Lithuania. In the

Hasenpot and Polangen. "pinkes" (record of the Jewish community) of that town, begun in 1831,

there is an entry on the first page which states that, according to the preceding pinkes, which had been destroyed by fire during the Polish Revolution, the cemetery and the burial brotherhood of Polangen were established in 1487 (רמ"ז), though doubts have been expressed as to the correctness of this date. The Jewish community of Polangen obtained a charter confirming that of King Stanislaus IV. (dated 1639), granting the Jews of Polangen and Gorzhd the rights of citizenship and the privilege of engaging in commerce, handicrafts, and agriculture. The Jewish houses of prayer and the cemetery were exempted from all taxes. The Jews were under the jurisdiction of the royal aldermen, with the right of appeal to the supreme court and to the king. This privilege was

subsequently confirmed by Augustus III. (1742), and remained in effect until the annexation of Courland by Russia (1795), when the whole district of Zhmuda, in which Polangen was situated, was added to the government of Courland (Brutzkus, *l.c.* p. 29).

In the other parts of Courland, including Semgall, the condition of the Jews was not so favorable. Notwithstanding the fact that the Duke of Courland was a vassal of Poland, and was not able to prevent entirely the influential Polish Jews from visiting his dependency, their sojourn there was made unpleasant and difficult at all times, especially after 1561. The cities jealously guarded their privileges not only from the Jews, but from all foreigners. Nevertheless, Jews managed to settle in Courland both before and after the subjection of the country by Poland, as is evident from some well-preserved gravestones with Hebrew inscriptions at Mitau and other places, dating from the first and last decades of the sixteenth century.

During the uprising of the Cossacks in 1648-54 the people of Courland also expelled the Jews from their country. The barons Hector Frederick and Reinhold von der Osten-Sacken, when they founded on their estate the town of Neu-Subbat, inserted a paragraph in its constitution (April 5, 1686) forbidding Jews to live in the town or to establish a tavern there.

According to Ziegenhorn, no Jews lived in Courland, except at Pilten, from its subjugation by Poland up to about 1670 ("Staatsrecht," § 576). Toward the end of the seventeenth century Jews again began to settle in Courland: they even leased the customs duties and engaged in commerce. Although these privileges were soon curtailed ("Land-täglicher Abschied," 1692, § 6; 1699, § 29), the Jews were permitted to live both in the towns and in the country, and to do business as retail traders, innkeepers, distillers, and middlemen. In Mitau, the capital of Courland, they could live only in the so-called Jewish street (now known as "Doblen'sche Strasse") as protected Jews ("Schutzjuden"). On the remonstrance of the burgesses, the dukes repeatedly ordered the Jews to leave the country; but the nobility, to whom they made themselves useful, protected them until Duke Ferdinand published an edict, March 23, 1714, in which the Jews were ordered to leave the country within six weeks, under pain of the severest penalties. This edict was evidently not carried out, for on Sept. 20, 1760, Duke Karl repeated it in the same form. Soon afterward the magistrate, notwithstanding the duke's edict, permitted Jews as well as Jesuits to reside in Courland on the payment of 400 Albertus thaler annually; and the duke did not object to their admission (Gebhardi, "Gesch. von Kurland," p. 166, Halle, 1789). In 1737 Duke Ernst Biron entrusted the court Jew Lipman (Levi) with the management of his finances, dividing the profits with him, and granting him certain privileges. This naturally created ill feeling against the Jews (Ersch and Gruber, "Encyc." section i. part 10, p. 247).

At this period Jewish communities existed in MITAU, BAUSK, JACOBSTADT, FRIEDRICHSTADT, and other

towns. Friedrichstadt was a station for the Jewish merchants of White Russia, who came down the Dūna annually in barges and on rafts, bringing lumber, grain, flax, and other Russian merchandise to Riga. The edict of Empress Elizabeth (1742) expelling the Jews from Russia interfered considerably with this business. The council of Riga, fearing that the Jewish merchants might direct their trade to Windau, Libau, and Königsberg, petitioned the Senate in the matter, and, pending the resolution of the Senate, the vice-governor of Livonia stopped the Jewish traders in Friedrichstadt.

In 1760 the Jews of Courland, as already stated, were again expelled from the duchy. In order to prevent evasions on the part of the Jews, an order was issued that all foreign Jews having permission to bring Polish-Lithuanian merchandise to Mitau should present themselves to the mayor and obtain from him a special permit to remain in the city for the transaction of business, and that none should be permitted under any circumstances to stay longer than a day or two on any one occasion. Those who brought no merchandise had to pay a "sechser" on each visit. These Jews had to stay at a special lodging-house designated by the city authorities. In some places the execution of the order had already been carried out when, fortunately for the Jews, the emperor Peter III. of Russia recalled from banishment Duke Ernst Biron, and with his reinstatement the Jews regained their old liberties and even secured some new privileges. These liberties and privileges were not, however, legally recognized, as is seen from petitions of the Jews made to Duke Ernst Biron in 1765, and to his son and successor, Peter Biron, in 1775.

In 1770 the Russian government interfered in the solution of the Jewish question in Courland. Governor-General Browne of Livonia asked the Duke of Courland to expel the Jews from his possessions (Orshanski, "Russkoe Zakonodatelstvo o Yevreyakh," p. 374, St. Petersburg, 1877); but the plan could not be carried out on account of the opposition of the Courland nobility. Empress Catherine II., desiring to settle "New Russia," gave a secret order to Governor Browne (1765) to issue passports to Jewish inhabitants of Mitau who would travel to this territory, her purpose being to admit some of the Jews of Courland to settle in Riga and St. Petersburg (Buchholtz, pp. 57-60). By a later order (1785) Catherine again showed her favor to the Courland Jews by detaching the village of Schlock from Courland and annexing it to Riga, thus permitting the Jewish residents of Schlock to become recognized inhabitants of Riga (Wunderbar, *l.c.* p. 9).

Concerning the origin of the Jews of Courland opinions differ. Some think that the majority arrived by sea from Prussia and North Germany; and the biographies of rabbis and other prominent men enumerated below show that most of these were born abroad. Nevertheless, Brutzkus may be right in his statement that the greater part of the Courland Jews immigrated from the neighboring countries of Lithuania and Poland.

In spite of occasional disturbances, the life of the Jews in the duchy of Courland was a peaceful one, and they were permitted to trade outside the city

limits of Mitau, the capital. Even in the center of the city a Jew, Meyer Kreslawe, received a license to open an inn, which was called "Hotel de Jerusalem" (the house still existed in the middle of the nineteenth century); and **Kalman Borkum**. in 1784 Kalman Borkum laid the foundation-stone of a synagogue, which was built at his expense. Borkum, his brother Samson, and the court jeweler Rabbi Bär ben ha-Kadosh Rabbi Benjamin stood high in favor with the duke Biron. They were thus often enabled to afford protection to their coreligionists in Courland, and to those in Mitau in particular; and in addition extended them much financial and other assistance.

The year 1787 was especially marked by discussions of the Jewish question in Courland, not only officially but also in various pamphlets devoted to the subject. Of these latter the first appeared anonymously and without date under the title "Die Duldung der Juden," etc. (The Toleration of the Jews in the Duchies of Courland and Semgall), but Witte von Wittenheim, counselor of justice, was later identified as its author (Recke and Napierski, "Schriftsteller Lexikon," iv. 554). He advocated the opinion that the Jews should be tolerated under conditions conducive to the welfare of the country and of the respective towns in which they might settle. He further recommended that they be allowed to have their own schools, houses of prayer, synagogues, cemeteries, and courts for the settlement of internal disputes, and expected an improvement in their religious and judicial affairs to be manifest before another generation should have passed. In case the Jews should not be able to maintain their own schools, they should be permitted to send their children to the Christian schools, where they might acquire a knowledge of German and other necessary subjects. The higher schools should also be open to them. Wittenheim was in favor of limiting the occupations of the Jews; he would permit them to engage only in handicrafts, petty trading, and distilling, which were the main occupations of the Jews of Courland at that time.

Another pamphlet appeared the same year under the title "Bemerkungen über die Duldung der Juden" (Mitau, 1787). The author, supposed to be Christian David Braun (Recke and Napierski, "Schriftsteller-Lexikon"), was very much opposed to the idea of giving the Jews, "the despisers of the Christian religion," any social or political rights. This pamphlet called forth a reply under the title "Beantwortung der Bemerkungen über die Duldung der Juden," refuting the statements of Braun. The author was Dr. Lachman, a Jewish physician born in Prussia, who practised medicine in Bausk, and later removed to the interior of Russia. He showed that the Jews were useful citizens, occupying themselves with agriculture in Lithuania, and engaging in the arts and sciences, and in handicrafts wherever they were not hampered in their activity by the gilds.

About this time there appeared, under the title "Meine Gedanken, bei der Frage: Ob Man in Unserm Vaterlande Juden Dulden Solle, oder Nicht?" a most touching apology for the Jews. The author, Georg Gottfried Mylich, a Lutheran pastor at Nerft,

looks at his subject not only from a utilitarian standpoint, but also from an ethical point of view. "Our honor and our Christian duty demand," he says, "that we should not look with indifference on the deplorable condition of the Jews of Courland and that we should no longer tolerate it. As patriots we must concentrate all our energy on the improvement of the present state of affairs. Indeed, the word 'Jew' should not indicate any class of people different from us, but only a different religious body; and as regards their nationality, it should not hinder them from obtaining citizens' rights and liberties any more than the people of Sleswick, the Saxons, Danes, Swedes, Swiss, French, or Italians who also live among us." On the other hand, the author appeals earnestly to the Jews to lay aside their specific costume and to follow the example of their more enlightened brethren.

These extracts indicate the attitude of the educated classes of Courland toward the Jews. The influence of the activity of Lessing, Mendelssohn, and Dohm had already reached the duchy. Though the broad-minded people in Courland were in a great minority, they nevertheless forced the lords and burgesses to discard their medieval intolerant views. After many long debates in the various Diets concerning the emancipation of the Jews of Courland, the Jews of Mitau through their aldermen, Aaron Lipman (Levi) and Isaac Moses Eides, presented a memorial to the duke March 13, 1793, in reply to which they were directed to submit propositions on the subject.

Accordingly on Jan. 20, 1795, propositions were presented in which they asked only: (1) Admission to the towns, villages, and estates in proportion to the number of inhabitants and industries, so that the Jewish families should not become a burden on the general population. (2) Reduction of the number of Jewish families in Mitau from 200 to 60, to be selected from among those whose ancestors had lived in Mitau, and who were known to be persons of irreproachable character; they would certainly become more useful citizens on obtaining equal rights with the other inhabitants. (3) The right of the community to settle all disputes concerning religion and unimportant civil matters among the Jews without recourse to the general courts—a right similar to that enjoyed by the *kahal* of Hasenpot; the *kahal*, however, to have the authority to appeal to the magistrates whenever necessary. (4) Permission for Jewish children to attend the public schools and the local academy.

In this memorial the Jews of Courland for the first time called themselves "Hebrews," by which name they have been designated up to the present day in the official documents of Russia and the Baltic provinces. The memorial was signed on behalf of the community by Isaac Judah, Solomon Borkum, Isaac Moses Eides, Isaac Moses, Wulf Jacob, Elijah Isaac, Lewin Wulf, Heimann Solomon, Aaron Lipman (Levi), and others.

While the duke and the Landtag were still discussing the Jewish question, the Polish Revolution broke out, so that nothing further could be done in the matter. Such was the uncertain legal position in which the Jews found themselves when Courland

was annexed to Russia, March 16, 1797. Emperor Paul, during his visit to Mitau in the same year, received a deputation from the Jewish community. The government ordered an investigation of the occupations of the Jews, of the taxes paid by them, and of their legal status. The Courland authorities replied that the Jews had "never been legally tolerated—with the exception of those who live in the district of Pilten." In presenting the case to the emperor Paul, the Senate declared:

"Although the Courland administration reports that the Jews have never been tolerated legally, yet, since Jews have lived there for more than 200 years, they can not be considered as having entered the country surreptitiously; nor ought they to be deprived of such an old home while Jews are not prohibited from living in other parts of Russia." The Senate therefore ordered the Courland authorities, having in view the local conditions, to present a scheme of legislation for the further residence of Jews in Courland, "for the general welfare as well as for their own." At the same time the Jews addressed a petition to the senate in which they asked: (1) That they be permitted to organize *kahals* for the maintenance of Jewish communal life. (2) That Jews who join the guilds be granted all the rights of such guilds. (3) That agriculturists receive land at an annual rental, and be not claimed by any one as serfs. (4) That Jews be permitted to build synagogues; to conduct their religious services in the towns as well as in the villages; and to have their cemeteries and slaughter-houses. (5) That wherever there are no Jewish schools, permission be accorded the Jews to send their children to the German schools; and that the talented Jewish pupils be allowed to attend foreign academies and universities.

After considering this petition the Russian government resolved that the Jews be permitted to live in Courland, and that their settlement in that country be used for the benefit of the government and community at large. Jews were permitted to follow their various callings and to be included in the lists of the burghers and merchants, on payment of double the amount of the tax imposed on Christians. They were declared eligible for election to municipal offices; were allowed to conduct their religious services without hindrance, to organize *kahals*, to build synagogues, etc.; and were granted immunity from being bound as serfs. The approval of Emperor Paul was given to the foregoing resolutions March 14, 1799 ("Complete Russian Code," xxv., No. 18, 889).

During the reign of Alexander I. (1801–25) the condition of the Jews of Courland, as well as that of the Jews in the other cities of the Russian empire, was much improved. The enactment of Dec. 9, 1804, and the resolutions passed thereupon by the Courland legislature (March 6, 1806; affirmed Dec. 1, 1806), practically secured the rights of citizenship for the Jews of that government, and by a ukase of Nov. 8, 1807, the double poll- and gild-taxes hitherto levied on the Jews were abolished.

This was the legal position of the Jews of Courland until 1829; but the rights granted to them in 1799 in respect to trade and commerce did not please the local Christian merchants and artisans. On May

24, 1829, the merchants and artisans asked the Senate to limit the number of Jewish families registered there. The governor-general of the Baltic provinces was commissioned to present a plan for the diminution of the Jewish population in Courland and Livonia. He replied that in regard to Livonia there was no necessity to take any steps for lessening the number of Jews there, since they were living nowhere except in Riga and Schlock, and were registered in the latter place only. In order to decrease the number of Jews in Courland he suggested the deportation to Siberia of (1) such Jews as had no fixed occupations; (2) such as appeared to be illegally registered and such as were omitted from the registry list. Only such Jews, he considered, should remain in the country as belonged to the guilds, had their own houses, occupied themselves with handicrafts, or held bona fide positions.

This plan was transmitted for consideration to the government committee on Jewish affairs, and this body proposed the following measures: (1) That there be recognized as inhabitants of Courland only such Jews as at the last census had been entered in the registry lists of the Courland Chamber of Justice. (2) That each family of such Jews receive a certificate of its right to settle in Courland. (3) That Jews from other governments be prohibited from settling in Courland. (4) That Jews who removed from Courland lose the right of returning thither. (5) That the marriage of a Courland Jewess to a Jew from another government confer upon such Jew no right to live in Courland. (6) That a Courland Jewess marrying a Jew from another government and removing with him thither lose the right of residence in Courland. (7) That Jews not holding the above-mentioned certificates leave the country; and that those who do not present their certificates in time or were guilty of violating any of the foregoing regulations, be sent to settle in Siberia. All of these measures were sanctioned by the Czar May 24, 1829 ("Russian Code," iv., No. 2,884; Mysh, p. 217).

In 1836 Emperor Nicholas issued a manifesto offering inducements to those of his Jewish subjects who should settle in the agricultural colonies of South Russia. The first families to avail themselves of this offer were seventy from Courland led by Meyer Mendelssohn and Elijah Mitauer. Another group from Courland, consisting of 117 families, applied for permission to settle in the provinces of Siberia. In 1840, 341 families, consisting of 2,530 persons from Courland, joined the agricultural colonies in the government of Kherson. By a ukase of Dec. 19, 1844, all *kahals* in the empire were abolished. This affected the Jewish communities in Courland, and placed them under the direct supervision of the municipal councils in the respective cities. The Jews had, nevertheless, the right to elect several of their number aldermen in the tax department, an office the duties of which were to receive and record all the Jewish taxes. The Jewish community was also represented on the school board and on the board of charities. Moreover, the governor-general of the Baltic provinces had assigned to his staff a Jewish adviser on Jewish affairs in Courland.

In accordance with Part V., art. xii., of the Regulations on Passports, issued in 1890, only those Jews have a right to live in Courland or in the village of Schlock whose families were registered in the census of April 13, 1835. The admission to Courland of Jews from other governments is prohibited. These restrictions do not apply to Jews who by virtue of special legislation have the right to live anywhere in the empire. The singular position of the Jews of Courland compared with that of Jews in other governments of Russia is apparent from the case of Jacob Thal, who in 1895 appealed against the decision of the Courland administration, which expelled him from the estate of Autzhoff on the ground of the May Laws of 1882. The Senate found (Sept. 24, 1895) that the measures prohibiting the settlement of the Jews outside of cities and towns referred only to those governments which came within the Pale of Settlement; and as Courland was not included in the number of such governments, it must be held that the May Laws could not be applied to the Jews of Courland (Mysh, p. 135).

At the end of the eighteenth century the Jews of Courland followed generally the same trades and professions as were followed by the Jews of Lithuania and Poland. In the villages they were small traders, pedlers, distillers, and artisans, especially locksmiths and tinsmiths; in the cities, they were wholesale dealers in dry- and fancy-goods, agents, jewelers, etc. Important business firms were to be found in Mitau, Jacobstadt, Friedrichstadt, and especially in Hasenpot, where the Jews carried on a considerable export trade. It has been shown that many Courland Jews were engaged in agriculture also.

The Jews of Courland have always shown themselves eager for enlightenment. That intellectual regeneration of Judaism which had begun in Germany in the time of Mendelssohn, did not pass without leaving its trace in Courland. The Courland Jews at that time, as at the present day, were more like their coreligionists of Germany than any other Russian Jews. Their life among a cultured people, their knowledge of German, and their relations with Germany soon removed the exclusiveness which still continued in Lithuania and Poland. At the beginning of the nineteenth century they represented the most cultured element of the Russian Jewry.

The first Jewish school conducted on modern principles was founded in Mitau in 1824 by a lawyer named Wolf. Here LILIENTHAL began his activity, and here Mordecai Aaron GÜNZBURG wrote his first works. The Courland Jews, like the rest of the Russian Jews, are still awaiting full emancipation, although economically and intellectually they seem to be better situated than the Jews of Poland and Lithuania.

Even the poorest of the Jewish inhabitants send their children either to the Christian schools or to the Jewish religious schools, if they can not afford to give them a better private education; and with the exception of some aged people, the number of those who can not read and write German is very small; the Judæo-German jargon seems to be disappearing in the rising generation. In the cultured

families a pure German is spoken, as well as good Russian and French; and as regards their home education, the Jews of Courland are not behind the intelligent Christian mercantile class.

Among the prominent Jews of Courland in the eighteenth century were the following: Rabbi Samuel ben Elkanah, of the Teomim family, author of "Meqom Shemuel," Altona, 1722. He was born at Altona, and officiated as rabbi at Mitau, where he died in 1742. Daniel Hayyim CLEIF (1729-94), rabbi at Hasenpot. Euchel, alderman at Hasenpot. Isaac Abraham Euchel (1756-1804), brother of the preceding. He spent considerable time at the house of his brother before going to Germany. David ABRAHAMSON, physician; born 1740; practised medicine at Hasenpot. Bär ben ha-Kadosh Rabbi Benjamin, a native of Lithuania, where his father was killed during the uprising of the Haidamaks. He lived in Mitau about 1730, where he traded as a jeweler. He was held in high esteem by the dukes and knights of Courland, and made many gifts to the Jewish community of Mitau. Zebi Hirsch Harif, rabbi at Mitau in the first half of the eighteenth century. Dr. Elrich; born in Prussia; practised medicine at Wilkomir, Lithuania, as government and city physician; settled in 1770 in Mitau, where he married (1784) the daughter of Kalman Borkum. He died there 1809. Aaron HORWITZ, rabbi at Hasenpot and of "all the province of Courland," and later at Berlin, where he died in 1779. He was a friend of Moses Mendelssohn (Fuenn, "Keneset Yisrael," p. 83; Landshuth, "Toledot Anshe Shem," p. 85, Berlin, 1884). Eliezer Elias Löwenthal, physician; born at Tuckum 1763; graduated at Königsberg 1791; practised for some time at Bausk; and later removed to Odessa. Aaron Solomon Tobias, physician; practised at Hasenpot, where he died 1782. Carl ANTON, convert to Christianity and disciple of Jonathan Eybeschütz; born in Mitau. Issachar Falkensohn BEHR; practised medicine at Hasenpot about 1775.

Of the nineteenth century there may be mentioned the following men of prominence: Isaac Ahrony, teacher of German and Hebrew; born at Mitau 1798; died at Kherson 1842. From 1823 to 1830 he lived at Polotzk, then again in Mitau until 1840, when he emigrated with his family to one of the Jewish agricultural colonies in the government of Kherson. He soon removed to Kherson, where he instructed the children of a Jewish merchant. He published a pamphlet, "Die Thorah Lehrt Gottes- und Menschenliebe und Unterthanentreue," Dorpat, 1838. Abraham BERNARD, physician; born 1762; practised at Mitau 1810-11. Marcus (Mordecai) Aaron GÜNZBURG (1795-1846); went to Polangen as teacher in 1817, and later removed to Mitau, where he supported himself by teaching, and by translating and copying legal documents. Ezekiel Jekuthiel, rabbi at Mitau; died there 1823. He wrote notes on the Halakot Gedolot, which remained in manuscript, and which Benjacob saw in the possession of Jekuthiel's son Elijah, who also officiated as rabbi there ("Ozar ha-Sefarim," p. 164). Wolf, father of Israel Lipkin (Salanter); was rabbi at Goldingen, and died there at the beginning of the nineteenth century. Ruben Birkhahn; died at Friedrichstadt 1822; was

a relative of R. Samuel ben Elkanah. His son Bezalel was born at Friedrichstadt 1778; died there 1849. Lazar Isaac Seume, physician; born at Hasenpot 1782; studied at the universities of Berlin and Würzburg; graduated at Dorpat 1805, and practised at Libau, where he later joined the Lutheran Church. Councilor Wulff; born in Prussia; settled in Courland 1780, and established a Jewish school at Mitau 1824, which had an existence of two years only. Reuben Joseph WUNDERBAR, teacher and author, 1812-67. L. Rappenheim, Jewish alderman at Mitau; was sent by the government in 1854 to inspect the Jewish colonies of South Russia ("Z. d. J." 1855, No. 31). Löb Kalman Löwensohn, teacher; born at Goldingen 1809; died at Jacobstadt 1866. He was engaged at the government Jewish public school, and also as teacher of Greek and Latin at the progymnasium of the nobility. He was an eminent scholar, and corresponded with Pauker and Mädler on problems in higher mathematics and astronomy, and with Hayyim Sack and other Hebrew scholars on Talmudic and rabbinical topics. Moritz Rosenthal; born at Bausk 1818; died at Friedrichstadt July 29, 1896. He was a descendant of Mordecai Jaffe. Simon Zarchi, rabbi at Jacobstadt from 1857 to 1860, when he went to Jerusalem, where he died. J. BRUTZKUS, editor. Leib Cahn, rabbi in Friedrichstadt 1864, and now (1902) rabbi at Moscow. Lipman Friedmann, rabbi at Friedrichstadt; his activity extended over the second quarter of the nineteenth century. Joshua b. Aaron Heller, author of "Dibre Yeshua," and other works; was rabbi at Polangen in the second half of the nineteenth century; died at Telshi 1880. Solomon PUCHER, governmental rabbi at Mitau (1861-96); born at Neustadt, near the Prussian frontier, 1829; died Nov. 29, 1899. Senior Zalman, rabbi of Goldingen. Louis ARENS, an opera singer. Lazar BEHRMANN and his son Vasili. Eliezer ben Alexander Kleinberg, called Eliezer Bausker, son-in-law of Israel Lipschütz (Antikoler). He was rabbi at Bausk and Wilna, and died in the United States 1891. He helped David Tevele of Minsk to publish his work "Dibre Dawid," and his *haskamot* are to be found in several works. David Isaacovich Bernstein, Russian lawyer; born about 1840 at Jacobstadt; died Jan., 1901, at St. Petersburg. He received his education at the district school of his birthplace, and at the gymnasium of Dünaburg, and graduated from the University of St. Petersburg in 1866. L. Kantor, formerly editor of "Russki Yevrei," was rabbi at Libau. Isidorus Brennon, physician at Mitau; born there Sept. 15, 1854. He is the author of a biographical dictionary entitled "Die Aerzte Kurlands von 1825-1900." Mitau, 1902. From this work it is apparent that of the 582 physicians of Courland in a period of 75 years, 101 (17.3 per cent) were Jews. Of this number 16 embraced Christianity. Of the 172 physicians now practising in Courland, 33 (19.2 per cent) are Jews. See also BAUSK and MITAU.)

COURT JEWS: Court Jews, called also court factors, and court or chamber agents, played a part at the courts of the Austrian emperors and the German princes in the seventeenth and eighteenth centuries and at the beginning of the nineteenth. Not always on account of their learning or their force of character did these Jews rise to positions close to the rulers: they were mostly wealthy business men, distinguished above their coreligionists by their commercial instincts and their adaptability. Court rulers looked upon them in a personal and, as a rule, selfish light; as being, on the one hand, their favorites, and, on the other, their whipping-boys. Court Jews frequently suffered through the denunciation of their envious rivals and coreligionists, and were often the objects of hatred of the people and the courtiers. They were of service to their fellow-Jews only during the periods, often short, of their influence with the rulers; and as they themselves, being hated parvenus, often came to a tragic end, their coreligionists were in consequence of their fall all the more harassed.

The court Jews, as the agents of the rulers, and in times of war as the purveyors and the treasurers of the state, enjoyed special privileges. They were under the jurisdiction of the court marshal, and were not compelled to wear the Jews' badge. They were permitted to stay wherever the emperor held his court, and to live anywhere in the German empire, even in places where no other Jews were allowed. Wherever they settled they could buy houses, slaughter meat according to the Jewish ritual, and maintain a rabbi. They could sell their goods wholesale and retail, and could not be taxed or assessed higher than the Christians.

The Austrian emperors kept a considerable number of court Jews. Among those of Emperor Ferdinand II. are mentioned the following: Solomon and Ber Mayer, who furnished for the wedding of the emperor and Eleonora of Mantua the cloth for four squadrons of cavalry; Joseph Pincherle of Görz; Moses and Joseph Marburger (Morpurgo) of Gradisca; Ventura Pariente of Trieste; the physician

Elijah Halfon of Vienna; Samuel zum Drachen, Samuel zum Strauss, and Samuel zum Weissen Drachen of Frankfort-on-the-Main; and Mordecai MEISEL of Prague. A specially favored court Jew was Jacob BASSEVI, the first Jew to be ennobled, with the title "von Treuenfeld."

Important as court Jews were also Samuel Oppenheimer, who went from Heidelberg to Vienna, and Samson Wertheimer (Wertheimher) from Worms. Oppenheimer, who was appointed chief court factor, together with his two sons Emanuel and Wolf, and Wertheimer, who was at first associated with him, devoted their time and talents to the service of Austria and the House of Hapsburg: during the Rhenish, French, Turkish, and Spanish wars they loaned

millions of florins for provisions, munitions, etc. Wertheimer, who, by title at least, was also chief court factor to the electors of Mayence, the Palatinate, and Treves, received from the emperor a chain of honor with his miniature.

Samson Wertheimer was succeeded as court factor by his son Wolf. Contemporaneous with him was Leffmann BEHREND, or Liepmann Cohen, of Hanover, court factor and agent of the elector Ernst August of Hanover and of the duke Rudolf August of Brunswick. He had relations also with several other rulers and high dignitaries. Behrends' two sons, Mordecai Gumpel and Isaac, received the same titles as he, chief court factors and agents. Isaac Cohen's father-in-law, Behrend Lehman, called also Bärnann Halberstadt, was a court factor of Saxony, with the title of "Resident"; and his son Lehman Behrend was called to Dresden as court factor by King Augustus the Strong. Moses Bonaventura of Prague was also court Jew of Saxony in 1679.

The Models were court Jews of the margraves of Ansbach about the middle of the seventeenth century. Especially influential was Marx Model, who had the largest business in the whole principality and extensively supplied the court and the army. He fell into disgrace through the intrigues of the court Jew Elkan Fränkel, member of a family that had been driven from Vienna. Fränkel, a circum-spect, energetic, and proud man, possessed the confidence of the margrave to such a degree that his advice was sought in the most important affairs of the state. Denounced by a certain

Isaiah Fränkel, however, who desired to be baptized, an accusation was brought against Elkan Fränkel; and the latter was pilloried, scourged, and sent to the Wülzburg for life imprisonment Nov. 2, 1712. He died there 1720. David Rost, Gabriel Fränkel, and, in 1730, Isaac Nathan (Ischerlein) were court Jews together with Elkan Fränkel; Ischerlein, through the intrigues of the Fränkels, suffered the same fate as Elkan Fränkel. Nevertheless, Nathan's son-in-law, Dessauer, became court Jew. Other court Jews of the princes of Ansbach were Michael Simon and Löw Israel (1743), Meyer Berlin, and Amson Solomon Seligmann (1763).

The great elector also kept his court Jew at Berlin, Israel Aaron (1670), who by his influence tried to prevent the influx of foreign Jews into the Prussian capital. Other court

The Great Elector. Jews of the elector were Gumpertz (died 1672), Berend Wulff (1675), and Solomon Fränkel (1678). More influential than any of these was Jost Liebmann. Through his marriage with the widow of the above-named Israel Aaron, he succeeded to the latter's position, and was highly esteemed by the elector. He had continual quarrels with the court Jew of the crown prince, Markus Magnus. After his death his influential position fell to his widow, the well-known Liebmannin, who was so well received by Frederick III. (from 1701 King Frederick I. of Prussia) that she could go unannounced into his cabinet.

There were court Jews at all the petty German courts; e.g., Zacharias Seligmann (1694) in the service of the Prince of Hesse-Homburg, and others in the

service of the dukes of Mecklenburg. Others mentioned toward the end of the seventeenth century are: Bendix and Ruben Goldschmidt of Homburg; Michael Hinrichsen of Glückstadt, who soon associated himself with Moses Israel Fürst, and whose son, Reuben Hinrichsen, in 1750 had a fixed salary as court agent. About this time the court agent Wolf lived at the court of Frederick III. of Mecklenburg-Strelitz. Disputes with the court Jews often led to protracted lawsuits.

The last actual court Jews were Israel JACOBSON, court agent of Brunswick, and Wolf BREIDENBACH, factor to the Elector of Hesse, both of whom occupy honorable positions in the history of the Jews.

A history of the various court Jews—still to be written—would be a valuable contribution to the history of the German dynasties.

COURTSHIP. See MARRIAGE.

COUSSERI (COUSSER, קוּסֶרֶר): Jewish family of the fifteenth and sixteenth centuries; lived in Riva di Trento and neighboring towns of northern Italy. The epitaph on the tomb of Meshullam Cousseri (died July 20, 1541) indicates Riva di Trento as the original home of the family. Mordecai ben Meshullam of Riva, author of the letters in the manuscript of Halberstamm (No. 390), according to which he was still living in 1560, seems to have been the son of Meshullam Cousseri. Steinschneider derives the name "Cousseri" from "Yekussiel," the German pronunciation of "Jekuthiel." According to David Kaufmann, it was abridged into "Koussel" and "Koss"; other formations are "Kousi," "Kousel," and "Kousser," קוּסֶרֶר or קוּסֶרֶר. Since "Kozzer" as a prænomen is found in a Mayence document of 1470, in which the Jews of the Rheingau are granted one year's sojourn, it may be concluded that the family Cousseri was of German origin; in fact this is proved from a German translation of the piyyuṭim of Rosh ha-Shanah and Yom ha-Kippurim by Jacob ben Joseph Kozzer of Ferrare. The name "Cuzzeri" still exists in northern Italy.

D. S. MAN.

COUTINHO (CUITIÑO, קוּטִינְיוֹ): Name of a Jewish-Portuguese family, members of which, during the seventeenth and eighteenth centuries, resided in Amsterdam, Hamburg, Brazil, and the West Indies.

1. **Abraham Pereyra Coutinho:** Mentioned as living in Amsterdam in 1675.

2. **Baruch Mendes Coutin:** Member of the benevolent society Sha'are Zedek, founded in Amsterdam 1678.

3. **Daniel Coutinho:** Mentioned with No. 1.

4. **David Mendes Coutinho:** Mentioned with No. 2.

5. **Isaac Henriques Coutinho:** Mentioned in a Jamaica document of the year 1698. Resided at Amsterdam in 1675.

6. Jacob Coutinho: Son of Moses Henriques Coutinho (No. 11).

7. Jacob b. Abraham Mendes Coutinho: A brother of Moses (No. 10).

8. Lourença Coutinho: Mother of the dramatic poet Antonio José da Silva, and widow of João Mendes da Silva; arrested in Rio de Janeiro as a confessor of Judaism, and brought before the tribunal of the Inquisition at Lisbon, where she was imprisoned, and died in 1713 at the age of sixty-one.

9. Manuel Rodriguez Coutinho: Punished (for the third time) by the Inquisition at Lisbon on the charge of a relapse to Judaism.

10. Moses b. Abraham Mendes Coutinho: From 1696 to 1711 the owner of a Hebrew printing-establishment at Amsterdam.

11. Moses Henriques Coutinho: Perhaps a brother of Isaac Henriques (No. 5); lived for a time in Barbados, and settled in Jamaica 1679.

12. Samuel Gomes Coutinho: Mentioned with No. 1.

COUTINHO, FERNANDO: Defender of the Jews, counselor of the supreme court, and afterward Bishop of Silves, in the reigns of Manuel and João III. of Portugal. When, in Feb., 1497, Manuel agitated the question of compulsory baptism of the Jews, Coutinho energetically protested against any forcible measures in matters of faith, saying that "no compulsion and persecution can make a sincere Christian out of a single Jew." When a Marano of Loulé in Algarve was accused, in 1531, of having spoken disrespectfully of the Virgin Mary, and the royal council sent the proofs to Bishop Coutinho, he refused to pass judgment. In his decision he justified himself by saying that the Maranos were to be considered as Jews and not as Christians; for in being forcibly baptized they had not thereby accepted Christianity, and hence could not be treated as apostates from the Christian religion. "Even if I were not a man of seventy," he continues, "and were I more in accord with the present time, I would still pronounce the verdict to be false; since it is clear and evident that the law condemns it. The provost who brought the action, and all the witnesses, ought to be tortured; for no witnesses are ever called that have not been bribed with money or otherwise. I will have nothing to do with the matter. I need not act the part of Pontius Pilate. Let other, younger men pass judgment."

COVENANT (= בְּרִית; Septuagint, *διαθήκη*; Vulgate, "testamentum").—**Biblical Data:** An agreement between two contracting parties, originally sealed with blood; a bond, or a law; a permanent religious dispensation. The old, primitive way

of concluding a covenant (בְּרִית בְּרִית, "to cut a covenant") was for the covenanters to cut into each other's arm and suck the blood, the mixing of the blood rendering them "brothers of the covenant" (see Trumbull, "The Blood Covenant," pp. 5 *et seq.*, 322; W. R. Smith, "Religion of the Semites," pp. 296 *et seq.*, 460 *et seq.*; compare Herodotus, iii. 8, iv. 70). Whether "berit" is to be derived from "barah" = to cut- or from a root cognate with the Assyrian "berit" = fetter (see Nathanael Schmidt, in Cheyne and Black, "Encyc. Bibl." s. v. "Covenant"), or whether both Assyrian and Hebrew come from "barah" = to cut (compare "asar" = covenant and bracelet in Arabic; see Trumbull, *l.c.* pp. 64 *et seq.*), can not be decided here. A rite expressive of the same idea is (see Jer. xxxiv. 18; compare Gen. xv. *et seq.*) the cutting of a sacrificial animal into two parts, between which the contracting parties pass, showing thereby that they are bound to each other; the eating together of the meat, which usually follows, reiterating the same idea. Originally the covenant was a bond of life-fellowship, where the mingling of the blood was deemed essential. In the course of time aversion to imbibing human blood eliminated the sucking of the blood, and the eating and drinking together became in itself the means of covenanting, while the act was solemnized by the invocation of the Deity in an oath, or by the presence of representative symbols of the Deity, such as seven animals, or seven stones or wells, indicative of the seven astral deities; whence נִשְׁבַּע ("to be bound by the holy seven") as an equivalent for "swearing" in pre-Mosaic times (see Gen. xxi. 27, xxvi. 28, xxxi. 54; Herodotus, iii. 8; Josh. ix. 14; II Sam. iii. 12-20; W. R. Smith, *l.c.* pp. 252 *et seq.*). Salt was especially selected together with bread for the conclusion of a covenant (Num. xviii. 19; see W. R. Smith, *l.c.* p. 252; Trumbull, "The Covenant of Salt," 1899).

Every covenant required some kind of religious rite in which the Deity was invoked as a witness to render it valid (Gen. xxi. 23; Josh. ix. 19; Judges ix. 46; Jer. xxxiv. 18). The covenant made the life and property of the confederates ("ba'ale berit," Gen. xiv. 13)

Covenant Between Men and Nations. Inviolable. To break "the covenant of the brothers" (Amos i. 9) was a heinous sin, and imposed the penalty of death (II Sam. iii. 28). The Mo-

saic law, therefore, forbade Israel making a covenant with the idolatrous inhabitants of Canaan or "with their gods" (Ex. xxiii. 32, xxxiv. 12; Deut. vii. 2). The covenant concluded by Solomon with Hiram (I Kings vi. 26), and those between the kings of Judah or Israel and the kings of Syria or Assyria and Babylonia (I Kings xv. 19; Hosca xii. 2; Ezek. xvii. 13), were therefore fraught with evil, nor could the covenant of Simon Maccabeus with Rome (I Macc. xiv. 24 *et seq.*) meet with anything but disapproval on the part of the Pharisees. The worst that can happen to a nation is to have its confederates ("anshe berit") conspire against it (Obad. i. 7). The pledge of matrimony also was, according to Mal. i. 13, 14; Prov. ii. 17; Ezek. xvi. 8, 61 (with which must be compared Job xxxii.), a covenant concluded before witnesses, and probably at some altar or sacrificial feast, at which the repast with

the wine seems to have been an essential feature (see Gen. xxiv. 54).

The relation of man to the Deity was also conceived of in Biblical times as a covenant concluded by God with certain men or nations,

God's from which all laws derived their
Covenant sanctity and perpetuity. God, when
with Men. creating the heavens and the earth,
made a covenant with them to observe

the rules of day and night (Jer. xxxiii. 25), and when the flood caused by the sin of all flesh had interrupted the operation of the law, He hung the rainbow in the clouds as a sign of the covenant, to assure men that it would not again be suspended on account of man's sin. He thus made a special covenant with Noah and his sons, requiring them to preserve and show due regard for all human life, while pledging the preservation of the order of earthly life for all generations (Gen. ix. 1-17). Regarding this so-called Noachian covenant see below.

God concluded a covenant with Abraham (Gen. xv. 18, xvii. 2, 7) by which He entered into a special relationship with him and his descendants for all time; and as a sign of this covenant he enjoined on them the rite of **CIRCUMCISION**. This Abrahamic covenant, expressive of the religious character of the descendants of Abraham as the people of **YHWH**, the one and only God, was renewed on Mount Sinai when, before the giving of the Law, Israel as a people pledged itself to keep His covenant (Ex. xix. 8). After the giving of the Law Moses sprinkled "the blood of the covenant sacrifice" half upon the people and half upon the altar of the Lord (Ex. xxiv. 6-8), to signify the mystical union of Israel and its God. Of this "everlasting" Sinaitic covenant between God and Israel the Sabbath is declared to be the sign forever (Ex. xxxi. 13-17). At the same time the tables of the Law upon which the pledge was made were called "the book of the covenant" (Ex. xxiv. 7), and the Ten Commandments "the words of the covenant" (Ex. xxxiv. 28); and so the tables containing these became "the tables of the covenant" (Deut. ix. 9, 15). Of peculiar significance to the people during its wanderings in the wilderness, and in its settled state in Palestine, was the **ARK OF THE COVENANT** (Num. x. 33; Deut. x. 8, xxxi. 26; and frequently in Joshua, Samuel, and Kings), which was regarded as "the testimony" ("edut") to the presence of the God of the Covenant in its midst.

Four times in the history of Israel this covenant of Sinai was renewed: by Moses in the plains of Moab (Deut. xxix. 1, 9); by Joshua before his death (Josh. xxiv. 25); by the high priest

Renewal Jehoiada after the idolatrous Queen
of Athaliah had been deposed and young
Covenant. Jehoash proclaimed king (II Kings xi. 17); and finally by King Josiah after

the book of the Law had been found in the Temple and "all the words of the book of the covenant" had been read before all the people (II Kings xxiii. 2, 3). In fact, the Book of Deuteronomy dwells with special emphasis (see ch. iv.-v. and xxviii.-xxix.) upon the covenant made in Horeb for all generations; and Jeremiah (see ch. xi., xxxi., xxxiv.), as well as Ezekiel (ch. xvi., xvii.) also recurs

often to the covenant; but Isaiah never mentions the word "covenant." This fact has led many modern Bible critics to assume that the covenant idea originated among the late prophets of Judea. But the accusation that Israel "forsook the covenant of the Law" was made as early as the time of the prophet Elijah (I Kings xix. 10), while both Hosea (ii. 18-20) and Jeremiah held out the promise that the covenant which Israel had broken, thereby forfeiting its existence as a nation before God, shall be written anew and upon the hearts of all, never to be broken again (Jer. xxxi. 31-34). It must be observed, however, that parallel with the Sinai covenant there is also continuous reference to the older covenant which God concluded with the Patriarchs as the guaranty of Israel's redemption and renewed salvation (Ex. vi. 4; Lev. xxvi. 42-45; Deut. iv. 31, vii. 12).

Besides the covenant with the people of Israel, God concluded a special covenant with the priestly tribe of Levi, and specifically with the houses of Aaron (Num. xviii. 19; xxv. 12, 13; Deut. xxxiii.

Covenant 9; Jer. xxxiii. 21; Mal. ii. 4; com-
with pare Ex. xxxii. 29; Deut. x. 8, xviii.
Aaron and 5) and King David (II Sam. xxiii. 5;
David. Jer. xxxiii. 21; Ps. lxxxix. 4, 35;
cxxxii. 12; II Chron. xiii. 5). These

two covenants, together with the one made with Abraham (Gen. xv. 18), were meant to perpetuate the three possessions: the land, the Davidic monarchy, and the Aaronitic priesthood. The perpetual character of the Sinai covenant was accentuated by the seer of the Exile, and Israel itself was declared to be "a covenant of the people"; that is, a covenant-people among the nations united by the word of God (Isa. xlii. 6, xlix. 8, liv. 10, lv. 3, lix. 21, lxi. 8; compare Jer. i. 5).

While every sacrifice was regarded as a renewal of the covenant with God (Ps. l. 5), the conception of religion as a covenant concluded

Meaning of by God with man is peculiarly Jew-
the Divine ish. The idea of the covenant of God
Covenant. is therefore coeval with the beginning
of Israel as the people of God. It is

also easy to understand why "berit" (covenant) became synonymous with the Law (Isa. lvi. 6 *et seq.*; Ps. xxv. 10, 14; I. 16; I Kings xi. 11). On the other hand, the idea of Israel as the covenant-people became more powerful when a prophet, "the messenger of the covenant," who would renew the covenant in the person of Elijah (Mal. iii. 3 [iv. 5]) was looked for, and still more when the preservation or violation of the covenant—that is, the maintenance or extermination of Judaism—was the question at issue between the two parties during the Syrian persecution (Dan. xi. 28-32; I Macc. i. 15, 63; Judith ix. 13; Ps. lxxiv. 20; see **ELIJAH**).

Special stress was laid on circumcision and the Sabbath during the Exile as the signs of the Israelitish covenant (Ps. lvi. 4-6), and they were regarded as the bulwarks of the faith in the Maccabean era (I Macc. i. 15, 45-48).

From this point of view the history of divine revelation was, in the second pre-Christian century, seen in a new light. The broader and more cosmopolitan view dwelt on the covenant of God with

man. According to Ben Sira, God made a covenant of life even with the first man (Ecclus. [Sirach] xvii. 12, probably based on Hosea vi. 12; compare Sanh. 38b). But it is especially the covenant of Noah which was interpreted by the Rabbis to include all the laws of humanity.

The strictly nationalistic view found its vigorous expression in the Book of Jubilees, according to which the Noachian covenant, particularly resting on the sacredness of blood, and Abrahamic covenant, however, in the foreground (*ib.* xv. 11-34, xxi. 4, xxiii. 16, xxx. 21, xxxiii. 19) as the only condition of eternal salvation for Israelites.

When Jeremiah spoke of "the new covenant" which the Lord "will make with the house of Israel and the house of Judah" (Jer. xxxi. 31) he immediately explained his words by saying:

The "I will put my law in their inward
Old and the parts, and write it in their hearts" (*ib.*
New xxxi. 33; compare xxxiii. 40). Ju-
Covenant. daism knows of no other than the old
Sinaitic covenant. Eternal as the cove-
nant with heaven and earth is God's covenant with
the seed of Jacob (Jer. xxxiii. 25 *et seq.*). Chris-
tianity, however, interpreted the words of the
prophet in such a way as to indicate a new relig-
ious dispensation in place of the law of Moses
(Heb. viii. 8-13). The Septuagint translation of the
term "berit" being *διαθήκη*, which signifies both a
compact and a last will or testament (Aquila, Sym-
machus, and Theodotion more correctly translate
"berit" *συνθήκη* = covenant), the author of the Epis-
tle to the Hebrews writes: "A testament is of force
after men are dead, but not while the testator liveth;
wherefore the first testament could not be dedicated
without blood, as in fact Moses did enjoin the peo-
ple by the blood of the testament; Jesus, however,
as the mediator of the new testament offered his own
blood for the redemption of the transgressions under
the first testament" (*ib.* ix. 15-25 *et seq.*, Greek).
This strange view is based upon the idea expressed
by Paul (Gal. iii. 15 *et seq.*, Greek). "A man's testa-
ment [A. V. "covenant" gives no sense] if it be con-
firmed, no one disannulleth or addeth thereto. Now
to Abraham and his seed were the promises made, and
this seed is Christ. The testament then confirmed
by God in Christ can not be annulled by the law four
hundred and thirty years thereafter. The law was
added because of transgressions till the seed should
come in Christ." It was obviously in opposition to
the Passover blood of the covenant (Ex. xii. 23;
Ezek. xvi. 6) that the early Christians at their com-
munion meals proclaimed their faith in the crucified
Christ as "the new testament" (I Cor. xi. 25; Luke
xxii. 20; Matt. xxvi. 28; Mark xiv. 24; see NEW
TESTAMENT; PASSOVER).

K.

—**In Rabbinical Literature:** The term "berit" is used occasionally in Talmudic-Midrashic literature in referring to the laws of nature, which are regarded as a sort of covenant between God and things (see Gen. R. xxxiv.; Niddah 58b); or it is used in the sense of a contract, as, for instance, "a covenant made with the lips" (M. K. 18; Num. R. xviii.), or a covenant made with the "thirteen middot, that they may be efficient during prayer" (R. H. 17b; Yer. Ber. v. 9a), but it refers chiefly to God's covenant made with Israel, and with Abraham, Isaac, Jacob, Moses, Aaron, Phineas, and David (Derek Erez Zuṭa, i., end). Frequent reference is made in the liturgy to "the covenant with the fathers" (Lev. xxvi. 42, Hebr.). In one passage there is also a reference to the covenant made with the twelve progenitors of the tribes, by which a covenant like that made with the "fathers" is meant (Torat Kohanim; Beḥuḳḳotai, xxvi. 45). The intimacy existing between God and Israel as the descendants of the "fathers" was shown in the form of a covenant when Israel received the Torah (compare also Tanna debe Elyahu R. iii.; Sifre, Deut. 4).

In view of the covenant between God and Israel concluded on Mt. Sinai, the phrase "the oath on Mt. Sinai" ("mushba' me-har Sinai"), referring to the duty of the Israelites to observe the Torah, frequently

recurs in Talmudic literature. The following three ceremonies preceded this covenant: "milah" (circumcision), "ṭebilah" (baptism), "harza'at dam" (sprinkling of the sacrificial blood (compare Ex. xxiv. 6); hence they are deemed indispensable for the admission of a proselyte into the Jewish community (Ker. 9a; compare PROSELYTES AND PROSELYTISM). Besides the one on Mt. Sinai, a covenant was made on the departure from Egypt, and another shortly before the entry into the promised land (compare Deut. xxix. 11), when God made the Israelites swear that they would observe the Torah (Tan., Nizzabim, ed. Buber, p. 50; compare Soṭah 37b, top). Some especially important miẓvot are called simply "berit." In the first place stands circumcision (Shak. 135a; Mek., Yitro, ed. Weiss, 71), also designated "berito shel Abraham abinu" (the covenant with our father Abraham) (Abot iii. 17); and in the liturgy, in a passage dating from tannaitic times, "berit ḳodesh" (holy covenant). Akiba took "berit" (Ex. xix. 5) to mean the observance of the Sabbath and the recognition of God (Mek., Yitro, *l.c.*), while in the Zohar the Torah, circumcision, and God are designated by "berit" (Aḥare Mot, iii. 73b; compare also Zohar Pinḥas, iii. 220b, bottom).

The covenants between God and some of the elect mentioned in Scripture are a favorite subject of the Haggadah; and as early as the Book of Jubilees there is an explicit reference to the covenant between God and Noah when the latter left the ark (vi. 10, 11). God's covenant with the sons of Noah was, however, not made for all eternity, but was intended to be coeval only with the existence of this world (Gen. R. xxxiv.). When God promised Noah to send no deluge, he also made a covenant with the

earth that men should be filled with love for their homes so that all parts of the earth might be inhabited (Gen. R. l.c.). The Haggadah treats with much detail of God's covenant with Abraham, mentioned in Gen. xv. 9-21, which is designated in the liturgy as "berit ben ha-betarim" (the covenant between the sacrificial pieces) (compare also the Syriac Baruch apocalypse, iv. 4). "God showed him Gehenna and the dominion of the nations on the one side, and the revelation on Mt. Sinai and the service in the Temple on the other side, and said: 'If your children honor these last two [the Torah and worship], they shall be spared the first two; if not, the Temple shall be destroyed, and you may now choose between suffering under the heathen and suffering in Gehenna as the punishment of your descendants.' Abraham was at first inclined to choose the latter, but God induced him finally to choose the sorrows of the exile as punishment for Israel, in order that they might be spared the torments of hell" (Gen. R. xlv.; Pirke R. El. xxviii.). The APOCALYPSE of

Covenants Among Men.

Abraham is in large part a detailed description of the "berit ben ha-betarim." Abraham is often severely censured for having made a covenant with the pagan Abimelech (Gen. xxi. 27; Tanna Elyakum R. vii.; Yalk., Gen. 95; compare also ABIMELECH IN RABBINICAL LITERATURE).

L. G.

-----In Arabic Literature: The belief in a covenant ("mithaq") existing between the divinities and their worshipers was prevalent in pre-Islamic times. The offering of sacrifices had no other object than that of strengthening the covenants between the divinities and the officiants, and blood was considered to be the best agent. A covenant concluded between men was often solemnized by dipping the hands in blood. The Banu 'Adi ben Ka'b and the Banu 'Abd al-Dar concluded a covenant, and to give it greater force the parties dipped their hands in a plate of blood (Ibn Hisham's "Life of Mohammed," p. 125). Mohammed taught, both in the Koran and the Tradition, that in the beginning God called all the souls of mankind together and made a covenant with them. "The Lord brought forth their descendants from the reins of the sons of Adam, and took them to witness against themselves" (Koran, vii. 171). In explanation of this verse Ubai ibn Ka'b relates that when God created the spirits of the sons of Adam He gathered them together and took from them a promise ("wa'dah") and a covenant ("mithaq"). Then Adam saw among them prophets appointed by special covenant (compare 'Ab. Zarah 5a, where this legend is given in detail).

Mohammed frequently reproaches the Jews with having broken the covenant: "O children of Israel! Remember my grace which I conferred upon you [when I said] keep the covenant with me and I will keep the covenant with you" (Koran, ii. 87). Mohammed connects the covenant which God made with the children of Israel with the giving of the Law on Mt. Sinai: "And when we made a covenant with you and lifted the mountain above you, saying: 'Receive with steadfastness what we have brought you, and remember what it contains'" (ib. ii. 60). The commentator Baiḍawi explains the ex-

IV.—21

pression "and the mountain was lifted above you" ("warufi' fauḳakum al-ṭur") by the following legend: When Moses brought the Torah, the children of Israel, seeing the numerous obligations imposed upon them, refused to accept it. Then God commanded Gabriel, and he tore out the mountain and suspended it over the Israelites. A similar legend is found in Shab. 88a: "'And they stood at the nether part of the mount' [Ex. xix. 17], said R. Abdimi bar Hana. From this expression we learn that God suspended the mount over them as a bat, and said to them: 'If you accept the Torah, it is all right; if not, you will find here your tomb.'" In regard to the covenant with the Prophets, Mohammed said: "Remember we have entered into covenant with the Prophets, with thee Mohammed, and with Noah, and with Abraham, and with Musa, and with Jesus, the son of Mary, and we made with them a covenant (sura xxxiii. 7).

I. Br.

-----Critical View: The Hebrew "berit," usually translated "covenant" in the A. V., has a wider range of application than its English equivalent, since it is the ordinary term for any kind of agreement or compact. Naturally the word has to be considered in the sense of a solemn agreement; but it must be noticed that all agreements among ancient peoples were solemn and sacred, having the sanction of an oath or "curse," while covenant-breaking of any sort was held to be most sacrilegious. It is its comprehensiveness of meaning along with its intrinsic sacredness that gives the berit such great significance in the Hebrew Scriptures. The most binding covenant was naturally that made "before Jehovah" (I Sam. xxiii. 18), and the name BAAL-BERITH is a reminiscence of some similar covenant made before the "Ba'al" of the land.

[This Ba'al seems originally to have been the patron deity of Shechem (Judges viii. 33; ix. 4, 46), which, being one of the oldest cities of the land, retained even in later days its prominence as the capital of a confederation. Jacob buys a piece of land; that is, enters into a covenant with it (Gen. xxxiii. 18, 19; xxxiv. 2). It is appointed as a city of refuge—in other words, a covenant city (Josh. xx. 7). It is here that Joshua delivers his farewell address (Josh. xxiv. 1). Its rôle under Jeroboam (I Kings xii. 25) points in the same direction. By the Ba'al of the chief city the covenant between the component tribes must have been sanctioned. Hence this Ba'al became the Ba'al-berit par excellence. Though unsupported by epigraphic proof, the theory that among the Phenicians a Ba'al called also "Ba'al Elyun," or "Elyun Beruth," had a similar preeminence as the protector of an alliance of various cities (Creutzer, "Symbolik," ii. 87), throws light on the function of this Ba'al.—E. C. II.]

Besides the oath formally taken or implied, a ceremony was often performed, such as "passing between" the parts of a sacrificial victim slain for the purpose (Gen. xv. 18; Jer. xxxiv. 15), or giving the hand, or partaking of salt in common. Very primitive, wide-spread, and potential was the blood-covenant.

A peculiar Hebrew custom is that of imposing a berit upon another or others; e.g., the covenant

imposed by Joshua upon the Gibeonites (Josh. ix. 7, xi. 19), or that by Jehoiada the priest upon the people (II Kings xi. 17). So important is this apparently one-sided relation that it has molded the dominant prophetic conception of God's attitude toward His people. Thus the commands given at Sinai on "the tables of the covenant," and the whole giving of the Law, have come to be known as the Sinaitic covenant. Here the obligation is upon the side of the people. But in the progressive development of YHWH's relations to Israel as God of the covenant there is an increasing assumption of obligation on His part, with all solemnity of assurance as to the fulfilment (see, for example, Jer. xxxiii. 20 *et seq.*). The idea is indeed the most germinal of all religious conceptions, for when Jeremiah utters the profoundest sentiment of the Old Testament, that the Law of God should be written upon His people's hearts, the promise is called "a new covenant" (*ib.* xxxi. 31 *et seq.*).

J. F. McC.

COVETOUSNESS: The inordinate desire to possess that to which one is not entitled, or that which belongs to another. Its prohibition forms the burden of the tenth commandment, "Thou shalt not covet thy neighbor's house; thou shalt not covet thy neighbor's wife, nor his man-servant, nor his maidservant, nor his ox, nor his ass, nor anything that is thy neighbor's" (Ex. xx. 17; compare Deut. v. 18). The Scriptures employ the following four terms as equivalents for "covetousness," differing in point of degree: (1) "Kīn'ah" (from כָּנָה), usually translated "envy." It signifies discontent with one's own possession because of the preferred possessions of others, as in Gen. xxxvii. 11; Isa. xi. 13; Ps. xxxvii. 1, lxxiii. 3; Prov. iii. 31, xxxiii. 17.

(2) "Awwah" (from אָוָה). This is the equivalent of "longing," and connotes the wish for another's belongings, as in the passage, "Neither shalt thou desire thy neighbor's wife," etc. (Deut. v. 18; compare Ps. xlv. 12, cvi. 14; Prov. xxi. 26; Eccl. vi. 2).

(3) "Hemdah" (from חָמַד). This is rendered "covetousness," and indicates the undue craving for that to which one has no right, as in Ex. xx. 17; Deut. v. 18, vii. 25; Josh. vii. 21; Micah ii. 2; Prov. xii. 12.

(4) "Beza'" (from בָּצַע). The meaning, "gain," has reference to the appropriation of the property of another. Compare the passages: "Provide . . . men of truth, hating covetousness (Ex. xviii. 21); "For from the least of them even unto the greatest of them every one is given to covetousness" (Jer. vi. 13, viii. 10; see also Ps. x. 3, cxix. 36; Prov. i. 19, xv. 27).

The condemnation of covetousness is nowhere expressed more forcibly than, by implication, in the lament of Micah: "Wo to them that

Prophetic devise iniquity, and work evil upon
Denun- their beds! When the morning is light
ciation. they practise it, because it is in the
power of their hand. And they covet
fields, and take them by violence; and houses, and
take them away; so they oppress a man and his

house, even a man and his heritage" (Micah ii. 1-2; compare Hab. ii. 9: "Wo to him that coveteth an evil covetousness").

Covetousness never succeeds in the attainment of the object desired. The covetous man is despised by God. "For the wicked boasteth of his heart's desire, and blesseth the covetous, whom the Lord abhorreth" (Ps. x. 3). "He who violates the commandment Thou shalt not covet, is regarded as if he had transgressed all ten commandments" (Pesiḳ. R. 21; ed. Friedmann, p. 107a).

Nahmanides (1195-1270), in commenting on Ex. xx. 17, holds that "if man subdues his desire he will never harm his neighbor." Isaac Aboab (*c.* 1300) contends that the execution of the nine preceding commandments depends on the fulfilment of the tenth. Says Aboab: "He who does not covet will not depart from God, serve strange gods, violate the Sabbath and holidays, show lack of respect for parents, murder, commit adultery, steal, or swear falsely." "Covetousness is the root of all jealousies, lust, transgressions, and the violations of commandments" ("Menorat ha-Ma'or," Introduction to section i.).

The consequences attending covetousness are not lost sight of by Judaism. Covetousness is an evidence of moral decline. "A sound

Signifi- heart is the life of the flesh; but envy
cance of the rottenness of the bones" (Prov.
Covetous- xiv. 30). "He that hath no rule over
ness. his own spirit is like a city that is
broken down, and without walls"
(Prov. xxv. 28).

In some instances teachers have traced the direct effects of covetousness. The Pirke Abot (iv. 21) considers covetousness in its threefold manifestation the cause of man's removal from the world. "If you desire you will covet; and if you covet you will tyrannize and rob" (Mek. to Ex. xx. 17). Bahya ben Asher, in dilating on the tenth commandment, says: "If you covet, you cause quarrel, trouble, and divorce."

A gross injury resulting to the covetous from his inordinate desire for that not rightfully belonging to him is the loss of the property with

Nemesis of which he is blessed. In other words,
Covetous- covetousness is responsible for its own
ness. ruin. That covetousness is the cause of
the individual's discontent and unhap-

piness is certainly true. Perhaps this idea underlies the following remark: "He who looks enviously on that which does not belong to him not only fails to obtain that which he seeks, but also loses that which he has" (Sotah 9a). A proverbial saying to the same effect is the Talmudical aphorism, "Because the camel wanted horns his ears were cut off" (Sanh. 106a). Even though covetousness does not result in violence, the wish to possess another's property suffices to merit condemnation. "The wish to be able to do wrong is worse than the deed itself" (Yoma 29a).

Covetousness is by no means unconquerable. Man can master this as well as all other passions. "Covetousness is a matter of the heart" (Solomon ben Melek, in Miklal Yofi to Deut. v. 21). Special precaution should therefore be exercised by man

not to permit covetousness to master him. This may be prevented by schooling oneself against it.

Cure of Covetousness. "Remember that the object of your lust is unattainable, and your mind will be at ease" (Abraham ibn Ezra to Ex. xx. 17). Man should be satisfied with his lot. "Who is rich? He who rejoices in his portion" (Ab. iv. 1). Man should vanquish his desire. Such victory is a mark of spiritual power. "Who is strong? He who subdues his evil inclination" (*ib.*). "Keep thy heart with all diligence; for out of it are the issues of life" (Prov. iv. 23).

COVILHÃO: City in the province of Beira, Portugal, which in the thirteenth century had a Jewish congregation and was the seat of a district rabbi. After the banishment of the Jews from Portugal, many Maranos resided in Covilhão, where their descendants are still to be found. In 1543 the fanatical populace desired to make victims of all the Maranos in a single auto da fé. A number fled the city, while many fell victims to the Inquisition.

Pedro Vaéz, a medical authority of the sixteenth century, practised in Covilhão.

COVO or **COVOS:** Name of a Jewish family of Salonica, Turkey, a branch of which lives at Widin, Bulgaria. As the name indicates, the family was originally of Covo, near Milan, Italy. There have been several rabbis of this name.

D.

Asher Covo, or **Raphael Asher Covo:** Chief rabbi of Salonica, Turkey, and man of letters; born 1799; died 1874. He officiated for twenty-six years, rendering great services to his community. Sultan 'Abd al-Majid decorated Covo with the Order of Nishan-i-Medjidie. He wrote "Sha'ar Asher," a collection of responsa on the Shulhan 'Aruk, with two appendixes. See Hazan, "Ha-Ma'alot li-Shelomoh," *s.v.*

S.

Elias Covo: Turkish rabbi and author; died at Salonica in 1689. He wrote "Adderet Eliyahu" (The Mantle of Elijah), containing forty-three responsa. These, together with responsa by Joshua Handali, were printed at Constantinople in 1739 under the title "Shene Me'orot ha-Gedolim." See Azulai, "Shem ha-Gedolim," *s.v.*

G.

M. Fr.

Isaac Covo: Palestinian Talmudist; born in 1770; died Aug. 18, 1854, at Alexandria, Egypt. Apparently he was of the family of Asher Covo, rabbi in Salonica and author of "Sha'ar Asher" (See Hazan, "Ha-Ma'alot li-Shelomoh," p. 6a). Isaac Covo succeeded Abraham Hayyim Gagin as the Sephardic hakam-bashi of Jerusalem in July, 1848. At that time his congregation was encumbered by debt. English sympathizers promised that if the venerable rabbi would visit London, they would wipe out the whole of the liabilities. Covo went first to Egypt, and had succeeded in raising £400 (\$2,000) in Cairo and Alexandria, when death

terminated his efforts. He was buried in the latter city.

Covo was the author of "Gersa de-Yankuta" (Teachings of Childhood) and "Tif'eret Bahurim" (The Glory of Young Men), still extant in manuscript.

J. D. E.

Jacob Hananiah Covo: Chief rabbi of Salonica; born there in 1825. Orphaned at the age of one year, he was educated by relatives. After passing through the yeshivot of Salonica, his native city, he continued his studies alone. Covo was a distinguished lawyer before becoming successor to the chief rabbi, Samuel Arditti (1888). For several years he was a member of the Mu'arrif-Majlisi (Council of Public Instruction). He founded the Mutual Aid Society ('Ez Hayyim) and a small rabbinical seminary (Bet-Yosef), and also reorganized the large Talmud Torah of Salonica. He has been decorated with the Order of the Medjidie, second class, and that of Osmanie, third and second classes.

S.

Joseph Covo I.: Chief rabbi and author; lived at Salonica at the end of the eighteenth century. He wrote a Hebrew work, "Gib'ot 'Olam" (Everlasting Hills), Salonica, 1744, a collection of responsa and sermons arranged according to the order of the pericopes. See Azulai, "Shem ha-Gedolim," *s.v.*

G.

Joseph Covo II.: Turkish rabbi and author; grandson of Joseph Covo I. He lived at Salonica at the end of the eighteenth century, and wrote "Ben Porat Yosef" (Fruit-Bearing Branch of Joseph), Salonica, 1797, a Hebrew work relating to the religious ordinances. See Azulai, "Shem ha-Gedolim," *s.v.*

S.

Raphael Hayyim Abraham Covo: Turkish rabbi and author; lived at Salonica, where he was chief rabbi from 1772 till his death in 1792; wrote the Hebrew responsa "Hayye Abraham," Salonica, 1804. See Hazan, "Ha-Ma'alot li-Shelomoh," *s.v.*

M. Fr.

COWAN, PHINEAS: English merchant, volunteer officer, and alderman; born at Chatham 1832; died at Buxton Oct. 22, 1899. From the first he took a keen interest in the Volunteer movement; he was a member of the Honorable Artillery Company; and in 1863 joined the Third London Rifles with three companies raised from his own workmen. He became lieutenant-colonel in this regiment, retiring in 1880 with the queen's permission to retain his rank. In 1883 he was elected sheriff of London and Middlesex during the first mayoralty of Sir R. N. Fowler, and in 1885 was elected alderman of the ward of Cordwainer, which office he resigned in 1892 owing to the claims of business.

Cowan served on the council of the Anglo-Jewish Association, and was closely associated with the Jews' Hospital and Orphan Asylum. He was a Conservative in politics, and in 1885 unsuccessfully

contested the newly formed constituency of White-chapel with Sir Samuel Montagu, Bart.

J. G. L.

COWEN, FREDERIC HYMEN: English conductor and composer; born at Kingston, Jamaica, Jan. 29, 1852; at the age of four he was taken to England. From his earliest years he enjoyed exceptional advantages in being brought into contact with the greatest artists during his father's treasurer-ship to Her Majesty's and Drury Lane theaters. At the age of eight he had composed the music of an operetta entitled "Garibaldi"; and, studying under Sir Julius Benedict and Sir John Goss, on reaching his twelfth year he was thoroughly at home in Beethoven's sonatas.

Cowen made his first appearance in public at the age of eleven, in the concert-room of Her Majesty's Theater; and the following year the young musician gave a concert at Dudley House, at which Trebelli, Joachim, and Santley assisted. When fourteen years old he left for Leipsic to enter the Conservatory; and there he studied under Reinecke, Moscheles, and Moritz Hauptmann. Returning to London, he gave several matinées at Dudley House, and then proceeded to Berlin to resume his studies. Among his more popular early works were the

Frederic Hymen Cowen.

cantata "The Rose Maiden," 1870; "The Language of Flowers"; and the "Scandinavian Symphony," 1880.

From 1871 to 1877 Cowen accompanied Her Majesty's Opera; he was conductor of the Covent Garden promenade concerts, 1880; of the Philharmonic concerts, 1888-92; and was specially summoned to Australia as conductor of the Melbourne Centennial Exhibition, 1888-89. Later he was appointed to succeed the late Sir Charles Hallé in the conductorship of the Manchester, Liverpool, and Bradford concerts, 1896.

Cowen's chief works, besides those already mentioned, are: "The Corsair," cantata, 1876; "Pauline," opera, 1876; "St. Ursula," cantata, 1881; "Welsh Symphony," 1884; "Sleeping Beauty," cantata, 1885; "Ruth," oratorio, written for the Worcester Festival, 1887; "Song of Thanksgiving," 1888; "St. John's Eve," cantata, 1889; "Thorgrim," opera, 1890; "Signa," an opera performed in Milan in 1893 and subsequently produced in London by Sir Augustus Harris; "The Water-Lily," cantata, written for the Norwich Festival, 1892; "Harold," an opera performed at Covent Garden, 1895; "The Transfiguration," oratorio, composed for the Gloucester Festival, 1895; "In Fairyland," suite, 1896; "Idyllic Symphony"; "Dream of Endymion," 1897; "Ode to

the Passions," 1898. Cowen has also published over 200 songs, duets, piano pieces, etc.

COWEN, ISRAEL: American lawyer and jurist; son of Bennett and Bertha Cowen; born in Houston, Texas, Dec. 12, 1861; received his early education in the public schools of Texas and California, and in a private school in New York city. He then studied seven years in Germany, and, returning to Chicago in June, 1881, received the degree of LL.B. from the Northwestern University, being admitted to the bar Jan. 4, 1883.

Cowen was appointed master in chancery of the superior court of Cook county, Illinois, May, 1896, serving until March, 1899, and was nominated for judge of the superior court upon the Democratic ticket in 1900. He has been for several years identified with the order of B'nai B'rith, and in 1893 was chosen president of District No. 6. Since July, 1891, Cowen has held a membership on the Board of Delegates on Civil and Religious Rights. For many years he was a member of the executive committee of the Hebrew Sabbath-School Union, and is connected with many other national and local Jewish organizations. At the memorial services for Sir Moses Montefiore, held in the Chicago Opera House Aug. 30, 1885, he was the presiding officer.

Cowen has been an extensive contributor, in poetry and prose, to the religious and secular press, and has delivered many lectures in all parts of the country on both Jewish and public questions.

A.

M. P. J.

COWEN (originally Cohen), LAURENCE: Journalist and politician; born in 1865 at Hull. For some years he lived at Newcastle-on-Tyne, where his father, E. Cohen, acted as hazzan. He went to London in 1888, and was on the staff of "Ariel," the paper conducted by Israel Zangwill. Later he established the journals "Commerce" and "Finance," of both of which he is (1901) the editor. These and "The Topical Times" are among the journals owned by his firm, "The Columbus Company, Limited," of which Cowen is the head. He is the founder and honorary secretary of the Article Club, an institution including most of the chief manufacturing firms in England. In 1899 he received the Knight Commander's Cross of the Order of Takovo, for services rendered in furthering the commercial interests of Servia. In Oct., 1900, he unsuccessfully contested Coventry in the Liberal interest.

Cowen in 1897 married Hélène Gingold, the novelist, granddaughter of Sulzer, the cantor and composer. His brother **Louis Cowen**, journalist, collaborated, under the pseudonym "J. Freeman Bell," with Israel Zangwill in his first book, "The Premier and the Painter," and in other productions.

G. L.

COWEN, PHILIP: Jewish publisher and communal worker; born in New York city in 1853; educated in the public schools; was one of the founders and publisher of "The American Hebrew" (see AMERICAN HEBREW), and has published several works of importance in American Jewish literature. He was interested in the organization of the Young Men's Hebrew Association, active in caring for the Russian Jewish immigrants in 1881-82, and collected the Jewish church statistics for the census of 1890. In 1903 Cowen was appointed supervisor of "The City Record," an important office in the city government of New York.

A.

COZBI ("deceiving"): A Midianitish woman, daughter of Zur, the leader of a tribe. She was put to death along with the Israelite Zimri by Phinehas (Num. xxv. 14-18).

E. G. II.

G. B. L.

CRACOW (Polish, **Kraków**): A city of Galicia, Austria, formerly the capital of the kingdom of Poland; founded about 700 c.e. There are no records of the early history of the Jewish community of Cracow, but it is probable that the Jews gained a foothold in the city after the German inhabitants had forfeited their privileges by a revolt against King Ladislaus Lokietek (the Short) in 1311, and that their position became more secure when that monarch removed his capital from Gnesen to Cracow (1312). The ruins of the palace of Lobzow, where Casimir the Great was said to have spent his leisure time with his beautiful Jewish mistress ESTERKA, are near Cracow, and a large mound of earth in the garden was revered as her grave as late as the first half of the nineteenth century. The only record of that period is the massacre in 1348, at the time of the Black Death riots. Records show that the Jews owned houses and lived in Cracow at the end of the fourteenth century, and that King JAGIELLO (or Jagellon) in 1400 bought from the Jew Jossman one of the stone houses which formed the new university (Sternberg, "Gesch. der Juden in Polen," p. 87). Riots against Jews occurred during the Easter week of 1407, when the mobs were incited by the priest BUDEK. The Jewish quarter was fired; and in the conflagration a church and several streets inhabited by Christians were destroyed. The visit of CAPISTRANO (Aug., 1453, to May, 1454) had

Fifteenth Century. there the same disastrous results for the Jews as it had in other places which he visited (see Responsa of R. M. Minz, No. 63, Cracow, 1617). In 1464 the Jews of Cracow were plundered, and thirty of them killed, by Crusaders. The attacks and riots became so frequent that King John Albert, in 1494, ordered the Jews of Cracow to settle in the present suburb of Kazimierz, which was then a separate city, and it has remained the Jewish quarter ever since. The Judengasse of

Cracow proper is the only witness to the fact that Jews lived there before they were confined to Kazimierz. The change gave them no greater security, for their new quarters were attacked with the usual results as soon as the king left the capital.

The students of the Cracow University were generally prominent in attacks on the Jews, and their persecutions led to the establishment of relations between the Jews and the authorities of the university, in the records of which the Jews of Cracow are first met with as a corporate body. A Jewish banker was appointed to lend money to students on pledges, and being appointed by the rector, he had the title of privileged servant of the university. In this way the banker became the protector of his fellows against the insults and cruelties of the students. A tax, at first irregularly collected, was also imposed upon the Jews of Cracow for the purchase of books and writing material for the students. This tax, known as "kozubalec," developed into a form of blackmail, levied under the guise of protecting them from attacks by the students.

Little is known of the communal and intellectual life of the Jews of Cracow until the sixteenth century, when both appear well developed under the rule of Sigismund I. (1506-48), who first reduced to order the administration of Jewish affairs in his dominions. It is believed that R. Jacob POLLAK, who later became rabbi of Prague, stood, in his younger days, at the head of the Jewish community of Cracow (Dembitzer, "Kelilat Yofi," Preface); but the first rabbi of Cracow known as such is R. Asher, the grandfather of R. Meir (MAHIRAM) LUBLIN. In his time (he was there as early as 1507, and died about 1532) there were in Cracow a number of Bohemian Jews, under a rabbi named R. Perez. As the result of a dispute between them and the Polish community under R. Asher, King Sigismund decided in 1519 that the latter owned the synagogue and could prevent the Bohemians from entering it.

Those times, although not entirely free from violence and persecution, were probably the best which the Jews of Cracow ever enjoyed under Polish rule. Though legally confined to Kazimierz, Jews had places of business in all the principal thoroughfares of Cracow, and even on the Ringplatz. Large penalties were imposed on the city for every riot or act of violence against the Jews. This law, however, passed by the Diet at the instance of Chancellor Christoph Szydłowiecki, fell into disuse, and was suspended by Sigismund in 1536. He nevertheless refused to grant the demand of the German merchants,

in 1542, that the number of Jews in **Sixteenth Century.** Cracow be limited, or to listen to their complaint that the Jews sent money out of the country by importing goods from Wallachia (Grätz, "Gesch." ix. 432); showing therein his willingness to protect the Jews of his capital against unjust discrimination. The waywode Peter Kmit, who rose in influence under Bona Sforza, Sigismund's second wife, did at one time spread the report that the Diet intended to grant to the Jews of Cracow complete liberty of commerce, but this was done for the purpose of extorting money from the Christian merchants. In 1539 Katharina Zelazewska, the widow of an alder-

man ("Rathsherr"), was burned at the stake for embracing Judaism. In 1556 cholera caused many deaths in the community, while riots by the students in December of that year, repeated in May, 1560, added to the distress of the Jews. At that time they numbered about 3,000. The "pinkes" (communal records) shows that no deaths occurred between November, 1590, and the Feast of Tabernacles, in 1591 and only one between April and September in 1594. In January of the following year the Jews rescued all the king's treasures during a conflagration in the palace, but this did not prevent the hanging of thirteen Jews on a false charge in 1596.

The "takkanot," or ordinances for the administration of the communal affairs of Cracow, preserved in the old "pinkes," and dated 1595, comprise an almost complete municipal code. They provide for dayyanim (assistant rabbis) as administrators for charities and other institutions; include rules for marriages and for the engaging of servants and apprentices; and contain various other regulations; all of which tends to prove that the Jews formed a practically independent community, with the management of their own internal affairs. This set of rules is, however, not the oldest extant, there being some isolated regulations regarding education and other subjects dating back to 1538, and signed by David Jonathan, scribe and treasurer of the community of Cracow, together with the other rabbis, parnasim, and notables who usually appended their names to documents of that nature.

While Cracow shared the decline of Poland, which began in the seventeenth century, it still held its ascendancy over the other Polish cities. A regulation of the COUNCIL OF FOUR LANDS, in 1606, decides that the gift to the king known as "spilkovi" (the "pin-tax" of later times) should always

be given by the "kahal" (community) of Cracow, and be repaid to it from the treasury of the council, "as this is for the good of the Jews in Great and Little Poland, Podolia, and Ukraine" (Wettstein, "Kadmoniyot," p. 26). The plague of 1623 devastated the Jewish quarters, and many of the communal institutions were closed.

Cracow did not regain its former prestige until about 1638, when arrangements were made to reopen the Talmud Torah. False accusations were very frequent at that period, when the community was disorganized and unable to protect its members. A

certain R. Asher Anshel was burned at the stake in Nisan (April), 1631, R. Samuel Zanvil meeting the same fate in the following month. Four Jews were tortured and executed in Nov., 1637, and various other atrocities were perpetrated. The interesting regulations about barber-surgeons deciding who had, and who had not, the right to practise that profession, dates from Dec., 1639, and tends to prove that the community was now again in its normal condition. The terrible days of Chmielnicki and the wars of the Cossacks were now approaching, and although Cracow did not suffer in the fateful

years of 1648-49, her turn came in 1655, when there was a general massacre of Jews, in which "hundreds and hundreds of heads of families lost their lives." There was no cessation even after peace was made, and in 1664 the druggist R. Matathia was burned "for blaspheming Christianity." A student riot on March 12, 1682, aroused the good king Sobieski to punish the rioters; but the Jews of Cracow found it safer to intercede in behalf of one of the leaders who was condemned to death.

Their fortunes went from bad to worse in the eighteenth century, when the impoverished and de-

THE MARKET AT CRACOW IN 1808.

(From a drawing by A. Schönn, by permission of D. Appleton & Co.)

graded community became heavily involved in debt. In Jan., 1726, the leaders and representatives issued a "keruz" (proclamation), calling upon the Jews of Cracow to contribute a twentieth part of their possessions to settle with the commission which the waywode had appointed to liquidate the debts of the community. The proclamation stated that the commission was a great boon, and that the sacrifice which the Jews of Cracow were re-

Eighteenth Century. quired to make was the only means of preventing the abolition of the community and averting terrible persecutions and possible exile. The last act of the community of Cracow, before the final partition of Poland, was the "herem," or great ban, pronounced there against the new sect of Hasidim on the 25th of Tishri (Sept. 29), 1785. It is signed by Rabbi Isaac ha-Levi and sixteen notables; but it had no more effect there than in other places, and Hasidism gained a firm hold in Cracow, which it has succeeded in retaining to this day.

After the city became a part of Austrian territory in 1795, the condition of the Jews was, if possible, rendered worse than before; but when it became in 1810 a part of the duchy of Warsaw, the Jews were in theory emancipated. Still this did not prevent the new government from enacting a law which made the kasher-meat tax paid by Jews a permanent feature of the revenue. The ill-fated duchy lasted only until 1813, and the Jews practically retained their old communal organization until the third great political change—the formation of the "Rzeczpospolita," or Free State of Cracow, by which the Congress of Vienna (1815) attempted to preserve the last vestige of Polish independence. The new commonwealth, which included Cracow and some of its surrounding territory, had about 18,000 Jews in a total population of 140,000. Roman Catholicism was the official religion of the state, and a special set of laws for the Jews was adopted by the commission on organization, which placed the old community in a very lamentable condition. The *kahal* was abolished, and the Jews were placed under

the "Gemeindevogt" (chief of the community), but not as free citizens. They were under special jurisdiction of the authorities, and burdened with so many harassing and degrading restrictions that their fate was rendered the most deplorable in Europe (Jost, "Neuere Gesch. der Israeliten," ii. 314 *et seq.*). This lasted with some slight modifications until the Free State was incorporated with the Austrian dominions in 1846. It became a part of Galicia, and has since then shared the lot of all other Jewish communities in Austria.

In the memorable year 1848 the Jews of Cracow, with the aid of Christian citizens, elected their rabbi, Dob Berush Meisels, as a member of the Reichsrath, which met at Kremsier, where he made a good impression. In the short-lived emancipation of that year Jews settled in all parts of the city, but in 1850 they were forced back to Kazimierz, few only remaining in Stradom, another suburb nearer the center of the city. Since their real emancipation in 1861 they have spread all over the city, although Kazimierz is to-day as much of a "Judenstadt" as when Jews were prohibited from living in any other part of the city.

Cracow was the first city in Galicia to adopt (1872), with some modifications, the new order of management for Jewish communities which was suggested by the "Musterstatut," the model plan issued by the representative of the central government after the emancipation.

Cracow, from the earlier part of the sixteenth century, was known as a great center of Talmudical learning, and counted among its citizens some of the greatest rabbinical scholars of Poland. It did not always have a rabbi or "ab bet din," whose authority was supreme over all the learned men of the city; for it often happened that two or three distinguished men stood each at the head of a "yeshibah," or great school, and acted independently of one another. R. Asher, mentioned above, was only a "rosh metibta," and so also was his contemporary R. Moses Storch. Moses Isserles (d. 1572); his brother-in-law R. Joseph b. Mor-

decai Gerson Kohen (d. 1591); Eliezer Ashkenazi (d. 1586); Isaac b. David Shapira (d. 1582); Mordecai Singer (d. 1576); Joel, the step-

Rabbis and Other Notable Jews. Kohen; Eliezer Treves; Meir b. Gedaliah; Moses Mordecai Margoliot; and many other learned men have all been rabbis, or great religious teachers, who

decided religious questions separately or in conjunction with others; but none of them was ever elected to the headship of the entire community. Sometimes one scholar, or even one who was not a recognized rabbinical authority, was placed, by the ruler of the land, at the head of the community, with legal jurisdiction, though not with the religious authority of the office. Such cases were rare, and most scholars succeeded one another in the limited authority which the community chose to confer on the heads of yeshivot, who were not especially selected as rabbis of the whole community.

The first rabbi who enjoyed the title of "ab bet din" of Cracow and the province was R. Isaiah Menahem b. Isaac (1591-99). His successor, R. Meshulam Phoebus, or Feivush, of Brest (d. 1617), was in Cracow at least as early as 1605.

Nathan b. Solomon Shapira became the head of a yeshibah in 1617, and held

this position until his death in 1638. He was not, however, rabbi of the community, that position being held by R. Joel ben Samuel SIKES. Nathan was succeeded as "rosh metibta" by R. JOSHUA HÖSCHEL B. JOSEPH of Wilna (died in 1648); and R. Joel (died in 1640), was succeeded (1644) by R. Yom-Tob Lipman Heller four years later, who also succeeded R. Joshua, dying in 1654. Rabbi JOSHUA HÖSCHEL BEN SAUL (known as "Reb Heschel") of Lublin became rabbi of Cracow the same year, dying in 1664. He was succeeded by R. Aryeh Löb b. Zachariah, "the prophet" who died in 1671. His successor was R. Aaron Samuel Kaidanower of Wilna, who died in 1676, and was succeeded by R. Isaac Harif Landau of Opatow, who died in 1683. The next rabbi, Aaron Teomin, who was chosen in 1687, did not arrive until 1690, and died four months after his arrival.

For about ten years, during which time no regular rabbi was appointed, R. Saul Katzeuellenbogen of Pinczow attended to some of the rabbinical duties. In 1693 R. Jehudah Löb, son of R. David

b. Samuel (Ture Zahab) of Lemberg, was chosen rabbi about 1700; he either died, or left for Brest. R. Saul, the son of the above R. Heschel, succeeded R. Löb, and died in 1707. There was again a vacancy for several years, for the next rabbi, R. Jehuda Löb b. Isaac of Shidlov, came to Cracow after 1714. He died between 1730 and 1732, and was succeeded by his son R. David Samuel Schmella, who lived until 1741. He was succeeded by R. Isaac Joseph Teomin, who, in 1745, returned to Breslau to succeed his father. After an interregnum of nine years R. Isaac Landau of Zolkiev was chosen, and held the position until his death in 1767. He was succeeded by R. Aryeh Löb b. Samuel of Tarnow, who died 1776, and was followed by R. Isaac ha-Levi of Lemberg, who died in 1799. R. Moses Solomon of Warsaw (Brody?), formerly rabbi of Koretz, was elected to succeed him; but after preaching one

sermon in the old synagogue he went to Warsaw, where he remained until his death in Dec., 1815. He retained, however, the title of rabbi of Cracow, for which he is said to have paid 500 ducats, and was so styled by others in references made to him in contemporary writings. R. Zebi David, son of the above R. Isaac ha-Levi, was acting rabbi until after the death of Moses Solomon, when he succeeded to

the full title, and died at an advanced age in Dec., 1831. After much dissension the above-mentioned R. Berush Meisels was chosen rabbi, and nominally held that position over twenty years. His title, however, was for the greater part of that time disputed by a wing of the Hasidim, who considered R. Saul Landau as the rabbi. When the latter died, and R. Berush went to Warsaw in 1856, R. Alexander, the son of R. Saul, was chosen rabbi, but died a few weeks later. R. Simon Schreiber, son of R. Moses SOFER, was chosen in 1858, and remained rabbi until his death, March 26, 1883. Since then Cracow has been one of the many Austrian communities which have no rabbi, because the various factions can not agree in any selection. R. Hayyim Nathan Dembitzer, in succession to his brother R. Jacob Moses (d. 1863), was acting rabbi until his death in 1892. One of the dayyanim, "the rosh bet din," is at present (1902) the acting rabbi.

The most important members of the Cracow community were usually officers of the kahal, and at the

Types of Cracow Jews.
(From "Oesterreichisch-Ungarische Monarchie in Wort und Bild.")

time when the Jews were under their own jurisdiction such officers carried with them not only religious but worldly authority. Until the abolition of the *kahal* in 1815, there were always four elected "roshim" (heads), five "tobim" (best, or chosen), fourteen *kahal* men, and three auditors, who practically ruled the community. Some-

Important Scholars. times one would, on account of his great learning, or wealth, or abilities as a leader, enjoy special distinction, like R. Abraham Israel Hendels, who died in 1660, of whom it is said that he was "the leader of the community of Cracow for over fifty years." There were also many distinguished physicians, such as Isaac, the favorite of kings Alexander and Sigismund early in the sixteenth century, and Samuel, the surgeon to the queen, who is mentioned in a suit for slander in which the above R. Asher was a witness. The physician Solomon Kolahora (d. 1597) was a favorite of King Stephen Bathory. The family, which is later called "Kalihari," was still known in the last century, and has furnished many druggists, physicians, Talmudists, and "parnasim" to the community. Of the noted rabbinical scholars who were "dayyanim," or "rosh yeshivot," may be mentioned: R. Isaac ha-Kohen of Kremetz, the father-in-law of R. Meir Lublin; R. Joshua Kohen, who was "rosh bet din" over thirty years, and died in 1631; R. Jehuda Selkil, son-in-law of R. Joel Särkes; R. Berechiah Shapiro; R. Hirsch ha-Kohen; and R. Mordecai Krasnik, who flourished in the middle of the seventeenth century. The scribes or secretaries of the community, those whose names are found signed under the valuable records preserved in the "pinkes," were usually also important men, and of them R. Matathia Delacrut (first half of seventeenth century), R. Isaac b. Hanoch (1660), and R. Jehuda Löb Kalischer (1738) deserve to be mentioned. The "shoḥetim," "bodekim," "menakkerim," and even the butchers of Cracow were, in olden times, famous for their learning, and one of them, R. Zebi of Cracow, who died 1593, was the author of an authoritative work on "sheḥiṭah." Among the most prominent families in later times was the MIESES family, which removed to Germany in 1863, while reference should also be made to such scholars as Dr. M. Duschak and Dr. Landau. Of the scholars now living in Cracow, Dr. Rubin, and F. H. Wettstein deserve mention.

Besides the old synagogue which was mentioned above, there are in Cracow the "new" synagogue built by Israel Isserles (father of R. Moses) in 1553; the "high" synagogue, built in 1633; one which bears the name of its builder, R. Isaac R. Yekel (d. 1673), and which was built in 1644; the "kuppah" (treasury) synagogue, so called because it was built (in 1647) by the community, not by private donation; and Popper's synagogue, which was finished in 1798. Cracow has also a temple of the Progressive congregation, numerous small "batte midrashim" and "stüblach," as the Ḥasidic houses of worship are called. Among the more considerable batte midrashim, of which there are about eight, the most famous is the one which tradition has connected with R. Nathan Schapiro (the author of the "Megal-

leh 'Amukkot"), whose memory is sanctified by the pious Jews of Poland.

The Jewish community, with a population of 25,000, is ruled by a "Cultusrath" of 30 members, of which the officers are: Dr. Leon **Present** Horowitz (former member of Reichs-**Conditions.** rath), president; Hirsch Landau, vice-president; Sigmund Pelican, secretary. Other officials are: Ch. L. Horowitz, acting rabbi; Pinhas Dembitzer, Joseph Lederberger, Kalman Gutwirth, Abr. Moses Rappoport, and Samuel Landau, rabbinats-assessors; Moses Landau, president of hebra kaddisha. Dr. Tohn is the rabbi of the Progressive or Liberal congregation. The university now has several Jewish professors (there were four in 1887), and the chamber of commerce is represented in the Reichsrath by Dr. Arnold Rappoport, a grandson of S. J. L. Rappoport of Prague, who in 1889 founded the "Israelitische Handwerksschule" (see Bloch's "Oesterreichische Wochenschrift," 1889, No. 24). The city has also various charitable organizations, and received a considerable share of the benevolent foundations of the late Baron de Hirsch in Galicia, which also includes another "Handwerksschule." The Sefat Emet society, founded in 1892, marked the beginning of the revival of the Hebrew language, and the Colonisations-Verein für Palästina, which was founded in 1893, was the forerunner of the Zionist movement, which has rapidly spread in Galicia in the last few years, and of which Samuel Fuchs, the editor of "Ha-Maggid," is one of the pioneers.

P. Wl.

—**Printing:** Cracow had the first Hebrew printing-establishment in Poland. The first books issued there were stated by Wolf to be a Pentateuch and the five Megillot (1530), and a Haggadah (1531), which do not, however, bear the name of the printer, and Steinschneider accordingly denies the existence of a press at Cracow at that date. Samuel Asher and Eliakim, the sons of Hayyim Halicz, established a printing-office in 1534, which survived only a short time. Johannes Halicz became a printer of Hebrew in 1538, and in 1539 he associated with him Johannes Kurzias of Glogau; but their enterprise was also short-lived, and the last work from their press is dated 1546. About a quarter of a century later Isaac b. Aaron of Prossnitz, also known as Isaac "Meḥokek," established a printing-press in 1569, which had a better fortune. He employed as corrector Samuel, son of the martyr Isaac Bohm, who

formerly lived in Venice, and the first book issued, the "Torat Haṭṭat" of R. Moses Isserles, afterward reprinted three times, shows improvement over books

Book- previously printed in Cracow. Many
Printing. rare, were issued from his press during the following thirty years. They included the *Yalkuṭ* (1596). The earlier works, issued before 1580, when Samuel left him, vie with the best Italian products, and the title-pages are dec-

The Polish establishments enjoyed a limited protection against foreign competition, the rabbis of Cracow and the COUNCIL OF FOUR LANDS having issued an edict that no Hebrew books printed in Poland should be reprinted in Italy, and the Italians, who had in Poland their best markets, thought it prudent to obey leaders who could effectively bar their products from that territory. Cracow was now declining, and the old printing-establishment was likewise losing ground. The last book it

PAGE WITH THE KOL NIDRE PRAYER, FROM A JUDÆO-GERMAN MAḤZOR PRINTED AT CRACOW 1571.

orated after the Italian style. In 1600 R. Isaac returned to Prossnitz, but part of his plant remained in Cracow, where his three sons, Aaron, Moses Joshua, and Issachar Bär, began, in 1602, the publication of the Babylonian Talmud, finished in 1608. They did not place their names on the title-pages as printers until after their father's death (1612); but they are found, in accordance with the customs of the time, among the typesetters whose names were affixed at the end of each book. Their printers' mark was a ram.

issued bears the date of September, 1628. There was also at that time another printing-office in Cracow, which issued one book, "Shomerim la-Boker," in 1627.

R. Nahum Meisels, a member of one of the best families of Cracow, embarked in the printing business in 1631. He imported new type from Venice, and made great efforts to secure prosperity for his venture. He printed many books, but the records of his business affairs show that he was generally financially embarrassed. He had frequently to bor-

row on unfavorable terms, or to take in partners; to pledge his plant and books to creditors; and, at last, to sell his house. The calamitous years of 1648-49 added to his difficulties, and in the latter year he failed, closing with the publication of "Zuk ha-'Ittim," by R. Meir of Shebreshin, in which the disasters of the Cossack war are described in the quaint rabbinical style of that period. What remained of the plant of R. Nahum Meisels, who died in 1659, was inherited by his son-in-law, Jehuda Löb Meisels, who began to print books on a small scale in that year and continued until 1670, when he, too, was forced to suspend work.

For over 130 years in the period of the decline of Poland, Cracow had no Hebrew printing-office. In 1803 the wealthy Naphtali Hirz ha-Kohen Schapiro opened an establishment, and in 1820 his son Aaron Solomon became his associate. They sympathized with the "Haskalah," or progressive ideas, and did much to encourage its literature, but were forced to close their establishment in 1823 after having sustained great losses. There was again an interval of about forty years, when Karl Budweiser, in 1863, began the printing of Hebrew books. The most notable among the works issued from his office, before he removed to Lemberg in 1874, are those of S. J. L. Rappoport and Mises.

In 1879 Joseph Fischer established a Hebrew printing-office, which is now in a flourishing condition, and which has contributed to make Cracow a center of Neo-Hebrew literature during the last two decades. Since HA-MAGGID, the oldest of Hebrew weekly periodicals.

removed to Cracow in 1892, that city has occupied an important position in the Jewish publishing world. Numerous Hebrew periodicals like "Ha-Eshkol," "Ha-Zeman," "Ha-Heker," "Mi-Mizrah umi-Ma'arab," "Ha-Dor," the Yiddish weekly "Der Jud," and the monthly "Die Jüdische Familie" (the last two published by the Ahiasaf of Warsaw) appeared there; all of them, however, are now defunct. Cracow's proximity to Russia makes it a convenient place from which Russian publishers can issue books and periodicals for circulation in Russia, where permission to found a newspaper is difficult to obtain. Freedom from rigid censorship gives Cracow an advantage over greater centers like Warsaw or Wilna.

CRADLE SONGS, JUDÆO-GERMAN:

Songs written as lullabies; these exist in great variety and profusion among the Jews speaking Judæo-German or Yiddish, and among them may be quoted the following:

For boys:

Inter Yankel's wigele
Shteit a gilden tsigele;
Tsigele is gifurn handlen
Rozhinkelach mit mandlen.
Rozhinkelach mit mandlen
Sanen di baste schoire.
Yankel wet leirnen Toire;
Toire wet er leirnen;
Briwelach wet er schriben,
In a eirlecher Id
Wet er af tomid farblaben.

Behind Jankel's cradle
Stands a golden goat;
Goat went to sell
Raisins and almonds.
Raisins and almonds
Are the best goods.
Jankel will learn Torah;
Torah will he learn;
Letters he will write.
And he will be a good Jew
And remain so for ever.

The last few lines occur in Bessarabia in the following form:

Lernen wet er keselder	He will learn properly
A por Shures, a por mailles.	A few lines, a few steps forward.
Moishinke wet paskenen shalles;	Moishinke will answer ritual questions:
Shalles wet er paskenen.	Ritual questions will be answered.
Drosches wet er darshenen.	And he will make religious speeches.

Another version, from the government of Suwalki, prophesies the boy's marriage:

Du west lernen Teire.	You will learn Torah,
Teire, Teire, in kepele.	Torah, Torah, will be in your head,
Kashe, kashe, in tepele.	Gruel, gruel, in your pot.
Puter mit breit shmirn.	You will put butter on your bread.
Der tate mit der mame soln derleben	May father and mother live
Dir tsu der chupe firn.	To bring you under the canopy.
Firt men, firt men, tsu der chupe;	They take him, they take him, to the canopy;
Firt men, firt men, fun der chupe;	They take him, they take him, from the canopy;
Seist men aruf eibm on.	They seat him at the head of all.
In gold un in silber ongeton.	He is dressed in gold and in silver.
Git men a shtikl fleish.	They give him a piece of meat.
Sogt der chosn as di fleish is heis;	And the bridegroom says it's too hot;
Git men a shtikele of,	They give him a piece of poultry,
Sogt er di of i post.	And he says the poultry is too tough.
Darfar wet er derleben	For this he will live
Mit der kale shlofn.	To have a bride.
Shlof zhe, shlof zhe in dainem ru,	Sleep, sleep in peace,
Mach zhe daine koshere eige-lach tsu;	Close your pretty eyes;
Mach zhe tsu, un efn onf;	Close them and open them;
Kimt der tate un wekt dir onf,	When papa comes to wake thee.
Sol er mir wekn, wi er wil,	Let him wake me as much as he likes.
Ich el mir stumachen di eige-lach un shwaigen shtil.	I will close my eyes and keep quiet.

A Rumanian version looks forward to the period of the bar mizwah:

A giter in a frimer Id wet mir dus kind blaben.	He will remain a good and pious Jew.
Toire tsuwe Moishe morushe.	Moses left us the Law as an inheritance.
Tsi der barnitswe wet essugn a drushe;	He will make a speech at his confirmation;
Tsi der drushe wet er sech shteln.	He will rise to make a speech.
Der futer mit der miter wet unqueln;	Father and mother will swell with pride;
Gur dem ollem wet san drushe gefeln—	And the community will like his speech—
Gur dem oilem, gur der welt.	The community and the whole world.
Der futer mit der miter wet gibn nach asach geld.	The father and the mother will give much money for his dowry.

The lullabies for girls are of a simpler nature, as may be shown by the following examples from the neighborhood of Kherson:

I.	I.
Shlof zhe, shlof, main taier kind;	Sleep, sleep, my dearest child;
Mach zhe tsu di eigelach gich un geshwind;	Close your eyes quickly;
Dain esn un dain trinken shteit shein greit do.	Your food and your drink are all ready.
Mach zhe tsu di eigelach af etleche sho.	Close your eyes for a few hours.

II.
Dzhades un bern i do ume-
dum;
Sei geien in droun arum;
Sei obn sheine meidelach
weinendik gefunen.
Obn sei gechapt un arainge-
worfen in brunen.

III.
Di sun is schon ufgegangu,
Der hon hot shon gekreit.
Er samelt keiches tsu der-
trogn
Wos far dir is ongegreit.

IV.
Di lewone is shon arouse-
gangu
Fon ir getselt;
Asei heich sol dain masel shai-
nen
In der gantsen welt.

II.
Beggars and bears are all
around;
They even walk around out-
side;
And if they find pretty girls
are crying,
They seize them and throw
them into the well.

III.
The sun has already risen,
The cock has already crowed.
He is gathering strength to
bear
What you are getting ready
for him.

IV.
The moon has already disap-
peared
From its tent;
So should your luck be
Over the whole world.

The following cradle song, the most elaborate col-
lected ("Globus," xx.), is perhaps one of the most
charming:

Shluf, man feigele,
Mach tsi dus eigele,
Shluf sech ois, man kind.
Di schlufst nit fraid.
Di weist nit ken laid;
Shluf sech ois gesint.
Ich, dan miter,
Bin dan beshitser;
Schluf sech ois gesint.
Der schluf der giter
Asoi, wi a hiter,
Shteit ba dir bis fri.
Mit san feigele
Iber dan wigele,
Dekt er dich sthail tsi.
Di shpilst sech af dan brist
Mit dane hentelech insist.
Der takt hot ba dir ken wert;
In mit di fingerlech
Oif di klingerlech
Piano in konzert.
Di west oifshtein fin den wig,
Hosti arbet genig
Far dir ungegrait atsind—
Shtikn shichelach,
Lalenen bichelech.
Shluf derwal, man kind,
As s'wet weren a roit flekele
Oif dan bekele;
Wet men wisen dan main.
Di west a kik tun finder sat,
Shtein inge lat,
Rach geklalt in shain.
Dech wel'n libn,
Presenten gibn,
Solste sugn nain.
Di eltern soln leiben
In nadn geibn
Toisenter asach;
Sech kishn in malechl,
Chusn mit der kalechl.
Mir wein sech frain glach
mit ach;
Di west gain a kleid
Mit shlaire banait.
Di west sech drein aher in
ahin;
In fin dan windele,
Man klain kindele,
Wet wern a karnolin;
Di west tantn in sal

Sleep, my birdie,
Close your eyes;
Sleep enough, my child.
You sleep with joy.
You know of no sorrow;
Sleep with health.
I, your mother,
Am your owner;
Sleep with health.
The good angel of sleep
Will, like a guardian,
Stand by you till morning.
With his wings
Over your cradle,
He covers you well.
You play on your bosom
With your little hands.
Rhythm has no value to you;
And with your little fingers
You play on the bells
As if it were a piano in a con-
cert.
When you shall go out from
your cradle,
You will have work enough
Prepared for you—
To embroider shoes,
To pray from books.
Meanwhile sleep, my child,
And a red spot will appear
On your cheek;
They will know you're mine.
You will look sideways,
And young men will stand
there,
Richly dressed and handsome.
They will love you,
And give you presents,
But you should refuse them.
Your parents shall live
And give you a dowry
Of many thousands;
Shall kiss each other on the
mouth
The bridegroom and the bride.
We will take joy in joy;
You will wear a dress
With lace sewed on it.
You will turn around and
around;
And your swaddling clothes.

Af dem gepitsten pol;
Di west unmachn a wind
Demeist taininju;
Westi heisen daminju.
Shluf derwal gesint,
Di west tsi der chipe gain
Ungetin shain.
Demeist westi wern rain fin
sind.
Di west sitsen bam tish
Di west esn gefilte fish.
Shluf derwal, man kind.
Di west habn a klains,
A fans in a shains;
Di west's libn wi ich libdech;
Di west im olskishen yeider
glidele.
West im singn dus lidele:
Shluf sech ois gesint!

My little child,
Shall become erinoline;
You will dance in a hall
On a polished floor;
You will create a wind
Then, my sweet one;
You will be called "lady."
Meanwhile sleep in health,
And you will go to the canopy
Nicely dressed.
Then you will be cleared from
sin.
You will sit at the table
And eat stuffed fish.
Meanwhile sleep, my child.
You will have a little one,
A good one and a pretty one;
You will love it as I love you;
You will kiss every limb,
You will sing to it this song:
Take your sleep in health!

CRAJOVA: Chief town of the district of Dolschi;
ancient capital of the Banat of Oltenie, Lower Wal-
lachia. It may be assumed that Jews settled here
at a very early period, some, doubtless, under Ladis-
laus Basarab between 1365 and 1367, after the ex-
pulsion of the Jews from Hungary by Louis the
Great. At the beginning of the seventeenth century
there was an organized community with a rabbi at
Craiova. Many Jews coming from Turkey on busi-
ness, settled in the city, and when Oltenie came
under Austrian rule, in 1718, the community was
probably augmented by new arrivals of Austrian
and Hungarian Jews. The letter of privileges
granted to the Bulgarian colonies (Oct. 1, 1727) by
Charles VI. of Austria, forbade the Jews, as well as
the Turks and the Greeks, of Craiova to display
their goods at the fairs held in the city, the great
annual fair being excepted. But when Oltenie again
became part of Wallachia, in 1739, the privileges
accorded to the Bulgarians were withdrawn, and
the Jews of Craiova were once more free to ply their
trades.

The community of Craiova, like all the Jewish
communities of Wallachia, was under the jurisdic-
tion of the Jewish starost of Bucharest, and there-
fore, since the beginning of the eighteenth century,
under that of the hakam-bashi of Jassy. There was
probably a starost-wekil at Craiova, who was raised
to the rank of starost in 1805.

It is impossible to estimate even approximately
the number of Jews formerly living at Craiova, for

Wallachia suffered greatly during the wars between Turkey and Austria, especially from the incursions of the bashi-bazouks and, later, from the armed hordes of Pasvant-Oglu. These inroads always forced the inhabitants of Crajova to disperse and seek refuge either beyond the Danube or beyond the Carpathians. According to the census of 1899 there were 2,891 Jews in a total population of 45,493. According to the statistics of trades made in 1900, which are very incomplete, there were 286 Jewish artisans. The Jewish population of Crajova is divided into two communities—Sephardim and Ashkenazim, the latter being the larger, and also the poorer. Each has its synagogue and its *hebra kadisha*, but both use the same cemetery. They do not agree well together, in spite of the boys' school they maintain in common; but the Zion Society, now Independent Order B'nai B'rith, has done much to moderate their differences and lead to a better understanding between them. In consequence of these differences, however, Crajova is the only important Rumanian community without a rabbi.

Though the Jews of Crajova have lived in perfect accord with their Christian fellow citizens, the city has become during the last twenty-five years a center of anti-Semitic agitation. During the national festival of May 10, 1883, mobs went through the city, smashing the windows of Jewish shops and wounding some persons; a few days later one of the Jewish synagogues was set on fire. In 1884 a bomb was thrown into the theater while a Jewish company was playing. Since that time anti-Semitic hostilities and agitation have greatly increased, so that the Jews are leaving the city in great numbers.
